- **QSSTs:** The General Explanation of the Tax Reform Act of 1986 by the Staff of the Joint Committee on Taxation, Note 33, page 242, explains, "Similarly, in the case of a qualified electing Subchapter S trust (§ 1361(d)(1)(B)) that is treated as a grantor trust (i.e., the beneficiary is treated as the owner for tax purposes), the material participation of the beneficiary is relevant to the determination of whether the S Corporation's activity is a passive activity with respect to the beneficiary."

In its April 5, 2013 comments to the proposed regulations under Code § 1411, the American Bar Association's Section on Taxation said:[2270]

> Because of the uncertainty of current law under chapter 1, we recommend that the Service issue guidance regarding material participation for a trust or estate for purposes of section 1411. We recommend that this guidance be issued as a new proposed regulation package rather than including these rules in these final Regulations.
>
> In this regard, we recommend that the new proposed regulation package would provide that material participation by a trust or estate can be accomplished through meeting at least one of three tests:
>
> > (a) The fiduciary materially participates under the standards that apply to individuals under previously promulgated Regulations.[2271]
> >
> > (b) The fiduciary, based on all of the facts and circumstances, participates in the activity on a regular, continuous and substantial basis during the year.[2272]

[2269] S. Rep. No. 313, 99th Cong., 2d Sess., Reprinted in 1986-3 C.B. (Vol. 3) 1, at 735.
[2270] The footnotes below use my numbering rather than the numbering used in the report. The report is at http://www.regulations.gov/contentStreamer?objectId=090000648127f7c2&disposition=attachment&contentType=pdf.
[2271] See Temp. Reg. § 1.469-5T(a)(1)-(5).
[2272] See Temp. Reg. § 1.469-5T(a)(7).

> (c) The fiduciary participates in the activity on a regular, continuous, and substantial basis, either directly or through employees or contractors whose services are directly related to the conduct of the activity.[2273]

It explained its recommendations as follows:

> The recommended alternative tests for material participation by a trust take into account the hybrid nature of a trust by allowing it to qualify based on the actions of the fiduciary (individual tests) and also those employed by the fiduciary in certain circumstances (similar to a closely held C corporation). When considering the efforts of the fiduciary, any time spent working on the activity should be considered towards meeting the material participation requirements regardless of whether the fiduciary is working on the activity as a fiduciary or in another role, for instance as an officer or an individual investor. If there are multiple fiduciaries, time spent by the fiduciaries could be aggregated for purposes of determining material participation.
>
> Applying only the standards for an individual to be a material participant in an activity would ignore the obvious differences between individuals and trusts. In what is apparently the only court case to address the issue to date, the court in *Mattie K. Carter Trust*[2274] found the trust to be analogous to a closely held C corporation and concluded that "the material participation of the Carter Trust in the ranch operations should be determined by reference to the persons who conducted the business of the ranch on Carter Trust's behalf, including [the trustee]." The Service took the position that when determining active and passive activities under section 469, only the activities of the fiduciary are to be considered when meeting the standard of regular, continuous, and substantial participation. The taxpayer argued that the participation of the trust's other employees and agents also should be included since the trust could only participate in an activity through its fiduciaries, agents and employees much like a corporation.
>
> The court held for the taxpayer, finding that a trust was most analogous to a corporation and that the acts of its agents would be deemed acts of the taxpayer. Based on the activities of the trust through its trustee, fiduciaries, employees, and agents, the material participation requirement was satisfied. The Court noted that it had studied the "snippet" of legislative history purporting to provide insight on how Congress intended section 469 to apply to a trust's participation in a business, including the Senate Finance Committee Report and the footnote in the Joint Committee on Taxation's Explanation, but did not find it helpful.
>
> In private rulings, the Service has taken the position that it is appropriate in the trust context to look only to the activities of the fiduciary to determine material participation.[2275] The IRS Audit Technique Guide for Passive Activity Loss (the

[2273] Based upon Temp. Reg. § 1.469-1T(g) (rules for C corporations). This regulation was in turn based on I.R.C. § 469(c)(7)(C).
[2274] *Mattie K. Carter Trust v. U.S.*, 256 F. Supp. 2d 536 (N.D. Tex. 2003).
[2275] In TAM 200733023 (Aug. 17, 2007), the Service took the position that a trust satisfies the material participation test only if the fiduciaries (i.e., the trustee or trustees) are involved in the operations of the trust's business activities on a regular, continuous, and substantial basis. See

"ATG"), addresses material participation by trusts. The ATG states that the Service will generally not raise an issue if the trustee meets one of the material participation tests included in Regulation section 1.469-5T(a). We view this position as too restrictive given the hybrid nature of trusts and estates.[2276]

> The approach outlined above would maintain the approach outlined in private rulings requiring material participation by the fiduciary, but would also allow certain trusts which meet the requirements to be treated analogous to a closely held C corporation and apply similar standards to qualify for active treatment.

Although neither the Audit Technique Guide nor the above comments focus on whether the trustee's participation is in the trustee's fiduciary capacity, TAM 201317010 did focus on that issue, finding no material participation:

> Notwithstanding the decision in *Mattie K. Carter*, the Service believes that the standard annunciated in the legislative history is the proper standard to apply to trusts for purposes of § 469(h). Thus, the sole means for Trust A and Trust B to establish material participation in the relevant activities of Company X and Company Y is if the fiduciaries, in their capacities as fiduciaries, are involved in the operations of the relevant activities of Company X and Company Y on a regular, continuous, and substantial basis.
>
> A fiduciary must be vested with some degree of discretionary power to act on behalf of the trust. *United States v. Anderson*, 132 F.2d 98 (9th Cir. 1942). Although the Trusts represent that A was involved in the day-to-day operations and management decisions of Company X and Company Y, A's powers as Special Trustee were restricted by Article XI of the trust agreements. As Special Trustee, A lacked the power to commit Trust A and Trust B to any course of action or control trust property beyond selling or voting the stock of Company X or Company Y. The work performed by A was as an employee of Company Y and not in A's role as a fiduciary of Trust A or Trust B and, therefore, does not count for purposes of determining whether Trust A and Trust B materially participated in the trade or business activities of Company X and Company Y under § 469(h). A's time spent serving as Special Trustee voting the stock of Company X or Company Y or considering sales of stock in either company would count for purposes of determining the Trusts' material participation. However, in this case, A's time spent performing those specific functions does not rise to the level of being "regular, continuous, and substantial" within the meaning of § 469(h)(1). Trust A and Trust B represent that B, acting as Trustee, did not

also PLR 201029014 (July 23, 2010). A person "required to hold and conserve the property, or the proceeds of the sale thereof, for future distribution" to others is a trustee. Rev. Rul. 61-102; see also Rev. Rul. 74-273. So is a person with "certain discretionary powers of administration and management with regard to the property ….[who] could vote at any stockholders' meeting; approve or oppose any reorganization or refinancing proposal; invest earnings in government obligations; retain counsel; exercise or sell conversion or subscription rights; hold the property in its own name or in a street name; and petition the court with respect to any other disposition concerning the property it considered to be in the best interest of the unknown owner." Rev. Rul. 69-300. A bank was not a fiduciary when it held an estate's money during litigation over the estate, paid interest, but performed no administrative duties for the estate. Rev. Rul. 82-177.

[2276] TAM 200733023 (Aug. 17, 2007).

> participate in the day-to-day operations of the relevant activities of Company X or Company Y. Accordingly, we conclude that Trust A and Trust B did not materially participate in the relevant activities of Company X or Company Y within the meaning of § 469(h) for purposes of § 56(b)(2)(D) for the tax years at issue.

Because this issue has a big impact on the 3.8% tax on net investment income,[2277] the Treasury Department and IRS are considering whether issue formal guidance at some point, even though they did not issue guidance when they finalized the regulations they issued in December 2012.[2278]

Meanwhile, the Tax Court held that, when a nongrantor trust created its own LLC to manage a business and the trustees themselves were paid by the LLC for managing the

---

[2277] See part II.I 3.8% Tax on Excess Net Investment Income (NII), particularly part II.I.8 Application of 3.8% Tax to Business Income.

[2278] The preamble to the final regulations issued in T.D. 9644 stated:

> F. Material participation of estates & trusts
>
> Several commentators noted that the enactment of section 1411 has created an additional and compelling reason for the need to determine how an estate or a trust materially participates in an activity. An estate's or a trust's income or gain from a trade or business activity in which the entity materially participates does not constitute income from a passive activity under section 469 or section 1411. One commentator noted that, in the case of estates or trusts that have not incurred losses from a passive activity, those estates and trusts previously have not had to characterize either losses or income under section 469.
>
> Commentators stated that the legislative history of section 469 suggests that only a fiduciary's participation should control in determining whether an estate or a trust materially participates in a trade or business activity. In certain situations, case law has concluded that the participation of beneficiaries and employees also should be considered. One commentator noted that case law and IRS guidance conflict, leaving taxpayers with uncertainty in determining the material participation of a trust.
>
> A number of commentators requested that the Treasury Department and the IRS provide guidance on material participation of estates and trusts. However, the commentators acknowledged that guidance on material participation would apply under both sections 469 and 1411, and consequently suggested the initiation of a guidance project to propose the rules for which § 1.469-5T(g) has been reserved.
>
> The Treasury Department and the IRS believe that the commentators have raised valid concerns. The Treasury Department and the IRS considered whether the scope of these regulations should be broadened to include guidance on material participation of estates and trusts. The Treasury Department and the IRS, however, believe that this guidance would be addressed more appropriately in the section 469 regulations. Further, because the issues inherent in drafting administrable rules under section 469 regarding the material participation of estates and trusts are very complex, the Treasury Department and the IRS believe that addressing material participation of trusts and estates at this time would significantly delay the finalization of these regulations. However, the issue of material participation of estates and trusts is currently under study by the Treasury Department and the IRS and may be addressed in a separate guidance project issued under section 469 at a later date. The Treasury Department and the IRS welcome any comments concerning this issue, including recommendations on the scope of any such guidance and on specific approaches to the issue.

business, the trust was able to count the trustees' participation.[2279] However, rather than simply disregarding the LLC (which was a disregarded entity for income tax purposes) and holding that the trustees were working for the trust (for income tax purposes), instead the court focused on the trustee's duty to the trust when working for the LLC.[2280] That focus might open the door for an attack on the premise of TAM 201317010 that a trustee who acts as an individual is not also serving as a trustee.

Since then, the AICPA,[2281] ABA Section on Taxation,[2282] and ACTEC[2283] have made formal comments to the government.

[2279] *Frank Aragona Trust v. Commissioner*, 142 T.C. 165 (2014). The petition, reply, and briefs are at http://tcinstitute.com/rv/ff0012e61ef3812cbb3202812343b05e2fbe2da8/p=3879220. CCA 201244017 had taken the position that a trust cannot be a real estate professional.

[2280] The court said:

> Even if the activities of the trust's non-trustee employees should be disregarded,[15] the activities of the trustees--including their activities as employees of Holiday Enterprises, LLC--should be considered in determining whether the trust materially participated in its real-estate operations. The trustees were required by Michigan statutory law to administer the trust solely in the interests of the trust beneficiaries, because trustees have a duty to act as a prudent person would in dealing with the property of another, i.e., a beneficiary. Mich. Comp. Laws sec. 700.7302 (2001) (before amendment by 2009 Mich. Pub. Acts No. 46); see also *In re Estate of Butterfield*, 341 N.W.2d 453, 459 (Mich. 1983) (construing Mich. Comp. Laws sec. 700.813 (1979), a statute in effect from 1979 to 2000 that was a similarly-worded predecessor to Mich. Comp. Laws sec. 700.7302). Trustees are not relieved of their duties of loyalty to beneficiaries by conducting activities through a corporation wholly owned by the trust. *Cf. In re Estate of Butterfield*, 341 N.W.2d at 457 ("Trustees who also happen to be directors of the corporation which is owned or controlled by the trust cannot insulate themselves from probate scrutiny [i.e., duties imposed on trustees by Michigan courts] under the guise of calling themselves corporate directors who are exercising their business judgment concerning matters of corporate policy."). Therefore their activities as employees of Holiday Enterprises, LLC, should be considered in determining whether the trust materially participated in its real-estate operations.[16]
>
> [15]We need not and do not decide whether the activities of the trust's non-trustee employees should be disregarded.
>
> [16]We need not consider the effect of sec. 469(c)(7)(D)(ii), which provides that for purposes of sec. 469(c)(7)(B) personal services performed as an employee are generally not treated as performed in real-property trades or businesses. This rule has no application to the resolution of this case because, as we explain *infra*, the IRS has confined its challenges to the trust's qualification for sec. 469(c)(7) treatment to two challenges: (1) that trusts are categorically barred from sec. 469(c)(7) treatment, and (2) the trust did not materially participate in real-property trades or businesses. Thus, we need not, and do not, determine how many hours of personal services were performed by the trust in real-property trades or businesses. We also note that the IRS does not cite sec. 469(c)(7)(D)(ii) in its brief.

II.K.2.b.ii. Participation by a Nongrantor Trust: Planning Issues

Some have suggested that the trustee's participation in the business will cause the trust to be taxed as a business entity. For trusts created for traditional estate planning purposes, that concern is not justified. See part II.K.2.b.iii Participating in Business Activities Does Not Convert a Trust Created by Only One Grantor into a Business Entity.[2284]

Consider giving a beneficiary who participates in the activity a role as a trustee, whose authority is limited to acting on behalf of the trust with respect to investments that need to be tested under the passive activity rules. Depending on the state, one might be able to use a nonjudicial settlement agreement to not only add a special trustee for this purpose but also protect the trustee from liability.[2285] Note that the legislative history refers to ***an*** executor or fiduciary, not ***the*** executor or fiduciary, implying that material participation by any one co-trustee will cause a trust to be treated as materially participating in an activity.

At first glance, it might seem an easy matter simply to designate as a special trustee an employee of the business. Note, however, that the special trustee must be participating on behalf of the trust and not merely on his or her own behalf. The trustee's work on behalf of the trust as an investor in an activity is not treated as participation in the activity unless the trustee is directly involved – on behalf of the trust - in the day-to-day management or operations of the activity.[2286] Consider these issues:

- What activities would an owner of that entity typically perform?
- Does the company want the individual to be protecting the trust's interests rather than the company's?[2287]
- As an active participant in running the business, the trust might have fiduciary duties to the other owners that it might not have as a passive owner. The trust might already have duties to other owners if the trust has a controlling interest, but being active in the business would tend to strengthen these duties to others. If the business entity is an LLC, these duties to other owners might be more

2283 http://tcinstitute.com/collect/click.aspx?u=/G1GTPto3VXI/DpFcjQL1otq3HrOC9ELmHwOC+4laW5pGgh0FR5yZJDEt8ehQMicxjC0od0egqdZH1P8mlbZQ43UvnjYGixP&rh=ff0023c897e8a4321085e24d8c4387625763f0f4.

2284 Particularly fn. 2302.

2285 Section 111 of the Uniform Trust Code, found at www.uniformlaws.org/shared/docs/trust_code/utc_final_rev2010.pdf; RSMo § 456.1-111. Subsection 4 authorizes a nonjudicial settlement agreement to interpret the terms of the trust, approve a trustee's report/accounting, direct a trustee to refrain from performing a particular act, grant a trustee any necessary or desirable power, accept a trustee's resignation, appoint a trustee, determine a trustee's compensation, transfer a trust's principal place of administration, and resolve the liability of a trustee for an action relating to the trust.

2286 See part II.K.1.a.v What Does Not Count as Participation.

2287 See part III.A.4.c.iii Advising Clients about the UPAIA Section 505 Changes regarding the trustee's fiduciary duties to beneficiaries when the trustee is active in the business.

easily reduced than perhaps for other types of entities, depending on applicable state law.

- Because the trustee is participating on behalf of the trust rather than for his or her own benefit, should the trust be compensated for the trustee's services and then pay the trustee itself, rather than the trustee receiving compensation directly from the company? If so, then the trustee needs to consider whether the trustee is an employee or independent contractor (generally the latter) and the related employment taxes and insurance.

- Because the trust itself is participating in a trade or business, it might subject itself to Form 1099 filing requirements for payments it makes.

- A very significant purpose of using a business entity is to protect its owners from liability. However, to the extent that the trust is directly involved in the business activity, it would subject itself to liability for the trustee's actions or omissions as the trust's agent. The trust may form an LLC that it wholly owns to provide those services and have the trustees provide those services through the LLC;[2288] if run in a financially responsible manner, the LLC might shield the trust from liability for managing the business.

Additionally, consider the trust's legal rights as an owner. If the entity is a corporation, to what course of action could a trustee commit a trust with respect to stock the trust owns other than voting it and selling it? Note that the trustee's actions as an investor do not count in determining material participation.[2289]

Generally, under corporate law a shareholder cannot act on behalf of a corporation. All the shareholders can do is elect directors. Directors then make strategic decisions (often not more than 100 or 500 hours' worth) and delegate the daily running to the officers (who are by definition employees). So generally a trust as a shareholder in a corporation has no authority to participate in the business' affairs. TAM 201317010 does not seem to understand this inherent limitation and appears geared toward businesses that are wholly owned by trusts.

Given that the IRS is reading the legislative history in a manner that makes it difficult for a trust to materially participate in its role as a shareholder, one might consider the following if the entity is an S corporation:

- Many states have "close corporation" statutes or other statutes that allow shareholders to directly run a corporation, much like an LLC is run by its members.[2290] They also have built-in buy-sell provisions, some of which might protect a corporation's S election (once in place).

[2288] *Frank Aragona Trust v. Commissioner*, 142 T.C. 165 (2014).

[2289] See part II.K.1.a.v What Does Not Count as Participation.

[2290] See fn 776 and accompanying text regarding close corporation statutes as providing protection against creditors. Such statutes are in the minority. Of the states that do not have close corporation statutes, almost all of them have buried in their corporate law provisions allowing the shareholders to bypass the board of directors and directly run part or all of the business. A chart of states in an article co-authored with Richard Barnes was published

- Consider an LLC or limited partnership taxed as an S corporation,[2291] with an operating agreement or partnership agreement that has distributions following S corporation single-class-of-stock rules rather than capital accounts, and either a limited liability partnership registration in place to protect the general partner (making the partnership an LLLP)[2292] or having the limited partnership do business through an LLC subsidiary. Generally, for an existing corporation, a merger into the new entity (LLLP or the LP's LLC subsidiary) would be required.[2293]

In either case, if all the S corporation stock the trust has is old-and-cold nonvoting stock, do a Code § 1036 tax-free swap for voting stock, giving enough voting stock to constitute adequate and full consideration (using a formula transfer). The holder of the voting stock would file a gift tax return adequately disclosing the transaction as a non-gift.

Also, consider having the entity pay the trust for services rendered managing the business, issuing IRS Form 1099-MISC to the trust.[2294] The trust would report the management income and expense on Schedule C or C-EZ.[2295] Trusts do not pay self-employment tax. After taking a reasonable profit on the payment, the trust would compensate the trustee for services rendered. Unlike most trusts, because the trust is now engaging in a trade or business, the trust would issue IRS Form 1099-MISC to the trustee for those services, and the trustee would report the income in his/her Form 1040, Schedule C, and pay self-employment tax;[2296] however, the IRS did not object when a

March/April 2015 in *Probate & Property*, which is reproduced at http://www.thompsoncoburn.com/Images/Newsletters/6131013_1.pdf; links supporting this chart were prepared by a summer associate in 2014 and are found in my firm's internal document number 5977514, which is reproduced at http://www.thompsoncoburn.com/Images/Newsletters/5977514_7.pdf.

[2291] As described in part II.L.5.b Self-Employment Tax Caution Regarding Unincorporated Business That Makes S Election, certain regulations might lead one to believe that an S election does not shield LLC owners from self-employment tax; however, those regulations appear to be obsolete. For those who are concerned about those regulations, a limited partnership would be the preferred state law entity, to obtain the self-employment tax exclusion available to limited partners, which is described in part II.L.4 Self-Employment Tax Exclusion for Limited Partner.

[2292] See parts II.C.11 Limited Partnership and II.C.12 Limited Liability Partnership Registration.

[2293] See part II.P.3.i Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization.

[2294] For Thompson Coburn LLP personnel – see document number 5879530.

[2295] For an ESBT, management fee income is not part of the S portion, because it is not a K-1 item. Reg. § 1.641(c)-1(d)(1), (2). The same answer applies to QSSTs. Reg. § 1.1361-1(j)(7), (8).

[2296] Generally, nonprofessional trustees do not pay self-employment tax. Rev. Rul. 58-5, reproduced in large part in fn. 1572, found in part II.I.7 Interaction of NII Tax with Fiduciary Income Tax Principles. However, the Rev. Rul. modifies that position when the trustees carry on a trade or business:

> *Example (1). Executor who receives a flat fee for administering the estate*. A, a nonprofessional fiduciary, receives a flat $10,000 for administering the estate of B. B's gross estate is valued at $150,000 and includes a trade or business which A manages for the period of time required to distribute the assets of the estate. Under the laws of the State in which B's estate is probated, an executor is entitled to a five percent commission based upon the value of the assets distributed. Since A distributed the entire estate worth $150,000 he would have been entitled to $7,500 executor's commissions, based upon the statutory five percent allowance. Inasmuch as A, pursuant to court order, actually received $10,000 instead of $7,500 in commissions, the excess, or $2,500, is

trust formed its own LLC (disregarded for income tax purposes) to manage the business, which LLC reported on Forms W-2 (instead of Form 1099-MISC) compensation that the LLC paid the trustees.[2297]

Does changing the individual's participation from being a direct employee to serving as a trustee affect that person's material participation as an individual? No – although the IRS takes the position that work a trustee's work as an individual does not count as participation by the trust, work done as a trustee apparently counts towards the trustee's participation as an individual.[2298] Consider, however, any impact on employee benefits.

Finally, to avoid the 3.8% tax on net investment income, consider converting an ESBT into one or more QSSTs[2299] if the beneficiary works for the business (or could do so in any capacity for more than 100 hours per year)[2300] and a QSST's mandatory income

---

regarded as being attributable to the operation of the trade or business of the estate. A must therefore treat this $2,500 as earnings from self-employment. The remaining $7,500 is regarded as being attributable to the normal fiduciary duties of marshalling the assets of the estate and should not be treated as trade or business income. On the other hand, if A's total fee for administering the estate was equal to or less than $7,500 (the statutory executor's allowance in this case), and if nothing was said in the court order with respect to allocation of the fee, the entire fee would be regarded as being attributable to A's fiduciary activities and no part of the fee would be treated as trade or business income to A.

Example (2). Executrix who receives a special fee for handling the estate's business. C, the sole executrix of the estate of her husband, operates a drugstore belonging to the estate, pending dissolution of the estate. As her commission for handling the estate, C receives, pursuant to court order, $5,125 (based upon a percentage of the value of the assets distributed) and $500, in addition, for the operation of the drugstore. Under these circumstances, only the $500 commission for the operation of the drugstore constitutes earnings from self-employment. The $5,125 commission, based upon the value of the assets distributed is not related to the operation of the trade or business, and, accordingly, does not constitute earnings from self-employment.

Example (3). Coexecutor who does not participate in the operation of the estate's business. D and E are coexecutors of an estate which includes a trade or business. D is totally unfamiliar with the operation of the business and leaves the entire management of the business to E. Under these circumstances, D, who does not participate in the operation of the business, cannot be treated as being in a trade or business. The fees received by D do not constitute net earnings from self-employment. E, however, actively participates in the operation of the business and the compensation received by him for the management of the estate's trade or business constitutes net earnings from self-employment.

2297 *Frank Aragona Trust v. Commissioner*, 142 T.C. No. 9 (2014). The court did not mention this nuance, but the facts described somewhere in the petition, reply, and briefs mentioned that Forms W-2 were issued; see http://tcinstitute.com/rv/ff0012e61ef3812cbb3202812343b05e2fbe2da8/p=3879220.

2298 See fn. 2038 in part II.K.1.a.ii Material Participation.

2299 See part III.A.3.e.v Converting a Multiple Beneficiary ESBT into One or More QSST.

2300 Because a QSST is a grantor trust deemed owned by the beneficiary, the beneficiary's participation, not the trustee's, is what counts. See text accompanying fns. 1555-1556. Although normally participating in owner-type activities is required to avoid the passive loss rules, regulations governing the 3.8% tax do not mention this issue and therefore do not appear to impose that requirement for avoiding the 3.8% tax. See part II.K.1.a.v What Does Not Count as Participation. For more planning tips involving how to meet the participation requirements and requirement does not do violence to the estate planning goals. However, the trustee's participation will become important again if the stock or business assets are sold.[2301] See part III.A.3.e.iv Flexible Trust Design When Holding S Corporation Stock.

II.K.2.b.iii. Participating in Business Activities Does Not Convert a Trust Created by Only One Grantor into a Business Entity, But Be Wary If Multiple Grantors

If the beneficiaries are associates in a joint enterprise for the conduct of business for profit, then the trust might be characterized as a business entity. See part II.D.1 Trust as a Business Entity.

However, if the beneficiaries did not create the trust, the trust will not be considered a business entity merely because the trustee engages in business operations.[2302]

II.K.2.b.iv. Character of Passive Activities Flowing from Nongrantor Trust to a Beneficiary; Interaction with Special Depreciation Rules

Generally, income retains its character when flowing from a nongrantor trust to a beneficiary.[2303] Therefore, income's character as passive or nonpassive at the trust level also controls at the beneficiary's level.

---

qualify for an exclusion from the 3.8% tax, see part II.I.8.f Summary of Business Activity Not Subject to 3.8% Tax.

2301 See part II.J.17 Planning for Grantor and Nongrantor Trusts Holding Stock in S Corporations in Light of the 3.8% Tax. This is important only for net investment income tax purposes, as a complete disposition of a passive activity removes the passive loss restrictions for that activity. Code § 469(g).

2302 I am unaware of any case addressing this issue after the adoption of Reg. § 301.7701-4(a). The regulation's preamble, T.D. 8697, provides:

> The regulations provide that trusts generally do not have associates or an objective to carry on business for profit. The distinctions between trusts and business entities, although restated, are not changed by these regulations.

The last major pre-1997 case, *Bedell Trust v. Commissioner*, 86 T.C. 1207 (1986), *acq*. 1987-2 C.B. 1, held:

> We cannot find, where one person has created an entity, unilaterally distributed interests in it to others, and then restricted their ability to transfer their interests, that there exists "a voluntary association of individuals for convenience and profit", which characteristic is the very essence of an association. *Blair v. Wilson Syndicate Trust*, 39 F.2d 43, 46 (5th Cir. 1930)….
>
> We conclude that the beneficiaries, who neither created nor contributed to the trust, whose interests in the trust are not transferable, and only a few of whom participate in the trust affairs, are not associates and their trust is not an association.

The court further commented:

> We understand that the Government regarded this case as a test case in respect of testamentary trusts and trusts engaged in the conduct of a business, and that high levels in the IRS were active in pressing the matter. It is difficult to imagine a more unsuitable vehicle than this case for any such purpose, and we think it regrettable that extensive misguided efforts were exerted to such a fruitless end in this litigation.

2303 See fn. 1564, found in part II.I.7 Interaction of NII Tax with Fiduciary Income Tax Principles, and fns. 1927-1928, found in part II.J.8.f.i.(b) Allocating Income Items Among Those Receiving It.

In support of this, note that private letter rulings have held that passive rental income earned by a pooled income fund was passive income in the hands of its beneficiaries.[2304]

In grouping passive activities, a beneficiary's beneficial interest in a trust's ownership of an activity cannot be grouped; all grouping is done at the trust level.[2305]

Regarding applying the passive loss rules to the beneficiary's share of directly apportionable deductions (such as depreciation, depletion, and amortization), the IRS instructs taxpayers:[2306]

> Any directly apportionable deduction, such as depreciation, is treated by the beneficiary as having been incurred in the same activity as incurred by the estate or trust. However, the character of such deduction may be determined as if the beneficiary incurred the deduction directly.
>
> To assist the beneficiary in figuring any applicable passive activity loss limitations, also attach a separate schedule showing the beneficiary's share of directly apportionable deductions derived from each trade or business, rental real estate, and other rental activity.

However, some commentators suggest that depreciation deductions flow through to the beneficiaries separately only to the extent allowed after applying the passive loss rules at the trust level.[2307] The best reconciliation I can come up with is the following example: Suppose the trust has $100 rental income before depreciation and $60 depreciation, for $40 net income; therefore, the depreciation is fully deductible under the passive loss rules applied at the trust level. The rental income and depreciation deductions are separately stated on the trust's K-1s to beneficiaries.

[2304] Letter Rulings 200608002 and 200608003 held:

> … the rental of land and buildings by the Fund to X will be a passive activity under § 469(c). Because the excess of aggregate income from all passive activities over the aggregate losses from all passive activities will enter into the computation of DNI, then the characterization rule of § 662(b) will apply. Thus, if the Fund's gross income in any year from rental of the land and buildings exceeds its losses (including a ratable portion of the Fund's indirect expenses) in that year from rental of the land and buildings, amounts distributed from the Fund that are includible in the gross income of an income beneficiary for that year will be income to that beneficiary from a passive activity, within the meaning of § 469, in the same proportion as the Fund's net income from that rental that enters into the computation of the Fund's DNI for that year bears to the Fund's entire DNI for that year.

Letter Ruling 8806065 took a similar position.

[2305] See fn. 2088.

[2306] 2013 Form 1041 Instructions, page 38, explaining how to prepare line 9 of Schedule K-1 issued to the beneficiaries. The instructions also refer to depletion and amortization. See part II.J.11.a.ii Allocating Depreciation to Beneficiaries (Including Surprising Result Regarding Losses).

[2307] Sutton & Howell-Smith, ¶ 15.03 Application of Passive Loss Limitations at the Entity Level, *Federal Income Taxation of Passive Activities* (WG&L) (referring to the position the AICPA took in the late 1980s); Schmolka, "Passive Activity Losses, Trusts, and Estates: The Regulations (If I Were King)," *N.Y.U. Tax Law Review*, vol. 58, p. 191 (2005).

On the other hand, a source that CPAs often use for tax preparation states:[2308]

> When net passive income less depreciation results in a net passive loss, a PAL limitation applies at either the trust or beneficiary level, or both. If the depreciation is required to be distributed to the beneficiary, the PAL limitation occurs at the beneficiary level. If a depreciation reserve is required and maintained by the fiduciary and the depreciation allocated to the trust exceeds the passive income, the PAL limitation occurs at the trust level. If a depreciation reserve is not required and the fiduciary does not distribute all fiduciary accounting income, the PAL limitations occur at both the trust and beneficiary level if the allocated depreciation exceeds the income at both the trust and beneficiary levels.

It appears that more than one approach might be defensible. Consider the strategic consequences:

- If the beneficiary can deduct the depreciation currently, then separately applying the passive loss rules based on the beneficiary's participation seems beneficial. However, if the deduction does not offset net investment income, query whether it would have been better to deferred the deduction until it can be deducted against NII.

- If the beneficiary cannot deduct the depreciation currently, consider the effect of suspending the passive losses. When can one credit the beneficiary for a disposition of the passive activity, freeing that activity's losses from suspension?[2309] If the trust sells the asset, incurs gain because depreciation reduced the trust's basis in the property, and the gain is trapped inside the trust, then the depreciation deductions (suspended or not) do not offset the gain.[2310]

II.K.2.b.v. Electing Small Business Trusts (ESBTs) and the Passive Loss Rules

Electing small business trusts have a special tax regime that divides the trust into a grantor trust portion, a nongrantor trust S corporation portion, and a nongrantor trust non-S corporation portion.[2311]

I am unaware of any guidance directly addressing how the passive loss rules interact with these separate portions.

I believe that all portions should be combined in determining whether income or loss is active or passive. The grouping rules[2312] allow an individual and a C corporation that the

[2308] Key Issue 7E: Reporting Passive Activity Information to a Beneficiary, *1041 Deskbook* (PPC) (2015). See also Key Issue 7D: Passive Loss Limitations Generally Determined at the Entity Level, *1041 Deskbook* (PPC) (2015).
[2309] Code § 469(g). For more about Code § 469(g), see fn. 2027.
[2310] For further discussion of mismatches along these lines, see Abbin (WTAS), § 811 Real Estate Investment Passive Activity Concerns, *Income Taxation of Fiduciaries and Beneficiaries* (2013), arguing that passive loss rules limit the extent to which a trust passes depreciation deductions to the beneficiaries.
[2311] See part III.A.3.e.ii.(b) ESBT Income Taxation.
[2312] See part II.K.1.b Grouping Activities.

individual owns to combine their participation even though they are separate taxpayers.[2313]

Because the nongrantor S corporation portion and the nongrantor non-S corporation portion are taxed as separate trusts for all income tax purpose other than administratively,[2314] they would not aggregate their income and loss in determining allowable passive losses and then disaggregate their income and loss in determining taxable income. Given uncertainty regarding how ESBTs treat net operating losses (NOLs),[2315] it's a good thing that this separate treatment applies.

II.K.2.c. Participation When Grantor Trusts Are Involved; Effect of Toggling

Because grantor trusts are ignored for income tax purposes,[2316] the deemed owner's work is what counts. Complications arise with Qualified Subchapter S Trusts.[2317]

A grantor can count her work in a business for only that part of the year in which she is treated as owning an interest in the business.[2318] If, when grantor trust status terminates, she has not yet worked sufficient hours in the current year (and does not qualify for participation based on participation in prior years),[2319] then consider making sure she keeps at least some ownership in the business after turning off grantor trust status, so that she can count the hours she works later that year. If necessary, the trustee might divide the trust and leave a small portion of the trust as a grantor trust.

II.K.2.d. Effect of Death of an Individual or Termination of Trust on Suspended Losses

If an interest in the activity is transferred by reason of the death of the taxpayer, losses generally are allowed to the extent such losses are greater than the excess (if any) of the basis of such property in the hands of the transferee, over the adjusted basis of such property immediately before the death of the taxpayer, but any losses to the extent of that excess are not allowed as a deduction for any taxable year.[2320] Let's turn this recitation of the Code's rule into common sense: Suspended losses reduce basis, but without the person incurring the losses receiving a benefit from that lost basis. If the owner disposes of the interest during life in a taxable disposition, the suspended losses are allowed, and the tax system has broken even. If the owner dies holding the interest, then the question is what it takes to get the basis restored on account of the suspended losses. To the extent that there is a basis step-up, the suspended losses have not caused a tax detriment, so those losses do not need to be taken to make up for lost basis; therefore, the losses are disallowed to that extent. However, if the suspended losses exceed the basis step-up, then the excess losses should be allowed.

[2313] Reg. § 1.469-4(a), (d)(5)(ii).
[2314] See part III.A.3.e.ii.(b) ESBT Income Taxation, especially fn. 4518.
[2315] See fn. 4524.
[2316] See part III.B.2.d Income Tax Effect of Irrevocable Grantor Trust Treatment.
[2317] See part II.J.15 QSST Issues That Affect the Trust's Treatment Beyond Ordinary K-1 Items.
[2318] See part II.K.1.a.i Taxpayer Must Own an Interest in the Business to Count Work in the Business.
[2319] See part II.K.1.a Counting Work as Participation in Business under the Passive Loss Rules, especially part II.K.1.a.ii Material Participation.
[2320] Code § 469(g)(2).

The corollary is that losses are allowed on the decedent's final income tax return to the extent that the transferee does not receive a basis step-up at death, which would make beneficiary grantor trusts[2321] (including QSSTs),[2322] particularly attractive; in fact, substantial triggered losses can generate a net operating loss carryback, generating income tax refunds.[2323] That also might apply to irrevocable grantor trusts taxed to the settlor[2324] - "might" because the statute requires that the interest be "transferred by reason of the death of the taxpayer;" arguably the grantor's death would qualify, but for trust deemed owned by settlor legally the transfer to the trust preceded the deemed owner's death. So, in the latter case, the trust might consider selling the interest to an otherwise identical nongrantor trust – triggering the losses and increasing the basis – to make sure that the benefits of the losses offset their detriment (in that the losses reduced basis).

Code § 469(j)(12) provides that, when an estate or trust terminates, any passive losses suspended under Code § 469 will be permanently disallowed, but, to inject some fairness, added to the basis of the partnership interest.

Suppose an estate is terminating, using fractional pick-and-choose funding. At first, a Code § 469(j)(12) basis increase in the partnership interest might not appear to generate a Code § 743 basis step-up because, lacking a pecuniary aspect, there is no sale or exchange, and therefore the transfer is not "by sale or exchange or upon the death of a partner." Perhaps the termination of the estate might be attributed to the partner's death? This seems uncertain, however, because the suspended passive losses generating the Code § 469(j)(12) basis increase necessarily occurred post-mortem. On the other hand, a trust's or estate's distribution of a partnership interest probably does trigger Code § 743 basis adjustments, so a Code § 743 adjustment seems to be available after all.[2325] For more thoughts on planning for Code § 469(j)(12) and evaluating its impact, see Sutton & Howell-Smith, ¶15.07. Treatment of Suspended Passive Losses Upon Distribution of Activity by an Estate or Trust, *Federal Income Taxation of Passive Activities* (WG&L).

II.K.3. NOL vs. Suspended Passive Loss - Being Passive Can Be Good

II.K.3.a. Why Being Passive Can Be Good

Particularly when significant business interests are passed to the next generation, being passive can have good results, if the business has a significant net loss.

Suppose the taxpayer has a relatively modest income, other than what the business generates. Deducting a net loss will offset income in the lower tax brackets. This is especially true if the loss is so large that it generates a net operating loss (NOL) carryover under Code § 172. Another concern is the IRS' position on NOLs incurred by

[2321] See part III.B.2.i Code § 678 (Beneficiary Grantor) Trusts.
[2322] See part III.A.3.e QSSTs and ESBTs.
[2323] FSA 200106018.
[2324] See part III.B.2.d Income Tax Effect of Irrevocable Grantor Trust Treatment.
[2325] See part II.Q.8.e.ii.(b) Distribution of Partnership Interests.

an electing small business trust (ESBT) when the S corporation stock it owns generates losses.[2326]

However, in profitable years, the business income might be taxed in the highest tax bracket. The owner might save more taxes by offsetting the income in a later, high-tax-bracket year, than by deducting the loss in the lower tax brackets.

If and to the extent that the loss is passive and the taxpayer does not have passive income against which to offset it, the loss is suspended and carried forward.[2327] Thus, instead of offsetting income in lower brackets in the year in which the loss is generated, it offsets income in a later year that would otherwise push the taxpayer into a higher bracket.

Being passive does cause income to constitute net investment income (NII)[2328] subject to the 3.8% tax on net investment income.[2329] However, for taxpayers who have income below the NII thresholds,[2330] that impact might be small or none. If the NII tax impact is significant, compare (a) the possible income tax savings if income and loss years tend to fluctuate significantly, to (b) the extra cost of NII tax; I am not suggesting that being passive will usually be better – merely that one should consider it when planning.

II.K.3.b. Maximizing Flexibility to Avoid NOLs and Use Losses in the Best Year

One might increase planning flexibility in the planning described in part II.K.3.a Why Being Passive Can Be Good by engaging in significant participation (more than 100 hours)[2331] rather than material participation (more than 500 hours).[2332] If suspending the loss becomes important and one sees the loss coming (or perhaps is experiencing losses and expects them next year), one might cut back one's work.

Material participation might be difficult to impossible to turn off:

- One might have worked too many hours in the year before one realizes that being passive is desirable.

- One might have worked too many hours in a prior year to turn it off.

    - An individual is deemed to materially participate if the individual materially participated in the activity (determined without regard to this sentence) for any

[2332] See part II.K.1.a.ii Material Participation. Although more than 500 hours (see fn. 2043) is usually what people consider, it is not the only way to materially participate.

five taxable years (whether or not consecutive) during the ten taxable years that immediately precede the taxable year.[2333]

- An individual is deemed to materially participate if the activity is a personal service activity, and the individual materially participated in the activity for any three taxable years (whether or not consecutive) preceding the taxable year.[2334]

Suppose an activity is passive when it generates losses and active when it generates income. The suspended passive losses offset active income from the same activity,[2335] and the active income avoids the 3.8% NII tax.[2336]

If one is leaning toward using significant participation instead of material participation, consider:

- Not being able to turn off material participation might be good, if the taxpayer stops working in the business and continues to generate business income.

- Part II.K.1.h.i.(b) Tax Trap from Recharacterizing PIGs as Nonpassive Income.

II.L. Self-Employment Tax (FICA)

II.L.1. FICA: Corporation

For corporations, compensation, including any distributions re-characterized as salaries, is subject to income tax and FICA tax.[2337] Income retained by the corporation and not paid as compensation is not subject to FICA tax.[2338]

If all of the remuneration to an individual from related corporations[2339] is disbursed through the common paymaster,[2340] the total amount of FICA imposed on the employer

[2336] See part II.I.8 Application of 3.8% Tax to Business Income.
[2337] IRS Fact Sheet 2008-25 (http://www.irs.gov/uac/Wage-Compensation-for-S-Corporation-Officers) discusses recharacterizing distributions from S corporations as compensation for this purpose.
[2338] Rev. Rul. 59-221, which was cited with approval by *Ding v. Commissioner*, T.C. Memo. 1997-435, *aff'd* 200 F.3d 587 (9th Cir. 1999), and by *U.S. v. Asiru*, 222 Fed. Appx. 584 (9th Cir. 2007). *Ding* held that a distributive share of S corporation income was not subject to SE tax. For an excerpt from *Ding* that included an excerpt from Rev. Rul. 59-221, see fn. 2442.
[2339] Reg. § 31.3121(s)-1(b)(1) provides the following before providing examples in flush language following it:

> *Related corporations*. Corporations shall be considered related corporations for an entire calendar quarter (as defined in § 31.0-2(a)(9)) if they satisfy any one of the following four tests at any time during that calendar quarter:
>
> (i) The corporations are members of a controlled group of corporations, as defined in section 1563 of the Code, or would be members if section 1563(a)(4) and (b) did not apply and if the phrase more than 50 percent were substituted for the phrase at least 80 percent wherever it appears in section 1563(a).
>
> (ii) In the case of a corporation that does not issue stock, either fifty percent or more of the members of one corporation's board of directors (or other governing body) are

members of the other corporation's board of directors (or other governing body), or the holders of fifty percent or more of the voting power to select such members are concurrently the holders of fifty percent or more of that power with respect to the other corporation.

(iii) Fifty percent or more of one corporation's officers are concurrently officers of the other corporation.

(iv) Thirty percent or more of one corporation's employees are concurrently employees of the other corporation.

[2340] Reg. § 31.3121(s)-1(b)(2) provides the following:

(i) *In general*. A common paymaster of a group of related corporations is any member thereof that disburses remuneration to employees of two or more of those corporations on their behalf and that is responsible for keeping books and records for the payroll with respect to those employees. The common paymaster is not required to disburse remuneration to all the employees of those two or more related corporations, but the provisions of this section do not apply to any remuneration to an employee that is not disbursed through a common paymaster. The common paymaster may pay concurrently employed individuals under this section by one combined paycheck, drawn on a single bank account, or by separate paychecks, drawn by the common paymaster on the accounts of one or more employing corporations.

(ii) *Multiple common paymasters*. A group of related corporations may have more than one common paymaster. Some of the related corporations may use one common paymaster and others of the related corporations use another common paymaster with respect to a certain class of employees. A corporation that uses a common paymaster to disburse remuneration to certain of its employees may use a different common paymaster to disburse remuneration to other employees.

(iii) *Examples*. The rules of this subparagraph are illustrated by the following examples:
Example (1). S, T, U, and V are related corporations with 2,000 employees collectively. Forty of these employees are concurrently employed by two or more of the corporations, during a calendar quarter. The four corporations arrange for S to disburse remuneration to thirty of these forty employees for their services. Under these facts, S is the common paymaster of S, T, U, and V with respect to the thirty employees. S is not a common paymaster with respect to the remaining employees.
Example (2).

(a) W, X, Y, and Z are related corporations. The corporations collectively have 20,000 employees. Two hundred of the employees are top-level executives and managers, sixty of whom are concurrently employed by two or more of the corporations during a calendar quarter. Six thousand of the employees are skilled artisans, all of whom are concurrently employed by two or more of the corporations during the calendar year. The four corporations arrange for Z to disburse remuneration to the sixty executives who are concurrently employed by two or more of the corporations. W and X arrange for X to disburse remuneration to the artisans who are concurrently employed by W and X.

(b) A is an executive who is concurrently employed only by W, Y, and Z during the calendar year. Under these facts, Z is a common paymaster for W, Y, and Z with respect to A. Assuming that the other requirements of this section are met, the amount of the tax liability under sections 3102 and 3111 is determined as if Z were A's only employer for the calendar quarter.

(c) B is a skilled artisan who is concurrently employed only by W and X during the calendar year. Under these facts, X is a common paymaster for S and X with respect to B. Assuming that the other requirements of this section are met, the amount of the tax liability under sections 3102 and 3111 is determined as if X were B's only employer for the calendar quarter.

Reg. § 31.3121(s)-1(b)(3) provides the following before providing examples following it:

and employee is determined as though the individual has only one employer (the common paymaster).[2341] The common paymaster is responsible for filing information and tax returns and issuing Forms W-2 with respect to wages it is considered to have paid under this rule.[2342]

For S corporations, shareholders' health insurance is deductible to the S corporation and considered compensation to owners.[2343] However, it is subject to FICA only if offered in

---

> *Concurrent employment*. For purposes of this section, the term concurrent employment means the contemporaneous existence of an employment relationship (within the meaning of section 3121(b)) between an individual and two or more corporations. Such a relationship contemplates the performance of services by the employee for the benefit of the employing corporation (not merely for the benefit of the group of corporations), in exchange for remuneration which, if deductible for the purposes of Federal income tax, would be deductible by the employing corporation. The contemporaneous existence of an employment relationship with each corporation is the decisive factor; if it exists, the fact that a particular employee is on leave or otherwise temporarily inactive is immaterial. However, employment is not concurrent with respect to one of the related corporations if the employee's employment relationship with that corporation is completely nonexistent during periods when the employee is not performing services for that corporation. An employment relationship is completely nonexistent if all rights and obligations of the employer and employee with respect to employment have terminated, other than those that customarily exist after employment relationships terminate. Examples of rights and obligations that customarily exist after employment relationships terminate include those with respect to remuneration not yet paid, employer's property used the employee not yet returned to the employer, severance pay, and lump-sum termination payments from a deferred compensation plan. Circumstances that suggest that an employment relationship has become completely nonexistent include unconditional termination of participation in deferred compensation plans of the employer, forfeiture of seniority claims, and forfeiture of unused fringe benefits such as vacation or sick pay. Of course, the continued existence of an employment relationship between an individual and a corporation is not necessarily established by the individual's continued participation in a deferred compensation plan, retention of seniority rights, etc., since continuation of those benefits may be attributable to employment with a second corporation related to the first corporation if the corporations have common benefits plans or if the benefits are continued as a matter of corporate reciprocity. An individual who does not perform substantial services in exchange for remuneration from a corporation is presumed not employed by that corporation. Concurrent employment need not exist for any particular length of time to meet the requirements of this section, but this section only applies to remuneration disbursed by a common paymaster to an individual who is concurrently employed by the common paymaster and at least one other related corporation at the time the individual performs the services for which the remuneration is paid. If the employment relationship is nonexistent during a quarter, that employee may not be counted towards the 30-percent test set forth in paragraph (b)(1)(iv) of this section; however, even if the employment relationship is nonexistent, section 3121(s) of the Code applies to remuneration paid to the former employee for services rendered while the employee was a common employee.

a plan that discriminates in favor of owners. The owners may deduct health insurance subject to the same rules as partners and sole proprietors.[2344]

II.L.2. Income Subject to Self-Employment Tax

II.L.2.a. Types of Income Subject to Self-Employment Tax

II.L.2.a.i. General Rules for Income Subject to Self-Employment Tax

FICA is paid one-half by the employee and one-half by the employer. If an individual is self-employed, the individual pays both halves, which combined are called self-employment (SE) tax.

Generally, all of a partnership's[2345] or sole proprietorship's[2346] income from business operations is subject to income tax and SE tax.[2347] SE tax is 15.3%[2348] (on income up to the taxable wage base (TWB) and 2.9%[2349] on all (RRA 1993 repealed the cap) income above the TWB until $200,000 (single) or $250,000 (married filing jointly), above which the tax is 3.8%.[2350] See http://www.ssa.gov/OACT/COLA/cbb.html for the current amount ($128,400 in 2018). For timing, see part II.Q.1.d.iii Timeline for FICA and Income Taxation of Deferred Compensation.

Half of the SE tax is deductible for income tax purposes (which makes it less burdensome than the 3.8% tax on net investment income (NII), none of which is deducible). SE income is not subject to the 3.8% NII tax,[2351] which means that taxpayers who exceed the TWB each year would generally prefer to pay SE tax on the excess instead of NII tax, if they cannot qualify for exclusions from NII tax.

Specifically, Code § 1402(a) begins:

> The term "net earnings from self-employment" means the gross income derived by an individual from any trade or business carried on by such individual, less the deductions allowed by this subtitle which are attributable to such trade or business, plus his distributive share (whether or not distributed) of income or loss described in section 702(a)(8) from any trade or business carried on by a partnership of which he is a member….

[2349] Code § 1401(b).
[2350] Code § 1401(b)(2)(A). The thresholds are reduced (but not below zero) by wages, presumably so that a taxpayer cannot avoid this tax by splitting earned income between wages and self-employment income. Code § 1401(b)(2)(B)
[2351] See fn. 1527 in part II.I.5 What is Net Investment Income Generally.

When applied to an individual, "To be taxable as self-employment income, an individual's income must be (1) derived, (2) from a trade or business, (3) carried on by that individual."[2352]

Applying the "derived" test, the income must arise from the taxpayer's trade or business income producing activity.[2353] "To be taxable as self-employment income, earnings must be tied to the quantity or quality of the taxpayer's prior labor, rather than the mere fact that the taxpayer worked or works for the payor."[2354] When the taxpayer was fully compensated for prior work and the payments at issue were based on others' retention of the business, termination payments did not constitute SE income.[2355] Because such

[2352] *Milligan v. Commissioner*, 38 F.3d 1094 (9th Cir. 1994), which continued:

> Milligan agrees with the tax court that the trade or business and carried on requirements have been satisfied. In other words, he agrees that the Termination Payments are subject to self-employment tax if they were derived from the carrying on of his previous work as an insurance agent. *Simpson v. Commissioner*, 64 T.C. 974, 989 (1975) (self-employment tax on insurance agent's trade or business earnings, e.g., commissions, as an independent contractor); *Erickson v. Commissioner*, 64 T.C.M. (CCH) 963, 966 (1992), *aff'd without op.*, 1 F.3d 1231 (1st Cir. 1993) (self-employment tax on deferred payments of unpaid commissions and renewal commissions to former insurance agent). It is immaterial that Milligan was no longer self-employed in 1987 when he received the Termination Payments. Treas. Reg. section 1.402(a)-1(c) (as amended in 1974) (Gross income derived from a trade or business includes gross income received ... in the taxable year even though such income may be attributable in whole or in part to services rendered or other acts performed in a prior taxable year ....); *Shumaker v. Commissioner*, 648 F.2d 1198, 1200 (9th Cir. 1981) (affirming self-employment tax on sale proceeds from wheat taxpayer grew in the past: [S]elf-employment income is determined by the source of the income, not the taxpayer's *status* at the time the income is realized.) (Emphasis added.)

[2353] *Milligan v. Commissioner*, 38 F.3d 1094 (9th Cir. 1994), reasoned:

> The term "derive" requires "a nexus between the income received and a trade or business that is, or was, actually carried on." *Newberry v. Commissioner*, 76 T.C. 441, 444 (1981). By nexus, we mean that the "trade or business activity by the taxpayer *gives rise to* the income...." *Id.* (emphasis added). The income is sufficiently related to the taxpayer's trade or business activity when the business activity is its source. *Id.* at 446 ("Any income must arise from some actual ... income-producing activity of the taxpayer before such income becomes subject to ... self-employment taxes...."). See, *e.g.*, *Shumaker*, 648 F.2d at 1200 (income derived from selling wheat from prior farming activity).

[2354] *Milligan v. Commissioner*, 38 F.3d 1094 (9th Cir. 1994).

[2355] *Milligan v. Commissioner*, 38 F.3d 1094 (9th Cir. 1994), reasoned:

> Because Milligan already had been fully compensated for his services, none of his business activity was the "source" of the Termination Payments. The payments did not represent deferred compensation of previously-earned commissions, *cf. Erickson*, *supra*, because none of Milligan's earnings were deferred, *i.e.*, he had no vested right to payment of an identifiable money amount. Nor were they renewal commissions on previously-generated policies, *cf. id.*; *Becker v. Tomlinson*, 9 A.F.T.R.2d 1408, 1409-10 (S.D. Fla. 1962), or retirement income tied to Milligan's years of service and overall earnings.
>
> At most, the *amount* of the Termination Payments, not the payments themselves, actually arose from Milligan's business activity. Milligan had a contingent right to receive an uncertain amount of money or nothing, depending upon the level of his prior business activity leading to compensation in his final year as an agent. The payment amount depended upon the level of his commissions (and service compensation from State

trailing commissions depend on others' maintaining the business, they are not SE income, regardless of their other income tax characteristics.[2356] In a reviewed decision with a lone dissent, the Tax Court has agreed with the above analysis.[2357] However,

---

Farm-Auto) on personally-produced policies, *i.e.*, his previous value as a State Farm insurance agent.

However, in part, even the payment *amount* did not depend upon the level of Milligan's prior business activity because the Termination Payments were subject to two adjustments *unrelated* to any business activity on Milligan's part for State Farm. The State Farm companies adjusted the Termination Payments to reflect the amount of income received on Milligan's book of business during the first post-termination year, and the number of his personally-produced policies cancelled during that year. If all of Milligan's customers had cancelled their State Farm non-life policies during the first post-termination year, then Milligan would have received nothing. The adjusted payment amount depended not upon Milligan's past business activity, but upon the successor agent's future business efforts to retain Milligan's customers and to generate service compensation for State Farm. In this way too, the disputed Termination Payments did not "derive" from Milligan's prior services.

[2356] *Gump v. U.S.*, 86 F3d 1126 (Fed. Cir. 1996), commenting:

Because the payments are not "derived" from his insurance business, we need not determine the precise nature of the payments or specifically characterize them as a particular type of income. That is, we need not determine whether they represent consideration for an agreement not to compete or the purchase of his insurance franchise, including its assets and goodwill. It suffices to hold, as we do, that they are not derived from a trade or business carried on by Gump and thus they are not taxable as self-employment income.

[2357] *Jackson v. Commissioner*, 108 T.C. 130 (1997), holding:

In the interest of promoting uniformity, consistency, and fairness in the disposition of this issue with respect to former insurance agents who receive termination payments under similar contractual agreements, we follow the decision of the Court of Appeals for the Ninth Circuit in *Milligan v. Commissioner*, *supra*. Accordingly, upon further reflection and analysis, we hold that the termination payments petitioner received in 1990 and 1991 are not subject to self-employment tax. Because we conclude that the termination payments were not "derived" from the carrying on of petitioner's insurance business,[4] we need not decide the precise nature of the payments or specifically characterize them as a particular type of income. In other words, we need not decide in this case whether the termination payments are consideration for an agreement not to compete or the purchase of petitioner's agency, including its assets and goodwill. *Milligan v. Commissioner*, 38 F.3d at 1100.

[4] See, *e.g.*, *Ohio Farm Bureau Federation, Inc. v. Commissioner*, 106 T.C. 222, 236 (1996), an analogous case, in which we pointed out that the statutory language defining "unrelated business income" in sec. 512(a) is similar to that contained in sec. 1402(a). There it was held that a lump-sum payment made by Landmark, Inc., to the taxpayer, pursuant to the terms of a nonsponsorship and noncompetition clause contained in their termination agreement, did not constitute unrelated business taxable income under sec. 511(a). We applied the rationale of *Newberry v. Commissioner*, 76 T.C. at 444. The Government did not appeal our decision, and the IRS has since revoked GCM 39865, TR-45-1437-90 (Dec. 12, 1991), which reached a contrary conclusion.

Three judges would have reached the same result, viewing the payments as either for the goodwill of petitioner's former insurance business (his books of customer accounts) or for a covenant not to compete. Here are some excerpts:

Goodwill is acquired by the purchaser of a going concern where the transfer enables the purchaser to step into the shoes of the seller. See *Decker v. Commissioner*, 864 F.2d 51, 54 (7th Cir. 1988), *affg.* T.C. Memo. 1987-388; *Winn-Dixie Montgomery, Inc.*

payments tied to the quantity and quality of prior services are "derived from" those services.[2358] Congress codified this test with respect to insurance salesmen (see part II.L.8 Retirement Payments to Insurance Salesmen), and one court has stated, over a strong (and correct, in my view) dissent, that the line of cases described above is limited to insurance salesmen[2359] and held that payments labelled as deferred

---

v. United States, 444 F.2d 677, 681 (5th Cir. 1971). Here the terms of the Agreement between petitioner and State Farm allowed petitioner's successor agent to step into his shoes. The successor agent continued the same business and sold insurance to the same customers….

Payments attributable to a covenant not to compete are not "earned" income, *Furman v. United States*, 602 F.Supp. 444, 451 (D.S.C. 1984), *affd.* without published opinion 767 F.2d 911 (4th Cir. 1985), and they are not subject to self-employment tax. *Barrett v. Commissioner*, 58 T.C. 284 (1972); see also *Ohio Farm Bureau Federation, Inc. v. Commissioner*, 106 T.C. 222, 236 n.8 (1996).

[2358] *Schelble v. Commissioner*, 130 F.3d 1388 (10th Cir. 1997) reasoned:

In contrast to Milligan, Mr. Schelble's payments are tied to the quantity and quality of his prior services performed for the Companies. Although the payments in *Milligan* and Mr. Schelble's payments have similar eligibility requirements such as (1) a minimum service requirement; (2) relinquishment of company records and policies; and (3) a covenant not to compete, Mr. Schelble's payments have distinguishing features related to Mr. Schelble's prior services. For example, unlike the plan in Milligan, Mr. Schelble must have 400 outstanding policies at his termination to be eligible for extended earnings payments. In addition, in contrast to Milligan, the amount of Mr. Schelble's payments was computed based on Mr. Schelble's length of service for the Companies. As an agent for the Companies for over fifteen years, Mr. Schelble's extended earnings payments were calculated using a higher percentage than if he had only been an agent for five or ten years. Furthermore, unlike the payments in Milligan, Mr. Schelble's extended earnings payments were calculated solely on the percentage applied to service fees paid to him during the twelve months preceding the Agreement's termination. No adjustments unrelated to Mr. Schelble's prior services were made in calculating these payments. Based on these distinguishing factors, we conclude Mr. Schelble's payments are sufficiently derived from his prior insurance business to constitute self-employment income subject to self-employment tax under 26 U.S.C. section 1401.

[2359] *Peterson v. Commissioner*, 827 F.3d 968 (11th Cir. 2016), at fn. 42, commented:

In 1997, Congress amended 26 U.S.C. § 1402 by adding subsection (k) for the specific purpose of "codif[ying] the standard established in *Milligan* with respect to termination payments made ... to an insurance salesman." *Farnsworth v. Comm'r*, 83 T.C.M. (CCH) 1153, 1159 & n.5 (2002) (citing H.R. Rep. No. 105-220, at 458 (1997) (Conf. Rep.)). As codified in § 1402(k), the *Milligan* standard holds that self-employment tax does not apply to post-termination payments from an insurance company to its former insurance salesman, provided four requirements inapplicable to this case are satisfied. See 26 U.S.C. § 1402(k)(2), § 1402(k)(3), 1402(k)(4)(A), § 1402(k)(4)(B). The Petersons concede § 1402(k) was intended to codify the *Milligan* standard, which unambiguously applies only to contractual termination payments to former insurance agents. Appellants Br. at 19-20. By urging the application of *Milligan* in this case, the Petersons and amici invite this court to expand § 1402(k) beyond the confines of its text. Appellants Br. At 20; Amicus Curiae Br. at 9. If Congress had intended the *Milligan* standard to be applied outside the context of termination payments to insurance salesmen, it would have so stated. Instead, it unambiguously limited the standard to the context of termination payments to former insurance agents.

In addition, the legislative history of § 1402(k) states "[n]o inference is intended with respect to the [self-employment] tax treatment of payments that are not described in [§ 1402(k)]." H.R. Rep. No. 105-220, at 458 (1997) (Conf. Rep.), reprinted in 1997-4 compensation in an agreement with a beauty products salesman were subject to FICA,[2360] notwithstanding one of the two payment plans appearing to fall within the

(Vol. 2) C.B. 1457, 1928; see *Ruckelshaus v. Sierra Club*, 463 U.S. 680, 686 n. 8, 103 S.Ct. 3274, 3278 n.8 (1983) ("If Congress had intended the far-reaching result urged by respondents, it plainly would have said so, as is demonstrated by Congress careful statement that a less sweeping invitation was adopted."). Moreover, if *Milligan* accurately reflected the generally applicable "derived from" standard under § 1402(a), then § 1402(k) would be superfluous. See, *e.g.*, *Nunnally v. Equifax Info. Servs., LLC*, 451 F.3d 768, 773 (11th Cir. 2006) ("It is a cardinal principle of statutory construction that a statute ought, upon the whole, to be so construed that, if it can be prevented, no clause, sentence, or word shall be superfluous, void, or insignificant." (citation omitted)). We decline to expand § 1402(k) beyond its text, as the Petersons and amici urge. The dissent, however, ignores this legislative history and case law clearly limiting *Milligan* to insurance salesmen.

[2360] *Peterson v. Commissioner*, 827 F.3d 968 (11th Cir. 2016), at fn. 42, reasoned:

The Tax Court concluded the Petersons do not dispute the 2008 Amendments to the Family Program and the Futures Program expressly characterize them as "deferred compensation (i.e., related to Mrs. Peterson s prior labor)." *Peterson*, 106 T.C.M. (CCH) 619, *3. Under the "*Danielson* rule," that characterization is controlling for tax purposes. *Comm'r v. Danielson*, 378 F.2d 771, 775 (3d Cir. 1967) (en banc); *Spector v. Comm'r*, 641 F.2d 376, 384-86 (5th Cir. Unit A Apr. 1981) (adopting the *Danielson* rule). Our court has explained the *Danielson* rule:

> When a taxpayer characterizes a transaction in a certain form, the Commissioner may bind the taxpayer to that form for tax purposes. This is the rule: "a party can challenge the tax consequences of his agreement as construed by the Commissioner only by adducing proof which in an action between the parties [to the agreement] would be admissible to alter that construction or to show its unenforceability because of mistake, undue influence, fraud, duress, et cetera."

Plante v. Comm'r, 168 F.3d 1279, 1280-81 (11th Cir. 1999) (quoting *Danielson*, 378 F.2d at 775) (citation and alteration omitted). Because Peterson had signed the retirement Program Agreements respectively in 1992 and 2005 permitting Mary Kay to amend them prospectively, she necessarily had consented to the 2008 Amendments that expressly characterized the Family Program and Futures Program payments as "deferred compensation" under a nonqualified compensation plan pursuant to Section 409A of the Internal Revenue Code,[29] which makes the Danielson rule applicable.[30] See *Comm'r v. Nat'l Alfafa Dehydrating & Milling Co.*, 417 U.S. 134, 149, 94 S.Ct. 2129, 2137 (1974) ("This Court has observed repeatedly that, while a taxpayer is free to organize his affairs as he chooses, nevertheless, once having done so, he must accept the tax consequences of his choice, whether contemplated or not, and may not enjoy the benefit of some other route he might have chosen to follow but did not." (citations omitted)).[31]

The Tax Court applied the Danielson rule and determined Peterson's 2009 distributions from the Family Program and Futures Program were "subject to self-employment tax pursuant to section 1401," because the Petersons had "failed to adduce proof sufficient to alter the construction of these unambiguous agreements or show that they were unenforceable." *Peterson*, 106 T.C.M. (CCH) 619, *3 (citing *Plante*, 168 F.3d at 1280-81; *Danielson*, 378 F.2d at 775). The Petersons do not dispute the Amendments to the Program Agreements unambiguously characterize Peterson s post-retirement payments as deferred compensation. The undisputed lack of ambiguity in the terms of the Program Agreements necessarily precludes the Petersons from "adducing proof which in an action between the parties would be admissible to alter that construction." *Plante*, 168 F.3d at 1280-81. When a contract is unambiguous, Texas law holds the parties intent must be determined from the contract terms alone. *Friendswood Dev. Co. v. McDade & Co.*, 926 S.W.2d 280, 283 (Tex. 1996); see also *Valence Operating Co. v. Dorsett*, protection of case law. Information Letter 2016-0081 argued that certain undescribed post-retirement payments were SE income.

The taxpayer's work can determine whether an activity is a trade or business.[2361] However, if a taxpayer owns an interest in a trade or business, the taxpayer's share of business earnings is SE income, even if the taxpayer is inactive,[2362] unless the taxpayer is a limited partner.[2363]

Conversely, income from any activity that is not a trade or business, within the meaning of Code § 162,[2364] is not subject to SE tax:[2365]

- Trustee and executor fees are exempt from self-employment tax except to the extent that (a) they are attributable to the conduct of a trade or business by the trust or estate, or (b) an executor manages an estate that requires extensive management activities on the executor's part over a long period of time, in which latter case the activities might be sufficient in scope and duration to constitute the carrying on of a trade or business.[2366]

- An individual's distributive share of income from an investment club partnership does not constitute SE income.[2367]

> 164 S.W.3d 656, 662 (Tex. 2005) (recognizing, under Texas law, a written contract must be construed in accordance with "the true intentions of the parties as expressed in the instrument").[32] Therefore, the *Danielson* rule requires that the Petersons are bound by the characterization of her 2009 Mary Kay, post-retirement Program payments as deferred compensation, making them subject to self-employment tax.
> [footnotes omitted]

[2361] *Chai v. Commissioner*, T.C. Memo. 2015-42, stated:

> The term trade or business has the same meaning under section 1402(a) as under section 162. Sec. 1402(c); see *Bot v. Commissioner*, 118 T.C. 138, 146 (2002), *aff'd*, 353 F.3d 595 (8th Cir. 2003). In *Commissioner v. Groetzinger*, 480 U.S. 23, 35 (1987), the Supreme Court determined that to be engaged in a trade or business under section 162 (and, in this case, section 1402(a)), the taxpayer must be involved in an activity with continuity and regularity and with the primary purpose of receiving income or profit.

[2362] See part II.L.3 Self-Employment Tax: General Partner or Sole Proprietor.

[2363] See part II.L.4 Self-Employment Tax Exclusion for Limited Partner.

[2364] Reg. § 1.1402(c)-1 provides:

> In order for an individual to have net earnings from self-employment, he must carry on a trade or business, either as an individual or as a member of a partnership. Except for the exclusions discussed in §§ 1.1402(c)-2 to 1.1402(c)-7, inclusive, the term "trade or business", for the purpose of the tax on self-employment income, shall have the same meaning as when used in section 162. An individual engaged in one of the excluded activities specified in such sections of the regulations may also be engaged in carrying on activities which constitute a trade or business for purposes of the tax on self-employment income. Whether or not he is also engaged in carrying on a trade or business will be dependent upon all of the facts and circumstances in the particular case.

See part II.G.3.i.i.(a) "Trade or Business" Under Code § 162.

[2365] Reg. § 1.1402(a)-1(b).

[2366] Rev. Rul. 58-5; see also Letter Ruling 8238055.

[2367] Rev. Rul. 75-525 held:

Beware that, starting January 1, 2013, generally investment income and income from any passive activity[2368] that is not subject to SE tax would be subject to the 3.8% tax on net investment income if the taxpayer's income exceeds the relevant threshold.[2369]

See also parts:

- II.L.7 SE Tax N/A to Qualified Retiring or Deceased Partner
- II.L.8 Retirement Payments to Insurance Salesmen, and
- II.Q.8.b.ii.(g) Code § 736 Payments As Retirement Income – Possible FICA and State Income Tax Benefits.

II.L.2.a.ii. Rental Exception to SE Tax

Income from real estate and from personal property leased with the real estate generally is not subject to SE tax, unless such rentals constitute certain types of farm activities[2370] or are received in the course of a trade or business as a real estate dealer.[2371]

Farm activities generate significant controversy as to what is rent and what constitutes payment for services[2372] or income from growing crops, raising livestock, etc. Payments

---

> In *Higgins v. Commissioner*, 312 U.S. 212 (1941), 1941-1 C.B. 339, the Supreme Court of the United States held that the conduct of investment management activities with respect to one's own account was not a trade or business within the meaning of section 23(a) of the Revenue Act of 1932, predecessor of section 162.
>
> Therefore, a partnership whose activities are limited to investment in savings certificates and collection of interest thereon with respect to its membership accounts is not engaged in a trade or business as defined in section 162 of the Code.

Higgins is quoted in the text accompanying fn. 890 in part II.G.3.i.i.(a) "Trade or Business" Under Code § 162.

[2368] As defined in Code § 469, which generally includes rental as well as any trade or business in which the owner does not materially participate.

[2369] See part II.I 3.8% Tax on Excess Net Investment Income, particularly part II.I.8.c Application of 3.8% Tax to Rental Income.

[2370] Code § 1402(a)(1) provides that the rental exception:

> shall not apply to any income derived by the owner or tenant of land if (A) such income is derived under an arrangement, between the owner or tenant and another individual, which provides that such other individual shall produce agricultural or horticultural commodities (including livestock, bees, poultry, and fur-bearing animals and wildlife) on such land, and that there shall be material participation by the owner or tenant (as determined without regard to any activities of an agent of such owner or tenant) in the production or the management of the production of such agricultural or horticultural commodities, and (B) there is material participation by the owner or tenant (as determined without regard to any activities of an agent of such owner or tenant) with respect to any such agricultural or horticultural commodity.

See Reg. § 1.1402(a)-4(b) and *Mizell v. Commissioner*, T.C. Memo. 1995-571 (broadly construing arrangement).

[2371] Code § 1402(a)(1); Reg § 1.1402(a)-4. See Chief Counsel Advice 200816030 (Code § 761(f) active participation does not override exclusion of rental income from self-employment tax).

[2372] In reversing the Tax Court, *McNamara v. Commissioner*, 236 F.3d 410 (8th Cir. 2000), *non-acq.* AOD CC-2003-003 (10/22/2003). said:

under USDA's Conservation Reserve Program are subject to self-employment tax according to the Tax Court and IRS, but not according to the Eighth Circuit.[2373] Instead

> What is missing from both the Commissioner's and the Tax Court's analyses is any mention of a nexus between the rents received by Taxpayers and the arrangement that requires the landlords' material participation. We believe this omission overlooks section 1402(a)(1)'s requirement that rents be derived under such an arrangement. That is to say, the mere existence of an arrangement requiring and resulting in material participation in agricultural production does not automatically transform rents received by the landowner into self-employment income. It is only where the payment of those rents comprise part of such an arrangement that such rents can be said to derive from the arrangement.
>
> Rents that are consistent with market rates very strongly suggest that the rental arrangement stands on its own as an independent transaction and cannot be said to be part of an arrangement for participation in agricultural production. Although the Commissioner is correct that, unlike other provisions in the Code, section 1402(a)(1) contains no explicit safe-harbor provision for fair market value transactions, we conclude that this is the practical effect of the derived under language.
>
> At this point, the only evidence in the record is that the rents in question were at or below market rates. However, we believe the Commissioner is entitled to an opportunity to show a connection between those rents and the production arrangement it identified.

[2373] Payments under USDA's Conservation Reserve Program are subject to self-employment tax according to the Tax Court, *Morehouse v. Commissioner*, 140 T.C. 350 (unanimous reviewed decision), but not according to the Eighth Circuit, 114 A.F.T.R.2d 2014-6287 (2014); the IRS agrees with the Tax Court, A.O.D. 2015-002, IRB No. 2015-41. The *Morehouse* Tax Court opinion relied on *Timber Co. v. Commissioner*, 64 T.C. 700, 709-711 (1975), *aff'd without published opinion*, 552 F.2d 368 (5th Cir. 1977); *Webster Corp. v. Commissioner*, 25 T.C. 55, 61 (1955), *aff'd*, 240 F.2d 164 (2nd Cir. 1957); *Harding v. Commissioner*, T.C. Memo. 1970-179; and Rev. Rul. 60-32. The *Morehouse* Tax Court opinion cited *Johnson v. Commissioner*, 60 T.C. 829, 833 as holding that exception for rentals from real estate must be narrowly construed. Rev. Rul. 65-149, cited with approval in the *Morehouse* Eighth Circuit opinion, held that grain storage fees for delaying in selling grain one produced constitute income from farming and therefore net earnings from self-employment, but grain storage fees paid for the storage of a landlord's share of a crop paid to the landlord as rental income are excluded from net earnings from self-employment as rental income.

In a split opinion, the Eighth Circuit held [footnotes omitted]:

> [T]he record discloses that the government, whether by contractual right or otherwise, physically inspected the CRP properties nearly as often as Morehouse did. These entries, coupled with the significant tilling, seeding, fertilizing, and weed control work required by the CRP contracts reveal the government likely had more physical possession for its own land conservation uses than Morehouse did. Accordingly, we hold the 2006 and 2007 CRP payments were consideration paid [by the government] for use [and occupancy] of [Morehouse's] property and thus constituted rentals from real estate fully within the meaning of § 1402(a)(1).

Both the majority and dissent cited *Wuebker v. Commissioner*, 205 F.3d 897, 903-904 (6th Cir. 2000) and mentioned Notice 2006-108, without paying deference to the latter because the IRS never issued the promised Revenue Ruling (perhaps concluding that its position was not necessarily a consensus view). For a discussion of such payments generally and a brief overview of cases, see Malloy, Langstraat, and Wilkinson, "Conservation Reserve Program Payments and Self-Employment Tax: Farmers vs. Non-Farmers," *TAXES - The Tax Magazine* (8/2015).

A.O.D. 2015-002, IRB No. 2015-41, nonacquiesced to the Eighth Circuit's opinion, stating:

> We disagree with the Eighth Circuit's characterization of the revenue rulings as establishing a line of demarcation on the self-employment tax treatment of conservation

of conducting operations on one's farms and paying SE tax on all of the income, one may lease the farm to one's own S corporation for fair rental without paying SE tax on that rental, have the S corporation run operations and not pay SE tax on the operations, and simply take reasonable compensations for one's services to the S corporation – an arrangement that the Tax Court approved in a 2017 reviewed case.[2374] Citing an Eighth Circuit case[2375] that it decided to find persuasive in any jurisdiction, the Tax Court[2376] held:

> Regardless of a taxpayer's material participation, if the rental income is shown to be less than or equal to market value for rent, the income is presumed to be unrelated to any employment agreement. *Id*. At that point, the burden of production shifts to the Commissioner to show a nexus between the rent and the

---

> reserve payments paid to farmers and nonfarmers. We also disagree with the Eighth Circuit's holding that the CRP payments were consideration paid by the government for use and occupancy of Morehouse's property and thus constituted rentals from real estate excluded from self-employment tax under section 1402(a)(1).
>
> The Eighth Circuit misinterprets Rev. Rul. 60-32 and Rev. Rul. 65-149 when it states that the rulings establish the position that CRP payments made to non-farmers constitute rentals from real estate and are excluded from the self-employment tax. *Morehouse*, 769 F.3d at 621….
>
> We recognize the precedential effect of the decision in *Morehouse* to cases appealable to the Eighth Circuit. Accordingly, we will follow *Morehouse* within the Eighth Circuit only with respect to cases in which the CRP payments at issue were both (1) paid to an individual who was not engaged in farming prior to or during the period of enrollment of his or her land in CRP and (2) paid prior to January 1, 2008 (i.e., the effective date of the 2008 amendment to section 1402(a)(1)). We will continue to litigate the IRS position in the Eighth Circuit in cases not having these specific facts. We will also continue to litigate the IRS position in all cases in other circuits.

[2374] *Martin v. Commissioner*, 149 T.C. No. 12 (9/27/2017). The Official Tax Court Syllabus (which syllabus is not precedential, but of course the text of the case is) summarized the case:

> Ps owned a farm, renting a portion of the land to wholly owned S corporation C. C contracted with unrelated entity S to raise chickens according to S' exacting specifications. Ps followed S' specific instructions to build structures designed only to raise S' chickens. C paid Ps wages for their labor and rent for the use of the farm and structures. R asserts that the rent is subject to self employment tax pursuant to sec. 1402(a)(1).
>
> *Held*: The facts of the instant case are not materially distinguishable from the facts of *McNamara v. Commissioner*, T.C. Memo. 1999-333, *rev'd*, 236 F.3d 410 (8th Cir. 2000). The U.S. Court of Appeals for the Eighth Circuit in *McNamara* also reversed *Hennen v. Commissioner*, T.C. Memo. 1999-306, and *Bot v. Commissioner*, T.C. Memo. 1999-256. In the light of the reversals by the Court of Appeals for the Eighth Circuit, the Court reconsiders its holdings.
>
> *Held*, further, Ps established that the rent received was at or below fair market value. R failed to show a sufficient nexus between the rental income and petitioners' obligations to participate in the production or management of the production of agricultural commodities. Therefore, the rent Ps received pursuant to the lease is not includible in their net self-employment income. To the extent *McNamara v. Commissioner*, T.C. Memo. 1999-333, *Hennen v. Commissioner*, T.C. Memo. 1999-306, and *Bot v. Commissioner*, T.C. Memo. 1999-256, are inconsistent with this holding, they are not followed.

[2375] See *McNamara* in fn. 2372.

[2376] *Martin*, fn. 2374.

> taxpayer's obligation to materially participate. Such a showing would render the lease and employment agreements part and parcel of a larger "arrangement". *Id*.

However, the Tax Court cautioned that rent payments tied to production may be recharacterized as SE income,[2377] so one should consider avoiding such an arrangement when renting to one's own S corporation.

Regulations clarify the distinction between a real estate investor and dealer:[2378]

> In general, an individual who is engaged in the business of selling real estate to customers with a view to the gains and profits that may be derived from such sales is a real-estate dealer. On the other hand, an individual who merely holds real estate for investment or speculation and receives rentals therefrom is not considered a real-estate dealer. Where a real-estate dealer holds real estate for investment or speculation in addition to real estate held for sale to customers in the ordinary course of his trade or business as a real-estate dealer, only the rentals from the real estate held for sale to customers in the ordinary course of his trade or business as a real-estate dealer, and the deductions attributable thereto, are included in determining net earnings from self-employment; the rentals from the real estate held for investment or speculation, and the deductions attributable thereto, are excluded.

See also part II.G.25 Real Estate Dealer vs. Investor.

Apartments that include the furnishing of heat and light, the cleaning of public entrances, exits, stairways and lobbies, the collection of trash, etc. fall within the rental real estate exception.[2379] However, payments for the use or occupancy of rooms or other space

---

[2377] *Martin*, fn. 2374, noted:

> This Court has previously evaluated the nexus between the rental income and the taxpayer's production arrangement. See, *e.g.*, *Bot v. Commissioner*, 118 T.C. 138 (finding value-added payments reported as rental income includible in net self-employment income where the payments were directly related to the volume of corn acquired and delivered by taxpayers); *Solvie v. Commissioner*, T.C. Memo. 2004-55 (same when rent payments were tied directly to the number of pigs raised). But see *Johnson v. Commissioner*, T.C. Memo. 2004-56 (finding an insufficient nexus). But despite petitioners' presentation and the Court's previous application of the well-reasoned nexus requirement in *Solvie* and *Johnson*, respondent did not brief this issue.

[2378] Reg. § 1.1402(a)-4(a). *Pool v. Commissioner*, T.C. Memo. 2014-3 (see fn. 1042), set forth factors deciding whether the taxpayer is a real estate dealer and held that the taxpayer had the burden of proof of disproving the IRS findings in this area. When real estate is used in a business, see part II.G.5 Gain or Loss on the Sale or Exchange of Property Used in a Trade or Business; within that part, if property is bought for use in a trade or business but never placed in service, see text accompanying fns. 956-957.

[2379] Reg. § 1.1402(a)-4(c)(2). This regulation is similar to Reg. § 1.512(b)-1(c)(5); interpreting the latter regulation, Letter Ruling 201422027 ruled that, when local law required apartments to provide parking for tenants, extra charges for a carport constituted rental income (excluded from UBTI) because the carports were characteristic of the real property, pointing out that no services, such as a security guard, were provided and covered spots were charged only a minimal monthly amount in the set rental rate. However, the ruling held that the apartment complex providing coin-operated washers and dryers on-site for use of tenants without in-home laundry was an extra service not within the rental exclusion, because tenants could use commercial laundry and where services are also rendered to the occupant, such as for the use or occupancy of rooms or other quarters in hotels, boarding houses, or apartment houses furnishing hotel services, or in tourist camps or tourist homes, or payments for the use or occupancy of space in parking lots, warehouses, or storage garages, do not qualify for this exception;[2380] neither does a university providing athletic facilities to third parties when not being used for university purposes.[2381] The real estate rental exception is narrowly construed.[2382]

How about leasing equipment or other tangible personal property not connected with real estate? Renting personal property on a short-term basis is self-employment income.[2383] Although I am unaware of any cases subjecting to self-employment tax the long-term rental of personal property, cases interpreting the tax on unrelated business income in the tax-exempt area clearly view long-term rental as a trade or business;[2384] and the rental exception for the unrelated business income tax is similar to that for SE tax,[2385] and the Tax Court has noted similarities between income subject to SE tax and

---

cleaning establishments off-site; the ruling did not mention whether the apartment provided any services in connection with the washers and dryers.

2380 Reg. § 1.1402(a)-4(c)(2); Rev. Ruls. 57-108 (vacation rentals involved too many services to be excluded from SE income) and 83-139 (discussing when trailer park rentals do or do not qualify for the exclusion form SE income).

2381 See fn. 3343 in part II.Q.6.d.i UBTI Related to a Partnership or Sole Proprietorship, which applies by analogy to SE income, as described in fns. 2385-2387 in this part II.L.2.a.ii.

2382 *Johnson v. Commissioner*, 60 T.C. 829 (1973), denying the rental exclusion for boat sheds as part of a marina business in which the taxpayer provided many services included in the rental of the boat sheds.

2383 *Stevenson v. Commissioner*, T.C. Memo. 1989-357, pointing out, "His work in buying, assembling, storing, renting, selling, repairing and maintaining the portable signs required him to devote a substantial amount of time on a regular and continuous basis."

2384 Rev. Rul. 69-278 (owner of buildings also leased trucks to tenants, but the truck leases were not tied in any way to the real estate leases; truck leases did not qualify for rental exception even though the lessees were responsible for fueling, maintaining, and insuring the trucks); Rev. Rul. 60-206 (rent from long-term leases of railroad tank cars was a trade or business, even though the lessee was fully responsible for the cars' operation and maintenance of their cars, as well as replacement in case of destruction or loss); Rev. Rul. 78-144 (long-term lease of heavy machinery was a trade or business even though the lessee must provide insurance, pay any taxes, and make and pay for all repairs except those involving defects in the machine parts or workmanship; the taxpayer's only work was to find a lessee, arrange for the lease, and receive, record, and deposit the rents; did not qualify for the exception to unrelated business income tax for all work being done by volunteers because labor was not a material income-producing factor in the business); *Cooper Tire & Rubber Co. Employees' Retirement Fund v. Commissioner*, 36 T.C. 96, *aff'd* 306 F.2d 20 (6th Cir. 1962) (retirement plan's one-time purchase of twenty tire manufacturing machines and one press and long-term lease of them to the plan's employer was a business even though the plan's only activity was to lease the machinery, collect the rentals and make monthly payments on the bank note and the transaction appeared to have been done merely to avoid restriction against loans from the plan to the company). See also part II.Q.6.d Unrelated Business Income.

2385 Compare Code § 1402(a)(1) (there shall be excluded rentals from real estate and from personal property leased with the real estate… unless such rentals are received in the course of a trade or business as a real estate dealer) with Code § 512(b)(3) (there shall be excluded all rents from real property … and all rents from personal property ... leased with such real property, if the rents attributable to such personal property are an incidental amount of the total rents unrelated business income tax.[2386] The 2013 Instructions to Form 1040, Schedule E generally take that position as well.[2387]

II.L.2.a.iii. Whether Gain from Sale of Property is Subject to SE Tax

In testing whether a person is a dealer in real property, courts consider numerous factors when deciding the taxpayer's primary purpose for holding property, including:[2388]

---

received or accrued under the lease, determined at the time the personal property is placed in service). Neither statute exempts rents from personal property that is not leased with real estate.

[2386] *Cokes v. Commissioner*, 91 T.C. 222, 234, in subjecting passive business income to SE tax, noted:

> We note that the concept that the character of trade or business income is retained in the partner's hands is not unique to the self-employment taxes area. The unrelated business income tax provisions (sec. 511 et seq.) generally provide that a tax-exempt organization's distributive share of a partnership's unrelated trade or business income is subject to the unrelated trade or business income tax. Sec. 512(c). The report of the House Ways and Means Committee on the bill enacting the unrelated business income tax, reads as follows (H. Rept. 2319, 81st Cong., 2d Sess. 111-112 (1950), 1950-2 C.B. 460):
>
> > In the event an organization to which Supplement U [the predecessor of sec. 511 et seq.] applies is a member of a partnership which is regularly engaged in a trade or business which is unrelated to the functions and purposes of the organization, the organization would include, in computing its unrelated business net income, so much of its share (whether or not distributed) of the partnership gross income as is derived from that unrelated business and its share of the deductions attributable thereto, and make the necessary adjustments for the exceptions and limitations which have been discussed above. For example, if an exempt educational institution is a silent partner in a partnership which runs a barrel factory and such institution also holds stock in a pottery manufacturing corporation, it would include in its unrelated business income its share of the barrel factory income, but not its proportionate share of any dividends received by the partnership from the pottery corporation. If the taxable year of the organization is different from that of the partnership, the amounts to be so included or deducted in computing the unrelated business net income are to be based upon the income and deductions of the partnership for any taxable year of the partnership ending within or with the taxable year of the organization.
>
> The example in the committee report explains that the unrelated business income tax provisions draw essentially the same line as that drawn in the self-employment tax provisions. Interestingly, both statutes were enacted by the 81st Congress.

[2387] From page E-4 of the Instructions:

> **Personal property**. Do not use Schedule E to report income and expenses from the rental of personal property, such as equipment or vehicles. Instead, use Schedule C or C-EZ if you are in the business of renting personal property. You are in the business of renting personal property if the primary purpose for renting the property is income or profit and you are involved in the rental activity with continuity and regularity.
>
> If your rental of personal property is not a business, see the instructions for Form 1040, lines 21 and 36, to find out how to report the income and expenses.

[2388] *SI Boo, LLC v. Commissioner*, T.C. Memo. 2015-19. In that case, the court easily concluded dealer status as follows (footnote omitted):

> In 2007 and 2008 S. I. Securities sold 29 and 14 parcels of real estate, respectively, by quitclaim deed. In 2008 Sabre sold 86 parcels of real estate by quitclaim deed, of which 53 were sold to third parties and 33 were assigned to SI Boo or S. I. Securities. In 2007 and 2008 SI Boo sold 52 and 20 parcels of real estate, respectively, by quitclaim deed. The entities' own accounting records, as well as the testimony presented at trial, showed

(1) the frequency and regularity of sales of real properties;

(2) the substantiality of the sales and the relative amounts of income taxpayers derived from their regular business and the sales of real properties;

(3) the length of time the taxpayers held the real properties;

(4) the nature and extent of the taxpayers' business and the relationship of the real properties to that business;

(5) the purpose for which the taxpayers acquired and held the real properties before sale;

(6) the extent of the taxpayers' efforts to sell the property by advertising or otherwise; and

(7) any improvements the taxpayers made to the real properties.

See also part II.G.25 Real Estate Dealer vs. Investor.

In deciding whether sales of personal property are of property "held primarily for sale to customers in the ordinary course of a trade or business" (and therefore SE income) or if they are of property held as an investment the Tax Court looks to:[2389]

- frequency and regularity of sales;
- substantiality of sales;
- length of time the property was held;
- segregation of property from business property;
- purpose of acquisition;

> that the entities desired to dispose of the real properties quickly and frequently and with the intent to make a profit and were successful. In fact, petitioners effectively concede on brief that most of the properties S. I. Securities, Sabre, and SI Boo sold by quitclaim deed during the years at issue were sold within one year of their acquisition. On this record, we give little weight to the fact that the entities acquired more certificates of purchase of tax lien than tax deeds. In sum, the entities' sales of real properties were frequent and regular during the years at issue.

The court held:

> On the basis of our findings that the entities earned income from the proceeds of sales of real properties, which was an integral part of their respective trades or businesses, we hold that the entities should have included the income in their reported net earnings from self-employment.

It also held that the sales were not eligible for installment sale reporting. See fn. 3101, found in part II.Q.3 Deferring Tax on Lump Sum Payout Expected More than Two Years in the Future.

[2389] *Ryther v. Commissioner*, T.C. Memo. 2016-56, citing *Williford v. Commissioner*, T.C. Memo. 1992-450. *Ryther* held that a taxpayer who held scrap metal left over from his dissolved business was not subject to SE tax when he surprisingly discovered it had a market where he could easily sell it whenever he needed money.

- sales and advertising effort;
- time and effort spent on sales; and
- how the proceeds of the sales were used.

II.L.2.b. S Corporation Subjecting to FICA Payments for Managing Real Estate, When Net Rental Income Itself Is Exempt from SE Tax

Part II.L.2.a Types of Income Subject to Self-Employment Tax explains that real estate rental income generally is not subject to self-employment (SE) tax.[2390]

However, compensating a partner for services rendered subjects a partner to SE tax.[2391] So, the key to avoiding SE tax when working in real estate is to provide some sort of interest in profits rather than expressly compensating the person.

If an S corporation holds or manages the real estate, the IRS will assert that any distributions to its owners constitute compensation to the extent of the value of the services they provide the business and that FICA is owed.[2392] In a partnership, however, a very well-drafted allocation of profits does not constitute a guaranteed payment[2393] for services that would be classified as compensation income.

Note that converting real estate rental income to SE income or FICA wages might not be a bad result. SE income and FICA wages are not subject to the 3.8% tax on net investment income,[2394] whereas real estate rental income often is. For a discussion of the latter, see part II.I.8.c Application of 3.8% Tax to Rental Income. Furthermore, up to one-half of SE tax is deductible,[2395] whereas none of the 3.8% tax on NII is deductible.

II.L.3. Self-Employment Tax: General Partner or Sole Proprietor

Generally, all of a partnership's or sole proprietorship's operating income is subject to income tax and FICA (self-employment) tax.[2396] An entity that is disregarded for income tax purposes is also disregarded for self-employment tax purposes, notwithstanding that it is treated as a separate entity for payroll tax purposes.[2397] On the other hand, a partnership that elects out of applying subchapter K remains subject to self-employment tax.[2398]

[2390] See fns. 2371-2382, noting exceptions for dealers, certain short-term rentals, etc.
[2391] See fns. 2404-2405.
[2392] See fn. 77.
[2393] See fns. 435-433, which requires the allocation to be of net profits rather than being some percentage of gross rents or other formula measurement or fixed payment.
[2394] See fn. 1527.
[2395] See text accompanying fn. 1698.
[2396] See part II.L.2 Income Subject to Self-Employment Tax.
[2397] See part II.B Limited Liability Company (LLC), fns. 279-280.
[2398] *Cokes v. Commissioner*, 91 T.C. 222, 230-231 (1988), held:

> Article XVII of the unit operating agreement, set forth in our findings, *supra*, provides that each working interest owner elects under these regulations to be excluded from subchapter K. However, in our unanimous Court-reviewed opinion in *Bryant v.*

A partner who is inactive nevertheless receives income from a trade or business subject to self-employment tax.[2399] Even very small interests that contractually are unable to

Commissioner, 46 T.C. 848 (1966), *affd.* 399 F.2d 800 (5th Cir. 1968), we concluded as follows (46 T.C. at 864):

> When Congress has subtitlized, subchapterized, and sectionized its treatment of a many threaded statutory pattern like the complex Internal Revenue Code, its clear words seem to us a safe guide to meaning. The election under section 761(a) does not operate to change the nature of the entity. A partnership remains a partnership; the exclusion simply prevents the application of subchapter K. The partnership remains intact and other sections of the Code are applicable as if no exclusion existed.

Although *Bryant* involved application of the investment credit to partnerships which had elected out of subchapter K, this Court's above-quoted analysis (which was specifically adopted by the Court of Appeals (399 F.2d at 806-807)) is equally applicable to the self-employment taxes of chapter 2.[9]

[9] The discussion of this matter in *Madison Gas & Electric Co. v. Commissioner*, 72 T.C. 521, 559 n. 9 (1979), *affd.* 633 F.2d 512 (7th Cir. 1980), sets aside for the future how the Bryant analysis is to be applied where the controlling statute outside of subch. K does not specifically refer to partnerships. In the instant case, sec. 1402(a) specifically refers to partnerships; thus the instant case falls within the *Bryant* analysis and we have no need to weigh the considerations discussed in the *Madison Gas* footnote.

Accordingly, article XVII of the unit operating agreement (1) does not serve to prevent us from agreeing with respondent that the unitization agreement and the unit operating agreement created a partnership for purposes of section 1402(a), and (2) does not serve to insulate petitioner from the self-employment taxes.

[2399] *Cokes v. Commissioner*, 91 T.C. 222, 233-234 (1988), held:

Petitioner stresses her lack of control of the working interest operations because of the close relationships among the other owners and the operator. The question before us is whether petitioner was a member of a partnership or of a joint venture treated as a partnership, and petitioner's lack of control does not affect that question.[11]

[11] The report of the Committee on Ways and Means on the Social Security Act Amendments of 1949 (H. R. 6000) explained the provision as follows (H. Rept. 1300, 81st Cong., 1st Sess. 136-137 (1949), 1950-2 C.B. 294):

> "The net earnings from self-employment of an individual include, in addition to the earnings from a trade or business carried on by him, his distributive share of the net income or loss from any trade or business carried on by each partnership of which he is a member. *** [A] partnership which constitutes an association taxable as a corporation *** is not recognized as a partnership for such purposes. Moreover, only the net income or loss derived by the partnership from carrying on a trade or business is taken into account. Any net income or loss of the partnership derived from sources clearly unrelated to the trade or business carried on by it is excluded in determining the net earnings from self-employment of the partners. The net earnings from self-employment of a partner include his distributive share of the net income or loss of a partnership of which he is a member, irrespective of the nature of his membership, as for example, as a limited or inactive member."

In 1977, the Congress amended sec. 1402(a) to add thereto par. (12), which excludes "the distributive share of any item of income or loss of a limited partner, as such" (sec. 313(b)(3) of the Social Security Amendments of 1977, Pub. L. 95-216, 91 Stat. 1509, 1536). (Sec. 124(c)(2) of the Social Security Amendments of 1983, Pub. L. 98-21, 97 Stat. 65, 90, redesignated par. (12) for taxable years beginning after Dec. 31, 1989.) Petitioner does not contend that the owners of the working interests constituted a limited partnership, nor that she is a limited partner . It appears that, in the participate generate SE income[2400] unless the taxpayer can qualify as a limited partner (or perhaps passive member of an LLC) under part II.L.4 Self-Employment Tax Exclusion for Limited Partner, which occurred in *Hardy v. Commissioner*, T.C. Memo. 2017-16, a case involving an LLC member who had management rights as an equal 1/8 owner but acted as a mere investor.[2401]

Guaranteed payments for services rendered generally are subject to SE tax.[2402] However, they are not subject to SE tax if and to the extent that the activity for which the services are rendered does not constitute a trade or business.[2403] On the other hand, an activity that is excluded from self-employment tax might constitute a trade or business for purposes of applying SE tax to guaranteed payments for services rendered.[2404]

> > words of the 1949 committee report, petitioner may fairly be described as an "inactive member", rather than a limited partner.
>
> Petitioner contends that "The situation is analogous to a minority interest in a close-held corporation."
>
> The problem is that petitioner (and Cokes) did not put their working interest in a corporation, and, for purposes of the self-employment taxes, the relevant statute makes receipt of distributive share of trade or business income from a partnership (defined expansively in section 7701(a)(2)) generally equivalent to the partner's engagement in a trade or business.

[2400] *Methvin v. Commissioner*, T.C. Memo. 2015-81, *aff'd* 653 Fed. Appx. 616 (10th Cir. 6/24/2016), imposed self-employment tax on the owner of working interests in several oil and gas ventures. The working interests were no more than 2%-3% in ventures that "were not part of a business organization (such as a partnership, a limited partnership, a limited liability company, or a corporation) that is registered under the laws of any State." Furthermore, "Petitioner had no right of involvement in the management or operation of the ventures." Nevertheless, the Tax Court held:

> In support of his contention petitioner emphasizes his lack of active involvement in the operation of the wells, his lack of knowledge and expertise in the oil industry, and the fact that his working interests were small, minority interests in each well. The record supports petitioner's contention that his personal involvement in the day-to-day operation of the wells was minimal. However, a taxpayer who is not personally active in the management or operation of a trade or business may be liable for self-employment tax if the trade or business is carried out on his behalf through his agents or employees or constitutes his distributive share of income from a partnership in which he was a member. Sec. 1402(a); *Cokes v. Commissioner*, 91 T.C. 222 (1988); *Perry v. Commissioner*, T.C. Memo. 1994-215; *Moorhead v. Commissioner*, T.C. Memo. 1993-314; secs. 1.1402(a)-2(b), 1.1402(c)-1, Income Tax Regs.

[2401] See text accompanying fns. 2421–2428.

[2402] Rev. Rul. 55-30. Furthermore, if the IRS asserts that guaranteed payments were for services and not for capital, the IRS will succeed unless the taxpayer proves that they were for capital. *Seismic Support Services, LLC v. Commissioner*, T.C. Memo. 2014-78 (accuracy-related penalties imposed) and 2015-151 (rejecting various additional arguments by the taxpayer).

[2403] Reg. § 1.1402(a)-1(b). Guaranteed payments are not W-2 wages. See fn. 438.

[2404] Reg. § 1.1402(c)-1.

II.L.4. Self-Employment Tax Exclusion for Limited Partners' Distributive Share

A limited partner's income is not subject to SE tax,[2405] except for guaranteed payments for services rendered to a partnership that engages in a trade or business.[2406] Being passive in an entity is insufficient; the entity must actually be a state law limited partnership;[2407] later this part II.L.4 discusses when this exception has been expanded for LLCs. One case, involving a general partnership that elect limited liability protection for its general partners, has led some commentators to suggest that the Tax Court might consider a limited partner's distributive share of income to be subject to SE tax if the limited partner performs services;[2408] I agree that the language is troublesome but disagree with this suggestion, because that case did not involve a limited partnership and the legislative history cited in the text accompanying fn. 2409 clearly contemplates that a partner can be a general partner and a limited partner and benefit from the limited partner exclusion.

If a person is both a general partner and a limited partner, income attributable to that person's interest as a general partner is subject to SE tax, as described in the legislative history of the statute that excludes a limited partner's self-employment income:[2409]

[2405] Code § 1402(a)(13). See *Hough v. Commissioner*, T.C. Memo. 1997-361 (loss from limited partnership could not offset self-employment earnings from law practice), *aff'd* 162 F.3d 1151 (3rd Cir. 1998).

[2406] Code § 1402(a)(13). See *Howell v. Commissioner*, T.C. Memo. 2012-303 (guaranteed payments from LLC were subjected to self-employment tax), initially discussed in the Shop Talk column by Banoff and Lipton, "Does *Renkemeyer*'s Legacy of Confusion Live On?" *Journal of Taxation* (February 2013).

[2407] *Perry v. Commissioner*, T.C. Memo. 1994-215, held:

> The evidence does not support petitioner's contention that he is a limited partner. State law requires that certain formalities be observed to create a limited partnership (partnership in commendam in Louisiana). Tex. Rev. Civ. Stat. Ann. art. 6132a-1 (West Supp. 1994); La. Civ. Code Ann. arts. 2836-2848 (West Supp. 1994); *Johnson v. Commissioner*, *supra*. There is no evidence of such formalities having been observed by the owners of interests in the wells.

Norwood v. Commissioner, T.C. Memo. 2000-84, followed this:

> It is undisputed that petitioner's interest in Gallant was a general partnership interest. Accordingly, his distributive share of the partnership's trade or business income is, subject to the limitations of section 1402(b), subject to the taxes imposed by section 1401 on self-employment income. *Cokes v. Commissioner*, 91 T.C. 222, 229-230 (1988); *Anderson v. Commissioner*, T.C. Memo. 1992-130. That petitioner spent a minimal amount of time engaged in the operations of Gallant is irrelevant to this determination. *Cokes v. Commissioner*, *supra* at 233; *Anderson v. Commissioner*, *supra*. The passive activity rules under section 469 have no application in this case. Petitioner's lack of participation in or control over the operations of Gallant does not turn his general partnership interest into a limited partnership interest. A limited partnership must be created in the form prescribed by State law. *Perry v. Commissioner*, T.C. Memo. 1994-215; *Johnson v. Commissioner*, T.C. Memo. 1990-461.

[2408] See language highlighted in fn. 2418.

[2409] House Report No. 95-702, Part 1 (to accompany H.R. 7346, which became PL 95-216), October 12, 1977, p. 40, which further explained its reasons on pp. 40-41:

> Under present law each partner's share of partnership income is includable in his net earnings from self-employment for social security purposes, irrespective of the nature of his membership in the partnership. Under the bill the distributive share of income or loss

Under present law each partner's share of partnership income is includable in his net earnings from self-employment for social security purposes, irrespective of the nature of his membership in the partnership. Under the bill the distributive share of income or loss received by a limited partner from the trade or business of a limited partnership would be excluded from social security coverage. However, the exclusion from coverage would not extend to guaranteed payments (as described in section 707(c) of the Internal Revenue Code), such as salary and professional fees, received for services actually performed by the limited partner for the partnership. Distributive shares received as a general partner would continue to be covered. Also, if a person is both a limited partner and a general partner in the same partnership, the distributive share received as a general partner would continue to be covered under present law.

For details on Code § 707(c), see part II.C.8.a Code § 707 - Compensating a Partner for Services Performed.

Assigning one's income as an independent contractor to a limited partnership does not avoid SE tax if the payor does not recognize the assignment.[2410]

---

received by a limited partner from the trade or business of a limited partnership would be excluded from social security coverage. However, the exclusion from coverage would not extend to guaranteed payments (as described in section 707(c) of the Internal Revenue Code), such as salary and professional fees, received for services actually performed by the limited partner for the partnership. Distributive shares received as a general partner would continue to be covered. Also, if a person is both a limited partner and a general partner in the same partnership, the distributive share received as a general partner would continue to be covered under present law.

Your committee has become increasingly concerned about situations in which certain business organizations solicit investments in limited partnerships as a means for an investor to become insured for social security benefits. In these situations the investor in the limited partnership performs no services for the partnership and the social security coverage which results is, in fact, based on income from an investment. This situation is of course inconsistent with the basic principle of the social security program that benefits are designed to partially replace lost earnings from work.

These advertisements and solicitations are directed mainly toward public employees whose employment is covered by public retirement systems and not by social security. Also, these advertisements frequently emphasize the point that those who invest an amount sufficient to realize an annual net income of $400 or more (the minimum amount needed to receive social security credit in a year) will eventually gain a high return on their social security contributions. Many of those who invest in limited partnerships will qualify for minimum benefits, which are heavily weighted for the purpose of giving added protection for people who have worked under social security for many years with low earnings. The cost of paying these heavily weighted benefits to limited partners must, of course, be borne by all persons covered by the social security program. The advertising injures the social security program in the public view and causes resentment on the part of the vast majority of workers whose employment is compulsorily covered under social security, as well as those people without work income who would like to be able to become insured under the social security program but cannot afford to invest in limited partnerships.

[2410] *Peterson v. Commissioner*, 827 F.3d 968 (11th Cir. 5/24/2016), affirming T.C. Memo. 2013-271. For as similar holding regarding an S corporation, see part II.G.23 Taxing Entity or Individual Performing Services, especially fn. 1267. Similarly, a person who controlled a

Although originally a limited partner lost liability protection by participating in the partnership's activities, that has not been the case for quite some time.[2411] In the

partnership and was paid directly for services lost his argument that the payments really were for a distributive share of a limited partnership and therefore were excluded under Code § 1402(a)(13), because he actually did not own an interest in the partnership. *Plotkin v. Commissioner*, T.C. Memo. 2011-260. When the taxpayer established an entity as a mere shell, *Robucci v. Commissioner*, T.C. Memo. 2011-19, disregarded the entity, and in fn. 11 declined to address the IRS' other argument:

> Although it is apparently respondent's position that profit distributions to service-providing members of a multimember, professional service LLC (which is what Robucci LLC was designed to be) are never excepted from net earnings from self-employment by sec. 1402(a)(13), which so excepts distributions to a limited partner other than sec. 707(c) guaranteed payments for services rendered, the Secretary has yet to issue definitive guidance with respect to that issue, and the law remains in a state of uncertainty. See, *e.g.*, Kalinka, 9A La. Civ. L. Treatise, Limited Liability Companies and Partnerships: A Guide to Business and Tax Planning, sec. 6.2, at 423 (3d ed. 2001); Chase, Self-Employment Tax and Choice of Entity, 34 Colo. Law. 109, 112 (Dec. 2005).

[2411] Footnotes to Bishop & Kleinberger, ¶ 11.03[1][c][ii] Distinguishing limited partnership cases, *Limited Liability Companies: Tax and Business Law* (WG&L) (viewed 9/3/2016), comment:

> The 1976 version of the RULPA provided that a limited partner risked personal liability if the partner takes part in the control of the business. See, *e.g.*, *Mursor Builders, Inc. v. Crown Mountain Apartment Assocs.*, 467 F. Supp. 1316, 1331–1332 (DC Virgin Islands 1978) (limited partners liable only for debts of the partnership incurred prior to filing certificate of limited partnership); *Antonic Rigging & Erecting of Mo., Inc. v. Foundry E. Ltd. Partnership*, 773 F.Supp. 420, 430 (SD Ga. 1991) (court held that limited partner was not liable to contractor for partnership debts on the ground that limited partner participated in management). The 1985 amendments significantly changed this provision, lengthening substantially a list of safe harbors. The newest version of the Uniform Limited Partnership Act eliminates the control rule entirely. ULPA (2001), § 303.
>
> ….
>
> As for ULPA (2001), the most modern uniform limited partnership act, in § 303, eliminates the control rule entirely: A limited partner is not personally liable, directly or indirectly, by way of contribution or otherwise, for an obligation of the limited partnership solely by reason of being a limited partner, even if the limited partner participates in the management and control of the limited partnership.

A prior version of Willis & Postlewaite, *Partnership Taxation*, ¶2.02. Requirements of Section 704(e), stated:

> As originally written, the Uniform Limited Partnership Act provided that [a] limited partner shall not become liable as a general partner unless…he takes part in the control of the business. ULPA, § 7 (1916). The versions of the Revised Uniform Limited Partnership Act approved in 1976 and 1985 relaxed the control requirement by providing a safe harbor in the form of a lengthy list of activities deemed not to constitute participation in the control of the partnership and a limitation on a limited partner's liability for participation in activities not within the safe harbor to only those persons who transacted business with the limited partnership reasonably believing, based upon the limited partner's conduct, that the limited partner is a general partner. RULPA, § 303 (1985). Section 303 of the Uniform Limited Partnership Act approved in 2001 has eliminated the control requirement and provides that:
>
>> A limited partner is not personally liable, directly or indirectly, by way of contribution or otherwise, for an obligation of the limited partnership solely by reason of being a limited partner, even if the limited partner participates in the management and control of the limited partnership.

passive loss area, being a general partner has a different effect – it converts an interest as a limited partner into an interest as a general partner when determining material participation.[2412]

A limited partnership[2413] may register as a limited liability limited partnership (LLLP) to limit its general partner's liability.[2414] However, rather than using an LLLP registration or perhaps to supplement the protection provided by LLLP registration,[2415] doing business through one or more LLC subsidiaries might simplify signature lines, with individuals signing as managers of each LLC rather than officers of the S corporation general partner [2416] signing on behalf of the partnership. For a comparison, see part II.E.8 Alternative Partnership Structure – LLLP Alone or LP with LLC Subsidiary.

It is uncertain how this exclusion for limited partners applies to limited liability entities, with more than one member, that are not state law limited partnerships.[2417] Reasoning that "partners who performed services for a partnership in their capacity as partners (*i.e.*, acting in the manner of self-employed persons)" were not intended to be "limited partners," *Renkemeyer, Campbell and Weaver, LLP v. Commissioner*, 136 T.C. 137 (2011), held that partners in a limited liability partnership (a general partnership that registers with the secretary of state to obtain limited liability for all partners) were subject to self-employment tax.[2418] The court pointed out that substantially:

> RULPA, § 303 (2001). According to the commentary accompanying the act, this provision is intended to provide a full, status-based liability shield for each limited partner even when the limited partner participates in the management and control of the limited partnership. The purpose is to bring limited partners into parity with the members of a limited liability company, partners in a limited liability partnership, and corporate shareholders. It is unclear how this change in state partnership law might affect the application of federal tax law in the context of family partnerships. Nevertheless, if the limited partners are to have no role in the management of the partnership, the partnership agreement should expressly provide that the limited partners have no management power.

2412 See part II.K.1.a.ii Material Participation, especially fn. 2057.

2413 See part II.C.11 Limited Partnership.

2414 See part II.C.12 Limited Liability Partnership Registration.

2415 In Missouri, failure to timely renew LLLP status creates a lapse in the general partner's protection, which lapse cannot be cured, in contrast to the many other states that allow retroactive reinstatement.

2416 See part II.L.5 Self-Employment Tax: Partnership with S Corporation Blocker.

2417 See RIA's *Fed. Tax Coord.2d* ¶A-6158. Letter Ruling 9432018 held that a member's interest generally is subject to self-employment tax. Note that the fact of limited liability is not sufficient to treat a member's interest as a limited partner interest for purposes of the Code § 469 passive loss rules. See fn 2042. Courts have ruled against the IRS when it argued that an LLC member was a limited partner for purposes of the passive loss rules (see fn. 2055); query whether they would treat an LLC member as a limited partner for SE tax purposes, especially when they have ruled that exceptions from SE tax are to be narrowly construed (see *Morehouse* and *Johnson* cases cited in fn 2371).

2418 The court cited the following legislative history:

> Under present law each partner's share of partnership income is includable in his net earnings from self-employment for social security purposes, irrespective of the nature of his membership in the partnership. The bill would exclude from social security coverage, the distributive share of income or loss received by a limited partner from the trade or business of a limited partnership. This is to exclude for coverage purposes certain

> all of the law firm's revenues were derived from legal services performed by [the partners] in their capacities as partners. [The partners] each contributed a nominal amount ($110) for their respective partnership units. Thus it is clear that the partners' distributive shares of the law firm's income did not arise as a return on the partners' investment and were not 'earnings which are basically of an investment nature.' Instead, the attorney partners' distributive shares arose from legal services they performed on behalf of the law firm.

> earnings which are basically of an investment nature . However, the exclusion from coverage would not extend to guaranteed payments (as described in 707(c) of the Internal Revenue Code), such as salary and professional fees, received for services actually performed by the limited partner for the partnership.

It then stated:

> The insight provided reveals that the intent of section 1402(a)(13) was to ensure that individuals who merely invested in a partnership and who were not actively participating in the partnership's business operations (which was the archetype of limited partners at the time) would not receive credits toward Social Security coverage. The legislative history of section 1402(a)(13) does not support a holding that Congress contemplated excluding partners who performed services for a partnership in their capacity as partners (i.e., acting in the manner of self-employed persons), from liability for self-employment taxes.

These comments were made in the context of a partner who argued that limited liability made him the equivalent of a limited partner; the court was not addressing the status of a limited partner in a limited partnership. For an in-depth discussion, see Banoff, *Renkemeyer* Compounds the Confusion in Characterizing Limited and General Partners—Part 2, *Journal of Taxation*, June 2012. Part 1 was in the December 2011 issue of the Journal. See also Banoff and Lipton, "Does *Renkemeyer*'s Legacy of Confusion Live On?" *Journal of Taxation* (February 2013). In their Shop Talk column, Who's a 'Limited Partner'? More Confusion Courtesy of *Renkemeyer* and *Howell*, *Journal of Taxation* (April 2013), Banoff and Lipton discussed comments, by Ronald M. Weiner, that in *Howell* (fn. 2406) the IRS merely attacked the taxpayer's characterization of guaranteed payments as not being self-employment income. They suggested that the IRS missed the boat in failing to attack as self-employment income the taxpayer's distributive share of partnership income. *Renkemeyer* involved an LLP, whereas *Howell* involved an LLC. The authors pointed out that, in *Renkemeyer*, the partners were general partners as a matter of state law, even though they had limited liability, so the *Renkemeyer* court's analysis was much more complicated than it needed to be.

Similarly, CCA 201436049 refused to apply the limited partner exception to an LLC, reasoning:[2419]

> Like the situation in *Renkemeyer*, Partners' earnings are not in the nature of a return on a capital investment, even though Partners paid more than a nominal amount for their Units. Rather, the earnings of each Partner from Management Company are a direct result of the services rendered on behalf of Management Company by its Partners. Similar to *Reither [*sic – *Riether]*, Management Company cannot change the character of its Partners' distributive shares by paying portions of each Partners' distributive share as amounts mislabeled as so-called "wages." Management Company is not a corporation and the "reasonable compensation" rules applicable to corporations do not apply.

However, CCA 201640014 treated an inactive member of an LLC as a limited partner, presumably consistent with the IRS' informal administrative practice of following subsections (g) through (i) of Prop. Reg. § 1.1402(a)-2:

> Franchisee owns the majority of Partnership (D percent). During the years at issue, the remaining interests in Partnership were owned by Franchisee's wife (E percent) and her irrevocable trust (F percent). Partnership's operating agreement provides for only one class of unit of ownership. Neither Franchisee's wife nor her trust are involved with Partnership 's business operations and their status as limited partners for purposes of § 1402(a)(13) is not in dispute.

On the other hand, the CCA subjected to SE tax the entire distributive share of the majority owner of the LLC, who was active in the business, rejecting his argument that the portion of his distributive share that was not attributable to his work should be excluded from SE income:[2420]

[2419] *Riether* in the quote below is cited in fn. 438, found in part III.B.7.c.viii Creative Bonus Arrangements. In that case, a married couple jointly owned an LLC that operated a business. They paid themselves salary on Forms W-2 and said that the remaining income came from their employees' work, which made that income akin to being a limited partner because they did not participate in the work. The court pointed out that Rev. Rul. 69-184 required them to report compensatory payments as guaranteed payments subject to SE tax instead of on Forms W-2, said that their incorrect reporting on Forms W-2 did not somehow excuse the failure to report their distributive share of the LLC's income as SE income given that they had not proven themselves to be limited partners, and imposed an accuracy-related penalty (the latter because they had not shown that they had relied on their income tax return preparer's advice in reporting the income as not subject to SE tax..
CCA 201436049 might very well be the same case the IRS won that is discussed further below, *Castigliola v. Commissioner*, T.C Memo. 2017-62.

[2420] Preceding this conclusion, the CCA said (emphasis added):

> Partnership concedes that under the legislative history quoted above and the *Renkemeyer* opinion, service partners in a service partnership acting in the manner of self-employed persons are not limited partners. However, Partnership argues that a different analysis should apply to limited liability members which: (1) derive their income from the sale of products, (2) have made substantial capital investments, and (3) have delegated significant management responsibilities to executive-level employees. Partnership asserts that in these cases the IRS should apply substance over form principles to exclude from self-employment tax a reasonable return on capital invested.

As discussed above, the *Renkemeyer* Court reviewed the legislative history and concluded that § 1402(a)(13) was intended to apply to those who "merely invested" rather than those who "actively participated" and "performed services for a partnership in their capacity as partners (i.e., acting in the manner of self-employed persons)." *Renkemeyer*, 136 TC at 150 Although the *Renkemeyer* Court noted the partners' small capital contributions and service-generated income as factors influencing its decision that the partners in that case were not limited partners, *Renkemeyer* does not stand for the proposition that a capital-intensive partnership should be treated like a corporation for employment tax purposes. Instead, as the Tax Court has repeatedly held, partners who are not limited partners are subject to self-employment tax, even in cases involving capital-intensive oil and gas joint ventures where all of the work was performed by other parties. See *Cokes*, *Methvin*, and *Perry*. Under the *Renkemeyer* Court's interpretation of the legislative history, and consistent with the Court's holding in *Riether*, Franchisee is not a limited partner in Partnership within the meaning of § 1402(a)(13) and is subject to self-employment tax on his full distributive shares of Partnership's income described in § 702(a)(8).

Hardy v. Commissioner, T.C. Memo. 2017-16, treated as a limited partner eligible for the exclusion from SE tax a doctor who owned a 12.5% interest in an LLC, owned together with seven other doctors, that operated a professionally managed[2421] surgery center:[2422]

Partnership interprets the legislative history quoted above to mean that § 1402(a)(13) applies to exclude a partner's reasonable return on capital-investment in a capital-intensive LLC partnership, regardless of the extent of the partner's involvement with the partnership's business. In effect, Partnership interprets the sentence from the legislative history This is to exclude for coverage purposes certain earnings which are basically of an investment nature as instead meaning This is to exclude for coverage purposes all earnings which constitute a reasonable return on capital invested in a capital-intensive business. Essentially, Partnership argues that the self-employment tax rules for capital intensive businesses carried on by LLC partnerships are identical to the employment tax rules for corporate shareholder employees: only reasonable compensation is subject to employment tax. Under this analysis, Partnership argues that (1) Partnership's guaranteed payments to Franchisee are reasonable compensation for Franchisee's services, and (2) Franchisee's distributive share represents a reasonable return on capital investments in Partnership's business, and therefore Franchisee is not subject to self-employment tax on his distributive share. Partnership argues that it would be inconsistent with the IRS's position in the Brinks case for the IRS to assert that Franchisee is subject to self-employment tax on his distributive share from Partnership.

Partnership's arguments inappropriately conflate the separate statutory self-employment tax rules for partners and the statutory employment tax rules for corporate shareholder employees. ***Section 1402(a)(13) provides an exclusion for limited partners, not for a reasonable return on capital***, and does not indicate that a partner's status as a limited partner depends on the presence of a guaranteed payment or the capital-intensive nature of the partnership's business.

Following the Court's analysis in *Riether*, Partnership cannot change the character of Franchisee's distributive shares by paying Franchisee guaranteed payments. Partnership is not a corporation and the wage and reasonable compensation rules which are applicable to corporations and were at issue in the Brinks case do not apply.

[2421] The court pointed out:

MBJ hires its own employees and does not share any employees with Northwest Plastic Surgery. Like hospitals, MBJ directly bills patients for facility fees. MBJ then distributes

> Dr. Hardy has never managed MBJ, and he has no day-to-day responsibilities there. Although he meets with the other members quarterly, he does not have any input into management decisions. He generally is not involved in hiring or firing decisions. His role and participation in MBJ have not changed since he became a member.

Contrasting Dr. Hardy's work with the lawyers practicing law in *Renkemeyer*[2423] and receiving distributive shares based on those fees from practicing law, the court pointed out:

> Dr. Hardy is receiving a distribution based on the fees that patients pay to use the facility. The patients separately pay Dr. Hardy his fees as a surgeon, and they separately pay the surgical center for use of the facility in the same manner as with a hospital. Accordingly, Dr. Hardy's distributive shares are not subject to self-employment tax because he received the income in his capacity as an investor.

This last comment, about viewing Dr. Hardy as an investor, ties into other aspects of the case. Dr. Hardy claimed that the income from the surgery center was passive, so that he could deduct passive losses against it.[2424] To avoid recharacterizing the income as nonpassive, he had to prove that he spent no more than 100 hours per year on it.[2425] The Tax Court seemed to view his quarterly meetings with other members as investor time, rather than time spent as a working owner.[2426]

When I read the case, I had expected to see this set up as a manager-managed LLC, with the non-owner CEO being the manager under the operating agreement. I was very surprised to see the most recent annual report (viewed 3/1/2017), which said that each owner is a member-manager. Other documents from the secretary of state indicate that three doctors (not Dr. Hardy) were the initial managers in 2004; the annual reports for the years involved in the case, 2008-2010 do not clarify whether Dr. Hardy was a member or a member-manager, but they also do not list as a manager a person other than the members. Taken as a whole, the court's opinion and related documentation suggest that, in this LLC, the members together had exclusive legal authority to run the business. No member had more rights to run the business than any other. Their legal rights were not akin to the legal rights of a limited partner. Collectively, their legal rights were equal and were those of general partners.

> to each of its members his or her share of the earnings based on the facility fees less expenses. MBJ uses a third-party accounting firm to prepare the Schedules K-1, Partner's Share of Income, Deductions, Credits, etc., for the members. MBJ does not pay physicians for their procedures.

2422 The IRS' post-trial brief pointed out that the members approved an employee termination at the CEO's request, but the transcript indicated that was an unusual situation and that the CEO usually took care of employment issues without consulting the members as an ownership group.

2423 See the extensive quotes from *Renkemeyer* in fn. 2418, found in this part II.L.4.

2424 The IRS tried to require Dr. Hardy to group his activity in his medical practice with his activity in the surgery center, but the Tax Court held that his decision not to group the two activities was reasonable. See part II.K.1.b Grouping Activities, especially fns. 2082 and 2129.

2425 See part II.K.1.h Recharacterization of Passive Income Generators (PIGs) as Nonpassive Income.

2426 See part II.K.1.a.v What Does Not Count as Participation.

Clearly, they delegated daily management to a non-owner and chose to oversee the business as mere investors, but that does not change the fact that the owners collectively had plenary legal rights to run the business on a daily basis. This looks to me like a general partnership in which the general partners agreed not to run the business themselves but rather agreed to hire staff to run the business. They are simply passive general partners. (Having limited liability does not cause one to be a limited partner, according to *Renkemeyer*, [2427] so the LLC's liability protection is of no consequence.) Neither the trial transcript nor the judge's opinion demonstrates any awareness of what Dr. Hardy's rights really were; they simply looked to his lack of activity. This approach appears to contradict *Methvin v. Commissioner*, T.C. Memo. 2015-81, involving an unincorporated venture in which the taxpayer had no management rights but nevertheless was subjected to self-employment tax.[2428]

Castigliola v. Commissioner, T.C Memo. 2017-62, held that three lawyers who were the only members in a law firm organized as a member-managed LLC were subject to SE tax on not only their guaranteed payments, which were comparable to salaries at other law firms, but also on their distributive share of the LLC's income. As was the case in *Hardy*, each member had an equal right to manage the LLC, and no member had a controlling interest. Unlike *Hardy* (where the members were passive investors), working for the LLC constituted the members' full-time jobs. Also unlike *Hardy*, the judge rigorously analyzed Code § 1402(a)(13) to determine what it means to be a limited partner.

Following *Renkemeyer*,[2429] *Castigliola* noted that "no statutory or regulatory authority defines 'limited partner' for the purposes of section 1402(a)(13)," and therefore "the term is to be given its ordinary meaning at the time of enactment."[2430] Because "*Renkemeyer* indicated that the meaning of 'limited partner' is not necessarily confined solely to the limited partnership context," the court first looked to "whether the person claiming the section 1402(a)(13) exemption held a position in an entity treated as a partnership for Federal tax purposes that is functionally equivalent to that of a limited partner in a limited partnership," asking whether a member of the LLC (a "professional limited liability company" or "PLLC") "is functionally equivalent to a limited partner in a limited partnership." The court pointed out:

> A limited partnership has two classes of partners, general and limited. *E.g.*, *Garnett v. Commissioner*, 132 T.C. at 375. General partners typically have management power and unlimited personal liability. 1 Bromberg & Ribstein, *Partnership*, sec. 1.01(B)(3) (2015-3 Supp.). On the other hand, limited partners typically lack management power but enjoy immunity from liability for debts of the partnership. *Id.*

[2427] See the extensive quotes from *Renkemeyer* in fn. 2418, found in this part II.L.4.
[2428] See fn. 2400, found in part II.L.2.a.i General Rules for Income Subject to Self-Employment Tax.
[2429] See the extensive quotes from *Renkemeyer* in fn. 2418, found in this part II.L.4.
[2430] Citing *Gates v. Commissioner*, 135 T.C. 1, 6 (2010), and *Perrin v. United States*, 444 U.S. 37, 42 (1979).

The court noted limited partnership law when Code 1402(a)(13) was enacted in 1977 and how it has evolved since then.[2431] Applying that summary to the case at hand:

> Common to each of the definitions of "limited partner" discussed above are the primary characteristics of limited liability and lack of control of the business. In this case, the respective interests in the PLLC held by Mr. Castigliola, Mr. Banahan, and Mr. Mullen made each a member of the PLLC, which was member-managed.[9] Therefore management power over the business of the PLLC was vested in each of them through the interest each held. *See id.* sec. 79-29-302 (effective after July 1, 1994). The PLLC had no written operating agreement, nor is there any evidence to show that any member's management power was limited in any way. Furthermore, all members participated in control of the PLLC: For example, they all participated in collectively making decisions regarding their distributive shares, borrowing money, hiring, firing, and rate of pay for employees. They each supervised associate attorneys and signed checks for the PLLC. On the basis of the foregoing facts, the respective interests held by Mr. Castigliola, Mr. Banahan, and Mr. Mullen could not have been limited partnership interests under any of the limited partnership acts. Therefore, they were not limited partners under section 1402(a)(13).

[2431] The court stated:

> More specifically, the exact meaning of "limited partner" may vary slightly from State to State. The Uniform Law Commission drafted the Uniform Limited Partnership Act in 1916 (ULPA (1916)), and the Revised Uniform Limited Partnership Act in 1976 (RULPA (1976)). Amendments were added to RULPA (1976) in 1985 (RULPA (1985)). Versions of these uniform acts have been adopted in most States, sometimes with modifications.
>
> Section 7 of ULPA (1916) states: "A limited partner shall not become liable as a general partner unless, in addition to the exercise of his rights and powers as a limited partner, he takes part in the control of the business." ULPA (1916) allowed limited partners a narrow set of rights but did not specifically define which activities a limited partner could perform without losing limited partner status. See *id.* sec. 10 (allowing limited partners the rights to inspect books, demand an accounting of partnership affairs, and receive a share of the profits and return of capital, and also allowing limited partners the same right as general partners to request dissolution and winding up of the partnership).
>
> Section 303(a) of RULPA (1976) provides—in terms almost identical to those of ULPA (1916)—that a "limited partner" would lose limited liability protection if "in addition to the exercise of his rights and powers as a limited partner, he takes part in the control of the business." With regard to the meaning of "limited partner", the essential difference between ULPA (1916) and RULPA (1976) is that RULPA (1976) enumerates certain activities that a limited partner may perform without taking part in control of the business; for example, section 303(b)(5)(i) and (ii) of RULPA (1976) explicitly permits limited partners to vote on the dissolution of the partnership or the sale of substantially all of the partnership's assets.
>
> In 1987 Mississippi adopted RULPA (1985) with some modifications. See 1987 Miss. Laws, ch. 488, sec. 303 (effective from Jan. 1, 1988); Miss. Code Ann. sec. 79-14-303 (2009). In terms almost identical to those of ULPA (1916) and RULPA (1976), the version of the limited partnership act that Mississippi adopted in 1987—and which was effective throughout the years at issue—provided that a "limited partner" would lose limited liability protection if "in addition to the exercise of his rights and powers as a limited partner, he participates in the control of the business." Miss. Code Ann. sec. 79-14-303. Like RULPA (1976), Mississippi's version provides safe harbors for various activities a limited partner may perform without losing limited liability protection. *Id.*

> [9] There is no evidence to suggest that any member held a different type of interest in the PLLC or held more than one type of interest in the PLLC.

The court recognized that "a limited partnership must have at least one general partner"[2432] and, in reinforcing its conclusion that the members were not limited partners, reasoned:

> This is logical, because limited partners, as discussed above, cannot participate in control of the business and maintain their limited liability. Because there must be at least one partner who is in control of the business, there must be at least one general partner. The members testified that all members participated equally in all decisions and had substantially identical relationships with the PLLC. There was no PLLC operating agreement or other evidence to suggest otherwise. But since by necessity at least one of the members must have occupied a role analogous to that of a general partner in a limited partnership, and because all of the members had the same rights and responsibilities, they must all have had positions analogous to those of general partners in a limited partnership. This conclusion is affirmed by the history of the PLLC: Before the members organized the PLLC, they operated as a general partnership; and there is no evidence that organizing as a PLLC was accompanied by any change in the way they managed the business.

Thus, the court would not accept a headless entity,[2433] whereas *Hardy* implicitly accepted that idea because the members were mere investors who delegated daily running of the business to a skilled managerial employee. *Hardy* did not analyze either what it means to be a limited partner or what were the members' rights to run the LLC; it focused only on the fact that they did not run the LLC on a daily basis.

Moving on to other authority in this area: In light of the ascendancy of LLCs, subsections (g) through (i) of Prop. Reg. § 1.1402(a)-2 would define a limited partner, if ever finalized:

> **(g) Distributive share of limited partner.** An individual's net earnings from self-employment do not include the individual's distributive share of income or loss as a limited partner described in paragraph (h) of this section. However, guaranteed payments described in section 707(c) made to the individual for services actually rendered to or on behalf of the partnership engaged in a trade or business are included in the individual's net earnings from self-employment.

[2432] Citing:

> *See*, *e.g.*, Miss. Code Ann. sec. 79-14-801 (2009) ("A limited partnership is dissolved and its affairs must be wound up upon the first of the following to occur: * * * (4) An event of withdrawal of a general partner unless at the time there is at least one other general partner[.]").

[2433] *Riether*, discussed in fn. 2419, implicitly made a similar assumption when it held that a married couple that jointly owned an LLC could not claim the limited partner exclusion without proving that status.

(h) Definition of limited partner.

(1) In general. Solely for purposes of section 1402(a)(13) and paragraph (g) of this section, an individual is considered to be a limited partner to the extent provided in paragraphs (h)(2), (h)(3), (h)(4), and (h)(5) of this section.

(2) Limited partner. An individual is treated as a limited partner under this paragraph (h)(2) unless the individual—

(i) Has personal liability (as defined in §301.7701-3(b)(2)(ii) of this chapter) for the debts of or claims against the partnership by reason of being a partner;[2434]

(ii) Has authority (under the law of the jurisdiction in which the partnership is formed) to contract on behalf of the partnership;[2435] or

(iii) Participates in the partnership's trade or business for more than 500 hours during the partnership's taxable year.

(3) Exception for holders of more than one class of interest. An individual holding more than one class of *interest* in the partnership who is not treated as a limited partner under paragraph (h)(2) of this section is treated as a limited partner under this paragraph (h)(3) with respect to a specific class of partnership interest held by such individual if, immediately after the individual acquires that class of interest—

(i) Limited partners within the meaning of paragraph (h)(2) of this section own a substantial, continuing interest in that specific class of partnership interest; and,

(ii) The individual's rights and obligations with respect to that specific class of interest are identical to the rights and obligations of that specific class of partnership interest held by the limited partners described in paragraph (h)(3)(i) of this section.

(4) Exception for holders of only one class of interest. An individual who is not treated as a limited partner under paragraph (h)(2) of this section solely because that individual participates in the partnership's trade or business for more than 500 hours during the partnership's taxable year is treated as a limited partner under this paragraph (h)(4) with respect to the individual's partnership interest if, immediately after the individual acquires that interest—

(i) Limited partners within the meaning of paragraph (h)(2) of this section own a substantial, continuing interest in that specific class of partnership interest; and

[2434] Does this mean personal liability as an inherent state law attribute of being an owner, or personal liability because lenders require all owners to guarantee loans?
[2435] Does this mean a manager-managed LLC and the limited partner is not a manager, or member-managed with voting and nonvoting interests?

(ii) The individual's rights and obligations with respect to the specific class of interest are identical to the rights and obligations of the specific class of partnership interest held by the limited partners described in paragraph (h)(4)(i) of this section.

(5) Exception for service partners in service partnerships. An individual who is a service partner in a service partnership may not be a limited partner under paragraphs (h)(2), (h)(3), or (h)(4) of this section.

(6) Additional definitions. Solely for purposes of this paragraph (h)—

(i) A *class of interest* is an interest that grants the holder specific rights and obligations. If a holder's rights and obligations from an interest are different from another holder's rights and obligations, each holder's interest belongs to a separate class of interest. An individual may hold more than one class of interest in the same partnership provided that each class grants the individual different rights or obligations. The existence of a guaranteed payment described in section 707(c) made to an individual for services rendered to or on behalf of a partnership, however, is not a factor in determining the rights and obligations of a class of interest.

(ii) A *service partner* is a partner who provides services to or on behalf of the service partnership's trade or business. A partner is not considered to be a service partner if that partner only provides a de minimis amount of services to or on behalf of the partnership.

(iii) A *service partnership* is a partnership substantially all the activities of which involve the performance of services in the fields of health, law, engineering, architecture, accounting, actuarial science, or consulting.

(iv) A *substantial interest in a class of interest* is determined based on all of the relevant facts and circumstances. In all cases, however, ownership of 20 percent or more of a specific class of interest is considered substantial.

(i) Example. The following example illustrates the principles of paragraphs (g) and (h) of this section:

Example. (i) A, B, and C form LLC, a limited liability company, under the laws of State to engage in a business that is not a service partnership described in paragraph (h)(6)(iii) of this section. LLC, classified as a partnership for federal tax purposes, allocates all items of income, deduction, and credit of LLC to A, B, and C in proportion to their ownership of LLC. A and C each contribute $1x for one LLC unit. B contributes $2x for two LLC units. Each LLC unit entitles its holder to receive 25 percent of LLC's tax items, including profits. A does not perform services for LLC; however, each year B receives a guaranteed payment of $6x for 600 hours of services rendered to LLC and C receives a guaranteed payment of $10x for 1000 hours of services rendered to LLC. C also is elected LLC's manager. Under State's law, C has the authority to contract on behalf of LLC.

(ii) *Application of general rule of paragraph (h)(2) of this section*. A is treated as a limited partner in LLC under paragraph (h)(2) of this section because A is not liable personally for debts of or claims against LLC, A does not have authority to contract for LLC under State's law, and A does not participate in LLC's trade or business for more than 500 hours during the taxable year. Therefore, A's distributive share attributable to A's LLC unit is excluded from A's net earnings from self-employment under section 1402(a)(13).

(iii) *Distributive share not included in net earnings from self-employment under paragraph (h)(4) of this section*. B's guaranteed payment of $6x is included in B's net earnings from self-employment under section 1402(a)(13). B is not treated as a limited partner under paragraph (h)(2) of this section because, although B is not liable for debts of or claims against LLC and B does not have authority to contract for LLC under State's law, B does participates in LLC's trade or business for more than 500 hours during the taxable year. Further, B is not treated as a limited partner under paragraph (h)(3) of this section because B does not hold more than one class of interest in LLC. However, B is treated as a limited partner under paragraph (h)(4) of this section because B is not treated as a limited partner under paragraph (h)(2) of this section solely because B participated in LLC's business for more than 500 hours and because A is a limited partner under paragraph (h)(2) of this section who owns a substantial interest with rights and obligations that are identical to B's rights and obligations. In this example, B's distributive share is deemed to be a return on B's investment in LLC and not remuneration for B's service to LLC. Thus, B's distributive share attributable to B's two LLC units is not net earnings from self-employment under section 1402(a)(13).

(iv) *Distributive share included in net earnings from self-employment*. C's guaranteed payment of $10x is included in C's net earnings from self-employment under section 1402(a). In addition, C's distributive share attributable to C's LLC unit also is net earnings from self-employment under section 1402(a) because C is not a limited partner under paragraphs (h)(2), (h)(3), or (h)(4) of this section. C is not treated as a limited partner under paragraph (h)(2) of this section because C has the authority under State's law to enter into a binding contract on behalf of LLC and because C participates in LLC's trade or business for more than 500 hours during the taxable year. Further, C is not treated as a limited partner under paragraph (h)(3) of this section because C does not hold more than one class of interest in LLC. Finally, C is not treated as a limited partner under paragraph (h)(4) of this section because C has the power to bind LLC. Thus, C's guaranteed payment and distributive share both are included in C's net earnings from self-employment under section 1402(a).

Because these regulations are merely proposed, however, taxpayers may either argue that they provide a reasonable position or ignore them as not yet being effective. In using them, consider the following:

- The material participation component of these proposed regulations generally would prevent a limited partner in a trade or business from reaching the sweet spot of avoiding both SE tax and the 3.8% tax on net investment income, unless one participates for more than 100 hours and no more than 500 hours.[2436]

- Suppose one wants to argue that one's interest in an LLC has a general partner and a limited partner component:
  - (h)(3)(ii) requires that the individual's rights and obligations with respect to that specific class of interest are identical to the rights and obligations of that specific class of partnership interest held by the limited partners described in (h)(3)(i).
  - Limited partners described in (h)(3)(i) must hold an aggregate 20% and be described in (h)(2).
  - To be described in (h)(2), a member cannot:
    - Have personal liability for the debts of or claims against the LLC by reason of being a member;
    - Have authority to contract on behalf of the LLC; or
    - Participate in the partnership's trade or business for more than 500 hours during the partnership's taxable year.

Considering that owners of operating businesses frequently make loan guarantees, making sure that 20% of the owners are never on loan guarantees, never have authority to represent the LLC in any manner, and are active in the business only within the 101-500 hour sweet spot[2437] is a tall order. And *Renkemeyer* includes very strong language against granting an exclusion from self-employment tax for an active owner in an entity that is not a limited partnership, and some are concerned that *Renkemeyer* might be extended one day to prevent limited partners in a limited partnership from excluding from SE income their distributive share as limited partners.[2438] Those who are extremely concerned about the latter might advise each partner to form his or her own S corporation to hold all of his or her interest in the business, which might simply be a straight LLC, as described in parts II.L.5 Self-Employment Tax: Partnership with S Corporation Blocker (idea that S corporations block SE income), II.L.5.c Examples of S Corporation Blockers (narrative description of alternatives), and II.L.5.e Flowchart: LLC with S Corporation as Blocker (diagram).

[2436] See part II.I 3.8% Tax on Excess Net Investment Income, especially part II.I.8 Application of 3.8% Tax to Business Income, summarized at part II.I.8.f Summary of Business Activity Not Subject to 3.8% Tax.
[2437] See text accompanying fn. 2436 in this part II.L.4.
[2438] See highlighted language fn. 2418 in this part II.L.4. At least one tax expert whom I highly regard has expressed concern that *Renkemeyer* signals trouble for a limited partner in a state law limited partnership who is active. However, that expert concedes the language highlighted in fn. 2409 very strongly supports the exclusion for an active limited partner (but not the point that it eliminates his concern). Although I strongly disagree with that concern and feel quite confident in the structure described in part II.E.5 Recommended Long-Term Structure for Pass-Throughs – Description and Reasons and illustrated in part II.E.6 Recommended Partnership Structure – Flowchart, I leave it up to the reader to consider this expert's views.

In many cases, using a traditional limited partnership to govern ownership, which partnership holds one or more LLC subsidiaries that are disregarded for tax purposes, would provide more long-term flexibility regarding the conduct of future business without falling out of the protection that the proposed regulations seem to provide. If a client finds a limited partnership cumbersome to operate on a daily basis, the limited partnership could do business through one or more wholly owned LLCs that are disregarded for income tax purposes.[2439]

Although administratively the IRS appears to be informally following this proposed regulation, CCA 201640014, particularly fn. 2420 and the accompanying text, makes clear that taxpayers need to use limited partnerships to maximize the possibility of refuting an IRS argument in this area. I prefer the structure described in parts II.E.5 Recommended Long-Term Structure for Pass-Throughs – Description and Reasons and II.E.6 Recommended Partnership Structure – Flowchart.

On the other hand, if the 3.8% net investment income (NII) tax is repealed and income from active businesses does not receive favorable tax treatment relative to passive businesses, investing in an LLC as a passive business owner, as in *Hardy*,[2440] may be a model that works. In that case, consider making sure that one's time spent qualifies as investor time, rather than time spent as a working owner.[2441] I would also recommend making the person who manages the LLC be the manager. However, I remain uneasy about *Hardy*, because *Methvin* involved facts that in most ways were more sympathetic to the taxpayer than *Hardy*, yet found the taxpayer subject to SE tax. Furthermore, if NII tax is not repealed and the owner is active enough to avoid NII tax, the owner might have moved away from being a mere investor and moved closer to *Renkemeyer* and *Castigliola*. So, I am not yet convinced that one should rely on *Hardy*, and I remain firmly in favor of using limited partnerships to save SE tax.

II.L.5. Self-Employment Tax: Partnership with S Corporation Blocker

II.L.5.a. S Corporation Blocker Generally

Because corporate income is not subject to self-employment (SE) tax, doing business through an S corporation avoids SE tax on the distributive share of income if and to the extent that distributions do not constitute disguised compensation payments.[2442] The

---

[2439] See part II.B Limited Liability Company (LLC), especially the comments accompanying fns. 272-286, discussing when a single-member LLC is or is not disregarded.

[2440] In this part II.L.4, the text surrounding fn. 2421 discusses *Hardy*.

[2441] See part II.K.1.a.v What Does Not Count as Participation.

[2442] For corporate income not being subject to SE tax, see part II.L.1 FICA: Corporation, especially fn. 2338, citing Rev. Rul. 59-221, which was cited with approval by *Ding v. Commissioner*, T.C. Memo. 1997-435, *aff'd* 200 F.3d 587 (9th Cir. 1999). In rejecting a taxpayer's attempt to offset S corporation losses against SE income, the Tax Court in *Ding* held:

> We find the absence of any reference to S corporation pass-through items in section 1402 to be significant, and not merely a consequence of timing. The statute has been amended 34 times since the enactment of the S corporation provisions. None of the amendments address pass-through items from S corporations. We note that respondent's position on the issue here under consideration was published 38 years ago in Rev. Rul. 59-221, 1959-1 C.B. 225, which states, in part:

corporation needs to contract with those with whom business is conducted; the owner cannot merely transfer to the corporation income the owner receives and characterize it as income that the S corporation owned.[2443] Before deciding to do business as an S corporation, please see part II.E Recommended Structure for Entities.

If an owner wants the income tax benefits of the partnership structure but needs to avoid FICA on the business' earnings from the efforts of others or from earnings on capital, the owner might consider forming an S corporation to hold the owner's interest in the partnership, resulting in the structure depicted in part II.L.5.d Straight-Up Limited Partnership or II.L.5.e Flowchart: LLC with S Corporation as Blocker. The corporation would treat the owner as an employee with respect to reasonable compensation for services rendered.[2444] Because S corporation earnings are not subject to FICA,[2445] no

---

> it is apparent that income not resulting from the conduct of a trade or business by an individual or by a partnership of which he is a member is not includible in computing the individual's net earnings from self-employment. Amounts which must be taken into account in computing a shareholder's income tax by reason of the provisions of *** [a predecessor of section 1366] of the Code, are not derived from a trade or business carried on by such shareholder. Neither the election by a corporation as to the manner in which it will be taxed for Federal income tax purpose nor the consent thereto by the persons who are shareholders results in the consenting shareholder's being engaged in carrying on the corporation's trade or business. Accordingly, amounts which a shareholder is required to include in his gross income by reason of the provisions of *** [a predecessor of section 1366] of the Code should not be included in computing his net earnings from self-employment *** .

> The revenue ruling concludes that S corporation pass-through items do not constitute net earnings from self-employment to the corporation's shareholder because such items are not derived from a trade or business carried on by the shareholder. We understand that we are not bound by the revenue ruling, *Stark v. Commissioner*, 86 T.C. 243, 250-251 (1986); however, the fact that the revenue ruling has remained in effect, unmodified, for 38 years provides a strong commentary on the validity of respondent's position. During the period the revenue ruling has been in effect, Congress has amended section 1402 approximately 30 times. If Congress had intended pass-through items from S corporations to be included in the definition of net earnings from self-employment, which would obviously be contrary to the conclusion of the revenue ruling, we expect that one of the many amendments made to the statute since its enactment would have so indicated. See generally *Helvering v. R.J. Reynolds Tobacco Co.*, 306 U.S. 110 (1939).
>
> Furthermore, respondent's position that the pass-through items were not derived from a trade or business carried on by petitioner is supported by two firmly established principles of Federal income taxation, namely: (1) A corporation formed for legitimate business purposes and its shareholders are separate entities, *Moline Properties, Inc. v. Commissioner*, 319 U.S. 436 (1943); and (2) the business of a corporation is separate and distinct from the business of its shareholders, *id.*; *Deputy v. du Pont*, 308 U.S. 488, 494 (1940); *Crook v. Commissioner*, 80 T.C. 27, 33 (1983), *affd.* without published opinion 747 F.2d 1463 (5th Cir. 1984).

For distributions constituting compensation subject to FICA instead of merely a disbursement of a distributive share of income not subject to SE tax, see Rev. Rul. 74-44 and part II.A.2.c New Corporation - Avoiding Double Taxation and Self-Employment Tax, especially fns. 77-78 (the latter discussing sanctions against a CPA for preparing a return that resulted in penalties for failure to declare reasonable compensation).

[2443] See part II.G.23 Taxing Entity or Individual Performing Services.

[2444] Rev. Rul. 73-361 (shareholder officer compensation is subject to FICA, federal income tax withholding, and FUTA).

self-employment tax would be imposed on the distributive share of partnership self-employment income when it passes to the S corporation owner.[2446]

If these are new corporations, be sure that each corporation exercises any ownership rights it has, complying with corporate formalities in acting as a member of the LLC; having a service contract with the LLC and paying compensation to its officers or other employees would also help.[2447]

Furthermore, for business succession purposes, the owner can then transfer interests in the S corporation to family members without breaking up the single block of partnership voting rights.

On the other hand, when the owner of the S corporation blocker dies, the partnership's assets do not get an inside basis step-up.[2448] If the S corporation sells the partnership interest to an unrelated party and then liquidates in the year of sale, the deceased owner's beneficiaries might be able to replicate the inside basis step-up, although this strategy works better for federal income tax than state income tax purposes.[2449] For this

[2445] The trade or business must be carried on by the individual, either personally or through agents or employees, or by a partnership. Reg. § 1.1402(a)(2)(b), (d). The S corporation's existence as a separate taxpayer is respected for SE tax purposes, and a shareholder's K-1 income does not constitute self-employment income. See fn. 2338. However, if the S corporation is not a state law corporation, see part II.L.5.b Self-Employment Tax Caution Regarding Unincorporated Business That Makes S Election.

[2446] The effectiveness of such a blocker, when the K-1 earnings from the partnership were ultimately paid to each owner, was litigated in *Watson, P.C, v. U.S.,* 105 AFTR.2d 2010-2624 (denying the taxpayer's motion for summary judgment) and 107 AFTR.2d 2011-311 (S.D. Iowa) (finding in favor of the IRS), *aff'd* 109 AFTR.2d 2012-1059 (8th Cir.), cert. den. 10/1/2012. In 2002, the sole owner of the S corporation partner received $24K salary, $118K dividend payments, and $84K other payments. In 2003, the owner received $24K salary and $222K in dividend payments. Originally, the IRS contended that $131K of the dividend payments for 2002 and that $175K of the dividend payments for 2003 should be recharacterized as wages subject to employment taxes, assessing $49K in taxes, penalties, and interest against the corporation. Eventually, the IRS' trial position evolved to recharacterizing only $67K as compensation for each year, for a total of $91K compensation per year. Thus, the taxpayer received substantial savings from dividends that were not recharacterized by the IRS.

[2447] See *Robucci v. Commissioner*, T.C. Memo. 2011-19 (psychiatrist's C corporations disregarded for self-employment tax purposes; penalty imposed; excellent example of client not understanding what the tax professional was trying to accomplish). I noticed one commentator express concern about Code § 269, acquiring control of a corporation with the principal purpose being evasion or avoidance of Federal income tax. That same commentator suggested considering the economic substance rules, which would apply to an improper avoidance of Federal income tax, and saving self-employment tax would not be a proper motive under that rule; see part II.G.16 Economic Substance. Would statutes designed to prevent Federal income tax avoidance cause a strategy designed to save self-employment tax to fail? I am unaware of any cases applying these statutes to strategies designed to save self-employment tax.

[2448] See part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations.

[2449] See part II.H.8 Lack of Basis Step-Up for Depreciable or Ordinary Income Property in S Corporation.

reason and due to certain estate planning considerations,[2450] it might be best to have the partnership interest be the S corporation's only asset.

II.L.5.b. Self-Employment Tax Caution Regarding Unincorporated Business That Makes S Election

When an unincorporated business makes an S election (using great caution to strip any partnership tax and accounting provisions from any operating agreement or partnership agreement forms),[2451] does the S election block self-employment tax?

Reg. § 1.1402(a)-2(g) appears to provide that electing to treat a partnership as an S corporation does not preclude self-employment tax:

> *Nature of partnership interest*. In the case of a partner who is a member of a partnership with respect to which an election has been made pursuant to section 1361 and the regulations thereunder to be taxed as a domestic corporation, net earnings from self-employment include his distributive share of the income or loss, described in section 702(a)(9), from the trade or business carried on by the partnership computed without regard to the fact that the partnership has elected to be taxed as a domestic corporation.

Similarly, Reg. § 1.1402(a)-2(h) appears to provide that a sole proprietor may not avoid self-employment tax by electing to treat his or her business as an S corporation:

> *Proprietorship taxed as domestic corporation*. A proprietor of an unincorporated business enterprise with respect to which an election has been made pursuant to section 1361 and the regulations thereunder to be taxed as a domestic corporation shall compute his net earnings from self-employment without regard to the fact that such election has been made.

Thus, the above regulations appear to provide that a single member LLC that elects taxation as an S corporation will be subjected to self-employment tax as if the S election has not been made.

However, those regulations were promulgated before the current subchapter S was created, and subsections (g) and (h) of Reg. § 1.1402(a)-2 appear to be obsolete.[2452]

If one remains concerned about whether subsections (g) and (h) of Reg. § 1.1402(a)-2 are valid and wants the state law benefits of an unincorporated entity and the SE tax blocking benefit of an S corporation, one should consider using a limited partnership that has limited liability protection, which is commonly known as a limited liability limited partnership (LLLP).[2453] The general partner will have limited liability and be subject to

---

[2450] See part III.A.3.e.vi.(b) Disadvantages of QSSTs Relative to Other Beneficiary Grantor Trusts, which includes a discussion of splitting assets when a trust terminates and the beneficiaries go their separate ways.
[2451] See part II.A.2.j Single Class of Stock Rules and especially fn. 297 in part II.B Limited Liability Company (LLC).
[2452] See Banoff's and Lipton's *Shop Talk* column, Does an S Election Block Self-Employment Tax When Made By an Unincorporated Business? *Journal of Taxation* (Sep. 2014).
[2453] See parts II.C.11 Limited Partnership and II.C.12 Limited Liability Partnership Registration.

SE tax, and generally the limited partners will avoid SE tax on their distributive share of income.

II.L.5.c. Examples of S Corporation Blockers

Consider the structures described below, which seek to thread the needle between avoiding the 3.8 tax on net investment income[2454] and avoiding self-employment tax. The "Real Estate Drop Down into Preferred Limited Partnership" scenario is more complex and would tend to be more appropriate in converting existing structures. The "Straight-Up Limited Partnership" scenario has an elegant simplicity if no real estate (or other rental property) is ever held and no LLCs are required; more details are discussed earlier in this document.[2455] The "Flowchart: LLC with S Corporation as Blocker" is an excellent defense in case the IRS ever succeeds in taxing limited partners in a state law limited partnership on their distributive share of income:

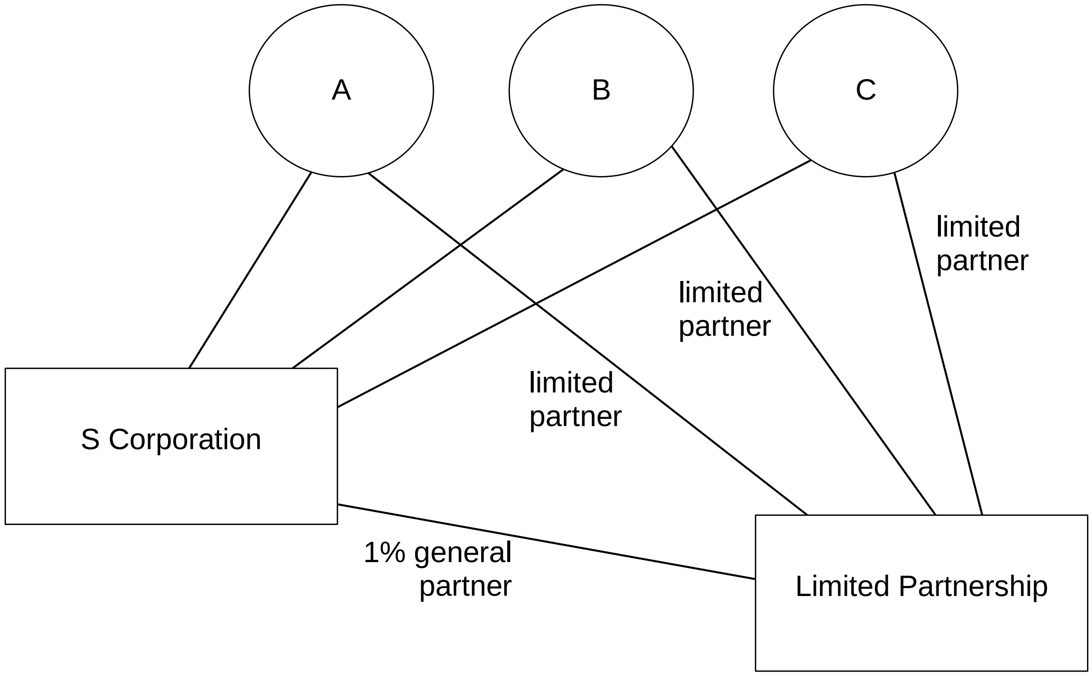
- The exit strategies in part II.Q Exiting from or Dividing a Business remain viable in that structure, although they can become more complicated.

- Basis step-up on the company's assets upon an owner's death becomes more complex and might or might not be attained.[2456] One would need to thoroughly explore the nuances of parts II.H.8 Lack of Basis Step-Up for Depreciable or Ordinary Income Property in S Corporation and II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill).

Note that these structures would tend to defeat a possible goal of allowing the family members who do not participate in the business to receive income from long-term leases of property used in the business, which strategy is used to provide income to the outsiders without their needing a voice in how the business is run. One might need to give up on avoiding the 3.8% tax on net investment income regarding the use of valuable property if separating outsiders from insiders is too significant an issue. See part II.E.5.d Net Investment Income Tax and Passive Loss Rules Under Recommended Structure regarding the benefits of keeping real estate under the same umbrella as the operating business.

[2454] See part II.I 3.8% Tax on Excess Net Investment Income, especially part II.I.8 Application of 3.8% Tax to Business Income.
[2455] See part II.E Recommended Structure for Entities.
[2456] See part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations.

II.L.5.d. Straight-Up Limited Partnership

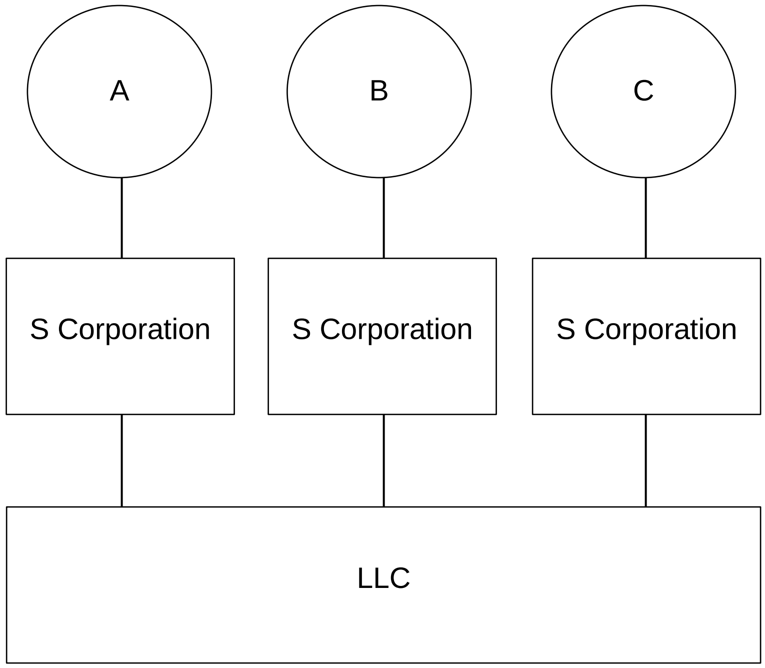


Notes:

- Assume A, B, and C are active in business (500+ hours) and receive reasonable compensation from the general partner for services rendered to the corporation as general partner of the limited partnership.
- This would not avoid self-employment tax on the limited partners if the long-ago proposed regulations defining limited partner for purposes of the self-employment tax were finalized.

Ideally, the limited partnership would hold the operating business(es) in a separate LLC (or LLCs) and any real estate in a separate LLC or LLCs. This is described more fully in part II.E Recommended Structure for Entities.

II.L.5.e. Flowchart: LLC with S Corporation as Blocker



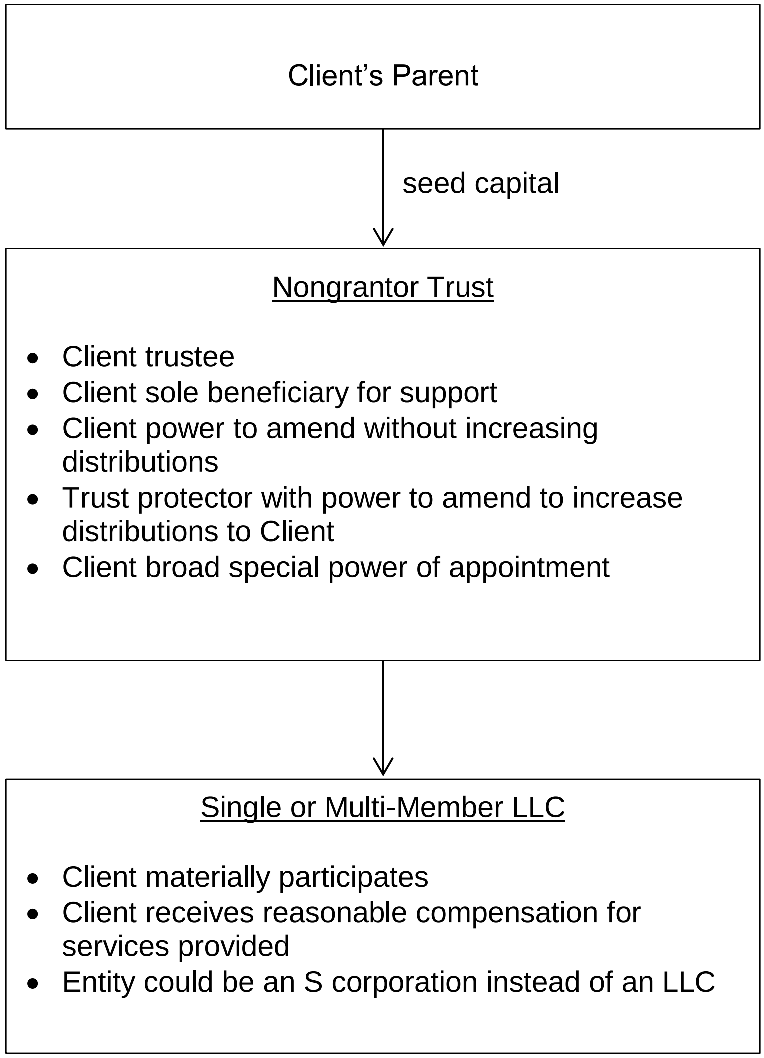
Notes:

- Assume A, B, and C are active in business (500+ hours) and receive reasonable compensation from their respective S corporations for services rendered to the corporation as a member and manager of the LLC.
- Significant disadvantages apply to the holding real estate in this structure.

II.L.6. SE Tax N/A to Nongrantor Trust

Self-employment tax does not apply to income earned by an estate or trust, at the trust level or at the beneficiary level.[2457] Just as the IRS will review whether distributions from an S corporation are disguised compensation,[2458] it might also consider whether individuals who are trustees and beneficiaries received reasonable and sufficient compensation for services performed for the business.[2459] If the trust is the sole member of the LLC, the trust's purpose must be to vest in trustees responsibility for the protection and conservation of property for beneficiaries who cannot share in the discharge of this responsibility and, therefore, are not associates in a joint enterprise for the conduct of business for profit.[2460]

[2457] Reg. § 1.1402(a)-2(b); *Huval v. Commissioner*, T.C. Memo. 1985-568.
[2458] See fn. 77 and accompanying text.
[2459] TAMs 200305001, 200305002.
[2460] See part II.D.1. Trust as a Business Entity.



II.L.7. SE Tax N/A to Qualified Retiring or Deceased Partner

Self-employment tax does not apply to amounts received by a partner pursuant to a written plan of the partnership, which satisfies IRS requirements and provides for payments on account of retirement, on a periodic basis,[2461] to partners generally or to a class or classes of partners, such payments to continue at least until such partner's death,[2462] if:[2463]

[2461] Payments made by a partnership retirement plan to a retired partner from current partnership earnings excepted from the term net earnings from self-employment for purposes of Code § 1402(a) even if receipt of part of the payments is deferred until shortly after the beginning of the following year. Rev. Rul. 79-34.

[2462] Terminating payments before the partner's death disqualifies the payments from this exclusion. Letter Ruling 8052117.

[2463] Code § 1402(a)(10); Reg. § 1.1402(a)-17.

(A) such partner rendered no services with respect to any trade or business carried on by such partnership during the taxable year of such partnership, ending within or with such partner's taxable year, in which such amounts were received,[2464] and

(B) no obligation exists (as of the close of the partnership's taxable year described above) from the other partners to such partner except with respect to retirement payments under such plan, and

(C) such partner's share, if any, of the capital of the partnership has been paid to such partner in full before the close of the partnership's taxable year referred to above.

Note that such payments would likely be characterized as Code § 736(a) payments.[2465] And, although Code § 736 payments are generally excluded from the draconian Code § 409A nonqualified deferred compensation rules,[2466] payments under this provision are not excluded from Code § 409A.[2467]

[2464] A lawyer who retired from practicing law but continued to perform arbitration services through the same law firm did not fall within this exclusion from self-employment tax. *Brandschain v. Commissioner*, 80 T.C. 746 (1983).

[2465] Letter Ruling 7905032. For a general discussion of Code § 736, see part II.Q.8.b.ii Partnership Redemption – Complete Withdrawal Using Code § 736.

[2466] For a general discussion of Code § 409A, see part II.M.4.d Introduction to Code § 409A Nonqualified Deferred Compensation Rules. For general application (or lack thereof) of Code § 409A to partnerships, see text accompanying footnote 2656.

[2467] Notice 2005-1, A-7 provides:

> The application of § 409A is not limited to arrangements between an employer and employee. Accordingly, § 409A may apply to arrangements between a partner and a partnership which provides for the deferral of compensation under a nonqualified deferred compensation plan…. [U]ntil further guidance is issued, taxpayers may treat arrangements providing for payments subject to § 736 as not being subject to § 409A, except that an arrangement providing for payments which qualify as payments to a partner under § 1402(a)(10) are subject to § 409A. Finally, § 409A may apply to payments covered by § 707(a)(1) (partner not acting in capacity as partner), if such payments otherwise would constitute a deferral of compensation under a nonqualified deferred compensation plan.

This rule continues to apply under the final regulations issued under Code § 409A. Section 4 of Notice 2007-86.

In (G.) Arrangements Between Partnerships and Partners, T.D. 9321, which promulgated final regulations under Code § 409A, provides:

> Commentators raised issues concerning the application of the provision in Notice 2005-1, Q&A-7 stating that until further guidance is issued, taxpayers may treat arrangements providing for payments subject to section 736 (payments to a retiring partner or a deceased partner's successor in interest) as not being subject to section 409A, except that an arrangement providing for payments that qualify as payments to a partner under section 1402(a)(10) is subject to section 409A. Section 1402(a)(10) provides for an exception from the Self-Employment Contributions Act (SECA) tax for payments to a retired partner, provided that certain conditions are met…
>
> Commentators questioned the appropriateness of the inclusion of such arrangements under section 409A, because neither the statute nor the legislative history refers to section 1402(a)(10). However, the Treasury Department and the IRS believe it is

If the partner has moved from the state in which the partner has provided the services, the retirement payments might escape income taxation by that state. See part II.Q.8.b.ii.(g) Code § 736 Payments As Retirement Income – Possible FICA and State Income Tax Benefits (referring back to this part II.L.7 and then discussing the state income tax exclusion under federal law).

When a partner dies during the partnership's taxable year, the portion of the partner's distributive share earned during life is subject to self-employment tax (presumably to the extent not shielded by the rule for a retired partner).[2468]

II.L.8. Retirement Payments to Insurance Salesmen

Code § 1402(k) excludes from SE income any amount received during the taxable year from an insurance company on account of services performed by such individual as an insurance salesman for such company if-

(1) such amount is received after termination of such individual's agreement to perform such services for such company,

(2) such individual performs no services for such company after such termination and before the close of such taxable year,

(3) such individual enters into a covenant not to compete against such company which applies to at least the 1-year period beginning on the date of such termination, and

(4) the amount of such payment-

---

appropriate for such arrangements to be subject to section 409A because such arrangements are purposefully created to provide deferred compensation, and do not raise issues regarding the coordination of the provisions of section 409A with the provisions of section 736, specifically the rules governing the classification of payments to a retired partner under section 736(a) (payments considered as distributive share or guaranteed payments) and section 736(b) (payments for interest in partnership).
However, further clarification and relief is provided concerning the application of the deferral election timing rules to these payments. Until further guidance is issued, for purposes of section 409A, taxpayers may treat the legally binding right to the payments excludible from SECA tax under section 1402(a)(10) as arising on the last day of the partner's taxable year before the partner's first taxable year in which such payments are excludible from SECA tax under section 1402(a)(10), and the services for which the payments are compensation as performed in the partner's first taxable year in which such payments are excludible from SECA tax under section 1402(a)(10). Accordingly, for purposes of section 409A, the time and form of payment of such amounts generally may be established, including through an election to defer by the partner, on or before the final day of the partner's taxable year immediately preceding the partner's first taxable year in which such payments are excludible from SECA tax under section 1402(a)(10). However, this interim relief does not apply a second time where an amount paid under an arrangement in one year has been excluded from SECA tax under section 1402(a)(10), and an amount paid in a subsequent year has not been excluded from SECA tax under section 1402(a)(10) because, for example, the partner performed services in that subsequent year.

[2468] Code § 1402(f); Reg. § 1.1402(f)-1; Rev. Rul. 58-607.

(A) depends primarily on policies sold by or credited to the account of such individual during the last year of such agreement or the extent to which such policies remain in force for some period after such termination, or both, and

(B) does not depend to any extent on length of service or overall earnings from services performed for such company (without regard to whether eligibility for payment depends on length of service).

The taxpayer must prove that all of these elements applies.[2469]

II.M. Buying into a Business

Buying into a business includes starting a business from scratch and buying into an existing business. Each of those two issues is discussed as applied to corporations, as applied to partnerships, and as compared between the two.

II.M.1. Taxation on Formation of Entity: Comparison between Partnership and Corporation

Avoiding non-recognition of gain is much easier for a partnership than for a corporation. Assumption of liabilities generally does not cause problems with partnerships, because the partner who contributes the liability generally receives a special allocation of that liability under the partnership rules if the liability exceeds the contributing partner's basis.[2470] Neither the 80% control test nor any business purpose rule applies.

II.M.2. Buying into or Forming a Corporation

II.M.2.a. Initial Incorporation – Generally

No gain or loss shall be recognized if property is transferred to a corporation by one or more persons solely in exchange for stock in such corporation and immediately after the exchange such person or persons are in control of the corporation.[2471] To qualify for non-recognition of gain, the transferor(s) must control at least 80% of the shares' votes and at least 80% of each class of nonvoting stock.[2472]

However, Code § 351 does not protect stock issued for services, indebtedness of the transferee corporation which is not evidenced by a security, or interest on indebtedness of the transferee corporation which accrued on or after the beginning of the transferor's holding period for the debt.[2473]

[2469] *Geneser v. Commissioner*, T.C. Memo. 2017-110, held that the exclusion did not apply, noting: "Petitioner's commission payments credited toward his account in 2010 were dependent on his length of service at AIL."

[2470] However, a shifting of liabilities might constitute a disguised sale.

[2471] Code § 351(a). If the transferor already owns stock, the transferor does not need to be issued stock. Rev. Rul. 64-155; *Lessinger v. Commissioner*, 872 F.2d 519 (2nd Cir. 1989).

[2472] Code § 368(c), incorporated by reference by Code § 351(a).

[2473] Code § 351(d).

No counterpart to the above rules restrict tax-free formation of partnerships. See part II.M.3 Buying into or Forming a Partnership.

Various other restrictions on favorable tax treatment may apply, depending on the situation. Among them are:

- If the shareholder in a Code § 351 transaction receives not only stock but also other property or money, then gain (if any) to such recipient shall be recognized, but not in excess of the amount of money received, plus the fair market value of such other property received; and no loss to such recipient shall be recognized.[2474]

- The IRS asserts, sometime successfully and sometimes not, that a business purpose is required, but Code § 351 and the regulations do not expressly require a business purpose.[2475]

- If shareholders contribute financial assets that are not diversified so that they can have an interest in a diversified portfolio held by the corporation, they may recognize gain.[2476]

- One who wishes to transfer assets to an unrelated corporation cannot simply form a new corporation under Code § 351 and immediately merge the new corporation into the buying corporation.[2477]

[2474] Code § 351(b).

[2475] ¶ F-1002 Business purpose requirement for tax-free transfer to controlled corporation, *Fed. Tax Coord.2d*; Bittker & Eustice, ¶ 3.17[6] Business Purpose, Step Transactions, and Other Principles, *Federal Income Taxation of Corporations & Shareholders* (WG&L).

[2476] Code § 351(e)(1); see part II.M.3.b Exception: Diversification of Investment Risk, applying this rule to partnerships, which are much more likely to be formed by pooling financial assets than are corporations.

[2477] Rev. Rul. 70-140 involved the following facts:

> All the outstanding stock of X corporation was owned by A, an individual. A also operated a similar business in the form of a sole proprietorship on the accrual basis of reporting income. Pursuant to an agreement between A and Y, an unrelated corporation, A transferred all the assets of the sole proprietorship to X in exchange for additional shares of X stock. A then transferred all his X stock to Y solely in exchange for voting common stock of Y, which was widely held.

The ruling held:

> The two steps of the transaction described above were part of a prearranged integrated plan and may not be considered independently of each other for Federal income tax purposes. The receipt by A of the additional stock of X in exchange for the sole proprietorship assets is transitory and without substance for tax purposes since it is apparent that the assets of the sole proprietorship were transferred to X for the purpose of enabling Y to acquire such assets without the recognition of gain to A.
>
> Section 351 of the Code is not applicable to the transfer of the sole proprietorship assets to Y inasmuch as A was not in control of Y immediately after the transfer. The sole proprietorship cannot be a party to a reorganization within the meaning of section 368(b) of the Code. Thus, the transfer of the sole proprietorship assets to X is treated as a sale by A of the assets to Y followed by a transfer of these assets by Y to the capital of X.
>
> Accordingly, that portion of the stock of Y received by A equal to the fair market value of the sole proprietorship assets is treated as an amount received from the sale of those

Also, see part II.M.3.h Reporting Real Estate Contributed to a Partnership or Corporation in a Nontaxable Transaction.

II.M.2.b. Initial Incorporation: Effect of Assumption of Liabilities

When property is contributed subject to liabilities, the contributing shareholder recognizes gain to the extent that liabilities by the corporation exceed the adjusted basis of assets contributed to the corporation.[2478] The contributing shareholder guaranteeing the loan does not prevent an assumption of liabilities;[2479] instead, the loan should be refinanced so that the shareholder is personally liable on the loan.[2480] However, at least in the Ninth Circuit, a shareholder can get basis for contributing a bona fide note indebting the shareholder to a C corporation, thereby offsetting the effect of the corporation assuming the corporation's liabilities.[2481]

Liabilities that would give rise to a deduction when paid are ignored.[2482] Thus, if a partnership interest is contributed to a corporation, accrued expenses allocated to the corporation would be ignored as liabilities, but only if the partnership uses the cash receipts and disbursements for income tax accounting. However, gain is fully recognized if the transaction's principal purpose is to avoid federal income tax.

> assets. Gain or loss is recognized to A as provided in sections 1001 and 1002 of the Code. The exchange by A of all the outstanding stock of X, solely for voting common stock of Y, other than the Y stock received in payment for the sole proprietorship assets, is a reorganization within the meaning of section 368(a)(1)(B) of the Code.

Oddly, the Revenue Ruling did not think to cite *West Coast Marketing Corporation v. Commissioner*, 46 T.C. 32 (1966), the Official Tax Court Syllabus to which says"

> T corp. owned an undivided one-fourth interest in a tract of land and C, its sole stockholder, owned an undivided one-fourth interest in two adjacent tracts. At a time when a taxable exchange of all those lands for stock in a publicly held corporation (U) was imminent, M corp. was organized by C, and both C and T transferred their interests in the land to M in exchange for stock of M. The stock of M was subsequently transferred to U in exchange for stock of U, and shortly thereafter M was dissolved. Held, M was not organized or used for any bona fide business purpose, and the exchange with U did not constitute a tax-free reorganization. The substance of the transaction was a taxable exchange of interest in land for stock of U. *Gregory v. Helvering*, 293 U.S. 465 [1935].

[2478] Code § 357(c)(1). Code § 357(c)(1) does not apply to transactions that qualify as certain types of reorganizations under Code § 368 to which Code § 351 also applies. Rev. Rul. 2007-8. See also Determining the Character of Section 357(c) Gain, *Tax Lawyer*, Vol. 62, No. 1 (Fall 2008).

[2479] *Seggerman Farms, Inc. v. Commissioner*, 308 F.3d 803 (7th Cir. 2002), *aff'g* T.C. Memo. 2001-99.

[2480] For similar issues determining whether shareholders were the true borrowers, see part II.G.3.c.i.(a) Limitations on Using Debt to Deduct S Corporation Losses.

[2481] *Peracchi v. Commissioner*, 143 F.3d 487 (9th Cir. 1998), *rev'g* T.C. Memo. 1996-191. The Ninth Circuit's footnote 16 noted, Our holding therefore does not extend to the partnership or S Corp context.

[2482] Code § 357(c)(3). Such liabilities do not cause a reduction in the contributing shareholder's basis. *Black & Decker v. United States*, 436 F.3d 431 (4th Cir. 2006); *Coltec Industries, Inc. v. United States*, 454 F.3d 1340 (Fed. Cir. 2006).

II.M.2.c. Contribution of Partnership Interest to Corporation

Partnerships often incur liabilities, whether from money that the partnership borrows or liabilities the partnership incurs, such as accounts payable and accrued expenses. Contributing a partnership interest to a corporation often results in the corporation being allocated these liabilities[2483] and triggering gain to the extent that liabilities exceed basis.[2484]

Also, if the person contributing the partnership interest has losses suspended due to lack of basis[2485] or due to the passive loss[2486] or at-risk[2487] rules, consider whether the contribution might cause the suspended losses to be extinguished.[2488]

II.M.2.d. Contributing Installment Obligations

To the extent that a shareholder receives valuable stock for an installment obligation, gain is triggered.[2489]

II.M.3. Buying into or Forming a Partnership

See also part II.P.3.g Conversions from Partnership to Sole Proprietorships and Vice Versa.

The rules in this part II.M.3 make tax-free formation much more available than the tax-free formation of a corporation under part II.M.2 Buying into or Forming a Corporation. However, that flexibility comes at the cost of complexity regarding allocation of built-in gain or loss (and depreciation or amortization) with respect to assets contributed to the partnership or built-in gain or loss on partnership assets when new partners join the partnership; see part II.P.1.a.i Allocations of Income in Partnerships.

II.M.3.a. General Rule: No Gain on Contribution to Partnership

Subject to exceptions,[2490] when a partner contributes property (other than items constituting income in respect of a decedent)[2491] to a partnership, the partner does not recognize any gain or loss inherent in the property at the time of contribution;[2492]

2483 Code § 752.

2485 Code § 704(d).
2486 Code § 469. See part II.K Passive Loss Rules.
2487 Code § 465.
2488 See McKee, Nelson & Whitmire: *Federal Taxation of Partnerships & Partners* (WG&L), ¶ 11.05[2][c] Availability of Suspended Losses to Transferees, and T.M. 710: Partnerships — Conceptual Overview, III.D. Disposition of Partnership Interest or Partnership Business; Termination of Partnership.
2489 See part II.G.14 Limitations on the Use of Installment Sales, especially fn. 1053.
2490 Various exceptions are included in the subsequent subparts of this part II.M.3 Buying into or Forming a Partnership. See also Willis & Postlewaite, ¶ 4.02[2] Exceptions to General Rule of Non-Recognition of Gain or Loss, *Partnership Taxation*.
2491 See part II.H.2.e IRD Assets Not Eligible for a Basis Step-Up, especially fns. 1386-1387.
2492 Code § 721(a). For the general lack of income recognition when a noncompensatory option to acquire a partnership interest is exercised, see Reg. § 1.721-2, adopted by T.D. 9612

however, see part II.M.3.h Reporting Real Estate Contributed to a Partnership or Corporation in a Nontaxable Transaction. Even if an initial transfer qualifies as a Code § 721 contribution, later contributions might be characterized as something else, such as a sale when the partner does not intend to retain an economic interest in the contributed property over the long run.[2493] Although gain is not recognized, any accrued interest on a note contributed to the partnership would be recognized.[2494]

(effective 2/5/2013). See also Abrams and Crnkovich, The Non-Tax Implications of The Taxation of Partnership Options, *TM Real Estate Journal* (BNA) (1/7/2015).

[2493] *Russian Recovery Fund, Ltd. v. U.S.*, 116 A.F.T.R.2d 2015-5582 (Ct. Fed. Cl. 2015). The court focused on strong evidence of actual intent rather than looking to the rules described in part II.M.3.e Exception: Disguised Sale. Instead, it relied on the economic substance test:

> The Court of Appeals for the Federal Circuit in *Coltec Industries, Inc. v. United States*, explained the rationale behind the economic substance test:
>
> > The economic substance doctrine represents a judicial effort to enforce the statutory purpose of the tax code. From its inception, the economic substance doctrine has been used to prevent taxpayers from subverting the legislative purpose of the tax code by engaging in transactions that are fictitious or lack economic reality simply to reap a tax benefit. In this regard, the economic substance doctrine is not unlike other canons of construction that are employed in circumstances where the literal terms of a statute can undermine the ultimate purpose of the statute.
> >
> > ....
> >
> > The Supreme Court, various courts of appeals, and our predecessor court, have identified a number of different factors pertinent to the determination of whether a transaction lacks economic substance and thus should be disregarded for tax purposes. We understand the economic substance doctrine to incorporate the following principles.
> >
> > First, although the taxpayer has an unquestioned right to decrease or avoid his taxes by means which the law permits, the law does not permit the taxpayer to reap tax benefits from a transaction that lacks economic reality. This principle emerged early on in *Gregory*, where the Supreme Court disregarded intermediate transfers of stocks as falling outside the tax code because the transfers had no business or corporate purpose and performed no function other than to reduce taxes. 293 U.S. at 469....
> >
> > While the doctrine may well also apply if the taxpayer's sole subjective motivation is tax avoidance even if the transaction has economic substance, a lack of economic substance is sufficient to disqualify the transaction without proof that the taxpayer's sole motive is tax avoidance.
> >
> > Second, when the taxpayer claims a deduction, it is the taxpayer who bears the burden of proving that the transaction has economic substance. In describing the history of the economic substance doctrine, our predecessor court in *Rothschild* stated, *Gregory v. Helvering* requires that a taxpayer carry an unusually heavy burden when he attempts to demonstrate that Congress intended to give favorable tax treatment to the kind of transaction that would never occur absent the motive of tax avoidance. 407 F.2d at 411 (quoting *Diggs v. Comm'r of Internal Revenue*, 281 F.2d 326, 330 (2d Cir. 1960))....
> >
> > Third, the economic substance of a transaction must be viewed objectively rather than subjectively. The Supreme Court cases and our predecessor court's cases have repeatedly looked to the objective economic reality of the transaction in applying the economic substance doctrine. While the taxpayer's subjective motivation may be pertinent to the existence of a tax avoidance purpose, all courts have looked to the objective reality of the transaction [in] assessing its economic substance....

When no gain or loss is recognized, the partnership's adjusted basis in the contributed property is the same as it was in the hands of the contributing partner.[2495] The partner's

> Fourth, the transaction to be analyzed is the one that gave rise to the alleged tax benefit.... [I]n economic substance cases, the focus is on the specific transaction whose tax consequences are in dispute, and the Second Circuit has stated that [t]he relevant inquiry is whether the transaction that generated the claimed deductions ... had economic substance, *Nicole Rose Corp. v. Comm'r of Internal Revenue*, 320 F.3d 282, 284 (2d Cir. 2003)....
>
> Finally, arrangements with subsidiaries that do not affect the economic interest of independent third parties deserve particularly close scrutiny.

454 F.3d 1340, 1353-57 (Fed. Cir. 2006) (select citations omitted).

For more on the economic substance doctrine, see part II.G.16 Economic Substance Penalty and Doctrines, particularly the cases (including *Coltec*) cited at fn. 1094.

The *Russian Recovery* court also rebuffed the taxpayer's attempted reliance on Code § 704(e) [modified and partially renumbered as Code § 761(b) starting in 2016]:

> Plaintiff makes no real effort to address the large body of case law which requires a look beyond these formalities. Instead, it relies heavily on IRC § 704(e)(1):
>
> > e) *Family partnerships*.—
> >
> > (1) *Recognition of interest created by purchase or gift*.--A person shall be recognized as a partner for purposes of this subtitle if he owns a capital interest in a partnership in which capital is a material income-producing factor, whether or not such interest was derived by purchase or gift from any other person.
>
> Plaintiff views this statutory provision as supporting an inquiry independent of the judicially created challenges to over-reliance on formalism. We disagree for two reasons. First, although admittedly there is some debate on the question, we believe that the provision, as its name suggests, is directed at preventing the IRS from undoing intra-familiar partnership transactions, something far afield from the Tiger-RRF transaction.[25] Second, even if the provision is of broader application, there is no reason to think Congress intended to insulate taxpayers from decades of judicial scrutiny into abusive reliance on formalism.
>
> [25] In that respect it was a reaction to Culbertson, which did involve a family partnership. See S. Rep. 82-781, at 38-40 (1951) (noting that IRC § 704(e)(1) was intended to harmonize the rules regarding family partnerships, particularly in light of the confusion caused by *Culbertson* and its progeny).
>
> As defendant correctly points out, the IRS has adopted regulations interpreting section 704(e)(1) that preserve the traditional inquiries into whether the creation of a partnership interest was a sham transaction. Treas. Reg. § 1.704-1(e)(1)(iii) (A ... purchaser of a capital interest in a partnership is not recognized as a partner under the principles of section 704(e)(1) unless such interest is acquired in a bona fide transaction, not a mere sham for tax avoidance or evasion purposes ....). Section 704(e)(1) plainly does not insulate plaintiff from the assertions made in the FPAA.

The Code § 704(e) analysis might have changed since then. See part III.B.1.a.iv.(b) Income Tax Aspects of Family Partnerships.

[2494] See Reg. §§ 1.721-1(d) and 1.721-2(e).

[2495] Code § 723. A partner does not get basis for contributing his own promissory note to a partnership. *VisionMonitor Software, LLC v. Commissioner*, T.C. Memo. 2014-182, holding:

> The value of what a partner contributes to his partnership can be tricky when he contributes something other than cash—like the notes at issue here. VisionMonitor argues that the contribution of the promissory notes increased Mantor's and Smith's outside bases in amounts equivalent to their face value. But a partnership's basis in property contributed by a partner is the adjusted basis of that property in the hands of the contributing partner at the time of the contribution. Sec. 723. The Commissioner argues that the company's basis in the notes is zero because Mantor's and Smith's bases in

basis in the partnership is also equal to the partner's basis in the partner's contributed property.[2496] If the partnership is mainly to hold marketable securities, using only cash to form it has certain advantages.[2497]

The substituted basis portion continues the contributing partner's depreciation schedule.[2498]

However, a contributing partner must recognize gain on the occasions described below.

II.M.3.b. Exception: Diversification of Investment Risk

Code § 721(b) requires a contributing partner to recognize built-in gain on contributed property if the partnership is equivalent to an "investment company," as defined in Code § 351. Thus, when a partner contributes property with a fair market value that is greater than its adjusted basis to an "investment company" partnership, the partner recognizes the appropriate gain.[2499] The gain recognized by the contributing partner increases the basis of not only the contributor's partnership interest,[2500] but also the partnership's basis in the property.[2501]

Generally, the contribution to a partnership will be considered to be made to an investment company if (a) the transfer results in a diversification of the transferor's interests,[2502] and (b) more than 80% of the partnership's assets are held for investment and are readily marketable stocks or securities or interests in regulated investment companies or real estate investment trusts.[2503] Thus, the main way to avoid having a

> them were each zero. We have to agree with the Commissioner. We have long held that the contribution of a partner's own note to his partnership isn't the equivalent of a contribution of cash, and without more, it will not increase his basis in his partnership interest. *See Dakotah Hills Offices Ltd. P'ship v. Commissioner*, T.C. Memo. 1998-134, 75 T.C.M. (CCH) 2122 (no increased basis because not cash equivalent and not property in which partner has basis); *Gemini Twin Fund III v. Commissioner*, T.C. Memo. 1991-315, 62 T.C.M (CCH) 104 (partner's outside basis not increased by contribution of promissory note), *aff'd without published opinion*, 8 F.3d 26 (9th Cir. 1993); *Oden v. Commissioner*, T.C. Memo. 1981-184, 41 T.C.M. (CCH) 1285 (partner has zero basis in own promissory note), *aff'd without published opinion*, 679 F.2d 885 (4th Cir. 1982).[5]
>
> [5] Revenue Ruling 80-235, 1980-2 C.B. 229, summarizes this corner of partnership-tax law. It states that the contribution of a note by itself does not increase a partner's outside basis because he has a zero basis in the note. His outside basis will, however, increase if and when he actually makes payments on the note. *Id.; cf.* sec. 1.704-1(b)(2)(iv)(d)(2), Income Tax Regs. (providing that a partner's capital account is not increased with respect to a note written by that partner until there is either a taxable disposition of the note by the partnership, or the partner makes principal payments on the note).

[2501] Code § 723.
[2502] in determining diversification when an entity is contributed to a partnership, one might be able to look to the entity's underlying assets. Letter Ruling 201547003.
[2503] Reg. § 1.351-1(c)(1). Code § 351(e)(1)(A) requires that, in determining whether a company is an investment company, one must take into account all stock and securities held by the company. § 351(e)(1)(B) lists the following assets that are to be treated as stocks and securities: (1) money

contribution treated as having been made to an investment company is to ensure the transfer does not result in diversification of the transferor's interests.[2504] One way to do this would be to have all transferors contribute identical stock and securities in the same proportions, but this could require gifts or sales among the transferors before any contributions are made.[2505] Another way to avoid investment company status would be to have each transferor contribute a portfolio of stock and securities that is already diversified.[2506] Finally, the transferor will not attain diversification (and will not recognize gain) if the contributions of other partners are de minimis.[2507]

Another approach might be to manage the situation the way one would an "exchange fund." The whole point of the rules is to avoid economic diversification – meaning shifting risk of investment results from the contributing partners to the other partners. If the partnership agreement provided for the investment results to be specifically allocated to the contributing partners, then they will not have diversified their risk. "Exchange

---

(contrary to the Regulations), (2) stocks, options, forwards, futures, notional principal contracts and derivatives, (3) foreign currency, (4) interests in real estate investment trusts, common trust funds, regulated investment companies, publicly traded partnerships, (5) interests in precious metals, (6) interests in any entity if substantially all of that entity's assets consist of the aforementioned assets, or (7) any other assets specified in the Regulations. The Regulations have not been amended to reflect Code § 351(e). The Senate Report to P.L. 105-34, 8/5/97, provides:

> Other assets that count toward the 80-percent test are an interest in an entity substantially all of the assets of which are assets listed, and to the extent provided in Treasury regulations, interests in other entities, but only to the extent of the value of the interest that is attributable to assets listed.[69]
>
> [69] Until such regulations are issued, it is intended that the Treasury regulations promulgated under the similar provisions of section 731(c)(2) generally will apply. Specifically, it is intended that an entity will meet the substantially all requirement if 90 percent or more of its assets are listed assets (Treas. reg. sec. 1.731-2(c)(3)(i)). Similarly, with respect to partnerships and the non-corporate entities, it is intended that, where 20 percent or more (but less than 90 percent) of the entity's assets consist of listed assets, a *pro rata* portion of the interest in the entity will be treated as a listed asset. (Treas. reg. sec. 1.731-2(c)(3)(ii)).

Reg. § 1.731-2(c)(3)(i), (ii) are reproduced in fns. 3873-3874, respectively, which are in part II.Q.8.b.i.(b) Code § 731(c): Distributions of Marketable Securities (Or Partnerships Holding Them).

[2504] As discussed later, partnerships that invest substantially all of their assets in stock, bonds, etc. have certain favorable rules when distributing marketable securities. Investing directly in real estate or operating a trade or business generally precludes using these favorable rules. See the discussion of an investment partnership within part II.Q.8.b.i.(b) Code § 731(c): Distributions of Marketable Securities (Or Partnerships Holding Them).

[2505] Reg. § 1.351-1(c)(5). Pre-contribution transfers between spouses may be an excellent solution. Letter Ruling 200317011.

[2506] See Reg. § 1.351-1(c)(6), referring to the 25 and 50-percent tests of § 368(a)(2)(F)(ii) to determine whether a portfolio is diverse. Under § 368(a)(2)(F)(ii), the 25% test requires that not more than 25% of the value of the portfolio be invested in the stock and securities of any one issuer, and the 50% test requires that nor more than 50% of the value of the portfolio's total assets be invested in the stock and securities of five or fewer issuers.

[2507] Reg. § 1.351-1(c)(7) includes an example where the partner whose contribution was being tested for diversification contributed $20,000, while all other partners contributed $200. The $200 was disregarded for purposes of testing diversification, and no gain was recognized by the partner who contributed $20,000.

funds" provide such an allocation for seven years (to comply with Code § 704(c)(1)(B) and 737),[2508] then they allow the partners to withdraw a diversified portfolio. I don't have any citations for private letter rulings approving this approach, but I would think that some are out there.

II.M.3.c. Exception: Triggering IRD

The sale or exchange of an item of income in respect of a decedent[2509] triggers income recognition.[2510]

Triggering income may convert the item to a capital asset.[2511]

II.M.3.d. Exception: Liability Shifts

Another exception to the general nonrecognition rule of Code § 721(a) can occur when a partner's share of liability in the partnership shifts. If a partner's share of liabilities increases, that increase is treated as hypothetical cash contribution and the partner's partnership interest basis is increased by that amount, but no immediate tax consequences occur.[2512] However, if the partner's share of liability decreases, then the decrease is treated as a hypothetical cash distribution, the partner's partnership interest's basis is decreased, and the partner must recognize gain to the extent the hypothetical distribution is greater than the partner's basis in such partner's partnership interest immediately before the deemed distribution.[2513] One situation that could lead to an increase or decrease in partnership liabilities is when a partner contributes to the partnership property subject to a liability. In such a case, the partner's partnership interest basis is increased to the extent of the partner's allocated share of liabilities, but is also decreased by the amount of the liability that is allocated to the other partners. The net result could be a decrease in the partner's share of partnership liabilities, which could lead to gain recognition.[2514]

[2508] See part II.Q.8.b.i.(e) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value.

[2509] See part II.H.2.e IRD Assets Not Eligible for a Basis Step-Up.

[2510] See part II.H.2.e IRD Assets Not Eligible for a Basis Step-Up, especially fns. 1386-1387.

[2511] See part II.H.2.e IRD Assets Not Eligible for a Basis Step-Up, fn. 1387, cross-referencing part II.G.6 Abandoning an Asset to Obtain Ordinary Loss Instead of Capital Loss; Code § 1234A.

[2512] Code § 752(a); Code § 722.

[2513] Code § 752(b); Code § 731(a).

[2514] Reg. § 1.752–1(f). Generally, the allocation rules for nonrecourse liabilities will prevent the hypothetical distribution amount to the contributing partner from exceeding the basis of the contributing partner's partnership interest. Reg. § 1.752-3(a). Often, the contributing partner's Code § 704(c) responsibility will cause the contributing partner to be allocated nonrecourse debt sufficient to take care of this issue. Reg. § 1.752-3(a)(2). Additionally, if the partner contributes property subject to a recourse liability and the property remains recourse only to him, there will be no hypothetical distribution and no related recognition. Reg. § 1.752-1(g), Ex. 1. If the debt is part recourse and part nonrecourse, it is bifurcated. Reg. § 1.752-1(i). See also T.D. 9207 (5/23/2005), promulgating Reg. §§ 1.752-6 and 1.752-7 regarding certain assumptions of liability. See also Rubin, Whiteway, and Finkelstein, Recourse or Nonrecourse, That Is the Question, *TM Memorandum* (BNA) (Vol. 51, No. 17, 8/16/2010). See also Harris, I Am Not My Brother's

II.M.3.e. Exception: Disguised Sale Rules

Reg § 1.731-1(c)(3) provides:

> If there is a contribution of property to a partnership and within a short period:
>
> (i) Before or after such contribution other property is distributed to the contributing partner and the contributed property is retained by the partnership, or
>
> (ii) After such contribution the contributed property is distributed to another partner,
>
> such distribution may not fall within the scope of section 731. Section 731 does not apply to a distribution of property, if, in fact, the distribution was made in order to effect an exchange of property between two or more of the partners or between the partnership and a partner. Such a transaction shall be treated as an exchange of property.

Code § 707(a)(2) provides:

> Under regulations prescribed by the Secretary—
>
> (B) *Treatment of certain property transfers*. If—
>
> > (i) there is a direct or indirect transfer of money or other property by a partner to a partnership,
> >
> > (ii) there is a related direct or indirect transfer of money or other property by the partnership to such partner (or another partner), and
> >
> > (iii) the transfers described in clauses (i) and (ii), when viewed together, are properly characterized as a sale or exchange of property,
>
> such transfers shall be treated either as a transaction described in paragraph (1) or as a transaction between 2 or more partners acting other than in their capacity as members of the partnership.

Together with cases and other authority, these statutes set the stage for parts:

- II.M.3.e.i Disguised Sale When Partner Who Contributes Property Receives a Distribution,

Keeper and Other Lessons From the Related-Party Rules of Section 752, *Journal of Taxation* (Jan. 2011). For a scathing critique of proposed regulations under Code § 752, see Lipton, Proposed Regulations on Debt Allocations: Controversial, and Deservedly So, *Journal of Taxation* (WG&L), Vol. 120, No. 4 (April 2014); the proposed regulations were converted into final and temporary regulations in October 2016 (see part II.C.3 Allocating Liabilities (Including Debt)), but I have not analyzed how the changes responded to the criticism.

- II.M.3.e.ii Disguised Sale When One Partner Contributes Property and Another Receives a Distribution, and

- II.Q.8.b.i.(c) Disguised Sale from Partnership to Partner.

II.M.3.e.i. Disguised Sale When Partner Who Contributes Property Receives a Distribution

II.M.3.e.i.(a). Distributions Presumed to Be Disguised Sales

Another case in which a partnership contribution can lead to tax consequences is when a partner transfers property to the partnership and there is a related transfer back to the partner, which falls outside the scope of part II.Q.8.b.i.(a) Code § 731: General Rule for Distributions. When a partner receives a direct or indirect transfer of money or other property related to a transfer that partner made to the partnership, the transfer can be treated as a sale or exchange of property between partner and the partnership;[2515] furthermore, if a partner contributes cash in connection with a distribution of property, the partnership may be treated as making a disguised sale of the property to the partner.[2516] Also, TAM 9510002 asserts that, if a taxpayer merely receives consideration for agreeing to enter into a partnership and transfer property to it and that transaction is found to be separate and distinct from the subsequent transfer of property to the partnership and a later partnership distribution, the entire amount received for agreeing to enter the partnership is taxable as ordinary income in the year received.

[2515] Code § 707(a)(2) and Reg. § 1.707-3(b). Reg. § 1.707-3(f), Example (1) describes the consequences of a transfer that is partly a sale and partly a transfer for a partnership interest.
For more on whether a transfer is a disguised sale, see A Tale of Two Cases: G-I Holdings and Virginia Historic Tax Credit Fund—Can They Both Be Right?, *Journal of Taxation* (Mar. 2010), discussing *In re: G-I Holdings, Inc.*, 105 AFTR.2d 2010-697 (D. N.J. 2009) and *Virginia Historic Tax Credit Fund 2001 LP v. Commissioner*, T.C. Memo. 2009-295, in which the authors conclude, Taxpayers should be heartened by the court's rulings in these cases because they illustrate that partnership transactions structured with undeniable elements of risk sharing and recourse financing should be respected by the courts and the Service, but then caution that, If a taxpayer wishes to structure certain types of leveraged partnership transactions to minimize the risk of an economic substance challenge by the Service, care should be taken that any such arrangement involves the bearing of both risks and benefits—including having the loan structured as a recourse obligation of a creditworthy party. However, *Virginia Historic Tax* was reversed, 639 F.3d 129 (4th Cir. 2011); the Fourth Circuit's holding was followed in *Route 231, LLC v. Commissioner*, T.C. Memo. 2014-30, *aff'd* 810 F.3d 247 (4th Cir. 2016), and *SWF Real Estate LLC v. Commissioner*, T.C. Memo. 2015-63. See *Canal Corporation v. Commissioner*, 135 T.C. 199 (2010), characterizing a transaction as a disguised sale (transfer to partnership of assets worth $775 million, simultaneously receiving a $755 million cash distribution from the partnership) and imposing a substantial understatement penalty when the taxpayer relied on a tax opinion for which the taxpayer paid an $800,000 contingent fee, the sole contingency being the issuance of a should opinion; the court cited several cases preventing a taxpayer from relying on opinions given by promoters of various transactions. See also the anti-abuse regulations, Reg. § 1.701-2, under which transactions could be recharacterized to the extent not expressly addressed by exceptions to the disguised sale rules. For a critical analysis of *Canal Corporation v. Commissioner*, see Rubin, Whiteway, and Finkelstein, Partnership Tax Planning: Navigating the Canal, *Practical Tax Strategies*, Vol. 90, No. 5 (5/2013) (although the IRS won that case, a carefully structured leveraged partnership transaction should survive judicial scrutiny).

[2516] See part II.Q.8.b.i.(c) Disguised Sale from Partnership to Partner.

Transfers to the contributing partner are presumed to be a sale or exchange if made within two years of one another, unless the facts and circumstances clearly establish the transfers were not a sale or exchange;[2517] however, the presumption of no disguised sale can be rebutted, particularly by step transaction principles.[2518] Among the facts and circumstances that may tend to prove the existence of a disguised sale are the following:[2519]

(i) That the timing and amount of a subsequent transfer are determinable with reasonable certainty at the time of an earlier transfer;

(ii) That the transferor has a legally enforceable right to the subsequent transfer;

(iii) That the partner's right to receive the transfer of money or other consideration is secured in any manner, taking into account the period during which it is secured;

(iv) That any person has made or is legally obligated to make contributions to the partnership in order to permit the partnership to make the transfer of money or other consideration;

(v) That any person has loaned or has agreed to loan the partnership the money or other consideration required to enable the partnership to make the transfer, taking into account whether any such lending obligation is subject to contingencies related to the results of partnership operations;

[2517] Reg. § 1.707-3(c)(1).

[2518] In Reg. § 1.701-2(d), Example (8), a three-year wait did not prevent a pre-arranged transaction from constituting a disguised sale.

[2519] Reg. § 1.707-3(b)(2). *Gateway Hotel Partners, LLC v. Commissioner*, T.C. Memo. 2014-5, applied this test, giving greatest weight to the first two factors under those particular circumstance, to find that no disguised sale had occurred. See Lipton, *Gateway Hotel Partners*: Decision Illustrates the Disguised Sale Quandary, *Journal of Taxation* (7/2014), offering tips in addition to analyzing the law:

> It was also interesting to observe the manner in which the court and the IRS reviewed all of the documents involved in the transaction. The IRS was essentially looking for a gotcha document to support its argument that the transaction should be subject to different tax consequences, while the taxpayer had to defend each of the relevant documents and explain some apparent inconsistencies. It probably would have been better for the taxpayer if it had entered into some type of master agreement explaining the manner in which the transaction documents should be interpreted, thereby assuring that any minor inconsistencies (such as language in resolutions) could not be used as a basis to completely alter the tax consequences of the transaction. When a transaction has numerous complex steps (as these transactions did), the language of the transaction may appear to have a plain meaning to the drafter of the transaction but ambiguities will almost certainly appear with hindsight. The court appeared to address the various ambiguities so as to reach the right result, but the taxpayer would likely have saved substantial money (in legal fees) and have had much less heartburn if there had been an overriding document that explained how all of the various transaction documents should have been interpreted.

(vi) That the partnership has incurred or is obligated to incur debt to acquire the money or other consideration necessary to permit it to make the transfer, taking into account the likelihood that the partnership will be able to incur that debt (considering such factors as whether any person has agreed to guarantee or otherwise assume personal liability for that debt);

(vii) That the partnership holds money or other liquid assets, beyond the reasonable needs of the business, that are expected to be available to make the transfer (taking into account the income that will be earned from those assets);

(viii) That partnership distributions, allocations or control of partnership operations is designed to effect an exchange of the burdens and benefits of ownership of property;

(ix) That the transfer of money or other consideration by the partnership to the partner is disproportionately large in relationship to the partner's general and continuing interest in partnership profits; and

(x) That the partner has no obligation to return or repay the money or other consideration to the partnership, or has such an obligation but it is likely to become due at such a distant point in the future that the present value of that obligation is small in relation to the amount of money or other consideration transferred by the partnership to the partner.

This rule can be especially important when a partner contributes to the partnership property subject to a liability. If the partnership assumes or takes subject to the liability, the transfer may be considered a sale and some or all of the liability amount may be treated as consideration received by the contributing partner.[2520] If the liability assumed or taken subject to is considered a "qualified liability"[2521] (and refinancing a qualified

[2520] Reg. § 1.707-5.

[2521] Reg. § 1.707-5(a)(6)(i) describes qualified liabilities as:

(A) A liability that was incurred by the partner more than two years before the earlier of the date the partner agrees in writing to transfer the property or the date the partner transfers the property to the partnership and that has encumbered the transferred property throughout that two-year period;

(B) A liability that was not incurred in anticipation of the transfer of the property to a partnership, but that was incurred by the partner within the two-year period before the earlier of the date the partner agrees in writing to transfer the property or the date the partner transfers the property to the partnership and that has encumbered the transferred property since it was incurred (additional rules apply to a liability incurred within two years of a property transfer or of a written agreement to transfer);

(C) A liability that is allocable under the rules of Reg. § 1.163-8T to capital expenditures (as described under Reg. § 1.707-4(d)(5)) with respect to the property;

(D) A liability that was incurred in the ordinary course of the trade or business in which property transferred to the partnership was used or held, but only if all the assets related to that trade or business are transferred other than assets that are not material to a continuation of the trade or business; or

(E) A liability that was not incurred in anticipation of the transfer of the property to a partnership, but that was incurred in connection with a trade or business in which property transferred to the partnership was used or held, but only if all the assets related to that trade or business liability - or the transfer of a liability in conjunction with the transfer of a business it historically financed - does not appear to change its character),[2522] then the liability is not treated as consideration for a sale unless some other reason exists for the transfer to be treated as such.[2523] If the liability is not a qualified liability, then the partner is treated as having received consideration for his transfer to the extent the amount of the liability exceeds the partner's share of that liability immediately after the partnership assumes or takes subject to the liability.[2524] My understanding is that liabilities that are not qualified liabilities can surprisingly change the calculations that would apply relative to involving only qualified liabilities.[2525] Generally,[2526] a partner steps in the shoes of a person for purposes of Code § 1.707-5(a) with respect to a liability the person incurred or assumed

> are transferred other than assets that are not material to a continuation of the trade or business (additional rules apply to a liability incurred within two years of a transfer presumed to be in anticipation of the transfer)….

If the liability is a recourse liability, the amount of the liability cannot exceed the fair market value of the transferred property (less the amount of any other liabilities that are senior in priority and that either encumber such property or are certain other liabilities) at the time of the transfer. Reg. § 1.707-5(a)(6)(ii).

[2522] Qualified liabilities do not lose their character as such by being transferred, along with related business assets, to a disregarded entity that is then contributed to the partnership. Letter Ruling 201714028, which (subject to various representations) held the following to constitute qualified liabilities under Reg. § 1.707-5(a)(6)(i)(E) (highlighting added):

> All of the Liabilities were incurred more than f years before the proposed Transfer. Some of the Liabilities were originally incurred to make distributions in connection with Company's formation on D1 and have been subsequently refinanced. The remaining balance of the Liabilities have been used to acquire assets, make improvements, pay expenses, and otherwise operate Company's business and that of its subsidiaries, including to refinance other liabilities incurred for the same purposes. Company has also regularly distributed cash to its members in proportion to their ownership interests. Those cash distributions, however, have been less than Company's earnings. The Liabilities (and the liabilities they refinanced) are an integral part of Company's existing and historical capital structure.

[2523] Reg. § 1.707-5(a)(5)(i).

[2524] Reg. § 1.707-5(a)(1).

[2525] Recorded discussion of these rules at the American Bar Association Section on Taxation's Midyear (January) 2017 meeting.

[2526] The exception is Reg. § 1.707-5(e)(2), which provides:

> If an interest in a partnership that has one or more liabilities (the lower-tier partnership) is transferred to another partnership (the upper-tier partnership), the upper-tier partnership's share of any liability of the lower-tier partnership that is treated as a liability of the upper-tier partnership under § 1.752-4(a) is treated as a qualified liability under paragraph (a)(6)(i) of this section to the extent the liability would be a qualified liability under paragraph (a)(6)(i) of this section had the liability been assumed or taken subject to by the upper-tier partnership in connection with a transfer of all of the lower-tier partnership's property to the upper-tier partnership by the lower-tier partnership. For purposes of determining whether the liability constitutes a qualified liability under paragraphs (a)(6)(i)(B) and (E) of this section, a determination that the liability was not incurred in anticipation of the transfer of property to the upper-tier partnership is based on whether the partner in the lower-tier partnership anticipated transferring its interest in the lower-tier partnership to the upper-tier partnership at the time the liability was incurred by the lower-tier partnership.

to the extent the partner assumed or took property subject to the liability from the person in a nonrecognition transaction described in Code § 351,[2527] 381(a), 721,[2528] or 731.[2529]

If within a two-year period a partner incurs certain types of liability and transfers property to a partnership or agrees in writing to transfer the property, and in connection with the transfer the partnership assumes or takes the property subject to the liability, the liability is presumed to be incurred in anticipation of the transfer unless the facts and circumstances clearly establish that the liability was not incurred in anticipation of the transfer.[2530] Liabilities to fund various preformation expenditures may be excluded from liabilities deemed to have been relieved under the disguised sale rules.[2531] If a partner treats a liability assumed or taken subject to by a partnership in connection with a transfer of property as a certain type of qualified liability and the partner incurred the

---

[2527] See part II.M.2 Buying into or Forming a Corporation.

[2528] See part II.M.3 Buying into or Forming a Partnership.

[2529] Reg. § 1.707-5(a)(8). For Code § 731, see part II.Q.8.b.i Distribution of Property by a Partnership.

[2530] Reg. § 1.707-5(a)(7)(i).

[2531] Reg. § 1.707-4(d)(1) provides:

> (1) *In general*. A transfer of money or other consideration by the partnership to a partner is not treated as part of a sale of property by the partner to the partnership under § 1.707-3(a) (relating to treatment of transfers as a sale) to the extent that the transfer to the partner by the partnership is made to reimburse the partner for, and does not exceed the amount of, capital expenditures that—
> > (i) Are incurred during the two-year period preceding the transfer by the partner to the partnership; and
> >
> > (ii) Are incurred by the partner with respect to—
> > > (A) Partnership organization and syndication costs described in section 709; or
> > >
> > > (B) Property transferred to the partnership by the partner, but only to the extent the reimbursed capital expenditures do not exceed 20 percent of the fair market value of such property at the time of the transfer (the 20-percent limitation). However, the 20-percent limitation of this paragraph (d)(1)(ii)(B) does not apply if the fair market value of the transferred property does not exceed 120 percent of the partner's adjusted basis in the transferred property at the time of the transfer (the 120-percent test). This paragraph (d)(1)(ii)(B) shall be applied on a property-by-property basis, except that a partner may aggregate any of the transferred property under this paragraph (d)(1) to the extent—
> > > > (1) The total fair market value of such aggregated property (of which no single property's fair market value exceeds 1 percent of the total fair market value of such aggregated property) is not greater than the lesser of 10 percent of the total fair market value of all property, excluding money and marketable securities (as defined under section 731(c)), transferred by the partner to the partnership, or $1,000,000;
> > > >
> > > > (2) The partner uses a reasonable aggregation method that is consistently applied; and
> > > >
> > > > (3) Such aggregation of property is not part of a plan a principal purpose of which is to avoid §§ 1.707-3 through 1.707-5.
> > >
> > > (C) [Reserved].

For a discussion of how this rule works, listen to recordings (primarily Part 2) of "New Partnership Regulations under Sections 707 and 752," a discussion at the January 2017 meeting of the ABA's Section on Taxation that included those who write the regulations, and see slides 15-22 in "New Partnership Regulations under Sections 707 and 752," the latter saved as Thompson Coburn LLP doc. no. 6591807. That discussion also covers the remaining paragraphs of Reg. § 1.707-4(d).

liability within the two-year period before the earlier of the date the partner agrees in writing to transfer the property or the date the partner transfers the property to the partnership, see part II.M.3.e.i.(c) Disclosure Requirements.

If a partner contributes property and the partnership incurs indebtedness, seeking to allocate that debt to the contributing partner to support a distribution to that partner, the IRS might argue that the debt should not have been allocated to that partner.[2532] Also, some of the rules for allocating nonrecourse debt do not apply for purposes of the disguised sale rules, leading to surprisingly unfavorable results.[2533]

[2532] CCA 201324013.

[2533] See part II.C.3.c.iii Allocating Nonrecourse (Remaining) Liabilities, especially fn. 377 and the accompanying text. T.D. 9788 (10/5/2016) explained:

> … for disguised sale purposes only, it is appropriate for partners to determine their share of any partnership liability, whether recourse or nonrecourse under section 752, in the manner in which excess nonrecourse liabilities are allocated under Sec. 1.752-3(a)(3), as limited for disguised sale purposes in the 752 Final Regulations. For purposes of the disguised sale rules, this allocation method reflects the overall economic arrangement of the partners more accurately than the current regulations or the 2014 Proposed Regulations. In most cases, a partnership will satisfy its liabilities with partnership profits, the partnership's assets do not become worthless, and the payment obligations of partners or related persons are not called upon. This is true whether: (1) A partner's liability is assumed by a partnership in connection with a transfer of property to the partnership or by a partner in connection with a transfer of property by the partnership to the partner; (2) a partnership takes property subject to a liability in connection with a transfer of property to the partnership or a partner takes property subject to a liability in connection with a transfer of property by the partnership to the partner; or (3) a liability is incurred by the partnership to make a distribution to a partner under the debt-financed distribution exception in Sec. 1.707-5(b). Accordingly, under the 707 Temporary Regulations, a partner's share of any partnership liability for disguised sale purposes is the same percentage used to determine the partner's share of the partnership's excess nonrecourse liabilities under Sec. 1.752-3(a)(3), as limited for disguised sale purposes under the 752 Final Regulations.
>
> … the 707 Temporary Regulations provide that a partner's share of a partnership liability for disguised sale purposes does not include any amount of the liability for which another partner bears the [economic risk of loss] for the partnership liability under Sec. 1.752-2.
>
> The liability allocation approach for disguised sale purposes in the 707 Temporary Regulations does not conflict with Congress's directive relating to section 752, which had been raised as a potential concern by some commenters with respect to the 2014 Proposed Regulations. Section 79 of the Deficit Reduction Act of 1984 (Pub. L. 98-369) overruled the decision in *Raphan v. United States*, 3 Cl. Ct. 457 (1983) (holding that a guarantee by a general partner of an otherwise nonrecourse liability of the partnership did not require the partner to be treated as personally liable for that liability) and directed the Secretary of the Treasury to amend the regulations under section 752 to reflect the overruling of the *Raphan* decision. At issue in the *Raphan* case was debt allocation under section 752; accordingly, Congress's directive related to regulations under section 752 only. As noted, the 707 Temporary Regulations treat all partnership liabilities, whether recourse or nonrecourse, as nonrecourse liabilities solely for purposes of section 707. Thus, the approach adopted in the 707 Temporary Regulations does not conflict with the approach directed by Congress after the *Raphan* case.

For an explanation of unfair and surprising consequences of applying this rule to nonrecourse debt guaranteed by a partner and a criticism of this rule, see Smith, "Temporary disguised-sale

For more general rules, see part II.C.3 Allocating Liabilities (Including Debt). "New Partnership Regulations under Sections 707 and 752," a discussion at the January 2017 meeting of the ABA's Section on Taxation that included those who write the regulations, discussed 2016 changes to regulations and included slides with charts explaining some key changes.[2534]

II.M.3.e.i.(b). Distributions Presumed Not to Be Disguised Sales

Certain distributions are *presumed* not to constitute disguised sales:

- 150% of AFR.[2535] If the written partnership agreement characterizes a cash distribution as a preferred return[2536] or a guaranteed payment for capital and this distribution is a payment for the use of capital in a reasonable amount,[2537] it is presumed not to be part of a sale of property to the partnership unless the facts and circumstances[2538] clearly establish that the transfer is part of a sale.[2539] A preferred return or guaranteed payment for capital is reasonable in amount if the sum of any such distributions payable for that year do not exceed the amount determined by multiplying either the partner's capital[2540] by 150% of the AFR.[2541]

  - Operating Cash Flow Distributions. An operating cash flow distribution is presumed not to be part of a sale of property to the partnership unless the facts

regulations raise concerns," *The Tax Adviser* (7/2017), saved as Thompson Coburn LLP doc. no. 6599934.

2534 The text above references a two-part panel discussion chaired by Eric Sloan. The slides, "New Partnership Regulations under Sections 707 and 752," are saved as Thompson Coburn LLP doc. no. 6591807.

2535 AFR refers to the applicable federal rate as defined under Code § 1274, which applies for Code § 7872 as well as in other contexts.

2536 As used here, preferred return means a preferential distribution of partnership cash flow to a partner with respect to capital contributed to the partnership by the partner that will be matched, to the extent available, by an allocation of income or gain.

2537 Reg. § 1.707-4(a)(3)(i).

2538 Including the likelihood and expected timing of the subsequent allocation of income or gain to support the preferred return. Reg. § 1.707-4(a)(2).

2539 Reg. § 1.707-4(a)(2).

2540 Based on the partner's unreturned capital at the beginning of the year or, at the partner's option, the partner's weighted average capital balance for the year (with either amount appropriately adjusted, taking into account the relevant compounding periods, to reflect any unpaid preferred return or guaranteed payment for capital that is payable to the partner). A partner's unreturned capital equals the excess of the aggregate amount of money and the fair market value of other consideration (net of liabilities) contributed by the partner to the partnership over the aggregate amount of money and the fair market value of other consideration (net of liabilities) distributed by the partnership to the partner other than transfers of money that are presumed to be reasonable guaranteed payments for capital under Reg. § 1.707-4(a)(1)(ii), transfers of money that are reasonable preferred returns within the meaning of Reg. § 1.707-4(a)(3), and operating cash flow distributions within the meaning of Reg. § 1.707-4(b)(2) (described below). Reg. § 1.707-4(a)(3)(ii).

2541 Reg. § 1.707-4(a)(3)(ii). The regulation refers to a safe harbor interest rate, which for a partnership's taxable year equals 150% of the highest AFR, at the appropriate compounding period or periods, in effect at any time from the time that the right to the preferred return or guaranteed payment for capital is first established pursuant to a binding, written agreement among the partners through the end of the taxable year.

and circumstances clearly establish that the transfer is part of a sale.[2542] If the partnership agreement characterizes a payment as a distribution to a partner, then the payment is an operating cash flow distribution to the extent it does not exceed the partnership's net cash flow from operations for the year multiplied by the lesser of (a) the partner's percentage interest in overall partnership profits for that year, or (b) the partner's percentage interest in overall partnership profits for the partnership's life.[2543] The partnership's net cash flow from operations for a taxable year is an amount equal to the partnership's taxable income or loss arising in the ordinary course of the partnership's business and investment activities:[2544]

- Increased by tax exempt interest, depreciation, amortization, cost recovery allowances and other noncash charges deducted in determining such taxable income, and
- Decreased by:
    - Principal payments made on any partnership indebtedness,
    - Property replacement or contingency reserves actually established by the partnership,
    - Capital expenditures when made other than from reserves or from borrowings the proceeds of which are not included in operating cash flow, and
    - Any other cash expenditures (including preferred returns) not deducted in determining such taxable income or loss.

I tend to suggest preferred returns of operating cash flow over guaranteed payments.[2545]

The partnership anti-abuse rules[2546] should not apply when one of the above safe harbors is satisfied. If the transaction is contemplated by a particular regulation, then the situation is not considered an abuse of entity treatment.[2547] However, to minimize any risk that the anti-abuse rules would apply, the seller should not be protected from loss. Looking at the larger picture, the anti-abuse rule applies only if the transaction is

---

[2542] Reg. § 1.707-4(b)(1). This exception is especially helpful in preferred partnerships, as described in part II.H.11 Preferred Partnership to Obtain Basis Step-Up on Retained Portion.
[2543] Reg. § 1.707-4(b)(2)(i). Without limiting the choices a partner may make in applying this rule, in determining a partner's operating cash flow distributions for a taxable year the partner may use the partner's smallest percentage interest under the terms of the partnership agreement in any material item of partnership income or gain that may be realized by the partnership in the three-year period beginning with that taxable year. Reg. § 1.707-4(b)(2)(ii). In the case of tiered partnerships, the upper-tier partnership must take into account its share of the net cash flow from operations of the lower-tier partnership applying principles similar to those described in Reg. § 1.707-4(b)(2)(i), so that the amount of the upper-tier partnership's operating cash flow distributions is neither overstated nor understated. Reg. § 1.707-4(b)(2)(iii).
[2544] Reg. § 1.707-4(b)(2)(i).
[2545] See fn. 1472.
[2546] Reg. § 1.701-2(c)(3).
[2547] Reg. § 1.701-2(e)(2)(i).

inconsistent with Subchapter K's intent. For this purpose, Subchapter K's intent has three prongs:[2548]

- The partnership must be bona fide, and each transaction must have a "substantial business purpose."
- The form of each transaction must be respected under substance over form principles.
- Clear reflection of income: All distributions the old owner receives is being taxed. The new owner is not being taxed on income the new owner does not receive.

II.M.3.e.i.(c). Disclosure Requirements

Certain transactions must be disclosed on Form 8275 or an appropriate statement.[2549]

The transactions requiring disclosure are referred to in:

> § 1.707-3(c)(2) (regarding certain transfers made within two years of each other),
>
> § 1.707-5(a)(7)(ii) (regarding a liability incurred within two years prior to a transfer of property), and
>
> § 1.707-6(c) (relating to transfers of property from a partnership to a partner in situations analogous to those listed above)….

If more than one partner transfers property to a partnership pursuant to a plan, this disclosure may be made by the partnership on behalf of all the transferors rather than by each transferor separately.[2550]

II.M.3.e.ii. Disguised Sale When One Partner Contributes Property and Another Receives a Distribution

This part II.M.3.e.ii discusses whether a contribution to a partnership, followed by a distribution to another partner, constitutes a purchase by the contributing partner of the distributee partner's partnership interest.

[2548] Reg. § 1.701-2(a).

[2549] Reg. § 1.707-8(b), which provides:

> *Method of providing disclosure*. Disclosure is to be made on a completed Form 8275 or on a statement attached to the return of the transferor of property for the taxable year of the transfer that includes the following:
>
> (1) A caption identifying the statement as disclosure under section 707;
>
> (2) An identification of the item (or group of items) with respect to which disclosure is made;
>
> (3) The amount of each item; and
>
> (4) The facts affecting the potential tax treatment of the item (or items) under section 707.

[2550] Reg. § 1.707-8(c).

Part II.M.3.e Exception: Disguised Sale Rules quotes Reg § 1.731-1(c)(3) and Code § 707(a)(2) as regulatory and statutory authority under the disguised sale rules, which are supplemented by case law and other authority.

Not until 2004 were proposed regulations issued, which are discussed after reviewing cases leading up to them.

TAM 200037005 asserts that Code § 707(a)(2)(B) applies even if regulations have not been adopted.[2551]

Communications Satellite Corp. v. U.S., 625 F.2d 997 (Ct. Cl. 1980), held that admission of a partner followed by a related distribution to the other partners being diluted was not a disguised sale by the distributees. In that case, the distributee partners, instead of receiving full fair market value, received a proportionate share of their initial capital contribution, adjusted by income and distributions. The court held:

> The effect of the arrangements for admitting new partners was to eliminate the possibility that gains from the reduction of the existing partner's interests resulting from the admission of new partners would influence decisions on admitting new partners. Moreover, these arrangements exhibited in several important respects characteristics not commonly associated with sale transactions.
>
> There were no financial negotiations with the incoming partners by either INTELSAT or the existing partners, and there were no contracts of sale between old and new partners. Neither the partnership nor the existing partners had any control over who joined INTELSAT (other than the restriction in the agreements to members of the International Telecommunications Union) or over the terms under which the new partners joined. The entry fees—the price paid for the partnership interests—had no relationship to the actual value of the new partners' percentage interests in the partnership; there was no attempt at appraising the value of partnership interests at any time. The entry fees were determined mechanically, based not on the fair market value of the partnership or its assets but on the original capitalization of the partnership. Although the Committee had an opportunity to affect the entry fees through its role in setting the incoming quotas, this power was restricted by the requirement that the quotas reflect only

[2551] Looking to cases in other areas, the TAM asserted:

> Although the Service has not promulgated regulations for disguised sales of partnership interests under section 707(a)(2)(B) (Income Tax Regulation Section 1.707-7 is reserved), it may enforce section 707(a)(2)(B) in the context of a disguised sale of a partnership interest in the absence of regulations. See *Pittway Corp. v. United States*, 102 F.3d 932 (7th Cir. 1996) (although the statute provided "to the extent provided in regulations" the plain language of the statue [sic] directs a single conclusion); *Estate of Neuman*, 106 T.C. 216 (1996) (regulations contemplated under section 2663(2) is not a necessary precondition to the imposition of the generation-skipping transfer tax on transfers involved in the case); Rev. Rul. 91-47 (Service enforced section 108(e)(4), which applies "to the extent provided in regulations" before the regulations were issued). The plain language of the statute, as confirmed by the legislative history, imposes liability on the taxpayer in this case.

> the anticipated use of the system and not the business or investment goals of any partner or the partnership.
>
> Although none of these characteristics individually may establish that the transactions were not sales, their combined effect, viewed in the context of the unique and special nature and purpose of this partnership, is inconsistent with the view that the transactions by which new partners were admitted were sales by the existing partners of part of their interests. To the contrary, the receipt by the existing partners of their pro rata share of the amounts paid by new partners to the partnership were distributions of partnership property on which, under section 731, no gain is recognized.

In giving context to Reg § 1.731-1(c)(3), in fn. 6 the court noted:

> An example of the type of transaction that the regulation covers is given in Rev. Rul. 57-200, 1957-1 Cum. Bull. 205. The ruling deals with a situation in which two people each owned half of a partnership and each owned half of two corporations. Each of the partners contributed his half-interest in the two corporations to the partnership, and the partnership thereafter distributed one of the two corporations to each of the partners along with a liquidating distribution of half of the partnership itself. These transfers "constituted steps in an integral transaction entered into for the purpose of effecting an exchange of the corporate stock interests between the partners without the recognition of gain to the partners or the partnership. Accordingly, to such extent, section 731 of the Code does not apply ... ." *Id.* At 206. See also 1 A. Willis, *Partnership Taxation* § 33.07 (2d ed. 1976).

Jupiter Corp. v. U.S.[2552] held that, when the contributing partner receives a partnership interest that is very different in nature from that of the distributee partner and both partners stay in the partnership, a disguised sale cannot have occurred.[2553]

[2552] 2 Cl. Ct. 58 (Ct. Cl. 1983).

[2553] Describing the interests of the contributing partner, Wilkow Group, and the distributee partners, plaintiff and Empire, the court found no disguised sale:

> The uncontradicted evidence in the record establishes that plaintiff would not have considered a sale, and the Wilkow Group would not have considered a purchase, of a portion of plaintiff's general partnership interest. The economic and legal pre-requisites of plaintiff and the Wilkow Group mandated that the partnership be reorganized to admit the Wilkow Group as new limited partners.
>
> The Wilkow Group's limited partnership interest did not exist prior to the reorganization of the Venture. This newly-created limited partnership interest gave the Wilkow Group cumulative rights to monthly distributions of income which had priority over all distributions to plaintiff and Empire. Neither plaintiff nor Empire owned such a cumulative priority right to the Venture's income prior to the reorganization. The Wilkow Group's limited partnership interest created by the reorganization carried no obligation to advance money needed by the Venture beyond the initial capital contribution and loan. Plaintiff's and Empire's partnership interests imposed such an obligation, to varying extents, both before and after the reorganization. Since the Wilkow Group's limited partnership interest was unique from the partnership interests owned by plaintiff and Empire, the Wilkow Group could not have purchased this interest directly from either partner.

TAM 200301004 asserts that Congress adopted Code § 707(a)(2)(B) to overturn *Jupiter Corp.* and *Communications Satellite Corp*.[2554]

Expressly assuming another partner's liabilities tends to make the transactions look more like a sale.[2555]

> Although plaintiff's general partnership interest was decreased from 77.5 percent to 57.5 percent after the reorganization, plaintiff remained in a more favorable position after the reorganization than it would have if it had directly sold a 20 percent general partnership interest to the Wilkow Group. Both before and after the reorganization, plaintiff remained the sole general partner with 100 percent control of the management of the Venture. Plaintiff did not want to share its management responsibilities with any other partner. Furthermore, the Wilkow Group was not interested in acquiring a share of the management responsibilities. The parties could not have accomplished these goals by a direct purchase and sale of a portion of plaintiff's general partnership interest.
>
> A further indication that this transaction was intended, and could only have been accomplished, as a reorganization of the Venture is found in a change which the amended partnership agreement made in the rights and obligations of plaintiff and Empire vis-a-vis each other. Prior to the reorganization, plaintiff and Empire were both obligated to advance all amounts which the Venture required. After the reorganization, the amended partnership agreement expressly removed Empire's obligation to advance amounts which the Venture needed to make the monthly payments to the Wilkow Group. Of course, no change in the rights between plaintiff and Empire could have been accomplished solely by a direct sale of a portion of plaintiff's general partnership interest to the Wilkow Group.

[2554] The TAM asserted:

> The legislative history of § 707(a)(2)(B) indicates that the provision was adopted as a result of Congress' concern that taxpayers were deferring or avoiding tax on sales of partnership property, including sales of partnership interests, by characterizing sales as contributions of property, including money, followed or preceded by a related partnership distribution. See S. Prt. No. 169, (Vol. I), 98th Cong., 2d Sess. 225 (1984)(hereinafter "S. Prt."); H.R. Rep. No. 432, (Pt. 2) 98th Cong., 2d Sess. 1218 (1984) (hereinafter "H.R. Rep."). Specifically, Congress was concerned about court decisions that allowed tax-free treatment in cases which were economically indistinguishable from sales of property to a partnership or another partner. See S. Prt. At 225; H.R. Rep. at 1218 (discussing *Jupiter Corp. v. United States*, No. 83-842 (Ct. Cl. 1983) and *Communications Satellite Corp. V. United States*, 223 Ct. Cl 253 (1980) both of which involved the disguised sale of a partnership interest). Congress believed that these transactions should be treated for tax purposes in a manner consistent with their underlying economic substance. See S. Prt. at 225; H.R. Rep. at 1218.

[2555] Distinguishing *Communications Satellite*, *Colonnade Condominium, Inc., v. Commissioner*, 91 T.C. 793 (1988), found a disguised sale, noting:

> The fact that the three shareholders of Colonnade expressly assumed Colonnade's liabilities, in return for partnership interests which are capital assets under section 741, is especially significant. In determining whether an actual or constructive sale or exchange took place, we note that the touchstone for sale or exchange treatment is consideration. In *LaRue v. Commissioner*, 90 T.C. 465, 483-484 (1988), we noted that where liabilities are assumed as consideration for a partnership interest a sale or exchange exists:
>
>> If, in return for assets, any consideration is received, even if nominal in amount, the transaction will be classified as a sale or exchange. *Blum v. Commissioner*, 133 F.2d 447 (2d Cir. 1943). *** When the transferee of property assumes liabilities of the transferor encumbering the property, the liability is an amount realized by the transferor. *Crane v. Commissioner*, [331 U.S. 1 (1947)]; *Commissioner v. Tufts*,

The IRS has asserted that elements of a sale from the distributee partner to the contributing partner include the contribution being the same amount as the redemption[2556] and that the continuing partners' interest did not increase proportionately upon the withdrawal of the partner.[2557]

> [461 U.S. 300 (1983)]. Assumption of liabilities by the transferee constitutes consideration making the transaction a sale or exchange. *Wilkinson v. United States*, 177 F. Supp. 101 (S.D. Ala. 1959).
>
> *** Where assets are transferred to third parties, assumption of liabilities constitutes consideration. ***
>
> *** the assumption of liabilities by a third party transferee constitutes an amount realized, and this is consideration to the transferor. *Crane v. Commissioner*, [supra]; *Tufts v. Commissioner*, [supra].

I am unsure why the court did not simply invoke Code § 311 to tax a distribution from the corporation to its shareholders.

[2556] FSA 200024001, citing *Jacobson v. Commissioner*, 96 T.C. 577, 587-88 (1991), *aff'd*, 963 F.2d 218 (8th Cir. 1992), asserted:

> The court, however, will look behind the chosen form of a transaction where "elements of artificiality" are present. The presence of such elements can be ascertained by looking at the business purpose for the transaction. *Jacobson*, 96 T.C. at 590. One element of artificiality is that the funds used to terminate Q's interest were derived from U, and not from P. *Jacobson*, 96 T.C. at 592. Pursuant to the Redemption Agreement, Q's entire interest in P would be redeemed for $s and certain contingent payments. Ten days before the redemption date, R and U entered into an agreement wherein U would contribute $s to fund the payment to be made to Q. The agreement also provided that U was required to make a contribution to P in an amount equal to each of the contingent payments to be made to Q.

[2557] FSA 200024001 asserted:

> Another element of artificiality is that the continuing partners' interest did not increase proportionately upon the withdrawal of the partner. Specifically, to the extent the interests of the continuing partners' interest does not increase proportionately upon the withdrawal of a partner, the economic substance of the transaction is generally considered a sale. *Colonnade Condominium, Inc.*, *supra* (where new general partners were admitted to a limited partnership, the interests of one pre-admission general partner decreased, and the interests of all pre-admission limited partners remain unchanged, holding that the general partner whose interest decreased sold a portion of its partnership interest to the new general partners); *Coven v. Commissioner*, 66 T.C. 295 (1976) (holding that the termination of a partner's interest was a sale of the interest to a partner rather than a liquidation because, among other things, the majority partner contributed the cash for the terminating payments and its interest increased while the minority partner's interests did not). After U's contribution of $s to P, the continuing partners' (R and U's) interest did not increase proportionately upon the withdrawal of Q. Rather, U's interest increased to z percent and R's interest remained w percent.
>
> Based on the above facts and circumstances, we conclude that a reasonable inference can be drawn that the overarching business purpose for the transaction was to sell Q's partnership interest in P to U. The substance of the transaction was a transfer of money by a partner, Q, to a partnership, P, followed by a related direct transfer of money by the partnership, P, to another partner, U. The transfers, when viewed together, are properly characterized as a sale or exchange of Q's partnership interest. Accordingly, the transfers must be treated as a transaction between two or more partners acting other than in their capacity as members of the partnership, specifically, as a sale. See I.R.C. section 707(a)(2)(B).

Proposed regulations under Code § 707(a)(2)(B) on the topic of a disguised sale from one partner to another were proposed November 26, 2004 and withdrawn January 21, 2009, [2558] and as of 12/16/2017 I am unaware of any having been promulgated after that. The preamble to the Prior Prop. Regs. expressed antipathy to *Communications Satellite* and *Jupiter Corp.*[2559] Although the proposed regulations have been withdrawn, one may want to consider what factors the government viewed as relevant when it issued them:[2560]

(i) That the timing and amount of all or any portion of a subsequent transfer are determinable with reasonable certainty at the time of an earlier transfer;

(ii) That the person receiving the subsequent transfer has a legally enforceable right to the transfer or that the right to receive the transfer is secured in any manner, taking into account the period for which it is secured;

(iii) That the same property (other than money, including marketable securities that are treated as money under section 731(c)(1)) that is transferred to the partnership by the purchasing partner is transferred to the selling partner;

(iv) That partnership distributions, allocations or control of operations are designed to effect an exchange of the benefits and burdens of ownership of transferred property (other than money, including marketable securities that are treated as money under section 731(c)(1)), including a partnership interest;

(v) That the partnership holds transferred property (other than money, including marketable securities that are treated as money under section 731(c)(1)) for a limited period of time, or during the period of time the partnership holds transferred property (other than money, including marketable securities that are treated as money under section 731(c)(1)), the risk of gain or loss associated with the property is not significant;

Colonnade is discussed in fn. 2555, and *Coven* is discussed in fn. 3975, the latter being found in part II.Q.8.b.ii.(a) Introduction to Code § 736.

[2558] FR Doc. 2009-1101, withdrawing REG-149519-03 (11/26/2004).

[2559] [REG-149519-03] stated:

> Congressional concern that taxpayers were deferring or avoiding tax on sales of partnership property, including sales of partnership interests, by characterizing sales as contributions of property, including money, followed or preceded by related partnership distributions. See H.R. Rep. No. 861, 98th Cong. 2nd Sess. 861 (1984), 1984-3 (Vol. 2) C.B. 115. Specifically, Congress was concerned about court decisions that allowed tax-free treatment in cases that were economically indistinguishable from sales of property to a partnership or another partner, and believed that these transactions should be treated for tax purposes in a manner consistent with their underlying economic substance. See H.R. Rep. No. 432, 98th Cong. 2nd Sess. 1218 (1984) (H.R. Rep.), and S. Prt. No. 169 (Vol. I), 98th Cong. 2nd Sess. 225 (1984) (S. Prt.) (discussing *Communications Satellite Corp. v. United States*, 625 F.2d 997 (Ct. Cl. 1980), and *Jupiter Corp. v. United States*, 2 Cl. Ct. 58 (1983), both of which involved disguised sales of a partnership interest).

[2560] Former Prop. Reg. § 1.707-7(b)(2).

(vi) That the transfer of consideration by the partnership to the selling partner is disproportionately large in relationship to the selling partner's general and continuing interest in partnership profits;

(vii) That the selling partner has no obligation to return or repay the consideration to the partnership, or has an obligation to return or repay the consideration due at such a distant point in the future that the present value of that obligation is small in relation to the amount of consideration transferred by the partnership to the selling partner;

(viii) That the transfer of consideration by the purchasing partner or the transfer of consideration to the selling partner is not made pro rata;

(ix) That there were negotiations between the purchasing partner and the selling partner (or between the partnership and each of the purchasing and selling partners with each partner being aware of the negotiations with the other partner) concerning any transfer of consideration; and

(x) That the selling partner and purchasing partner enter into one or more agreements, including an amendment to the partnership agreement (other than for admitting the purchasing partner) relating to the transfers.

(Code § 731(c) is discussed in part II.Q.8.b.i.(b) Code § 731(c): Distributions of Marketable Securities (Or Partnerships Holding Them).)

Prior Prop. Reg. § 1.707-7(c) provided that, "if within a two-year period a purchasing partner transfers consideration to a partnership and the partnership transfers consideration to a selling partner (without regard to the order of the transfers), the transfers are presumed to be a sale, in whole or in part, of the selling partner's interest in the partnership to the purchasing partner unless the facts and circumstances clearly establish that the transfers do not constitute a sale."

However, Prior Prop. Reg. § 1.707-7(d) presumed that distributions liquidating a partnership interest were not disguised sale to the recipient.[2561] Reg. § 1.761-1(d), "Liquidation of partner's interest," provides:[2562]

[2561] Prior Prop. Reg. § 1.707-7(d) provided:

> *Transfers of money in liquidation of a partner's interest presumed not to be a sale*. Notwithstanding the presumption set forth in paragraph (c) of this section, for purposes of this section, if a partnership transfers money, including marketable securities that are treated as money under section 731(c)(1), to a selling partner, or is treated as transferring consideration to the selling partner under paragraph (j)(2) of this section, in liquidation of the selling partner's interest in the partnership, the transfer is presumed not to be a sale, in whole or in part, of the selling partner's interest in the partnership to the purchasing partner unless the facts and circumstances clearly establish that the transfer is part of a sale. See § 1.761-1(d) for the definition of the term liquidation of a partner's interest.

The preamble to the above explained:

> The IRS and the Treasury Department believe that the abuse that section 707(a)(2)(B) was intended to address typically is not present in situations involving complete liquidations of partners' partnership interests for money. Accordingly, the proposed

> The term "liquidation of a partner's interest" means the termination of a partner's entire interest in a partnership by means of a distribution, or a series of distributions, to the partner by the partnership. A series of distributions will come within the meaning of this term whether they are made in one year or in more than one year. Where a partner's interest is to be liquidated by a series of distributions, the interest will not be considered as liquidated until the final distribution has been made.

Furthermore, Prior Prop. Reg. § 1.707-7 would not have applied to the deemed termination of a partnership.[2563] See part II.Q.8.e.iv Transfer of Partnership Interests Resulting in Deemed Termination: Effect on Partnership.

Also, Prior Prop. Reg. § 1.707-7 would not have applied to service partnerships,[2564] referring to the rules described in part II.G.9 Personal Service Corporations. Furthermore, operating cash flow distributions and similar safe harbors, under the rules governing disguised sales from a partner to a partnership,[2565] would also have been safe harbors.[2566]

> regulations provide that, notwithstanding the presumption relating to transfers within two years, a transfer of money, including marketable securities that are treated as money under section 731(c)(1), to a selling partner in liquidation of that partner's entire interest in the partnership is presumed not to be part of a disguised sale of that interest. However, the IRS and the Treasury Department recognize that there are instances in which a liquidating distribution may properly be characterized as part of a disguised sale of a partnership interest, particularly when the tax consequences of a liquidating distribution are significantly different from those of a sale of a partnership interest. Accordingly, the presumption against sale treatment may be rebutted in those cases.

[2562] After the quoted language, Reg. § 1.761-1(d) continues:

> For the basis of property distributed in one liquidating distribution, or in a series of distributions in liquidation, see section 732(b). A distribution which is not in liquidation of a partner's entire interest, as defined in this paragraph, is a current distribution. Current distributions, therefore, include distributions in partial liquidation of a partner's interest, interest, and distributions of the partner's distributive share. See paragraph (a)(1)(ii) of § 1.731-1.

[2563] Prior Prop. Reg. § 1.707-7(a)(8) provided:

> *Certain transfers disregarded*. Section 707(a)(2)(B) and the rules of this section do not apply to deemed transfers resulting from a termination of a partnership under section 708(b)(1)(B) and transfers incident to the formation of a partnership. However, transfers incident to the formation of a partnership may be transfers to which § 1.707-3(a) applies.

[2564] Prior Prop. Reg. § 1.707-7(g) provided:

> Exception for certain transfers to and by service partnerships. Section 707(a)(2)(B) and the rules of this section do not apply to transfers of money, including marketable securities that are treated as money under section 731(c)(1), to and by a partnership that would be described in section 448(d)(2) if the partnership were a corporation. Solely for purposes of applying section 448(d)(2) to partnerships under this paragraph (g), partners are treated as employees of the partnership and "partnership interest" is substituted for "stock" in testing for ownership by the employees performing services.

[2565] See part II.M.3.e.i.(b) Distributions Presumed Not to Be Disguised Sales.

[2566] Prior Prop. Reg. § 1.707-7(f) provided:

> *Application of §1.707-4 (special rules applicable to guaranteed payments, preferred returns, operating cash flow distributions, and reimbursements of preformation*

In withdrawing Prop. Reg. § 1.707-7, Ann. 2009-4 stated:

> The Treasury Department and the IRS will continue to study this area and may issue guidance in the future. Until new guidance is issued, any determination of whether transfers between a partner or partners and a partnership is a transfer of a partnership interest will be based on the statutory language, guidance provided in legislative history, and case law.

I am unaware of cases discussing the disguised sale of a partnership interest form one partner to another after the Prior Prop. Regs. were issued. One might consider looking to them as guidelines in planning to try to develop a comfort level in light of the lack of guidance beyond the cases we have toward which the IRS has expressed antipathy.

II.M.3.f. Exception: Corporate Partners

Corporate stock can be transferred to affiliated corporations or their owners in a variety of ways, some of which are tax-free. Some of this involves partnerships of corporations, which partnerships might at first glance appear to allow corporations to shift or increase basis, based on the interaction of Subchapter C and partnership rules. Although these materials touch upon various elements of Subchapter C, one should review materials that focus intensively on Subchapter C when restructuring any structure involving the interaction between more than one C or S corporation.

Among these concerns, a corporate partner might be required to recognize gain when a partnership directly or indirectly owns, acquires, or distributes stock of the corporate partner, and that transaction (or series of transactions) has the effect of an exchange by the corporate partner of its interests in appreciated property for an interest in stock of the corporate partner owned, acquired, or distributed by a partnership.[2567]

II.M.3.g. Exception: Foreign Partner

Regulations may provide that Code § 721(a) nonrecognition shall not apply to gain realized on the transfer of property to a partnership if such gain, when recognized, will be includible in the gross income of a foreign person.[2568]

Notice 2015-54 announced detailed rules that will be integrated into regulations effective as to transfers occurring on or after August 6, 2015, as well as transfers occurring before that date that result from entity classification elections that are filed on or after that date, and that are effective on or before that date. T.D. 9814 issued temporary regulations, effective January 18, 2017. The May 2017 meeting of the American Bar Association Section of Taxation included a session with the person who worked on the regulation project. Remarks made by panelists mentioned that one needed to be concerned with foreign taxpayers who were direct or indirect owners of partnership interests and that surprising results could happen even with what seemed to be a simple situation.

---

expenditures). Notwithstanding the presumption set forth in paragraph (c) of this section, rules similar to those provided in § 1.707-4 apply to determine the extent to which a transfer to a selling partner is treated as part of a sale of the selling partner's interest in the partnership to the purchasing partner.

[2567] See Reg. § 1.337(d)-3T.

[2568] Code § 721(c).

II.M.3.h. Reporting Real Estate Contributed to a Partnership or Corporation in a Nontaxable Transaction

The “real estate reporting person” must file an information return (Form 1099) and provide a copy to the grantor.[2569] The person (including any attorney or title company) responsible for closing the transaction has primary responsibility for filing information returns.[2570] The person responsible for closing the transaction is:[2571]

1. If a Uniform Settlement Statement is used under RESPA, the person listed as settlement agent on the statement.

2. If no settlement agent is listed or a closing statement is used that is not a Uniform Settlement Statement, the person who prepared the closing statement.

3. If no closing statement is used or if multiple closing statements are used, then either the transferee’s attorney who is present at delivery of the consideration or the transferee’s attorney who prepares or reviews the deed, or if no such attorney is present then either the transferor’s attorney who is present at delivery of the consideration or the transferor’s attorney who prepares or reviews the deed.

The real estate reporting person may not separately charge a customer for reporting the transaction but may take the reporting requirement into account in charging a fee for the overall transaction.[2572]

Except as otherwise provided, all “sales” effected by a broker in the ordinary course of business shall be reported.[2573] Distributions from partnerships do not need to be reported if properly reported on IRS Form 1065 and Schedule(s) K-1.[2574] However, Code § 721 contributions to a partnership and Code § 351 contributions to a corporation were intentionally not excluded from reporting.[2575]

[2569] Code § 6045(e)(1). All references to the Code are to the Internal Revenue Code of 1986, as amended.

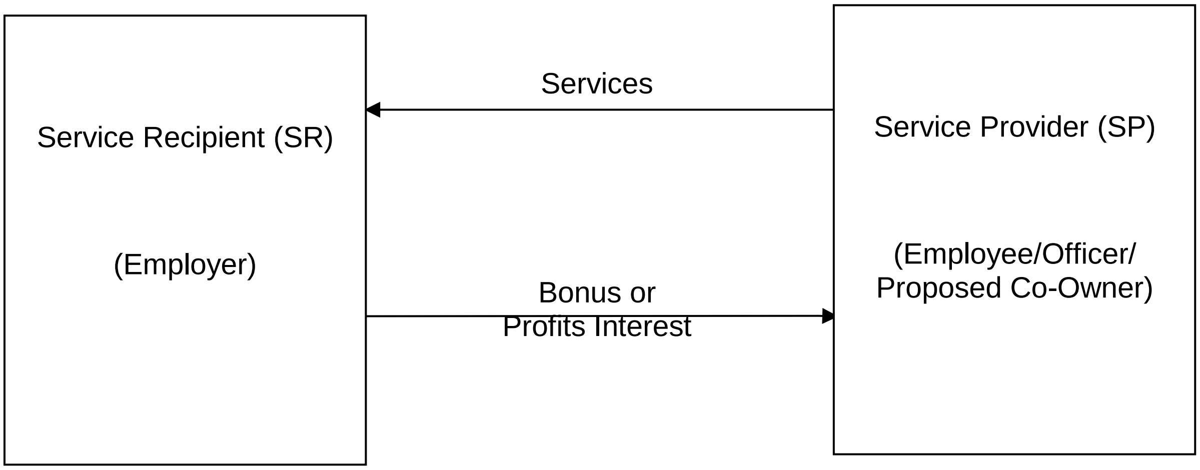
II.M.4. Providing Equity to Key Employees and an Introduction to Code § 409A Nonqualified Deferred Compensation Rules

II.M.4.a. Overview



Before working in this area, consider reading part II.Q.1.d.i IRS Audit Guide for Nonqualified Deferred Compensation.

II.M.4.a.i. Bonus vs. Equity

Advantages of Bonus

- Service provider (SP) has no rights to information about the business beyond what is necessary to enforce rights to bonus.
- Don't need to worry about buying out SP upon divorce, SP's financial hardship (creditors), disability, death, or other separation from service.

Disadvantages of Bonus

- Code § 409A complicates timing of payment for performance after year-end; however, easy to get around if recognize the issue.
- Code § 409A complicates payments deferred into future as "golden handcuffs."

Advantages of Equity

- Immediate issuance of profits interest or stock often avoids all Code § 409A issues.
- SP feels like an owner and might be more motivated.
- Courts tend to accept more restrictive covenants not to compete, etc. when SP is an owner.

Disadvantages of Equity

- Complicates capital structure. Need to worry about buy-sell-related issues.

- SP might be able to demand more on separation from service, in addition to any employment issues.

- Creditors might very well require loan guarantees of SP, which might make ownership unattractive to SP. This might be more of an advantage, however, in that SP will be much less likely to abandon a sinking ship - because SP might go down with it!

- A transfer of part of the business' current value might be deemed to occur in a family business setting.[2576]

II.M.4.a.ii. Equity vs. Synthetic Equity.

What is synthetic equity?

- Bonus payments that mirror distributions to owners have the same Code § 409A issues as other bonus payments.

- Options to acquire stock or partnership interests are not subject to Code § 409A if a sufficient exercise price that makes them equivalent to profits interest.

Profits Interest vs. Pro Rata Share of Entire Entity

- "Profits interest" means an interest in the partnership's future income, gains, deductions, and losses, with a zero beginning capital account so that, if entity dissolved at the time of transfer, the holder would receive nothing.[2577]

- "Pro rata share of entire entity" means that the owner receives not only a profits interest but also a proportionate share of the proceeds if the entity liquidates.

- Issuance of a profits interest generally is not taxable, but issuance of a pro rata share of entire entity is. Need to gross-up SP for taxes on issuance of a pro rata share of entire entity; however, SR receives an equivalent deduction and tax benefit, so long as timing is not messed up.

- Issuance of a profits interest is forward-looking, whereas issuance of a pro rata share of entire entity often has a large backward-looking component.

[2576] See part III.B.7.b Code § 2701 Overview for when an entity needs to consider gift tax valuation rules when using profits interests and part III.B.7.c Code § 2701 Interaction with Income Tax Planning for planning for equity awards to those in the same family.

[2577] This is done by valuing the partnership's assets at the time the profits interest is issued and booking up the partners' capital accounts under Reg. § 1.704-1(b)(2)(iv)(f)(5)(iii). The partners' capital accounts are adjusted as if the partnership had sold all of its assets for their fair market value, but no gain or loss is recognized and tax basis does not change as a result of that hypothetical sale and actual capital account adjustment.

- Issuance of a profits interest is more conducive to golden handcuffs. SR distributes enough to pay taxes but holds the rest of the cash until agreed-upon event occurs. Undistributed cash is reflected in SP's capital account (which originally started at zero). Generally, when SP has a pro rata share of entire entity, SP receives distributions at the same time as though who provide investment capital. See S corporation example below.

II.M.4.b. When is an Award or Transfer to an Employee Includible in the Employee's Income

II.M.4.b.i. Income Tax Recognition Timing Rules re Equity Incentives

Property[2578] is not taxable under Code § 83(a) until it has been transferred to such person and become substantially vested in such person.[2579] For Code § 83 to apply to defer a deduction to a later date when the property was more valuable, the service recipient must show that: (1) the property was transferred in connection with the performance of services and (2) the property was subject to a substantial risk of forfeiture until that later date.[2580]

In determining whether property was transferred in connection with the performance of services, the following factors apply:[2581]

(1) whether the property right is granted at the time the employee or independent contractor signs his employment contract;

(2) whether the property restrictions are linked explicitly to the employee's or independent contractor's tenure with the employing company;

(3) whether the consideration furnished by the employee or independent contractor in exchange for the transferred property is services; and

---

[2578] Reg. § 1.83-3(e) provides:

> … the term property includes real and personal property other than either money or an unfunded and unsecured promise to pay money or property in the future. The term also includes a beneficial interest in assets (including money) which are transferred or set aside from the claims of creditors of the transferor, for example, in a trust or escrow account...

[2579] Reg. § 1.83-1(a)(1). *Qinetiq U.S. Holdings, Inc. and Subsidiaries v. Commissioner*, T.C. Memo. 2015-123, *aff'd* 119 A.F.T.R.2d 2017-330 (4th Cir. 1/6/2017), disallowed a C corporation's assertion that stock issued several years before had not vested until right before the corporation was sold. The disputed deduction was almost $118 million.

[2580] *Qinetiq U.S. Holdings, Inc. and Subsidiaries v. Commissioner*, T.C. Memo. 2015-123, *aff'd* 119 A.F.T.R.2d 2017-330 (4th Cir. 1/6/2017), the Fourth Circuit also referring to *Strom v. United States*, 641 F.3d 1051, 1055-56 (9th Cir. 2011); *United States v. Bergbauer*, 602 F.3d 569, 580 (4th Cir. 2010).

[2581] *Qinetiq U.S. Holdings, Inc. and Subsidiaries v. Commissioner*, T.C. Memo. 2015-123 (finding that the taxpayer failed to prove transfer in connection with the performance of services), *aff'd* 119 A.F.T.R.2d 2017-330 (4th Cir. 1/6/2017), the Tax Court citing as follows:

> See *Bagley v. Commissioner*, 806 F.2d at 170-171; *Alves v. Commissioner*, 734 F.2d 478, 481-482 (9th Cir. 1984), *aff'g* 79 T.C. 864 (1982); *Montelepre Systemed, Inc. v. Commissioner*, T.C. Memo. 1991-46 (citing *Centel Commc'ns Co. v. Commissioner*, 92 T.C. 612), *aff'd*, 956 F.2d 496 (5th Cir. 1992).

(4) the employer's intent in transferring the property.

A transfer of property occurs when a person acquires a beneficial ownership interest in such property (disregarding certain lapse restrictions).[2582] Imposing restrictions on substantially vested stock that cause the substantially vested stock to become substantially nonvested does not constitute a transfer of substantially nonvested stock subject to Code § 83.[2583]

Property is substantially vested when it is either transferable or not subject to a substantial risk of forfeiture.[2584]

Based on the facts and circumstances, a substantial risk of forfeiture exists where rights in property that are transferred are conditioned, directly or indirectly, upon the future performance (or refraining from performance) of substantial services by any person, or the occurrence of a condition related to a purpose of the transfer, and the possibility of forfeiture is substantial if such condition is not satisfied.[2585] The regularity of the performance of services and the time spent in performing such services tend to indicate whether services required by a condition are substantial.[2586] Special rules apply where

---

[2582] Reg. § 1.83-3(a)(1).

[2583] Rev. Rul. 2007-49, which also held that there is a transfer of substantially nonvested stock subject to Code § 83 where (a) a service provider exchanges substantially vested stock for substantially nonvested stock in a reorganization described in Code § 368(a), or (b) a service provider exchanges substantially vested stock for substantially nonvested stock in a taxable stock acquisition.

[2584] Reg. § 1.83-3(b). *Gluckman v. Commissioner*, T.C. Memo. 2012-329, *aff'd*, 545 F. App'x 59 (2d Cir. 2013), held:

> Therefore, consistent with the Advantage Plan's provisions and the plan withdrawal procedures communicated to participating employers, at that point it appears that the underlying policies were substantially certain to be distributed to petitioners or placed within their control. Even if transfers to other welfare benefit plans were still being permitted by BISYS at that time, subsequent events demonstrate that the policies were placed within petitioners' control no later than early November 2003. After receiving the resolution, BISYS sent endorsed, partially completed change of ownership forms that lacked only the new owner information and sent blank change of beneficiary designation forms, as well as duplicate copies of the policies, to petitioner's attention. The forms and the original insurance policies also were provided to petitioners' insurance agent. These actions placed petitioners' underlying policies squarely within their control because petitioners were then free to name the policies' new owner and beneficiary, which could have been themselves or another welfare benefit plan. When a taxpayer has dominion and control over property, the value of such property generally will be included in his or her gross income. See *Cadwell v. Commissioner*, 136 T.C. 38, 52-56 (2011), *aff'd* without published opinion, 109 A.F.T.R.2d 2012-2693 (4th Cir. 2012); *Chambers v. Commissioner*, T.C. Memo. 2011-114.

O'Connor v. Commissioner, T.C. Memo. 2015-244, reaffirmed *Gluckman* and imposed penalties when the taxpayer did not give the tax advisor complete information.

[2585] Reg. § 1.83-3(c)(1), which further provides:

> Property is not transferred subject to a substantial risk of forfeiture to the extent that the employer is required to pay the fair market value of a portion of such property to the employee upon the return of such property. The risk that the value of property will decline during a certain period of time does not constitute a substantial risk of forfeiture. A nonlapse restriction, standing by itself, will not result in a substantial risk of forfeiture.

[2586] Reg. § 1.83-3(c)(2), which further provides:

> The fact that the person performing services has the right to decline to perform such services without forfeiture may tend to establish that services are insubstantial. Where stock is transferred to an underwriter prior to a public offering and the full enjoyment of such stock is expressly or impliedly conditioned upon the successful completion of the underwriting, the stock is subject to a substantial risk of forfeiture. Where an employee receives property from an employer subject to a requirement that it be returned if the total earnings of the employer do not increase, such property is subject to a substantial risk of forfeiture. On the other hand, requirements that the property be returned to the employer if the employee is discharged for cause or for committing a crime will not be considered to result in a substantial risk of forfeiture. An enforceable requirement that the property be returned to the employer if the employee accepts a job with a competing firm will not ordinarily be considered to result in a substantial risk of forfeiture unless the particular facts and circumstances indicate to the contrary. Factors which may be taken into account in determining whether a covenant not to compete constitutes a substantial risk of forfeiture are the age of the employee, the availability of alternative employment opportunities, the likelihood of the employee's obtaining such other employment, the degree of skill possessed by the employee, the employee's health, and the practice (if any) of the employer to enforce such covenants. Similarly, rights in property transferred to a retiring employee subject to the sole requirement that it be returned unless he renders consulting services upon the request of his former employer will not be considered subject to a substantial risk of forfeiture unless he is in fact expected to perform substantial services.

Austin v. Commissioner, 141 T.C. 551 (2013), held that the following facts might or might not support a finding of substantial risk of forfeiture based on the following definition of cause:

> A. Dishonesty, fraud, embezzlement, alcohol or substance abuse, gross negligence or other similar conduct on the part of the Employee. Upon termination of this Agreement, Employee shall be entitled to receive compensation through the date of termination.
>
> B. Failure or refusal by Employee, after 15 days written notice to Employee, to cure by faithfully and diligently performing the usual and customary duties of his employment and adhere to the provisions of this Agreement.
>
> C. Failure or refusal by Employee, after 15 days written notice to Employee, to cure by complying with the reasonable policies, standards and regulations applicable to employees which * * * [UMLIC S-Corp.] may establish from time to time.

The court looked carefully at the circumstances behind that regulation's promulgation and reasoned:

> This history of section 1.83-3(c)(2), Income Tax Regs., strongly suggests that discharge for cause, like discharge for committing a crime, refers to a narrow and serious form of employee misconduct that is very unlikely to occur and is thus properly regarded as too remote—as a matter of law—to create a substantial risk of forfeiture.

After trial, T.C. Memo. 2017-69, the court held:

> In sum, we conclude that petitioners' stock was subject to a substantial risk of forfeiture when issued to them in 1998 and remained subject to that risk until the restrictions lapsed on January 1, 2004. Neither petitioner held a controlling position in UMLIC S-Corp. If either failed to perform his duties or left the company before the earnout restriction ended, the other would have had every incentive to insist on enforcement of the forfeiture provision according to its terms. The ESOP had (if anything) even stronger economic incentives to do this. Because "the possibility of forfeiture * * * [was] substantial," sec. 1.83-3(c)(3), Income Tax Regs., the stock held by petitioners and their grantor trusts did not become "substantially vested" until petitioners completed their promised service through the five-year earnout period.

In *Qinetiq U.S. Holdings, Inc. and Subsidiaries v. Commissioner*, T.C. Memo. 2015-123, *aff'd* 119 A.F.T.R.2d 2017-330 (4th Cir. 1/6/2017), the Tax Court cited *Austin* (2013) when determining that a corporation failed to prove that the possibility of forfeiture was substantial.

the employee is a significant owner [2587] or where securities laws impose certain restrictions.[2588]

[2587] Reg. § 1.83-3(c)(3) provides:

> In determining whether the possibility of forfeiture is substantial in the case of rights in property transferred to an employee of a corporation who owns a significant amount of the total combined voting power or value of all classes of stock of the employer corporation or of its parent corporation, there will be taken into account (i) the employee's relationship to other stockholders and the extent of their control, potential control and possible loss of control of the corporation, (ii) the position of the employee in the corporation and the extent to which he is subordinate to other employees, (iii) the employee's relationship to the officers and directors of the corporation, (iv) the person or persons who must approve the employee's discharge, and (v) past actions of the employer in enforcing the provisions of the restrictions. For example, if an employee would be considered as having received rights in property subject to a substantial risk of forfeiture, but for the fact that the employee owns 20 percent of the single class of stock in the transferor corporation, and if the remaining 80 percent of the class of stock is owned by an unrelated individual (or members of such an individual's family) so that the possibility of the corporation enforcing a restriction on such rights is substantial, then such rights are subject to a substantial risk of forfeiture. On the other hand, if 4 percent of the voting power of all the stock of a corporation is owned by the president of such corporation and the remaining stock is so diversely held by the public that the president, in effect, controls the corporation, then the possibility of the corporation enforcing a restriction on rights in property transferred to the president is not substantial, and such rights are not subject to a substantial risk of forfeiture.

In *Qinetiq U.S. Holdings, Inc. and Subsidiaries v. Commissioner*, T.C. Memo. 2015-123, *aff'd* 119 A.F.T.R.2d 2017-330 (4th Cir. 1/6/2017), the Tax Court applied these factors to determine that a corporation failed to prove that the possibility of forfeiture was substantial.

[2588] *Strom v. U.S.*, 641 F.3d 1051 (9th Cir. 2011), summarized:

> Ordinarily, when an employee is compensated with nonstatutory stock options that do not have a readily ascertainable fair market value at the time of the grant, the employee realizes income for tax purposes upon exercising the options. [Here, footnote 1 provides, Statutory stock options are compensatory options meeting criteria entitling them to special treatment under the Internal Revenue Code. See 26 U.S.C. § 422. Compensatory options that do not meet these requirements are referred to as nonstatutory. See *United States v. Tuff*, 469 F.3d 1249, 1251 n.2 (9th Cir. 2006) (citing *Cramer v. Comm'r*, 64 F.3d 1406, 1408–09 (9th Cir. 1995)).] See 26 U.S.C. § 83(e)(3)-(e)(4); 26 C.F.R. § 1.83-7(a). The taxpayer is taxed on an amount equal to the fair market value of the stock on the date of exercise minus the option price paid for the stock. See 26 C.F.R. § 1.83-1(a)(1); *id.* § 1.83-7(a). Internal Revenue Code § 83(c)(3), however, allows taxpayers to defer recognition and valuation of income so long as a profitable sale of the stock acquired through the exercise of the options could subject a person to suit under section 16(b) of the Securities Exchange Act of 1934. 26 U.S.C. § 83(c)(3). Section 16(b), in turn, forbids a corporate insider from profiting on a purchase made within six months of a sale (or a sale made within six months of a purchase) of the corporation's stock. See 15 U.S.C. § 78p(b). If a taxpayer is permitted to defer tax consequences under IRC § 83(c)(3), the taxpayer will be later taxed on an amount equal to the fair market value of the stock on the date that § 83(c)(3) no longer applies minus the option price paid for the stock. See 26 U.S.C. § 83(a); 26 C.F.R. § 1.83-1(a)(1).
>
> In this opinion, we first interpret the phrase could subject a person to suit under section 16(b) and determine what that phrase requires a taxpayer to demonstrate before she can postpone tax consequences under § 83(c)(3). We then hold that the taxpayer

The rights of a person in property are transferable if such person can transfer any interest in the property to any person other than the transferor of the property, but only if the rights in such property of such transferee are not subject to a substantial risk of forfeiture.[2589]

Consider planning for the contingency that a distributive share of income is allocated to a person whose interest was assumed to be vested but turned out not to be vested.[2590]

Furthermore, Code § 83(e) provides that Code § 83 does not apply to:

(1) a transaction to which section 421 applies,

(2) a transfer to or from a trust described in section 401(a) or a transfer under an annuity plan which meets the requirements of section 404(a)(2),

(3) the transfer of an option without a readily ascertainable fair market value,

(4) the transfer of property pursuant to the exercise of an option with a readily ascertainable fair market value at the date of grant, or

(5) group-term life insurance to which section 79 applies.

Beyond the issue of forfeiture, if an employee or independent contractor (or beneficiary thereof) is granted, in connection with the performance of services, an option to which Code § 421 (relating generally to certain qualified and other options) does not apply, Code § 83(a) applies to such grant if the option has a readily ascertainable fair market value at the time the option is granted.[2591] Options have a value at the time they are granted, but that value is ordinarily not readily ascertainable unless the option is actively traded on an established market.[2592] If Code § 83(a) does not apply to the grant of an option because the option does not have a readily ascertainable fair market value at the time of grant, Code §§ 83(a) and (b) apply at the time the option is exercised or otherwise disposed of, even though the fair market value of such option may have become readily ascertainable before such time.[2593] If the option is exercised, Code §§ 83(a) and (b) apply to the transfer of property under the exercise, and the

---

> here has not demonstrated an entitlement to deferral of tax consequences under § 83(c)(3), and after addressing a distinct legal issue pertinent to the ultimate resolution of this case, reverse and remand for further proceedings.

[2589] Reg. § 1.83-3(d), which further provides:

> Accordingly, property is transferable if the person performing the services or receiving the property can sell, assign, or pledge (as collateral for a loan, or as security for the performance of an obligation, or for any other purpose) his interest in the property to any person other than the transferor of such property and if the transferee is not required to give up the property or its value in the event the substantial risk of forfeiture materializes. On the other hand, property is not considered to be transferable merely because the person performing the services or receiving the property may designate a beneficiary to receive the property in the event of his death.

[2590] See part II.M.4.f.iii What Happens If a Nonvested Partnership Interest Does Not Qualify As a Profits Interest for a similar situation.

[2591] Reg. § 1.83-7(a).

[2592] Reg. § 1.83-7(b)(1).

[2593] Reg. § 1.83-7(a).

employee or independent contractor realizes compensation upon such transfer at the time and in the amount determined under Code §§ 83(a) and (b).[2594] Thus, when the service provider exercises such an option and the option is vested, the service recipient deducts the excess of value over exercise price and the service provider reports that as income.[2595]

For more details on how Code § 83 applies and the impact of a Code § 83(b) election in accelerating income, see part II.M.4.e.i Issuing Stock to an Employee - Generally.

II.M.4.b.ii. Strategic Issues re Income Tax Timing of Equity Incentives

If the employer can deduct the compensation expense at the same or a higher rate than that of the employee, then the incentive payment is tax-efficient. This can be especially important when paying key employees bonuses in connection with the sale of a company. The bonuses might even be grossed up to pay the employees' taxes – see the example in part II.M.4.e.i Issuing Stock to an Employee - Generally.

Sometime a mismatch might occur. For example, suppose a partnership or S corporation sells its assets, recognizing long-term capitals taxable at favorable rates, but has little ordinary income. In that case, the deduction benefits the employer to the extent of capital gain rates, while the income is taxed to the employee at ordinary income rates. Also, if the employer has insufficient income against which to deduct the compensation, then the compensation award is even less efficient. These mismatches might make grossing up employees for taxes be untenable.

II.M.4.c. Gifts to Employees

II.M.4.c.i. When a Gift to an Employee Is Compensation and Not a Gift

A gift to an employee generally is considered to be compensation and not a true gift.[2596] For the payment to be a gift, "the dominant reason that explains [the employer's] action in making the transfer" must be "detached and disinterested generosity" or "out of affection, respect, admiration, charity or like impulses."[2597]

When a majority stockholder of a corporation transferred some of his stock in the corporation to the employees of that corporation, the number of shares transferred to each employee being dependent on the number of years of service to the corporation, the IRS viewed the majority stockholder as benefitting economically through increased initiative in the employees resulting from their ownership of stock in their employer corporation, so the IRS ruled that the transferor's intent was recognizing past services rather than "detached and disinterested generosity."[2598]

[2594] Reg. § 1.83-7(a).

[2595] Letter Ruling 201610006, dealing with warrants issued to an independent contractor that was an entity.

[2596] Code § 102(c). See Bittker & Lokken, ¶10.2. Exclusion of Gifts From Gross Income, *Federal Taxation of Income, Estates, and Gifts* (WG&L).

[2597] *Commissioner v. Duberstein*, 363 U.S. 278 (1960).

[2598] Rev. Rul. 69-140.

If a shareholder of a corporation transfers property to an employee of such corporation or to an independent contractor (or to a beneficiary thereof), in consideration of services performed for the corporation, the transaction shall be considered to be a contribution of such property to the capital of such corporation by the shareholder, and immediately thereafter a transfer of such property as compensation paid by the corporation to the employee or independent contractor.[2599]

On the other hand, when a parent transferred stock to a grantor retained income trust that passed to children if the parent lived ten years, past work from time to time was considered incidental to donative intent: the children were full-time students when the trust was created, no mention was made of future work for the company, and the survivorship requirement persuaded the IRS that the transfer was purely a gift.[2600]

II.M.4.c.ii. Is Compensation to an Employee Better or Worse Than a Gift?

An employer may deduct reasonable compensation for services rendered in carrying out the employer's activity for profit.[2601]

The employer's deduction might offset the detriment of the employee's inclusion in income. For example, suppose each of the employer and employee have a 40% marginal tax rate and the employer wanted to get $100 to the employee, net of tax. The employer could award $167 of compensation, consisting of $100 cash to the employee and $67 (40% of $167) withholding to the government. The employer's $167 deduction generates a $67 tax saving (40% of $167), effectively reimbursing the employer for the $67 withholding paid to the government.

The actual math is not quite so tidy as illustrated above. For example, the employer and employee need to pay FICA tax on the compensation. The employer and employee might not be in the same bracket, which might cause a windfall or detriment to one party. If the payment is very large, the deduction might very well push the employer into a lower bracket and the employee into a higher bracket.

From a gift tax perspective, a gift is preferable if the donor has much more estate/gift tax exemption than assets. On the other hand, if the donor has a taxable estate, a 40% federal estate tax, without any corresponding tax savings, might represent a much larger net tax to the parties than a compensation scenario.

II.M.4.c.iii. FICA On Amounts Paid After Death, Including Death Benefits

Any taxable payment made by an employer to a survivor or the estate of a former employee after the calendar year in which such employee died is not subject to FICA.[2602] This includes amounts that would have been payable even if the employee had lived.[2603]

[2599] Reg. § 1.83-6(d)(1).
[2600] Letter Ruling 9109027, which is further described in fn. 4920 in part III.B.2.d.i.(a) General Concepts of the Effect of Irrevocable Grantor Trust Treatment on Federal Income Taxation.
[2601] Code § 162(a)(1). Code § 162(m) is among the authority for not deducting excessive compensation.
[2602] Code §3121(a)(14).
[2603] Letter Ruling 8321051.

Payments made in the calendar year of death are exempted from FICA by reason of the employee's death only if they:[2604]

- Are made under a plan established by the employer which makes provision for employees generally or a class or classes of his employees (or for such employees or class or classes of employees and their dependents), and

- Would not have been paid if the employee had not died.

For more information, see Zaritsky & Leimberg, ¶ 6.06[2][a][ii] Income tax treatment of the beneficiaries, *Tax Planning with Life Insurance: Analysis With Forms* (WG&L).

II.M.4.d. Introduction to Code § 409A Nonqualified Deferred Compensation Rules

Before working in this area, consider reading part II.Q.1.d.i IRS Audit Guide for Nonqualified Deferred Compensation.

Enacted by the American Jobs Creation Act of 2004,[2605] Code § 409A imprints a layer of rules that supplements previously existing rules on taxing deferred compensation.[2606] It punishes service providers (employees and independent contractors) who receive deferred compensation without complying with its terms; it is so broad that even public school teachers need to be careful![2607]

The service provider must pay a penalty of 20% of the deferred compensation when it is includible in gross income.[2608] At the same time, the service provider must also pay interest to the IRS on the deferred tax, measured from the taxable year that is the later of when compensation was earned or when it was not subject to a substantial risk of forfeiture.[2609] However, these rules do not apply to compensation payments that are taxed when earned but paid in a later year.[2610]

Permissible triggering events for payments under Code § 409A include separation from service, disability, death, a specified time or fixed schedule, a change in control of the service recipient, or an unforeseeable emergency.[2611] Special rules apply to split-dollar life insurance arrangements that were entered into before 2005.[2612] These materials are

[2604] Code §3121(a)(13).
[2605] Although the statute became effective January 1, 2005, existing plans did not need to be modified until December 31, 2008. Notice 2007-86.
[2606] Constructive receipt, Code § 83, Code § 457(f), etc.
[2607] Notice 2008-62.
[2608] Code § 409A(a)(1)(B)(i)(I); Prop. Reg. § 1.409A-4.
[2609] Code § 409A(a)(1)(B)(i)(II); Prop. Reg. § 1.409A-4.
[2610] See Rev. Rul. 2007-48 (treatment of amounts vested 1/1/2009 in the scenario that is used in the ruling), stating, Under § 1.409A-1(b)(6)(i), a right to compensation income that will be required to be included in income under § 402(b)(4) is not a deferral of compensation for purposes of § 409A.
[2611] The regulations and various IRS pronouncements provide very detailed rules on how to apply these concepts. The author always works with employee benefits practitioners in his firm who know these rules better than he does.
[2612] Notice 2007-34. See part II.Q.4.f Split-Dollar Arrangements.

not intended to provide a thorough knowledge of Code § 409A. The discussion below focuses on satisfying exceptions to Code § 409A with respect to equity and substitutes for equity.[2613]

Note, however, that the present value of a deferred compensation obligation is an expense on the business's income statement and a liability on its balance sheet. See part II.Q.1.d.ii.(b) Balance Sheet Effects of Deferred Compensation.

Also note that, to be exempt from ERISA, a plan needs to be a "top hat" plan for the benefit of a person or select group of persons with bargaining power.[2614] The employer must notify the Department of Labor that such a plan exists.[2615]

II.M.4.d.i. Performance Bonuses

Performance bonuses that are due March 15 after a calendar year-end can have excellent motivational effects. Because the date is fixed no later than 2.5 months after yearend, paying compensation after that fixed date would not cause the payment to violate Code § 409A if the payment is made during the calendar year including the fixed date.[2616] One glitch is that it is possible that the information needed to determine the bonus might not be available until after March 15. To avoid this, require the employee to work at least one day in the next year. For example, suppose a bonus relates to 2010 performance. Require the employee to work at least one day in 2011. Imposing this requirement means that the payment is not vested until 2011, so the payment date could be fixed at a date on or before March 15, 2012. Of course, for motivational reasons, the payment should be made in 2011 as soon as the information is available to ensure that the employee does not have to wait too long, but the important point is that the deadline for the bonus relating to 2010 work can be after March 15, 2011, to take into account practical business exigencies.

Be sure that, when a performance bonus is added to other compensation, the service provider's total compensation remains reasonable.

Performance bonuses based on profits should not constitute an equity interest under Code § 2701 if the service provider does not have any other equity interest, the service provider is not identified to the IRS or third parties as being an owner, and the service provider does not share in any losses.

II.M.4.d.ii. Pushing Back a Scheduled Retirement Date

After a plan has been set up, the employee cannot elect to postpone a scheduled payment unless the election is at least 12 months before the scheduled payment date

---

[2613] For benefits of using profits interests, see part II.M.4.f.i Overview of Profits Interest; Contrast with Code § 409A.

[2614] 'Top-Hat' Plans, part XI.C. of Deferred Compensation Arrangements, T.M. 385.

[2615] The simplest way might be a letter under 29 C.F.R. § 2520.104-23. For some relief for failure to send the letter, see https://www.irs.gov/retirement-plans/irs-penalty-relief-for-dol-dfvc-filers-of-late-annual-reports and https://www.dol.gov/agencies/ebsa/employers-and-advisers/plan-administration-and-compliance/correction-programs/dfvcp.

[2616] Reg. §§ 1.409A-1(b)(4)(i), 1.409A-3(b), (d).

and the payment is deferred at least 5 years.[2617] (Postponing previously deferred payments is often referred to as re-deferral.)

However, that rule might not be as big an obstacle as it seems. Suppose an employee makes $150K per year and is scheduled to receive $100K annual retirement payments from 2020-2029. Suppose that 2019 comes along, and the parties agree that employee should continue working. In that case:

- In 2019, the employee agrees to receive his $150K in compensation for 2020 over two periods: $50K in 2020 and $100K in 2030.

- The employee receives $150K in 2020, of which $100K is the originally scheduled deferred compensation and $50K that is earned for 2020 work.

- Thus, the employee receives $150K in 2020 and earns an additional payment of $100K to be paid in 2030, the year after the $100K retirement payments were scheduled to end.

The employee has effectively pushed back retirement by one year. However, the original payment stream of $100K per year from 2020-2029 remains intact. Thus, the Code § 409A rules on postponing a stream of payments have not been violated. The above plan not only offers flexibility but also avoids the strict deadlines that apply to re-deferral.

Setting a fixed payment upon attaining a particular age would satisfy Code § 409A without causing Code § 2701 or other income or estate tax problems, and that could be coupled with disability and death benefits to provide financial security.[2618]

II.M.4.d.iii. Change in Control as a Permitted Triggering Event under Code § 409A

Change in the entity's control is an event that can trigger payment of deferred compensation without the harsh consequences of Code § 409A.[2619] Generally, such a change in control in a corporation occurs when any one person, or more than one person acting as a group, acquires ownership of stock of the corporation that, together with stock held by such person or group, constitutes more than 50% of the total fair market value or total voting power of the stock of such corporation.[2620] Similar rules

---

[2617] Code § 409A(a)(4)(C).

[2618] See part III.B.7.c.vi, Code § 2701 Interaction with Income Tax Planning.

[2619] In order to cover earn-out provisions where the acquirer in a change of control contracts to make an immediate payment at the closing of the transaction with additional amounts payable at a later date, delayed payments may meet the requirements for a payment at a specified time or pursuant to a fixed schedule if they are paid on the same schedule and under the same terms and conditions as payments to shareholders generally pursuant to the change in control event to the extent paid not later than five years after the change in control event. Reg. § 1.409A-3(i)(5)(iv).

[2620] Reg. § 1.409A-3(i)(5)(v)(A). This applies to a change in the ownership of the corporation, a change in effective control of the corporation, or a change in the ownership of a substantial portion of the assets of the corporation. Reg. § 1.409A-3(i)(5)(i).

apply to partnerships.[2621] Using principles that apply to other forms of performance-based compensation, Code § 2701 should not apply to compensation awarded upon change of control.

II.M.4.e. Issuing Stock to an Employee

II.M.4.e.i. Issuing Stock to an Employee - Generally

For the fundamental rules underlying this part II.M.4.e.i, see part II.M.4.b.i Income Tax Recognition Timing Rules re Equity Incentives.

An employee who receives stock as compensation for services must pay tax on that stock.[2622]

Rev. Proc. 2012-29 explains the consequences of nonvested or nontransferable stock:[2623]

> Section 83(a) provides generally that if, in connection with the performance of services, property is transferred to any person other than the person for whom such services are performed, the excess of the fair market value of the property (determined without regard to any restriction other than a restriction which by its terms will never lapse) as of the first time that the transferee's rights in the property are transferable or are not subject to a substantial risk of forfeiture, whichever occurs earlier, over the amount (if any) paid for the property is included in the service provider's gross income for the taxable year which includes such time.[2624]
>
> Under § 1.83-3(f) of the Income Tax Regulations, property is transferred in connection with the performance of services if it is transferred to an employee or independent contractor (or beneficiary thereof) in recognition of the performance of services, or refraining from performance of services. The existence of other persons entitled to buy stock on the same terms and conditions as an employee, whether pursuant to a public or private offering may, however, indicate that in such circumstance a transfer to the employee is not in recognition of the performance of, or refraining from performance of, services. The transfer of property is subject to § 83 whether such transfer is in respect of past, present, or future services.[2625]
>
> Section 83(b) and § 1.83-2(a) permit the service provider to elect to include in gross income the excess (if any) of the fair market value of the property at the

---

[2621] Third paragraph of Part VI.E. to the Preamble to the Prop. Regs., allowing taxpayers to rely on similar rules until further guidance is issued for a partnership setting. This continues to apply under section III.G. of the preamble to the final regulations.
[2622] Code § 83. Letter Ruling 201405005 is a good example of a simultaneous exit of two owners and entrance of key employees with restricted stock in an S corporation.
[2623] Footnotes below are mine and are not in the Rev Proc.
[2624] Rev. Proc. 2012-29, § 2.01.
[2625] Rev. Proc. 2012-29, § 2.02.

time of transfer over the amount (if any) paid for the property, as compensation for services.[2626]

Under § 83(e)(3) and § 1.83-7(b), § 83 does not apply to the transfer of an option without a readily ascertainable fair market value at the time the option is granted. As a result, a § 83(b) election may only be made with respect to the transfer of an option that has a readily ascertainable fair market value (as defined in § 1.83-7(b)), at the time the option is granted and that is substantially nonvested (as defined in § 1.83-3(b)). If substantially nonvested property is received upon exercise of an option without a readily ascertainable fair market value at grant, a service provider is permitted to make a § 83(b) election with respect to the transfer of such property upon the exercise of the option.[2627]

Under § 1.83-2(a), if property is transferred in connection with the performance of services, the person performing such services may elect to include in gross income under § 83(b) the excess (if any) of the fair market value of the property at the time of transfer (determined without regard to any lapse restriction, as defined in § 1.83-3(i)) over the amount (if any) paid for such property, as compensation for services. If this election is made, the substantial vesting rules of § 83(a) and the regulations thereunder do not apply with respect to such property, and except as otherwise provided in § 83(d)(2) and the regulations thereunder (relating to the cancellation of a nonlapse restriction), any subsequent appreciation in the value of the property is not taxable as compensation to the person who performed the services. Thus, the value of property with respect to which this election is made is included in gross income as of the time of transfer, even though such property is substantially nonvested (as defined in § 1.83-3(b)) at the time of transfer, and no compensation will be includible in gross income when such property becomes substantially vested.[2628]

In computing the gain or loss from a subsequent sale or exchange of property for which a § 83(b) election was filed, § 1.83-2(a) provides that the basis of such property shall be the amount paid for the property (if any) increased by the amount included in gross income under § 83(b).[2629]

If property for which a § 83(b) election was filed is forfeited while substantially nonvested, § 83(b)(1) provides that no deduction shall be allowed with respect to such forfeiture. Section 1.83-2(a) further provides that such forfeiture shall be treated as a sale or exchange upon which there is realized a loss equal to the excess (if any) of (1) the amount paid (if any) for such property, over (2) the amount realized (if any) upon such forfeiture. If such property is a capital asset in the hands of the taxpayer, such loss shall be a capital loss.[2630]

[2626] Rev. Proc. 2012-29, § 2.03.
[2627] Rev. Proc. 2012-29, § 2.04.
[2628] Rev. Proc. 2012-29, § 4.01.
[2629] Rev. Proc. 2012-29, § 4.02.
[2630] Rev. Proc. 2012-29, § 4.03.

The Rev. Proc. provided a sample form for making a Code § 83(b) election.[2631]

When stock is transferred to the employee that is subject to a substantial risk of forfeiture[2632] and is not transferable,[2633] the employee recognizes income and treated as owning the stock if the employee makes a Code § 83(b) election.[2634] Conversely, if the corporation awards nonvested stock, then the employee does not recognize compensation until the stock vests, unless the employee makes a Code § 83(b) election no later than 30 days after the award.[2635]

Similarly, in determining who is a shareholder of an S corporation: Stock that is issued in connection with the performance of services[2636] and that is substantially nonvested[2637] is not treated as outstanding stock of the corporation, and the holder of that stock is not treated as a shareholder solely by reason of holding the stock, unless the holder makes a Code § 83(b) election with respect to the stock.[2638] In the event of such an election, the stock is treated as outstanding stock of the corporation, and the holder of the stock is treated as a shareholder for purposes of subchapter S.[2639] Substantially nonvested stock with respect to which a Code § 83(b) election has been made is taken into account in determining whether a corporation has a second class of stock, and such stock is not treated as a second class of stock if the stock confers rights to distribution and liquidation proceeds that are identical,[2640] to the rights conferred by the other outstanding shares of stock.[2641] See part II.A.2.j Single Class of Stock Rules, especially part II.A.2.j.iv Providing Equity-Type Incentives without Violating the Single Class of Stock Rules.

Rev Proc. 2012-29, Section 5, provides various examples, the tax results of which "do not depend on whether or not the stock transferred to the employee is traded on an established securities market":

2631 Reg. § 1.83-2(e) sets forth the requirements for the election's contents, and Rev. Proc. 2012-29 provides a way to satisfy those requirements.
2632 Within the meaning of Code § 83(c)(1).
2633 Within the meaning of Code § 83(c)(2).
2634 Rev. Rul. 83-22.
2635 Code § 83(b)(2). Letter Rulings 201405008 and 201528001 excused failure to file with the taxpayer's individual tax return a copy of a timely Code § 83(b) election; T.D. 9779 finalized without changes REG-135524-14, Property Transferred in Connection with the Performance of Services, 7/16/2015, amending Reg. § 1.83-2(c) to remove this requirement, effective for property transferred on or after January 1, 2016, the latter per Reg. § 1.83-2(g). T.D. 9779 also revoked Rev. Proc. 2012-29, in part, to the extent it requires, inconsistent with the final regulations, a taxpayer to submit a copy of a Code § 83(b) election with his or her income tax return. Note that Code § 83(b)(2) requires only the initial filing to make the election; the requirement to file the election with one's individual return appeared to be merely an administrative requirement for preparing a complete return – a requirement that the IRS appears to have abandoned as of January 1, 2015, although this apparent abandonment for 2015 was done in a peculiar way.
2636 Within the meaning of Reg. § 1.83-3(f).
2637 Within the meaning of Reg. § 1.83-3(b).
2638 Reg. § 1.1361-1(b)(3).
2639 Reg. § 1.1361-1(b)(3).
2640 Within the meaning of Reg. § 1.1361-1(*l*)(1).
2641 Reg. § 1.1361-1(*l*)(3).

Example 1. Company A is a privately held corporation and no stock in Company A is traded on an established securities market. On April 1, 2012, in connection with the performance of services, Company A transfers to E, its employee, 25,000 shares of substantially nonvested stock in Company A. In exchange for the stock, E pays Company A $25,000, representing the fair market value of the shares at the time of the transfer. The restricted stock agreement provides that if E ceases to provide services to Company A as an employee prior to April 1, 2014, Company A will repurchase the stock from E for the lesser of the then current fair market value or the original purchase price of $25,000. E's ownership of the 25,000 shares of stock will not be treated as substantially vested until April 1, 2014 and will only be treated as substantially vested if E continues to provide services to Company A as an employee until April 1, 2014. On April 1, 2012, E makes a valid election under § 83(b) with respect to the 25,000 shares of Company A stock. Because the excess of the fair market value of the property ($25,000) over the amount E paid for the property ($25,000) is $0, E includes $0 in gross income for 2012 as a result of the stock transfer and related § 83(b) election. The 25,000 shares of stock become substantially vested on April 1, 2014 when the fair market value of the shares is $40,000. No compensation is includible in E's gross income when the shares become substantially vested on April 1, 2014. In 2015, E sells the stock for $60,000. As a result of the sale, E realizes $35,000 ($60,000 sale price - $25,000 basis) of gain, which is a capital gain.

Example 2. The facts are the same as in Example 1 above, except that E does not make an election under § 83(b). Under § 83(a), E includes $0 in gross income in 2012 as a result of the transfer of stock from Company A because the stock is not substantially vested. When the shares become substantially vested on April 1, 2014, E includes $15,000 ($40,000 fair market value less $25,000 purchase price) of compensation in gross income. E's basis in the stock as of April 1, 2014 is $40,000 ($25,000 paid for the stock and $15,000 included in income under § 83(a)). As a result of the 2015 sale of the stock for $60,000, E realizes $20,000 ($60,000 sale price - $40,000 basis) of gain, which is a capital gain.

Example 3. The facts are the same as in Example 1 above, except that E terminates employment with Company A on August 1, 2013 before the shares become substantially vested. Because the excess of the fair market value of the property ($25,000) over the amount E paid for the property ($25,000) is $0, E includes $0 in gross income for 2012 as a result of the stock transfer and related § 83(b) election. When E terminates employment on August 1, 2013, the fair market value of the stock is $30,000 but Company A purchases the stock from E for $25,000 pursuant to the terms of the restricted stock agreement. As a result of the 2013 sale of the stock for $25,000, E realizes $0 in gain ($25,000 sale price - $25,000 basis).

Example 4. Company B is a publicly held corporation and Company B stock is traded on an established securities market. On April 1, 2012, in connection with the performance of services, Company B transfers to F, its employee, 25,000 shares of substantially nonvested stock in Company B. At the time of the transfer, the shares have an aggregate fair market value of $25,000. F is not required to pay Company B any consideration in exchange for the stock. The restricted stock agreement provides that if F ceases to provide services to Company B as an employee prior to April 1, 2014, F will forfeit the stock back to Company B. F's ownership of the 25,000 shares of stock will not be treated as substantially vested until April 1, 2014 and will only be treated as substantially vested if F continues to provide services to Company B as an employee until April 1, 2014. On April 1, 2012, F makes a valid election under § 83(b) with respect to the 25,000 shares of Company B stock. Because the excess of the fair market value of the property ($25,000) over the amount F paid for the property ($0) is $25,000, F includes $25,000 of compensation in gross income for 2012 as a result of the stock transfer and related § 83(b) election. The 25,000 shares of stock become substantially vested on April 1, 2014 when the fair market value of the shares is $40,000. No compensation is includible in F's gross income when the shares become substantially vested on April 1, 2014. In 2015, F sells the stock for $60,000. As a result of the sale, F realizes $35,000 ($60,000 sale price - $25,000 basis) in gain, which is a capital gain.

Example 5. The facts are the same as in Example 4 above, except that F does not make an election under § 83(b). Under § 83(a), F includes $0 in gross income in 2012 as a result of the transfer of stock from Company B because the stock is not substantially vested. When the shares become substantially vested on April 1, 2014, F includes $40,000 ($40,000 fair market value less $0 purchase price) of compensation in gross income. F's basis in the stock as of April 1, 2014 is $40,000 ($0 paid for the stock and $40,000 included in income under § 83(a)). As a result of the 2015 sale of the stock for $60,000, F realizes $20,000 ($60,000 sale price - $40,000 basis) of gain, which is a capital gain.

Example 6. The facts are the same as in Example 4 above, except that F terminates employment with Company B on August 1, 2013 and forfeits the shares before the shares become substantially vested. Because the excess of the fair market value of the property ($25,000) over the amount F paid for the property ($0) is $25,000, F includes $25,000 of compensation in gross income for 2012 as a result of the stock transfer and related § 83(b) election. In the year F terminates employment, F forfeits the 25,000 shares back to Company B and such forfeiture is treated as a sale of the shares in exchange for no consideration. Pursuant to § 1.83-2(a), F realizes no loss as the result of such sale. F is not entitled to a deduction or credit for taxes paid as the result of filing the § 83(b) election or the subsequent forfeiture of the property.

Note the unfairness in Example 6: F included an amount in income for stock F received but got no deduction – not even a capital loss – when F forfeited the stock with respect to that amount included (but would have received a deduction for any out-of-pocket purchase price)[2642]. Presumably, if F does not receive a deduction, Company B will not recognize income on account of F forfeiting the shares. Note that the result would have been different if Company B had separately bonused $25,000 cash and F had paid $25,000 cash for the stock, so long as the bonus and the payment were not tied together.

[2642] Although the Example cited a regulation, Code § 83(b)(1) mandates the position the regulation takes.

Often the corporation will "gross-up" the employee's pay by paying the employee's taxes on that compensation. If the corporation and employee are in the same income tax bracket, this arrangement will not cost anyone any income tax. For example, suppose everyone is in a 40% income tax bracket (federal and state) and $100 of stock is issued:

- The corporation receives $167 compensation deduction, consisting of $100 stock and $67 income tax withholding.
- The corporation saves $67 income tax (40% of $167). That $67 income tax savings offsets the $67 cash out-of-pocket for the withholding. Therefore, the corporation has no net cash expenditure.
- The employee incurs $67 of income tax liability (40% of the $167 compensation income). However, the $67 income tax withholding offsets that liability.
- Note that the above analysis ignores FICA.
- Note that lower corporate rates and the Code § 199a qualified business income deduciton[2643] may make the employer's deduction worth less than the income tax that the servce provider.
- For an S corporation, the compensation deduction benefits the shareholders, not the corporation, although the corporation indirectly benefits by reducing the need to make distributions to pay the shareholders' income tax. Note the new shareholder will benefit from this deduction, because all items are allocated pro rata, per share per day owned regardless of the timing of ownership, except to the extent that an election is made to close the books as of the date of the transfer.[2644] The election to close the books can be made only if issuance is at least 25% of the previously outstanding stock to one or more new shareholders.[2645]

Consider timing the issuance to coincide with taxable years in which the employer has sufficient ordinary income to absorb the deduction and provide a tax benefit at a sufficiently high income tax rate. Note also that, if an S corporation issues stock to its key employees in the year of the sale of the business, the deduction (if high enough) might wind up offsetting capital gain income, which is taxed at a lower rate – often too low to take advantage of the income tax dynamics described above.

Compare these concepts to the income tax dynamics of part II.Q.1.a, Contrasting Ordinary Income and Capital Scenarios on Value in Excess of Basis, and more fully explored in part II.Q.1.d, Nonqualified Deferred Compensation.

Nonvested stock options provide the least complication when the exercise price is no less than the amount of the underlying stock's value. This approach avoids the forfeiture

---

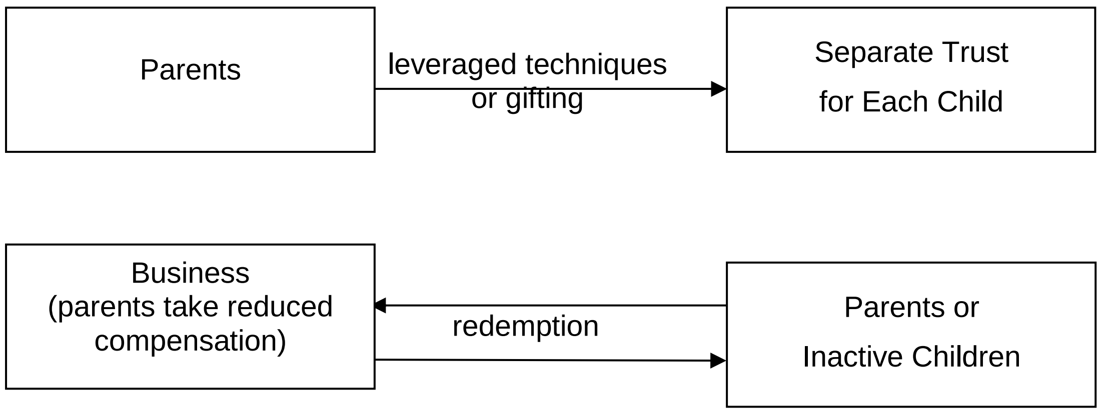
[2643] See part II.E.1.c Code § 199A Pass-Through Deduction Qualified Business Income.
[2644] See part III.B.2.j Tax Allocations upon Change of Interest, particularly III.B.2.j.ii Tax Allocations on the Transfer of Stock in an S Corporation.
[2645] Reg. § 1.1361-1(g)(2)(i)(C).

described above. It also avoids the need to comply with the restrictions that Code § 409 imposes on nonqualified deferred compensation.[2646]

If an employee is upset about stock being diluted when other investors enter and the buyer pays the employee the amount necessary to make up for the dilution, the payments in excess of a pro-rata purchase price that the buyer designates as being compensation is taxed as such.[2647]

Also, a corporation cannot treat a person as a shareholder with the same rights as the other shareholder and then claim that the stock was not yet vested to try to obtain a deduction at a later time when the stock was more valuable.[2648]

II.M.4.e.ii. Succession Planning Using Redemptions When Parent is Living



Leveraged Techniques of Gifting

The first chart represents the concept that leveraged techniques, such as GRATs and sales to irrevocable grantor trusts, result in all of the next generation having an equal interest in the business. See part III.B.1, Transfers During Life.

This might be through one trust that later splits through the trustee's power to divide or a family agreement or through separate trusts created from inception.

Reducing or Eliminating Parents or Inactive Owners

Inactive owners generally wish to maximize their return through distributions and by keeping compensation down.

Active owners typically wish to reinvest earnings to grow the business and wish to have incentive compensation.

[2646] See footnote 2682.

[2647] *Brinkley v. Commissioner*, T.C. Memo. 2014-227, *aff'd* 808 F.3d 657 (5th Cir. 2015) (penalties assessed for the manner in which the taxpayer engaged in self-help merely through tax return positions rather than by negotiating a better deal with the company).

[2648] *Qinetiq U.S. Holdings, Inc. and Subsidiaries v. Commissioner*, T.C. Memo. 2015-123, *aff'd* 119 A.F.T.R.2d 2017-330 (4th Cir. 1/6/2017). See part II.M.4.b When is an Award or Transfer to an Employee Includible in the Employee's Income.

The business entity might redeem the inactive owners to minimize future conflict.

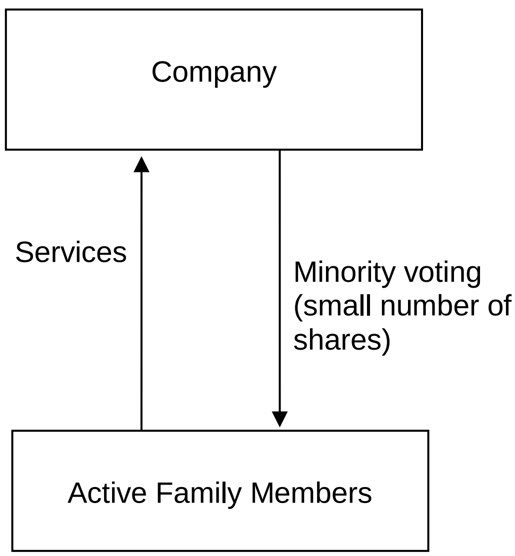
If the older generation is still working in the business, then the older generation might agree to take less compensation. This might have income tax consequences to partnerships[2649] or S corporations,[2650] but it would not have gift tax consequences.

If the entity is an S corporation, then a partial redemption that the tax law treats as a distribution rather than a redemption might actually be favorable if it can be made out of AAA. See part II.Q.7.b Redemptions or Distributions Involving S Corporations.

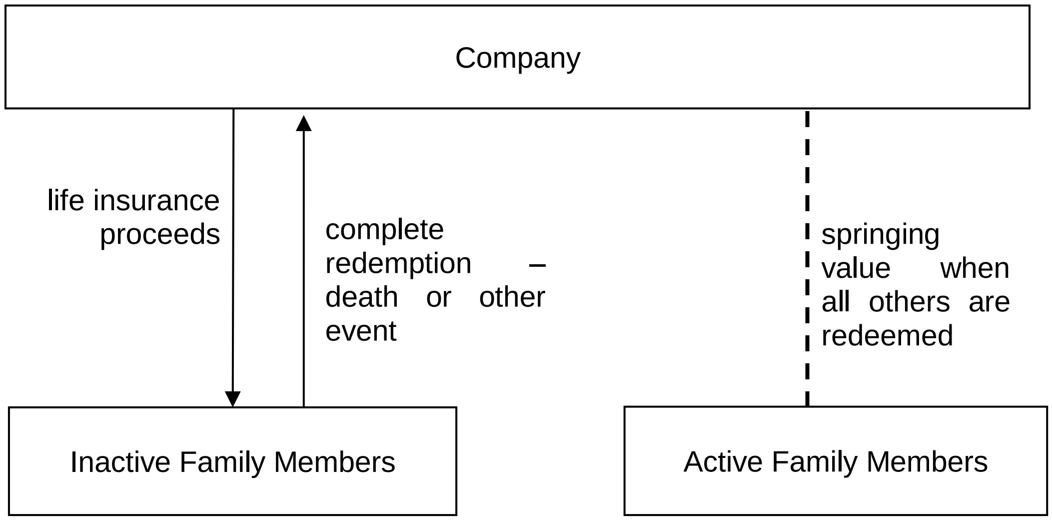
The corporation might use a promissory note to redeem a parent's interest in a corporation.[2651]

II.M.4.e.iii. Succession Planning Using Redemptions Funded by Life Insurance

Consider the following business succession strategy:



[2649] Code § 704(e).
[2650] Code § 1366(e).
[2651] Letter Ruling 9408018.



From a tax perspective, this structure can help solve the problem of inactive owners want to maintain their equity position, but key employees need entrepreneurial incentive to run and grow the business.

Below are some issues:

1. If a C corporation, make an S election. This will enable the profits to be distributed to the inactive owners using only one level of tax.

2. Grant incentive compensation to key employees based on formula.

3. Recapitalize into voting and nonvoting, for example, by issuing 19 shares of nonvoting for every share of voting stock; a similar idea would apply to an LLC or other entity taxed as a partnership.

4. Issue voting stock to key employees as compensation for services so that:

    - Key employees and inactive owners have an appropriate balance of voting power.

    - Key employees receive compensation increases or bonuses only if part of the agreements made when restructuring or if approved by inactive owners. Similarly, key employee compensation decreases only if part of the agreements made when restructuring or if approved by key employees.

    - Distributions are made according to a set formula and can be increased only if approved by key employees. Similarly, distributions decrease only if part of the agreements made when restructuring or if approved by inactive owners.

5. Life insurance funds a buy-sell agreement.

    - When all of the inactive owners' interests are redeemed, the only ownership remaining is held by the key employees. Thus, their small ownership suddenly blossoms into sole ownership.

- If a cross-purchase (each owner holds insurance on the lives of the other owners and uses the proceeds to buy stock at death) is used rather than a redemption, then the key employees' ownership might increase more quickly, depending on how the cross-purchase is structured.

- A cross-purchase is generally better from a tax perspective.

  - It is less risky from an estate tax perspective. Redemption agreements typically exclude the life insurance from the calculated purchase price. The IRS might be able to persuade a court to disregard that exclusion and count the life insurance as part of the business' value for estate tax purposes. See II.Q.4.h Establishing Estate Tax Values.

  - C corporations might be subjected to alternative minimum tax on the death benefit.

  - If a redemption is used, S corporations and partnerships might experience income tax basis distortions,[2652] and S corporations that have significant accumulated E&P from when they were C corporations would lose AAA.[2653]

  - However, if one owner leaves the business and a policy (or interest in a policy) is transferred to another owner, beware of the transfer-for-value rules, which might subject the death benefit to income tax.[2654]

- Cross-purchases and redemptions entail various nontax risks. Neither is perfect. Probably the safest method, which is a little complicated, is the life insurance LLC:

  - The owners of the main company are also members of the LLC. Each owner is specially allocated the responsibility for paying premiums on the other owners and the benefit of the associated life insurance death benefit.

  - A corporate trustee (or other independent deep pocket) serves as the manager and may be removed only by consent of all the members.

  - The manager's only job is to hold policies, collect premiums, and hold proceeds until all parties agree on implementation of the buy-sell agreement.

  - This avoids various business and tax risks, including the transfer for value rule that might apply when owners come and go.

  - For details, see part II.Q.4.i Life Insurance LLC.

[2652] See part II.Q.7.b.iii S Corporation Receipt of Life Insurance Proceeds, which discusses the impact on S corporations, but the same principles would seem to apply to partnerships.
[2653] Part II.Q.7.b.iv S Corporation Distributions of, or Redemptions Using, Life Insurance Proceeds. Although life insurance adds to each shareholder's stock basis, it adds to the other adjustments account rather than to AAA.
[2654] Code § 101(a)(2).

If one expects to sell a business interest for all cash in a few years and would like to defer capital gain on the sale of a business interest, consider selling the business interest in an installment sale to a nongrantor trust. The note might be interest-only for a few years, with principal payments beginning some time after the business interest is expected to be sold. The trust receives basis for the full amount of the promissory and can sell the business interest tax-free to the extent of that basis.

Similar principles apply to the sale of land or other property that is not depreciable or amortizable.

Potential pitfalls include the following:

- If the trust is a related person (which usually is the case) and it re-sells the business interest within two years, the original seller's deferred gain is accelerated.

- The original seller's death will not generate a basis step-up in the note. If the original seller had simply held the business interest until death, part or all of the gain would be eliminated by basis step-up. Consider buying term insurance against the risk of loss of the financial benefit of the basis step-up.

- Be sensitive to possible acceleration of the deferred gain if the original seller later transfers the installment note, including by gift (or transfer to or from a nongrantor trust), or pledges the note.

- Beware of the possible need to pay interest on the deferred tax liability if the sale exceeds $5 million.[2655]

- The part of the gain on the sale of a partnership interest attributable to "hot assets" is not eligible for installment sale treatment.

- The direct or indirect sale of depreciable or amortizable assets to a related party (the nongrantor trust) might trigger ordinary income tax.

II.M.4.f. Issuing a Profits Interest to an Employee

II.M.4.f.i. Overview of Profits Interest; Contrast with Code § 409A

Issuing a profits interest usually makes more sense than issuing stock to the employee, in that a service provider usually is interested more in sharing the fruits of the business' future success than in buying its existing assets. Awarding a profits interest is also less expensive, because it does not require buying any of the business' current value.

Code § 409A does not apply to the issuance of a profits interest.[2656] The profits interest could turn into golden handcuffs that avoid the strict rules on timing that Code § 409A

[2655] Code § 453A(b)(2).

[2656] Notice 2005-1, Q&A 7 (third sentence). For a general discussion of the broader topic, see, The Proper Tax Treatment of the Transfer of a Compensatory Partnership Interest and also Finding the Right Balance: A Critical Analysis of the Major Proposals to Reform the Taxation of Carried Interests in Private Equity, both in *Tax Lawyer*, Vol. 62, No. 1 (Fall 2008). This Notice continued to apply under section III.G of the preamble to the final regulations under Code § 409A imposes. For example, a partnership distributes enough of the service partner's share of profits to pay the service partner's income taxes. The rest of the service partner's share of profits is accumulated in the service partner's capital account and may be subject to any timing rules the parties choose. Because the service partner has already paid income tax on this accumulated income, this deferral does not offend the principles of Code § 409A, which are concerned about the timing of taxation. For more on Code § 409A, see part II.M.4.d Introduction to Code § 409A Nonqualified Deferred Compensation Rules.

Profits interests have Code § 2701 consequences for family-controlled businesses, so the transferor either prepares to be treated as making a gift of the capital account that would ordinarily be associated with the profits interest or retains preferred payments that help reduce the impact of Code § 2701. For a discussion of how Code § 2701 might apply, see III.B.7.c Code § 2701 Interaction with Income Tax Planning.

---

and still applies under the final regulations pursuant to Section 4 of Notice 2007-86. Reg. § 1.409A-1(b)(7) has the following text: Arrangements between partnerships and partners. [Reserved.] The preamble to the final regulations, T.D. 9321, provides:

> (G.) Arrangements Between Partnerships and Partners
>
> The proposed regulations did not address the application of section 409A to arrangements between partnerships and partners, and these final regulations also do not address such arrangements. The statute and the legislative history of section 409A do not specifically address arrangements between partnerships and partners providing services to a partnership and do not explicitly exclude such arrangements from the application of section 409A. Commentators raised a number of issues, relating both to the scope of the arrangements subject to section 409A and the coordination of the provisions of subchapter K and section 409A with respect to those arrangements that are subject to section 409A. The Treasury Department and the IRS are continuing to analyze the issues raised in this area. Notice 2005-1, Q&A-7 provides interim guidance regarding the application of section 409A to arrangements between partnerships and partners. Until further guidance is issued, taxpayers may continue to rely on Notice 2005-1, Q&A-7 and sections II.E. and VI.E. of the preamble to the proposed regulations.
>
> Notice 2005-1, Q&A-7 provided that until further guidance is issued for purposes of section 409A, taxpayers may treat the issuance of a partnership interest (including a profits interest) or an option to purchase a partnership interest, granted in connection with the performance of services under the same principles that govern the issuance of stock. For this purpose, taxpayers may apply the principles applicable to stock options or stock appreciation rights under these final regulations, as effective and applicable, to equivalent rights with respect to partnership interests.
>
> Taxpayers also may continue to rely upon the explanation in the preamble to the proposed regulations regarding the application of section 409A to guaranteed payments for services described in section 707(c). As stated in that preamble, until further guidance is issued, section 409A will apply to guaranteed payments described in section 707(c) (and rights to receive such guaranteed payments in the future), only in cases where the guaranteed payment is for services and the partner providing services does not include the payment in income by the 15th day of the third month following the end of the taxable year of the partner in which the partner obtained a legally binding right to the guaranteed payment or, if later, the taxable year in which the right to the guaranteed payment is first no longer subject to a substantial risk of forfeiture.

Also, receiving a profits interest causes the service provider to be taxed as a partner for all of that person's compensation, because bona fide members of a partnership are not employees for tax purposes.[2657]

II.M.4.f.ii. Tax Effects of Profits Interests

Below we discuss that issuing a profits interest generally does not have a tax consequence.

Then we discuss that certain sales of compensatory partnership interests are recharacterized from long-term to short-term capital gains.

II.M.4.f.ii.(a). Tax Effects of Issuing a Profits Interest

Under Rev. Proc. 93-27, if a person receives a profits interest[2658] for the provision of services to or for the benefit of a partnership in a partner capacity or in anticipation of

---

[2657] See note 438. For self-employment tax on guaranteed payments, see text accompanying notes 2403-2404.

[2658] Under the Rev. Proc., a profits interest is a partnership interest other than a capital interest. A capital interest is an interest that would give the holder a share of the proceeds if the partnership's assets were sold at fair market value and then the proceeds were distributed in a complete liquidation of the partnership. This determination generally is made at the time of receipt of the partnership interest. For the rules on revaluing partnership assets and adjusting capital accounts when that occurs, see part II.C.7 Maintaining Capital Accounts (And Be Wary of "Tax Basis" Capital Accounts), especially fn. 422.

See also *Mark IV Pictures, Inc. v. Commissioner*, T.C. Memo. 1990-571, which held:

> Deciding whether a partner's interest in a partnership is a capital interest, rather than a mere profits interest, turns on whether that partner has the right to receive a share of the partnership's assets upon a hypothetical winding up and liquidation immediately following acquisition of the interest, rather than the mere right to share in future partnership earnings or profits. Here, a fair reading of paragraphs 2.4 and 9.2 of the Articles indicates that the general partners had the *right to receive* a specified share of the partnerships' liquidation proceeds (assets). Thus, even if no partnership proceeds remained to be distributed to the general partners after distributing the liquidating proceeds in accordance with section 545.42, they nevertheless had the *right to receive* a share of the partnerships' assets.
>
> Based on the foregoing, we conclude that the general partners received a capital interest in their respective limited partnerships. See sec. 1.721-1(b)(1), Income Tax Regs.

Reg. § 1.721-1(b)(1) provides:

> Normally, under local law, each partner is entitled to be repaid his contributions of money or other property to the partnership (at the value placed upon such property by the partnership at the time of the contribution) whether made at the formation of the partnership or subsequent thereto. To the extent that any of the partners gives up any part of his right to be repaid his contributions (as distinguished from a share in partnership profits) in favor of another partner as compensation for services (or in satisfaction of an obligation), section 721 does not apply. The value of an interest in such partnership capital so transferred to a partner as compensation for services constitutes income to the partner under section 61. The amount of such income is the fair market value of the interest in capital so transferred, either at the time the transfer is made for past services, or at the time the services have been rendered where the transfer is conditioned on the completion of the transferee's future services….

being a partner, generally the IRS will not treat the receipt of such an interest as a taxable event for the partner or the partnership. However, that rule does not apply:

(1) If the profits interest relates to a substantially certain and predictable stream of income from partnership assets, such as income from high-quality debt securities or a high-quality net lease;

(2) If within two years of receipt, the partner disposes of the profits interest; or

(3) If the profits interest is a limited partnership interest in a "publicly traded partnership" within the meaning of Code § 7704(b).

If Rev. Proc. 93-27 applies, the profits interest is treated as a capital asset when the service provider sells it.

Rev. Proc. 2001-43 applies Rev. Proc. 93-27 to the grant of a partnership profits interest that is substantially nonvested for the provision of services to or for the benefit of the partnership. Under Section 4 of Rev. Proc. 2001-43, the service provider will be treated as receiving the interest on the date of its grant, and a Code § 83(b) election will not be required, if:

.01 The partnership and the service provider treat the service provider as the owner of the partnership interest from the date of its grant and the service provider takes into account the distributive share of partnership income, gain, loss, deduction, and credit associated with that interest in computing the service provider's income tax liability for the entire period during which the service provider has the interest;

.02 Upon the grant of the interest or at the time that the interest becomes substantially vested, neither the partnership nor any of the partners deducts any amount (as wages, compensation, or otherwise) for the fair market value of the interest; and

.03 All other conditions of Rev. Proc. 93-27 are satisfied.

If Rev. Proc. 2001-43 does not apply to the grant of a substantially nonvested partnership profits interest and if case law[2659] does not provide otherwise, then the service provider recognizes ordinary income (and the partnership is deemed to have paid compensation) when the profits interest vests. The holding period for a later sale of the profits interest would be based on the date of vesting, rather than the date of grant.

[2659] *Diamond v. Commissioner*, 56 T.C. 530 (1971 reviewed decision) (taxing service partner on issuance of profits interest), *aff'd* 492 F.2d 286 (7th Cir. 1974); *Campbell v. Commissioner*, T.C. Memo. 1990-162 (finding taxation on issuance), *rev'd* 943 F.2d 815 (8th Cir. 1991) (finding no taxation on issuance); *St. John v. U.S.*, 53 A.F.T.R.2d 84-718 (C.D. Ill. 1983) (no taxation because partnership's success was undetermined and speculative); *Kenroy, Inc. v. Commissioner,* T.C. Memo. 1984-232 (no taxation because partnership's liabilities exceeded assets). The Eighth Circuit in *Campbell* cited an earlier version (that has since been updated) of McKee, Nelson & Whitmire, ¶5.02 Distinguishing Taxable From Nontaxable Service-Connected Transfers of Partnership Interests: Is There a Difference Between Capital and Profits Interests? *Federal Taxation of Partnerships & Partners* (WG&L), and of Willis & Postlewaite, ¶4.06 Partnership Profits Interest Received in Exchange for Services, *Partnership Taxation*.

The IRS has proposed regulations[2660] that would change these rules for profits interests, effective only when the regulations are finalized. Under the proposed regulations, a service provider would be required to recognize income upon receipt of a vested profits interest. A Code § 83(b) election would be required to treat a substantially nonvested profits interest as if it were vested. At any rate, determining the value of the profits interest generally would require an appraisal and complicate future accounting on many levels. IRS Notice 2005-43 proposes a Rev. Proc. to allow taxpayers to elect to determine the value based on the awarded partnership interest's liquidation value determined immediately after the grant of the partnership interest. If the partnership interest is merely a profits interest, the liquidation value would be zero. The proposed Rev. Proc. would supersede Rev. Proc. 93-27 and Rev. Proc. 2001-43; however, until the proposed Rev. Proc. is finalized, taxpayers may continue to rely on Rev. Proc. 93-27 and Rev. Proc. 2001-43.

Furthermore, the preamble to subsequent proposed regulations[2661] announced:

> The Treasury Department and the IRS are aware of transactions in which one party provides services and another party receives a seemingly associated allocation and distribution of partnership income or gain. For example, a management company that provides services to a fund in exchange for a fee may waive that fee, while a party related to the management company receives an interest in future partnership profits the value of which approximates the amount of the waived fee. The Treasury Department and the IRS have determined that Rev. Proc. 93-27 does not apply to such transactions because they would not satisfy the requirement that receipt of an interest in partnership profits be for the provision of services to or for the benefit of the partnership in a partner capacity or in anticipation of being a partner, and because the service provider would effectively have disposed of the partnership interest (through a constructive transfer to the related party) within two years of receipt.

[2660] REG-105346-03, proposing changes to Reg. §§1.83-3, 1.83-6, 1.704-1, 1.706-3, 1.707-1, 1.721-1, and 1.761-1. Over the past several years, various proposals to tax hedge fund managers on the sale of their profits interests have had a chilling effect on the progress of these proposed regulations, particularly since the safeguards needed to make those proposals effective would cause radical changes in this area of tax law, well beyond the scope of taxing hedge fund managers.

[2661] REG-115452-14 (7/22/2015), which continued:

> Further, the Treasury Department and the IRS plan to issue a revenue procedure providing an additional exception to the safe harbor in Rev. Proc. 93-27 in conjunction with the publication of these regulations in final form. The additional exception will apply to a profits interest issued in conjunction with a partner forgoing payment of an amount that is substantially fixed (including a substantially fixed amount determined by formula, such as a fee based on a percentage of partner capital commitments) for the performance of services, including a guaranteed payment under section 707(c) or a payment in a non-partner capacity under section 707(a).
>
> In conjunction with the issuance of proposed regulations (REG-105346-03; 70 FR 29675-01; 2005-1 C.B. 1244) relating to the tax treatment of certain transfers of partnership equity in connection with the performance of services, the Treasury Department and the IRS issued Notice 2005-43, 2005-24 I.R.B. 1221. Notice 2005-43 includes a proposed revenue procedure regarding partnership interests transferred in connection with the performance of services. In the event that the proposed revenue procedure provided for in Notice 2005-43 is finalized, it will include the additional exception referenced.

Returning to the law when this portion was written, should one file a Code § 83(b) election, to preserve future capital gain treatment on the profits interest holder's future sale of the profits interest due to any noncompliance with the Revenue Procedures, either by the structure or by subsequent events within two years after the grant? If the profits interest's issuance is determined to be like the issuance a capital interest (for example, if it is determined that the book-up[2662] on issuance of the profits interest undervalued the partnership's assets), then filing a Code § 83(b) election would trigger income on issuance. Consider, however, that the tax economics if capital gain treatment were disallowed are not necessarily so bad, if certain tax indemnification agreements are in place:

Example

Suppose the basis at the time of the subsequent sale is zero (all profits have been paid out), the fair market value is $100x, the federal and state capital rate is 20%, and the federal and state income tax rate is 40%.

If the profits interest is given capital gain treatment, the holder of the profits interest pays $20x tax on the sale.

If the profits interest is deemed not to have been property until the sale (due to lack of vesting, etc.), then the following should occur:

- The holder receives $100x from the sale, which is deemed compensation income.
- The partners pay $67x withholding to the federal and state taxing authorities, covering the tax on the $100x and the $67x (40% of $167x is $67x). This is also deemed income to the holder of the profits interest.
- The partners deduct $167x compensation, saving $67x of tax, assuming they have basis for this deduction.
- The $67x tax savings to the partners pays for $67x withholding they paid.
- Except as described below, nobody pays anything out-of-pocket on the holder's receipt of the $100x sale proceeds.
- The partners pay capital gain tax on the sale proceeds they are deemed to have received.
- An appropriate adjustment needs to be made to the allocations set forth above so that the holder reimburses the partners for their capital gain tax paid on the sale, which capital gain tax the parties had originally assumed the holder would have paid.

[2662] See footnote 2577.

Articles explain some of the nuances and practical implications of profits interests[2663] and some prominent authors' reconsideration of their position that a taxable issuance of a profits interest might not be a big deal.[2664]

II.M.4.f.ii.(b). Certain Sales of Compensatory Partnership Interests Recharacterized from Long-Term to Short-Term Gains

Effective for taxable years beginning after December 31, 2017, special rules apply when a taxpayer transfers certain compensatory partnership interests, with surprising results when transferring to a related party.

Subject to exceptions, Code § 1061 targets an ""applicable partnership interest," which is:[2665]

> any interest in a partnership which, directly or indirectly, is transferred to (or is held by) the taxpayer in connection with the performance of substantial services by the taxpayer, or any other related person, in any applicable trade or business.

The House report, which was accepted by the Conference Committee, elaborated:

> It is intended that partnership interests shall not fail to be treated as transferred or held in connection with the performance of services merely because the taxpayer also made contributions to the partnership, and the Treasury Department is directed to provide guidance implementing this intent.

However, an "applicable partnership interest," does not include "an interest held by a person who is employed by another entity that is conducting a trade or business (other than an applicable trade or business) and only provides services to such other entity."[2666]

Before getting into which businesses are being targeted, let's focus on the type of equity interest being targeted. Code § 1061(c)(5) provides:

> *Exceptions*. The term "applicable partnership interest" shall not include-
>
> (A) any interest in a partnership directly or indirectly held by a corporation, or
>
> (B) any capital interest in the partnership which provides the taxpayer with a right to share in partnership capital commensurate with-
>
> (i) the amount of capital contributed (determined at the time of receipt of such partnership interest), or
>
> (ii) the value of such interest subject to tax under section 83 upon the receipt or vesting of such interest.

2663 Schippel, Should My CEO Be My Partner? A Practical Approach to Dealing with LLC and Partnership Equity Compensation, *TM Memorandum*, Vol. 53, No. 5 (2/27/2012).

2664 Banoff & Lipton's Shop Talk column, So You Received a Taxable Profits Interest-Maybe You *Should* Care! *Journal of Taxation* (2/2016), reconsidering their 11/2015 column.

2665 Code § 1061(c)(1).

2666 Code § 1061(c)(1).

Thus, if a corporation provides services and receives a partnership interest of any kind, Code § 1061 does not apply. The House report, which was accepted by the Conference Committee, elaborated:

> For example, if two corporations form a partnership to conduct a joint venture for developing and marketing a pharmaceutical product, the partnership interests held by the two corporations are not applicable partnership interests.

The other exception above is the right to share in partnership capital commensurate with the partner's capital contribution or the actually taxed value of services provided.[2667] The House report, which was accepted by the Conference Committee, elaborated:

> An applicable partnership interest does not include any capital interest in a partnership giving the taxpayer a right to share in partnership capital commensurate with the amount of capital contributed (as of the time the partnership interest was received), or commensurate with the value of the partnership interest that is taxed under section 83 on receipt or vesting of the partnership interest. For example, in the case of a partner who holds a capital interest in the partnership with respect to capital he or she contributed to the partnership, if the partnership agreement provides that the partner's share of partnership capital is commensurate with the amount of capital he or she contributed (as of the time the partnership interest was received) compared to total partnership capital, the partnership interest is not an applicable partnership interest to that extent.

Thus the provision is directly targeting nontaxable issuances of profits interests described in part II.M.4.f.ii.(a) Tax Effects of Issuing a Profits Interest. Consider, however what happens if the partnership is not a straight pro-rata deal. What if the partnership involves preferred returns? How about multiple tiers of preferred returns – commonly referred to as waterfalls? What does it mean for the right to share in partnership capital to be commensurate with the partner's capital contribution?

Now, on to the targeted businesses:

Code § 1061(c)(1) provides:

> *Applicable trade or business*. The term "applicable trade or business" means any activity conducted on a regular, continuous, and substantial basis which, regardless of whether the activity is conducted in one or more entities, consists, in whole or in part, of-
>
> (A) raising or returning capital, and
>
> (B) either-
>
> > (i) investing in (or disposing of) specified assets (or identifying specified assets for such investing or disposition), or

[2667] Code § 1061(c)(4).

(ii) developing specified assets.

"Specified asset" means securities,[2668] commodities,[2669] real estate held for rental or investment, cash or cash equivalents, options or derivative contracts with respect to any of the foregoing, and an interest in a partnership to the extent of the partnership's proportionate interest in any of the foregoing.[2670] The House report, which was accepted by the Conference Committee, elaborated:

> Developing specified assets takes place, for example, if it is represented to investors, lenders, regulators, or others that the value, price, or yield of a portfolio business may be enhanced or increased in connection with choices or actions of a service provider or of others acting in concert with or at the direction of a service provider. Services performed as an employee of an applicable trade or business are treated as performed in an applicable trade or business for purposes of this rule. Merely voting shares owned does not amount to development; for example, a mutual fund that merely votes proxies received with respect to shares of stock it holds is not engaged in development.
>
> *Specified assets*
>
> Under the provision, specified assets means securities (generally as defined under rules for mark-to-market accounting for securities dealers), commodities (as defined under rules for mark-to-market accounting for commodities dealers), real estate held for rental or investment, cash or cash equivalents, options or derivative contracts with respect to such securities, commodities, real estate, cash or cash equivalents, as well as an interest in a partnership to the extent of the partnership's proportionate interest in the foregoing. A security for this purpose means any (1) share of corporate stock, (2) partnership interest or beneficial ownership interest in a widely held or publicly traded partnership or trust, (3) note, bond, debenture, or other evidence of indebtedness, (4) interest rate, currency, or equity notional principal contract, (5) interest in, or derivative financial instrument in, any such security or any currency (regardless of whether section 1256 applies to the contract), and (6) position that is not such a security and is a hedge with respect to such a security and is clearly identified. A commodity for this purpose means any (1) commodity that is actively traded, (2) notional principal contract with respect to such a commodity, (3) interest in, or derivative financial instrument in, such a commodity or notional principal contract, or (4) position that is not such a commodity and is a hedge with respect to such a commodity and is clearly identified. For purposes of the provision, real estate held for rental or investment does not include, for example, real estate on which the holder operates an active farm.
>
> A partnership interest, for purposes of determining the proportionate interest of a partnership in any specified asset, includes any partnership interest that is not otherwise treated as a security for purposes of the provision (for example, an interest in a partnership that is not widely held or publicly traded). For example,

[2668] As defined in Code § 475(c)(2) without regard to its last sentence.
[2669] As defined in Code § 475(e)(2).
[2670] Code § 1061(c)(3).

assume that a hedge fund acquires an interest in an operating business conducted in the form of a non-publicly traded partnership that is not widely held; the partnership interest is a specified asset for purposes of the provision.

Suppose we have a compensatory partnership interest, that shares in capital disproportionately to the contribution, and a targeted business, all as described above, so that the taxpayer has an "applicable partnership interest." What are the consequences?

Code § 1061(a) treats as a short-term capital gain the excess, if any, of the taxpayer's (A) net long-term capital gain with respect to applicable partnership interests for a taxable year, over (B) the taxpayer's net long-term capital gain with respect to such interests for such taxable year computed by using a more-than-three-year holding period in determining whether a gain or loss is long-term.[2671] Thus, if the taxpayer's applicable partnership interests held for more than one year but not more than three years are sold at a net loss, Code § 1061(a) does not recharacterize the character of the loss. Here's how Code § 83 interacts with the holding period rule, according to the Conference Committee report:

> The conferees wish to clarify the interaction of section 83 with the provision's three-year holding requirement, which applies notwithstanding the rules of section 83 or any election in effect under section 83(b). Under the provision, the fact that an individual may have included an amount in income upon acquisition of the applicable partnership interest, or that an individual may have made a section 83(b) election with respect to an applicable partnership interest, does not change the three-year holding period requirement for long-term capital gain treatment with respect to the applicable partnership interest.

Explaining the exception to this rule in Code §§ 1061(b)[2672] and (c)(5),[2673] the House report, which was followed by the Conference Committee on this issue, said:

[2671] Code § 1061(a) provides:

> *In general*. If one or more applicable partnership interests are held by a taxpayer at any time during the taxable year, the excess (if any) of-
>
> (1) the taxpayer's net long-term capital gain with respect to such interests for such taxable year, over
>
> (2) the taxpayer's net long-term capital gain with respect to such interests for such taxable year computed by applying paragraphs (3) and (4) of sections 1222 by substituting "3 years" for "1 year",
>
> shall be treated as short-term capital gain, notwithstanding section 83 or any election in effect under section 83(b).

The Conference Committee report concludes:

> Thus, the provision treats as short-term capital gain taxed at ordinary income rates the amount of the taxpayer's net long-term capital gain with respect to an applicable partnership interest for the taxable year that exceeds the amount of such gain calculated as if a three-year (not one-year) holding period applies. In making this calculation, the provision takes account of long-term capital losses calculated as if a three-year holding period applies.

[2672] Which provides:

A special rule provides that, as provided in regulations or other guidance issued by the Secretary, this rule does not apply to income or gain attributable to any asset that is not held for portfolio investment on behalf of third party investors. Third party investor means a person (1) who holds an interest in the partnership that is not property held in connection with an applicable trade or business (defined below) with respect to that person, and (2) who is not and has not been actively engaged in directly or indirectly providing substantial services for the partnership or any applicable trade or business (and is (or was) not related to a person so engaged). A related person for this purpose is a family member (within the meaning of attribution rules[833]) or colleague, that is a person who performed a service within the current calendar year or the preceding three calendar years in any applicable trade or business in which or for which the taxpayer performed a service.

[833] Sec. 318(a)(1).

In addition to related party transfers not qualifying for this exception, they also do not qualify for the netting of gains and losses that Code § 1061(a) allows regarding the sale of applicable partnership interests held for more than one year but not more than three years. The House Report explains Code § 1061(d):[2674]

> *Transfer of applicable partnership interest to related person*
>
> If a taxpayer transfers any applicable partnership interest, directly or indirectly, to a person related to the taxpayer, then the taxpayer includes in gross income as short-term capital gain so much of the taxpayer's net long-term capital gain

---

Special rule. To the extent provided by the Secretary, subsection (a) shall not apply to income or gain attributable to any asset not held for portfolio investment on behalf of third party investors.

[2673] Which provides:

Third party investor. The term "third party investor" means a person who-

(A) holds an interest in the partnership which does not constitute property held in connection with an applicable trade or business; and

(B) is not (and has not been) actively engaged, and is (and was) not related to a person so engaged, in (directly or indirectly) providing substantial services described in paragraph (1) for such partnership or any applicable trade or business.

[2674] Code § 1061(d), "Transfer of applicable partnership interest to related person," provides:

(1) *In general*. If a taxpayer transfers any applicable partnership interest, directly or indirectly, to a person related to the taxpayer, the taxpayer shall include in gross income (as short term capital gain) the excess (if any) of-
  (A) so much of the taxpayer's long-term capital gains with respect to such interest for such taxable year attributable to the sale or exchange of any asset held for not more than 3 years as is allocable to such interest, over
  (B) any amount treated as short term capital gain under subsection (a) with respect to the transfer of such interest.

(2) *Related person*. For purposes of this paragraph, a person is related to the taxpayer if-
  (A) the person is a member of the taxpayer's family within the meaning of section 318(a)(1), or
  (B) the person performed a service within the current calendar year or the preceding three calendar years in any applicable trade or business in which or for which the taxpayer performed a service.

attributable to the sale or exchange of an asset held for not more than three years as is allocable to the interest. The amount included as short-term capital gain on the transfer is reduced by the amount treated as short-term capital gain on the transfer for the taxable year under the general rule of the provision (that is, amounts are not double-counted). A related person for this purpose is a family member (within the meaning of attribution rules[834]) or colleague, that is a person who performed a service within the current calendar year or the preceding three calendar years in any applicable trade or business in which or for which the taxpayer performed a service.

[834] Sec. 318(a)(1).

The government must require appropriate reporting[2675] and issue regulations or other guidance as is necessary or appropriate to carry out the purposes of Code § 1061.[2676]

II.M.4.f.iii. What Happens If a Nonvested Partnership Interest Does Not Qualify As a Profits Interest

Crescent Holdings, LLC v. Commissioner[2677] determined the tax consequences of an unvested interest in partnership capital and profits:

- The taxpayer's partnership interest was conditioned upon his future performance of substantial services. In other words, it wasn't vested.

- If the partnership had liquidated immediately after the unvested partnership interest was awarded, the agreement would have allocated liquidation proceeds to the taxpayer. Therefore, the unvested partnership interest was not a pure profits interest and was subject to Code § 83 income taxation.

- The Tax Court held that, under Code § 83, the taxpayer did not own the partnership interest for tax purposes and was taxed on only the cash that was distributed to him. Instead, the unvested, undistributed profits were taxable to those who would have received them if he had terminated employment.

- Furthermore, if the taxpayer were to become vested (no requirement to perform future substantial services), he would be taxable on the fair market value of the partnership interest at the time of vesting.

This case illustrates the big swing that can occur when awarding a partnership interest without making sure it is a pure profits interest. Until this case, most tax lawyers assumed that the only tax consequence to not having a pure profits interest was possible inclusion of the fair market value of the profits interest in the recipient's income. The remaining partners would get a corresponding deduction, and presumably they could use the taxes saved from the deduction to pay the recipient's taxes. Now the stakes are higher: if the recipient has a falling out with the partnership and challenges

[2675] Code § 1061(e).

[2676] Code § 1061(f).

[2677] 141 T.C. 477 (2013). For an exhaustive analysis, see Carman and Banoff, *Crescent Holdings*: Unvested Capital Partner Avoids Income Allocations, But Many Questions Remain, *Journal of Taxation* (WG&L), Vol. 120, No. 4 (April 2014).

the income tax treatment, the income allocated to the recipient might instead be taxed to the other partners; however, the tax distribution was made to the recipient and might not be available to the remaining partners.

In light of this case, consider the following measures:

- When including in the partnership agreement a reference to the parties' intent that the partnership interest be a profits interest described in Rev. Procs. 93-27 and 2001-43, add language along the lines of: "Without limiting the generality of the foregoing, if the [partnership] were to liquidate immediately after granting [the profits interest], holders of [the profits interest]would receive no payment in respect of [the profits interest]."

- Include a savings clause that, if the IRS does find that we didn't have a good profits interest and this reallocation occurs, the recipient shall refund any tax distributions. That would remove a terminated employee's incentive to challenge the K-1 and hopefully provide cash to pay the partners' taxes.

II.M.4.f.iv. Alternative If a Prospective Partner Wants a Capital Interest Instead of a Profits Interest

Profits interests are great because they are forward-looking. Sometimes, however, the prospective partner insists on having a share of the existing business. The easiest, most certain way to do that is to give the new partner a share of capital and report granting the partnership interest as compensation, much as when one would issue corporate stock.[2678]

An alternative approach might work - if the insistent partner is willing to take some risk. The partnership agreement could allocate net income to the new partner until the new partner's capital account increases to the desired level. That approach would not generate the desired results if the partnership does not earn enough income to increase the partner's capital account sufficiently. Also, if the income allocated to the partner is ordinary income, the partner risks having this ordinary income generate a capital loss if the partner is unable to sell the partnership interest for enough in the future (plus the fact that the basis acquired by this ordinary income would tend to offset future capital gain).

Some partnerships allocate gross income to generate this result, leading to more certainty of the partner's capital account attaining the desired level. However, if the IRS views the allocation of gross income as being certain, the IRS might assert that the agreement to allocate gross income generates compensation immediately, so one might want to take that possibility into account when considering the effect of the agreement.

II.M.4.g. Options to Acquire Equity (Stock Options, etc.)

Options to acquire equity do not constitute an equity interest in a corporate setting and, if the service provider is not a partner, do not constitute an equity interest in a partnership

[2678] See part II.M.4.e.i Issuing Stock to an Employee - Generally.

interest.[2679] Thus, they should not be subject to Code § 2701. However, they are subject to Code § 2703 in a family-controlled business, so they must be binding during life and after death and must satisfy the comparability test. The rest of these materials focus on the requirements to exclude stock options from Code § 409A; satisfying these tests is likely to bring a taxpayer into compliance (or least close to compliance) under the Code § 2703(b) comparability test under the *Amlie* case.[2680]

The Treasury and IRS have not issued guidance on options to acquire partnership interests, other than to provide that such options are subject to rules similar to those governing corporate stock options.[2681] If the stock option's exercise price is never less than the underlying stock's fair market value on the date the option is granted, then generally the stock option does not constitute deferred compensation.[2682] Thus, the key to a successful stock option is determining the value on the date that the option is granted.

For stock options issued on or after January 1, 2005 and before the effective date of final regulations, taxpayers have the following ways to determine fair market value:[2683]

- <u>Notice 2005-1, Q&A-4(d)(ii)</u> provides that for purposes of determining the value of the underlying stock upon the grant of a nonstatutory stock option, "any reasonable valuation method may be used." This includes estate tax valuation under Reg. § 20.2031-2. Taxpayers may rely on Notice 2005-1 for stock rights issued on or after January 1, 2005 but before January 1, 2008.[2684]

- <u>Prop. Reg. § 1.409A-1(b)(5)(iv)(B)</u> provided additional details in response to commentators' assertions that the above Notice is too vague. Taxpayers may rely on either the proposed regulations or the final regulations for stock rights issued any date before January 1, 2008.[2685]

- <u>Reg. § 1.409A-1(b)(5)(iv)(B)</u> provides the following for stock that is not readily tradable on an established securities market:[2686]

[2679] A partner's option to acquire a partnership interest might or might not constitute an equity interest. See part III.B.7.c.vii Stock Options.

[2680] The *Amlie* case is described in the text accompanying footnote 3259.

[2681] Notice 2005-1, Q&A-7. This continues to be the case under section III.G. of the preamble to the final regulations. Reg. § 1.409A-1(b)(7) is a placeholder for future regulations on arrangements between partnerships and partners.

[2682] Reg. § 1.409A-1(b)(5)(i)(A).

[2683] Notice 2006-4. Final regulations were effective generally January 1, 2008. Notice 2006-79.

[2684] Section XII.C. of the Preamble to the final regulations.

[2685] Section XII.C. of the Preamble to the final regulations.

[2686] CCA 201521013 provides:

> Section 1.409A-1(k) provides that, for purposes of section 409A, the term established securities market means an established securities market as defined under § 1.897-1(m). Section 1.409A-1(b)(5)(vi)(G) provides that, for purposes of section 409A, stock is treated as readily tradable if it is regularly quoted by brokers or dealers making a market in the stock. In explaining § 1.409A-1(b)(5)(vi)(G), the preamble to the final section 409A regulations (72 Fed. Reg. 19,234, 19,240 (April 17, 2007)) states that the rule was intended to adopt the same standard as that set forth under § 1.280G-1, Q&A-6(e). Section 1.280G-1, Q&A-6(e) provides that, for purposes of section 280G, stock is treated

> as readily tradable if it is regularly quoted by brokers or dealers making a market in the stock. Section 1.280G-1, Q&A-6(f) provides that, for purposes of section 280G, the term established securities market means an established securities market as defined under § 1.897-1(m).
>
> Section 1.897-1(m) provides that the term established securities market means (1) a national securities exchange which is registered under section 6 of the Securities Exchange Act of 1934 (15 U.S.C. 78f), (2) a foreign national securities exchange which is officially recognized, sanctioned, or supervised by governmental authority, and (3) any over-the-counter market. An over-the-counter market is any market reflected by the existence of an interdealer quotation system. An interdealer quotation system is any system of general circulation to brokers and dealers which regularly disseminates quotations of stocks and securities by identified brokers or dealers, other than by quotation sheets which are prepared and distributed by a broker or dealer in the regular course of business and which contain only quotations of such broker or dealer.
>
> It is a common practice for new issues of publicly traded stocks and bonds to be traded on a when, as and if issued (commonly called a when issued) basis days prior to when the issuer actually issues and distributes the security to holders. A when-issued trade is made between a seller and a buyer contingent on actual issuance of the security, after which settlement of the trade is made.
>
> A when-issued market for a security yet to be issued may occur on an over-the-counter market or any other established securities market as defined under § 1.897-1(m). Section 703.02 (part 1) of the New York Stock Exchange's Listed Company Manual provides guidelines applicable to when-issued trading on the Exchange of a security expected to be issued as a stock dividend: Normally, the Exchange will initiate when issued trading when the percentage of additional stock distributed is 25% or more of the outstanding. There is no fixed date for the commencement of when issued trading, but the Exchange will usually wait until such time as all corporate and official action requisite to the issuance of shares has been taken.
>
> The Tax Court held that a when-issued trading price on an over-the-counter market indicates the fair market value of a security prior to its issuance. *Frizzelle Farms, Inc. v. Comm.*, 61 T.C. 737 (1974), *aff'd* 511 F.2d 1009 (4 Cir., 1975).

CCA 201603025, the IRS' response to the taxpayer's assertion that the stock was not readily tradable so that the taxpayer's valuation should be used, included the following:

> Under § 1.409A-1(b)(5)(vi)(G), stock is treated as readily tradable if it is regularly quoted by brokers or dealers making a market in such stock. Therefore, a stock is readily tradable if brokers or dealers make the stock available to trade by listing it on an established securities market. The readily tradable standard therefore requires only the ability to buy and sell the stock through a third party….
>
> Taxpayers argue that there were therefore no actual transactions in the Common Stock as reported by the over-the-counter market for purposes of determining the fair market value of the Common Stock under § 1.409A- 1(b)(5)(iv)(A) on the Grant Date.[2] However, the rule does not require that the Common Stock must actually exchange hands on the trading date, but rather only that there are actual transactions in such stock on the trading date. Transactions in stock generally mean either the sale or transfer of stock. Even assuming that only contracts to purchase the Common Stock were actually purchased on the Grant Date, the contracts provided for the transfer of the Common Stock. The buyers were contractually obligated to complete their when-issued purchases of the Common Stock if [a certain condition] occurred. The [condition] had already occurred… on the Grant Date before the over-the-counter market opened for that trading date. Moreover, the buyers were contractually obligated to pay the auction price that applied at the time that they purchased the Common Stock on the Grant Date regardless of the auction prices of the Common Stock on the settlement date. Thus, there is no basis for treating the when-issued purchases of the Common Stock as anything other than actual transactions in such stock reported by the established securities market.

(B) Stock not readily tradable on an established securities market.

(1) In general. For purposes of paragraph (b)(5)(i) of this section, in the case of service recipient stock that is not readily tradable on an established securities market, the fair market value of the stock as of a valuation date means a value determined by the reasonable application of a reasonable valuation method. The determination of whether a valuation method is reasonable, or whether an application of a valuation method is reasonable, is made based on the facts and circumstances as of the valuation date. Factors to be considered under a reasonable valuation method include, as applicable, the value of tangible and intangible assets of the corporation, the present value of anticipated future cash-flows of the corporation, the market value of stock or equity interests in similar corporations and other entities engaged in trades or businesses substantially similar to those engaged in by the corporation the stock of which is to be valued, the value of which can be readily determined through nondiscretionary, objective means (such as through trading prices on an established securities market or an amount paid in an arm's length private transaction), recent arm's length transactions involving the sale or transfer of such stock or equity interests, and other relevant factors such as control premiums or discounts for lack of marketability and whether the valuation method is used for other purposes that have a material economic effect on the service recipient, its stockholders or its creditors. The use of a valuation method is not reasonable if such valuation method does not take into consideration in applying its methodology, all available information material to the value of the corporation. Similarly, the use of a value previously calculated under a valuation method is not reasonable as of a later date if such calculation fails to reflect information available after the date of the calculation that may materially affect the value of the corporation (for example, the resolution of material litigation or the issuance of a patent) or the value was calculated with respect to a date that is more than 12 months earlier than the date for which the valuation is being used. The service recipient's consistent use of a valuation method to determine the value of its stock or assets for other purposes, including for purposes unrelated to compensation of service providers, is also a factor supporting the reasonableness of such valuation method.

(2) Presumption of reasonableness. For purposes of this paragraph (b)(5)(iv)(B), the use of any of the following methods of valuation is presumed to result in a reasonable valuation, provided that the Commissioner may rebut such a

[2] The cases cited by Taxpayers do not support Taxpayers' position. The *Stavisky* court assumed that contracts to purchase stock when issued reflect the fair market value of the stock on the date the contract is entered into: In the case at bar the performance of the original contract—that is, the purchase of the shares—at the price fixed— remained what it had been. *Stavisky v. Comm'r*, 291 F.2d 48, 49 (2d Cir. 1961). Furthermore, the *Stavisky* holding applied to a transaction that occurred before the enactment of section 1233. Section 1233(e)(2)(A) treats stock traded on a when-issued basis the same as the stock. Under Example 6 of § 1.1233-1(c)(6), the price contracted to sell stock when issued applies for purposes of determining the applicable gain or loss when the stock is actually issued.

presumption upon a showing that either the valuation method or the application of such method was grossly unreasonable:

(i) A valuation of a class of stock determined by an independent appraisal that meets the requirements of section 401(a)(28)(C) and the regulations as of a date that is no more than 12 months before the relevant transaction to which the valuation is applied (for example, the date of grant of a stock option).

(ii) A valuation based upon a formula that, if used as part of a nonlapse restriction (as defined in §1.83-3(h)) with respect to the stock, would be considered to be the fair market value of the stock pursuant to §1.83-5, provided that such stock is valued in the same manner for purposes of any nonlapse restriction applicable to the transfer of any shares of such class of stock (or any substantially similar class of stock) to the issuer or any person that owns stock possessing more than 10 percent of the total combined voting power of all classes of stock of the issuer (applying the stock attribution rules of § 1.424-1(d)), other than an arm's length transaction involving the sale of all or substantially all of the outstanding stock of the issuer, and such valuation method is used consistently for all such purposes, and provided further that this paragraph (b)(5)(iv)(B)(2)(ii) does not apply with respect to stock subject to a stock right payable in stock, where the stock acquired pursuant to the exercise of the stock right is transferable other than through the operation of a nonlapse restriction.

(iii) A valuation, made reasonably and in good faith and evidenced by a written report that takes into account the relevant factors described in paragraph (b)(5)(iv)(B)(1) of this section, of illiquid stock of a start-up corporation. For this purpose, illiquid stock of a start-up corporation means service recipient stock of a corporation that has no material trade or business that it or any predecessor to it has conducted for a period of 10 years or more and has no class of equity securities that are traded on an established securities market (as defined in paragraph (k) of this section), where such stock is not subject to any put, call, or other right or obligation of the service recipient or other person to purchase such stock (other than a right of first refusal upon an offer to purchase by a third party that is unrelated to the service recipient or service provider and other than a right or obligation that constitutes a lapse restriction as defined in §1.83-3(i)), and provided that this paragraph (b)(5)(iv)(B)(2)(iii) does not apply to the valuation of any stock if the service recipient or service provider may reasonably anticipate, as of the time the valuation is applied, that the service recipient will undergo a change in control event as described in §1.409A-3(i)(5)(v) or §1.409A-3(i)(5)(vii) within the 90 days following the action to which the valuation is applied, or make a public offering of securities within the 180 days following the action to which the valuation is applied. For purposes of this paragraph (b)(5)(iv)(B)(2)(iii), a valuation will not be treated as made reasonably and in good faith unless the valuation is performed by a person or persons that the corporation reasonably determines is qualified to perform such a valuation based on the person's or persons' significant knowledge, experience, education, or training. Generally, a person will be qualified to perform such a valuation if a reasonable individual, upon being apprised of such knowledge, experience, education, and training, would reasonably rely on the advice of such person with respect to valuation in deciding whether to accept an offer to purchase or sell the stock being valued. For this purpose, significant experience generally means at least five years of relevant experience in business valuation or appraisal, financial accounting, investment banking, private equity, secured lending, or other comparable experience in the line of business or industry in which the service recipient operates.

(3) Use of alternative methods. For purposes of this paragraph (b)(5), a different valuation method may be used for each separate action for which a valuation is relevant, provided that a single valuation method is used for each separate action and, once used, may not retroactively be altered. For example, one valuation method may be used to establish the exercise price of a stock option, and a different valuation method may be used to determine the value at the date of the repurchase of stock pursuant to a put or call right. However, once an exercise price or amount to be paid has been established, the exercise price or amount to be paid may not be changed through the retroactive use of another valuation method. In addition, notwithstanding the foregoing, where after the date of grant, but before the date of exercise or transfer, of the stock right, the service recipient stock to which the stock right relates becomes readily tradable on an established securities market, the service recipient must use the valuation method set forth in paragraph (b)(5)(iv)(A) of this section for purposes of determining the payment at the date of exercise or the purchase of the stock, as applicable.

If value is off, consider whether relief provisions might be available.[2687]

For gift, estate, and generation-skipping transfer tax purposes, Rev. Proc. 98-34 provides a safe harbor for valuing nonpublicly traded stock options that are granted in connection with the performance of services (including stock options that are subject to the provisions of Code § 421), which options are granted on stock that is publicly traded on an established securities market.

A form of compensation similar to stock options is a stock appreciation right (SAR). An SAR is like a stock option, except that the employee never buys the stock. In many cases involving stock options, an employee borrows to exercise the stock option, repays the exercise price by selling the shares, and then keeps the remaining stock. An SAR gives the employee the same cash the employee would have received if the employee had borrowed to exercise the option, sold all of the stock immediately, and repaid the loan, without making the employee go through all of those steps and without the employee ever owning any of the underlying stock. If properly structured, an SAR would receive Code § 409A treatment similar to an option.[2688] An SAR is likely have few, if

[2687] Notice 2008-113, as modified by Notice 2010-6 and Notice 2010-80.

[2688] Reg. § 1.409A-1(b)(5)(i)(B). An SAR that complies with this regulation is also exempt from Code § 457A (which taxes deferred compensation from certain types of foreign entities when vested). Rev. Rul. 2014-18. In AM 2016-003, the IRS was asked:

any, Chapter 14 implications because the employee never receives any equity in the company.

Finally, awards of restricted stock could work well. Code § 409A does not apply merely because property is not includable income in the year of receipt by reason of the property being nontransferable and subject to a substantial risk of forfeiture under Code § 83 or is includable in income solely due to a valid election under Code § 83(b).[2689] The service provider should receive actual shares of stock subject to forfeiture; a promise to transfer stock in the future may be subject to Code § 409A,[2690] although it could be excluded from Code § 409A for other reasons. However, the IRS takes the position that a gift of a stock option that is not exercisable until after the performance of services is an incomplete gift until exercise of the option is no longer conditioned on the performance of services by the transferor;[2691] presumably, this

---

> May a service provider making an overall accounting method change under section 446(e) of the Code —from the cash receipts and disbursements method of accounting to an accrual method of accounting —include in its adjustment under section 481(a) (section 481(a) adjustment) vested deferred compensation under a plan of a nonqualified entity that would have been includible under section 457A had the services not been performed before January 1, 2009, resulting in some of the vested deferred compensation being included in income later than the service provider's last taxable year beginning before 2018?

Reasoning that the statute regarding deferral overrode otherwise applicable principles, it asserted:

> To the extent the section 481(a) adjustment relates to vested deferred compensation that is attributable to services performed before January 1, 2009, under a plan of a nonqualified entity, the service provider may not take the adjustment into account later than the service provider's last taxable year beginning before 2018.

2689 Reg. §§ 1.409A-1(b)(6)(i), 1.83-3(b). If an important goal is to convert nonvested restricted stock to deductible compensation upon the transfer of an interest in the business to the holder, a Code § 83(b) election should not be made.

2690 Reg. § 1.409A-1(b)(6)(ii).

2691 Rev. Rul. 98-21, reversing the IRS' prior Letter Ruling position. Rev. Rul. 98-21 reasoned:

> In the present case, Company grants to A a nonstatutory stock option conditioned on the performance of additional services by A. If A fails to perform the services, the option cannot be exercised. Therefore, before A performs the services, the rights that A possesses in the stock option have not acquired the character of enforceable property rights susceptible of transfer for federal gift tax purposes. A can make a gift of the stock option to B for federal gift tax purposes only after A has completed the additional required services because only upon completion of the services does the right to exercise the option become binding and enforceable. In the event the option were to become exercisable in stages, each portion of the option that becomes exercisable at a different time is treated as a separate option for the purpose of applying this analysis. In the event that B is a skip person (within the meaning of section 2613(a)), the generation-skipping transfer tax would apply at the same time as the gift tax. See Rev. Proc. 98-34, 1998-18, which sets forth a methodology to value certain compensatory stock options for gift, estate, and generation-skipping transfer tax purposes.

Rev. Rul. 98-21 is inconsistent with Rev. Rul. 72-307, which held, An insured's power to cancel his insurance coverage by terminating his employment is a collateral consequence of the power that every employee has to terminate his employment, in holding that the power to cancel group term life insurance coverage by quitting one's job did not constitute an incident of ownership under Code § 2042. *DiMarco v. Commissioner*, 87 T.C. 653, 662-663 (2001 regarding tax year 1986), held, Respondent argues, however, that decedent's simple act of going to work for attitude would also apply to restricted stock. The author disagrees with the IRS' position regarding incomplete gifts but cautions planners to consider whatever litigation risks the IRS' position might entail when making transfers of property conditioned on the performance of services by the transferor.

II.N. Shareholder Agreements and Operating Agreements

II.N.1. Comparison of Ability to Specify Future Actions

In a corporation, generally each member of a board of directors has certain fiduciary duties that cannot be waived on a blanket basis by the organizational documents,[2692] and the way to enforce actions promised in shareholder agreements is to remove a noncompliant board and replace it with directors who will carry out the shareholders' wishes. However, depending on state law, a corporation can be organized as a statutory close corporation that functions more like a limited liability company.[2693]

A limited liability company's operating agreement can dictate specific actions. The drafting lawyer might consider whether to relieve managers and members of various fiduciary duties. Some states, such as Illinois, do not allow fiduciary duties to be negated by contract; other states, such as Missouri, allow any arrangement to which the parties agree. The absence of fiduciary duties generally is not recommended for estate planning purposes. If one wants (and is permitted) to negate fiduciary duties, consider including the duties of good faith that generally apply to commercial contracts. Some cases have held lawyers liable to the injured party (who is not the lawyers' client) for advising clients to breach fiduciary duties, whereas lawyers generally are not liable for advising clients to breach contract duties.

IBM on January 9, 1950, constituted an act of transfer by decedent for gift tax purposes. We disagree. None of the cases cited by respondent hold that, without more, the simple act of going to work for an employer that has an automatic, nonelective, company-wide survivors income benefit plan similar to the one at issue in this case constitutes a transfer of an interest in the benefit for either estate or gift tax purposes. Rev. Rul. 92-68 confirmed the IRS' acquiescence, Rev. Rul. 81-31 held that a decedent made a gift of the value of a death benefit passing to the decedent's surviving spouse and that the gift became complete in the calendar quarter in which the decedent died, at which time the amount of the gift first became susceptible of valuation. The ruling is inconsistent with the result in *DiMarco*. Rev. Rul. 81-31 is hereby revoked. Rev. Rul. 98-21 did not refer to Rev. Rul. 92-68. Instead, it cited areas outside of the employment arena:

- a case involving a prenuptial agreement (no gift until marriage takes place), and
- two revenue rulings - that were issued before the now-revoked Rev. Rul. 81-31- holding that a parent's promise to make a gift was a completed gift only after it became legally enforceable.

In Letter Ruling 199952012, the taxpayer sought a ruling only regarding options that were vested and exercisable, in light of the position of Rev. Rul. 98-21.

Rev. Ruls. 84-130 and 72-307 expanded the protection that Rev. Rul. 68-334 provides when an employer has irrevocably assigned all rights to a group term policy.

[2693] See fn. 776.

II.N.2. Retroactivity of Amendment to Partnership Agreement (Including Operating Agreement)

For purposes of the partnership income tax rules, a partnership agreement includes any modifications of the partnership agreement made before, or at, the time prescribed by law for the filing of the partnership return for the taxable year (not including extensions) which are agreed to by all the partners, or which are adopted in such other manner as may be provided by the partnership agreement.[2694] A partnership agreement or modifications can be oral or written; as to any matter on which the partnership agreement, or any modification thereof, is silent, the provisions of local law are part of the agreement.[2695]

When a partnership agreement did not have a fixed method to determine the current and future allocations of profits or losses and instead allocates them based on the determinations of an executive committee, an agreement to determine the allocation of then-currently unrealized profits and losses arising from many years of operations did not give rise to an analysis of how much profit and loss might have been allocated to the partners before the amendment.[2696]

II.O. Buy-Sell Agreements

II.O.1. General Buy-Sell Concepts

A buy sell agreement is a contract between owners and/or the entity that provides for the sale of an owner's interest upon the occurrence of a triggering event such as disability, retirement, or death. The three types of buy-sell agreements are: (1) redemption agreements; (2) cross-purchase agreements; and (3) a combination of redemption and cross-purchase. Deciding which type to use requires consideration of a number of factors including the number and ages of the shareholders involved and the weighing of tax consequences for each type of agreement.

These agreements determine the price and payment terms and restrict who can own an interest in the business. In a limited liability company (LLC), the buy-sell agreement is integrated into the operating agreement. In a partnership, the buy-sell agreement is integrated into the partnership agreement. In a corporation, whether a C corporation or an S corporation, the buy-sell agreement is integrated into a shareholders' agreement.

Key circumstances triggering a buy-sell agreement include the owner's divorce, bankruptcy, incapacity, or death. Special considerations may apply to an owner who works in the business, especially if the ownership interest was granted as an employment incentive. Also, owners like to choose their partners, so frequently the buy-sell provisions restrict transfers to outsiders.

In LLCs and partnerships, voting and management rights are not transferred automatically when ownership is transferred. An owner without voting and management

[2694] Code § 761(c); Reg. § 1.761-1(c).
[2695] Reg. § 1.761-1(c).
[2696] Letter Ruling 9821051.

rights is called an assignee. LLC and partnership buy-sell provisions specify whether a transferee is an assignee or has voting and management rights.[2697]

An S corporation may revert to a C corporation if too many shareholders own stock or if stock is transferred to an ineligible shareholder. Special buy-sell provisions are required to preserve the S election.

The Business Planning Committee of the American College of Trust & Estate Counsel has put together a model shareholder agreement and related outline of technical issues. These two documents can be found at the web page of the Business Planning Group of the American Bar Association's Real Property, Trust & Estate Law Section at http://apps.americanbar.org/dch/committee.cfm?com=RP519000.

II.O.2. Spousal Issues in Buy-Sell Agreements and Related Tax Implications

Generally speaking, it is usually best to have a spouse hold a business interest through a trust, rather than through outright ownership. The trust can protect the property from creditors and from new spouses if the surviving spouse remarries. A trust also allows the decedent to choose to have a third party involved in the management and investment of the property, if desirable. Additionally, a trust allows the decedent to designate who the remainder interest in the property passes to upon the spouse's death and might enable the decedent to devise property to successive generations without incurring estate tax. Finally, the trust form will allow the donor to structure the estate plan to take advantage of any potential minority discounts or control premiums that may apply.

II.O.2.a. Spouses and Buy-Sell Agreements – State Law Issues

A number of issues can arise related to spouses holding interests in closely-held businesses. If these issues are not addressed, closely-held business owners could end up in losing a portion of their business to an ex-spouse, or an owner's estate could lose part or all of the marital deduction.

Some courts have held a business owner's buy-sell agreement not binding on the spouse, so spousal consent should be considered necessary to ensure enforcement of buy-sell agreements. First, such consent can prevent a divorce proceeding or elective share from causing an ex-spouse to be involved in the business. It also prevents a spouse from leaving her community property interest in the business to a third party. Finally, it protects the spouse from claiming a community property interest in the business upon the business owner's death.

However, even if the spouse consents by signing the buy-sell agreement, a court might rule that the spouse did not truly consent to the agreement because the spouse did not fully understand the agreement.[2698] Preferably, the spouse would be represented by his

---

[2697] A Delaware Court of Chancery held that an assignee's admission as a member must be done formally and that an assignee who is not a creditor could assert rights in equity without being admitted as a member. *In re Carlisle Etcetera LLC*, C.A. No. 10280-VCL (4/30/2015), found at https://casetext.com/case/in-re-carlisle-etcetera-llc.

or her own counsel. Be sure to update spousal consent when amending the buy-sell agreement.

II.O.2.b. Divorce – Income Tax Issues Relating to Buy-Sell Agreements

In order to accomplish its objectives, a buy-sell agreement needs to specifically address transfers incident to divorce. If an agreement focuses on voluntary transfers, it is possible a court would not apply the restriction in the case of an involuntary transfer, such as a divorce transfer.

When a business interest is transferred to a spouse pursuant to a divorce agreement and the stock is then redeemed by the business for cash pursuant to the buy-sell agreement, the non-recognition rules for spousal transfers and the stock redemption rules collide. Before tax regulations addressed this situation, there was some question as to whether the transferring spouse should be taxed on the redemption or the spouse receiving the interest should be taxed. Reg. § 1.1041-2(c) addresses this question and states that the spouses may chose who will be taxed on the redemption.[2699]

II.O.2.c. Effect of Buy-Sell Agreement on Marital Deduction

The buy-sell agreement price can have a significant effect on the estate tax marital deduction. If stock held in a marital trust is subject to a bargain buy-sell agreement, the marital deduction might be totally disallowed.[2700] Such a provision might run afoul of Code § 2056(b)(5), which allows a marital deduction only if no other person has the power to appoint any portion of the interest to anyone except the surviving spouse, and

---

[2699] In another setting indirectly involving a transfer of a business interest, Letter Ruling 201024005 held that the transfer of qualified replacement property (QRP) to a divorcing spouse is not subject to income tax. Under Code § 1042, QRP is certain stock purchased with the proceeds of a sale of stock to an employee stock ownership plan (ESOP); this purchase allows the seller to defer gain on the sale, which deferred gain reduces the QRP's basis. Code § 1042(e) requires the deferred gain to be recognized if the seller later disposes of the QRP. Code § 1042(e)(3)(C) provides that a gift does not count as a Code § 1042(e) disposition. Code § 1041(b)(1) and its legislative history provide that a transfer in a divorce counts as a gift for income tax purposes, so the ruling held that a transfer of QRP by divorce was not subject to Code § 1042(e) recapture.

[2700] See *Estate of Rinaldi v. U.S.*, 38 Fed. Cl. 341 (1997); *Estate of McCabe v. U.S.*, 475 F.2d 1142 (Ct. Cl. 1973); TAM 9147065. See also TAM 8843004. The IRS took a similar position (without citing these cases) and lost in *Alan Baer Revocable Trust v. U.S.*, 105 A.F.T.R.2d 2010-1544 (D.C. Neb.), when the court disregarded a contingent distribution to beneficiaries because the possibility that the transfer to the contingent beneficiaries would ever come to fruition is so remote that it is negligible. The IRS acquiesced in result only in AOD 2012-001, arguing that any possibility whatsoever of others receiving the trust's possibility violated the Code § 2056(b)(7)(B)(ii)(II) prohibition against any person having the power to appoint any part of the property to any person other than the surviving spouse. The IRS claimed that Reg. § 20.2056(b)-7(d)(6) supports its position. That regulation provides that, if the surviving spouse is legally bound to transfer the distributed property to another person without full and adequate consideration in money or money's worth, the requirement of section 2056(b)(7)(B)(ii)(II) is not satisfied. Although generally I would want to avoid arguing with the IRS over this issue in a buy-sell agreement, perhaps some sort of formula adjustment clause (see part III.B.3 Defined Value Clauses in Sale or Gift Agreements or in Disclaimers) might work if one can find no other way to plan around this issue?

Code § 2056(b)(7), which requires that the spouse be the only beneficiary. Consider the following:

- Provide that, if the property passes to a marital deduction trust, the agreement provide that the sale price shall be adjusted up as necessary to be no less than the fair market value, as finally determined for estate tax purposes.

- Bequeath the business interest to a marital deduction that is separate from other marital deduction trust assets, so that the marital deduction for those other assets is not jeopardized.

On the other hand, FSA 200018020[2701] stated that directing stock to be sold for a bargain price before funding the QTIP Trust did not disqualify the QTIP trust; it simply affected the amount available for the marital deduction. The FSA distinguished the *Rinaldi* case cited in fn. 2700. If a bargain sale before funding the marital trust is not directed by the estate plan but rather is done as part of estate administration, then the marital deduction should be allowed in full and the surviving spouse is treated as making a gift.[2702]

Also, generally, giving the surviving spouse a choice between various bequests does not violate the terminable interest rule.[2703] In determining the deadline for an election, one might consider the 9 month disclaimer deadline under Code § 2518 or the 6 month survival requirement that may be imposed under Code § 2056(b)(3) without making the interest terminable. Rev. Rul. 82-184 approved a six-month simple election procedure[2704] but rejected an election that was conditioned on the surviving spouse's

[2701] FSA 200018020 was approved by Melissa Liquerman, who has had a long and successful career with the IRS and I believe is very well-regarded.

[2702] See Rev. Rul. 84-105, which is described in fn. 4779, which is found in part III.B.1.b Gifts Without Consideration, Including Restructuring Businesses or Trusts Before Gifts or Other Transfers.

[2703] See, *e.g.*, *Mackie v. Commissioner*, 64 T.C. 308 (1975), *aff'd per curiam* 545 F.2d 883 (4th Cir. 1976), which approved the following clause:

> My said wife shall have, however, the right to elect whether to accept this devise, bequest and appointment, or to reject it, or to accept it in part and reject it in part, which election she shall make by a statement in writing to that effect delivered to my executrix within four months from the date of my death. The failure of my said wife to deliver such statement to my executrix within such time shall be deemed an election by her to reject this devise, bequest and appointment in full.

See also Reg. § 20-2056(c)-2(c), regarding elective shares.

[2704] Rev. Rul. 82-184 held:

> A cash bequest in lieu of a life estate, payable unconditionally at the election of the surviving spouse within a reasonable time after the decedent's death qualifies for the estate tax marital deduction under section 2056 of the Code.

The election procedure is described more fully in fn. 2705. Rev. Rul. 82-184 reasoned:

> Section 2056(b)(1) provides that the marital deduction is not allowed for certain interests passing to the surviving spouse that will terminate or fail on the occurrence or nonoccurrence of an event or contingency where an interest in the property also passes to another person, who may enjoy the property after the surviving spouse's interest has terminated.
>
> In *Estate of Tompkins v. Commissioner*, 68 T.C. 912 (1977), *acq.*, 1982-1 C.B. 1, the spouse was given alternative bequests of a life income interest in a trust or an option to

"performance of significant acts and upon events beyond mere procedural requirements."[2705] Letter Ruling 201410011 approved a 180-day election procedure in

---

take $40,000 in cash outright. The election to take the $40,000 in lieu of the income interest was to be made within 60 days after the qualification of the executor. The decedent's spouse timely elected the cash bequest. The court held that for purposes of section 2056 of the Code, the surviving spouse had not received a terminable interest, but received, at the decedent's date of death, an absolute right to take outright a specific portion of the decedent's estate. The court considered the requirement that the spouse must make a timely election of the alternative bequest a mere procedural requirement, and thus not a contingency within the meaning of section 2056(b)(1), as long as the interest was otherwise nonterminable. The court noted that there is no substantial difference between an elective testamentary bequest of a non- terminable interest and a spouse's election against a will under state law. See section 20.2056(e)-2 of the Estate Tax Regulations. See also *Estate of Neugass v. Commissioner*, 555 F.2d 322 (2d Cir. 1977), *rev'g*, 65 T.C. 188 (1975).

Similarly, in *Mackie v. Commissioner*, 64 T.C. 308 (1975), *acq.*, 1982-1 C.B. 1, *aff'd per curiam*, 545 F.2d 883 (4th Cir. 1976), it was held that a spouse's right to select any property out of the estate in an amount equal to the maximum marital deduction, was an absolute right to take outright a specified portion of the estate.

[2705] After its favorable holding in fn. 2704, Rev. Rul. 82-184 held:

> However, a cash bequest payable on the condition that the spouse purchase a new home is a nondeductible terminable interest for purposes of section 2056.

The holding included the following facts:

> D died on February 2, 1982. Under the terms of D's will, a trust was established in which D's surviving spouse, A, received a life income interest. However, under the will A could elect to take an outright bequest of $50,000 in lieu of the life income interest. The election was to be made by the spouse by filing written notice to the executor within six months of D's death. The will also provided that if A was at any time to buy a new house, A could receive on demand from the trustee the amount needed to buy a house, up to $200,000. A timely elected the cash bequest and sometime later demanded $200,000 for the purchase of a new home. D's executor deducted both the $50,000 cash bequest and the $200,000 distribution as bequests qualifying for the marital deduction under section 2056 of the Code.

After its reasoning in fn. 2704, Rev. Rul. 82-184 continued:

> In *Estate of Edmonds v. Commissioner*, 72 T.C. 970 (1979), the decedent's spouse was bequeathed a life estate in the decedent's house and, in addition, if the decedent's spouse purchased another residence, the spouse was entitled to receive the amount necessary to do so, up to $100,000. The $100,000 was payable to the spouse upon notice to the executor and demand of the trustee. Approximately three years subsequent to the decedent's death, the spouse demanded and received $100,000 for a new residence. The court held that the estate could not deduct the distribution because, unlike the situations in Mackie and Tompkins, the spouse was not given an absolute right to take outright a specified portion of the decedent's estate. The requirement that the distribution be made only if the spouse relinquished the life tenancy and purchased a new house was considered a significant condition precedent to the spouse's enjoyment of the property. There was no way of ascertaining at the time of the decedent's death whether the surviving spouse would purchase a new home, or how much of the $100,000 would be needed to effect the purchase. Consequently, the bequest was a terminable interest for purposes of section 2056 of the Code. See also *Allen v. United States*, 359 F.2d 151 (2nd Cir. 1966), *cert. denied*, 385 U.S. 832 (1966).
>
> In the present case, the optional bequest of $50,000 A received at the time of D's death was an absolute right to a specific portion of D's estate, and A made the election within a reasonable time for purposes of section 2056 of the Code. Since A timely elected to take

conjunction with a prenuptial agreement,[2706] with the QTIP trust funded with preferred partnership interest.[2707] Letter Ruling 8735003 held that a no-contest clause did not preclude the marital deduction.[2708]

> the alternate bequest, D's estate can deduct the $50,000 bequest under section 2056. However, the bequest of the $200,000 is a terminable interest under section 2056(b) because it was conditioned upon A's performance of significant acts and upon events beyond mere procedural requirements. As is the case in *Edmonds*, there is no way of knowing at the time of D's death whether A would exercise the demand right or how much of the funds will be paid over. Because the residuary trust beneficiaries would benefit upon the failure of A to purchase a new home, D's bequest of the $200,000 is a nondeductible terminable interest under section 2056(b).

[2706] Letter Ruling 201410011 approved a revocable trust while the grantor was living. Part of its provisions resulted from a prenuptial agreement. Key terms included:

> Section 3A(7) of Revocable Trust provides that, if Spouse survives Taxpayer and if Taxpayer and Spouse are married and living together at the time of Taxpayer's death, the trustee will allocate and make distributions to Spouse as provided in Section 3A(7)(a). However, if Spouse makes a timely election as provided in Section 3A(7)(b), then the trustee will allocate and make distributions to Spouse as provided in that section (Elective Marital Portion).
>
> Section 3A(7)(a) provides that Spouse will take under the terms of Antenuptial Agreement, and that the trustee will make any distributions to Marital Trust, to be added to the principal of Marital Trust, and to be held and distributed as may be required by the Antenuptial Agreement. The terms of Revocable Trust specify that the trustee has the discretion to satisfy any distribution to Marital Trust under the Antenuptial Agreement with LLC preferred units (Preferred Units).
>
> Section 3A(7)(b) provides that if, within 180 days following Taxpayer's death, Spouse elects pursuant to Section 3A(7)(b) to receive the Elective Marital Portion in lieu and instead of any distributions under Antenuptial Agreement, the trustee will distribute to Spouse outright the sum of $w and will distribute those property interests specified in Section 3(A)(7)(b), to be added to the principal of Marital Trust, and to be held and distributed as may be required by the Marital Trust agreement. If Spouse elects to receive the Elective Marital Portion Marital Trust will still be funded in part with Preferred Units.

It started its reasoning:

> In Rev. Rul. 54-446, 1954-2 C.B. 303, a decedent and his wife were parties to an antenuptial agreement in which the wife relinquished any marital rights she might acquire in the decedent's property or estate by reason of their marriage. The decedent's will bequeathed property to his wife that was different from and of a greater value than the amount due to her under the antenuptial agreement. The will specifically provided that the bequests to wife were in lieu of any rights she might have under the antenuptial agreement. The revenue ruling determined that the amount bequeathed to the wife under the will "passed from the decedent to his surviving spouse" and therefore qualified for the estate tax marital deduction.
>
> In Rev. Rul. 68-271, 1968-1 C.B. 409, a decedent and his wife entered into an antenuptial agreement pursuant to which wife renounced and relinquished any marital rights she might acquire in his property or estate by reason of their marriage, in return for a stated sum from his estate, provided she survived him. Following the decedent's death, the estate paid the required sum to the widow pursuant to a claim filed by her. Decedent's will did not mention wife, and there was no will contest. The revenue ruling determined that the value of the interest transferred to the surviving spouse pursuant to the antenuptial agreement "passed from the decedent to his surviving spouse" and therefore qualified for the estate tax marital deduction.

Then it cited *Tompkins* and Rev. Rul. 82-184; see fns. 2704-2705. After that, it said:

> In the instant case, Spouse will receive certain property interests under the terms of the Antenuptial Agreement pursuant to Section 3A(7)(a) of Revocable Trust unless, within 180 days following Taxpayer's death, Spouse elects pursuant to Section 3A(7)(b) of Revocable Trust to receive certain other property interests (Elective Marital Portion). In each event, Spouse will have an absolute right to any property passing outright to her as well as an absolute right to the income from any property passing to Marital Trust. Therefore, the property interest passing outright to Spouse will be a nonterminable interest and the property interest passing to Marital Trust will be treated as a nonterminable interest if it otherwise satisfies the requirements of § 2056(b)(7). The requirement that Spouse make a timely election is "a mere procedural formality" *Tompkins*, 68 T.C. at 917, and is not a contingency within the meaning of § 2056(b)(1).
>
> Consequently, based on the facts submitted and the representations made, we conclude that Spouse's right to elect under section 3A(7) of Revocable Trust is not a "contingency" within the meaning of § 2056(b)(1). The Revocable Trust property actually distributed outright to Spouse and to Marital Trust (if it otherwise satisfies the requirements of § 2056(b)(7)) will be "property which passes from the decedent to his surviving spouse," for purposes of § 2056(a).

[2707] See text accompanying fn. 2711.

[2708] Letter Ruling 8735003 involved the following provision:

> I hereby direct and expressly provide that it shall be a condition precedent to the taking, vesting, receiving or enjoyment of any property, benefit, or thing whatsoever under and by virtue of this Will, that no such devisee or legatee shall in any manner contest the probate thereof, or question or contest the same, or any part or clause thereof, in any judicial proceeding, and I further will and provide that, should any such devisee or legatee so contest or question, or in any manner aid in such contesting or questioning, such devisee or legatee shall thereupon lose and forfeit all right to any benefit and all right or title to any property or thing herein directly or indirectly devised or bequeathed to said devisee and legatee, and same shall thereupon vest in such of my devisees or legatees herein as do not so question or contest, or give aid in such questioning or contesting of, this Will or the probate or any clause or provision thereof, in the same proportion as to value in which they otherwise take in value of my estate under this Will.

Letter Ruling 8735003 cited Reg. § 20.2056(e)-2(c), *Tompkins*, Rev. Rul. 82-184, and *Mackie*; see fns. 2704-2705. After that, it said:

> Under local law, forfeiture provisions in a will are strictly construed and a forfeiture of property interests will be avoided by the Texas courts unless the acts of the parties come strictly within the express terms of the forfeiture clause. Accordingly, the local courts have generally held that an action or proceeding for the construction of a will in which a beneficiary participates does not bring the beneficiary within the provision of a forfeiture provision. See, for example, the following cases where a state court held that a forfeiture clause was not applicable (1) where the decedent's granddaughter sued to obtain a fee simple title to property devised by will and the court held that the suit was brought to construe the decedent's will [*Roberts v. Chisum*, 238 S.W.2d 822 (Tex. Civ. App., 1951)]; and (2) where beneficiaries under a will sued to have provisions of the decedent's will devising real estate among four persons construed to ascertain the decedent's intent [*Reed v. Reed*, 569 S.W.2d 645 (Tex. Civ. App., 1978)].
>
> In the present case, C could either (1) accept the terms of B's will, or (2) contest the provisions of B's will. C chose the former course of action. Although under Texas law a will contest by C might result in a forfeiture of the assets C would otherwise receive under B's will, the existence of this option does not convert what are otherwise fee property interests into nondeductible terminable interests. The court in *Tompkins*, *supra*, found no substantial difference between an elective testamentary bequest of a nonterminable interest which relates back to the testator's date of death and a spouse's election against a will under state law. Similarly, we see no reason to distinguish a situation where a

A right of first refusal to buy at fair market value stock that a QTIP Trust sells upon the surviving spouse's demand did not disqualify a QTIP trust.[2709] A thirty day period in which to exercise a right of first refusal is not an unreasonable burden on a spouse's right to make a QTIP trust productive.[2710]

Here is an example of another business interest that qualified:[2711]

> The surrounding circumstances also manifest Taxpayer's intention that, after his death, Marital Trust should produce for Spouse during her life that degree of beneficial enjoyment of the LLC Preferred Units which the principles of the law of trusts accord to a person who is unqualifiedly designated as the life beneficiary of a trust. Under the terms of Operating Agreement, as the owner of LLC Preferred Units, Marital Trust will be entitled to an eight percent return on the aggregate face value of its LLC Preferred Units, payable no less often than annually. LLC cannot redeem Marital Trust's LLC Preferred Units for less than the greater of their face value or fair market value. In addition, without the affirmative vote or consent of all of the Preferred Members, LLC's Voting Common Members cannot amend, restate, alter or repeal Operating Agreement whether by merger, consolidation or otherwise so as to directly materially and adversely affect any right or preference of the Preferred Units or Preferred Unit holders.
>
> Moreover, the sale of LLC Preferred Units is not unreasonably restricted. At the written request of Spouse, the trustee of Marital Trust may sell the LLC Preferred Units to permitted purchasers without the consent of other LLC Members. Subject only to reasonable administrative restrictions, these purchasers will become substitute Preferred Members. The permitted purchases are other Members of LLC, Taxpayer's children, and Qualified Institutional Investors (as defined by Operating Agreement). Taxpayer has demonstrated that a substantial

---

> surviving spouse has a choice between accepting a testamentary bequest or challenging the provision of her husband's will in order to obtain her statutory share. In each situation, the beneficiary has a choice between two groups of assets. Furthermore, all interests that C received under B's will were in all respects nonterminable interests, that is, they were fee interests in property that C could transfer by gift or by will. Accordingly, the principles described in *Tompkins*, *Mackie*, section 20.2056(e)-2(c) of the regulations, and Rev. Rul. 82-184 are applicable to this case. Thus the value of the assets that C received under Articles III and VI of B's will are deductible under section 2056(a) of the Code.

[2709] Letter Ruling 199951029 held:

> If Spouse requests the trustee to convert the stock into income producing property, Grantor's children have the right of first refusal to purchase the stock at its fair market value as determined by an independent appraisal and under such terms and conditions as would be agreed upon by parties dealing at arm's length. This restriction does not prevent the trust from receiving full value for the stock if the stock is sold to the children, nor does it restrict the trustees' ability to sell the stock.

[2710] Letter Ruling 8931005 held:

> Given the fact that Corporation is a closely-held entity and the Children's Trust (owner of the controlling interest) is one of the most likely purchasers of the minority interest held by the Marital Trust, we do not consider the thirty day right of first refusal to place an undue burden on the ability of Spouse to require that the trust corpus be made productive.

[2711] Letter Ruling 201410011.

number of Qualified Institutional Investors currently own interests in B and that they are common purchasers of REITs. With respect to the actual receipt of income from an investment in B, an indirect owner of interests in B who owns LLC Preferred Units is in a similar position as a direct owner of interests in B because LLC is required to distribute an eight percent preferred return annually to owners of LLC Preferred Units.

II.O.2.d. Marital Trusts - S Corporations

When a business passes to a surviving spouse in a trust, a QSST or an ESBT election must be made.

Testamentary QTIP trusts generally qualify as QSSTs, and QSSTs often have more favorable income tax effects than ESBTs.

See parts III.A.3.c.iii Deadlines for QSST and ESBT Elections and III.A.3.e QSSTs and ESBTs (including part III.A.3.e.i.(b) QSST Issues When Beneficiary Dies).

II.O.2.e. Marital Deduction Trusts - Discount Planning

Much of the discussion below assumes that valuation reduction is good. That is not necessarily the case; see part II.H Income Tax vs. Estate and Gift Tax (Particularly for Depreciable Property), including part II.H.3 Valuation Discounts – Friend or Enemy. Accordingly, consider whether to plan to avoid valuation discounts, as needed.

Minority and fractional discounts for closely-held businesses and marital trusts need to be considered in estate planning as well. When spouses together own a majority in a business under community property laws, they will be considered to own one-half of that interest, and thus will be entitled to discounts for lack of control in determining their estate value.[2712] Additionally, fractional interest discounts may come into play when property interests are divided between a QTIP trust and a spouse. For example, if the surviving spouse owns 60% of a business and the remaining 40% is held in a QTIP trust, one might assume discounts for lack of control will not come into play when the second spouse dies. However, courts have held that the spouse's estate will be entitled to a discount for lack of control by disaggregating the QTIP trust from the spouse's other assets (in this example, providing a discount for lack of control for the QTIP stock).[2713] However, this disaggregation would not apply to a general power of appointment marital trust (Code § 2056(b)(5)).[2714]

Another issue arises when a business owner has a controlling interest in the company and bequeaths some portion of that interest to his spouse. Upon the owner's death, the full controlling interest value must be included in determining the owner's gross estate, and the estate will be entitled to some marital deduction for the portion passing to the spouse. However, that deduction is based on what passes to the spouse, not what is included in the estate. In *Estate of Chenoweth v. Commissioner*,[2715] the decedent

[2713] See *Estate of Bonner v. U.S.*, 84 F.3d 196 (5th Cir. 1996); *Estate of Mellinger v. Commissioner*, 112 T.C. 26 (1999); *Nowell v. Commissioner*, T.C. Memo. 1999-15.
[2714] *Estate of Fontana v. Commissioner*, 118 T.C. 318, 322 (2002).
[2715] 88 T.C. 1577 (1987).

owned 100% of a business and left his spouse a 51% interest. The IRS claimed the highest marital deduction the estate could take was 51% of the full value of the business included in the gross estate, but the estate claimed it should be entitled to increase the deduction by some control premium. The court ruled that the estate should be entitled to attempt to prove the increased value and that no rule required that the marital deduction amount equal the value the property was assigned when included in the gross estate. While this holding can lead to a potential tax advantage for an estate, it also has a potentially negative effect. What if the decedent owned a controlling interest but passed a minority interest to the spouse? In this case, the marital deduction will be based on the value of the minority interest, even though the full value of the interest will be used in calculating the gross estate.[2716] This same result can occur in the charitable contribution deduction context, when a decedent leaves a minority interest in stock to a charity.[2717] Thus, estate planners need to be aware of this whipsaw effect when determining how the estate will be divided.[2718] For example, if a controlling interest is to be divided among

---

[2716] TAM 9403005. In *Estate of Frank M. DiSanto v. Commissioner*, T.C. Memo 1999-421, the decedent had a controlling interest and a non-controlling interest passed to the surviving spouse, creating a mismatch between inclusion and deduction.

[2717] See generally *Estate of Schwan v. Commissioner*, T.C. Memo 2001-174 (taking into account post-mortem transformations occurring in funding a charitable bequest).

[2718] Steve Akers of Bessemer Trust has a post-mortem outline that, as of 2/8/2014, included the following as possible solutions:

> * Have the executor to fund the marital bequest with a note. The residuary estate would then be burdened with the note as a liability that would be distributed along with the residuary assets to the residuary beneficiaries.
>
> A strategy that may have worked previously: Have someone purchase a minority interest from the estate within the first six months, and elect the alternate valuation date. If the remaining interest is a minority interest, the alternate valuation date values would reflect minority interest values in the estate. Alternatively, consider merely distributing minority block of stock, and value the block distributed (minority interest) and the remaining block of stock in the estate at the end of the six month period (which might also be a minority interest). See Treas. Reg. § 20.2032-1(c)(1)(phrase distributed, sold, exchanged or otherwise disposed of includes surrender of stock in complete or partial liquidation of a corporation but not mere changes in form such as a transfer of assets to a corporation in a manner that no gain or loss is recognizable under § 351); *Kohler v. Comm'r*, T.C. Memo 2006-152, nonacq. AOD 2008-001 (tax-free reorganization is not a disposition that accelerates alternate valuation date). Proposed regulations prohibit this strategy, with an effective date of when the regulation is finalized. Prop. Treas. Reg. § 20.2032-1(h).
>
> * For fractional interests in real estate, use a co-ownership agreement at the first spouse's death that will eliminate the discount, by providing that either co-tenant can sell the property and distribute the proceeds pro rata.
>
> * For stock, use a pro rata funding but have a shareholder agreement that will eliminate the discount (by giving the marital legatee the right to liquidate the company or otherwise have control).
>
> * Sell the majority interest to a Family Trust for a note, then fund the Marital Trust with a part of the note, and fund the Family Trust with the balance of the note (which the Family Trust would then owe to itself).
>
> * Distribute a majority interest in an asset (that exceeds the marital bequest amount) to the Marital Trust, and have the Marital Trust give the estate back a note for the excess value. (For example, assume there is a $2MM Family Trust and a $8MM Marital Trust and the only asset is a 51% interest in a closely held company that is worth $10MM. If the Marital Trust is funded with 8/10 of the 51% interest, it will not be worth $8MM. Fund the Marital Trust with the entire 51% controlling interest, and have the Marital Trust give a

charities, with each receiving a minority interest, the IRS might argue that the bequest to each receives a minority discount; instead, consider (a) bequeathing the controlling interest to a private foundation for the benefit of those charities, or (b) including a direction to sell the business interest and distribute the proceeds, perhaps giving the charities an option to take in kind.

II.O.3. Effect of Buy-Sell on Charitable Estate Tax Deduction

If a decedent owns voting and nonvoting shares, the shares are valued together as a single block; however, if the charitable bequest is a specific bequest of stock that is less than the combined block, the charitable deduction is based on the block it actually received.[2719]

> note back to the estate for $2MM. The Marital Trust might later end up paying off the $2MM note with an interest in the company (which would be valued at a discount, thus requiring more shares than if there were no discount).
>
> * Fund the bequest using a defined value formula conveyance. For example, a pecuniary bypass trust bequest could be funded by a conveyance having a defined value—reduced only by the amount necessary that will not result in an increased estate tax.
>
> * To avoid the valuation problem on funding marital bequests, make the marital gifts during lifetime. In that event, there would not be a mismatch between the amount of the gift and the allowed marital deduction. (But lifetime gifts would lose the benefit of a basis step-up at death.)

[2719] *Ahmanson Foundation v. United States*, 674 F.2d 761 (9th Cir. 1981). In that case, the sole share of voting stock was specifically bequeathed to a noncharitable beneficiary, and ninety-nine shares of nonvoting stock were specifically bequeathed to charity. The court reasoned:

> The Foundation argues that it makes no difference if we conclude, as we did in section II, that the gross estate should include the value of the 600 HFA shares in the hands of Ahmanson, because the 99 nonvoting shares must have the same value for the charitable deduction as they have in the gross estate. The Foundation argues that inconsistent valuations, for these two purposes, would be incompatible with the orderly administration and application of the estate tax law. There is, certainly, an initial plausibility to the suggestion that fairness dictates that the same method of valuation be used in computing the gross estate and the charitable deduction. This initial plausibility, however, does not survive a close second look.
>
> The statute does not ordain equal valuation as between an item in the gross estate and the same item under the charitable deduction. Instead, it states that the value of the charitable deduction shall not exceed the value of the transferred property required to be included in the gross estate. 26 U.S.C. §2055(d). Moreover, the statutory scheme specifically requires a lower valuation for the charitable deduction than for the same item within the gross estate under certain circumstances. If the alternate valuation date is used and the property becomes more valuable by virtue of a contingency occurring between the date of death and the alternate valuation date, the higher value is included in the gross estate, but the lower value is used in computing the charitable deduction. 26 U.S.C. § 2032(b).
>
> In light of the purpose of the charitable deduction to encourage gifts to charity, it seems doubtful that Congress intended to give as great a charitable deduction when the testamentary plan diminishes the value of the charitable property as it would when the testamentary plan conveys the full value of the property to the charity intact. That is, the intent of encouraging charitable gifts suggests the further policy of encouraging greater rather than lesser charitable gifts. By severing the voting power of the stock from its economic entitlement, and giving only the economic entitlement to charity, Ahmanson

Furthermore, when the trustee caused controlling stock bequeathed to charity to be redeemed for a value based on discounts for lack of control, the charitable deduction was correspondingly reduced, and the estate was assessed penalties.[2720]

II.O.4. Effect of Buy-Sell on Reasonable Compensation Arguments

In recharacterizing deductible compensation as nondeductible dividends, the Tax Court in 2016 held that an independent investor[2721] would have demanded a return on investment as a shareholder.[2722]

> reduced the value of the stock to the charity. In the present case, the district judge found that the reduction in value was relatively small. Under other circumstances, however, the reduction in value might be substantial. The proper administration of the charitable deduction cannot ignore such differences in the value actually received by the charity.
>
> Thus there are compelling considerations in conflict with the initially plausible suggestion that valuation for purposes of the gross estate must always be the same as valuation for purposes of the charitable deduction. When the valuation would be different depending on whether an asset is held in conjunction with other assets, the gross estate must be computed considering the assets in the estate as a block. Otherwise, as discussed above, the testator would be able to produce an artificially low valuation by manipulatively disbursing complimentary assets into the hands of different beneficiaries—only to have those beneficiaries recombine the assets in their more valuable arrangements at some later time. The valuation of these same sorts of assets for the purpose of the charitable deduction, however, is subject to the principle that the testator may only be allowed a deduction for estate tax purposes for what is actually received by the charity—a principle required by the purpose of the charitable deduction.
>
> Therefore the district judge erred in concluding that the valuation of the 99 nonvoting shares of Ahmanco stock would be the same for the purpose of the charitable deduction and for purpose of the gross estate. The district judge should recompute the taxable estate, beginning with a value in the gross estate equal to the 100 shares of Ahmanco undiminished by the 3 percent reduction for the nonvoting status of the 99 shares. The charitable deduction should then be computed on the basis of that 3 percent decrease in value that resulted from the severance of the voting rights from these 99 shares.

[2720] *Estate of Dieringer v. Commissioner*, 146 T.C. No. 8 (2016), reasoning:

> We do not believe that Congress intended to allow as great a charitable contribution deduction where persons divert a decedent's charitable contribution, ultimately reducing the value of property transferred to a charitable organization. This conclusion comports with the principle that if a trustee is empowered to divert the property … to a use or purpose which would have rendered it, to the extent that it is subject to such power, not deductible had it been directly so bequeathed … the deduction will be limited to that portion, if any, of the property, or fund which is exempt from an exercise of the power. Sec. 20.2055-2(b)(1), Estate Tax Regs. Eugene and his brothers thwarted decedent's testamentary plan by altering the date-of-death value of decedent's intended donation through the redemption of a majority interest as a minority interest.
>
> The trust did not transfer decedent's bequeathed shares nor the value of the bequeathed shares to the foundation. Accordingly, we hold that the estate is not entitled to the full amount of its claimed charitable contribution deduction.

In sustaining the penalty, the court reasoned:

> DPI's lawyer's advice regarding the charitable contribution deduction was based on an errant appraisal. The date-of-death appraisal and the redemption appraisal--performed only seven months apart--differed substantially in value. The estate knew that a significant percentage of the value of decedent's bequeathed shares was not passing to the foundation and that Eugene and his brothers were acquiring a majority interest in DPI at a discount.

In that particular case, the net book value, determined on a cash basis, was sufficient to justify the IRS' conclusion that a particular portion of distributions constituted dividends. Consider, however, that a buy-sell agreement might constitute evidence of a company's value that might support an IRS attack asserting that the corporation's value is higher and that therefore distributions taxable as nondeductible dividends should be higher:

- Generally, a business is worth the present value of its future profits, as they are distributed annually or upon liquidation.[2723]

- Therefore, if a company has no profits, it has no value. Conversely, if a company has value but does not report profits, then presumably either the value is based on expected future profits based on efforts that have not yet generated results or the expenses are overstated.

- Appraisals of controlling interests in business often adjust compensation to what the appraisers believe is reasonable. These appraisals might be dangerous to a C corporation, that does not want its compensation deductions to be denied.

C corporation owners often assert that compensation to zero out income is reasonable, yet the business has value to an investor. The IRS might asset that the latter is an admission of value on which dividends should be paid. An advisor might consider addressing this issue very directly with the client and revisiting choice of entity in light of a possible intellectual inconsistency that might come back to bite the taxpayer in the long run.

A seller-financed buyout is best done using a partnership,[2724] so consider converting to a partnership to avoid these issues,[2725] which does not necessarily mean paying otherwise avoidable self-employment tax.[2726] If converting to a partnership is not acceptable, consider making an S election.[2727]

II.P. Operations

Taxation of operations focuses on whether income from operations is taxed to the entity or to its owner(s), effect of contributed property on taxation of operations, to what extent are FICA taxes imposed, and miscellaneous issues.

[2721] Many cases have looked to the independent investor test in determining reasonable compensation. See fn. 28.

[2722] *Brinks Gilson & Lione A Professional Corporation v. Commissioner*, T.C. Memo. 2016-20, discussed in fn. 28.

[2723] See part III.C Fairness Within Families; Valuation.

[2724] See part II.Q.1.a Contrasting Ordinary Income and Capital Scenarios on Value in Excess of Basis.

[2725] See part II.E.7.c Flowcharts: Migrating Existing Corporation into Preferred Structure.

[2726] See parts II.E.5 Recommended Long-Term Structure for Pass-Throughs – Description and Reasons and II.E.6 Recommended Partnership Structure – Flowchart. See the paragraph that includes fn. 709 for avoiding self-employment tax and when one might not want to avoid self-employment tax.

II.P.1. Income Taxation of Operations

II.P.1.a. Allocations of Income in Partnerships and S corporations

Partnership income taxation of owners is more complex but more flexible than S corporation income taxation of owners. Defining the ownership in a partnership can be challenging.[2728] Although receiving K-1s after the original due date of a return is aggravating, a taxpayer who uses estimates rather than actual K-1 amounts can be penalized.[2729]

Also see part III.B.2.j Tax Allocations upon Change of Interest.

II.P.1.a.i. Allocations of Income in Partnerships

II.P.1.a.i.(a). General Rules for Allocations of Income in Partnerships

Allocation of income, gain, loss, deductions and credits among partners are governed by Code § 704(b) and Reg. § 1.704-1. These provisions set up a rule that requires the allocation of such income, gain, loss, deduction, or credit to have substantial economic effect or to be in accordance with the partner's interest in the partnership. These rules are set up to ensure that, when a partner is allocated income, the partner is able to enjoy the economic benefit associated with that income, or that when he is allocated economic loss, the partner suffers the burden of that loss. This allocation is usually achieved through the use of partner capital accounts, that, in most basic terms, are increased by a partner's contributions or share of income and are decreased by distributions or the partner's share of a loss.[2730] The goal of the capital account is to track the distribution amount a partner would receive if the partnership sold all of its assets at book value, paid off all liabilities, and then distributed any remaining cash to the partners in liquidation of the partnership.

Allocations of gross income in preferred partnerships would tend to be based on the ratio of a partnership's overall distributive share of profit for the year, divided by all partners'

[2728] See Banoff, FAQ-Filled Guidance on Computing a Partner's Interest in Profits, Losses, and Capital, *Journal of Taxation*, April and May 2009 (two-part article). See also Banoff, "Identifying Partners' Interests in Profits and Capital: Uncertainties, Opportunities and Traps," *Taxes* (CCH) 3/1/2007.

[2729] *Sampson v. Commissioner*, T.C. Memo. 2013-212.

[2730] Reg. § 1.704-1(b)(2)(iv). A partner's capital account is increased by the fair market value, not basis, of assets that partner contributes. Reg. § 1.704-1(b)(2)(iv)(d). The fair market value assigned to property contributed to a partnership, property distributed by a partnership, or property otherwise revalued by a partnership, will be regarded as correct, provided that (1) such value is reasonably agreed to among the partners in arm's-length negotiations, and (2) the partners have sufficiently adverse interests. Reg. § 1.704-1(b)(2)(iv)(h)(1). In calculating book-tax differences under Code § 704(c), A partnership may use different methods with respect to different items of contributed property, provided that the partnership and the partners consistently apply a single reasonable method for each item of contributed property and that the overall method or combination of methods are reasonable based on the facts and circumstances and consistent with the purpose of Code § 704(c). Reg. § 1.704-3(a)(2). For events causing accounts to be revalued, see part II.C.7 Maintaining Capital Accounts (And Be Wary of "Tax Basis" Capital Accounts), especially fn. 422.

distributive share of profit for the year, unless special allocations with substantial economic effect provide otherwise.[2731]

Losses that generate or exacerbate a negative capital account complicate the issue. If a partner's capital account has a deficit balance following the liquidation of the partnership interest,[2732] the partner must be unconditionally obligated to restore the amount of such deficit balance to the partnership by the end of such taxable year,[2733] which amount shall, when the partnership liquidates, be paid to creditors of the partnership or distributed to other partners in accordance with their positive capital account balances.[2734] In most cases, however, those wanting partnership income taxation use a limited liability company or other entity that blocks personal liability and do not wish to have such a deficit restoration obligation (DRO). Instead of a DRO, a partnership agreement may contain a "qualified income offset."[2735] A "qualified income offset" is a provision that a partner who unexpectedly receives an adjustment, allocation, or distribution described in Reg. § 1.704-1(b)(2)(ii)(d)(4),[2736] (5),[2737] or (6)[2738] will be allocated items of income and gain (consisting of a pro rata portion of each item of partnership income, including gross income, and gain for such year) in an amount and manner sufficient to eliminate such deficit balance as quickly as possible.[2739] (However, I am unsure that there is a consensus about what it means to unexpectedly receive such an adjustment, allocation, or distribution.) Allocations of items of income and gain made pursuant to the qualified income offset are deemed to be made in accordance with the partners' interests in the partnership if the partnership determines and maintains capital

[2732] As determined after taking into account various capital account adjustments for the partnership taxable year during which such liquidation occurs.

[2733] Or, if later, within 90 days after the date of such liquidation.

[2734] Reg. § 1.704-1(b)(2)(ii)(b)(3).

[2735] Reg. § 1.704-1(b)(2)(ii)(d)(3).

[2736] Reg. § 1.704-1(b)(2)(ii)(d)(4) provides for:

> Adjustments that, as of the end of such year, reasonably are expected to be made to such partner's capital account under paragraph (b)(2)(iv)(k) of this section for depletion allowances with respect to oil and gas properties of the partnership.

[2737] Reg. § 1.704-1(b)(2)(ii)(d)(5) provides for:

> Allocations of loss and deduction that, as of the end of such year, reasonably are expected to be made to such partner pursuant to section 704(e)(2), section 706(d), and paragraph (b)(2)(ii) of § 1.751-1.

[2738] Reg. § 1.704-1(b)(2)(ii)(d)(6) provides for:

> Distributions that, as of the end of such year, reasonably are expected to be made to such partner to the extent they exceed offsetting increases to such partner's capital account that reasonably are expected to occur during (or prior to) the partnership taxable years in which such distributions reasonably are expected to be made (other than increases pursuant to a minimum gain chargeback under paragraph (b)(4)(iv)(e) of this section or under § 1.704-2(f); however, increases to a partner's capital account pursuant to a minimum gain chargeback requirement are taken into account as an offset to distributions of nonrecourse liability proceeds that are reasonably expected to be made and that are allocable to an increase in partnership minimum gain.

[2739] Reg. § 1.704-1(b)(2)(ii)(d)(6).

accounts under Reg. § 1.704-1(b)(2)(iv)[2740] and liquidating distributions are made in accordance with the positive capital account balances of the partners, as determined after taking into account various capital account adjustments[2741] for the partnership taxable year during which such liquidation occurs.[2742] (Once a loss is allocated, the partner also needs to satisfy various other rules to deduct the loss.[2743])

Special allocation rules govern contributions of property and the income, gain, loss, and deductions associated with contributed property. Under Code § 704(c), a contributed property's income, gain, loss, and deductions[2744] are allocated to all partners to account for differences between the partnership's basis in the property and the fair market value of the property at the time of its contribution.[2745] This allocation ensures that the right person, the contributing partner, will realize any net pre-contribution gain or loss.[2746]

[2740] Reg. § 1.704-1(b)(2)(ii)(b)(1).

[2741] Reg. § 1.704-1(b)(2)(ii)(b)(2).

[2742] Reg. § 1.704-1(b)(2)(ii)(d)(6).

[2743] See generally part II.G.3 Limitations on Losses and Deductions; Loans Made or Guaranteed by an Owner.

[2744] Regarding book-tax depreciation differences, see Reg. §§ 1.704-1(b)(2)(iv)(g)(3) (book depreciation) and 1.704-3 (accounting for book-tax differences). Amoni and Schmalz, Section 704(c): The Disparity Offset Method Provides Answers to Difficult Questions, *Journal of Taxation* (WG&L), Vol. 114, No. 4 (Apr. 2011), suggests a way to apply the mechanics of existing regulations in this area. For the impact on allocating depreciation deductions and a basic overview of some tax planning flexibility on that issue, see Lawson, Using Curative and Remedial Allocations to Enhance the Tax Benefits of FLPs, 36 *Estate Planning*, No. 8, 12 (August 2009); however, note that remedial allocations might be attacked under Reg. § 1.701-2(b) or under Reg § 1.704-3(a)(1), the latter added by T.D. 9485 (6/8/2010). Note also that special allocations for book purposes might raise Code § 2701 issues, an issue that is not discussed in that article, which focuses on allocations for income tax purposes. See III.B.7.b Code § 2701 Overview, and III.B.7.c, Code § 2701 Interaction with Income Tax Planning, for a discussion of Code § 2701.

[2745] Code § 704(c)(1)(A).

[2746] The purpose of Code § 704(c) is to prevent the shifting of tax consequences among partners with respect to precontribution gain or loss. Reg. § 1.704-3(a)(1), which further provides:

> Under section 704(c), a partnership must allocate income, gain, loss, and deduction with respect to property contributed by a partner to the partnership so as to take into account any variation between the adjusted tax basis of the property and its fair market value at the time of contribution. Notwithstanding any other provision of this section, the allocations must be made using a reasonable method that is consistent with the purpose of section 704(c). For this purpose, an allocation method includes the application of all of the rules of this section (*e.g.*, aggregation rules). An allocation method is not necessarily unreasonable merely because another allocation method would result in a higher aggregate tax liability. Paragraphs (b), (c), and (d) of this section describe allocation methods that are generally reasonable. Other methods may be reasonable in appropriate circumstances. Nevertheless, in the absence of specific published guidance, it is not reasonable to use an allocation method in which the basis of property contributed to the partnership is increased (or decreased) to reflect built-in gain (or loss), or a method under which the partnership creates tax allocations of income, gain, loss, or deduction independent of allocations affecting book capital accounts. See § 1.704-3(d). Paragraph (e) of this section contains special rules and exceptions. The principles of this paragraph (a)(1), together with the methods described in paragraphs (b), (c) and (d) of this section, apply only to contributions of property that are otherwise respected. See for example § 1.701-2. Accordingly, even though a partnership's allocation method may be

Except for personal property included in the same general asset account of the contributing partner and the partnership under Code § 168,[2747] personal property with a basis equal to zero,[2748] certain inventory,[2749] and a securities partnership making certain reverse-Code § 704(c) allocations[2750] to gains and losses from qualified financial assets,[2751] Code § 704(c) and Reg. § 1.704-3 apply on a property-by-property basis.[2752] A partnership may use different methods with respect to different items of contributed property, provided that the partnership and the partners consistently apply a single reasonable method for each item of contributed property and that the overall method or combination of methods are reasonable based on the facts and circumstances and consistent with the purpose of Code § 704(c).[2753] Using one method for appreciated property and another method for depreciated property may be unreasonable.[2754] A new partnership formed as the result of the termination of a partnership under Code § 708(b)(1)(B) is not required to use the same method as the terminated partnership with respect to Code § 704(c) property deemed contributed to the new partnership by the terminated partnership under Reg. § 1.708-1(b)(1)(iv).[2755]

Code § 704(c)(1)(B) prevents a partner from avoiding Code § 704(c) gain or loss by contributing property and having the partnership turn around and distribute it to another partner.[2756]

A partner cannot erase the Code § 704(c) taint by transferring the partner's interest to a third party. When a partnership interest is transferred, any tax attributes associated with

---

> described in the literal language of paragraphs (b), (c) or (d) of this section, based on the particular facts and circumstances, the Commissioner can recast the contribution as appropriate to avoid tax results inconsistent with the intent of subchapter K. One factor that may be considered by the Commissioner is the use of the remedial allocation method by related partners in which allocations of remedial items of income, gain, loss or deduction are made to one partner and the allocations of offsetting remedial items are made to a related partner.

[2747] Reg. § 1.704-3(e)(2)(i).

[2748] Reg. § 1.704-3(e)(2)(ii).

[2749] Reg. § 1.704-3(e)(2)(iii) excludes:

> For partnerships that do not use a specific identification method of accounting, each item of inventory, other than qualified financial assets (as defined in paragraph (e)(3)(ii) of this section.).

[2750] For a description of reverse-Code § 704(c) allocations of gain on sale, see part II.Q.8.b.i.(e) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value, especially fns. 3932-3935.

[2751] See part II.P.1.a.i.(b) Special Rule for Allocations of Income in Securities Partnerships.

[2752] Reg. § 1.704-3(a)(2).

[2753] Reg. § 1.704-3(a)(2).

[2754] Reg. § 1.704-3(a)(2).

[2755] Reg. § 1.704-3(a)(2).

[2756] See part II.Q.8.b.i.(e) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value.

the interest travel from the old partner to the new partner, and the new partner becomes the "contributing partner."[2757]

In addition to allocating gain or loss, Code § 704(c) also requires allocations of depreciation and amortization related to contributed property.

Partnerships may revalue assets for book purposes when certain events occur, so that partners' capital accounts better reflect the partners' economic interests at the time of those events. The events may include: [2758]

- a contribution of money or other property (other than a de minimis amount) to the partnership by a new or existing partner as consideration for an interest in the partnership,

- the liquidation of the partnership,

- a distribution of money or other property (other than a de minimis amount) by the partnership to a retiring or continuing partner as consideration for an interest in the partnership, or

- the grant of an interest in the partnership (other than a de minimis interest), as consideration for the provision of services to or for the benefit of the partnership by an existing partner acting in a partner capacity, or by a new partner acting in a partner capacity or in anticipation of being a partner.[2759]

When the partnership adjusts capital accounts to reflect such an event:[2760]

- The adjustments must be based on the fair market value of partnership property on the date of adjustment.

- The adjustments must reflect the manner in which the unrealized income, gain, loss, or deduction inherent in such property (that has not been reflected in the capital accounts previously) would be allocated among the partners if there were a taxable disposition of such property for such fair market value on that date.

- The partnership agreement must require that the partners' capital accounts be adjusted (as provided in regulations) for allocations to them of depreciation, depletion, amortization, and gain or loss, as computed for book purposes, with respect to such property.

- The partnership agreement must require that the partners' distributive shares of depreciation, depletion, amortization, and gain or loss, as computed for tax

[2758] Reg. § 1.704-1(b)(2)(iv)(f)(5). See part II.C.7 Maintaining Capital Accounts (And Be Wary of "Tax Basis" Capital Accounts), especially fn. 422.

[2759] This last bullet point generally refers to the issuance of a profits interest, as discussed in II.M.1 Taxation on Formation of Entity: Comparison between Partnership and Corporation.

[2760] Reg. § 1.704-1(b)(2)(iv)(f), which is reproduced in fn. 422 in part II.C.7 Maintaining Capital Accounts (And Be Wary of "Tax Basis" Capital Accounts).

purposes, with respect to such property be determined so as to take account of the variation between the adjusted tax basis and book value of such property in the same manner as under Code § 704(c).

- The adjustments must be made principally for a substantial non-tax business purpose on account of one of the events described above.

When this revaluation occurs, book-tax differences arise, not necessarily because of the contribution of property, but rather because the book value of the partnership's property has changed. Allocating the responsibility for these new book-tax differences is called a reverse-Code § 704(c) allocation.[2761] Partnerships are not required to use the same allocation method for reverse-Code § 704(c) allocations as for contributed property, even if at the time of revaluation the property is already subject to Code § 704(c) and Reg. § 1.704-3(a).[2762] In addition, partnerships are not required to use the same allocation method for reverse-Code § 704(c) allocations each time the partnership revalues its property.[2763] A partnership that makes allocations with respect to revalued property must use a reasonable method that is consistent with the purposes of Code § 704(b), (c).[2764] A partnership making adjustments under Reg. § 1.743-1(b) or 1.751-1(a)(2) must use Reg. § 1.704-3 to account for built-in gain or loss under Code § 704(c).[2765] Special rules apply to such allocations when goodwill or similar assets are being amortized.[2766]

If one partner transfers a partnership interest to another person, the transferee receives the transferor's capital account. Also see part III.B.2.j.iii Tax Allocations upon Change of Interest in a Partnership.

[2761] Reg. § 1.704-3(a)(6)(i) provides:

> The principles of this section apply to allocations with respect to property for which differences between book value and adjusted tax basis are created when a partnership revalues partnership property pursuant to § 1.704-1(b)(2)(iv)(f) or 1.704-1(b)(2)(iv)(s) (reverse section 704(c) allocations).

For a description of reverse-Code § 704(c) allocations of gain on sale, see part II.Q.8.b.i.(e) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value, especially fns. 3932-3935.

[2762] Reg. § 1.704-3(a)(6)(i).

[2763] Reg. § 1.704-3(a)(6)(i).

[2764] Reg. § 1.704-3(a)(6)(i).

[2765] Reg. § 1.704-3(a)(6)(ii).

[2766] Rev. Rul. 2004-49 held:

> If, pursuant to § 1.704-1(b)(2)(iv)(f), a partnership revalues a section 197 intangible that was amortizable in the hands of the partnership, then the § 197 anti-churning rules do not apply and the partnership may make reverse § 704(c) allocations (including curative and remedial allocations) of amortization to take into account the built-in gain or loss from the revaluation of the intangible. If the revalued section 197 intangible was not amortizable in the hands of the partnership, then the partnership may make remedial, but not traditional or curative, allocations of amortization to take into account the built-in gain or loss from the revaluation of the intangible, provided that such allocations are not limited by § 1.197-2(h)(12)(vii)(B).

Because of very complicated estate and gift tax rules governing family businesses,[2767] generally family partnerships should be set up with one class of partnership interests. In other words, each partner's capital account is proportionate to that partner's percentage in interest in profits and losses.[2768] However, businesses not involving family members can be more flexible, allocating different tiers of income as rewards for each partner's relative contributions of capital or services. In any event, the tax allocations need to be consistent with the economic arrangements; the tax jargon is that tax allocations must have a "substantial economic effect."

Whether the partnership has one or multiple classes of equity, issues arise when a partner contributes property whose value exceeds its basis. This excess value is known as Code § 704(c) responsibility. When contributed property is subjected to depreciation or amortization or is later sold, the contributing partner receives a special allocation to properly take into account that partner's Code § 704(c) responsibility. Beware if the contribution and corresponding allocation of tax items with respect to the property are made with a view to shifting the tax consequences of built-in gain or loss among the partners in a manner that substantially reduces the present value of the direct and indirect partners' aggregate tax liability.[2769]

Hedge funds are complicated partnership tax structures.[2770]

II.P.1.a.i.(b). Special Rule for Allocations of Income in Securities Partnerships

Below is a discussion about allocating income in securities partnerships. This discussion focuses on a subset of allocations described in part II.P.1.a.i.(a) General Rules for Allocations of Income in Partnerships, which upon any distribution from a partnership may have the tax consequences described in part II.Q.8.b.i.(e) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value. If securities partnerships have money flowing and out, they should consider not only those rules but also the rules described in parts II.M.3.e Exception: Disguised Sale (exception to the general idea that the formation of a partnership is not a taxable event) and II.Q.8.b.i.(c) Disguised Sale from Partnership to Partner, as well concerns that distributions of securities from a partnership to a partner may be treated as cash distributions, as described in part II.Q.8.b.i.(b) Code § 731(c): Distributions of Marketable Securities (Or Partnerships Holding Them). The disguised sale rules generally look to entrepreneurial risk, and the risk of disguised sales from a partnership with many investors may be smaller than that with many investors; however, in any event, a contribution of cash or property and a distribution of cash or property that occur

[2767] See parts III.B.7.b Code § 2701 Overview and III.B.7.c Code § 2701 Interaction with Income Tax Planning.
[2768] See part III.B.7.b.ii Certain Exclusions from Code § 2701, fns. 5571-5572.
[2769] Reg. § 1.704-3(a)(10), added by T.D. 9485 (6/8/2010). For the regulation's text, see fn. 2777 in part II.P.1.a.i.(b) Special Rule for Allocations of Income in Securities Partnerships.
[2770] Miller and Bertrand, "Federal Income Tax Treatment of Hedge Funds, Their Investors, and Their Managers," *Tax Lawyer*, pp. 309-397, Vol. 65, No. 2 (Winter 2002).

within two years tends to trigger a disguised sale reporting requirement, even if the transaction does not constitute a disguised sale.[2771]

Tracking Code § 704(c) and reverse-Code § 704 (c) [2772] responsibility often is administratively cumbersome. Rev. Proc. 2007-59, § 2 points out:

> .01. To prevent the shifting of tax consequences among partners with respect to precontribution gain or loss, section 704(c) requires partnerships to allocate income, gain, loss, and deductions with respect to property contributed by a partner so as to take into account any variation between the adjusted tax basis of the property and its fair market value at the time of the contribution. These allocations must be made using a reasonable method that is consistent with the purpose of section 704(c). Section 1.704-3(a)(6) provides that similar rules apply to differences between book value and tax basis that are created by a revaluation of partnership assets pursuant to § 1.704-1(b)(2)(iv)(f) (reverse section 704(c) allocations).
>
> .02. Section 1.704-3(a)(2) provides that section 704(c) allocations are generally made on a property-by-property basis. Therefore, built-in gains and losses from different items of contributed or revalued property generally cannot be aggregated.

See part II.C.7 Maintaining Capital Accounts (And Be Wary of "Tax Basis" Capital Accounts), especially fn. 422 (quoting the regulation governing revaluations).

For purposes of making reverse-Code § 704(c) allocations, a securities partnership may aggregate gains and losses from qualified financial assets using any reasonable approach that is consistent with the purpose of Code § 704(c).[2773] Once a partnership adopts an aggregate approach, that partnership must apply the same aggregate approach to all of its qualified financial assets for all taxable years in which the partnership qualifies as a securities partnership.[2774] Further below are approaches for aggregating reverse-Code § 704 (c) gains and losses that are generally reasonable.[2775] Other approaches may be reasonable in appropriate circumstances.[2776] In some circumstances, various Code § 704(c) methods, including the aggregate approaches described further below, are not reasonable.[2777] A partnership using an aggregate

[2771] See part II.M.3.e.i.(c) Disclosure Requirements, incorporated by reference by parts II.M.3.e Exception: Disguised Sale and II.Q.8.b.i.(c) Disguised Sale from Partnership to Partner

[2772] For a description of reverse-Code § 704(c) allocations of gain on sale, see part II.Q.8.b.i.(e) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value, especially fns. 3932-3935.

[2773] Reg. § 1.704-3(e)(3)(i).

[2774] Reg. § 1.704-3(e)(3)(i), expressly overriding Reg. § 1.704-3(a)(2) and (a)(6)(i).

[2775] Reg. § 1.704-3(e)(3)(i), referring to Reg. § 1.704-3(e)(3)(iv) and (v).

[2776] Reg. § 1.704-3(e)(3)(i).

[2777] Reg. § 1.704-3(e)(3)(i), referring to Reg. § 1.704-3(a)(10), titled, "Anti-abuse rule," which provides:

approach must separately account for any built-in gain or loss from contributed property.[2778]

When getting into details on the two aggregate approaches below, one finds that they limit the assets that can be aggregated and require one to go to an asset-by-asset approach if one later fails to qualify. Consider using one of the approaches without formally adopting it. For example, one might use an aggregate approach in practice for marketable securities and an asset-by-asset approach for unmarketable assets. Given that Reg. § 1.704-3(e)(3)(i) permits using any reasonable approach and given that the IRS views an aggregate approach as reasonable for marketable securities (or it would not have provided it), such a hybrid approach would seem to allow one to comply with the regulations without hamstringing one with the artificial rules that are imposed on using an aggregate method as a safe harbor. As a practical matter, given that using an aggregate method is intended as a reasonable shortcut to avoid laborious asset-by-asset tracking, an IRS examiner might need to do laborious asset-by-asset tracking to show that this method is unreasonable, going into such an ordeal with no reason to believe it would be productive. A potential drawback to this approach is that, if the IRS goes to this effort, reallocations might generate unfair results for partnerships that cannot opt out of the post-2017 audit regime.[2779]

A "qualified financial asset" is any personal property (including stock) that is actively traded.[2780] For a management company, it includes various additional assets, even if not

---

(i) *In general*. An allocation method (or combination of methods) is not reasonable if the contribution of property (or event that results in reverse section 704(c) allocations) and the corresponding allocation of tax items with respect to the property are made with a view to shifting the tax consequences of built-in gain or loss among the partners in a manner that substantially reduces the present value of the partners' aggregate tax liability. For purposes of this paragraph (a)(10), all references to the partners shall include both direct and indirect partners.

(ii) *Definition of indirect partner*. An indirect partner is any direct or indirect owner of a partnership, S corporation, or controlled foreign corporation (as defined in section 957(a) or 953(c)), or direct or indirect beneficiary of a trust or estate, that is a partner in the partnership, and any consolidated group of which the partner in the partnership is a member (within the meaning of § 1.1502-1(h))…. [The rest provides details on controlled foreign corporations and Code § 951(a).]

[2778] Reg. § 1.704-3(e)(3)(i).

[2779] See part II.G.18.c Audits of Partnership Returns.

[2780] Reg. § 1.704-3(e)(3)(ii)(A), which continues:

> Actively traded means actively traded as defined in § 1.1092(d)-1 (defining actively traded property for purposes of the straddle rules).

Reg. § 1.1092(d)-1(a) provides:

> *Actively traded*. Actively traded personal property includes any personal property for which there is an established financial market.

Reg. § 1.1092(d)-1(b)(1) provides:

> *In general*. For purposes of this section, an established financial market includes—
>
> (i) A national securities exchange that is registered under section 6 of the Securities Exchange Act of 1934 (15 U.S.C. 78f);
>
> (ii) An interdealer quotation system sponsored by a national securities association registered under section 15A of the Securities Exchange Act of 1934;
>
> (iii) A domestic board of trade designated as a contract market by the Commodities Futures Trading Commission;

actively traded.[2781] A "qualified financial asset" does not include a partnership interest, but a partnership (upper-tier partnership) that holds an interest in a securities partnership (lower-tier partnership) must take into account the lower-tier partnership's assets and qualified financial assets.[2782]

A partnership is a securities partnership if the partnership is either a management company that is registered with the SEC[2783] or an investment partnership, and the partnership makes all of its book allocations in proportion to the partners' relative book capital accounts (except for reasonable special allocations to a partner that provides management services or investment advisory services to the partnership).[2784] A partnership is an investment partnership if:[2785]

(i) On the date of each capital account restatement, the partnership holds qualified financial assets that constitute at least 90% of the fair market value of the partnership's non-cash assets; and

(ii) The partnership reasonably expects, as of the end of the first taxable year in which the partnership adopts an aggregate approach under Reg. § 1.704-3(e)(3), to make revaluations at least annually.

(iv) A foreign securities exchange or board of trade that satisfies analogous regulatory requirements under the law of the jurisdiction in which it is organized (such as the London International Financial Futures Exchange, the Marche a Terme International de France, the International Stock Exchange of the United Kingdom and the Republic of Ireland, Limited, the Frankfurt Stock Exchange, and the Tokyo Stock Exchange);

(v) An interbank market;

(vi) An interdealer market (as defined in paragraph (b)(2)(i) of this section); and

(vii) Solely with respect to a debt instrument, a debt market (as defined in paragraph (b)(2)(ii) of this section).

Reg. § 1.1092(d)-1(b)(2) defines various terms above. Reg. § 1.1092(d)-1(c) discusses notional principal contracts, and Reg. § 1.1092(d)-1(d) discusses debt linked to the value of personal property and may be part pf a straddle.

[2781] Reg. § 1.704-3(e)(3)(ii)(B), which lists those additional assets as:

notes, bonds, debentures, or other evidences of indebtedness; interest rate, currency, or equity notional principal contracts; evidences of an interest in, or derivative financial instruments in, any security, currency, or commodity, including any option, forward or futures contract, or short position; or any similar financial instrument.

[2782] Reg. § 1.704-3(e)(3)(ii)(C), which continues:

(1) In determining whether the upper-tier partnership qualifies as an investment partnership, the upper-tier partnership must treat its proportionate share of the lower-tier securities partnership's assets as assets of the upper-tier partnership; and

(2) If the upper-tier partnership adopts an aggregate approach under this paragraph (e)(3), the upper-tier partnership must aggregate the gains and losses from its directly held qualified financial assets with its distributive share of the gains and losses from the qualified financial assets of the lower-tier securities partnership.

[2783] Reg. § 1.704-3(e)(3)(iii)(B)(1), provides:

Management company. A partnership is a management company if it is registered with the Securities and Exchange Commission as a management company under the Investment Company Act of 1940, as amended (15 U.S.C. 80a).

[2784] Reg. § 1.704-3(e)(3)(iii)(A).

[2785] Reg. § 1.704-3(e)(3)(iii)(B)(2).

A partnership that establishes appropriate accounts for each partner for the purpose of taking into account each partner's share of the book gains and losses and determining each partner's share of the tax gains and losses may adopt the partial netting approach of making reverse-Code § 704 (c) allocations. [2786] Reg. § 1.704-3(e)(3)(iv) further provides:

> Under the partial netting approach, on the date of each capital account restatement, the partnership:
>
> (A) Nets its book gains and book losses from qualified financial assets since the last capital account restatement and allocates the net amount to its partners;
>
> (B) Separately aggregates all tax gains and all tax losses from qualified financial assets since the last capital account restatement; and
>
> (C) Separately allocates the aggregate tax gain and aggregate tax loss to the partners in a manner that reduces the disparity between the book capital account balances and the tax capital account balances (book-tax disparities) of the individual partners.

Reg. § 1.704-3(e)(3)(ix), Example (1), illustrates the following under the partial netting approach:

- Each partner has a single revaluation account that shows a net positive or negative book-tax difference.
- Recognized gains and recognized losses are accounted for separately in each of the next two bullet points.
- Recognized gains are allocated only to the partners with positive revaluation accounts, until the positive accounts are exhausted. After that, recognized gains are allocated in proportion to partnership interests.
- Recognized losses are allocated only to the partners with negative revaluation accounts, until the negative accounts are exhausted. After that, recognized losses are allocated in proportion to partnership interests.

A partnership that establishes appropriate accounts for each partner for the purpose of taking into account each partner's share of the book gains and losses and determining each partner's share of the tax gains and losses may also adopt the full netting approach

---

[2786] Reg. § 1.704-3(e)(3)(iv). Letter Ruling 201421001 (described more fully in fn. 307 in part II.B Limited Liability Company (LLC)) approved separate partnerships investing in equities or in fixed income funds using this method to track not only Code § 704(c) allocations but also reverse-Code § 704(c) allocations:

> provided that a contribution or revaluation of property and the corresponding allocation of tax items with respect to the property are not made with a view to shifting the tax consequences of built-in gain or loss among the partners in a manner that substantially reduces the present value of the partners' aggregate tax liability.

of making reverse-Code § 704 (c) allocations. [2787] Reg. § 1.704-3(e)(3)(v) further provides:

> Under the full netting approach, on the date of each capital account restatement, the partnership:
>
> (A) Nets its book gains and book losses from qualified financial assets since the last capital account restatement and allocates the net amount to its partners;
>
> (B) Nets tax gains and tax losses from qualified financial assets since the last capital account restatement; and
>
> (C) Allocates the net tax gain (or net tax loss) to the partners in a manner that reduces the book-tax disparities of the individual partners.

The character and other tax attributes of gain or loss allocated to the partners under these approaches must:[2788]

> (A) Preserve the tax attributes of each item of gain or loss realized by the partnership;
>
> (B) Be determined under an approach that is consistently applied; and
>
> (C) Not be determined with a view to reducing substantially the present value of the partners' aggregate tax liability.

Reg. § 1.704-3(e)(3)(ix), Example (2), illustrates the following under the full netting approach:

- Each partner has a single revaluation account that shows a net positive or negative book-tax difference.
- Recognized gains and losses are netted against each other.
- If the net is a gain, then this net recognized gains in allocated only to the partners with positive revaluation accounts, until the positive accounts are exhausted. After that, the recognized gain is allocated in proportion to partnership interests.
- If the net is a loss, then the recognized loss is allocated only to the partners with negative revaluation accounts, until the negative accounts are exhausted. After that, the recognized loss is allocated in proportion to partnership interests.

If a securities partnership adopts an aggregate approach under these rules and later fails to qualify as a securities partnership, it must make reverse-Code § 704 (c) allocations on an asset-by-asset basis after the date of disqualification.[2789] However, it is not required to disaggregate the book gain or book loss from qualified asset revaluations

---

[2787] Reg. § 1.704-3(e)(3)(v).
[2788] Reg. § 1.704-3(e)(3)(vi).
[2789] Reg. § 1.704-3(e)(3)(vii).

before the date of disqualification when making reverse-Code § 704 (c) allocations on or after the date of disqualification.[2790] A securities partnership revaluing its qualified financial assets pursuant to Reg. § 1.704-1(b)(2)(iv)(f) on or after the effective date of these rules may use any reasonable approach to coordinate with revaluations that occurred before these rules' effective date.[2791]

The IRS may, by published guidance or by letter ruling, permit aggregation of properties other than those described above, partnerships and partners not described above to aggregate gain and loss from qualified financial assets, and aggregation of qualified financial assets for purposes of making Code § 704(c) allocations in the same manner as that described above.[2792]

Letter Rulings have approved:

- Two separate partnerships, one holding equities and another holding fixed income, created on trust termination.[2793]

[2790] Reg. § 1.704-3(e)(3)(vii).

[2791] Reg. § 1.704-3(e)(3)(viii).

[2792] Reg. § 1.704-3(e)(4).

[2793] In Letter Ruling 201421001, a trust used two series LLCs – one invested in equities (X) and the other in fixed income securities (Y) – to distribute its investment assets to remaindermen. The IRS ruled:

(1) Before the distribution of interests in X and Y to the remainder beneficiaries, X and Y will be disregarded entities as long as they remain single member series of a single-member limited liability company (wholly-owned by trust) and items of income, deduction, credit, gains and losses with respect to assets held within X and Y should be reported directly on the trust's federal income tax returns (as if Trust continued to hold X and Y assets directly).

(2) Upon the distribution of interests in X and Y to the remainder beneficiaries, X and Y will be converted from disregarded entities to partnerships for federal tax purposes, and distribution of X and Y interests by the trust shall be treated as (i) a non-taxable pro rata distribution of X and Y assets (subject to any related liabilities) to the remainder beneficiaries (in accordance with the fractional share of Trust residue to which each remainder beneficiary, respectively, is entitled), as if such assets had been distributed outright from Trust to the remainder beneficiaries; followed by (ii) a deemed capital contribution of those same assets by the remainder beneficiaries to X and Y in a non-taxable exchange for interests in X and Y.

(3) Once X and Y become partnerships for federal tax purposes, to avoid taxation under Code § 721(b) any later in-kind trust distribution of a diversified portfolio of stocks and securities that is transferred as an addition to X or Y on behalf of some or all remainder beneficiaries who hold or thereby acquire membership interests in X or Y shall be treated as: (i) a non-taxable pro rata distribution of such trust assets (subject to any related liabilities) to the remainder beneficiaries holding or thereby acquiring membership interests in X or Y (in accordance with the proportionate fractional share of the trust residue to which each remainder beneficiary, respectively, is entitled), as if such assets had been distributed outright from the trust to such remainder beneficiaries; followed by (ii) a deemed capital contribution of those same assets by such remainder beneficiaries to X or Y in a non-taxable exchange for membership interests in X or Y. See part II.M.3 Buying into or Forming a Partnership.

(4) X's and Y's use of the partial netting approach as defined in Reg. § 1.704-3(e)(3)(iv) for aggregating gains and losses from qualified financial assets for the purpose of making reverse Code § 704(c) allocations is reasonable within the meaning of Reg. § 1.704-3(e)(3). See part II.Q.8.b.i.(e) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a

- Partnerships between a voluntary employees' beneficiary association (VEBA) and plans providing for pension and welfare benefits of a common employer and its current and former subsidiaries.[2794]

- A partnership was allowed to apply this rule to Code § 704(c) allocations when applying the usual Code § 704(c) rules would have been two cumbersome, if a contribution or revaluation of the property and the corresponding allocation of tax items with respect to the property are not made with a view to shifting the tax consequences of built-in gain or loss among the partners in a manner that substantially reduces the present value of the partners' aggregate tax liability.[2795]

- Use of the partial netting approach when three partnerships merged.[2796]

Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value.

(5) X and Y have permission to aggregate built-in gains and losses from qualified financial assets contributed to X and Y by a partner with built-in gains and built-in losses from revaluations of qualified financial assets held by X and Y for purposes of making allocations under Code § 704(c)(1)(A) and Reg. § 1.704-3(a)(6). See parts II.Q.8.b.i.(e) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value, especially fns. 3932-3935 (describing reverse-Code § 704(c) allocations, which is where a partner makes a disproportionate contribution or receives a disproportionate distribution when the partner has assets with values not equal to basis, which book-tax difference needs to be accounted for) and II.P.1.a.i.(b) Special Rule for Allocations of Income in Securities Partnerships.

(6) After X and Y become partnerships for federal tax purposes, in-kind distributions of qualified financial assets from X and Y to one or more of its members will not be deemed a distribution of money under Code § 731(c). As a result, an in-kind distribution will not be treated as a "sale or exchange" and the distributee member should not recognize any gain or loss in connection therewith. Further, both (i) the "aggregate built-in gain or loss" at the partnership level, and (ii) the portion of such "aggregate built-in gain or loss" allocable to the partner receiving such distribution, may be adjusted by the full amount of net unrealized gain or loss in the assets so distributed.

See part II.Q.8.b.i.(a) Code § 731: General Rule for Distributions. For rules on revaluing capital accounts on certain events, see part II.C.7 Maintaining Capital Accounts (And Be Wary of "Tax Basis" Capital Accounts), especially fn. 422.

[2794] Letter Rulings 201028016 and 201028017.

[2795] Letter Ruling 201032003.

[2796] Letter Ruling 201710008 held:

> … Surviving Partnership's use of the partial netting approach for making reverse § 704(c) allocations is a reasonable approach within the meaning of § 1.704-3(e)(3), provided that a contribution or revaluation of property and the corresponding allocation of tax items with respect to the property are not made with a view to shifting the tax consequences of built-in gain or loss among the partners in a manner that substantially reduces the present value of the partners' aggregate tax liability….
>
> … if Surviving Partnership uses the partial netting approach to make § 704(c) allocations, including reverse § 704(c) allocations, this will be a reasonable method within the meaning of § 1.704-3(a)(1), and is permitted by the Commissioner under § 1.704-3(e)(4)(iii), provided that a contribution or revaluation of property and the corresponding allocation of tax items with respect to the property are not made with a view to shifting the

Rev. Proc. 2007-59 allows certain partnerships to aggregate gains and losses from an expanded class of qualified financial assets in applying the above rules. It provides special rules for a "Qualified Partnership," which is a partnership that satisfies the following requirements:[2797]

(1) the partnership makes all of its book allocations in proportion to the partners' relative book capital accounts (except for reasonable special allocations to a partner that provides management services or investment advisory services to the partnership);

(2) the partnership reasonably expects, as of the end of the first taxable year in which the partnership adopts an aggregate approach under this revenue procedure, to make revaluations of qualified financial assets at least four times annually;

(3) on the date of each capital account restatement during the taxable year, the partnership holds qualified financial assets that constitute at least 90 percent of the partnership's non-cash assets;

(4) the partnership reasonably expects, as of the first day of each taxable year for which the partnership seeks to aggregate under this revenue procedure, that the partnership

(a) will have at least 10 unrelated partners at all times during the taxable year; and

(b) will make at least 200 trades of qualified financial assets during the taxable year, the aggregate value of which will comprise at least 50% of the book value of the partnership's assets (including cash) as of the first day of the taxable year; and

(5) the application of the aggregation method to reverse section 704(c) allocations under this revenue procedure is not made with a view to shifting the tax consequences of built-in gain or loss among the partners in a manner

---

tax consequences of built-in gain or loss among the partners in a manner that substantially reduces the present value of the partners' aggregate tax liability.

This ruling is limited to allocations of gain or loss from the sale or other disposition of qualified financial assets made under § 704(b), § 704(c)(1)(A), and § 1.704-3(a)(6). Specifically, no opinion is expressed concerning allocations of items other than items of gain or loss from the sale or other disposition of qualified financial assets, or the aggregation of built-in gains and losses from qualified financial assets contributed to Surviving Partnership by any person other than Terminating Partnership A and Terminating Partnership B. Surviving Partnership must maintain sufficient records to enable it and its partners to comply with § 704(c)(1)(B) and § 737. Additionally, this ruling applies only to the contributions to Surviving Partnership made in connection with the mergers of Terminating Partnership A and Terminating Partnership B into Surviving Partnership and not to any other contributions or any other future partner.

Letter Ruling 201710007 seemed to be the same as Letter Ruling 201710008.

[2797] § 3.01.

that substantially reduces the present value of the partners' aggregate tax liability.

In applying the above definition, "partners are treated as related if they are related within the meaning of sections 267(b) or 707(b)."[2798]

In applying Rev. Proc. 2007-59, "qualified financial assets" are:[2799]

(1) those assets described in § 1.704-3(e)(3)(ii)(A) and (B);

(2) any interest in a partnership that is traded on an established securities market or readily tradable on a secondary market or the substantial equivalent thereof within the meaning of § 1.7704-1(c); and

(3) any interest owned by the partnership (the upper-tier partnership) in a partnership (the lower-tier partnership) that represents it is a securities partnership or a Qualified Partnership, provided that such interest is

  (i) less than 10 percent of the capital and profits of the lower-tier partnership and that the upper-tier partnership does not actively or materially participate in the management or operations of the lower-tier partnership; and

  (ii) less than 5 percent of the total book value of the upper-tier partnership's assets (including cash) as of the first day of the taxable year.

Rev. Proc. 2007-59 grants permission to any Qualified Partnership to aggregate built-in gains and losses from qualified financial assets for purposes of making reverse-Code § 704 (c) allocations under Reg. § 1.704-3(e)(3).[2800] Once a partnership adopts an aggregate approach under this revenue procedure, that partnership must apply the same aggregate approach to all of its qualified financial assets for all taxable years in which the partnership qualifies as a Qualified Partnership.[2801] However, a partnership may choose not to aggregate all of the partnership's qualified financial assets if such qualified assets do not exceed in the aggregate 30% of the book value of the partnership's non-cash assets at the time any such qualified financial assets is acquired.[2802]

A Qualified Partnership that adopts an aggregate approach under Rev. Proc. 2007-59 and later fails to qualify as a Qualified Partnership must make reverse-Code § 704 (c) allocations on an asset-by-asset basis after the date of disqualification.[2803] The partnership, however, is not required to disaggregate the book gain or book loss from

[2798] § 3.01.
[2799] § 3.02.
[2800] § 4.01.
[2801] § 4.01, citing Reg. § 1.704-3(e)(3)(i).
[2802] § 4.01.
[2803] § 4.02.

qualified asset revaluations before the date of disqualification when making reverse-Code § 704 (c) allocations on or after the date of disqualification.[2804]

Rev. Proc. 2001-36 grants automatic permission for certain securities partnerships to aggregate contributed property for purposes of making Code § 704(c) allocations.[2805] Rev. Proc. 2001-36[2806] provides that a Qualified Master-Feeder Structure (QMFS) may "aggregate built-in gains and losses from contributed qualified financial assets for purposes of making section 704(c) and reverse section 704(c) allocations." [2807] Section 4.02 provides:

> A QMFS is created where two or more investors contribute cash or qualified financial assets to a Master Portfolio in exchange for beneficial interests in the Master Portfolio. To qualify as a QMFS, the following requirements must be met:
>
> (1) Each partner in the Master Portfolio is a Feeder Fund, or an investment advisor, principal underwriter, or manager of the Master Portfolio;
>
> (2) Each Feeder Fund contributes only cash and/or a portfolio of diversified stocks and securities that satisfies the 25 and 50 percent tests of section 368(a)(2)(F)(ii) in exchange for beneficial interests in the Master Portfolio;

[2804] § 4.02.

[2805] It also described the information that must be included with ruling requests for permission to aggregate contributed property for purposes of making Code § 704(c) allocations submitted by partnerships that do not qualify for automatic permission, but Rev. Proc. 2002-3, § 6.06, titled "Section 704(c)," superseded that part, providing that private letter rulings will not ordinarily be issued regarding:

> Contributed Property-Requests from Qualified Master-Feeder Structures, as described in section 4.02 of Rev. Proc. 2001-36, 2001-23 I.R.B. 1326, for permission to aggregate built-in gains and losses from contributed qualified financial assets for purposes of making § 704(c) and reverse § 704(c) allocations.

[2806] §§ 2.07 and 2.08 describe the Rev. Proc.'s purpose:

> .07. In a typical Master-Feeder Structure, two or more Feeder Funds or one or more Feeder Funds and an investment advisor, principal underwriter, or manager contribute their assets, consisting primarily of cash or financial investments, to a single Master Portfolio in exchange for beneficial interests in the Master Portfolio. In these cases, each Feeder Fund and the Master Portfolio is registered with the Securities and Exchange Commission under the Investment Company Act of 1940 (1940 Act). The shares of these Feeder Funds are typically publicly offered and widely held by individuals, corporations, and institutional investors. Generally, each Feeder Fund is an open-end mutual fund, which continuously offers to sell new shares or redeem existing shares for a price equal to the net asset value of their proportionate interest in the portfolio.
>
> .08. The IRS and Treasury Department have determined that it is in the best interest of sound tax administration to reduce the burden on taxpayers of submitting ruling requests by granting to certain Master-Feeder Structures automatic permission to aggregate built-in gains and losses from contributed securities.

[2807] § 4.01.

(3) Each partner in the Master Portfolio that is an investment advisor, principal underwriter, or manager, contributes only cash and/or services in exchange for beneficial interests in the Master Portfolio;

(4) The Master Portfolio is treated as a partnership for federal tax purposes and qualifies as a securities partnership under section 1.704-3(e)(3)(iii);

(5) Each Feeder Fund is a publicly offered regulated investment company, as defined in section 67(c)(2)(B) and section 1.67-2T(g)(3)(iii);

(6) The Master Portfolio is registered as an investment company under the 1940 Act.

(7) The Master Portfolio makes section 704(c) and reverse section 704(c) allocations under the partial netting approach or the full netting approach as described in section 1.704-3(e)(3)(iv) or section 1.704-3(e)(3)(v), respectively, and;

(8) The contributions to the Master Portfolio and the corresponding allocations of tax items with respect to the property contributed to the Master Portfolio are not made with a view to shifting the tax consequences of built-in gain or loss among the partners in a manner that substantially reduces the present value of the partners' aggregate tax liability.

II.P.1.a.ii. Allocations of Income in S corporations

As described further below, S corporations generally must have a single class of stock. Income is always allocated in proportion to stock ownership.[2808] Special allocations of profits are not permitted, and Code § 704(c) responsibility does not exist. However, trusts cannot use the Code § 179 expensing of equipment, etc., so if the corporation reports Code § 179 expense and has a nongrantor trust shareholder then the corporation will need to separately track as an asset the trust's share of Code § 179 expense and specially allocate to the trust depreciation from that asset.[2809]

Also described further below are ways to creatively compensate employees, providing incentive that is the same as, or similar to, the results one can attain from partnerships.

S corporations are superior to C corporations in that undistributed S corporation income adds to the basis of the shareholders' stock.

Also see part III.B.2.j.ii Tax Allocations on the Transfer of Stock in an S Corporation.

[2808] Code § 1377(a)(1). For allocations of income when ownership changes, see part III.B.2.j Tax Allocations upon Change of Interest, particularly III.B.2.j.ii Tax Allocations on the Transfer of Stock in an S Corporation.
[2809] See part II.J.11.a.i Code § 179 Disallowance for Nongrantor Trust.

II.P.1.a.iii. Advantages of C and S Corporation Reporting of Owners' Compensation on Forms W-2

C and S corporations must withhold taxes and file quarterly forms 941 and annual forms W-2 for owners' compensation, whereas partnerships and sole proprietorships are not involved in withholding taxes regarding owner compensation.

Timely filing forms W-2 helps support the 20% deduction for qualified business income ("QBI") for owners of partnerships,[2810] but W-2 income itself does not constitute QBI.[2811]

Filing W-2 forms for owners provides some minor benefits:

(a) Unless the employee elects otherwise, federal income tax withheld is deemed paid evenly throughout the year. If the owner falls behind during the year, the owner may withhold large amounts at year-end, which generally will be deemed paid evenly throughout the year.

(b) Qualified retirement plans have a cap on compensation that can be considered in allocating contributions to the plans. Owners of corporations could adjust their W-2 income to reduce their compensation in good years and increase it in bad years to plan around this cap. Partners and sole proprietors do not have this flexibility. Of course, all businesses on the cash basis could delay or accelerate billings or disbursements.

(c) Providing a better base for the special deduction for domestic manufacturing.[2812]

II.P.2. C Corporation Advantage Regarding Fringe Benefits

Only a C corporation may deduct the following items without including them in the recipient's income:

(a) Dependent care (child care) assistance payments for owners subject to a dollar cap (generally $5,000).

(b) The owners' meals and lodging for the employer's convenience without including them in the owner's income.[2813]

[2810] See part II.E.1.c.iii Calculation of Deduction If Owner's Taxable Income Is Well Above Certain Taxable Income Thresholds, text accompanying fns 637-646.

[2811] See part II.E.1.c.ii Types of Income and Activities Eligible for Deduction, fns. 621-622.

[2812] Note the W-2 limitation mentioned in part II.G.24 Code § 199 Deduction for Domestic Production Activities especially fn. 1270.

[2813] Code § 119. See Campbell and Mitchell, The Exclusion for Meals and Lodging, *The Tax Adviser* (April 2015) (also discussing the partnership issue described below), saved as doc. no. 6206076.

However, this exclusion might apply beyond the C corporation context. See McKee, Nelson & Whitmire, ¶14.02. Partners Acting in Nonpartner Capacities: Section 707(a) Transactions, *Federal Taxation of Partnerships & Partners* (WG&L), citing a Fifth Circuit case looking with favor on the Code § 119 exclusion for a partner:

> *Armstrong v. Phinney*, 394 F.2d 661 (5th Cir. 1968) (remanding for determination whether partner was in fact employee of his partnership, and therefore entitled to exclude

(c) Non-discriminatory premiums for up to $50,000 in group-term life insurance covering the owners without including them in the owner's income.[2814]

Partners' fringe benefits are summarized by McKee, Nelson & Whitmire;[2815] RIA has prepared summaries of fringe benefits that partners and S corporation shareholders can and cannot claim.[2816] Any partner who performs services for a partnership is considered employed by the partnership for purposes of Code § 132(a)(1) (relating to no-additional-cost services) and Code § 132(a)(2) (relating to qualified employee discounts),[2817] as well as Code § 132(a)(3) (relating to working condition fringes)[2818] and Code § 132(h)(5) (relating to on-premises athletic facilities).[2819] Partners are eligible for educational assistance programs under Code § 127.[2820] Qualified transportation fringe benefits under Code § 132(f) are available to partners only if they are entirely below the limits for the working condition and de minimis fringe exclusions under Code § 132(a)(3), (4).[2821]

II.P.3. Conversions

Conversion to a C corporation is less taxing than conversion from a C corporation. Often, start-up businesses open as a pass-through entity (partnership or S corporation) to enable the owner to deduct initial losses, and then convert to a C corporation when

---

under § 119 value of meals and lodging furnished by the partnership). *Contra Wilson v. United States*, 376 F.2d 280 (Ct. Cl. 1967). The courts generally applied aggregate principles under the 1939 Code. See *Commissioner v. Doak*, 234 F.2d 704 (4th Cir. 1956) (partner may not be employee of his partnership); *Commissioner v. Moran*, 236 F.2d 595 (8th Cir. 1956) (same); *Commissioner v. Robinson*, 273 F.2d 503 (3d Cir. 1959) (cert. denied) (same); Rev. Rul. 53-80, 1953-1 CB 62 (same). See also *George A. Papineau*, 16 T.C. 130 (1951) (nonacq.); Tech. Adv. Mem. 9134003 (May 6, 1991) (incorporation of farming business; shareholder/employees claim benefits of § 119; § 269 not applicable because same benefits available if partnership had been formed). But *cf. Dilts v. United States*, 845 F.Supp. 1505 (D. Wyo. 1994) (§ 119 not available to shareholders of family-owned S corporation; result of *Armstrong v. Phinney* justified on grounds that taxpayer only 5 percent partner).

For more on *Armstrong v. Phinney* and when a partner may be considered as being compensated for services not in his or her capacity as a partner under Code § 707(a)(2), as contrasted as compensation for services rendered in his or her capacity as a partner under Code § 707(c), see fns. 438, 435 in part III.B.7.c.viii Creative Bonus Arrangements. Reg. § 1.707-1(c) provides that "partner who receives guaranteed payments for a period during which he is absent from work because of personal injuries or sickness is not entitled to exclude such payments from his gross income under section 105(d)."

2814 The arrangement must truly be group term and not some bundled package of various separate life insurance policies. See part II.Q.4.f Split-Dollar Arrangements, especially fn. 3181.

they become profitable. To the extent that timing is discussed below, it is when changes in entity arise from check-the-box elections, which elections generally may be effective up to 75 days before the date of filing.[2822]

An eligible entity may elect to be classified other than its default classification or to change its classification, by filing Form 8832.[2823] If an eligible entity makes an election under the preceding sentence to change its classification (other than an election made by an existing entity to change its classification as of the effective date of this section), the entity cannot change its classification by election again during the 60 months succeeding the effective date of the election.[2824] However, the IRS may permit the entity to change its classification by election within the sixty months if more than 50% of the ownership interests in the entity as of the effective date of the subsequent election are owned by persons that did not own any interests in the entity on the filing date or on the effective date of the entity's prior election.[2825] An election by a newly formed eligible entity that is effective on the date of formation is not considered a change for purposes of the 60-month rule.[2826]

[2822] Reg. § 301.7701-3(c)(1)(iii) provides:

> *Effective date of election*. An election made under paragraph (c)(1)(i) of this section will be effective on the date specified by the entity on Form 8832 or on the date filed if no such date is specified on the election form. The effective date specified on Form 8832 can not be more than 75 days prior to the date on which the election is filed and can not be more than 12 months after the date on which the election is filed. If an election specifies an effective date more than 75 days prior to the date on which the election is filed, it will be effective 75 days prior to the date it was filed. If an election specifies an effective date more than 12 months from the date on which the election is filed, it will be effective 12 months after the date it was filed. If an election specifies an effective date before January 1, 1997, it will be effective as of January 1, 1997. If a purchasing corporation makes an election under section 338 regarding an acquired subsidiary, an election under paragraph (c)(1)(i) of this section for the acquired subsidiary can be effective no earlier than the day after the acquisition date (within the meaning of section 338(h)(2)).

[2823] Reg. § 301.7701-3(c)(1)(i).

[2824] Reg. § 301.7701-3(c)(1)(iv). T.D. 8697 (12/18/1996) provides:

> The sixty month limitation only applies to a change in classification by election; the limitation does not apply if the organization's business is actually transferred to another entity.

The preamble to the proposed regulations, PS-43-95 (5/1996), followed a sentence similar to the above with:

> For example, an organization could liquidate into its parent, terminate and reform as another entity (e.g., by merger), or contribute its business to another organization without restriction.

[2825] Reg. § 301.7701-3(c)(1)(iv).

[2826] Reg. § 301.7701-3(c)(1)(iv). The preamble to the proposed regulations, PS-43-95 (5/1996), commented:

> The sixty month limitation only applies to a change in classification by election. Thus, if a new eligible entity elects out of its default classification effective from its inception, that election is not a change in the entity's classification.

Letter Ruling 201516034 confirmed that electing out of default classification is not a change in the entity's classification. The ruling permitted corporate subsidiaries to convert to LLCs under their original state law and for those LLCs to elect corporation taxation, after which the LLCs converted

II.P.3.a. Need for New Tax ID

See http://www.irs.gov/Businesses/Small-Businesses-&-Self-Employed/Do-You-Need-a-New-EIN.

If one changes names but keeps the same tax ID, request from the IRS Form 147C, Confirmation Letter, to be able to prove to third parties that the name changed but the tax ID did not.

II.P.3.b. From Corporations to Partnerships and Sole Proprietorships

If a corporation has more than one shareholder, the corporation is deemed to distribute all of its assets and liabilities to its owners, who immediately contribute all of the distributed assets and liabilities to the partnership.[2827] The deemed transactions are treated as occurring immediately before the close of the day before the election is effective. For example, if an election is made to change the classification is effective on January 1, the deemed transactions are treated as occurring immediately before the close of December 31 and must be reported as of December 31. Thus, the last day of the corporation's taxable year will be December 31 and the first day of the partnership's taxable year will be January 1.[2828]

If a corporation has only one shareholder, the corporation is deemed to distribute all of its assets and liabilities to its single owner in liquidation of the corporation.[2829] The deemed transaction is treated as occurring immediately before the close of the day before the election is effective. For example, if an election is made to change the classification is effective on January 1, the deemed transaction is treated as occurring immediately before the close of December 31 and must be reported as of December 31. Thus, the last day of the corporation's taxable year will be December 31 and the first day of the individual's taxable year regarding the activity will be January 1.[2830] If a parent corporation converts a wholly-owned subsidiary corporation to a single member LLC that is disregarded for tax purposes, the conversion constituted a tax free liquidation of the subsidiary under Code § 332.[2831]

The liquidation of a corporation is a taxable event.[2832] The corporation (or its shareholders through K-1s if it is an S corporation) is taxed on the extent by which any asset's fair market value (FMV) exceeds its basis.[2833] Each shareholder generally

to LLCs governed by a different state's laws, and the newest LLCs were also permitted to elect corporation taxation.

2827 Reg. § 301.7701-3(g)(1)(ii).

2828 Reg. § 301.7701-3(g)(3).

2829 Reg. § 301.7701-3(g)(1)(iii).

2830 Reg. § 301.7701-3(g)(3).

2831 Letter Ruling 201452016.

2832 See Code §§ 336 and 337.

2833 Contributing property with a built-in loss within 2 years of liquidation so as to avoid gain on liquidation generally would not work. Code § 336(d)(2).

realizes capital gain or loss on the difference between the FMV received and the stock's adjusted basis. This double tax can be expensive.[2834]

II.P.3.c. Conversion from C Corporation to S corporation

Converting from a C corporation to an S corporation can trigger LIFO recapture for companies that carry an inventory[2835] or built-in gain tax when assets are sold with a certain number of years after the S election.[2836]

Any S corporations that have not cleansed themselves of C corporation earnings and profits encounter constraints regarding too much investment income[2837] and reduced benefits from tax-exempt interest.[2838]

II.P.3.c.i. LIFO Recapture

If a C corporation inventoried goods under the LIFO method immediately before making an S election, it shall include in income the LIFO recapture amount in its last taxable year as a C corporation (for which its inventory then receives appropriate basis adjustments.[2839]

The corporation pays tax imposed on this conversion in its last C year and first three S years.[2840]

Considering that any inventory on hand is likely to be sold during the recognition period for the built-in gain tax, this recapture avoids double taxation. On the other hand, the corporation might have been able to maintain its old layer of inventory for tax purposes during the entire built-in gain recognition period, and this might be viewed as an additional tax burden.

[2834] See, *e.g.*, Everett, Hennig, and Raabe, Converting a C corporation into an LLC: Quantifying the Tax Costs and Benefits, *Journal of Taxation* (Aug. 2010).

[2835] See part II.P.3.c.i LIFO Recapture.

[2836] See part II.P.3.c.ii Built-in Gain Tax.

[2837] See part II.P.3.c.iii Excess Passive Investment Income.

[2838] See part II.P.3.c.iv Problem When S Corporation with Earnings & Profits Invests in Municipal Bonds.

[2839] Code § 1363(d)(1).

[2840] Code § 1361(d)(2). FSA 20153001F discussed the treatment of a consolidated group with a C corporation parent being acquired by an S corporation and became a Qualified Subchapter S Subsidiary. The FSA included the following clarification:

> The recapture date is the day before the effective date of the S election. Treas. Reg. § 1.1363-2(c)(1). However, with reference to transactions described in § 1.1363-2(a)(2) (including Qsub elections), there appears to be a typo in the regulations. Treas. Reg. § 1.1363-2(c)(1) states that for a nonrecognition transaction described in § 1.1363-2(a)(2) or (b)(2), the recapture date is the date of the transfer of the partnership interest to the S corporation. However, only section (b)(2) refers to a transfer of a partnership interest, (a)(2) refers to transfers of LIFO inventory assets by the C corporation to an S corporation. The LIFO recapture amount is determined as of the end of the recapture date for S corporation elections described in § 1.1363-2(a)(1), and as of the moment before the transfer occurs for nonrecognition transactions (including Qsub elections) described in 1.1363-2(a)(2). Treas. Reg. § 1.1363-2(c)(2).

II.P.3.c.ii. Built-in Gain Tax on Former C Corporations under Code § 1374

II.P.3.c.ii.(a). Explanation of Built-in Gain Tax on Former C Corporations under Code § 1374

When any asset is disposed of within 5 years of the S election,[2841] generally double taxation applies - normal taxation as a flow-through entity, plus a separate corporate level tax imposed on the lesser of the gain on disposition or the unrealized gain on the effective date of the S election.[2842] The corporation must disclose its unrealized built-in gain annually.[2843]

[2841] Code § 1374(d)(7) generally provides a 5-year recognition period, which was 7 years for a sale in 2009 or 2010 or 10 years for a sale before then. Code § 1374(d)(7) describes the recognition period as follows:

> (A) *In general*. The term 'recognition period' means the 5-year period beginning with the 1st day of the 1st taxable year for which the corporation was an S corporation. For purposes of applying this section to any amount includible in income by reason of distributions to shareholders pursuant to section 593(e), the preceding sentence shall be applied without regard to the phrase '5-year'.
>
> (B) *Installment sales*. If an S corporation sells an asset and reports the income from the sale using the installment method under section 453, the treatment of all payments received shall be governed by the provisions of this paragraph applicable to the taxable year in which such sale was made.

Letter Ruling 201150023 includes some nuances as the 2011 transition rules related to an installment sale. The ABA Section of Taxation S corporations Committee meeting in May 2015 discussed various nuances to Code § 1374(d)(7) before the Protecting Americans from Tax Hikes Act of 2015 enacted the language quoted above; see Thompson Coburn document no. 6214396.

[2842] Code § 1374. For ways to minimize this tax using a charitable remainder trust, see part II.Q.7.c.iv Using a Charitable Remainder Trust to Avoid Built-in Gain Tax. Also, see generally, Dealing with the S corporation Built-In Gains Tax, Parts 1 and 2, *Journal of Taxation* (April and May 2008). Reg. § 1.1374-2(a) provides that an S corporation is taxed is the lesser of:

> (1) Its taxable income determined by using all rules applying to C corporations and considering only its recognized built-in gain, recognized built-in loss, and recognized built-in gain carryover (pre-limitation amount);
>
> (2) Its taxable income determined by using all rules applying to C corporations as modified by section 1375(b)(1)(B) (taxable income limitation); and
>
> (3) The amount by which its net unrealized built-in gain exceeds its net recognized built-in gain for all prior taxable years (net unrealized built-in gain limitation).

[2843] Form 1120S (2014), page 2, Schedule B, question 8. To avoid an understatement penalty, the taxpayer might consider hiring an appraiser to value the more significant items that have value that differs from basis. For a taxpayer to rely on a professional's advice, Reg. § 1.6664-4(c)(1)(i) provides;

> *All facts and circumstances considered*. The advice must be based upon all pertinent facts and circumstances and the law as it relates to those facts and circumstances. For example, the advice must take into account the taxpayer's purposes (and the relative weight of such purposes) for entering into a transaction and for structuring a transaction in a particular manner. In addition, the requirements of this paragraph (c)(1) are not satisfied if the taxpayer fails to disclose a fact that it knows, or reasonably should know, to be relevant to the proper tax treatment of an item.

If the taxpayer obtains more than one opinion of value, the taxpayer does not need to provide the tax return preparer with an earlier appraisal if a later appraisal was obtained to correct errors and incorporate more current data. *The Ringgold Telephone Company v. Commissioner*, T.C. Memo. 2010-103 (no penalty assessed for underpayment of built-in gain tax). The court also

Generally, any item of income properly taken into account during the recognition period is recognized built-in gain if the item would have been properly included in gross income before the beginning of the recognition period by an accrual method taxpayer.[2844] Assets subject to this tax include inventory (but see part II.P.3.c.i LIFO Recapture) and a cash basis taxpayer's accounts receivable,[2845] as well as goodwill;[2846] however, an accrual taxpayer's the receipt of franchise fees not constituting a sale or exchange of a capital asset under Code § 1253(a) are not subject to built-in gain tax.[2847] If a corporation sells an asset before or during the recognition period and reports the income from the sale using the installment method during or after the recognition period, that income is subject to built-in gain tax.[2848]

This gain can be offset by built-in losses,[2849] such as a cash basis taxpayer's accounts payable.[2850] Thus, a cash basis taxpayer with accounts receivable at the time of the

---

rejected the IRS' criticism of the taxpayer's failure to give the tax return preparer a copy of a memorandum suggesting a value, because the memorandum was prepared primarily as a marketing tool, not as an objective valuation.

[2844] Reg. § 1.1374-4(b)(1). This determination disregards any method of accounting for which an election by the taxpayer must be made unless the taxpayer actually used the method when it was a C corporation. Reg. § 1.1374-4(b)(3), Example (4) discusses deferred prepayment income, and Example (5) discusses changes in accounting methods. For further discussion of various items of built-in gain, see McMahon and Simmons, Where Subchapter S Meets Subchapter C, *Tax Lawyer*, vol. 67, No. 2 (Winter 2014), saved as Thompson Coburn LLP doc. no. 6177833.

[2845] For accounts receivable, the S corporation takes them account in full when it collects them, but it takes into account no more than their fair market value at the time of the S election if it sells them to a third party instead. Reg. § 1.1374-4(b)(3), Example (1). For long-term contracts accounted for under the completed contract method, income that would have been earned before the S election under the percentage of completion method is built-in gain. Reg. § 1.1374-4(g).

[2846] Reg. § 1.1374-3(c), Example (1).

[2847] Letter Ruling 200411015 involved the following situation:

> Franchisees pay [taxpayer] a license fee upon grant of the license and monthly royalty fees which are composed of a fixed fee portion and a variable fee portion. Except for the limited use allowed by the Agreements, [taxpayer] retains a significant power, right, or continuing interest in the franchise and terminates any Agreement in violation of the terms and conditions of the license grant. The grant or transfer of franchise rights pursuant to an Agreement does not constitute a sale or exchange of a capital asset under section 1253(a).

The ruling held:

> The income of [taxpayer] with respect to the receipt of the license fees and royalty fees from franchisees after the Conversion Date will not be treated as recognized built-in gain within the meaning of section 1374(d).
>
> We express no opinion about the tax treatment of the license fees or royalty fees under other provisions of the Code and regulations or the tax treatment of any conditions existing at the time of, or the effects resulting from, the license fees and royalty fees that are not specifically covered by the above ruling. We also express no opinion about the tax treatment under 1374 of any income or gain that may be realized by [taxpayer] during the recognition period except as specifically provided above.

[2848] Reg. § 1.1374-4(h). Also watch out for acceleration as described in part II.G.14 Limitations on the Use of Installment Sales

[2849] Reg. § 1.1374-2(a)(1).

[2850] Reg. § 1.1374-4(b)(2) provides that, generally:

> …any item of deduction properly taken into account during the recognition period is recognized built-in loss if the item would have been properly allowed as a deduction

S election should be able to offset that built-in gain by its board of directors declaring a bonus, constituting reasonable compensation, before the S election, which bonus is payable while an S corporation.[2851]

An accrual taxpayer's deductions deferred by reason of the economic performance rules count as built-in losses.[2852]

Regulations prevent avoiding this tax merely by dropping assets into a partnership.[2853] However, if the corporation owns the partnership at the time of the S election, valuation discounts might reduce the amount of built-in gain.

II.P.3.c.ii.(b). Consider S Election Even If Plan to Sell Within 5 Years

Even if one plans to sell the corporation within five years, one might find an S election useful and then revert back to a C corporation if the sale does occur during that time, if all of the following are present:

> against gross income before the beginning of the recognition period to an accrual method taxpayer (disregarding any method of accounting for which an election by the taxpayer must be made unless the taxpayer actually used the method when it was a C corporation).

Under an accrual method of accounting, a liability is incurred and generally is taken into account in the taxable year in which all the events have occurred that establish the fact of the liability, the amount of the liability can be determined with reasonable accuracy, and economic performance has occurred with respect to the liability. Reg. § 1.461-1(a)(2)(i). For example, if the corporation is involved in a lawsuit at the time of the S election, amounts paid as a result of the lawsuit are built-in losses only if a judgement had been awarded at the time of the S election. Reg. § 1.1374-4(b)(3), Examples (2) and (3). If an accrual method taxpayer would have been able to deduct amounts owed to related parties before making the S election and Code § 267(a)(2) suspended the deduction until after the S election was made, those expenses might be built-in losses under Reg. § 1.1374-4(c)(1). A similar rule applies to compensation appropriately accrued before the S election but suspended under Code § 404(a)(5) until after the S election was made. Reg. § 1.1374-4(c)(2).

[2851] S. Rep. No. 445, 100th Cong., 2d Sess. 65 (1988), states:

> As an example of these built-in gain and loss provisions, in the case of a cash basis personal service corporation that converts to S status and that has receivables at the time of the conversion, the receivables, when received, are built-in gain items. At the same time, built-in losses would include otherwise deductible compensation paid after the conversion to the persons who performed the services that produced the receivables, to the extent such compensation is attributable to such pre-conversion services. To the extent such built-in loss items offset the built-in gains from the receivables, there would be no amount subject to the built-in gains tax.

Eustice & Kuntz, ¶ 7.06[4][f] Computation of Tax; Use of Certain Losses and Deductions to Reduce Tax Base, Federal Income Taxation of S corporations, views this as an accurate statement of current law.

[2852] Reg. § 1.1374-4(b)(2) provides that:

> In determining whether an item would have been properly allowed as a deduction against gross income by an accrual method taxpayer for purposes of this paragraph, section 461(h)(2)(C) and § 1.461-4(g) (relating to liabilities for tort, worker's compensation, breach of contract, violation of law, rebates, refunds, awards, prizes, jackpots, insurance contracts, warranty contracts, service contracts, taxes, and other liabilities) do not apply.

[2853] Reg. § 1.1374-4(i).

- The corporate stock is not eligible for the exclusion from gain on sale of the stock under Code § 1202 described in part II.Q.7.j Exclusion of Gain on the Sale of Certain Stock in a C Corporation. Being an S corporation for any significant period would blow the exclusion.[2854]

- The company does not have too much inventory subject to tax under part II.P.3.c.i LIFO Recapture. Note that any tax imposed on LIFO recapture is spread over several years.

- The company does not expect to dispose of significant assets subject to built-in gain tax.[2855] If the company reports on the cash receipts and disbursements method, then its accounts receivable and other accrued income in excess of its accounts payable and other accrued expenses would be subject to built-in gain tax; however, if it is on the accrual method, the income would already have been recognized and the built-in gain tax would not apply.[2856]

Making the S election would allow the shareholders to extract earnings during that period income-tax free, whether those earnings are extracted through distributions or when selling their stock.

If stock in the company is sold as just a straight stock sale, then either the buyer keeps the S election going (and benefits from to) or terminates the S election. If the buyer requires a basis step-up on the corporation's assets as described in part II.Q.8.e.iii.(f) Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold, then the seller might need to revoke the S election to avoid the built-in gain tax. Either way, terminating the S election might very well be relatively straightforward so that this process of turning on and then off the S election might have few bad tax effects (if the three bullet points above work out) and are advantageous while the election is in effect. See parts II.P.3.e Conversion from S Corporation to C Corporation and II.A.2.l Terminating S Election.

II.P.3.c.iii. Excess Passive Investment Income

If a C corporation with accumulated earnings and profits (E&P)[2857] elects S status, it might be subject to a supplemental tax and lose its S status if it has excess passive investment income.[2858] The corporation can avoid this treatment by carefully planning its

[2854] See fn. 3767.
[2855] See part II.P.3.c.ii.(a) Explanation of Built-in Gain Tax on Former C Corporations under Code § 1374.
[2856] See fns. 2844-2852.
[2857] Reg. § 1.1375-1(b)(4) refers to Code § 1362(d)(3) and the regulations thereunder in determining E&P. E&P is based on C corporation principles under Code § 312 and taxed by Code § 316 when distributed. Code § 1371(c). E&P are the earnings and profits of any corporation, including the S corporation or an acquired or predecessor corporation, for any period with respect to which an S election was not in effect. Reg. § 1.1362-2(c)(3).
[2858] Code §§ 1362(d)(3), 1375. Certain S corporations may disregard pre-1983 earnings and profits. 2007 Small Business Act P.L. 110-28, Sec. 8235.

gross receipts or by distributing its E&P.[2859] Inadvertent termination relief may be available if the corporation distributes its E&P after violating the excess passive investment income test.[2860]

Some points on planning gross receipts to avoid excess passive investment income treatment include:

- Although the statute defines rent as tainted income,[2861] that characterization does not apply if, based on all the facts and circumstances, the corporation provides significant services or incurs substantial costs in the rental activity.[2862] For this

---

[2859] Planning before the conversion might also help. Starr and Sobol, *S corporations: Operations*, T.M. 731-2nd, suggests at IV.B:

> Comment: When a C corporation converts to an S corporation, accumulated E&P is likely to be overstated, since timing differences originating in C status will tend to reverse while in S corporation status. As a result, excessive dividend distributions will be necessary to fully deplete the account. Conversely, when an S corporation converts to a C corporation, these timing differences may prove advantageous in that the accumulated E&P would reflect the reversal in C status while not being affected by the origination of the item in S status.
>
> Instances where timing differences come into play when switching from C to S or S to C status include:
>
> - accelerated cost recovery deductions for taxable income, but straight-line for accumulated E&P;
> - installment method elected for taxable income, but not allowed for accumulated E&P; and
> - special LIFO inventory adjustments required for accumulated E&P, but generally not required for taxable income.

[2860] Letter Ruling 201710013.

[2861] Code § 1362(d)(3)(C)(i).

[2862] Reg. § 1.1362-2(c)(5)(ii)(B)(2), which provides:

> *Rents derived in the active trade or business of renting property*. Rents does not include rents derived in the active trade or business of renting property. Rents received by a corporation are derived in an active trade or business of renting property only if, based on all the facts and circumstances, the corporation provides significant services or incurs substantial costs in the rental business. Generally, significant services are not rendered and substantial costs are not incurred in connection with net leases. Whether significant services are performed or substantial costs are incurred in the rental business is determined based upon all the facts and circumstances including, but not limited to, the number of persons employed to provide the services and the types and amounts of costs and expenses incurred (other than depreciation).

Rev. Rul. 81-197 addressed leasing aircraft. Reimbursing the renter's expenses under a one-year lease, where the tenant does all of the work, did not make rental be active. However, chartering aircraft was active, where (a) the owner provides all pilots, fuel, catering, and operating supplies, and pays for all hull and liability insurance, landing and parking fees, taxes, and governmental fees and charges, (b) pilots who are its employees have primary authority for the safety and actual operation of the aircraft, and (c) it enters into a management agreement with the aircraft manufacturer to secure assistance in maintaining the aircraft.

A corporation did not provide significant services or incur substantial costs when it provided furniture for the bungalows (used as vacation homes) and a recreation area maintained by the corporation, as well as tables and cards use in that area, sponsored bingo games for the adults and parties for the children at which small prizes were given, and sponsored parties for the adults, providing food and entertainment, all of which cost approximately 0.15% of revenue. *Feingold v. Commissioner*, 49 T.C. 461(1968). Performing decorating, repair, maintenance and purpose, "rent" does not include "income realized by a landowner under a share-farming arrangement where the landowner participates to a material degree in the production of farm commodities through physical work or management decisions, or a combination of both,"[2863] but the payment of costs may be sufficient to cause a farm arrangement to be nonpassive under this test.[2864]

---

cleaning services at the lessee's separate expense did not make active the rental of stadium suites active, but income from concessions, stadium club membership fees and dues, and electronic scoreboard advertising was active. Letter Ruling 8247052 (GCM 38915 apparently provided the underlying analysis).

Letter Ruling 201725022 held that the following medical office lease was active:

> X contracts with an independent leasing agent to assist in soliciting prospective tenants for M, negotiating leases and renewals, and overseeing post-leasing activities such as build-outs and renovations of suite space. X, with the assistance of the independent leasing agent, drafts, proposes, presents, and negotiates letters of intent to lease available suite spaces. Negotiation for leasing regularly requires the use of an independent space planner to design and tailor the spaces for prospective tenants. Once letters of intent are accepted, X, with the assistance of the independent leasing agent, prepares, finalizes, and executes the lease agreements with prospective tenants. Renewals of leases are similarly handled by X, which are often complicated by requests for concessions and renegotiation of the leasing rate. Renewals often require significant time and attention by X.
>
> X, through its employees, its agents, and the agents' employees, provides certain services in maintaining and repairing of the buildings, common areas, and grounds of M. X utilizes a standard lease agreement for its tenants, and under the lease agreements X has the obligation to provide certain services with respect to the leasing of space within M and to maintain or repair the following items: the heat and air conditioning systems, plumbing, hot water heaters, exterior lighting, signs, lawn care and gardening, roofs and exterior walls, exterior walkways, courtyards, parking areas, electricity, water and sewer, drainage, and garbage pickup.
>
> In addition, the following specific services are provided to M and its tenants by an employee or independent contractor/worker of X: daily walk-through inspections of M to report on water breaks, lighting outage, vandalism, damage to building exteriors and certain interior spaces; sweeping, cleaning and maintaining the common areas of M such as sideways, walkways, and parking lot; routine periodic inspection of building exteriors and interiors, including foundations, roofs, exterior lighting, grounds, and parking lot and engaging in maintenance and repairs as needed; treating the roofs of the buildings for moss growth yearly; recoating and resurfacing the parking lot; routine and periodic maintenance of the numerous heating and air conditioning units; renovating vacant suites for leasing; routine and periodic maintenance of the plumbing and sewer lines, and their repair and replacement as needed; maintenance, repair and replacement of exterior lighting and selected interior lighting; janitorial services for selected units and common areas; exterior window washing; regular maintenance of grounds and lawn care, and landscaping services when necessary; seasonal snow removal and ice control; weekly trash removal; periodic pest and vermin control; and emergency response and property access for public safety.

Additional authority is in *United States Tax Reporter* ANN ¶ 13,799.27 Rents; Bittker & Eustice, ¶ 6.04. Events Terminating Election, *Federal Income Taxation of Corporations & Shareholders* (WG&L); Eustice, Kuntz & Bogdanski, ¶ 5.04[2][b] Rents, *Federal Income Taxation of S Corporations*; Christian & Grant, ¶ 11.03 Rents, *Subchapter S Taxation* (WG&L).

[2863] Rev. Rul. 61-112. See Letter Rulings 8927039, 9003056, 9514005, 200002033, 200217045, and 200739008, all cited in Thompson Coburn LLP doc. no. 6513203 (which would need to be sanitized before sharing). *Kennedy v. Commissioner*, T.C. Memo. 1974-149, held that crop-

- Gross receipts (rather than net income) of nonpassive income from partnerships in which the corporation is invested may be counted;[2865] some income from controlled foreign corporations might also count as nonpassive income.[2866] Investing in oil and gas partnerships frequently helps generate sufficient nonpassive gross receipts.[2867]

---

sharing was passive rental when the corporation furnished nothing except the use of the land and the tenant furnished all the management, labor, supplies, etc.

Citing Rev. Rul. 61-112, Rev. Rul. 67-423 held that, when a corporation owns farmland it leases to a tenant under a crop-sharing arrangement that generates government payments under acreage reserve and conservation reserve programs and the landlord materially participates in the management of the farm production, the payments which the landlord receives under the foregoing programs are not "rents" for personal holding company income tax purposes. TAM 6211239430A, which also cited Rev. Rul. 61-112, held that crop-sharing payments were "rents" for personal holding company income tax purposes where the corporation did nothing and the tenant furnishes all of the equipment and performs all of the work.

GCM 35957 (1974) cited Rev. Rul. 61-112, among other authority, in analyzing whether crop-sharing constituted unrelated business taxable income.

GCM 35247 (1973) cited Rev. Rul. 61-112, among other authority, in analyzing whether crop-sharing constituted a business for purposes of estate tax deferral under Code § 6166.

[2864] Letter Ruling 201722019 approved as nonpassive both of the following:

> X is engaged in the business of farming and owns n acres in State. X has leased the land for sharecropping (Sharecropping Lease Arrangement) continuously beginning in Date 3. Beginning in Year, the land was leased to Y. Pursuant to the Sharecropping Lease Arrangement, all taxes, assessments or charges levied or assessed on products of the land must be paid by X and Y based in proportion to the percentage of crops to which X and Y are entitled. X and Y each pay one half of the actual cost of fertilizer and soil conditioner. X pays the cost of the power and fuel necessary to operate the drainage pumping plants as well as the cost of maintaining the irrigation and drainage canals and irrigation pipe line. X is also responsible for paying box rent and the grower's share of the state inspection fee. Any processing expenses incurred with the preparation of crops for sale, which are related to X's share of the crops, are paid by X. X also determines the percentage of Property to be farmed and the types of crops to be planted. Further, X is at risk for crop yields and marketing.
>
> In Year, X signed a new lease agreement (Rental Lease Arrangement) with Y for lease of Property. Under the lease, X's expenses are between o% and p% of X's rental income. X is responsible for providing and maintaining insurance on all improvements and fixtures owned by X. Further, X pays the costs and expenses associated with the repair, maintenance and replacement of the irrigation drainage pumps as well as the insurance, water reclamation tax, water rights fees, water coalition dues and property taxes.

[2865] Rev. Rul. 71-455; see also Reg. § 1.702-1(a)(8)(ii).

[2866] CCA 201030024.

[2867] For a summary of the issue, see 723 T.M. III.D.7.b.; see also part II.P.1.a.i Allocations of Income in Partnerships. Specific examples include Letter Rulings 200005012 (publicly traded partnership engaged in the purchasing, gathering, transporting, storage and resale of crude oil, refined petroleum products, and natural gas liquids, as well as some related activities), 200027037 (publicly traded limited partnerships engaged in the business of purchasing, gathering, transporting, trading, storage, and resale of crude oil, refined petroleum, and other chemical products), 200147034 (one publicly traded partnership's business consisted of purchasing, gathering, transporting, trading, storage and resale of crude oil and refined petroleum products and related activities, and the other's consisted of interstate and intrastate crude oil transportation, terminalling and storage, as well as crude oil gathering and marketing activities), 200240043 (publicly traded partnerships engaged in the business of purchasing, gathering, transporting, trading, storing, and reselling crude oil and refined petroleum products), 200309021 (publicly traded partnership engaged in the purchasing, gathering, transporting, trading, storage, Any gross receipts separately stated on such a K-1 would be reflected only in a worksheet provided in the Instructions for Form 1120S.[2868]

- In the case of sales or exchanges of stock or securities, gross receipts shall be taken into account only to the extent of the gains, without deduction for losses.[2869] For other capital assets, losses are netted against gains.[2870]

The corporation can distribute its E&P. Generally, distributions from an S corporation come first as generally[2871] nontaxable distributions of its accumulated adjustments account (AAA), then are treated as dividends to the extent of E&P, and then as a return of basis and gain on sale.[2872] However, an S corporation may, with the consent of all of its affected shareholders, elect to ignore AAA with respect to all distributions made during the taxable year for which the election is made.[2873]

Generally, a distribution of E&P must be effected using a distribution of money or other property.[2874] For these purposes, a distribution is taken into account on the date the corporation makes the distribution, regardless of when the distribution is treated as received by the shareholder.[2875] AAA at the close of the taxable year is applied to distributions during the taxable and pro-rated among them if they exceed AAA.[2876]

"Property" means money, securities, and any other property, but does not include stock in the corporation making the distribution (or rights to acquire such stock).[2877] However, no distribution of property is required if an S corporation elects to distribute all or part of its E&P through a deemed dividend, in which case: [2878]

- The corporation will be considered to elected to bypass AAA for that year.

---

and resale of crude oil, refined petroleum, and other mineral or natural resources), 200327004 (publicly traded partnership engaged in the purchasing, gathering, transporting, trading, marketing, storing, and reselling of crude oil, refined petroleum products, and natural gas liquids), and 200928024 (publicly traded partnerships engaged in the active trade of purchasing, gathering, transporting, trading, storage and/or resale of crude oil and refined petroleum products and related activities). It is best to document that the corporation's investment strategy is to provide for liquidity and also to diversify its investment risk.

[2868] The 2016 Instructions provide a worksheet to compute the excess net passive income tax for line 22a. The schedule computing the excess net passive income items includes+:

> *Income and deductions on lines 1, 2, and 5 are from total operations for the tax year. This includes applicable income and expenses from page 1, Form 1120S, as well as those imported separately on Schedule K.

[2869] Code § 1362(d)(3)(B)(ii).
[2870] Code § 1362(d)(3)(B)(i).
[2871] If and to the extent that the basis of a shareholder's stock is less than the shareholder's allocable AAA, the distribution of AAA would be taxed as a capital gain. Code § 1368(c)(1), (b)(2).
[2872] Code § 1368(c).
[2873] Code § 1368(e)(3)(A). Affected shareholder means any shareholder to whom a distribution is made by the S corporation during the taxable year. Code § 1368(e)(3)(B).
[2874] Code § 316(a). See Reg. § 1.1368-1(c).
[2875] Reg. § 1.1368-1(b).
[2876] Reg. § 1.1368-1(b), (c).
[2877] Code § 317(a).
[2878] Reg. § 1.1368-1(f)(3).

- The deemed dividend may not exceed the E&P on the last day of the taxable year, reduced by any actual distributions of E&P made during the taxable year.

- The amount of the deemed dividend is considered, for all tax purposes,[2879] as if it were distributed in money to the shareholders in proportion to their stock ownership, received by the shareholders, and immediately contributed by the shareholders to the corporation, all on the last day of the corporation's taxable year.

A corporation makes an election for a taxable year by attaching a statement to a timely filed (including extensions) original or amended return required to be filed for that taxable year, which statement must include the amount of the deemed dividend that is distributed to each shareholder,[2880] as well as consent by each affected shareholder.[2881]

A deemed dividend might be attractive when dividend tax rates are low, if one expects to need to take distributions in excess of AAA is a future year. However, if the shareholder might later sell the stock to a third party or wait to have the stock redeemed until it obtains a basis step-up on death, then it's possible that distributions will never exceed AAA. In that case, investing in assets that generate nonpassive gross receipts might be a lot less painful than paying tax on a deemed dividend. If the majority shareholder does not want to mess with a closely-held business or active rental, then my experience has been that investing 1-3% of the corporation's assets in oil and gas partnerships will be sufficient to generate sufficient nonpassive gross receipts.[2882]

If a corporation does not know about the possible loss of its S election under the excess passive investment income rules and terminates its S election as a result of these rules, consider applying for inadvertent termination relief in which the corporation and shareholders agree to a retroactive deemed dividend described above.[2883]

II.P.3.c.iv. Problem When S Corporation with Earnings & Profits Invests in Municipal Bonds

Tax-exempt income does not increase AAA.[2884]

Therefore, any tax-exempt income, although not taxable to the shareholders when earned, would be taxable dividends when distributed to the shareholders to the extent that the corporation has no remaining AAA but has E&P.

Even if the corporation has plenty of AAA, a need for AAA might later arise, such as tax-free redemptions of part of a shareholder's stock.[2885]

[2879] However, the dividend deemed distributed to a qualified subchapter S trust does not constitute trust accounting income and therefore is not required to be distributed to the beneficiary. Letter Ruling 200446007.

[2880] Reg. § 1.1361-1(f)(5)(iii).

[2881] Reg. § 1.1361-1(f)(5)(ii).

[2882] See footnote 2867.

[2884] Code § 1368(e)(1)(A). This includes tax-free receipts beyond just muni bonds. See part II.Q.7.b.iv.(a) S Corporation Distributions of Life Insurance Proceeds - Warning for Former C Corporations and Letter Ruling 201440013.

These issues are spelled out more in part II.Q.7.b.iv.(a) S Corporation Distributions of Life Insurance Proceeds - Warning for Former C Corporations.

II.P.3.c.v. Conversion from S Corporation to C Corporation then Back to S Corporation

CCA 201446021 asserted that, when an S election terminates, its accumulated adjustments account (AAA) is wiped out. Therefore, the IRS reasoned, if the corporation later becomes an S corporation, its AAA starts from scratch.

However, any distribution of ***money*** by a corporation with respect to its stock during a post-termination transition period (generally, the first C corporation year after the S election terminate) is applied against and reduce the adjusted basis of the stock, to the extent that the amount of the distribution does not exceed AAA.[2886] So, if the S Corporation status is terminated, one should consider promptly distributing earnings (and perhaps loaning them back to the corporation if it needs the cash). If one is planning a termination, consider distributing on the last day of the last S corporation taxable year a formula note on the equal to AAA as of that date. See part II.P.3.e Conversion from S Corporation to C Corporation for discussion about additional opportunities for former S corporations whose owners at the time of revocation are the same as those on December 22, 2017.

A better strategy might be for the S corporation to do a tax-free "F" reorganization,[2887] in which the existing S corporation becomes a wholly-owned subsidiary of a new parent S corporation, which parent is owned by the original S corporation's shareholders immediately before the reorganization. The parent makes an S election, and the subsidiary elects taxation as a Qualified Subchapter S Subsidiary (QSub).[2888] The original S corporation initially is disregarded from the parent, giving the parent all of the subsidiary's AAA.[2889] Later, the subsidiary's QSub election is revoked, keeping the AAA intact at the parent level, notwithstanding that the subsidiary is now taxed as a C corporation. That way, if the subsidiary later becomes a QSub, the AAA remain to help carry out distributions to the shareholders.

II.P.3.d. Conversions from Partnerships and Sole Proprietorships to C Corporations or S Corporations

Transfers from a sole proprietorship to a corporation, including a disregarded LLC electing corporate taxation,[2890] are generally nontaxable.[2891]

[2885] If a state law redemption is treated as a distribution under Code § 302(b)(2) or (3) and Code § 302(c), then it is a tax-free distribution to the extent of AAA. See part II.Q.7.b. Redemptions or Distributions Involving S Corporations.
[2886] Code § 1371(e)(1). Code § 1377(b)(1) and Reg. § 1.1377-2(b) determine the post-termination transition period.
[2887] See part II.P.3.i Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization.
[2888] See part II.A.2.h Qualified Subchapter S Subsidiary (QSub).
[2889] Reg. § 1.1368-2(d)(2).
[2890] Reg. § 301.7701-3(g)(1)(iv).
[2891] See part II.M.2.a. Initial Incorporation – Generally.

However, shifting from a partnership to a corporation might cause the partners to recognize gain or lose their suspended losses.[2892]

Consider what adjustments might be required to convert a partnership interest, which might have capital accounts disproportionate to profit and loss sharing and might have profit in loss sharing that is not "straight-up," into shares, generally would have identical distribution and liquidation rights (and must have such rights in the case of an S corporation).

II.P.3.d.i. Formless Conversion

When an entity taxed as a partnership elects taxation as a corporation, the partnership is deemed to contribute all of its assets and liabilities to the corporation in exchange for stock in the corporation; and, immediately thereafter, the partnership liquidates by distributing the stock of the corporation to its partners.[2893] The deemed transactions are treated as occurring immediately before the close of the day before the election is effective. For example, if an election is made to change the classification is effective on January 1, the deemed transactions are treated as occurring immediately before the close of December 31 and must be reported by the owners of the entity on December 31. Thus, the last day of the partnership's taxable year will be December 31 and the first day of the corporation's taxable year will be January 1.[2894]

A partnership can be converted directly into an S corporation; the corporation is not deemed formed until the partnership is deemed to have distributed its assets to the corporation:[2895]

- Suppose that, on January 1, 2009, X, a calendar year taxpayer, is taxed as a partnership. X elects to be taxed as a corporation for federal tax purposes, effective January 1, 2010. On February 1, 2010, X files an S election, effective January 1, 2010. Each person who held stock in X on January 1, 2010 also holds stock at the time the S election is made. When X elects to be taxed as a corporation, the following steps are deemed to occur: X contributes all of its assets and liabilities to the corporation in exchange for stock in the corporation, and immediately thereafter X liquidates by distributing the stock of the association to its partners. These deemed steps are treated as occurring immediately before the close of the day before the election is effective.[2896] Thus, the partnership's taxable year ends on December 31, 2009, and the corporation's first taxable year begins on January 1, 2010. Therefore, the partnership will not be deemed to own the stock of the corporation during any portion of the association's first taxable year beginning

[2892] See part II.M.2.c Contribution of Partnership Interest to Corporation.
[2893] Reg. § 301.7701-3(g)(1)(i). Under Rev. Rul. 2004-59, when a formless conversion occurs under state law, Rev. Rul. 84-111 does not apply. Rev. Rul. 84-111 describes the differences in the basis and holding periods of the various assets received by the corporation and the basis and holding periods of the stock received by the former partners provided the steps described are actually undertaken and the underlying assumptions and purposes for the conclusions in the revenue ruling are applicable. Except to the extent inconsistent with the above, see the text accompanying footnotes 3854-3938 for tax effects of liquidating a partnership.
[2894] Reg. § 301.770l-3(g)(3).
[2895] Rev. Rul. 2009-15.
[2896] Reg. § 301.7701-3(g)(3)(i).

January 1, 2010, and X is eligible to elect to be an S corporation effective January 1, 2010. Additionally, because the partnership's taxable year ends immediately before the close of the day on December 31, 2009, and the corporation's first taxable year begins at the start of the day on January 1, 2010, the deemed steps will not cause X to have an intervening short taxable year in which it was a C corporation.

- On January 1, 2009, Y, a calendar year taxpayer, is taxed as a partnership. Y converts into a corporation under a state law formless conversion statute, effective January 1, 2010. As a result of the conversion, Y is classified as a corporation for federal tax purposes. On February 1, 2010, Y files an S election, effective January 1, 2010. Each person who held stock in Y on January 1, 2010 also holds stock at the time the S election is made. The result is the same as above.

Of course, the simplest way would be just to make the S election, by the partnership filing IRS Form 2553.[2897]

Because S corporations can have only a single class of stock,[2898] capital accounts need to be made proportionate to interests in profits and losses before converting to an S corporation.

II.P.3.d.ii. Transfer of Partnership Assets and Liabilities to a Newly Formed Corporation in Exchange for All of its Stock

If the conversion is not a formless conversion described above, the IRS provides for three scenarios.[2899] In each situation, the steps the partners and partnerships take are parts of a plan to transfer the partnership operations to a corporation organized for valid business reasons in exchange for its stock and were not devices to avoid or evade recognition of gain. Because the federal income tax consequences of the three situations are the same, each partnership is considered to made a nontaxable contribution of its assets and liabilities to a corporation in exchange for its stock,[2900] followed by a distribution of the stock to the partners in liquidation of the partnership.[2901]

In the first situation, the partnership transfers all of its assets to newly-formed corporation in exchange for all the outstanding stock of the corporation and the assumption by the corporation of the partnership's liabilities. The partnership then terminates by distributing all the stock of the corporation to the partners in proportion to their partnership interests. The tax results are:

- No gain or loss is recognized by the partnership when it transfers all of its assets to the corporation in exchange for the corporation's stock and the assumption by the corporation of the partnership's liabilities.[2902]

[2897] See fn. 295.
[2898] See II.A.2.j Single Class of Stock Rules, for a description of the single class of stock rules and those rules' surprising flexibility.
[2899] Rev. Rul. 84-111.
[2900] Code § 351.
[2901] Rev. Rul. 70-239.
[2902] Code § 351.

- The corporation's basis in the assets received from the partnership equals their basis to the partnership immediately before their transfer to the corporation.[2903]

- The partnership's basis of the stock received from the corporation is the same as the partnership's basis in the assets transferred to the corporation, reduced by the liabilities assumed by the corporation, which assumption is treated as a payment of money to the partnership.[2904]

- The corporation's assumption of the partnership's liabilities decreases each partner's share of the partnership liabilities, thus, decreasing the basis of each partner's partnership interest.[2905]

- On distribution of the stock to the partners, the partnership terminates.[2906]

- The basis of the stock distributed to the partners in liquidation of their partnership interests is, with respect to each partner, equal to the adjusted basis of the partner's interest in the partnership.[2907]

- The partnership's holding period for the stock received in the exchange includes its holding period in the capital assets and Code § 1231 assets transferred (to the extent that the stock was received in exchange for such assets).[2908]

- To the extent the stock was received in exchange for neither capital nor Code § 1231 assets, the partnership's holding period for such stock begins on the day following the date of the exchange.[2909]

- The corporation's holding period in the assets transferred to it includes the partnership's holding period.[2910]

- When the partnership distributes the stock to its partners, the partners' holding periods includes the partnership's holding period of the stock.[2911]

In the second situation, the partnership distributes all of its assets and liabilities to its partners in proportion to their partnership interests, terminating the partnership. The partners then transfer all the assets received from the partnership to a new corporation in exchange for all the corporation's outstanding stock and the corporation's assumption of the partnership's liabilities that had been assumed by the partners. The tax results are:

[2903] Code § 362(a). However, Reg. § 1.362-3 reduces the basis of property acquired in loss importation transaction.
[2904] Code § 358.
[2905] See Code §§ 752 and 733.
[2906] Code § 708(b)(1)(A).
[2907] Code § 732(b),
[2908] Code § 1223(1).
[2909] See Rev. Rul. 70-598.
[2910] Code § 1223(2).
[2911] Code §§ 735(b) and 1223. Furthermore, such distribution will not violate the Code § 368(c) control requirement.

- On the transfer of all of the partnership's assets to its partners:
    - The partnership terminates.[2912]
    - The basis of the assets (other than money) distributed to the partners in liquidation of their partnership interests is, with respect to each partner, equal to the adjusted basis of the partner's interest, reduced by the money distributed.[2913]
- The decrease in the partnership's liabilities resulting from the transfer to its partners was offset by the partners' corresponding assumption of such liabilities, so that the net effect on the basis of each partner's interest in the partnership, with respect to the liabilities transferred, was zero.[2914]
- No gain or loss is recognized by the partnership's former partners when the partnership transfers its assets and liabilities to the corporation in exchange for its stock.[2915]
- The (former) partners' basis in the corporation's stock is the same as their basis in the assets received in the partnership's liquidation and the transfer to the corporation, reduced by the liabilities assumed by the corporation, which assumption is treated as a payment of money to the partners.[2916]
- The corporation's basis in the assets received from the (former) partners equals the (former) partners' basis immediately before the transfer to the corporation.[2917]
- The partners' holding periods for the assets the partnership distributes to them includes the partnership's holding period.[2918]
- The partners' holding periods for the stock received in the exchange includes the partners' holding periods in the capital assets and Code § 1231 assets transferred to the corporation (to the extent that the stock was received in exchange for such assets).[2919]
- However, to the extent that the stock received was in exchange for neither capital nor Code § 1231 assets, the holding period of the stock begins on the day following the date of the exchange.
- The corporation's holding period of the partnership's assets received in the exchange includes the partners' holding periods.[2920]

[2912] Code § 708(b)(1)(A).
[2913] Code § 732(b).
[2914] Code § 752.
[2915] Code § 351.
[2916] Code §§ 358(a) and 732(b).
[2917] Code §§ 362(a) and 732(c). However, Reg. § 1.362-3 reduces the basis of property acquired in loss importation transaction.
[2918] Code § 735(b).
[2919] Code § section 1223(1).
[2920] Code § 1223(2).

In the third situation, the partners transfer their partnership interests to a newly-formed corporation in exchange for all the corporation's outstanding stock. This exchange terminates the partnership, and all of its assets and liabilities became assets and liabilities of the corporation. The tax result is:

- No gain or loss is recognized by the partners on the transfer of the partnership interests to the corporation in exchange for the corporation's stock.[2921]

- When the transfer partners transfer their partnership interests to the corporation, the partnership terminates.[2922]

- The partners' basis of the stock received from the corporation in exchange for their partnership interests equals the basis of their partnership interests transferred to the corporation, reduced by the partnership's liabilities assumed by the corporation, the release from which is treated as a payment of money to the partners.[2923]

- The corporation's basis for the assets received in the exchange equals the basis of the partners in their partnership interests.[2924]

- The corporation's holding period includes the partnership's holding period in the assets.

- The holding period of the stock received by the former partners includes each respective partner's holding period for the partnership interest transferred,[2925] except that the holding period of the stock that was received by the partners in exchange for their interests in any unrealized receivables, inventory, or various depreciable or amortizable assets of the partnership that are neither capital assets nor Code § 1231 assets begins on the day following the date of the exchange.

II.P.3.e. Conversion from S Corporation to C Corporation

See part II.A.2.l Terminating S Election, which includes the fact that conversion from S status to C status requires an additional tax return if done mid-year and precludes an S election for 5 years.

Converting from an S corporation to a C corporation may require the corporation to switch from the cash receipts and disbursements method of accounting to the accrual method. Generally, a C corporation cannot use the cash method,[2926] unless the corporation conducts a qualified farming business,[2927] is a qualified personal service

---

[2921] Code § 351.
[2922] Code § 708(b)(1)(A).
[2923] Code §§ 358 and 752(d).
[2924] Allocated under Code § 732(c).
[2925] Code § 1223(1).
[2926] Code § 448(a)(1).
[2927] Code § 448(d)(1), "Farming business," provides that a "qualified personal service corporation" is any corporation:

> (A) *In general*. The term "farming business" means the trade or business of farming (within the meaning of section 263A(e)(4)).

corporation,[2928] or has gross receipts that are no more than $25 million (after 2018 adjusted for inflation).[2929]

If a corporation was an S corporation on or before December 21, 2017, during the 2-year period beginning on December 22, 2017 revokes its S election, and the owners of the stock of which, determined on the date the revocation is made, are the same owners (and in identical proportions) as on December 22, 2017 (an "eligible terminated S corporation"), then any adjustment required by a change in accounting method under Code § 481(a)(2) which is attributable to that revocation is taken into account ratably during the 6-taxable year period beginning with the year of change.[2930]

Note that S corporation earnings might be extracted in cash tax-free in the first C corporation taxable period after the final S corporation yearend.[2931] Converting the corporation into a QSub before converting it to a C corporation might also be used to preserve the AAA of a corporation whose S election is revoked.[2932]

Additionally, after that first C Corporation taxable period, an eligible terminated S corporation's distribution is chargeable to accumulated earnings and profits, in the same ratio as the amount of such AAA bears to the amount of such accumulated earnings and profits.[2933]

(B) *Timber and ornamental trees*. The term "farming business" includes the raising, harvesting, or growing of trees to which section 263A(c)(5) applies.

[2928] Code § 448(d)(2), "Qualified personal service corporation," provides:

(A) substantially all of the activities of which involve the performance of services in the fields of health, law, engineering, architecture, accounting, actuarial science, performing arts, or consulting, and

(B) substantially all of the stock of which (by value) is held directly (or indirectly through 1 or more partnerships, S corporations, or qualified personal service corporations not described in paragraph (2) or (3) of subsection (a)) by-

- (i) employees performing services for such corporation in connection with the activities involving a field referred to in subparagraph (A),
- (ii) retired employees who had performed such services for such corporation,
- (iii) the estate of any individual described in clause (i) or (ii), or
- (iv) any other person who acquired such stock by reason of the death of an individual described in clause (i) or (ii) (but only for the 2-year period beginning on the date of the death of such individual).

To the extent provided in regulations which shall be prescribed by the Secretary, indirect holdings through a trust shall be taken into account under subparagraph (B).

[2929] Code § 448(b), (c).

[2930] Code § 481(d).

[2931] See fn. 2886, found in part II.P.3.c.v Conversion from S Corporation to C Corporation then Back to S Corporation.

[2932] See part II.P.3.c.v Conversion from S Corporation to C Corporation then Back to S Corporation, especially fns. 2887-2889.

[2933] Code § 1371(f).

II.P.3.f. Conversion from Qualified Subchapter S Subsidiary to Single Member LLC

The merger of a Qualified Subchapter S Subsidiary ("QSub") into an LLC wholly owned by the QSub's parent has no income tax consequences.[2934]

II.P.3.g. Conversions from Partnership to Sole Proprietorships and Vice Versa

When a sole proprietorship organized as an LLC adds a member, it becomes a partnership. If the original member sells part his or her interest in the LLC to a new member, then he or she is deemed to have sold a corresponding portion of the LLC's assets to the new member,[2935] as follows:[2936]

> In this situation, the LLC, which, for federal tax purposes, is disregarded as an entity separate from its owner, is converted to a partnership when the new member, B, purchases an interest in the disregarded entity from the owner, A. B's purchase of 50% of A's ownership interest in the LLC is treated as the purchase of a 50% interest in each of the LLC's assets, which are treated as held directly by A for federal tax purposes. Immediately thereafter, A and B are treated as contributing their respective interests in those assets to a partnership in exchange for ownership interests in the partnership.
>
> Under section 1001, A recognizes gain or loss from the deemed sale of the 50% interest in each asset of the LLC to B.
>
> Under section 721(a), no gain or loss is recognized by A or B as a result of the conversion of the disregarded entity to a partnership.
>
> Under section 722, B's basis in the partnership interest is equal to $5,000, the amount paid by B to A for the assets which B is deemed to contribute to the newly-created partnership. A's basis in the partnership interest is equal to A's basis in A's 50% share of the assets of the LLC.
>
> Under section 723, the basis of the property treated as contributed to the partnership by A and B is the adjusted basis of that property in A's and B's hands immediately after the deemed sale.
>
> Under section 1223(1), A's holding period for the partnership interest received includes A's holding period in the capital assets and property described in section 1231 held by the LLC when it converted from an entity that was

---

[2934] Reg. § 1.1361-5(b)(3), Example (2). See fn. 132 for details.

See also The Treatment of Liabilities In Rev. Rul. 99-5 and Rev. Rul. 99-6 Situations *TM Memorandum* (BNA) (3/16/2009), and AICPA Comments to IRS on Rev. Rul. 99-5 on Disregarded Entities (6/5/2013), found at http://www.aicpa.org/advocacy/tax/partnerships/downloadabledocuments/comments-on-rev-ruling-99-5-v-6-5-13submit.pdf.

[2936] Rev. Rul. 99-5, Situation 1.

disregarded as an entity separate from A to a partnership. B's holding period for the partnership interest begins on the day following the date of B's purchase of the LLC interest from A. See Rev. Rul. 66-7, 1966-1 C.B. 188, which provides that the holding period of a purchased asset is computed by excluding the date on which the asset is acquired. Under section 1223(2), the partnership's holding period for the assets deemed transferred to it includes A's and B's holding periods for such assets.

However, if the new member pays the LLC for a member interest, then the old and new member are deemed to have formed a partnership, which generally qualifies as a nontaxable transaction,[2937] as follows:[2938]

> In this situation, the LLC is converted from an entity that is disregarded as an entity separate from its owner to a partnership when a new member, B, contributes cash to the LLC. B's contribution is treated as a contribution to a partnership in exchange for an ownership interest in the partnership. A is treated as contributing all of the assets of the LLC to the partnership in exchange for a partnership interest.
>
> Under section 721(a), no gain or loss is recognized by A or B as a result of the conversion of the disregarded entity to a partnership.
>
> Under section 722, B's basis in the partnership interest is equal to $10,000, the amount of cash contributed to the partnership. A's basis in the partnership interest is equal to A's basis in the assets of the LLC which A was treated as contributing to the newly-created partnership.
>
> Under section 723, the basis of the property contributed to the partnership by A is the adjusted basis of that property in A's hands. The basis of the property contributed to the partnership by B is $10,000, the amount of cash contributed to the partnership.
>
> Under section 1223(1), A's holding period for the partnership interest received includes A's holding period in the capital and section 1231 assets deemed contributed when the disregarded entity converted to a partnership. B's holding period for the partnership interest begins on the day following the date of B's contribution of money to the LLC. Under section 1223(2), the partnership's holding period for the assets transferred to it includes A's holding period.

Thus, the parties can control whether the original owner is taxed and the new owner gets an inside basis step-up, or the original owner is not taxed and the new owner does not

[2937] See T.D. 8844 (preamble to regulations on entity conversions) (11/29/99), Rev. Rul. 99-5, and part II.M.3 Buying into or Forming a Partnership (especially part II.M.3.a General Rule: No Gain on Contribution to Partnership). See Rev. Rul. 2001-61 and CCA 201351018 regarding retention of employer identification number. Letter Ruling 200633019 discusses a large variety of tax issues when a trust contributes a diversified portfolio of marketable securities to a single-member LLC and then distributes LLC interests to the remaindermen; Letter Ruling 201628008 includes a more abbreviated discussion of such a transaction. See also The Treatment of Liabilities In Rev. Rul. 99-5 and Rev. Rul. 99-6 Situations 201351018 (BNA) (3/16/2009).
[2938] Rev. Rul. 99-5, Situation 2.

get an inside basis step-up.[2939] However, the parties can have their cake and eat it, too: in the latter case, the new owner can transfer the partnership interest to another partnership (or corporation) in a tax-free transaction and get an inside basis step-up.[2940]

When an LLC with more than one member is taxed as a partnership, and the number of members later is reduced to one, it becomes a sole proprietorship for tax purposes. When one member buys out the other(s), the selling member(s) is(are) taxed based on the rules for selling a partnership interest, and the remaining member (essentially the new sole proprietor) is deemed to have bought all of the LLC's assets on that date, with no tacking of holding period for any portion of the assets.[2941] Furthermore, payments that would have been deductible by a partnership had it continued in existence are deductible by the successors to the partnership.[2942]

Pierre v. Commissioner[2943] was a reviewed opinion holding that gifts and sales of interests in a single-member limited liability company (LLC) be treated for gift tax purposes as transfers of interests in an entity rather than transfers of the underlying assets.

Initially, the transferor was the LLC's sole owner. Some LLC interests were gifted, and the rest were sold. The IRS asserted that the transfers were of the LLC's underlying assets, not interests in the LLC. It tried to apply the principles of Rev. Rul. 99-5, Situation 1, which provides:

> In this situation, the LLC, which, for federal tax purposes, is disregarded as an entity separate from its owner, is converted to a partnership when the new member, B, purchases an interest in the disregarded entity from the owner, A. B's purchase of 50% of A's ownership interest in the LLC is treated as the purchase of a 50% interest in each of the LLC's assets, which are treated as held directly by A for federal tax purposes. Immediately thereafter, A and B are treated as contributing their respective interests in those assets to a partnership in exchange for ownership interests in the partnership.

[2939] See part II.Q.8.e.iii.(a) Illustration of Inside Basis Issue.

[2940] See parts II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754 Election or Required Adjustment for Built-in Loss), II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000 and II.Q.8.e.iii.(d) Code § 743(b) Effectuating Code § 754 Basis Adjustment on Transfer of Partnership Interest.

[2941] Rev. Rul. 99-6; see also part II.Q.8 Exiting From or Dividing a Partnership; see Letter Ruling 201723009 when such a transaction is done inside a consolidated group. See Rev. Rul. 2001-61 and CCA 201351018 regarding retention of employer identification number. See also "The Treatment of Liabilities In Rev. Rul. 99-5 and Rev. Rul. 99-6 Situations," *TM Memorandum* (BNA) (3/16/2009). For a myriad of tax issues raised in this situation, criticizing Rev. Rul. 99-6, see AICPA Comments on Revenue Ruling 99-6 on Conversions from Partnerships to Disregarded Entities (10/1/2013), found at http://www.aicpa.org/advocacy/tax/partnerships/downloadabledocuments/comments-on-rev-ruling-99-6-submit.pdf. The AICPA points to very different results when a purchaser buys 99% instead of 100%.

[2942] Rev. Rul. 75-154.

[2943] 133 T.C. 24 (2009) (http://www.ustaxcourt.gov/InOpHistoric/Pierre.TC.WPD.pdf). For income tax treatment of a gift of the entire interest in a single member LLC, see fn. 284.

The Tax Court majority rejected the application of the check-the-box rules[2944] to this gift. Those provisions apply only "where not otherwise distinctly expressed or manifestly incompatible with the intent" of other provisions in the tax law.[2945] Fundamental gift tax precepts require that one look to the bundle of rights transferred.[2946] The Tax Court held that, under state law, an LLC interest (not an interest in the underlying assets) was transferred; applying the check-the-box regulations would be manifestly incompatible with fundamental gift tax precepts.[2947]

The court distinguished between classifying the entity and describing the nature of the assets that were transferred. This fine line might breed litigation in the transfer tax area.

II.P.3.h. Rescissions, Including Rescinding Conversion of Entity

The IRS often respects rescissions for income tax purposes[2948] when a transaction is reversed in the same taxable year. The IRS explains:[2949]

[2944] Reg. §§ 301.7701-1 through 301.7701-3.

[2945] Code § 7701(a) (introductory language).

[2946] The court reasoned:

> The multistep process of determining the nature and amount of a gift and the resulting gift tax under the Federal gift tax provisions described above, i.e., (1) the determination under State law of the property interest that the donor transferred, (2) the determination of the fair market value of the transferred property interest and the amount of the transfer to be taxed, and (3) the calculation of the Federal gift tax due on the transfer, is longstanding and well established. Neither the check-the-box regulations nor the cases cited by respondent support or compel a conclusion that the existence of an entity validly formed under applicable State law must be ignored in determining how the transfer of a property interest in that entity is taxed under Federal gift tax provisions.

[2947] The court held:

> We note that Congress has enacted provisions of the Internal Revenue Code, see secs. 2701, 2703, that disregard valid State law restrictions in valuing transfers. Where Congress has determined that the willing buyer, willing seller and other valuation rules are inadequate, it expressly has provided exceptions to address valuation abuses. See chapter 14 of the Internal Revenue Code, sections 2701 through 2704, which specifically are designed to override the standard willing buyer, willing seller assumptions in certain transactions involving family members.
>
> By contrast, Congress has not acted to eliminate entity related discounts in the case of LLCs or other entities generally or in the case of a single-member LLC specifically. In the absence of such explicit congressional action and in the light of the prohibition in section 7701, the Commissioner cannot by regulation overrule the historical Federal gift tax valuation regime contained in the Internal Revenue Code and substantial and well-established precedent in the Supreme Court, the Courts of Appeals, and this Court, and we reject respondent's position in the instant case advocating an interpretation that would do so. Accordingly, we hold that petitioner's transfers to the trusts should be valued for Federal gift tax purposes as transfers of interests in Pierre LLC and not as transfers of a proportionate share of the underlying assets of Pierre LLC.

[2948] The IRS does not have a clear policy for estate and gift tax law. However, *Neal v. U.S.*, 187 F.3d 626 (3rd Cir. 1999) allowed a rescission under Pennsylvania law and considered the gift incomplete because of it.

[2949] Rev. Rul. 80-58. Although the ruling is old, it is still viable. Rev. Proc. 2013-3, Section 5.02(1) indicated that the IRS was considering its position in the rescission area. Rev. Proc. 2014-3, Section 1.02(6) mentioned that Section 5.02(1) was deleted and that

> The legal concept of rescission refers to the abrogation, canceling, or voiding of a contract that has the effect of releasing the contracting parties from further obligations to each other and restoring the parties to the relative positions that they would have occupied had no contract been made. A rescission may be effected by mutual agreement of the parties, by one of the parties declaring a rescission of the contract without the consent of the other if sufficient grounds exist, or by applying to the court for a decree of rescission.
>
> The annual accounting concept requires that one must look at the transaction on an annual basis using the facts as they exist at the end of the year. That is, each taxable year is a separate unit for tax accounting purposes…..
>
> In Situation 1 the rescission of the sale … placed A and B at the end of the taxable year in the same positions as they were prior to the sale. Thus, … the original sale is to be disregarded for federal income tax purposes because the rescission extinguished any taxable income for that year with regard to that transaction…..
>
> In Situation 2, as in Situation 1, there was a completed sale in 1978. However, unlike Situation 1, because only the sale and not the rescission occurred in 1978, at the end of 1978 A and B were not in the same positions as they were prior to the sale….[T]he rescission in 1979 is disregarded with respect to the taxable events occurring in 1978.
>
> In both situations, the annual accounting period principle requires the determination of income at the close of the taxable year without regard to subsequent events.

Gateway Hotel Partners, LLC v. Commissioner[2950] upheld the requirement that the transaction cannot qualify for rescission unless undone by the end of the taxable year. *Blagaich v. Commissioner*[2951] also refused to apply rescission to a payment that the

---

Section 3.02(8) was added, the latter providing that whether a completed transaction can be rescinded for Federal income tax purposes is an issue on which the IRS will not issue a private letter ruling. At the May 2014 meeting of the Sales, Exchanges & Basis Committee of the American Bar Association's Section of Taxation, a government representative informally stated that withdrawing its study of the area indicates that the IRS has reaffirmed its commitment to Rev. Rul. 80-58. Materials for that meeting prepared by Section practitioner members are saved as Thompson Coburn document 6044351. For more on Rev. Rul. 80-58, see New York State Bar Association Tax Section Report on the Rescission Doctrine (Report No. 1216) (8/11/2010) at www.nysba.org/Content/ContentFolders20/TaxLawSection/TaxReports/1216-Report.pdf, citing Sheldon I. Banoff, Unwinding or Rescinding a Transaction: Good Tax Planning or Tax Fraud, *Taxes – The Tax Magazine* (Dec. 1984) at 942; and David H. Schnabel, Revisionist History: Retroactive Federal Tax Planning (2009) (unpublished manuscript), mentioning that an earlier version is published at 60 *Tax Lawyer* 685 (2007).

[2950] T.C. Memo. 2014-5.

[2951] T.C. Memo. 2016-2, holding:

> … In general, the annual accounting period principle reflected in section 451, considered in the light of the judicially articulated claim-of-right doctrine, limits application of the rescission exception such that, without regard to subsequent events, income received by the taxpayer under a claim of right and retained by her at the close of the taxable year

taxpayer returned over three years later after payment, when she did so only after being order by a court to do so. However, in another case, a taxpayer was permitted to rescind a disclaimer based on erroneous tax advice, more than two years after the disclaimer, after joining the IRS as a party to a legal action to rescind.[2952]

The IRS approved a rescission of a conversion from partnership to corporation where everything happened in one year and the taxpayer had a good nontax reason.[2953] The IRS has also allowed a taxpayer to rescind a restructuring involving a subsidiary to

---

> must be included in gross income for that year. See [*Penn v. Robertson*, 115 F.2d 167, 175 (4th Cir. 1940)]; Rev. Rul. 80-58, Situation 2, 1980-1 C.B. at 182.
>
> ….
>
> The facts show that, in 2010, petitioner took possession of the whole amount in question, $400,000, without any substantial limitations or restrictions as to its disposition. She recognized no liability and made no provision to repay that amount until nearly three years later. None of the cases petitioner cites as allowing a relaxation of the same-year requirement for rescission is factually comparable to her own, and they provide no rationale for departing from the general rule.
>
> With respect to the equitable concerns petitioner raised in her motion—The equities in this case simply do not support strict adherence to the one-year guideline in the rescission doctrine.—we note only that our statutory mandate does not permit us to decide this case on the basis of general principles of equity. See *Knapp v. Commissioner*, 90 T.C. 430, 440 (1988) (citations omitted) (The Tax Court is a court of limited jurisdiction. *** We have only the powers expressly conferred on us by Congress, and may not apply equitable principles to expand our jurisdiction beyond the limits of section 7442.), *aff'd*, 867 F.2d 749 (2d Cir. 1989).

The court rejected the taxpayer's reliance on *Hope v. Commissioner*, 55 T.C. 1020, 1030 (1971), *aff'd*, 471 F.2d 738 (3d Cir. 1973), which the court said:

> suggests that the rescission doctrine may apply even when repayment of a gain does not formally occur in the year of receipt, but only if, before the end of the year, [the] taxpayer recognizes his liability under an existing and fixed obligation to repay the amount received and makes provisions for repayment.

The court rejected the taxpayer's reliance on *Guffey v. United States*, 339 F.2d 759 (9th Cir. 1964), which case the court described:

> In *Guffey*, the installment purchasers of the Guffeys' home sued to rescind the sale contract when, in the following year, they discovered dry rot, moved out, and refused to make further payments. A settlement was reached under which the purchasers' suit was dismissed and the Guffeys obtained a quitclaim deed and retained the previously received payments as rent.…[W]hile the Court of Appeals did state that [i]t can fairly be said that the settlement with the *** [original purchasers] was, in substance, a reduction in the purchase price, *id.*, the Guffeys returned nothing to the original purchasers, the original purchasers apparently agreeing that the payments could be kept as rent. The sort of passive unwinding of the agreement that occurred in *Guffey* did not and could not occur in the case at bar; the only way Mr. Burns could be restored to status quo ante was if petitioner returned the $400,000.

[2952] *Breakiron v. Gudonis*, 106 A.F.T.R.2d 2010-5999 (D. Mass. 2010). The IRS was joined as a party when it attempted to collect gift tax. In another disclaimer case, the court dismissed the IRS as a party. *Van Vliet v. Van Vliet*, 115 A.F.T.R.2d 2015-803 (E.D. Va. 2015).

[2953] Letter Ruling 200952036.

reverse unintended adverse Federal income tax consequences.[2954] However, the IRS will not issue any more letter rulings in this area.[2955]

A taxpayer cannot unilaterally recast a transaction merely because the taxpayer decides that documenting it differently would have produced a better tax result.[2956]

For the rescission to be effective, both parties must be put back in their original positions.[2957] A January 2005 article further analyzes the rescission doctrine.[2958]

An S election may be rescinded until the last day on which the election could have been timely made.[2959] The IRS will not permit a revocation that is more retroactive than that.[2960] A corporation may rescind such a revocation at any time before the revocation becomes effective, but only with the consent of each person who consented to the revocation and each person who became a shareholder of the corporation within the period beginning on the first day after the date the revocation was made and ending on the date on which the rescission is made.[2961]

II.P.3.i. Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization

When transferring a corporation's business to a new partnership, consider doing the following:

1. The shareholders form a new corporation with ownership identical to the old corporation's ownership.

[2954] Letter Ruling 201008033.

[2955] Rev. Proc. 2017-3, Section 3.02(8), listed as a no-rule area "whether a completed transaction can be rescinded for Federal income tax purposes."

[2956] *Makric Enterprises, Inc. v. Commissioner*, TC Memo 2016-44, 119 A.F.T.R.2d ¶ 2017-580 (5th Cir. 3/27/2017).

[2957] Citing *Hutcheson v. Commissioner*, T.C. Memo. 1996-127 for that proposition, *Fitch v. Commissioner*, T.C. Memo. 2012-358, rebuffed IRS arguments in favor of rescinding a sale of a CPA practice, which was followed by a repurchase shortly thereafter when the original buyer's health deteriorated unexpectedly:

> The repurchase agreement, by its own terms, effected a sale of the C.P.A. practice from Mr. Gronke to Mr. Fitch and not an unwinding of the earlier sale. There is no evidence that Mr. Fitch and Mr. Gronke intended to abrogate, cancel, or void the sale agreement. Furthermore, we do not believe that the repurchase agreement returned them to their original positions. The C.P.A. practice continued as a dynamic, ongoing enterprise for approximately 4-1/2 months after the sale transaction, and we cannot say that Mr. Fitch received the C.P.A. practice back in the exact same condition in which he had sold it. Accordingly, we find that the sale and repurchase transactions were not rescinded.

Query whether the court was just being sympathetic to the seriously ill parties and really would set such a high bar if the taxpayers had sought to rescind the agreement.

[2958] Morehouse, The Rescission Doctrine: Tax Do-Overs, Another Roll Of the Dice, *TM Real Estate Journal* (BNA) (1/7/2015).

[2959] Reg. § 1.1362-2(a)(2)(i).

[2960] Christian & Grant, ¶32.02. Revocation, *Subchapter S Taxation* (WG&L), cites varies IRS correspondence to that effect.

[2961] Reg. § 1.1362-2(a)(4).

2. The old corporation converts or is merged into a limited liability company that is a disregarded entity.

3. Either the new corporation then transfers its member interest in the LLC to a limited partnership, or the LLC itself admits one or more additional members to convert the LLC to an entity taxed as a partnership.

To qualify as an F reorganization[2962] nontaxable for federal income tax purposes (always check state income tax rules), this or any other transaction must result in a mere change in identity, form, or place of organization of one corporation.[2963] A transaction involving an actual or deemed transfer is a mere change only if:

- Immediately after the reorganization, all the stock of the resulting corporation, including any stock of the resulting corporation issued before the reorganization, must have been distributed (or deemed distributed) in exchange for stock of the transferor corporation;[2964]

- The same person or persons must own all of the stock of the transferor corporation, determined immediately before the reorganization, and of the resulting corporation, determined immediately after the reorganization, in identical proportions;[2965]

- The resulting corporation does not hold any property or have any tax attributes[2966] immediately before the reorganization;[2967]

- The transferring corporation completely liquidates, for federal income tax purposes, in the reorganization;[2968]

[2962] Code § 368(a)(1)(F).

[2963] Reg. § 1.368-2(m)(1). For an analysis of the background to this regulation and its impact, see Kliegman and Chen, Some Ado About a Nothing: Final F Reorganization Regulations, *TM Memorandum* (BNA) (4/4/2016). The article suggests that Rev. Rul. 68-349 appears to violate the requirements of the text accompanying fns. 2964-2965; it has been suggested that informal comments at the January 2016 meeting of the American Bar Association's Section of Taxation indicate that the government might not have considered the regulations' impact on that ruling.

[2964] However, a de minimis amount of stock issued by the resulting corporation other than in respect of stock of the transferor corporation to facilitate the organization of the resulting corporation or maintain its legal existence is disregarded. Reg. § 1.368-2(m)(1)(i).

[2965] However, this requirement is not violated if one or more holders of stock in the transferor corporation exchange stock in the transferor corporation for stock of equivalent value in the resulting corporation, but having different terms from those of the stock in the transferor corporation, or receive a distribution of money or other property from either the transferor corporation or the resulting corporation, whether or not in exchange for stock in the transferor corporation or the resulting corporation. Reg. § 1.368-2(m)(1)(ii).

[2966] Including those specified in Code § 381(c).

[2967] However, this requirement is not violated if the resulting corporation holds or has held a de minimis amount of assets to facilitate its organization or maintain its legal existence, and has tax attributes related to holding those assets, or holds the proceeds of borrowings undertaken in connection with the potential F reorganization. Reg. § 1.368-2(m)(1)(iii).

[2968] However, the transferor corporation is not required to dissolve under applicable law and may retain a de minimis amount of assets for the sole purpose of preserving its legal existence. Reg. § 1.368-2(m)(1)(iv).

- Immediately after the reorganization, no corporation other than the resulting corporation holds property that was held by the transferor corporation immediately before the reorganization, if such other corporation would, as a result, succeed to and take into account the items of the transferor corporation described in Code § 381(c);[2969] and

- Immediately after the reorganization, the resulting corporation does not hold property acquired from a corporation other than the transferor corporation if the resulting corporation would, as a result, succeed to and take into account the items of such other corporation described in Code § 381(c).[2970]

The last two bullet points emphasize that tax attributes cannot change in an F reorganization.[2971] Thus, when a corporation engages in an F reorganization, the part of the tax year before the reorganization and the part after constitute a single tax year,[2972] and the resulting corporation must file a single full-year return; however, if the old corporation was domestic and the new one is foreign, the F reorganization does close the tax year.[2973] In a purely domestic F reorganization, the new corporation's filing a tax return runs the statute of limitations for the old corporation's activity that was reported on the new corporation's return.[2974]

[2969] Reg. § 1.368-2(m)(1)(v). The preamble, T.D. 9739, explains:

> Thus, a transaction that divides the property or tax attributes of a Transferor Corporation between or among acquiring corporations, or that leads to potential competing claims to such tax attributes, will not qualify as a Mere Change.

[2970] Reg. § 1.368-2(m)(1)(vi). The preamble, T.D. 9739, explains:

> Thus, a transaction that involves simultaneous acquisitions of property and tax attributes from multiple transferor corporations (such as the transaction described in Rev. Rul. 58-422, 1958-2 CB 145) will not qualify as a Mere Change.

[2971] The preamble, T.D. 9739, says:

> From a federal income tax perspective, F reorganizations are generally neutral, involving no change in ownership or assets, no end to the taxable year, and inheritance of the tax attributes described in section 381(c) without a limitation on the carryback of losses. See, for example , Rev. Rul. 96-29 (discussed in section 3.B.ii. of the Background); § 1.381(b)-1(a)(2).

[2972] Reg. § 1.381(b)-1(a)(2) provides:

> *Reorganizations under section 368(a)(1)(F)*. In the case of a reorganization qualifying under section 368(a)(1)(F) (whether or not such reorganization also qualifies under any other provision of section 368(a)(1)), the acquiring corporation shall be treated (for purposes of section 381) just as the transferor corporation would have been treated if there had been no reorganization. Thus, the taxable year of the transferor corporation shall not end on the date of transfer merely because of the transfer; a net operating loss of the acquiring corporation for any taxable year ending after the date of transfer shall be carried back in accordance with section 172(b) in computing the taxable income of the transferor corporation for a taxable year ending before the date of transfer; and the tax attributes of the transferor corporation enumerated in section 381(c) shall be taken into account by the acquiring corporation as if there had been no reorganization.

[2973] Reg. § 1.367(a)-1(e).

[2974] *New Capital Fire, Inc. v. Commissioner*, T.C. Memo. 2017-177, rejecting the IRS' contention that failing to file a return for the old corporation kept the statute of limitations open. The new corporation's return properly disclosed the F reorganization. The court held:

> New Capital's 2002 return purported to and did include Old Capital's income from January 1 through December 4, 2002. Respondent has not alleged, and we do not find,

Continuity of the business enterprise and a continuity of interest are not required to qualify as an F reorganization.[2975]

Subject to certain limitations, an F reorganization might consist of a series of related transactions that together result in a mere change of one corporation.[2976]

It has been suggested that substantive changes of ownership that were not allowed before these regulations are now allowed:[2977]

> that New Capital's 2002 return was false or fraudulent with intent to evade tax as it pertains to Old Capital. It was respondent's duty to determine, within the period of limitations provided by section 6501(a), whether New Capital's 2002 return, as it pertains to Old Capital, was erroneous in any respect. The exception under section 6501(c)(3) does not apply. Accordingly, assessment of the determined deficiency and additions to tax is barred by the statute of limitations.

[2975] Reg. § 1.368-2(m)(2).

[2976] Reg. § 1.368-2(m)(3). The preamble, T.D. 9739, explains:

> In some cases, business or legal considerations may require extra steps to complete a transaction that is intended to qualify as a Mere Change. As discussed in section 3.B.i. of the Background, the Treasury Department and the IRS concluded that the words however effected in the statutory definition of F reorganization reflect a Congressional intent to treat a series of transactions that together result in a Mere Change as an F reorganization, even if the transfer (or deemed transfer) of property from the Transferor Corporation to the Resulting Corporation occurs indirectly. The Final Regulations confirm this conclusion by providing that a Potential F Reorganization consisting of a series of related transactions that together result in a Mere Change may qualify as an F reorganization, whether or not certain steps in the series, viewed in isolation, might, for example, be treated as a redemption under section 304(a), as a complete liquidation under section 331 or section 332, or as a transfer of property under section 351. For example, the first step in an F reorganization of a corporation owned by individual shareholders could be a dissolution of the Transferor Corporation, so long as this step is followed by a transfer of all the assets of the Transferor Corporation to a Resulting Corporation. However, see § 1.368-2(k) for completed reorganizations that will not be recharacterized as a Mere Change as a result of one or more subsequent transfers of assets or stock, such as where a Transferor Corporation transfers all of its assets to its parent corporation in liquidation, followed by the parent corporation's retransfer of those assets to a new corporation. See also Rev. Rul. 69-617, 1969-2 CB 57 (an upstream merger followed by a contribution of all the target assets to a new subsidiary corporation is a reorganization under sections 368(a)(1)(A) and 368(a)(2)(C)).

The preamble further discussed such a reorganization's role in a larger transaction:

> As discussed in section 3.B.ii. of the Background, the Treasury Department and the IRS recognized that an F reorganization may be a step, or a series of steps, before, within, or after other transactions that effect more than a Mere Change, even if the Resulting Corporation has only a transitory existence following the Mere Change. In some cases an F reorganization sets the stage for later transactions by alleviating non-tax impediments to a transfer of assets. In other cases, prior transactions may tailor the assets and shareholders of the Transferor Corporation before the commencement of the F reorganization. Although an F reorganization may facilitate another transaction that is part of the same plan, the Treasury Department and the IRS have concluded that step transaction principles generally should not recharacterize F reorganizations because F reorganizations involve only one corporation and do not resemble sales of assets.

[2977] McMahon, Recent Developments in Federal Income Taxation of Corporations and Partnerships, 64th Annual Montana Tax Institute (10/14/2016).

- Exchanging stock for stock of equivalent value but with different terms, or
- Either the old or new corporations distributing cash or other property.

Sometimes a conversion generally involves a direct or indirect merger of a corporation into an unincorporated entity taxed as a corporation.[2978] For example, an LLC that is taxed as an S corporation can move assets comprising one line of business into a new parent LLC taxed as an S corporation that assumes its tax attributes and then under Code § 355 distribute assets comprising another line of business into another LLC taxed as an S corporation.[2979] Generally, for an S corporation, I recommend that the LLC file a

---

[2978] A direct approach is found Reg. § 1.368-2(m)(4), Example (8), and the logistics are explained in Letter Ruling 200839017. See Riser, Hiding Your Stuff in Plain Sight (Without Trusts): Dr. FUnbundle (or How I Learned to Stop Worrying and Love Sec. 368(a)(1)(F)), American Bar Association Section of Real Property, Trust & Estate Law, 2009 Spring Symposia, discussing Letter Ruling 200701017. See also Rev. Ruls. 64-250, 73-256, and 2008-18 and Letter Rulings 200528021, 200622025, and 200719005. See also Kalinka, Transfer of an Interest in an LLC Taxed As an S corporation Raises Many Questions, p. 23 *Taxes-The Tax Magazine* (October 2007); Christian & Grant, ¶29.07. 'F' Reorganizations, *Subchapter S Taxation* (WG&L); and Gassman, Crotty, and O'Leary, The Estate Planner's Guide to New Parent F Reorganizations, *Estate Planning Journal* (WG&L), May 2008. These issues were discussed at the Asset Protection Committee Meeting of the American College of Trust & Estate Counsel (ACTEC) in the Fall of 2009, which included some practical materials for LLCs taxed as S corporations that are available to ACTEC Fellows. For whether a new employer identification number (IRS tax ID) is needed, see Rev. Rul. 2008-18 and part II.P.3.a Need for New Tax ID. Although Rev. Rul. 2008-18 says that the new entity retains the new entity's S election, I had suggested that the new entity file IRS Form 2553. However, Form 8869, line 14 asks, "Is this election being made in combination with a section 368(a)(1)(F) reorganization described in Rev. Rul. 2008-18, where the subsidiary was an S corporation immediately before the election and a newly formed holding company will be the subsidiary's parent?" and provides the following instructions:

> This box should be checked "Yes" if this election is being made pursuant to a reorganization under section 368(a)(1)(F) and Rev. Rul. 2008-18. This occurs when a newly formed parent holding company holds the stock of the subsidiary that was an S corporation immediately before the transaction and the transaction otherwise qualifies as a reorganization under section 368(a)(1)(F). No Form 2553, Election by a Small Business Corporation, is required to be filed by the parent. See Rev. Rul. 2008-18, 2008-13 I.R.B. 674, for details.

Letter Ruling 199947034, found in fn. 5540, ruled that Code § 2701 did not apply to such a reorganization.

See fn. 295 in part II.B Limited Liability Company (LLC) if the new entity is an LLC electing taxation as an S corporation and fn. 171 in part II.A.2.h Qualified Subchapter S Subsidiary (QSub) regarding the timing of an LLC electing S corporaton status before acquiring a QSub.

[2979] Letter Ruling 201638004. The facts were:

(1) The X members will contribute all of their X equity units to Y, a newly formed-State X limited liability company, in exchange for all of the Y equity units.
(2) X will elect to become, or by default will become, a disregarded entity or qualified subchapter S subsidiary for Federal tax purposes. After this step, Y expects to continue X's S corporation election.
(3) X will distribute the assets comprising the Retained Business to Y in a transaction that it expects to be disregarded for Federal income tax purposes. After this step, X would continue to hold the assets comprising the Distributed Business.
(4) Y will transfer all of the equity units of X to Z, a newly-formed State X limited liability company, solely in exchange for all of the Z equity units. After this step, Z will hold

new Form 2553, election to be taxed as an S corporation, which converts the LLC to a corporation and makes an S election at the same time.[2980]

Consider a different approach when the corporation has sold all of its business assets. See part II.F.2 Asset Protection Benefits of Dissolving the Business Entity After Asset Sale.

II.Q. Exiting from or Dividing a Business

II.Q.1. General Principles When Selling Ownership of a Business

A business' value is the present value of the expected future cash flows to its owners. A buyer uses these cash flows to pay the purchase price:

- ***Third-Party Financing***. A third-party lender provides cash to pay the purchase price in a lump sum. Business risk is shared between the buyer and the third-party lender, with the buyer assuming substantially all of the risk. Because the seller receives all cash up-front, the seller's risk is minimal.

- ***Seller Financing***. A series of payments from the buyer to the seller is evidenced through a promissory note. From a technical legal viewpoint, the buyer has all of the risk. However, as a practical matter, the seller is subject to business risk because the buyer is much less likely to pay if the business' cash flow is insufficient to service this debt. At any given point in time, the buyer is likely to withhold part or all of the remaining payments if the business' cash flow is less than expected. From an income tax viewpoint, the seller might be able to use the installment method to defer income tax on the gain on sale,[2981] subject to limitations if and to the extent that the

---

only the equity units in X, which continues to hold the assets comprising the Distributed Business.

(5) Y will distribute pro rata all of the equity units of Z to Y's members in a transaction intended to qualify under section 355 of the Internal Revenue Code (the Distribution).

After reciting various representations, the ruling held:

(1) For purposes of determining whether Steps 1 and 2, viewed together, result in the realization of gain or loss under section 1001 (see *Weiss v. Stearn*, 265 U.S. 242 (1924)), or a reorganization under section 368(a)(1)(F) (see Rev. Rul. 72-206, 1972-1 C.B. 104), Steps 3 through 5 shall be disregarded.

(2) For U.S. Federal income tax purposes, Steps 3 through 5 will be treated as a direct transfer of the Distributed Business by Y to Z in exchange for all of the equity units of Z and the assumption of associated liabilities, followed by the pro rata distribution by Y of all of the equity units of Z to Y's members.

(3) X's S election will not terminate as a result of the completion of Steps 1 and 2, but continues for Y.

[2980] See fn. 295 and the accompanying and following text. Also consider what happens if there is some defect in Form 2553 that might make its filing invalid. Is converting into a partnership or a C corporation the lesser of two evils? If the latter, consider filing Form 8832 before Form 2553.

[2981] Even though stock was generally listed on the stock market, taxpayers who were affiliates as defined in Rule 144 under the 1933 Act and could not sell their unregistered shares of stock in Company on the Market, except pursuant to the volume limitations and other restrictions imposed by Rule 144 could sell their shares on the installment method. Letter Ruling 9803021. Furthermore, stock in an S corporation was eligible for installment sale treatment even though it held marketable securities. Letter Ruling 9306003 reasoned:

business interest sold is a partnership interest with "hot assets,"[2982] as well as acceleration in various events.[2983]

- ***Equity Financing***. The seller receives payments based on the business' performance over a short period of time following the transfer, or the timing of buyer's payments depends on the business' profitability. The taxation of contingent sales proceeds in the corporate arena[2984] is more uncertain than in the partnership arena.[2985]

When the buyer uses debt to pay for the business, two layers of tax are imposed:

- First, the buyer pays income tax on the earnings used to repay the debt.
  - For a partnership or S corporation, if owners are taxed on income from operations at a 46% ordinary federal and state income tax rate, the business must earn $185 of profits to fund a $100 principal payment on the debt.[2986]
  - A C corporation structure exacerbates this. If dividends are taxed at a 30% combined federal and state income rate, a $143 dividend generates $100 after tax. To distribute $143 to its shareholders, a C corporation that is subject to taxes on income from operations at a 40% ordinary federal and state income tax rate must generate over $238 of income. Thus, over $238 of business earnings are required to fund a $100 principal payment on the debt.
  - The interest component is easier to finance, assuming the interest is fully deductible.[2987] For a partnership or S corporation, only $100 of earnings is necessary to make a $100 interest payment. However, for a C corporation that is

---

> Application of section 453(k)(2) to the S Common Stock is inappropriate. The flush language of section 453(k) provides the Secretary with the authority to provide for the application of section 453(k) in whole or in part for transactions in which the rules of the section would be avoided through use of related parties, pass-thru entities, or intermediaries. Because the Secretary has not issued regulations pursuant to this authority, however, the flush language may not be applied to the sale of the S Common Stock. Thus, because the S Common Stock is neither traded on an established securities market nor convertible into such publicly traded property, section 453(k)(2) does not apply to the sale of the S Common Stock.

However, the legislative history to the Tax Reform Act of 1986, PL 99-514, authorized the issuance of retroactive regulations disallowing the avoidance of the rules regarding publicly traded stock through use of related parties or other intermediaries.

[2982] See part II.Q.8.e.ii.(c) Availability of Installment Sale Deferral for Sales of Partnership Interests.

[2983] See part II.G.14 Limitations on the Use of Installment Sales.

[2984] Skinner, Earn-Outs in Public Company Acquisitions: New CVRs Raise Unsettled Tax Issues, Journal of Taxation (Dec 2010).

[2985] See part II.Q.8.b.ii, Partnership Redemption – Complete Withdrawal Using Code § 736.

[2986] However, if the owner is a partner who must pay self-employment tax on the earnings, additional earnings are required to pay the self-employment tax. Holding the partnership interest through an S corporation should avoid this issue.

[2987] See part III.A.3 Trusts Holding Stock in S Corporations, for a discussion of various types of trusts that can hold stock in an S corporation, including part III.A.3.e.iii Comparing QSSTs to ESBTs, which addresses deducting interest on a loan to buy such stock in footnotes 4604-4550.

subject to taxes on income from operations at a 40% ordinary federal and state income tax rate, earnings of $167 are required to pay a $100 dividend.[2988]

- The seller pays tax on the sale. For example, if the seller has a combined 30% federal and state income tax rate, the seller nets $70 on every $100 of purchase price that constitutes capital gain. However, the seller would pay ordinary income tax on any interest component, so that $100 of interest payments would net only $50 to a seller subject to taxes on income from operations at a 50% ordinary federal and state income tax rate. Note that, although capital gain rates apply to the sale of stock in a C corporation or an S corporation, ordinary income tax rates apply to the portion of the sale of a partnership interest attributable to "hot assets."[2989]

From these examples, some principles emerge:

- ***Paying Principal***. Principal payments can require from $167[2990]-$238[2991] of income to be generated to provide the seller with $70[2992]-$100[2993] after tax. Thus, the tax cost of principal payments represents 48%-66% of the earnings.

- ***Paying Interest***. Interest payments require $100[2994]-$167[2995] to provide the seller with $50 after tax. Thus, the tax cost of interest payments represents 50%-70% of the earnings.

- ***Efficiency of Entity***. The tax cost is lowest for:

  - Interest or other deductible payments on the sale of a partnership or S corporation, or

  - Principal payments to the extent of the seller's basis.

[2988] If an individual buyer/shareholder itemizes deductions, the buyer would deduct the interest as investment interest expense. Investment interest expense is deductible to the extent of net investment income. Code § 163(d). Preferably, the buyer would have ordinary interest or nonqualified dividends sufficient to generate this net investment income. Otherwise, the qualified dividends would need to be taxed at ordinary rates to constitute investment income; however, investment interest deducted at ordinary income tax rates generally would offset dividend income taxed using ordinary income tax rates. This comparison is not totally accurate, however, in that the dividend income is included in adjusted gross income (AGI) and can result in reduced itemized deductions and have other adverse AGI-related tax effects. If the buyer is a C corporation, these concerns are not present, and the corporation may also benefit from a dividends received deduction that can reduce or eliminate the tax on the dividends; however, the buyer's own shareholders would be taxed when the buyer distributes whatever return it receives on its investment.
[2989] See part II.Q.8.e.ii.(b) Character of Gain.
[2990] For a partnership or S corporation.
[2991] For a C corporation.
[2992] For the gain component of principal payments, net of capital gain tax.
[2993] For the portion of principal payments representing a return of basis.
[2994] For a partnership or S corporation.
[2995] For a C corporation.

II.Q.1.a. Contrasting Ordinary Income and Capital Scenarios on Value in Excess of Basis

To minimize a sale's tax bite illustrated below, as discussed in the discussion after the illustrations tax planners seek structures with characteristics similar to interest or other deductible payments on the sale of a partnership or S corporation.[2996] The discussion below shows that seller-financed sales of partnership interests can avoid capital gain tax relative to a sale of stock in an S corporation (or a C corporation). Furthermore, the partnership sale structure allows goodwill to be sold later subject to capital gain rates, whereas a sale of goodwill generates slow deductions and may cause disadvantages for the future sale of that goodwill.[2997]

Note, however, that some or all of up to $10 million[2998] of the gain on the sale of C corporation stock might be excluded from taxable income under part II.Q.7.j Exclusion of Gain on the Sale of Certain Stock in a C Corporation.

Further below is a discussion of special opportunities to shift towards a partnership structure,[2999] which generally is the best overall structure,[3000] the structure of which[3001] and a summary of ways to shift[3002] were described earlier in these materials.

[2996] This is a little simplistic, in that partnerships also have unique benefits (earlier use of basis in installment sales; if considering such a sale, see part II.Q.8.e.ii.(c) Availability of Installment Sale Deferral for Sales of Partnership Interests) and detriments (look at partnership's underlying assets to determine the character of gain on sale). See II.Q.8 Exiting From or Dividing a Partnership, especially II.Q.8.b.ii Partnership Redemption – Complete Withdrawal Using Code § 736 and II.Q.8.e.ii Transfer of Partnership Interests: Effect on Transferring Partner.
[2997] For more details, see part II.Q.1.c.i Taxation When a Business Sells Goodwill; Contrast with Nonqualified Deferred Compensation.
[2998] Or ten times the stock's basis, if greater. Code § 1202(b)(1)(B).
[2999] See II.Q.8.b.iii Partnership Alternative to Seller-Financed Sale of Goodwill, regarding how a corporation might shift future appreciation to a partnership.
[3000] See part II.E.2.b Converting from S Corporation to C Corporation
See part II.P.3.e Conversion from S Corporation to C Corporation for short-term planning. Ideas include:

A conversion may be taxable, with the main issue being that an S corporation that was on the cash method that may be required to convert to the accrual method.

Additional steps may be needed to preserve or distribute the S corporation's accumulated adjustment account (which generally lets S corporations distribute its reinvested taxable earnings later without taxing it shareholders – see part II.Q.7.b Redemptions or Distributions Involving S Corporations). Note that, if the corporation distributes a note before converting, interest income on the note will be taxable at its shareholders' full ordinary income rates and subject to net investment income tax, which together combine to impose a 40.8% federal tax rate, whereas the corporation may receive (see part II.G.19.a Limitations on Deducting Business Interest Expense) a deduction at a 21% federal rate.

However, one always needs to consider what if that decision needs to be reversed when a new Congress changes the income tax paradigm. See parts II.P.3.c Conversion from

For now, let's focus on ways to extract value that any entity can try to use.

II.Q.1.a.i. Scenario for Moderate State Tax

Consider the portion of the business' equity representing internally generated goodwill, and assume the following tax rates, which might or might not be attained:

An individual in a top bracket might be taxed at a rate of 34.6%-45.8%, consisting of:

- 29.6%-37% ordinary income tax (depending on whether the Code § 199A 20% deduction is available)

C Corporation to S corporation and II.P.3.c.v Conversion from S Corporation to C Corporation then Back to S Corporation.

Converting a C Corporation to an S Corporation

A C corporation that revoked its S election must wait 5 years to convert back to an S corporation. See part II.A.2.l Terminating S Election.

See part II.P.3.c Conversion from C Corporation to S corporation, including II.P.3.c.v Conversion from S Corporation to C Corporation then Back to S Corporation. Issues discussed there include the following:

Generally, an asset sold within 5 years after converting from a C corporation to an S corporation will be taxed at the entity level and again to the shareholders. See part II.P.3.c.ii Built-in Gain Tax on Former C Corporations under Code § 1374. Therefore, before converting, one might sell assets that are likely to sold within 5 years. If the taxpayer uses the cash receipts and disbursements method of accounting, consider switching to accrual before convertings, so that accoutns receiveable do not get hit with this tax.

Although an S corporation that has accumulated earnings and profits from when it was a C corporation cannot have excess passive investment income, that issue is easily managed through the corporation's investment mix – if one considers the issue and plans for it. See part II.P.3.c.iii Excess Passive Investment Income, especially fns 2865-2868.

Also, an S corporation that has accumulated earnings and profits from when it was a C corporation should not invest in tax-exempt investments, the income from which does not generate AAA and therefore may trigger a taxable dividend when distributed. See part II.P.3.c.iv Problem When S Corporation with Earnings & Profits Invests in Municipal Bonds.

If the corporation maintains an inventory, converting from a C corporation to an S corporation may incur tax. See part II.P.3.c.i LIFO Recapture.

.

[3001] See parts II.E.5 Recommended Long-Term Structure for Pass-Throughs – Description and Reasons and II.E.6 Recommended Partnership Structure – Flowchart.

[3002] See part II.E.7.c Flowcharts: Migrating Existing Corporation into Preferred Structure.

- zero-3.8% net investment income tax (working in the business may avoid this tax, and exceptions to SE tax may apply as well), and

- 5% state income tax.

The individual in a top bracket is assumed taxed at a rate of 28.8%, consisting of 20% capital gain tax, 3.8% net investment income tax, and 5% state income tax.

Sale of Goodwill - Assumptions

C corp. income tax rate:	26.0%	federal and state
Individual capital gain rate:	20.0%	federal
	5.0%	state
	3.8%	NII tax
	28.8%	
Pass-through income rate:	29.6%-37%	federal income tax
	5.0%	state
	Zero-3.8%	NII or SE tax
	34.6%-45.8%	

The capital gain rate for individuals might be overstated when a person sells stock in an S corporation, because the 3.8% tax on net investment income would not apply with respect to the business assets allocable to that stock when a shareholder who is active in the business sells the stock.[3003] The partnership income tax rate might be overstated, either if the partner is a limited partner not subject to self-employment tax[3004] or if the payment is neither self-employment income[3005] nor attributable to business assets allocable to the partnership interest when a partner who is active in the business sells the partnership interest.[3006]

The scenario in the left column below assumes that the buyer uses after-tax dollars to buy the seller's interest in the business. The tax to the buyer in the left column is based on the ordinary income rates, because the buyer is using income generated by operations to fund the payments to the seller. The seller is receiving income at capital gain rates.

[3003] See part II.I.8.e NII Components of Gain on the Sale of an Interest in a Partnership or S Corporation.
[3004] See part II.L.4 Self-Employment Tax Exclusion for Limited Partner, which one might apply to avoid self-employment tax using the structure described in part II.E.5 Recommended Long-Term Structure for Pass-Throughs – Description and Reasons and illustrated in part II.E.6 Recommended Partnership Structure – Flowchart.
[3005] See part II.L.7 SE Tax N/A to Qualified Retiring or Deceased Partner.
[3006] See parts II.I.8.d Partnership Structuring in Light of the 3.8% Tax on Net Investment Income and II.I.8.e NII Components of Gain on the Sale of an Interest in a Partnership or S Corporation.

	Capital Gain to Seller	Ordinary Income to Seller
Profit	$ 153-185	$109-131
Tax to Buyer	-(53-85)	-0
	$ 100	$109-131
Tax to Seller	- 29	38-60
Net to Seller	$ 71	$ 71

The tax in the right-hand column assumes that the buyer deducts payments to the seller, which is essentially what happens when one pays off a seller by allocating current partnership income to the seller.

The following pages illustrate this concept, showing that it takes a C corporation $189 in earnings to do a cross-purchase (one owner sells to another)[3007] and $135 to do either a redemption (entity buys from seller)[3008] or a cross-purchase using an exclusion that applies to the sale of certain stock,[3009] an S corporation $153-185 in earnings,[3010] and a partnership only $109-131 in earnings[3011] to get $71 to the seller.

[3007] See part II.Q.1.a.i.(a) C Corporation Triple Taxation

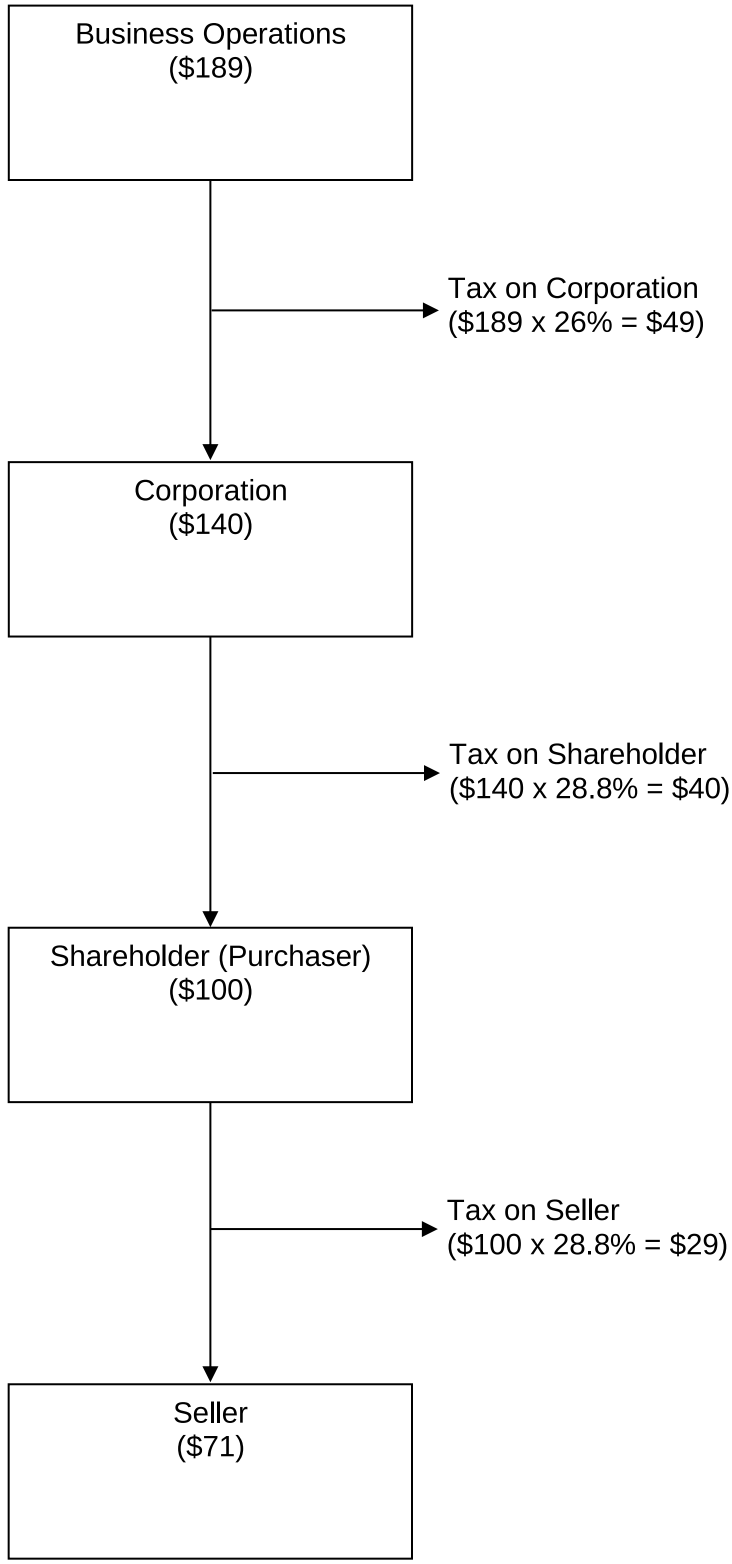
[3008] See part II.Q.1.a.i.(b) C Corporation Redemption. Redeeming the seller entirely might work if buying out one owner and increasing the other owners' interests in proportion to each other. However, if the sole owner is selling, or if the remaining owners are not increased in proportion to each other, then a cross-purchase or a stock issuance is needed to get the remaining owners' interests in the correct proportion, followed by the redemption. For approval of combining a cross-purchase with a redemption, see part II.Q.7.a.ii Hybrid Between Redemption and Cross-Purchase When Selling to New Shareholder or Other Shareholders.

[3009] See part II.Q.1.a.i.(c) C Corporation Double Taxation Under Part II.Q.7.j Exclusion of Gain on the Sale of Certain Stock in a C Corporation.

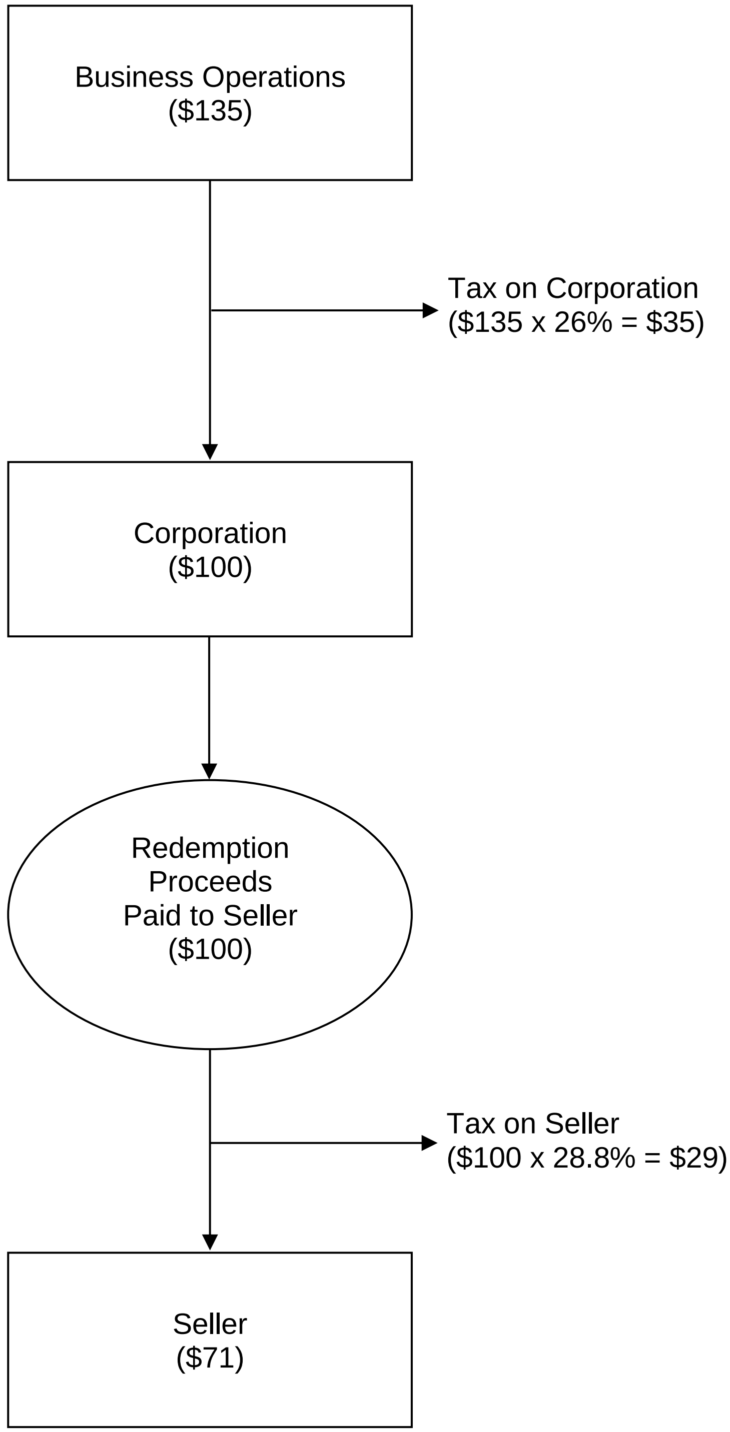
[3010] See part II.Q.1.a.i.(d) S Corporation Double Taxation.

[3011] See part II.Q.1.a.i.(e) Partnership Single Taxation of Goodwill.

II.Q.1.a.i.(a). C Corporation Triple Taxation

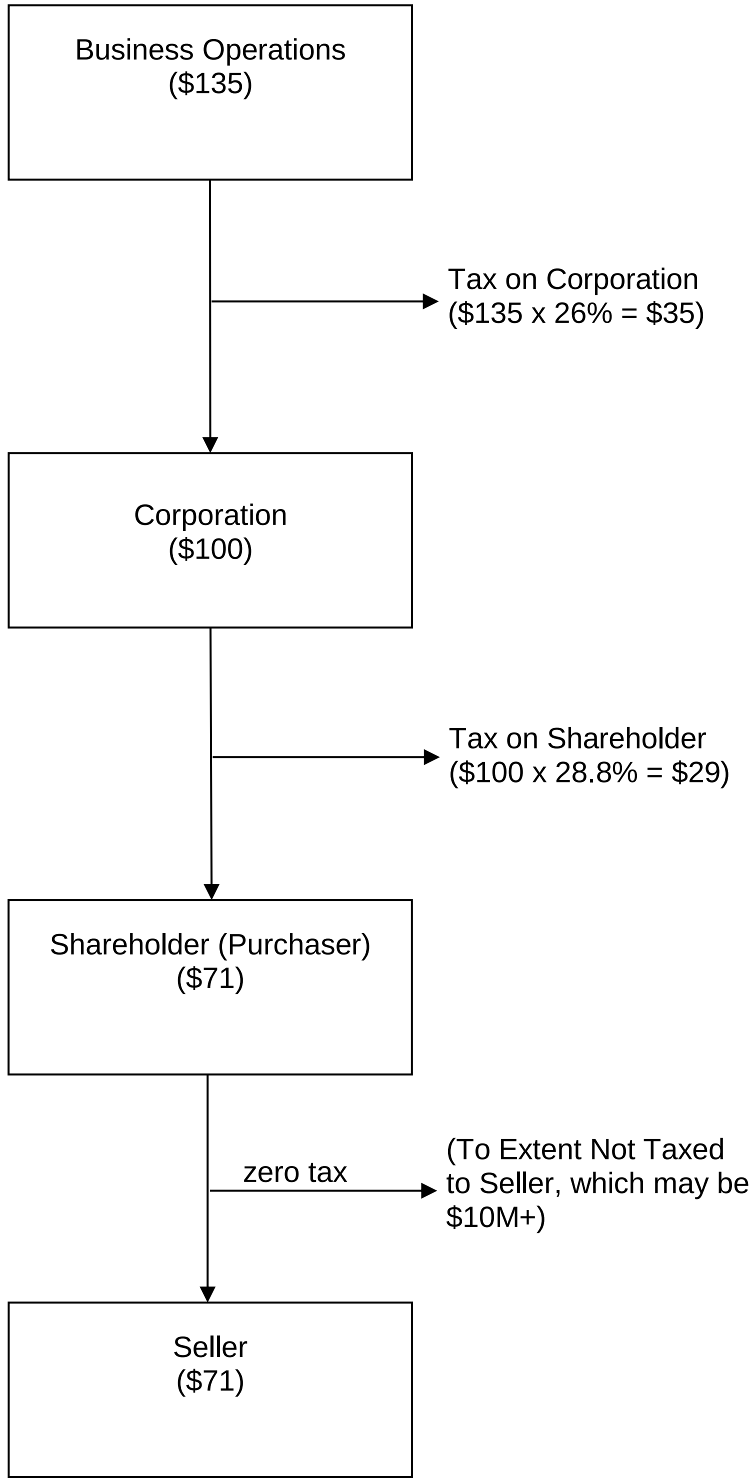


II.Q.1.a.i.(b). C Corporation Redemption



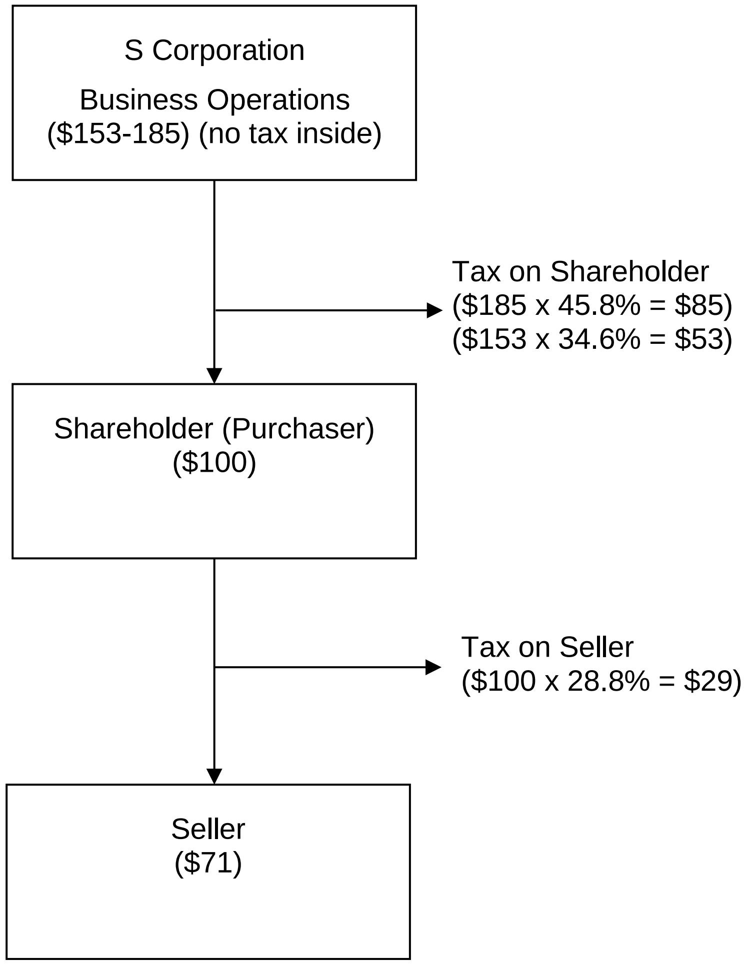
See part II.Q.7.a.ii Hybrid Between Redemption and Cross-Purchase When Selling to New Shareholder or Other Shareholders. The buyer may benefit more from buyer's future sale if buys from corporation more than two years before the seller is redeemed.

II.Q.1.a.i.(c). C Corporation Double Taxation Under Part II.Q.7.j Exclusion of Gain on the Sale of Certain Stock in a C Corporation



6656226

II.Q.1.a.i.(d). S Corporation Double Taxation



Notes:

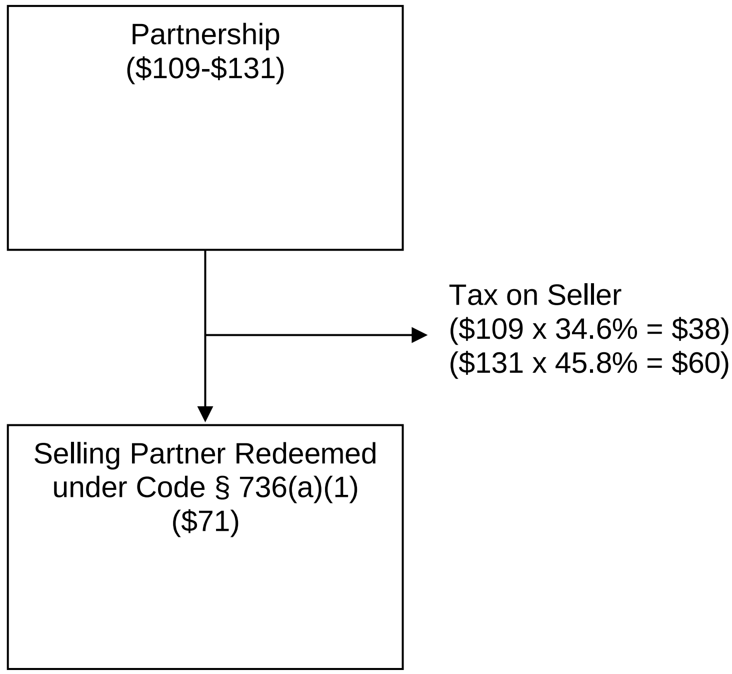
The buyers might very well have lower income tax rates than the seller, resulting in a decreased amount of earnings needed to buy out the seller. For example, a 40% income tax rate would require only $167 of earnings (40% of $167 is $67 tax).

Although an S corporation buyout might be perceived as the same as a Code § 736(b) buyout, it is not. Each year's Code § 736(b) payment creates a new goodwill asset that can amortized over 15 years. This option is not available to S corporations.

This scenario assumes corporate goodwill. Personal goodwill can be dealt with more effectively than corporate goodwill.

If and to the extent sale price is based on accumulated earnings rather than goodwill, sale price is not taxable and exclusion under part II.Q.1.a.i.(c) is not more favorable.

II.Q.1.a.i.(e). Partnership Single Taxation of Goodwill



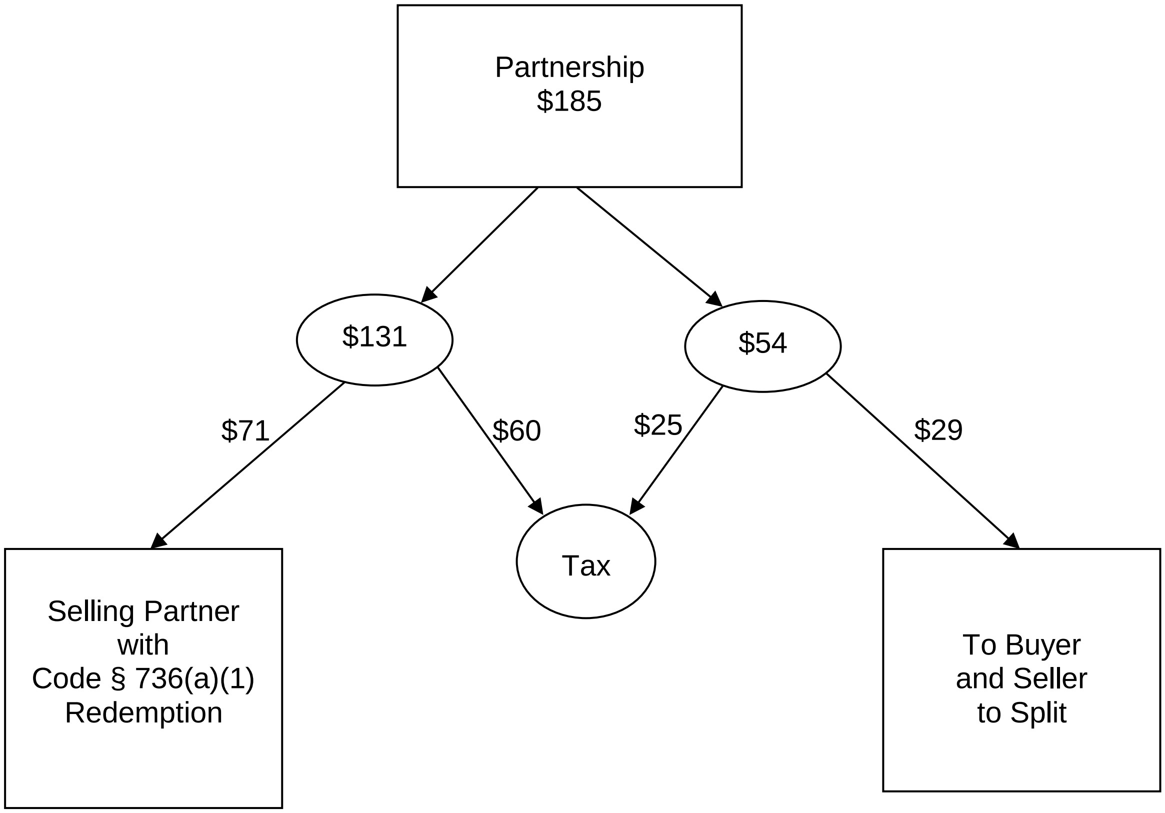
For more details on the tax and nontax benefits of this structure, see part II.Q.8.b.iii Partnership Alternative to Seller-Financed Sale of Goodwill, as well as part II.Q.8.b.ii Partnership Redemption – Complete Withdrawal Using Code § 736, which includes allowing income to be taxed to the seller under Code § 736(a).

See part II.Q.8.b.ii.(b) Flexibility in Choosing between Code § 736(a) and (b) Payments (including in fns. 3986-3988 the requirement that, to obtain Code § 736(a) treatment with respect to unrealized receivables and goodwill, a retiring partner must be a general partner and capital cannot be a material income-producing factor).

If the partnership is not a service partnership, one might need to use a preferred profits interest instead of Code § 736(a) payments. However, consider whether such a reallocation of profits might constitute a shifting of goodwill that should be reflected in capital accounts and therefore might constitute a taxable shift of a capital account.[3012]

[3012] See fn. 412 in part II.C.6 Shifting Rights to Future Profits.

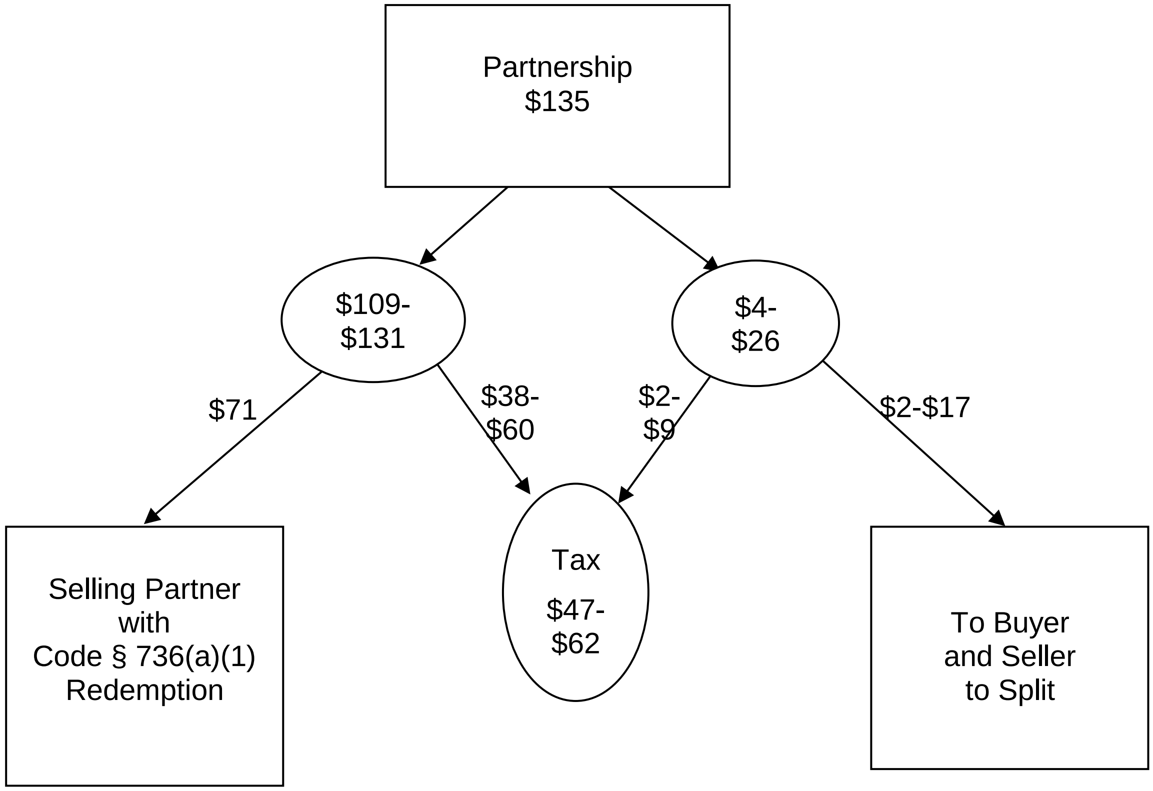
II.Q.1.a.i.(f). Partnership Use of Same Earnings as S Corporation in Sale of Goodwill



Notes:

- This scenario uses the income from the scenario II.Q.1.a.i.(d) S Corporation Double Taxation and applies the concepts from part II.Q.1.a.i.(e) Partnership Single Taxation of Goodwill. The left side of the flowchart duplicates the partnership scenario, with $131 of earnings and $71 of tax. The right side of the flowchart takes the $185 from the S corporation double taxation scenario and subtracts from it the $131 from the partnership scenario, resulting in $54 extra earnings in the partnership scenario not needed to generate $71 for the seller. However, these $54 of extra earnings are subject to $25 of income tax, so that only $29 is left, net after-tax.
- The $29 net after-tax is based on an original $100 purchase price, meaning that the partnership scenario nets 29% after-tax dollars that the parties can allocate.
- In either scenario, $185 is subjected to ordinary income tax.

II.Q.1.a.i.(g). Partnership Use of Same Earnings as C Corporation (Either Redemption or No Tax to Seller per Part II.Q.7.j Exclusion of Gain on the Sale of Certain Stock in a C Corporation) in Sale of Goodwill



Notes:

- This scenario uses the income ($135) from the scenario in in part II.Q.1.a.i.(b) C Corporation Redemption or part II.Q.1.a.i.(c) C Corporation Double Taxation Under Part II.Q.7.j Exclusion of Gain on the Sale of Certain Stock in a C Corporation and applies the concepts from part II.Q.1.a.i.(e) Partnership Single Taxation of Goodwill. The left side of the flowchart duplicates the partnership scenario, with $109-$131 of earnings and $38-$60 of tax. The right side of the flowchart takes the $135 from the C corporation scenario and subtracts from it the $109-$131 from the partnership scenario, resulting in $4-$26 extra earnings in the partnership scenario not needed to generate $70 for the seller. However, these $4-$26 of extra earnings are subject to $2-$9 of income tax, so that only $2-$17 is left, net after-tax.
- The $2-$17 net after-tax is based on an original $100 purchase price, meaning that the partnership scenario nets 4%-17% after-tax dollars that the parties can allocate.
- In either scenario, $135 is subjected to ordinary income tax.

II.Q.1.a.ii. California Scenarios (not yet updated for 2017 federal tax changes)

Consider the portion of the business' equity representing internally generated goodwill, and assume the following tax rates, which might or might not be attained:

Sale of Goodwill - Assumptions

C corp. income tax rate:	35.0%	federal
	8.8%	state
	43.8%	
Individual capital gain rate:	20.0%	federal
	13.3%	state
	3.8%	supplemental
	1.2%	various phase-outs
	38.3%	
S corporation income rate:	39.6%	federal
	1.5%	state entity level
	13.3%	state individual level
	1.2%	various phase-outs
	55.6%	
Self-employment income rate:	39.6%	federal
	13.3%	state
	3.8%	self-employment
	1.2%	various phase-outs
	57.9%	

The capital gain rate for individuals might be overstated when a person sells stock in an S corporation, because the 3.8% tax on net investment income would not apply with respect to the business assets allocable to that stock when a shareholder who is active in the business sells the stock.[3013] The partnership income tax rate might be overstated, either if the partner is a limited partner not subject to self-employment tax[3014] or if the payment is neither self-employment income[3015] nor attributable to business assets allocable to the partnership interest when a partner who is active in the business sells the partnership interest.[3016]

The scenario in the left column below assumes that the buyer uses after-tax dollars to buy the seller's interest in the business. The tax to the buyer in the left column is based on the ordinary income rates, because the buyer is using income generated by operations to fund the payments to the seller. The seller is receiving income at capital gain rates.

[3013] See part II.I.8.e NII Components of Gain on the Sale of an Interest in a Partnership or S Corporation.
[3014] See part II.L.4 Self-Employment Tax Exclusion for Limited Partner.
[3015] See part II.L.7 SE Tax N/A to Qualified Retiring or Deceased Partner.
[3016] See parts II.I.8.d Partnership Structuring in Light of the 3.8% Tax on Net Investment Income and II.I.8.e NII Components of Gain on the Sale of an Interest in a Partnership or S Corporation.

	Capital Gain to Seller	Ordinary Income to Seller
Profit	$ 225	$ 147
Tax to Buyer	-125	- 0
	$ 100	$ 147
Tax to Seller	- 38	- 85
Net to Seller	$ 62	$ 62

The tax in the right-hand column assumes that the buyer deducts payments to the seller, which is essentially what happens when one pays off a seller by allocating current partnership income to the seller.

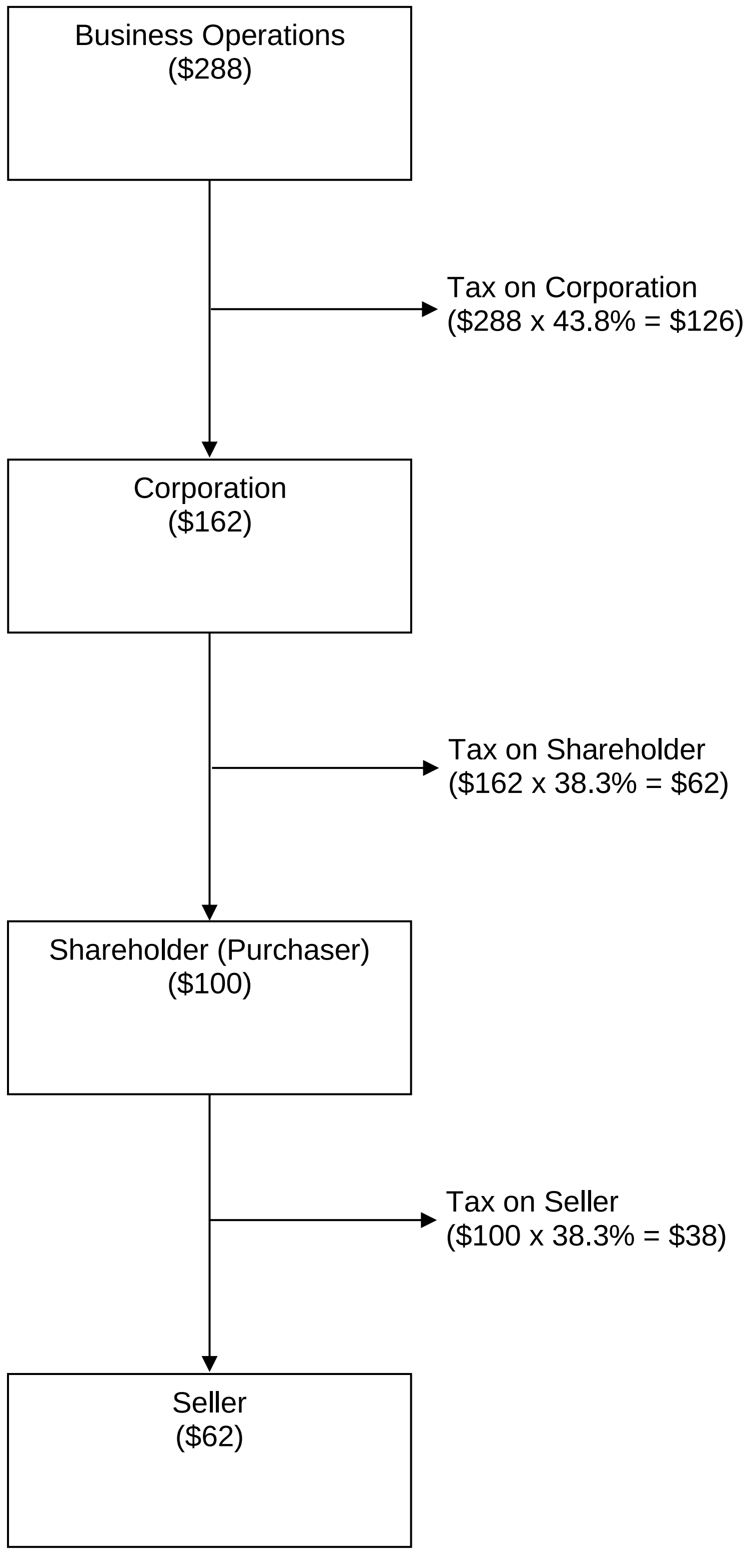
The illustrations ignore the California LLC tax of up to nearly $12K that applies to an LLC taxed as a partnership. If the partnership uses the structure recommended in part II.E Recommended Structure for Entities:

- This tax of up to nearly $12K would be imposed on each LLC subsidiary annually,
- Self-employment tax would not apply, and
- California's 1.5% entity-level tax on S corporations would apply to the general partner's 1% annual income and any profit from its management fee it excess of salaries paid to the owners.

The following pages illustrate this concept, showing that it takes a C corporation $288 in earnings to do a cross-purchase (one owner sells to another)[3017] and $225 to do either a redemption (entity buys from seller)[3018] or a cross-purchase using an exclusion that applies to the sale of certain stock,[3019] an S corporation $218 in earnings,[3020] and a partnership only $147 in earnings[3021] to get $62 to the seller.

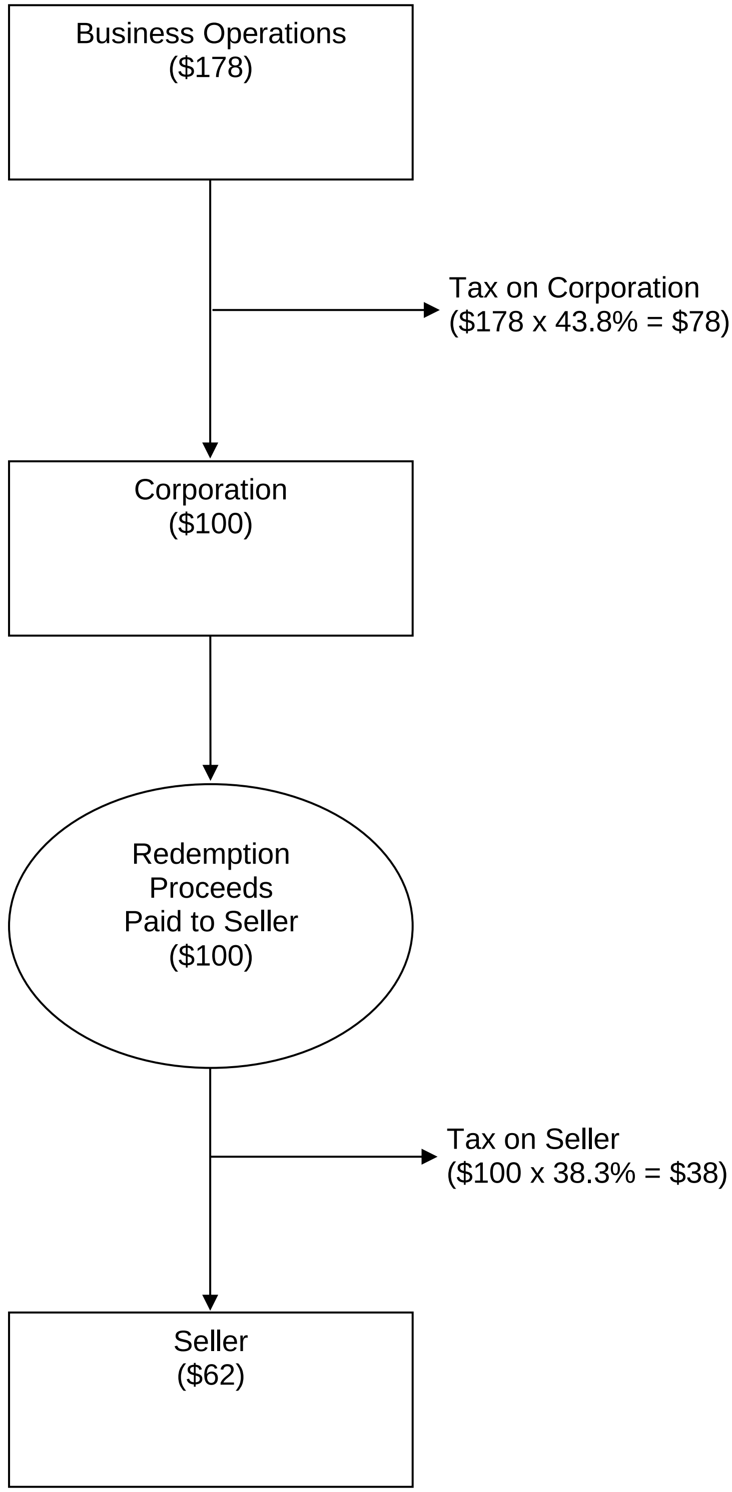
[3017] See part II.Q.1.a.ii.(a) C Corporation Triple Taxation (California).
[3018] See part II.Q.1.a.ii.(b) C Corporation Redemption (California). Redeeming the seller entirely might work if buying out one owner and increasing the other owners' interests in proportion to each other. However, if the sole owner is selling, or if the remaining owners are not increased in proportion to each other, then a cross-purchase or a stock issuance is needed to get the remaining owners' interests in the correct proportion, followed by the redemption. For approval of combining a cross-purchase with a redemption, see part II.Q.7.a.ii Hybrid Between Redemption and Cross-Purchase When Selling to New Shareholder or Other Shareholders.
[3019] See part II.Q.1.a.ii.(c) C Corporation Double Taxation Under Part II.Q.7.j Exclusion of Gain on the Sale of Certain Stock in a C Corporation (California).
[3020] See part II.Q.1.a.ii.(d) S Corporation Double Taxation (California).
[3021] See part II.Q.1.a.ii.(e) Partnership Single Taxation of Goodwill (California).

II.Q.1.a.ii.(a). C Corporation Triple Taxation (California)



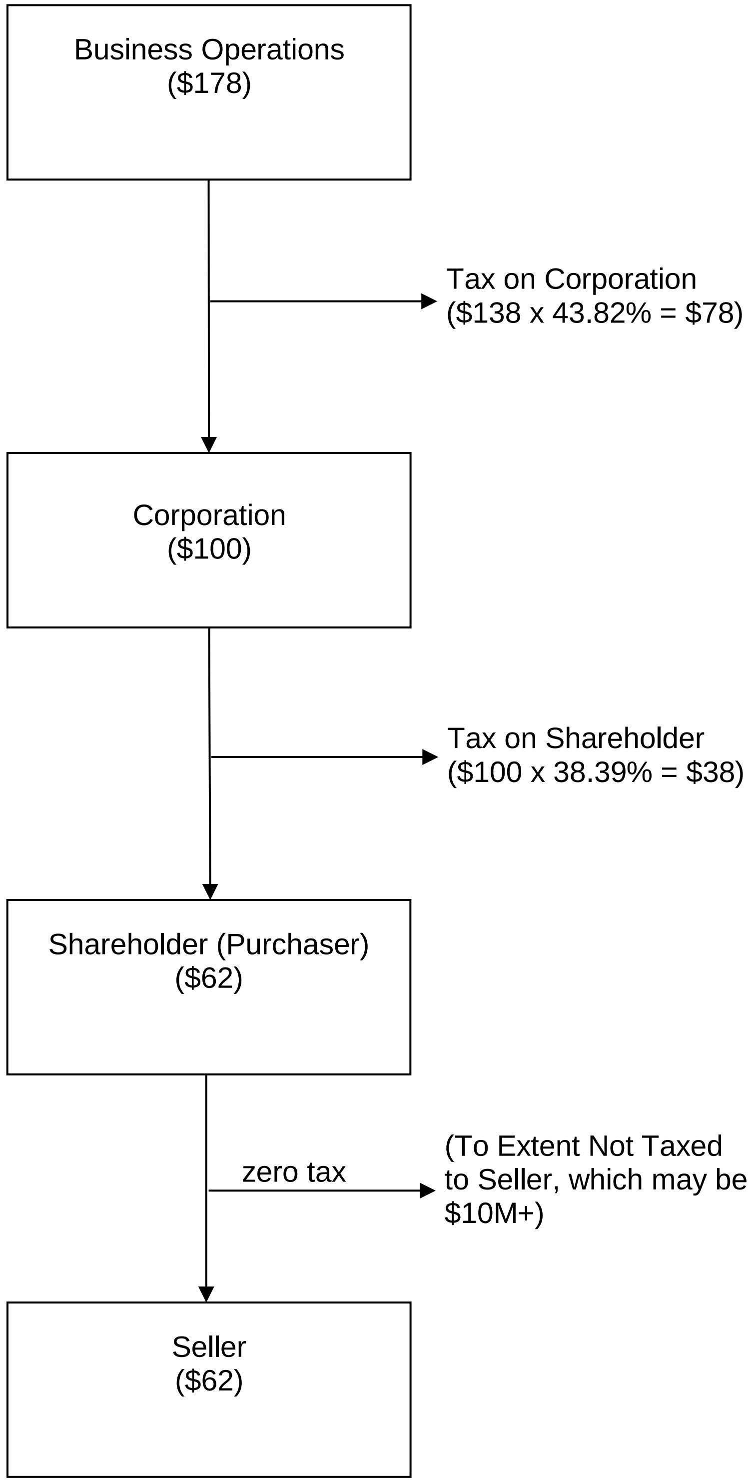
6656226

II.Q.1.a.ii.(b). C Corporation Redemption (California)

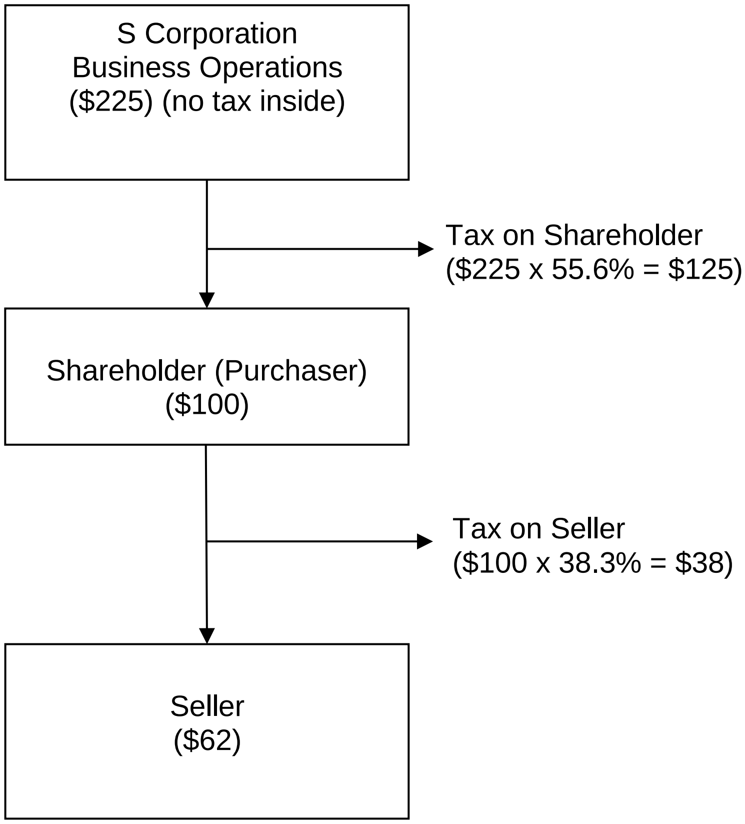


See part II.Q.7.a.ii Hybrid Between Redemption and Cross-Purchase When Selling to New Shareholder or Other Shareholders. The buyer may benefit more from buyer's future sale if buys from corporation more than two years before the seller is redeemed.

II.Q.1.a.ii.(c). C Corporation Double Taxation Under Part II.Q.7.j Exclusion of Gain on the Sale of Certain Stock in a C Corporation (California)



II.Q.1.a.ii.(d). S Corporation Double Taxation (California)



<u>Notes</u>:

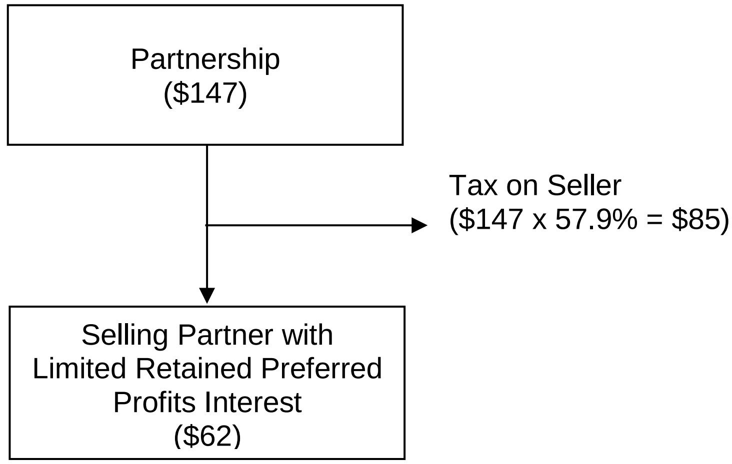
The buyers might very well have lower income tax rates than the seller, resulting in a decreased amount of earnings needed to buy out the seller. For example, a 40% income tax rate would require only $167 of earnings (40% of $167 is $67 tax).

Although an S corporation buyout might be perceived as the same as a Code § 736(b) buyout, it is not. Each year's Code § 736(b) payment creates a new goodwill asset that can amortized over 15 years. This option is not available to S corporations.

This scenario assumes corporate goodwill. Personal goodwill can be dealt with more effectively than corporate goodwill.

If and to the extent sale price is based on accumulated earnings rather than goodwill, sale price is not taxable and exclusion under part II.Q.1.a.ii.(c) is not more favorable.

II.Q.1.a.ii.(e). Partnership Single Taxation of Goodwill (California)



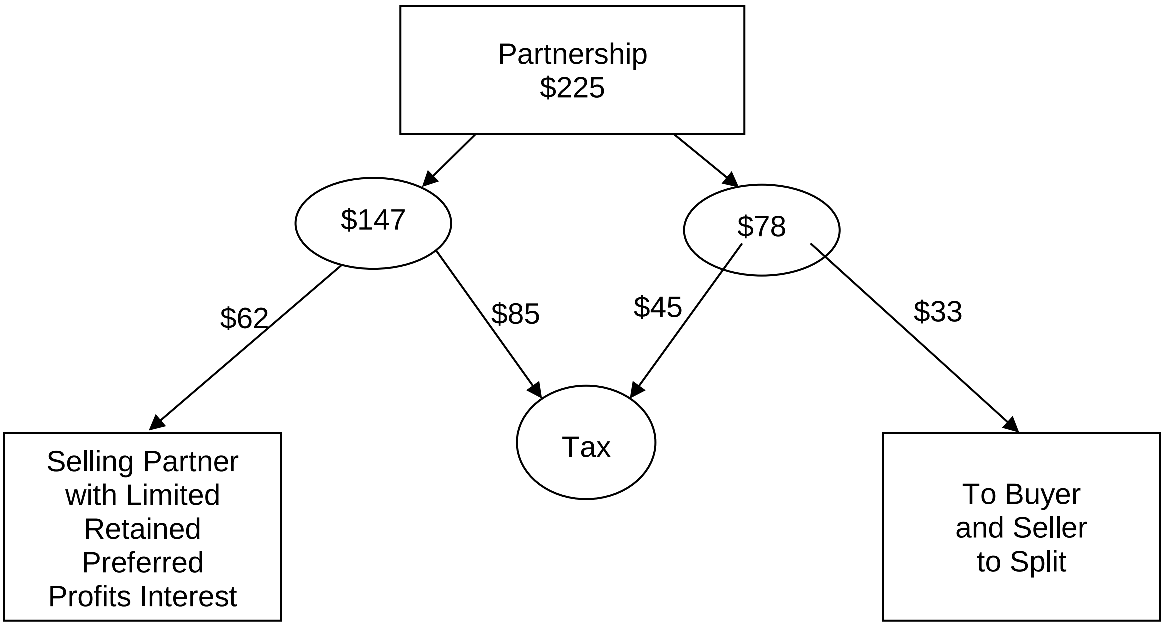
For more details on the tax and nontax benefits of this structure, see part II.Q.8.b.iii Partnership Alternative to Seller-Financed Sale of Goodwill, as well as part II.Q.8.b.ii Partnership Redemption – Complete Withdrawal Using Code § 736, which includes allowing income to be taxed to the seller under Code § 736(a).

See part II.Q.8.b.ii.(b) Flexibility in Choosing between Code § 736(a) and (b) Payments (including in fns. 3986-3988 the requirement that, to obtain Code § 736(a) treatment with respect to unrealized receivables and goodwill, a retiring partner must be a general partner and capital cannot be a material income-producing factor).

If the partnership is not a service partnership, one might need to use a preferred profits interest instead of Code § 736(a) payments. However, consider whether such a reallocation of profits might constitute a shifting of goodwill that should be reflected in capital accounts and therefore might constitute a taxable shift of a capital account.[3022]

[3022] See fn. 412 in part II.C.6 Shifting Rights to Future Profits.

II.Q.1.a.ii.(f). Partnership Use of Same Earnings as S Corporation in Sale of Goodwill (California)

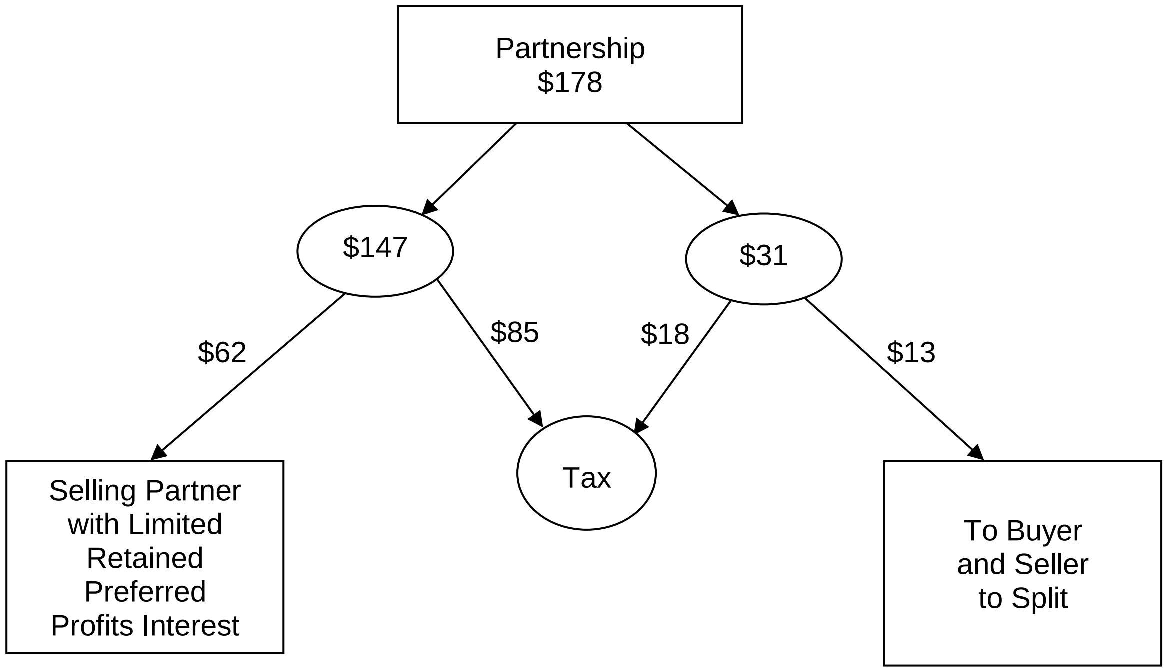


- This scenario uses the income from the scenario in part II.Q.1.a.ii.(d) S Corporation Double Taxation (California) and applies the concepts from part II.Q.1.a.ii.(e) Partnership Single Taxation of Goodwill (California). The left side of the flowchart duplicates the partnership scenario, with $147 of earnings and $85 of tax. The right side of the flowchart takes the $225 from the S corporation double taxation scenario and subtracts from it the $147 from the partnership scenario, resulting in $78 extra earnings in the partnership scenario not needed to generate $62 for the seller. However, these $78 of extra earnings are subject to $45 of income tax, so that only $33 is left, net after-tax.
- The $33 net after-tax is based on an original $100 purchase price, meaning that the partnership scenario nets 33% after-tax dollars that the parties can allocate.
- In either scenario, $225 is subjected to ordinary income tax. The S corporation ordinary income tax rate is lower because it is assumes that the buyer materially participates and is therefore not subject to the 3.8% tax on net investment income, whereas the partnership scenario assumes self-employment tax (which can be avoided if one uses the structure described in part II.E.5 Recommended Long-Term Structure for Pass-Throughs – Description and Reasons and illustrated in part II.E.6 Recommended Partnership Structure – Flowchart.

<u>Notes</u>:

- This scenario uses the income from the scenario II.Q.1.a.ii.(d) S Corporation Double Taxation (California) and applies the concepts from part II.Q.1.a.ii.(e) Partnership Single Taxation of Goodwill (California) Partnership Single Taxation of Goodwill (California). The left side of the flowchart duplicates the partnership scenario, which $147 of earnings and $85 of tax. The right side of the flowchart takes the $225 from the S corporation scenario and subtracts from it the $147 from the partnership scenario, resulting in $78 extra earnings in the partnership scenario not needed to generate $62 for the seller. However, these $78 of extra earnings are subject to $45 of income tax, so that only $33 is left, net after-tax.
- The $33 net after-tax is based on an original $100 purchase price, meaning that the partnership scenario nets 33% after-tax dollars that the parties can allocate.

II.Q.1.a.ii.(g). Partnership Use of Same Earnings as C Corporation (Either Redemption or No Tax to Seller per Part II.Q.7.j Exclusion of Gain on the Sale of Certain Stock in a C Corporation) in Sale of Goodwill (California)



<u>Notes</u>:

- This scenario uses the income from the scenario in part II.Q.1.a.ii.(b) C Corporation Redemption (California) or in part II.Q.1.a.ii.(c) C Corporation Double Taxation Under Part II.Q.7.j Exclusion of Gain on the Sale of Certain Stock in a C Corporation (California) and applies the concepts from part II.Q.1.a.ii.(e) Partnership Single Taxation of Goodwill (California). The left side of the flowchart duplicates the partnership scenario, with $147 of earnings and $85 of tax. The right side of the flowchart takes the $178 from the C corporation double tax scenario and subtracts from it the $147 from the partnership scenario, resulting in $31 extra earnings in the partnership scenario not needed to generate $62 for the seller. However, these $31 of extra earnings are subject to $18 of income tax, so that only $13 is left, net after-tax.
- The $13 net after-tax is based on an original $100 purchase price, meaning that the partnership scenario nets 13% after-tax dollars that the parties can allocate.

In either scenario, $178 is subjected to ordinary income tax.

II.Q.1.a.iii. Migrating to a Partnership Structure

For what might be an ideal partnership structure, see part II.E Recommended Structure for Entities.

Parts II.E.7 Migrating into Partnership Structure and II.E.9 Real Estate Drop Down into Preferred Limited Partnership explain how to get there.

II.Q.1.b. Leasing

Some assets used in a business might be held outside of the business and then leased to the business. The buyer continues to lease these assets from the seller. Such lease payments are deductible to the buyer and taxable to the seller, and the seller is not necessarily at risk in that the seller might be able to sell the property to a third party. If a partnership holds the business, the partnership that conducts business operations can save its owners self-employment tax by leasing property instead of owning it.[3023] Note, however, that Florida and perhaps other states impose a tax on gross rents.

If a long-term lease provides rent above the property's fair rental value, a lease termination payment is deductible as an ordinary business expense, even if the tenant buys the property;[3024] however, be prepared for a fight with the IRS and to go to District Court, because the Tax Court will require the taxpayer to capitalize the lease termination fee outside of the Sixth Circuit.[3025] On the other hand, amounts a lessee receives for the cancellation of a lease are considered as amounts received in exchange for that lease;[3026] although this exchange treatment does not affect whether the lease is a capital asset as to the lessee,[3027] it very well may be.[3028]

[3023] Real estate rental income received on a long-term basis is not subject to self-employment tax, Reg. § 1.1402(a)-4(a) (see part II.L.2.a.ii Rental Exception to SE Tax, especially fn. 2378), whereas the rent deduction would reduce self-employment income, if any, of the operating business. In early years of owning the real estate, rent deductions might not produce much saving relative to depreciation, interest expense, insurance and taxes; in later years, however, the saving might be significant. Although rental income generally is subject to the 3.8% tax on net investment income (NII), rental to a business with sufficient common ownership is not NII. See part II.I.8.c Application of 3.8% Tax to Rental Income.

[3024] *ABC Beverage Corporation v. U.S.*, 756 F.3d 438 (6th Cir. 2014) (of $9M purchase price, $6.25M allocated to lease termination expense).

[3025] *Union Carbide Foreign Sales Corp. v. Commissioner*, 115 T.C. 423 (1993) (holding that Code § 167(c)(2) compelled that result). Code § 167(c)(2) provides:

> If any property is acquired subject to a lease-
> (A) no portion of the adjusted basis shall be allocated to the leasehold interest, and
> (B) the entire adjusted basis shall be taken into account in determining the depreciation deduction (if any) with respect to the property subject to the lease.

The Sixth Circuit's opinion in fn. 3024 pointed out that the purchase extinguished the lease; because the lease did not continue after the purchase, the property was not acquired subject to the lease.

[3026] Code § 1241.

[3027] Reg. § 1.1241-1(a).

[3028] In Letter Ruling 200045019, the tenant entered into a commercial lease, then later claimed that the rent that it paid was too high because it used the property primarily for residential purposes. After stating that the local housing authority ruled in the tenant's favor, the Ruling continued:

> City's rent control law gives a tenant the right to continued possession of a property and establishes the maximum rent that may be charged. This right of possession is for an indefinite time period. The landlord may evict such a tenant only under specific circumstances as listed in the Statute.
>
> As a result of the determination that the Premises were subject to the rent control law, the landlord agreed to pay Taxpayer $s in return for Taxpayer surrendering all lease and statutory rights to the Premises. This agreed sum represents $m plus $n to cover estimated taxes. The estimated tax amount was determined under the assumption that

> Taxpayer's gains from the transaction would be treated as capital gains. Further, the landlord agreed to pay an additional amount, up to $u, plus interest and penalties, if the Internal Revenue Service determines that the gain is ordinary. Finally, the landlord agreed to pay $v to a law firm to cover Taxpayer's legal fees.

In finding that the lease termination payment was capital gain, the Ruling reasoned:

> We note that section 1231, rather than section 1221, may apply to the instant case because the facts indicate that Taxpayer's leasehold may have been used in part, or for a portion of the lease period, for the conduct of Taxpayer's business. Business use of real property precludes that property from receiving capital asset treatment under section 1221(2). However, we do not need to determine whether the leasehold is excluded under section 1221(2) because it will either be a section 1221 capital asset or a section 1231 asset. In either case, the gain recognized on the exchange of the leasehold will be capital, rather than ordinary.
>
> In Rev. Rul. 72-85, 1972-1 C.B. 234, the Service determined that a leasehold of land used in a trade or business is section 1231 property, even if it is of indefinite duration. This revenue ruling clarified Rev. Rul. 56-531, 1956-2 C.B. 983, which holds, in part, that the Service acquiesces in *McCue Bros. & Drummond, Inc. v. Commissioner*, 19 T.C. 667 (1953), *acq.* 1956-2 C.B. 7, *aff'd*, 210 F.2d 752 (2d Cir. 1954), *cert. denied*, 348 U.S. 829 (1954).
>
> The petitioner in *McCue Bros.* leased a hat shop in New York City. For a portion of his occupancy, the petitioner held the property under a written lease. However, after the lease expired, the petitioner continued to occupy the property under a "statutory tenancy" by virtue of the New York rent control laws that had taken effect shortly before the end of the written lease. In affirming the Tax Court in *McCue Bros.*, the Second Circuit stated that it was immaterial whether the petitioner held the property under a lease or through the rent control laws. The court stated, "we think the right of possession under a lease or otherwise, is a ...substantial property right which does not lose its existence when transferred. If it is sold by the tenant to a third person, the gain derived therefrom is a capital gain." 210 F.2d at 753. The court further stated that the holding period began when the statutory right of possession attached. *Id.* at 754.
>
> In *Stotis v. Commissioner*, T.C. Memo. 1996-431, the Tax Court came to a similar result in the case of a residential leasehold. Mr. Stotis, the petitioner, leased space in an apartment building that he used as a residence. The landlord, desiring to use the real estate for other purposes, entered into a surrender agreement with the petitioner whereby the petitioner exchanged his right in the property for a cash payment. The Tax Court held that the petitioner's leasehold interest in a residence was a capital asset, and that the petitioner's sale of the leasehold interest constituted a sale or exchange, taxable as capital gain.
>
> The facts of this case are not clear as to whether the property in question is properly treated as real property used in the trade or business for purposes of sections 1221 and 1231. If it is not real property used in the trade or business, the leasehold interest is a capital asset under section 1221. If it is real property used in the trade or business, any gain attributable to the sale or exchange of the leasehold interest is treated as long-term capital gain under section 1231. Taxpayer's holding period began with the vesting of the statutory right of occupancy on c. Therefore, Taxpayer held the property for more than one year. Additionally, under Rev. Rul. 72-85, the fact that Taxpayer's leasehold interest under the rent control laws was for an indefinite period does not preclude section 1231 long-term capital gain treatment.
>
> Under section 1241, amounts received by a lessee for the cancellation of a lease, or by a distributor of goods for the cancellation of a distributor's agreement (if the distributor has a substantial capital investment in the distributorship), are considered as amounts received in exchange for such lease or agreement.
>
> Based on the foregoing, we conclude that the amounts received by Taxpayer are considered amounts received in exchange for Taxpayer's leasehold interest in the

Generally, real property should not be held in the entity that conducts the business. As discussed above, for self-employment tax purposes it should not be owned by a partnership that has business operations. Because appreciated real estate cannot be distributed from a corporation without triggering either premature (in the case of an S corporation) or double (in the case of a C corporation) taxation under Code § 311,[3029] usually real estate should not be held in a corporation (see footnote 302 for some of the issues, including basis step-up issues, involved in whether real estate should be in a corporation).

II.Q.1.c. Personal Goodwill and Covenants Not to Compete

II.Q.1.c.i. Taxation When a Business Sells Goodwill; Contrast with Nonqualified Deferred Compensation

If the business entity does not require its key employees to agree not to compete, the key employees might leave and take their contacts with them. Thus, in such situations the key employees really "own" the business' goodwill. When the business is sold, the buyer would buy goodwill from the person who owns the goodwill, pay key employees not to compete, pay the key employees to work in the business, or a combination of any of these.

When self-created goodwill is sold, generally the seller receives favorable capital gain treatment and the buyer deducts over 15 years the sum of the payments.[3030] (Also

---

> Premises. Further, we conclude that Taxpayer realized long-term capital gain on the sale of the leasehold interest. Taxpayer's interest in the Premises is either a capital asset under section 1221 or real property used in the trade or business under section 1231. In either event, gain realized from the sale of the leasehold interest is treated as long-term capital gain. Payments of the legal fees and income taxes are part of the purchase price to the extent that such payments are given in exchange for Taxpayer's leasehold interest and not for Taxpayer abandoning some other legal right or property not related to the transaction in question.

Note, however, that, gain from the sale of a Code § 1231 asset may be different than gain from the sale of a capital asset. If the taxpayer had Code § 1231 losses in a prior year, those losses may have converted the gain to ordinary income. See part II.G.5.a Code § 1231 Property, especially fns. 967-968.

[3029] Code § 311 provides that, when a corporation distributes property, the distribution constitutes a sale or exchange by the corporation. See part II.Q.7.h.iii Taxation of Corporation When It Distributes Property to Shareholders. Together with the rules governing income taxation of shareholders:

- For an S corporation, generally this means that the shareholders are taxed on the exchange (with favorable capital gain rates often available), receive an increased tax basis in their stock equal to the gain reported, reduce the basis of their stock to the extent of the value of the property that was distributed, and adjust to fair market value the basis of the property that was distributed.
- For a C corporation, generally this means that the corporation pays income tax (with favorable capital gain rates not available) and the shareholders are taxed on the distribution as a dividend, thus generating two layers of tax. However, as with an S corporation, the distributed property's basis is adjusted to fair market value.

[3030] *Horton v. Commissioner*, 13 T.C. 143 (1949) (income from the sale of goodwill is capital gain, whereas income from a noncompete agreement is ordinary income); Code § 197(a), (d)(1)(A) (deduction for amortizing goodwill). Although Reg. § 1.197-2(d)(2) disallows amortization goodwill that is not being amortized and is held by a partnership would be eligible for a basis step if a Code § 754 election is in place.[3031]) However, ordinary income treatment to apply on the sale to a related party,[3032] which applies whether or not the goodwill was being amortized.[3033] Furthermore, the amortization of goodwill causes it to lose its status as a capital asset, which in some circumstances can cause part or all of the gain on sale to lose capital treatment.[3034]

---

deductions for self-created goodwill, it allows amortization when the taxpayer buys the goodwill (including from someone who bought it from the taxpayer). *Fitch v. Commissioner*, T.C. Memo. 2012-358 rebuffed an IRS attack on repurchased goodwill using a very simple contract. But for Code § 197, goodwill is not amortizable. Reg. § 1.167(a)-3(a).

[3031] See part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000, fn. 4155. For an example of the effect of a Code § 754 election on goodwill that is being amortized, see fn. 4310 in part II.Q.8.e.iv Transfer of Partnership Interests Resulting in Deemed Termination: Effect on Partnership.

[3032] See part II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill).

[3033] See text accompanying fn. 3678.

[3034] Letter Ruling 200243002 ruled that the sale of goodwill that has not been amortized is taxed as a capital gain, but goodwill that is being amortized is not a capital asset and therefore was subject to tax at ordinary income rates. However, amortizable goodwill may be eligible for capital gain treatment as described in part II.G.5 Gain or Loss on the Sale or Exchange of Property Used in a Trade or Business, especially fn. 962. Because capital gain treatment in that situation arises solely by reason of Code § 1231, any Code § 1231 gain is taxed as ordinary income if and to the extent the taxpayer has unrecaptured Code § 1231 losses. Code § 1231 losses are ordinary losses generated by the sale of Code § 1231 property (property used in a trade or business).
Elaborating on the above, Letter Ruling 200243002 reasoned:

> It is well settled that prior to enactment of § 197, goodwill and going concern value were considered to be intangible and nonamortizable capital assets within the meaning of § 1221, by both the Service and the courts. Rev. Rul. 65-180, 1965-2 C.B. 279; Rev. Rul. 55-79, 1955-1 C.B. 370; *UFE, Inc. v. Commissioner*, 92 T.C. 1314, 1323 (1989) ("[g]oing-concern value is an intangible, nonamortizable capital asset that is often considered to be part of goodwill"); *Patterson v. Commissioner*, 810 F.2d 562, 569 (6th Cir. 1987) (stating that "any amount paid for goodwill, since it does not waste, becomes a nonamortizable capital asset," and "amounts received by a seller for the goodwill or going concern value of the business are taxed at the more favorable capital gains rates"); *Better Beverages, Inc. v. United States*, 619 F.2d 424, 425 n. 2 (5th Cir. 1980) ("goodwill is a capital asset"); *Dixie Finance Co. v. United States*, 474 F.2d 501, 506 n. 5 (5th Cir. 1973) (goodwill is a capital asset and amounts received therefor in excess of the seller's basis are treated as capital gains, but represent a nonamortizable capital investment resulting in no corresponding deduction for the purchaser); *Commissioner v. Killian*, 314 F.2d 852, 855 (5th Cir. 1963) ("[i]t is settled that goodwill, as a distinct property right, is a capital asset under the tax laws "); *Michaels v. Commissioner*, 12 T.C. 17 (1949) ("[w]e entertain no doubt that goodwill and such related items as customers' lists are capital assets").
>
> Prior to enactment of § 197, goodwill and going concern value were not considered property used in the trade or business of a character which is subject to the allowance for depreciation provided in § 167, and thus were not excluded from the definition of capital asset by reason of § 1221(a)(2) of the Code. Under § 197, an amortizable section 197 intangible is treated as property of a character which is subject to the allowance for depreciation under § 167. Thus, goodwill and going concern value which are amortizable section 197 intangibles are not capital assets for purposes of § 1221, but if used in a

Also, the sale and subsequent amortization of goodwill turns it into a "hot" asset, reducing opportunities for deferral on its sale.[3035] Whether or not goodwill is being amortized, a controlled corporation's sale or distribution of goodwill might generate ordinary income,[3036] as would a sale involving a partnership.[3037]

When a covenant not to compete is involved, generally the seller receives ordinary income treatment and the buyer deducts the present value of the payments over 15 years.[3038]

Thus, compensation for current services, which is deductible in full when paid, is much more beneficial to buyers than either of the above alternatives. Taxpayers tend to assign consideration in a sale to whatever produces the fastest deduction – ongoing services, office equipment, etc. Note that assigning a low value to goodwill or a non-

---

trade or business and held for more than one year, gain or loss upon their disposition generally qualifies as § 1231 gain or loss. Taxpayer has questioned whether enactment of § 197 has changed the treatment of goodwill and going concern value as capital assets for goodwill and going concern value that do not qualify as amortizable section 197 intangibles.

In this case, Taxpayer represents that at the time of each sale of the c, the Goodwill is either self-created Goodwill of the selling entity (or a subsidiary of the selling entity acquired by the selling entity in a stock transaction) or Goodwill acquired by the selling entity (or a subsidiary of the selling entity acquired by the selling entity in a stock transaction) from third parties prior to August 11, 1993. While it is possible that a selling entity acquired the Goodwill after July 25, 1991, and prior to August 11, 1993, Taxpayer also represents that no retroactive election was made under § 1.197-1T. These representations are material representations. Based solely on Taxpayer's representations with respect to the Goodwill, we conclude that the Goodwill is not an amortizable section 197 intangible, and furthermore is not subject to depreciation under § 167. Thus, the Goodwill is not property that is of a character subject to the allowance for depreciation provided in § 167.

Because we conclude the Goodwill is not an amortizable section 197 intangible and is not property that is of a character subject to the allowance for depreciation provided in § 167, we further conclude that the Goodwill sold by Taxpayer qualifies as a capital asset under § 1221. Although § 197 now provides that goodwill and going concern value that is an amortizable section 197 intangible are not capital assets for purposes of § 1221, it does not address the treatment of goodwill and going concern value that is not an amortizable section 197 intangible, nor does it change prior law treatment of goodwill and going concern value.

[3036] See part II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill), especially fns. 3675-3679.

[3037] See part II.Q.8.c Related Party Sales of Non-Capital Assets By or To Partnerships.

[3038] Code § 197(a), (d)(1)(E), (f)(3) (buyer's deduction); Rev. Rul. 69-643 (seller's income); *Kinney v. Commissioner*, 58 T.C. 1038 (1972). *Recovery Group Inc. v. Commissioner*, T.C. Memo. 2010-76, held that payments under a one-year covenant not to compete agreed to in connection with the redemption of an employee's stock were deductible over 15 years. The IRS and taxpayer contested the meaning of entered into in connection with an acquisition (directly or indirectly) of an interest in a trade or business or substantial portion thereof. The court agreed with the IRS that 'thereof' modifies 'trade or business', and that 'interest' means an ownership interest of any percentage, large or small. The court held alternatively that the employee's 23% stock ownership was substantial.

compete agreement can have very practical effect – reducing or eliminating damages[3039] – if the agreement is broken, so the buyer is trading deductions for economic risk.

Even if goodwill is taxed to the seller at capital gain rates, deferred compensation[3040] is more tax-efficient than a payment for goodwill; however, the deferred compensation agreement constitutes a liability on the company's balance sheet that might impair its ability to obtain credit. The benefit of the immediate deduction for compensation for personal services is likely to be of so much benefit to the buyer that the buyer should be willing to pay extra to the seller so that the seller's proceeds after ordinary income tax exceed what the seller would have received for goodwill net of capital gain tax. For example, suppose the seller receives $100 for zero basis goodwill. If the seller's combined federal and state capital gain rate is 20%, the seller receives $80 net of tax. If the buyer pays 40% federal and state tax, the buyer must generate $167 of ordinary income to pay the $100 that it pays the seller. Thus, the buyer needs to earn $167 so that the seller receives $80 net of tax. However, if the buyer and seller both have 40% combined federal and state income taxes, then the seller would need just over $133 in ordinary income to net the same $80 after taxes. Thus, with a compensation payment of $134-$166, both the seller and buyer are better off (ignoring the deduction[3041] the buyer receives for capitalized goodwill in a purchase-of-goodwill scenario). A seller needs "strong proof" that a payment is for goodwill taxable as capital gain rather than a covenant not to compete taxable as ordinary income.[3042]

II.Q.1.c.ii. Consulting Agreement in Lieu of Covenant Not to Compete

Given that payments to the person selling goodwill are presumed ordinary income[3043] and that they are amortizable over 15 years if for goodwill or covenants not to compete,[3044] consider retaining the seller on a consulting agreement. The buyer might very well need the seller's cooperation to transitions employees, customers, and vendors. If the purchase is amicable, hiring the seller to a lucrative consulting contract can provide not only valuable business benefits but also immediate income tax deductions.

Beware, however, that a consulting contract might very well prevent the seller from having a separation from service that might be needed under Code § 409A. Although that provision is generally viewed as applying to deferred compensation, various

[3039] A result reported to have happened in *Healthcase v. Orr*, 2016 Cal. App. Unpub. LEXIS 440 (1/20/2016) per *Business Valuation Update*, vol. 22, no. 4 (4/2016).
[3040] Before working in this area, consider reading part II.Q.1.d Nonqualified Deferred Compensation, especially part II.Q.1.d.i IRS Audit Guide for Nonqualified Deferred Compensation..
[3041] Although the deduction is valuable, the discounted present value is relatively small, considering that discount rates are high when the sale of a closely-held business is involved. For example, if $100 were capitalized and deducted over 15 years with a 40% tax saving, the extra tax benefit would be $2.67 per year, compared with an immediate tax saving of $20 in not having capital gain on the sale of goodwill. At a 20% discount rate, the present value of these deductions would be $12.48; at a 33% discount rate, the present value would be $7.98.

[3043] See fn. 3042.
[3044] See part II.Q.1.c.i Taxation When a Business Sells Goodwill; Contrast with Nonqualified Deferred Compensation.

payments or noncash benefits triggered by a change in job status might constitute deferred compensation that might require a "separation from service" to avoid imposition of the harsh consequences of Code § 409A.[3045]

II.Q.1.c.iii. Does Goodwill Belong to the Business or to Its Owners or Employees?

For purposes of valuing a business:[3046]

> In the final analysis, goodwill is based upon earning capacity. The presence of goodwill and its value, therefore, rests upon the excess of net earnings over and above a fair return on the net tangible assets. While the element of goodwill may be based primarily on earnings, such factors as the prestige and renown of the business, the ownership of a trade or brand name, and a record of successful operation over a prolonged period in a particular locality, also may furnish support for the inclusion of intangible value. In some instances it may not be possible to make a separate appraisal of the tangible and intangible assets of the business. The enterprise has a value as an entity. Whatever intangible value there is, which is supportable by the facts, may be measured by the amount by which the appraised value of the tangible assets exceeds the net book value of such assets.

"Goodwill is often defined as the expectation of continued patronage by existing customers."[3047] Generally, if a business subjects its owners or employees to a covenant not to compete, the business owns the related goodwill; otherwise, generally the owners or employees own the goodwill.[3048] Personal goodwill reflects the owners' relationships

[3048] Shin, Lightened Taxpayer Burdens in the Sale of Personal Goodwill After *H&M, Inc. v. Commissioner*, *Tax Lawyer*, Vol. 67, No. 2 (Winter 2014), saved as Thompson Coburn LLP doc. no. 6177834; *Martin Ice Cream Co. v. Commissioner*, 110 T.C. 189 (1998); *Norwalk v. Commissioner*, T.C. Memo. 1998-279; *Bross Trucking, Inc.. v. Commissioner*, T.C. Memo. 2014-107 (lack of non-compete precluded corporate goodwill regarding owner-officer's relationships; owner's sons developed relationships with owner's customers when owner shut down owner's business due to regulatory hassles and sons started new corporation; workforce intangible not deemed transferred when only 50% of the employees of the old corporation worked for the new corporation); *Estate of Adell v. Commissioner*, T.C. Memo. 2014-155 (lack of non-compete precluded corporate goodwill regarding owner-officer's relationships; customers did business with owner's son because they trusted the son personally; son was qualified to run the business). Conversely, goodwill generated while a covenant not to compete is in place is owned by the business entity, even though it was generated by the professional who was the sole owner of a personal service corporation. *Howard v. U.S.*, 106 A.F.T.R.2d 2010-5533 (E.D. Wash. 2010), *aff'd* 108 AFTR.2d 2011-5993 (9th Cir. 2011); *Kennedy v. Commissioner*, T.C. Memo. 2010-206 (payments were consideration for services rather than goodwill; payments varied based on success of seller's efforts to transition customers to buyer; part of payments were for non-compete; taxpayer failed to prove economics of allocation, the court finding that goodwill was a tax-motivated afterthought that occurred late in the negotiations) (distinguished from *Martin Ice Cream*) (self-employment tax imposed; reliance on tax advisor avoided negligence penalty); *H &*

with customers; to prove that these relationships had value, the purchasing business should hire the sellers and not just sign a covenant not to compete with them.[3049] Sometimes a variety of factors reduce a company's goodwill, and having the next generation start a new company without so much baggage creates a viable company without making a gift of goodwill.[3050]

If the business is inside an entity taxed as a C or an S corporation, paying for the business' going concern value (of which goodwill tends to be a very significant part) results in short-term double or triple taxation.[3051] If the entity has only one owner, one can set the stage for a more tax-advantaged exit strategy by ***not*** subjecting the owner to a covenant not to compete. For a multiple-owner entity, the business reasons might trump the tax issues, so one might more strongly consider migrating to the ideal business structure[3052] so that one can put these protections in place as soon as possible without complicated issues. The problem with migrating from a corporation to a pass-through entity is that the IRS will argue that goodwill is being distributed from the corporation to the owners and then into the new entity, and a distribution from a corporation to its owners is a taxable event.[3053] If the owners of the new entity are different from but are the natural objects of the bounty of the owners of the original entity, the IRS might also argue that the deemed distribution and transfer constitute a gift.[3054]

M, Inc. v. Commissioner, T.C. Memo. 2012-290 (insurance agent's name and talents were more highly valued than his incorporated insurance agency's name, so compensation payments to agent were not disguised payments to his agency followed by dividends to him; characterization as goodwill or compensation was not raised). See Kliegman and Turkenich, Goodwill Games: Determining the Existence And Ownership of Goodwill In a Closely Held Business, *T.M. Memorandum* (BNA) (9/22/2014).

For more details on sending business as a gift, see fn., part III.B.1.a.v Sending Business.

[3049] *Solomon v. Commissioner*, T.C. Memo. 2008-102, held:

> The *Martin Ice Cream* case is distinguishable from this case. First, the record does not persuade us, nor do we find as a fact, that the value of Solomon Colors in the market was attributable to the quality of service and customer relationships developed by Robert Solomon or Richard Solomon. Rather, the record reflects our finding that Solomon Colors, as a business of processing, manufacturing, and sale, rather than one of personal services, did not depend entirely on the goodwill of its employees for its success. See *Schilbach v. Commissioner*, T.C. Memo. 1991-556; *cf. Longo v. Commissioner*, T.C. Memo. 1968-217. Second, unlike the founder of Haagen-Dazs in *Martin Ice Cream*, who signed an agreement with Strassberg in his personal capacity, Robert Solomon and Richard Solomon were not named as the sellers of any asset but were included in the sale in their individual capacities solely to guarantee that they would not compete with Prince. Third, the fact that Prince required noncompete agreements, but not employment or consulting agreements, of Robert Solomon and Richard Solomon makes it unlikely that Prince was purchasing the personal goodwill of these individuals.

[3050] See part II.Q.7.h.v Taxpayer Win in *Bross Trucking* When IRS Asserted Corporation Distribution of Goodwill to Shareholder Followed by Gift to Shareholder of New Corporation (2014).

[3051] See part II.Q.1.a Contrasting Ordinary Income and Capital Scenarios on Value in Excess of Basis.

[3052] See parts II.E Recommended Structure for Entities, II.Q.7.h Distributing Assets; Drop-Down into Partnership and II.Q.8.b.iii Partnership Alternative to Seller-Financed Sale of Goodwill.

[3053] See part II.Q.7.h.iii Taxation of Corporation When It Distributes Property to Shareholders.

[3054] See part III.B.1.a.v Sending Business. Taxpayers won, but it cost them significant legal fees.

A sole proprietorship or partnership does not face these concerns. A sole proprietorship can convert into a partnership tax free by granting the new owner a profits interest in the partnership.[3055] The partnership can then engage in a redemption that obtains the most income tax-efficient result. Thus, a sole proprietorship or partnership is free to enter into covenants not to compete without complicating income tax exit strategies.

II.Q.1.c.iv. Goodwill Anti-Churning Rules

Generally, an anti-churning rule provides that goodwill and going concern value are not amortizable if:[3056]

1. The intangible was held or used at any time on or after July 25, 1991, and on or before such date of enactment by the taxpayer or a related person,

2. The intangible was acquired from a person who held such intangible at any time on or after July 25, 1991, and on or before such date of enactment, and, as part of the transaction, the user of such intangible does not change, or

3. The taxpayer grants the right to use such intangible to a person (or a person related to such person) who held or used such intangible at any time on or after July 25, 1991, and on or before such date of enactment.

For purposes of these rules, a person is "related" to any person only if the related person bears a relationship to such person specified in Code § 267(b) or 707(b)(1), or the related person and such person are engaged in trades or businesses under common control.[3057] In applying Code § 267(b) or 707(b)(1) to this test, use 20% instead of 50%.[3058] A person shall be treated as related to another person if such relationship exists immediately before or immediately after the acquisition of the intangible involved.[3059]

However, if the ant-churning rule applies only because the related party's ownership is more than 20% instead of more than 50%, then this rule is subject to an exception.[3060] To qualify for the exception, the person from whom the taxpayer acquired the intangible must elect to recognize gain on the disposition of the intangible and to pay a tax on such gain which, when added to any other income tax on such gain under this title, equals such gain multiplied by the highest income tax rate applicable to such person.[3061] If this exception applies, then the goodwill or concern value is prevented from being amortized

[3055] See part II.M.4.f Issuing a Profits Interest to an Employee. The new owner can also contribute capital to the new business, which generally is tax-free (see part II.M.3 Buying into or Forming a Partnership), but be wary of part II.M.3.e Exception: Disguised Sale.
[3056] Code § 197(f)(9)(A).
[3057] Code § 197(f)(9)(C)(i). The common control test used is that provided in Code § 41(f)(1)(A) and (B).
[3058] Code § 197(f)(9)(C)(i).
[3059] Code § 197(f)(9)(C)(ii).
[3060] Code § 197(f)(9)(B)(i).
[3061] Code § 197(f)(9)(B)(ii).

only to the extent that the taxpayer's adjusted basis in the intangible exceeds the gain recognized.[3062]

Also, the anti-churning rule does not apply to the acquisition of any property by the taxpayer if the basis of the property in the taxpayer's hands is determined under Code § 1014(a) (basis adjustment by reason of death).[3063]

Reorganizing a tiered structure using nontaxable contributions under Code § 721[3064] and nontaxable distributions under Code § 731[3065] may avoid triggering the anti-churning rules.[3066]

With respect to any increase in the basis of partnership property under Code § 732, 734, or 743, determinations under the anti-churning rules are made at the partner level, and each partner shall be treated as having owned and used such partner's proportionate share of the partnership assets.[3067]

Code § 197 also does not permit amortization of any intangible acquired in a transaction, one of the principal purposes of which is to avoid the anti-churning rules.[3068]

II.Q.1.d. Nonqualified Deferred Compensation

For draconian measures that can apply to compensation paid in a year different from the year is which it was earned (as well as detrimental balance sheet effects), see part II.M.4.d Introduction to Code § 409A Nonqualified Deferred Compensation Rules.

II.Q.1.d.i. IRS Audit Guide for Nonqualified Deferred Compensation and Other Noncash Compensation (other than fringe benefits)

In "Nonqualified Deferred Compensation Audit Techniques Guide (June 2015)," the IRS explained its view on deferred compensation and similar tools and described audit techniques.[3069]

3062 Code § 197(f)(9)(B).
3063 Code § 197(f)(9)(D).
3064 See part II.M.3 Buying into or Forming a Partnership, especially part II.M.3.a General Rule: No Gain on Contribution to Partnership.
3065 See part II.Q.8.b.i Distribution of Property by a Partnership, especially part II.Q.8.b.i.(a) Code § 731: General Rule for Distributions.
3066 Letter Ruling 201709003.
3067 Code § 197(f)(9)(E). For details, see Reg. § 1.197-2(h)(12); see also fn. 2766, found in part II.P.1.a.i Allocations of Income in Partnerships. For an example of the effect of a Code § 754 election on goodwill that is being amortized, see fn. 4310 in part II.Q.8.e.iv Transfer of Partnership Interests Resulting in Deemed Termination: Effect on Partnership.
3068 Code § 197(f)(9)(E). This provision also prevents amortization of any asset acquired in a transaction that was postponed to avoid the requirement that the intangible be acquired after the date of the enactment of Code § 197.

II.Q.1.d.ii. Using Nonqualified Deferred Compensation to Facilitate a Sale

II.Q.1.d.ii.(a). Income Tax Issues when Using Nonqualified Deferred Compensation to Facilitate a Sale

A common tactic had been to pay the seller compensation for past services rendered. The theory was that, during its formative years, the business did not have the financial ability to compensate the owner for all that the owner did to develop the business into the successful operation it is today. When the business would be sold, finally the business would have sufficient resources to express its gratitude for the owner's past services. The business might pay the owner all at once; or, it might pay this bonus over time to provide the owner with a nice stream of retirement income. This compensation could be paid by the buyer or the seller. If the buyer makes the payments, it deducts them as it makes them and reduces the purchase price to take into account the present value of the payments. If the seller makes the payments, the seller would want to deduct the payments against the sale proceeds or against the interest or income equity component of any deferred sale proceeds.[3070]

Under 2017 tax reform, the service recipient may have a lower rate as a C corporation or as a pass-though entity than the service provider. See part II.E.1 Comparing Taxes on Annual Operations of C Corporations and Pass-Through Entities. This has always been a problem when the compensation paid exceeds ordinary taxable income, but now it may apply regarding most or all of the deferred compensation payments.

Also, under Code § 409A, one is required to have a written plan in place as soon as a legally binding right to nonqualified deferred compensation exists.[3071] Thus, if at the time of sale compensating the owner for past services is reasonable and necessary,[3072] and the entity can show that a legally binding right to compensation for past services did not exist until that time, then the strategy described in the preceding paragraph may be

[3070] The seller would not want to liquidate the entity that owned the business until after these payments are made. Otherwise, the payments would constitute an additional capital loss or reduction of capital gain rather than a deduction against ordinary income. *Arrowsmith, Exec. v. Commissioner*, 344 U.S. 6 (1952).

[3071] A plan is any arrangement or agreement providing for a deferral of compensation. Code § 409A(d)(1), (3). If the payment is reasonable because it relates to past services, then it constitutes deferred compensation, and its material terms must be documented in writing to satisfy Code § 409A. Reg. § 1.409A-1(c)(3)(i). The written plan must be in place when the service provider obtains a legally binding right to the compensations. Reg. § 1.409A-1(a)(1). One might argue that compensation was earned in a prior year, but there was no legally binding right to payments based on that service, and now it is necessary and reasonable to pay for those past services to retain the employee. *Aries Communications Inc. v. Commissioner*, T.C. Memo. 2013-97 (comparing actual amounts paid in prior years against what was shown to have been higher reasonable compensation for those years), following the factors in *Elliotts* in fn. 28 as well the independent investor test of *Metro Leasing & Dev. Corp. v. Commissioner*, 376 F.3d 1015, 1019 (9th Cir. 2004), *aff'g* 119 T.C. 8 (2002). Although the author would make such an argument regarding past services on audit, the author would prefer to have more certainty when planning in light of Code § 409A's expansive reach. See part II.M.4.d Introduction to Code § 409A Nonqualified Deferred Compensation Rules.

[3072] See part II.A.1.b.i Compensating Individuals, especially fn. 28.

used. Absent a prior written plan, however, convincing a court that the owner was undercompensated might be very difficult.[3073]

A more conservative approach would be to have a plan in place when the business is doing well but is not yet sold, which plan vests over time. That strategy is described later.[3074] Alternatively, consider paying an immediate lump sum if a plan is not already in place and the payor has enough income to absorb the deduction.[3075] An immediate lump sum payment often is very unattractive to the buyer (who has cash flow issues and might not need that much deduction in a single year) or seller (who might rather receive payments over time to avoid accelerating income tax if adequate safeguards are in place to protect the payment).

Deferred compensation in an S corporation will not raise second-class of stock issues unless a principal purpose of the agreement is to circumvent the single class of stock rules.[3076]

II.Q.1.d.ii.(b). Balance Sheet Effects of Deferred Compensation

Before establishing a deferred compensation agreement, ask the company's outside CPA to determine what the balance sheet effect is going to be.

Then have the client take that information to the company's lenders to discuss the impact on balance sheet loan covenants. Same with any companies that provide construction bonds, etc., if the company is in such a line of business.

[3073] *PK Ventures, Inc. v. Commissioner*, T.C. Memo. 2006-36, *aff'd sub nom. Rose v. Commissioner*, 101 A.F.T.R.2d 2008-1888 (11th Cir. 2008), disallowed deductions for such deferred compensation beyond what the IRS conceded. *Thousand Oaks Residential Care Home I, Inc. v. Commissioner*, T.C. Memo. 2013-10, found credible testimony that compensation was intended as catchup compensation – payment of back salaries that were not paid in prior years due to insufficient cash flow. However, the court applied the independent investor test (see fn. 28) to determine that the catch-up compensation was unreasonably high.

[3074] See part III.B.7.c.vi Deferred Compensation.

[3075] A special exception to Code § 409A applies to payments that occur immediately after the payment becomes vested if the taxpayer can prove that the payment was contingent on continuing to provide services from the date the service had been performed until the date that occurred during the current year. Reg. § 1.409A-1(b)(4)(i). The preamble to the final regulations, T.D. 9321, rejected cross-referencing existing rules:

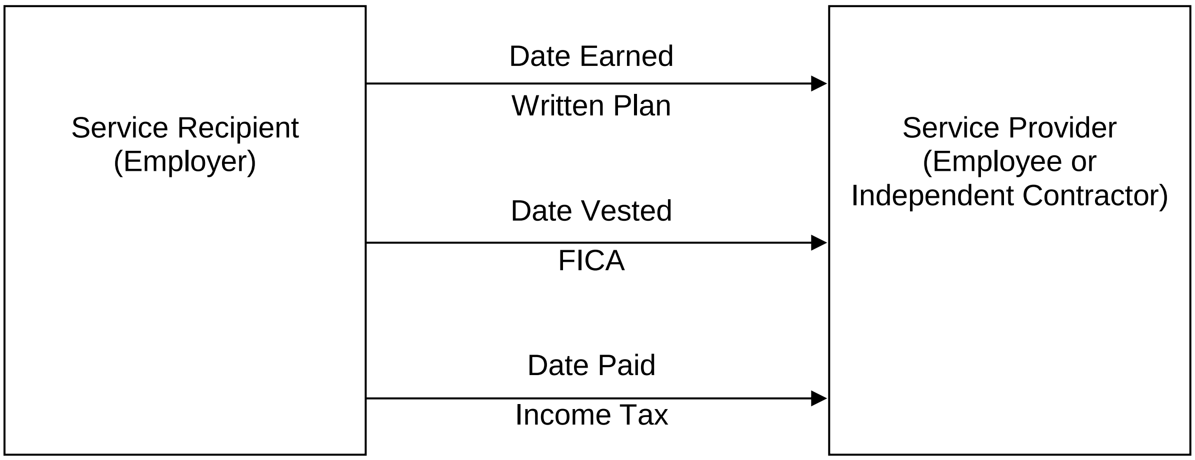
> The final regulations generally adopt the definition of substantial risk of forfeiture set forth in the proposed regulations. Several commentators requested that the definition of substantial risk of forfeiture be the same as the definition of substantial risk of forfeiture in § 1.83-3(c). However, the definition of substantial risk of forfeiture for purposes of compensatory transfers of property under section 83 reflects different policy concerns from those involved in section 409A, and there are also practical differences between transfers of restricted property and promises to pay deferred compensation. This is reflected in the provisions of section 409A(e)(5), directing the Secretary of the Treasury Department to issue regulations disregarding a substantial risk of forfeiture in cases where necessary to carry out the purposes of section 409A. Accordingly, the final regulations do not adopt this suggestion.

[3076] See part II.A.2.j.iv Providing Equity-Type Incentives without Violating the Single Class of Stock Rules, especially fns. 221-222.

I have seen the balance sheet liability cause deferred compensation agreements to be killed.

II.Q.1.d.iii. Timeline for FICA and Income Taxation of Deferred Compensation

Here is a timeline for FICA and income taxation of deferred compensation when the service recipient is not a tax-exempt entity:



Date Earned. Need to have written plan in place before service provider obtains legally enforceable rights – either required or best practice to be in place before performing service.

Date Vested. "Vested" corresponds to no further obligation to perform services. FICA will be due on present value[3077] and will not be due when the benefits are paid.[3078] This vesting is often beneficial when employee's compensation, for the year in vesting occurs, exceeds the taxable wage base ($128,400 in 2019) because it is taxed at 2.9% (1.45% x 2) or 3.8% (for compensation in excess of $200,000 for a single person or $250,000 for a married person filing jointly) instead of 15.3% (7.65% x 2).[3079] The employer and employee can negotiate whether the employer should pay the employee

[3077] Reg. § 31.3121(v)(2)-1(c)(2).

[3078] Code § 3121(v)(2)(B). Reg. § 31.3121(v)(2)-1(d)(2) provides how much income on this initially taxed is also excluded from FICA wages when paid.

[3079] FICA tax (for employer and employee combined, or for self-employment tax purposes) is 15.3% on annual income up to the taxable wage base (TWB) and 2.9% on all annual income above the TWB until $200,000 (single) or $250,000 (married), above which it is 3.8%. FICA consists of Old-Age, Survivors, and Disability Insurance benefits (OASDI) and Medicare's Hospital Insurance program (HI). The OASDI tax is 6.2% for employer and 6.2% for employee, for a total of 12.4%, imposed only up to the TWB. The HI tax is 1.45% for employer and 1.45% for employee, imposed on all FICA wages. See http://www.ssa.gov/OACT/COLA/cbb.html for the past and current TWB; see also part II.L.2.a.i General Rules for Income Subject to Self-Employment Tax. Most of the FICA tax on the present value will be at the lower 2.9% or 3.8% rate. When payments are made in future years, they will not be subject to FICA tax. This could save around $15,959 of FICA tax each year ($128,700 TWB for 2018, multiplied by the 12.4% spread between 15.3% and 2.9%; if wages were taxed at 3.8% the savings would be $14,801). The savings is slightly less than indicated, because it does not consider that the employer receives a deduction for the employer's one-half portion of FICA.

an additional bonus to cover the additional FICA withholding in the year of vesting. On one hand, the employee might not have the cash flow to pay the FICA, since the employee has not been paid this deferred amount. On the other hand, the employee's share of FICA is properly taxed to the employee, and it is taxed at a lower rate than it would be if the plan had not been in effect, so it's only fair for the employee to pay this additional FICA. Note, however, that the FICA deferred compensation regulations do not provide a discount for the credit risk (that the employer might not be able to pay) that the employee assumes,[3080] and the employee cannot get the FICA back if the employer defaults.[3081]

Date Paid. Income tax is due when paid or constructively received, but FICA is not due since that was already paid.[3082] Code § 409A places strict limits on events that accelerate payment and events that delay payment.

[3080] Reg. § 31.3121(v)(2)-1(c)(2)(ii) provides:

> For purposes of this section, the present value must be determined as of the date the amount deferred is required to be taken into account as wages under paragraph (e) of this section using actuarial assumptions and methods that are reasonable as of that date. For this purpose, a discount for the probability that an employee will die before commencement of benefit payments is permitted, but only to the extent that benefits will be forfeited upon death. In addition, the present value cannot be discounted for the probability that payments will not be made (or will be reduced) because of the unfunded status of the plan, the risk associated with any deemed or actual investment of amounts deferred under the plan, the risk that the employer, the trustee, or another party will be unwilling or unable to pay, the possibility of future plan amendments, the possibility of a future change in the law, or similar risks or contingencies. Nor is the present value affected by the possibility that some of the payments due under the plan will be eligible for one of the exclusions from wages in section 3121(a).

[3081] *Balestra v. U.S.*, 803 F.3d 1363 (Ct. Fed. Cl. 2014), holding:

> Sections 3101(b) and 3121(v)(2) required these benefits to be calculated and taxed when he retired, but do not require the use of a risk-adjusted discount rate nor a refund corresponding to the benefits plaintiff never received.

The Federal Circuit, at 803 F.3d 1363 (2015), affirmed the Court of Claims, validating Reg. § 31.3121(v)(2)-(1)(c)(2)(ii):

> Treasury's path to calculating the amount deferred in terms of the compensation's present value without consideration of an employer's financial condition is reasonably discernable. Treasury explained that it sought simple, workable, and flexible rules when valuing future benefits. It devised a regulation that satisfied these goals while comporting with the governing statute. This is neither arbitrary nor capricious. It may seem unfair in a specific instance such as this, but in balancing the desire for simplicity against the ideal of ultimate comprehensiveness, the agency must be allowed a reasonable degree of discretion. We cannot say that this one example of consequent unfairness by the agency results in invalidating the rule-making.

[3082] However, if an amount deferred is required to be taken into account in a particular year, but the employer fails to pay the additional FICA tax resulting from that amount, then the amount deferred and the income attributable to that amount must be included as wages when actually or constructively paid. Reg. § 31.3121(v)(2)-1(d)(1)(ii)(A). An employer that fails to withhold upfront and then causes the employees to pay more FICA when they retire is liable to the employees. *Davidson v. Henkel Corporation*, 115 A.F.T.R.2d ¶ 2015-321 (D. Mich. 2015). AM 2017-001 clamps down to an extent when employers do not follow the rules:

> As noted above, § 31.3121(v)(2)-1(d)(1)(ii) describes the steps to be taken if an employer fails to use the special timing rule as required for part or all of the amounts an employee

One might also consider whether FICA tax rates might increase in the future as Social Security and Medicare payments for the Baby Boomers increase. Vesting no later than December 31, 2012 should be considered to avoid the additional 0.9% tax on wages in excess of $250,000 (joint return) or $200,000 (single returns) that was added by the 2010 health care act.[3083]

Furthermore, the state in which the service provider worked may not subject the deferred compensation to tax except to the extent paid to the service provider while he or she is a resident of that state.[3084]

Because various tax-exempt entities have no incentive to accelerate income, the present value of the future payments is taxed when vested instead of when paid.[3085] Such an employer includes a State, political subdivision of a State, and any agency or instrumentality of a State or political subdivision of a State, and any other organization (other than a governmental unit) exempt from income tax.[3086] When the employee receives the deferred payments, the payments are exempt from FICA (as described above)[3087] but, to the extent of the interest component arising from the present value

---

defers under a NQDC plan. If an employer fails to pay FICA tax on amounts deferred as required under § 3121(v)(2), the employer is required to adjust its employment tax returns for any years for which the period of limitations has not expired to report and pay the additional FICA tax attributable to the amounts deferred and required to be included under the special timing rule. See § 6205 and § 31.6205-1(a) and (b) of the regulations with regard to making interest-free adjustments of underpayments. If the employer does so, the nonduplication rule will apply to the payment of the deferred compensation. However, the general timing rule will apply to any amounts deferred and income attributable to those amounts deferred for closed years that cannot be adjusted.

Upon discovery that they have not correctly applied the special timing rule under § 3121(v) to pay FICA tax when required under the regulations, some employers have requested a closing agreement to permit them to pay FICA tax in a subsequent year that is prior to the year of payment in order to reduce the amount of total FICA taxes that would otherwise be due under the general timing rule if FICA tax was applied at the time of payment of the wages. The employer may also want to avoid application of the allocation rule in § 31.3121(v)(2)-1(d)(1)(ii)(B) that imposes FICA tax on a portion of each payment if the employer took some portion (but not all) of the NQDC into account for FICA tax under the special timing rule.

Because the applicable regulations provide the mechanism for the payment of FICA taxes in the case of NQDC which is not timely taken into account under the special timing rule in § 31.3121(v)(2)-1(a)(2), as a policy matter, a closing agreement should not be entered into if it that has the effect of avoiding application of this regulatory mechanism. The existence of the special transition rule in the regulations for years for which the period of limitations had expired at the time the regulations were finalized reinforces the importance of adhering to the rules contained in § 31.3121(v)(2)-1(d)(1)(ii) for determining the FICA tax due upon payment of amounts that were deferred in prior years and that should have been taken into account under § 3121(v)(2) in such prior years but for which the period of limitations has since expired.

[3083] Code § 3101(b)(2).

[3084] See part II.Q.8.b.ii.(g) Code § 736 Payments As Retirement Income – Possible FICA and State Income Tax Benefits, fns. 4032-4035.

[3085] Code § 457(f)(1)(A), which applies to payments made by an eligible employer.

[3086] Code § 457(e)(1).

[3087] See fn. 3078.

calculation, would be subject to income tax.[3088] If deferring payments is important to the employer, then the employer should consider paying up-front enough to pay for the employee's up-front taxes and deferring most or all of the rest. Note that the arrangement saves FICA relative to what otherwise might have been the parties' expectations,[3089] so they might want to consider that savings when negotiating the deferred compensation arrangement.

II.Q.2. Consequences of IRS Audit Exposure for Prior Years' Activities

Consider the impact of part II.G.18 IRS Audits and whether the buyers might want a price adjustment if such audits occur:

- C Corporation. An audit changing a prior year's tax position results in the new shareholders paying the tax.

- S Corporation. An audit changing a prior year's tax position results in the former shareholders paying the tax, except to the extent that the change relates to C corporation years,[3090] built-in gain tax,[3091] tax on excess net passive income,[3092] or any other taxes or penalties (for example, payroll taxes) imposed on the entity itself.

- Partnership. Depending on the situation, tax imposed by reason an audit changing a prior year's tax position might be paid by the partnership or by the former partners. Of course, taxes or penalties (for example, payroll taxes) other than income tax might be imposed on the entity itself.

II.Q.3. Deferring Tax on Lump Sum Payout Expected More than Two Years in the Future

If one expects to sell a business interest for all cash in a few years and would like to defer capital gain on the sale of a business interest, consider selling the business interest in an installment sale to a nongrantor trust. The note might be interest-only for a few years, with principal payments beginning some time after the business interest is expected to be sold. The trust receives basis for the full amount of the promissory note and can sell the business interest tax-free to the extent of that basis.

Similar principles apply to the sale of land or other property that is not depreciable or amortizable.

[3088] Code § 457(f)(1)(B).

[3089] See discussion accompanying fns. 3077-3081.

[3090] Changes to C corporation years might result not only in more tax but also more earnings & profits (E&P); for the latter, see part II.Q.7.b Redemptions or Distributions Involving S Corporations (effect of E&P on taxation of distributions).

[3091] See part II.P.3.c.ii Built-in Gain Tax on Former C Corporations under Code § 1374.

[3092] See part II.P.3.c.iii Excess Passive Investment Income.

Potential pitfalls include the following:

- If the trust is a related person (which usually is the case) and it re-sells the business interest within two years, the original seller's deferred gain is accelerated.[3093]

- The original seller's death will not generate a basis step-up in the note.[3094] If the original seller had simply held the business interest until death, part or all of the gain would be eliminated by basis step-up. Consider buying term insurance against the risk of loss of the financial benefit of the basis step-up.

- Be sensitive to possible acceleration of the deferred gain if the original seller later transfers the installment note, including by gift (or transfer to or from a nongrantor trust),[3095] or pledges the note.[3096]

- Beware of the possible need to pay interest on the deferred tax liability if the sale exceeds $5 million.[3097]

- The part of the gain on the sale of a partnership interest attributable to "hot assets" is not eligible for installment sale treatment.[3098]

- The direct or indirect sale of depreciable or amortizable assets to a related party (the nongrantor trust) might trigger ordinary income tax.[3099]

Dealers cannot use the installment method with respect to:[3100]

> (A) *Personal property*. Any disposition of personal property by a person who regularly sells or otherwise disposes of personal property of the same type on the installment plan.
>
> (B) *Real property*. Any disposition of real property which is held by the taxpayer for sale to customers in the ordinary course of the taxpayer's trade or business.

When entities disposed of real properties that were held for sale to customers in the ordinary course of their trades or businesses, they were not permitted to use the

installment method to account for their sales of real properties made by contract for deed.[3101]

See also part II.G.25 Real Estate Dealer vs. Investor.

II.Q.4. Consequences of a Buy-Sell Agreements Not Dependent on Choice of Entity

II.Q.4.a. Funding the Buy-Sell

Insurance is by far the most common method by which a buy-sell agreement is funded, whichever form of agreement is used. Special rules apply if the beneficiary is two generations (or the equivalent) younger than the insured.[3102] If a business owner has a parent with an estate tax problem, that parent's estate tax problem might lend itself to a special opportunity to pay for the policies that fund the buy-sell.[3103]

Not enough attention is focused on disability insurance, which can protect the business' cash flow due to the interruption caused and might also help fund buyouts. To the extent disability is to benefit the disabled person, one should avoid the draconian Code § 409A rules,[3104] which have a stringent disability provision,[3105] and instead pay the key employee compensation sufficient for that person to buy his or her own disability policy.

Having life insurance proceeds paid directly to the selling shareholder does not make the sale tax-free; rather, the payment is treated just as would be any other payment to a seller[3106] (which might be tax-free if the seller has sufficient basis, for example because of a basis step-up in the business interest).

Funding with life insurance under a cross-purchase plan will require that each shareholder own a life insurance policy on the life of every other shareholder. If there are more than three owners, however, policy ownership can become complicated and a stock redemption agreement may make better sense. One alternative to a stock redemption agreement may be a trusteed agreement whereby the trustee would act as custodian of the policies and purchase one life insurance policy for each shareholder. This avoids the need for multiple policies when there are more than two shareholders. If a stock redemption arrangement is employed, the corporation purchases a life insurance policy on each shareholder. Upon the shareholder's death, the beneficiary then uses the

---

[3101] See *SI Boo, LLC v. Commissioner*, T.C. Memo. 2015-19; see fn. 2388 and the accompanying text for this case's facts and analysis.

[3102] If the policy proceeds are $250,000 or more, the life insurance company will need to verify with the beneficiary that the beneficiary is not a skip person receiving a payment subject to generation-skipping transfer (GST) tax; otherwise the insurance company might need to file relevant forms reporting and paying GST tax. See the Examples under Reg. § 26.2662-1(c)(2)(vi).

[3103] This tool, generational split-dollar, is described as it was approved in fns. 3214-3216 in part II.Q.4.f.ii.(b) Treatment of Split-Dollar Arrangement under Reg. § 1.61-22.

[3104] See part II.M.4.d Introduction to Code § 409A Nonqualified Deferred Compensation Rules.

[3105] See part III.B.7.c.vi Deferred Compensation, especially fn. 5618.

[3106] For an analogous situation, see Rev. Rul. 70-254, which is based on *Landfield Finance Company v. U.S.*, 418 F. 2d 172 (7th Cir. 1969), which in turn is based on Reg. § 1.101-1(b)(4).

proceeds to purchase the decedent's shares. Similarly, as described in a Letter Ruling, the shareholders could form a limited liability company to own life insurance on each other, with the manager of the LLC retaining the proceeds until the parties agree on proper application of the proceeds.[3107] Also note that split-dollar life insurance arrangements[3108] are subject to Code § 409A rules restricting the events upon which deferred compensation can be paid, the violation of which trigger significant tax, penalties, and interest.[3109] When drafting a shareholder agreement using life insurance, consider authorizing transfers of the policy to the insured for fair market value to avoid Code § 409A risks; defining the value as cash surrender value might not be sufficient, particularly because features, such as no-lapse guarantees (which is the equivalent of prepaid insurance that is not revealed on annual insurance policy statements), provide additional value that is tracked through the life insurance company's internal "shadow account" that can provide surprising results when the insurance company issues IRS Form 712.[3110] Also, make sure that any rights an insured might have to purchase a policy others hold on his life arise only as a collateral consequence of acts or events of independent significance,[3111] so that they do not constitute an incident of ownership.[3112]

[3107] See part II.Q.4.i Life Insurance LLC.

[3108] Split-dollar is a cash value life insurance financing arrangement described in Reg. §§ 1.61-22 and 1.7872-15, with cross-references found in Reg. §§ 1.83-6(a)(5) (income tax treatment on rollout of employee split-dollar), 1.301-1(q) (shareholder arrangements), and 1.1402(a)-18 (self-employment tax issues). See part II.Q.4.f Split-Dollar Arrangements.

[3109] Notice 2007-34 sets forth transition rules. See part II.M.4.d Introduction to Code § 409A Nonqualified Deferred Compensation Rules, for a discussion of Code § 409A, including the permissible triggering events. Events that terminate pre-2005 split-dollar agreements often do not comply with these permissible triggering events, so a review of pre-2005 split-dollar agreements is a good idea. See Zaritsky, Aghdami & Mancini, ¶8.02. Life Insurance Funding, *Structuring Buy-Sell Agreements: Analysis With Forms*.

[3110] For income tax valuation of policies, see fn. 3122. In the case of a split-dollar arrangement entered into on or before September 17, 2003, and which is not materially modified after that date, only the cash surrender value of the contract is considered to be property. Reg. § 1.83-3(e). Reg. §§ 20.2031-8 and 25.2512-6 determine the value for estate and gift tax purposes - based primarily on interpolated terminal reserve as a measure of the replacement value; see fn. 3123 for more information on this authority.

[3111] See part III.B.1.i Transfers with Contingencies Based on Acts of Independent Significance.

[3112] Letter Ruling 8049002 held that no incidents of ownership existed when a shareholder agreement gave the decedent the option to purchase policies at a price equal to the transfer value (cash surrender value), which option was exercisable only if decedent terminated his shareholder relationship with the corporation by offering all stock to the corporation and/or the other principal. This first-refusal option would become operative when a shareholder receives a bona fide offer, a shareholder terminates employment, or a shareholder becomes totally and permanently incapacitated. At date of death, although the option was still outstanding, the decedent had not terminated his shareholder relationship or acted in any way to exercise his option with respect to the insurance policies. The ruling was based on Rev. Ruls. 72-307, 75-50, and 79-46, from which the IRS gleaned an absence of incidents of ownership because the decedent could not independently initiate the events which would enable him to gain control over the policies (except, perhaps, by terminating employment, and, even then, he would not control the corporation's decision to repurchase). Thus, he lacked not only the practical ability to exercise any power with respect to these policies but also any power over the policies. Letter Ruling 9233006 also found no incidents of ownership when shareholders could buy policies on their respective lives and, thus, prevent cancellation of these policies only if the corporation redeems their stock interests in the event that the insured is disabled for a prescribed period of

If a shareholder is uninsurable, a sinking fund may be used to accumulate funds for premium payments or at least to provide a down payment. The remainder of the purchase price can be subject to an installment agreement whereby the payments can be spread out over a long time period.

In a redemption agreement, the value of the insurance on the decedent's life will not be includable in the decedent's gross estate for federal estate tax purposes if the corporation is the owner and beneficiary of the policy,[3113] and the insurance proceeds received by the corporation will not be subject to income tax.[3114] Unless a valid agreement that satisfies Code § 2703[3115] provides otherwise, the insurance proceeds will, however, be considered in valuing the decedent's interest in the business,[3116] but perhaps offset by the buy-sell obligation.[3117] Insurance premiums used to fund the agreement are not deductible by the corporation.[3118]

---

time, the insured declines to participate in the sale of the corporation to a third party, or the insured declines to participate in a public offering of the corporation's stock. Thus, the right to acquire the insurance policies and thus, prevent cancellation would arise as a collateral consequence of acts or events of independent significance. That ruling also cited Rev. Ruls. 84-130 and 80-255. *Estate of Tully v. United States*, 528 F.2d 1401 (Ct. Cl. 1976), held that the ability to cancel a death benefit by divorcing one's spouse does not generate Code § 2038(a)(1) inclusion.

[3113] Rev. Rul. 82-85, relying on Reg. § 20.2042-1(c)(6). If the decedent controls the entity that owns the policy and the insurance proceeds are not payable to the corporation or otherwise used for a valid business purpose (such as in satisfaction of a business debt of the corporation) so that the net worth of the corporation is increased by the amount of such proceeds, then the proceeds are includible in the decedent's estate. Reg. § 20.2042-1(c)(6). For purposes of determining whether a decedent controlled stock, the decedent will not be attributed ownership of a trust that the decedent did not create with respect to which the decedent was not the deemed owner under the grantor trust income tax rules. Letter Rulings 9808024 (decedent not deemed owner of trust and therefore not attributed stock ownership), 9511046 (decedent attributed stock ownership as deemed owner of QSST). Also, Code § 2035 causes inclusion if the life insurance proceeds are payable to a third party for other than a Reg. § 20.2042-1(c)(6) business purpose and: (a) the corporation, for less than adequate and full consideration, assigns an insurance policy on the stockholder's life and the stockholder then disposes of control of the corporation, or (b) within three years of death the stockholder had a controlling interest in a corporation that owns a life insurance policy on the stockholder's life. Rev. Rul. 90-21. Situation (2) of Rev. Rul. 90-21 reasoned that a shareholder who holds a non-controlling interest would not hold incidents of ownership; however, the facts did not indicate whether the shareholder had any authority to exercise any control over the policy.

[3114] Code § 101(a)(1). However, the death benefit might trigger significant alternative minimum tax (AMT), because book-tax differences generate an AMT preference. See part II.Q.7.a.v Redemptions and Alternative Minimum Tax.

[3115] See part II.Q.4.h Establishing Estate Tax Values.

[3116] Reg. § 20.2031-2(f); *Newell v. Commissioner*, 66 F.2d 102 (7th Cir. 1933).

[3117] In the *Blount* case, cited in footnote 3253, the Tax Court included the life insurance in the business' value, but the 11th Circuit reversed, holding that the buy-sell obligation offset the inclusion in the company's value.

[3118] Code § 264(a)(1). Interest on premiums to buy life insurance is disallowed under Code § 264(a)(4), but it reduces earnings and profits if the payor is a C corporation. Rev. Rul. 2009-25.

A cross-purchase generally would constitute a taxable sale, treated as a capital gain.[3119] In many cases, a cross-purchase or a redemption that is paid over time can qualify for tax deferral as an installment sale.[3120] However, tax deferral on installment sales can be limited,[3121] so do not assume that it is available without our first having the rules thoroughly researched.

In a cross-purchase arrangement, the value of life insurance owned on the decedent's life by a surviving shareholder will not be included in the decedent's estate for federal estate tax purposes, but the decedent's gross estate will include the value of life insurance the decedent owned on the lives of the surviving shareholders. Premiums paid by the shareholders to fund the agreement are not deductible by the shareholders, and the insurance proceeds paid to the surviving shareholders will not be subject to income tax. Generally, a transferred policy would be valued for income tax purposes at its fair market value, rather than its Form 712 value.[3122] For estate and gift tax purposes, the IRS Form 712 value is usually, but not always, appropriate.[3123]

[3119] However, in a partnership, part of the sale might constitute ordinary income under Code § 751. See part II.Q.8.e.ii Transfer of Partnership Interests: Effect on Transferring Partner.

[3120] Code § 453.

[3121] Code § 453A.

[3122] *Matthies v. Commissioner*, 134 T.C. 141 (2010 regarding tax years 2000 and 2001), rejected the taxpayer's attempt to used interpolated terminal reserve for income tax purposes, although the rejection appears to have responded to the taxpayer's failure to prove value when engaging in what many people call a pension rescue plan that the court considered to be a scheme. The case also held that, if and to the extent that cash surrender value is used, the value does not consider charges imposed on a surrender of the policy. Rev. Proc. 2005-25 applies generally in the context of valuing compensation under Code §§ 79, 83 and 402. Except for split-dollar arrangements and except for employee trusts and annuity plans subject to Code §§ 402(b) and 403(c), Reg. § 1.83-3(e) provides:

> In the case of a transfer of a life insurance contract, retirement income contract, endowment contract, or other contract providing life insurance protection, or any undivided interest therein, the policy cash value and all other rights under such contract (including any supplemental agreements thereto and whether or not guaranteed), other than current life insurance protection, are treated as property for purposes of this section.

For qualified retirement plan purposes, see Reg. § 1.402(a)-1(a)(2), the preamble to which is T.D. 9223, which does a good job of explaining how that rule changed. Reg. § 1.402(a)-1(a)(2) requires that surrender charges be ignored in calculating the amount of a distribution from a qualified retirement plan. However, for a nonexempt employee trust (a trust established to fund payments of compensation to be made in the future), surrender charges are considered. *Schwab v. Commissioner*, 136 T.C. 120 (2011) (when surrender charges exceeded cash value, policies valued based on prepaid death benefit when no other evidence of value was introduced), *aff'd* 715 F.3d 1169 (9th Cir. 2013), and *Lowe v. Commissioner*, T.C. Memo. 2011-106. *Lowe* summarized the holding of the Schwab Tax Court opinion, contrasting the qualified retirement plan concept of entire cash value against the nonexempt employee trust concept of entire value:

> We concluded that while the entire cash value of a life insurance policy is determined without regard to surrender charges, the entire value of a life insurance policy is determined by its fair market value, which may include surrender charges. We thus rejected the simple proposition that surrender charges should never count or that they should always count, instead reading section 402(b) to require a court to consider the payment of surrender charges as part of a more general inquiry into the policy's fair market value.

Lowe pointed out that the Tax Court denied the IRS' motion for reconsideration of *Schwab*. In denying the IRS' motion for summary judgment, the *Lowe* court held:

> The facts of the instant case are virtually identical to those presented in *Schwab*. The policies were variable universal life insurance policies with steep premiums, and both were distributed from nonexempt employee trusts in late 2003. Both policies carried surrender charges that rendered the accumulated value of the policy zero or less than zero. In Schwab we decided that the fair market values of the policies the taxpayers received were less than their accumulated values. Here, we are unable to determine the fair market value of Mr. Lowe's policy because the record does not allow us to do so.

Thus, the Tax Court appears to heavily weigh surrender charges in determining the value of a policy for income tax purposes, if a specific rule does not apply to override that. Specific rules to the contrary include qualified retirement plans (discussed above) and split-dollar arrangements (Reg. § 1.61-22(d)(4)(i)). Reg. § 1.83-3(e) provides further:

> However, in the case of the transfer of a life insurance contract, retirement income contract, endowment contract, or other contract providing life insurance protection, which was part of a split-dollar arrangement (as defined in § 1.61-22(b)) entered into (as defined in § 1.61-22(j)) on or before September 17, 2003, and which is not materially modified (as defined in § 1.61-22(j)(2)) after September 17, 2003, only the cash surrender value of the contract is considered to be property. Where rights in a contract providing life insurance protection are substantially nonvested, see § 1.83-1(a)(2) for rules relating to taxation of the cost of life insurance protection.

[3123] Reg. § 25.2512-6(a) provides:

> The value of a life insurance contract or of a contract for the payment of an annuity issued by a company regularly engaged in the selling of contracts of that character is established through the sale of the particular contract by the company, or through the sale by the company of comparable contracts. As valuation of an insurance policy through sale of comparable contracts is not readily ascertainable when the gift is of a contract which has been in force for some time and on which further premium payments are to be made, the value may be approximated by adding to the interpolated terminal reserve at the date of the gift the proportionate part of the gross premium last paid before the date of the gift which covers the period extending beyond that date. If, however, because of the unusual nature of the contract such approximation is not reasonably close to the full value, this method may not be used.

Reg. § 20.2031-8(a)(1), (2) provide:

> (1) The value of a contract for the payment of an annuity, or an insurance policy on the life of a person other than the decedent, issued by a company regularly engaged in the selling of contracts of that character is established through the sale by that company of comparable contracts. An annuity payable under a combination annuity contract and life insurance policy on the decedent's life (e.g., a retirement income policy with death benefit) under which there was no insurance element at the time of the decedent's death (see paragraph (d) of § 20.2039-1) is treated like a contract for the payment of an annuity for purposes of this section.
>
> (2) As valuation of an insurance policy through sale of comparable contracts is not readily ascertainable when, at the date of the decedent's death, the contract has been in force for some time and further premium payments are to be made, the value may be approximate by adding to the interpolated terminal reserve at the date of the decedent's death the proportionate part of the gross premium last paid before the date of the decedent's death which covers the period extending beyond that date. If, however, because of the unusual nature of the contract such an approximation is not reasonably close to the full value of the contract, this method may not be used.

Rev. Rul. 78-137 held:

> In general, the replacement cost of a single premium policy will determine the value of the policy for gift tax purposes. *United States v. Ryerson*, 312 U.S. 260 (1941), Ct. D. 1488, 1941-1 C.B. 447. The replacement cost is based upon the single premium cost of a

In a cross purchase funded by life insurance, consider not only the transfer for value but also income tax rules when an owner enters or exits the ownership group. How will policies on the existing owners be transferred to the new owner? How will policies that a departing owner owns be transferred when that person leaves, and how will policies on that person's life be transferred from the other owners? Consider not only income tax but also Code § 409A nonqualified deferred compensation issues. One might use a Life Insurance LLC to minimize these potentially adverse tax consequences – particularly when new insurance can be obtained.[3124]

Using split-dollar arrangements[3125] to fund a cross-purchase might also help when unwinding the arrangement. The insured pays the premiums and is deemed the policy owner under the split-dollar regulations,[3126] but the other business owners are entitled to the term insurance component of the death benefit and hold title and all other incidents of ownership with respect to the policy.[3127] If the insured leaves the business, the policy is transferred to the insured (or, preferably, an irrevocable grantor trust established by the insured); the transfer of the policy to the insured is not deemed a transfer for income tax purposes because the insured was already deemed to be the owner.

---

comparable policy. *Candler v. Allen*, 43 F.Supp. 435 (M.D. Ga. 1942). Generally, the estate tax and gift tax provisions are in *pari materia*. *Sanford Estate v. Commissioner*, 308 U.S. 39 (1939), Ct. D. 426, 1939-2 C.B. 340.

In order for an insurance policy to qualify as a comparable contract within the meaning of section 20.2031-8(a), the policy must provide the same economic benefits as the policy owned by the decedent. *Candler v. Allen*, above at 437. The economic benefits of a single premium life insurance policy consist of an entire bundle of rights including the right to surrender the policy, the right to retain it for investment virtues, the right to borrow the cash surrender value of the policy and the right to payment of the face amount on the death of the insured. *Guggenheim v. Rasquin*, 312 U.S. 254 (1941), Ct. D. 1487, 1941-1 C.B. 445; *Candler v. Allen*, above at 437. All of the economic benefits of the decedent's policy must be taken into consideration. To single out one economic benefit of the decedent's policy and to disregard the others is, in effect, to substitute a different property interest for the one that was owned by the decedent. *Cf. Guggenheim v. Rasquin*, above at 257.

Since the cash surrender value of the replacement policy is less than the cash surrender value of the decedent's policy, the replacement policy does not reflect all of the economic benefits of the policy owned by the decedent. Therefore, the replacement policy is not a comparable contract within the meaning of section 20.2031-8(a) of the regulations. Accordingly, in the present case, the value of the policy owned by A on the life of A's child shall be determined, for Federal estate tax purposes, by reference to a comparable contract that reflects all of the economic benefits of the decedent's policy. If, however, information pertaining to a comparable contract is not obtainable, the value of the policy shall be determined by reference to the interpolated terminal reserve value of the policy pursuant to section 20.2031-8(a)(2) of the regulations, quoted above.

¶ 3.02[2][a][iii] of Zaritsky & Leimberg, *Tax Planning with Life Insurance: Analysis With Forms* (WG&L), provides an interesting discussion. Also see Anoia, Mendelsohn, and Slane, Complexities of Life Insurance Policy Valuation, *Estate Planning Journal* (June 2014), especially for some insightful analysis of valuing no-lapse guarantee policies.

[3124] See part II.Q.4.i, Life Insurance LLC.

[3125] See part II.Q.4.f Split-Dollar Arrangements.

[3126] Reg. § 1.61-22(c).

[3127] To avoid estate tax inclusion under Code § 2042.

II.Q.4.b. Transfer for Value Rules; Basis

If life insurance policies can be transferred among the shareholders or from the corporation to the shareholders, the transfer for value rules must be examined. The transfer-for-value rules state that if consideration is given for the transfer of an insurance policy, then the proceeds of the policy will be taxed as income to the owner-beneficiary upon the insured's death.[3128] The IRS has taken the position that, when an insured transfers a policy on his life to his business co-owner, and his co-owner does the same, the transfer for value rules apply, and the death proceeds will be exempt only to the extent of the new premiums paid after the transfer, with the balance of the proceeds being taxed as ordinary income.[3129] The transfer for value rules do not apply to transfers made to the insured, a corporation in which the insured is an officer or stockholder, a partner of the insured,[3130] a partnership in which the insured is a partner, or where the new owner's basis is determined in whole or in part by reference to the transferor's basis.[3131] A transfer of an interest in a partnership that owns a life insurance policy is not

---

[3128] Code § 101(a)(2) provides, subject to certain exceptions:

> In the case of a transfer for a valuable consideration, by assignment or otherwise, of a life insurance contract or any interest therein, the amount excluded from gross income by paragraph (1) shall not exceed an amount equal to the sum of the actual value of such consideration and the premiums and other amounts subsequently paid by the transferee.

Code § 101(a)(1) is the general rule that death benefits are not taxable.

[3129] Letter Ruling 7734048. For additional discussion of the transfer for value rules, see Zaritsky & Leimberg, ¶2.07. The Transfer-For-Value Rule Causing the Loss of Tax-Free Status, *Tax Planning With Life Insurance: Analysis With Forms* (WG&L).

[3130] Not surprisingly, Letter Ruling 200120007 treated an LLC as a partnership in applying this rule. That LLC was formed to hold stock in a C corporation. The ruling also treated as having no adverse transfer-for-value effects:

- The transfer of a second-to-die policy to a trust deemed owned by one of the insureds.
- The transfer of a policy from a trust deemed owned by husband to a trust deemed owned by wife (due to Code § 1041 make it a substituted basis transaction).

[3131] Code § 101(a)(2)(A), (B). Rev. Rul. 2007-13 posited the following situations:

> Situation 1. TR1 and TR2 are grantor trusts, both of which are treated as wholly owned by G under subpart E of Part I of subchapter J of the Internal Revenue Code. TR2 owns a life insurance contract upon the life of G. TR2 transfers the life insurance contract to TR1 in exchange for cash.
>
> Situation 2. The facts are the same as in Situation 1, except that TR2 is not a grantor trust.

It held:

> The grantor who is treated for federal income tax purposes as the owner of a trust that owns a life insurance contract on the grantor's life is treated as the owner of the contract for purposes of applying the transfer for value limitations of § 101(a)(2). Accordingly, in Situation 1, the transfer of a life insurance contract between two grantor trusts that are treated as wholly owned by the same grantor is not a transfer for a valuable consideration within the meaning of § 101(a)(2); in Situation 2, the transfer of a life insurance contract to a grantor trust that is treated as wholly owned by the insured is a transfer to the insured within the meaning of § 101(a)(2)(B) and is therefore excepted from the transfer for value limitations under § 101(a)(2).

Note that Rev. Proc. 2011-3, Section 3.01(7) states that the IRS will not issue letter rulings on:

> Section 101.—Certain Death Benefits.— Whether there has been a transfer for value for purposes of § 101(a) in situations involving a grantor and a trust when (i) substantially all of the trust corpus consists or will consist of insurance policies on the life of the grantor or the grantor's spouse, (ii) the trustee or any other person has a power to apply the trust's

subject to the transfer for value rules if the transfer does not constitute a termination of the partnership.[3132] Similarly, contributing a life insurance policy to a partnership in a Code § 721 nontaxable transfer[3133] is a substituted basis transaction that is not subject to the transfer for value rules.[3134]

Special rules apply to a "reportable policy sale," which is "the acquisition of an interest in a life insurance contract, directly or indirectly, if the acquirer has no substantial family, business, or financial relationship with the insured apart from the acquirer's interest in such life insurance contract."[3135] "Indirectly" includes "the acquisition of an interest in a partnership, trust, or other entity that holds an interest in the life insurance contract."[3136] Special rules for a reportable policy sale include:

- The exceptions to the transfer for value rule described above, all of which are Code § 103(a)(2)(A) or (B), do not apply. Thus, the death benefit generally is taxable, to the extent described in fn 3128.

> income or corpus to the payment of premiums on policies of insurance on the life of the grantor or the grantor's spouse, (iii) the trustee or any other person has a power to use the trust's assets to make loans to the grantor's estate or to purchase assets from the grantor's estate, and (iv) there is a right or power in any person that would cause the grantor to be treated as the owner of all or a portion of the trust under §§ 673 to 677.

However, that did not stop the IRS from issuing Letter Ruling 201423009, which including the following facts and conclusions:

> Individual A and his spouse, Individual B, are the grantors of the AC Trust. The AC Trust, as amended, is represented to be a grantor trust for federal income tax purposes owned by Individual A and Individual B. The AC Trust, as amended, owns and is currently the beneficiary of Number Y life insurance contracts on the joint lives of Individual A and Individual B and the Number X policy on Individual B (collectively, the life insurance contracts which total Number Z policies).
>
> The movement of the life insurance contracts from the AC Trust to the AB Trust has two aspects. The first aspect is that, pursuant to the rationale of Rev. Rul. 85-13, Individual A, as a grantor of the AC Trust, as amended, proposes to transfer the life insurance contracts to the AB Trust of which Individual A is the grantor. Thus, this aspect of the transaction cannot be recognized as a sale or exchange for tax purposes because Individual A is treated for income tax purposes as owning the purported consideration both before and after the transaction. The second aspect of the transaction is that Individual B's interest in the AC Trust (in which she is a grantor) is being moved to the AB Trust in which Individual B's husband, Individual A, is the grantor. This action has the result, under § 1041(a), as being treated as a gift to her husband, Individual A, who pursuant to § 1041(b) receives a carryover basis in the life insurance contracts from his wife, Individual B.

[3132] Letter Ruling 200826009. Note, however, that Rev. Proc. 2011-3, Section 3.01(8) states that the IRS will not issue letter rulings on:

> Sections 101, 761, and 7701.—Definitions. — Whether, in connection with the transfer of a life insurance policy to an unincorporated organization, (i) the organization will be treated as a partnership under §§ 761 and 7701, or (ii) the transfer of the life insurance policy to the organization will be exempt from the transfer for value rules of § 101, when substantially all of the organization's assets consists or will consist of life insurance policies on the lives of the members.

[3133] See part II.M.3.a General Rule: No Gain on Contribution to Partnership.

[3134] Letter Ruling 201308019.

[3135] Code § 101(a)(3)(B).

[3136] Code § 101(a)(3)(B).

- Various reporting requirements apply when the death benefit is paid.[3137]

Rev. Rul. 2009-13 took the position that the basis of a policy that is sold to a person other than the issuer is not equal to the premiums paid.[3138] Effective for transactions entered into after August 25, 2009 (coinciding with the effective date of the IRS' position), section 13521 of the 2017 tax reform act reversed the IRS' position,[3139] adding Code § 1016(a)(1)(B), which provides:

> Proper adjustment in respect of the property shall in all cases be made for expenditures, receipts, losses, or other items, properly chargeable to capital account, but no such adjustment shall be made for mortality, expense, or other reasonable charges incurred under an annuity or life insurance contract.

II.Q.4.c. Income Tax Issues in Transferring Life Insurance Used in Cross-Purchase Agreements

When transferring policies as buy-sell needs and the identities of owners change:

1. Generally, income tax applies when buying, selling, or swapping policies. Generally, Code § 1035 nonrecognition of gain when swapping policies applies only when the policies have the same insureds.[3140] If one insured in a second-to-die policy has

---

[3137] Code § 6050Y.

[3138] See Rev. Ruls. 2009-13 and 2009-14. Commentators disagree with the IRS' position.

[3139] The Senate report stated:

> The provision provides that in determining the basis of a life insurance or annuity contract, no adjustment is made for mortality, expense, or other reasonable charges incurred under the contract (known as "cost of insurance"). This reverses the position of the IRS in Revenue Ruling 2009-13 that on sale of a cash value life insurance contract, the insured's (seller's) basis is reduced by the cost of insurance.

[3140] Rev. Rul. 90-109 examined a contract that allowed the insured to change (highlighting added):

> A change in contractual terms effected through an option provided in the original contract is treated as an exchange under section 1001 if there is a sufficiently fundamental or material change that the substance of the original contract is altered through the exercise of the option. Under such circumstances, the old contract is treated as if it were actually exchanged for a new one. *Cf.* Rev. Rul. 69-135, 1969-1 C.B. 198 (recognition of realized gain or loss under former section 1002 where bonds of one corporation are converted into stock of another corporation pursuant to an option contained in the bonds). See also Rev. Rul. 79-155, 1979-1 C.B. 153 (addition of new parent as obligor is a change which, together with other changes, constitutes a material change for purposes of section 1001).
>
> In the present situation, X exercised an option in its key person insurance policy that permitted it to change the insured from A, the original insured under the policy, to B, the new insured. This resulted in a change in the fundamental substance of the original contract because the essence of a life insurance contract is the life that is insured under the contract. Thus, X's exercise of the change-of-insureds option is substantively the same as an actual exchange of contracts and is a sale or other disposition for purposes of section 1001.
>
> Section 1.1035-1 of the regulations expressly excludes from the application of section 1035 exchanges of policies that do not relate to the same insured and thus prevents policy owners from deferring indefinitely recognition of gain with respect to the policy value. Had X actually assigned a life insurance policy on A to the insurance company as consideration for a new life insurance policy on B, any gain realized on the

died, Code § 1035 may apply to the exchange of that policy for a policy on the life of only the surviving insured.[3141] However, Code § 1035 does not apply to changing from having two insureds under a second-to-die policy to one insured under a policy or from one insured under a policy to two insureds under a second-to-die policy.[3142]

> exchange would have been ineligible for nonrecognition treatment under section 1035 of the Code. X cannot avoid the same-insured limitations of section 1035 simply by placing terms in its original documents that obviate the need for an actual exchange but nevertheless effect a de facto exchange of the original contract for a new contract on a different insured. For example, the result would be the same if X insured a person holding a particular position and, thus, no formal substitution is made when a new person occupies that position.

It held:

> The exercise of an option in an insurance policy to change the insured constitutes a sale or other disposition under section 1001 of the Code, and this disposition does not qualify as a tax-free exchange of insurance policies under section 1035.

[3141] Consistent with Letter Ruling 9248013, Letter Ruling 9330040 reasoned and held:

> The legislative history of section 1035 of the Code indicates that Congress viewed nonrecognition treatment as appropriate for "individuals who have merely exchanged one insurance policy for another better suited to their needs and who have not actually realized gain." See H.R. Rep. No. 1337, 83d Cong., 2d Sess. 81 (1954).
>
> Trust's proposed assignment of Policy to the issuer of New Policy and its receipt of New Policy will qualify as an exchange of one contract of life insurance for another contract of life insurance under section 1035(a)(1) of the Code. At the time of the proposed exchange, the sole remaining insured on Policy will be A. The sole insured on New Policy will also be A. Therefore, the proposed exchange does not involve a change of insured, which would disqualify the transaction from nonrecognition treatment under section 1035.
>
> Accordingly, under section 1035 of the Code no gain or loss will be recognized by Trust upon the exchange of Policy solely for New Policy. Further, the basis of New Policy in the hands of Trust will, as provided in section 1031(d), be the same as Trust's basis in Policy.
>
> We express no opinion on whether section 1035 of the Code applies to the exchange of a survivorship or "second to die" life insurance contract for a single life insurance contract prior to the death of either of the insureds under the survivorship contract. We also express no opinion on whether Policy or New Policy qualifies as a life insurance contract under section 7702(a).

[3142] Letter Ruling 9542037 rejected the application of Code § 1035 in all of the following situations:

> Taxpayer has inquired as to several situations involving exchanges by Taxpayer's policyholders who are spouses. In Situation 1, Spouse A exchanges a life insurance contract insuring solely his own life for a second-to-die life insurance contract covering the lives of both Spouse A and Spouse B. In Situation 2, Spouse A exchanges two life insurance contracts, one of which insures the life of Spouse A and one of which insures the life of Spouse B, for a second-to-die life insurance contract which covers the lives of both Spouse A and Spouse B. In Situation 3, Spouse A and Spouse B jointly exchange separate life insurance contracts each of which insures solely the life of one spouse for a jointly owned second-to-die life insurance contract which covers the lives of both Spouse A and Spouse B. In Situations 4A and 4B respectively, the facts are the same as in Situations 1 and 2 except that a trust is the owner and exchanger of the life insurance contracts involved. In none of the Situations do Spouse A, Spouse B or the trust receive any money or other property not permitted to be transferred without the recognition of gain or loss.

2. The transfer for value rules might cause the death benefit to be subject to income tax.[3143]

When life insurance is sold in a taxable transaction, the IRS' position is that:[3144]

It held:

> In each of the Situations described above, the individual insured under each contract given up in the exchange is not the sole individual insured under the contract received in the exchange. As the contracts do not relate to the same insured, any gain realized on the exchange is ineligible for nonrecognition under section 1035 of the Code.

[3143] See text accompanying fns. 3128-3134.

[3144] Rev. Rul. 2009-13, Situation 2 provides the following facts and analysis, which works from Situation 1:

> **Situation 1**
>
> On January 1 of Year 1, A, an individual, entered into a life insurance contract (as defined in § 7702 of the Internal Revenue Code (Code)) with cash value. Under the contract, A was the insured, and the named beneficiary was a member of A's family. A had the right to change the beneficiary, take out a policy loan, or surrender the contract for its cash surrender value. The contract in A's hands was not property described in § 1221(a)(1)-(8).
>
> On June 15 of Year 8, A surrendered the contract for its $78,000 cash surrender value, which reflected the subtraction of $10,000 of cost-of-insurance charges collected by the issuer for periods ending on or before the surrender of the contract. Through that date, A had paid premiums totaling $64,000 with regard to the life insurance contract. A had neither received any distributions under the contract nor borrowed against the contract's cash surrender value.
>
> A determines taxable income using the cash method of accounting and files income tax returns on a calendar year basis. As of June 15 of Year 8, A was not a terminally ill individual, nor a chronically ill individual, within the meaning of § 101(g)(4).
>
> **Situation 2**
>
> The facts are the same as in Situation 1, except that on June 15 of Year 8, A sold the life insurance contract for $80,000 to B, a person unrelated to A and who would suffer no economic loss upon A's death.
>
> ….
>
> **Law and Analysis**
>
> ….
>
> In Situation 2, A paid total premiums of $64,000 under the life insurance contract through the date of sale, and $10,000 was subtracted from the contract's cash surrender value as cost-of-insurance charges. Accordingly, A's adjusted basis in the contract as of the date of sale under §§ 1011 and 1012 and the authorities cited above was $54,000 ($64,000 premiums paid less $10,000 expended as cost of insurance).
>
> Accordingly, A must recognize $26,000 on the sale of the life insurance contract to B, which is the excess of the amount realized on the sale ($80,000) over A's adjusted basis of the contract ($54,000).
>
> **Character of income recognized on sale of the life insurance contract**
>
> Unlike Situation 1, which involves the surrender of the life insurance contract to the issuer of the contract, Situation 2 involves an actual sale of the contract. Nevertheless some or all of the gain on the sale of the contract may be ordinary if the substitute for ordinary income doctrine applies.
>
> The Supreme Court has held, under the so-called substitute for ordinary income doctrine, that property within the meaning of § 1221 does not include claims or rights to ordinary income. Instead, the Court has consistently construed 'capital asset' to exclude property representing income items or accretions to the value of a capital asset themselves

1. The taxpayer's gain is:

   - Ordinary income to the extent that it does not exceed the excess of the policy's cash value over the taxpayer's "investment in the contract" (this excess referred to later as the "inside build-up"),[3145] and

   - Capital gain to the extent of the balance.

2. The selling taxpayer's basis is reduced by the cost of insurance.[3146]

---

properly attributable to income. *United States v. Midland-Ross Corp.*, 381 U.S. 54, 57 (1965). *See also Commissioner v. P.G. Lake, Inc.*, 356 U.S. 260 (1958) (consideration received on the sale of a working interest in an oil well represented a substitute for what would have been received in the future as ordinary income, therefore taxable as ordinary income and not capital gain); *Arkansas Best Corp. v. Commissioner*, 485 U.S. 212, 217, n. 5 (1988) (noting that the substitute for ordinary income doctrine had no application to that case). Thus, ordinary income that has been earned but not recognized by a taxpayer cannot be converted into capital gain by a sale or exchange. *See also Prebola v. Commissioner*, 482 F.3d 610 (2d Cir. 2007); *United States v. Maginnis*, 356 F.3d 1179 (9th Cir. 2004); *Davis v. Commissioner*, 119 T.C. 1 (2002) (applying the substitute for ordinary income doctrine after the Arkansas Best decision).

The substitute for ordinary income doctrine has been applied to characterize the profit on a sale of an annuity contract or life insurance contract as ordinary income. For example, in *Gallun*, 327 F.2d 809, 811 (7th Cir. 1964), the court stated:

> The question presented has been considered by other courts. Uniformly, they have held that the assignment of income doctrine . . . should be applied and the profits realized from the sale or the surrender value of an annuity or life insurance contract should be treated as ordinary income rather than capital gain. These cases are: *First Nat'l Bank of Kansas City v. Commissioner*, 309 F.2d 587 (8th Cir. 1962); *Rolf v. Commissioner*, 304 F.2d 450 (3d Cir. 1962); *Commissioner v. Phillips*, 275 F.2d 33 (4th Cir. 1960); *Arnfeld v. United States*, 163 F.Supp. 865, 143 Ct. Cl. 277 (1958).

Application of the substitute for ordinary income doctrine is limited to the amount that would be recognized as ordinary income if the contract were surrendered (i.e., to the inside build-up under the contract). Hence, if the income recognized on the sale or exchange of a life insurance contract exceeds the inside build-up under the contract, the excess may qualify as gain from the sale or exchange of a capital asset. *See*, *e.g.*, *Commissioner v. Phillips*, 275 F.2d 33, 36 n. 3 (4th Cir. 1960).

In Situation 2, the inside build-up under A's life insurance contract immediately prior to the sale to B was $14,000 ($78,000 cash surrender value less $64,000 aggregate premiums paid). Hence, $14,000 of the $26,000 of income that A must recognize on the sale of the contract is ordinary income under the substitute for ordinary income doctrine. Because the life insurance contract in A's hands was not property described in § 1221(a)(1)-(8) and was held by A for more than one year, the remaining $12,000 of income is long-term capital gain within the meaning of § 1222(3).

[3145] Although the IRS did not expressly say so, this policy result is required to preserve the integrity of the system described in part II.Q.4.d Income Tax on Distributions or Loans from Contract (Including Surrender of Policy), which also explains why this policy result is required in the text preceding fn. 3159.

[3146] Commentators strongly disagree with the IRS' position, accusing it of cherry-picking authority. See, *e.g.*, "Ouch, My Head Hurts – Treasury Rules That 'Basis' Is Lower Than 'Investment in the Contract,'" Northwestern Mutual *Advanced Planning Bulletin*, June 2009, citing cases regarding life insurance, including *Arnfeld v. U.S.*, 163 F.Supp. 865 (Ct. Cl. 1958); *Commissioner v. Phillips*, If the policy is a term policy, then the IRS asserts that the basis is any unexpired premiums and the gain is purely capital gain.[3147] Rev. Rul. 2009-14 discusses tax consequences to the purchaser of a term life insurance policy.

Using a life insurance LLC might solve most or all of these issues.[3148]

II.Q.4.d. Income Tax on Distributions or Loans from Contract (Including Surrender of Policy)

To the extent that the distributions are nontaxable death benefits,[3149] the rules described below do not apply.[3150]

Generally, distributions (other than tax-free death benefits) from life insurance contracts are not taxable "the extent allocable to the investment in the contract."[3151] Dividends used to pay premiums are not taxable.[3152] Furthermore, loans generally are also not subject to income tax (without reference to the investment in the contract) while the borrower continues to hold the policy[3153] and are treated as distributions when those exceptions apply.[3154] However, distributions and loans generally are taxable if the policy is a "modified endowment contract," which generally apply when a policy's premiums are paid too quickly in its initial years.[3155]

---

275 F.2d 33 (4th Cir. 1960); *Roff v. Commissioner*, 304 F.2d 450 (3rd Cir. 1962); *First National Bank of Kansas City v. Commissioner*, 309 F.2d 587 (8th Cir. 1962); and *Gallun v. Commissioner*, 327 F.2d 809 (7th Cir. 1964). The *Advanced Planning Bulletin* also cited authority regarding capitalizing expenditures generally, including Reg. § 1.263(a)-4; *Indopco, Inc. v. Commissioner*, 503 U.S. 79 (1992); and *Federal Express Corp. v. Commissioner*, 412 F.3d 617 (6th Cir. 2005). The *Advanced Planning Bulletin* was also published as Finn, Revenue Rulings 2009-13 & 2009-14 - More on Income Tax Consequences of Surrender and Sale of Life Insurance Policies, *Steve Leimberg's Estate Planning Email Newsletter* as Archive Message #1493 (7/23/2009). Newsletters #1457 (Zaritsky), 1459 (Mancini and Brody), and 1462 (Blattmachr and Gans) also discus Rev. Ruls. 2009-13 and 2009-14. If a life insurance company demutualizes, none of the policy's basis is allocated to the stock that policyholders receive. *Dorrance v. U.S.*, 807 F.3d 1210 (9th Cir. 2015).

3147 Rev. Rul. 2009-13, Situation 1.

3148 See parts II.Q.4.i Life Insurance LLC, II.M.3 Buying into or Forming a Partnership, and II.Q.8 Exiting From or Dividing a Partnership.

3149 Code § 101(a)(1).

3150 Reg. § 1.72-2(b)(1)(i) provides:

> In general, the amounts to which section 72 applies are any amounts received under the contracts described in paragraph (a)(1) of this section. However, if such amounts are specifically excluded from gross income under other provisions of chapter 1 of the Code, section 72 shall not apply for the purpose of including such amounts in gross income. For example, section 72 does not apply to amounts received under a life insurance contract if such amounts are paid by reason of the death of the insured and are excludable from gross income under section 101(a). See also sections 101(d), relating to proceeds of life insurance paid at a date later than death, and 104(a)(4), relating to compensation for injuries or sickness.

3151 Code §§ 72(e)(1), 72(e)(2)(B)(ii).

3152 Code § 72(e)(4)(B).

3153 Code § 72(e)(4)(A) includes various exceptions.

3154 Code § 72(e)(4)(A) includes various exceptions.

3155 Code § 72(e)(10), using the definition of modified endowment contract in Code § 7702A.

Any distributions in excess of "investment in the contract" constitute ordinary income.[3156] However, Code § 1234A might be used to argue that income on surrender should be all capital gain.[3157]

"Investment in the contract":[3158]

as of any date is-

(A) the aggregate amount of premiums or other consideration paid for the contract before such date, minus

(B) the aggregate amount received under the contract before such date, to the extent that such amount was excludable from gross income under this subtitle or prior income tax laws.

What constitutes "other consideration paid for the contract"? Code § 72(g) tells us what to do when the policy is sold:

(g) **Rules for transferee where transfer was for value**. Where any contract (or any interest therein) is transferred (by assignment or otherwise) for a valuable consideration, to the extent that the contract (or interest therein) does not, in the hands of the transferee, have a basis which is determined by reference to the basis in the hands of the transferor, then—

(1) for purposes of this section, only the actual value of such consideration, plus the amount of the premiums and other consideration paid by the transferee after the transfer, shall be taken into account in computing the aggregate amount of the premiums or other consideration paid for the contract;

(2) for purposes of subsection (c)(1)(B), there shall be taken into account only the aggregate amount received under the contract by the transferee before the annuity starting date, to the extent that such amount was excludable from gross income under this subtitle or prior income tax laws; and

(3) the annuity starting date is January 1, 1954, or the first day of the first period for which the transferee received an amount under the contract as an annuity, whichever is the later.

For purposes of this subsection, the term "transferee" includes a beneficiary of, or the estate of, the transferee.

[3156] Code § 72(e)(2).
[3157] At the 2015 Heckerling Institute, Larry Brody reported having settled a Tax Court case on this basis. See part II.G.6 Abandoning an Asset to Obtain Ordinary Loss Instead of Capital Loss; Code § 1234A. Rev. Rul. 2009-13 asserted, without explanation, that Code § 1234A does not apply to a surrender.
[3158] Code § 72(e)(6).

Code § 72(g)(2) does not apply, because our income is based on Code § 72(e)(6), not Code § 72(c)(1)(B).

Consider the following potential abuse:

1. Policy owner sells the policy and receives capital gain treatment.

2. Buyer receives a new "investment in the contract" under Code § 72(g).

3. Buyer cashes in the policy, tax-free.

Given that the buyer has no risk, a policy owner could easily find a straw man to help the policy owner cash in the policy and receive capital gain treatment, avoiding the ordinary income treatment provided by Code § 72(e)(1). Rev. Rul. 2009-13, Situation 2,[3159] prevents this potential abuse.

Thus, if one sells a policy in a taxable transaction:

1. If and to the extent one has gain, the first tier of this gain is ordinary income.[3160]

2. All of the gain on the sale translates into increased "investment in the contract" against which distributions can be taken tax-free.

3. Be careful to fit within an exception to the transfer for value rules[3161] if the buyer expects to receive death benefit in excess of investment in the contract.

II.Q.4.e. Income Tax Issues When the Owner Who Is Not the Insured Dies

Generally, property an individual owns (including indirectly through a partnership[3162]) receives a new tax basis when that individual dies if that property is included in that individual's estate for estate tax purposes.[3163]

The discussion below focuses on if and the extent to which a life insurance might not get a basis adjustment on the death of an owner who is not insured and then explores practical issues in implementing any basis adjustment that is available.

II.Q.4.e.i. Life Insurance Basis Adjustment On the Death of an Owner Who Is Not the Insured

However, "annuities described in section 72" do not receive a new basis.[3164] Although Code § 72 governs distributions from life insurance companies to policy owners, this provision appears to be aimed at annuity contracts and not life insurance contracts.

[3159] See fn. 3144.
[3160] See text accompanying fn. 3144.
[3161] Code § 101(a)(2).
[3162] Generally, the partnership need to have a Code § 754 election in place for the partnership's taxable year in which the individual dies or in certain situations when that person's interest in the partnership is later transferred. See part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations.
[3163] Code § 1014, which applies to more than just what this sentence describes.

Of greater concern is whether the internal build-up in a cash value life insurance contract constitutes "income in respect of a decedent" (IRD) ineligible for a basis adjustment.[3165] Regulations provide:[3166]

> **General definition.** In general, the term "income in respect of a decedent" refers to those amounts to which a decedent was entitled as gross income but which were not properly includible in computing his taxable income for the taxable year ending with the date of his death or for a previous taxable year under the method of accounting employed by the decedent. See the regulations under section 451. Thus, the term includes-
>
> (1) All accrued income of a decedent who reported his income by use of the cash receipts and disbursements method;
>
> (2) Income accrued solely by reason of the decedent's death in case of a decedent who reports his income by use of an accrual method of accounting; and
>
> (3) Income to which the decedent had a contingent claim at the time of his death.

Income is "accrued" when "all the events have occurred which fix the right to receive such income and the amount thereof can be determined with reasonable accuracy."[3167]

IRD does not include "items which are excluded from gross income under subtitle A."[3168]

When the owner who is not the insured dies, we do not know whether the policy's value in excess of "investment in the contract" (such excess, the "inside build-up") is going to be includible in income (if taken out before the insured dies)[3169] or excluded from income (if received as a nontaxable death benefit).[3170] In other words, it is not true that "all the events have occurred which fix the right to receive such income and the amount thereof can be determined with reasonable accuracy." Therefore, the inside build-up has not "accrued" upon that owner's death and cannot constitute IRD.

This analysis is consistent with a test the Tax Court formulated for determining whether proceeds from a sale contract are IRD. The test considers:[3171]

> (1) whether the decedent entered into a legally significant arrangement regarding the subject matter of the sale,[5]

[3164] Code § 1014(b)(9); Reg. § 1.1014-2(b)(3)(i).
[3165] Code § 1014(c).
[3166] Reg. § 1.691(a)-1(b).

[3171] *Estate of Peterson v. Commissioner*, 667 F.2d 675 (8th Cir. 1981), summarizing the Tax Court's holding.

(2) whether the decedent performed the substantive (nonministerial) acts required as preconditions to the sale,[6]

(3) whether there existed at the time of the decedent's death any economically material contingencies which might have disrupted the sale,[7] and

(4) whether the decedent would have eventually received the sale proceeds if he or she had lived.[8]

74 T.C. at 639-41.

[5] As noted by the Tax Court, "[t]his arrangement may take a variety of forms: an express executory contract of sale [as in *Trust Co. v. Ross*, *supra*, 392 F.2d 694]; an implied contract for sale [A delivers apples to Y, Y accepts the apples, A dies before Y can pay for them]; or a contractual arrangement with a cooperative marketing association [as in *Commissioner v. Linde*, *supra*, 213 F.2d 1 (no contract or sale, just delivery of grapes to marketing cooperative; proceeds held income in respect of a decedent when received)]." *Estate of Peterson v. Commissioner*, 74 T.C. 630, 639 (1980) (parentheticals substituted and expanded). *See also Halliday v. United States*, 655 F.2d 68, 72 (5th Cir. 1981) (the right to income need not be legally enforceable).

[6] "One indicium of whether a decedent has performed the applicable substantive acts is whether he has delivered, or somehow placed, the subject matter of the sale beyond his control prior to his death." *Estate of Peterson v. Commissioner*, *supra*, 74 T.C. at 640. *Compare* M. Ferguson, J. Freeland & R. Stephens, *Federal Income Taxation of Estates and Beneficiaries*, *supra*, 180-84 ("[E]vend where the property has been made the subject of a binding, executory contract of sale, if the benefits and hazards of ownership are still possessed by the decedent at his death, the property is entitled to a § 1014(a) basis in the hands of his estate, and his negotiated profit will not be taxed to his estate (or to anyone) under § 691 when the sale is completed after his death.") (footnote omitted), with Gordon, Income in Respect of a Decedent and Sales Transactions, 1961 *Wash. U.L.Q.* 30, 37 (§ 691 should apply to sale proceeds from sales which at the time of the decedent's death are incomplete "only as to delivery of the *res* and receipt of the purchase price").

[7] *Cf. Keck v. Commissioner*, *supra* 415 F.2d at 534 (sale of stock was contingent upon Interstate Commerce Commission approval; proceeds held not income in respect of decedent where ICC approval not granted at time of the decedent's death).

[8] *See* 26 C.F.R. § 1.691(a)-2(b) (Ex. 4) (buy-sell agreement effective at date of death; proceeds not income in respect of a decedent because the decedent could not have received the proceeds if he had lived).

The Tax Court in that case held:[3172]

> Although three of the four requirements tend to support a conclusion opposite to the one reached, all four elements are necessary to support a finding that the decedent possessed a right to the sale proceeds as of his date of death. [fn. omitted] Accordingly, the absence of one of these requirements precludes the applicability of section 691.

In analyzing the requirement that was missing, the Tax Court said:[3173]

> The fourth requirement is that the decedent, himself, would have eventually received (actually or constructively) the sale proceeds if he had lived. This situation may be best exemplified by a typical date-of-death buy-sell agreement between a decedent and his corporation; since, by its terms, the sale is only effective upon the decedent's death, the decedent could not have received the sale proceeds if he had lived. Therefore, the proceeds from such a sale are not income in respect of a decedent.

Applying the Tax Court's fourth requirement to the insurance policy analysis, would the decedent have received taxable income from the policy if the decedent/policy owner had lived? The answer is not necessarily – if the insured died while the policy owner was living, the policy owner would have received a tax-free death benefit. The answer would be different if the policy owner had submitted the appropriate forms to cash out the policy before the policy owner died and the insurance company simply had not cut the check before the policy owner died. Thus, if the policy owner has not, before the policy owner's death, submitted whatever documentation is required to cash in the policy, then the events fixing the policy's tax consequences have not occurred before the policy owner's death and the internal cash build-up obtains a basis step-up because it does not constitute IRD.

Insurance companies remain concerned because they view the inside build-up as vested untaxed earnings. Although this argument seems untenable for contracts whose cash value might later decrease, for fully paid whole-life they understandably view it as absolute earnings that will never decrease. Rev. Rul. 2009-13 takes the position that, on the sale of a life insurance contract, the gain on sale is ordinary income to the extent that it does not exceed the inside build-up.[3174] The substitute-for-income doctrine, under which the IRS states that the asset is not a capital asset to the extent that the doctrine applies, makes them view the inside build-up as IRD. What they do not take into account is that assets that generate ordinary income on sale, such as inventory (which is not a capital asset),[3175] do not constitute IRD unless actually sold before death; an

---

[3172] 74 T.C. at 643-44.

[3173] 74 T.C. at 641. In a case involving a similar issue, farm inputs deducted on the decedent's final returns received a basis step-up at death and could be deducted by his widow on her return, even though their expected use was obvious. See fn. 1385.

[3174] See fn. 3144.

[3175] Code § 1221(a)(1) provides:

> For purposes of this subtitle, the term capital asset means property held by the taxpayer (whether or not connected with his trade or business), but does not include … stock in trade of the taxpayer or other property of a kind which would properly be included in the inventory of the taxpayer if on hand at the close of the taxable year, or property held by

asset's character as an ordinary income asset has nothing to do with IRD characterization unless the income is "accrued"[3176] or is a specified class of assets subject to IRD, neither of which applies to a life insurance contract. If and to the extent that a policy might not constitute a capital asset, that classification is irrelevant, because the Code § 1014 basis step-up rules apply to more than just capital assets.[3177] Furthermore, Rev. Rul. 2009-13 does not say that inside build-up creates gain; it merely says that inside build-up recharacterizes part or all of the gain on sale of the policy as ordinary income.

Thus, although the potential ordinary income taxation of inside build-up might make one inclined to view it as IRD, that view has no basis in the law, although I found one probably irrelevant and unsound source that the IRS might try to seize upon in the event of an audit.[3178]

> the taxpayer primarily for sale to customers in the ordinary course of his trade or business.

Note that real estate might or might not constitute inventory. See part II.G.12 Future Development of Real Estate, especially fn. 1042.

[3176] Rev. Rul. 58-436. However, crop shares or livestock received as rent by a decedent, who had employed the cash method of accounting, before the decedent's death, and owned by the decedent at the time of the decedent's death, as well as crop shares or livestock which the decedent had a right to receive as rent at the time of the decedent's death for economic activities occurring before the decedent's death, constitute income in respect of a decedent which is required to be included in gross income, for Federal income tax purposes, in the year in which the crop shares or livestock are sold, or otherwise disposed of. Rev. Rul. 64-289. *Friedman v. Commissioner*, 41 T.C. 428 (1965), *aff'd* 346 F.2d 506 (6th Cir. 1965) and Rev. Rul. 69-102 were disturbed when a taxpayer sought a charitable deduction for the full value of life insurance policies and therefore taxed the taxpayer on ordinary income on the policies' inside build-up based on a combination of the assignment-of-income principle and the taxpayers realizing a benefit (charitable deduction) for that income; Code § 170(e) and Reg. § 1.170A-4(a) address this issue by not permitting a deduction on the portion of the policy that would constitute ordinary income if the policy were sold, so presumably these authorities are obsolete in light of Rev. Rul. 2009-13. Rev. Rul. 69-102 involved an endowment policy, which typically provides for a payout of the accrued income on a specified maturity date, so before the gift all events had occurred that would require the payout of the inside build-up. Once a policy has been annuitized, an assignment triggers the assignment of income doctrine, *Jones v U.S.*, 395 F.2d 938 (6th Cir. 1968), but that should not apply to a policy passing by reason of death to the extent that the policy had not been annuitized.

[3177] For example, nobody has ever suggested that a depreciable building used in a business is not eligible for a new basis under Code § 1014, even though Code § 1221(a)(2) provides that such a building is not a capital asset. See*, e.g.*, Reg. §§ 1.1245-2(c)(1)(iv) and 1.1250-3(b)(2)(i), providing that Code § 1014 can wipe out depreciation recapture when such property is included in the deceased owner's estate. See also the quotes from the U.S. Supreme Court and Tax Court in fn. 1385, found in part II.H.2.e IRD Assets Not Eligible for a Basis Step-Up.

[3178] Rev. Rul. 75-125 (which the Rev. Rul. 92-47 cited as being good law) took the position that stock, which has net unrealized appreciation (NUA) that was not taxed when distributed from a qualified retirement, does not receive a basis step-up at death to the extent of that NUA. This ruling preceded *Peterson* (fn. 3171), and I believe it is simply wrong in light of *Peterson*, because there is no assurance that the gain will ever be realized, and the ruling did not cite any particular support in reaching the conclusion it did. It is also philosophically inconsistent with the IRS' failure to assert assignment of income principles or otherwise impose any taint when NUA

II.Q.4.e.ii. Practical Issues In Implementing Any Basis Adjustment On the Death of an Owner Who Is Not the Insured

The only direct immediate practical use of a stepped-up basis is avoiding gain on sale. After all, the death benefit is tax-free if one avoids the transfer for value rules (see part II.Q.4.a Funding the Buy-Sell). The remaining big question is any effect on distributions of inside build-up, the taxation of which depends on the "investment in the contract" under Code § 72(g).

The estate of the decedent who is not the insured does not appear to receive a new "investment in the contract" because the contract was not transferred to it "for a valuable consideration." However, if that estate later sold the policy for full value to a different taxpayer:

- The estate would have a stepped-up basis.
- The transferee would have a new "investment in the contract."
- The transferee would need to make sure that the "transfer for value" rules[3179] do not make the death benefit taxable.[3180]

Before buying a cash value policy to be includible in the estate of a person who is not the insured or that might be transferred in a taxable sale (perhaps one that avoids the transfer for value rules), consider asking the insurance company its procedures in this area. Results from that inquiry include the following:

- "We never undertake to make a Code § 72(g) adjustment, because we don't want to be bothered with it." If the insurance company answers that way, ask whether they will honor a request to check the box "taxable amount not determined" so that the taxpayer is not required to disprove what otherwise would be an incorrect Form 1099.
- "We don't want to undertake to make a Code § 72(g) adjustment, but we will do it if a sale violates the transfer for value rules; in that case, we need to tell the IRS the taxable amount at death, so it is worth it to track this." To obtain that Form 1099 reporting, the policy owner's estate might sell the policy in a transaction that violates the transfer for value rules. One might follow that transfer by a transfer to the insured, which would cleanse the transfer for value taint (perhaps other cleansing opportunities are available as well). For example, Dad owns policy on Daughter's life. Dad dies. Dad's estate sells the policy to Son, violating the transfer for value rules (unless an exception applies) and triggering the insurance company tracking the new "investment in the contract." Then Son sells the policy to Daughter (the insured); this transaction would not generate any gain to the extent of Son's basis

property was given to charitable remainder trusts in Letter Rulings 200038050, 200202078, 200215032, 200302048, and 200335017.

[3179] See part II.Q.4.a Funding the Buy-Sell, especially fns. 3128-3134.

[3180] Nothing in Code § 72(g) or Reg. § 1.72-10 suggests that an exception to the transfer for value rules (other than a substituted basis transaction) would make the contract not transferred for a valuable consideration.

due to his purchase from Dad's estate, and Daughter's purchase cleanses the transfer-for-value taint because she is the insured. However, one might decide that taking all these steps is not worth the effort and simply ask whether the insurance company will honor a request to check the box "taxable amount not determined."

II.Q.4.f. Split-Dollar Arrangements

II.Q.4.f.i. Split-Dollar Generally

A split-dollar arrangement is an arrangement in which one party pays part or all of the premiums and one or more of the economic rights to the policy (cash value, death benefits, etc.) are divided. An employer cannot bundle together a number of such arrangements and call them deductible welfare benefit plans; doing so subjects the employer to penalties.[3181] The IRS has an audit techniques guide on split-dollar arrangements.[3182]

The IRS created split-dollar rules before the U.S. Supreme Court found that interest could be imputed on loans and before Code § 7872 was enacted. During that period, the employer would retain the premiums it paid when the arrangement terminated (whether by death or by unwinding the arrangement – the latter referred to as a "rollout"), and the employee's beneficiary (or employee on rollout) would receive the death benefit (or cash value in the case of a rollout) after reimbursing the premiums paid.[3183] It needed a mechanism to tax long-term interest-free loans, which is what split-dollar was essentially at that time, but without a promissory note. Under that system, the employer was treated as owning the policy and providing taxable economic benefits to the employee each year equal to the value of one year of life insurance protection. This treatment applied whether the employer or employee owned the policy. To avoid estate tax on the death benefit, an irrevocable life insurance trust ("ILIT") would own the policy, so that each year's imputed income to the employee was also a gift to the trust. Eventually, the arrangement would be undone before the employee's death, whether because the annual life insurance protection became too high as the employee got older, because the parties wanted to simplify the arrangement, or termination of employment. Often, the policy's cash value exceeded the premiums paid; and some taxpayers took the position that receipt of the life insurance policy, which had a cash

---

[3181] *Our Country Home Enterprises, Inc. v. Commissioner*, 145 T.C. 1 (2015). This case involved seven taxpayers, and the parties in approximately 40 other cases agreed to be bound by the result of this case. Notice 2007-83 announced that the IRS would target welfare benefit plans funded by life insurance. Notice 2007-84 announced that the IRS would target certain multi-employer welfare benefit plans. Program Manager Technical Advice 2015-11 explains how to apply the 30% accuracy-related penalty under Code § 6662A(c), to taxpayers who didn't follow the requirement of Notice 2007-83 to disclose participation in a listed transaction that used cash value life insurance policies to provide welfare benefits in a purported Code § 419 plan. The IRS successfully penalized Keller Tank Services II, Inc., one of the employers in the *Our Country Home Enterprises* case, for failure to report its participation in the plan as a "listed transaction" on its tax return. *Keller Tank Services II, Inc. v. Commissioner*, 119 A.F.T.R.2d 2017-XXXX (10th Cir. 4/20/2017).

[3182] See http://www.irs.gov/Businesses/Corporations/Split-Dollar-Life-Insurance-Audit-Technique-Guide-(03-2005) and www.irs.gov/businesses/corporations/article/0,id=136548,00.html.

[3183] The reimbursement obligation was nonrecourse – paid only out of the policy and not personally by the employee.

value in excess of the premiums reimbursed to the employer on rollout, was not a taxable event, because the employee (or life insurance trust) already had legal title to the policy. The government was not happy with the taxpayer using the tax fiction of the employer owning the policy before rollout and then ignoring that tax fiction at rollout and responded by promulgating the regulatory regime described below.

Now split-dollar arrangements are governed by Reg. § 1.7872-15, under which premium payments generally are treated as loans[3184] generally requiring an election,[3185] or Reg. § 1.61-22 (the "economic benefit regime"), under which generally one person is treated as owning all of the policy's cash value and the other person pays, or is treated as paying, for one-year term life insurance to the extent of the death benefit not allocated to the owner or deemed owner.

In the economic benefit regime, generally the owner and non-owner receive tax-free death benefits. The owner applies Code § 72 to any distributions that are not death benefits; even a deemed owner is treated as the real owner under Code § 72. See part II.Q.4.f.ii.(b) Treatment of Split-Dollar Arrangement. The other version involves the premium payor being treated as making loans to the policy owner; this requires additional documentation to be filed with the IRS if the loans are the equivalent of nonrecourse loans, the deadline for which is eligible for Code § 9100 relief in appropriate circumstances (see Letter Ruling 201041006, summarizing the deadline as well as the issue and then granting relief).

For the treatment of the economic benefit regime before Reg. § 1.61-22 was promulgated, agreements entered into on or before September 17, 2003 are instead subject to IRS Notices 2001-10 and 2002-8[3186] and Rev. Rul. 2003-105, so long as they

---

[3184] Stated interest that is not payable annually triggers the Code § 1272 original issue discount (OID) rules. See Reg. §§ 1.7872-15(a)(1) (referring to OID rules as potentially applying), 1.1273-1(a) (OID is the excess of a debt instrument's stated redemption price at maturity over its issue price), 1.1273-1(b) (stated redemption price at maturity is the sum of all payments provided by the debt instrument other than qualified stated interest payments), and 1.1273-1(c)(1)(i) (qualified stated interest payments must be made at least annually).

[3185] If and to the extent that a split-dollar loan is repayable solely out of life insurance cash values, part or all of the interest might be considered contingent interest that is disregarded, leading to a below-market loan. Reg. § 1.7872-15(d), (j). To avoid that consequence, one might consider making a Reg. § 1.7872-15(d)(2) election when the first loan is made under the split-dollar agreement. In appropriate circumstances, Code §9100 relief might extend the deadline for filing the election; see, *e.g.*, Letter Ruling 201041006 and other rulings.

[3186] Notice 2002-8 discusses the extent to which changes in the IRS' view might affect arrangements then in effect:

> **VI. Effect On Other Documents**
>
> Notice 2001-10 is revoked. Notwithstanding that revocation, Rev. Rul. 55-747 remains revoked, and Rev. Rul. 64-328, 1964-2 C.B. 11, and Rev. Rul. 66-110 remain modified to the extent that those rulings indicate that an employer's premium payments under a split-dollar life insurance arrangement may not be treated as loans.
>
> Except for Part III (Revised Standards for Valuing Current Life Insurance Protection), no inference should be drawn from this notice regarding the appropriate Federal income, employment and gift tax treatment of split-dollar life insurance arrangements entered into before the date of publication of final regulations. However, taxpayers may rely on this notice (including a reasonable application of the rules to be proposed as described in

are not "materially modified." Reg. § 1.61-22(j) lists some unenlightening safe harbors for what does not constitute a material modification. "Material modification" for this purpose includes changes that would not constitute a material modification under Code § 101(j) (employer-owned life insurance)[3187] or 264(f) (limiting deductions for interest expense allocable to unborrowed policy cash value).[3188]

The economic benefit regime might also trigger the harsh nonqualified deferred compensation rules of Code § 409A.[3189] Although the Code § 409A risk described in fn. 3189 is much smaller under Reg. § 1.61-22 than under prior law, be careful to consider it in either case.[3190]

All split-dollar arrangements require an exit strategy. For the loan regime, somehow the loans must be repaid; however, they do not need to be repaid until the insured's death, so the exit strategy might be easy. For the economic benefit regime, the deemed term portion becomes prohibitively expensive when the insured reaches a certain age, and it is not unusual for the parties not to have planned for how the non-owner obtains ownership for tax purposes (even though they should have).

The loan regime can be somewhat unwieldy, in that each year's premium requires a separate loan. Furthermore, the economic benefit regime tends to be most beneficial to the non-owner in the policy's early years, in which the premiums paid tend to exceed the policy's cash value. Considering these issues, one might consider starting with the economic benefit regime and the switching to the loan regime when cash value approaches premium paid. This switching approach avoids administering and accruing interest on multiple loans in the policy's early years and allow cash value increases after that point to benefit the party that originally was the non-owner. By the time the switch occurs, the policy might very well be earning enough dividends to pay premiums, perhaps avoiding the need to administer multiple loans to pay for those future premiums.

> Part II) or Notice 2001-10 for split-dollar life insurance arrangements entered into before the date of publication of final regulations.

I am aware of a taxpayer who took the position of no income or gift on rollout, filed Form 8275, received a brief question from the IRS, and then heard nothing before the statute of limitations passed. See Thompson Coburn doc. 6348842 (email from an outside lawyer to that effect).

[3187] See part II.Q.4.g Income Tax Trap for Business-Owned Life Insurance, especially part II.Q.4.g.i Analysis of Code § 101(j).

[3188] Notice 2008-42.

[3189] See text accompanying fns. 3109-3110.

[3190] Reg. § 1.409A-1(b)(1) provides:

> A legally binding right to an amount that will be excluded from income when and if received does not constitute a deferral of compensation, unless the service provider has received the right in exchange for, or has the right to exchange the right for, an amount that will be includible in income….

Generally, for post-2003 split-dollar agreements, the employee will have to pay for the policy's value under part II.Q.4.f.ii.(b) Treatment of Split-Dollar Arrangement under Reg. § 1.61-22; however, one might want to clarify that the employee will need to pay the greater of the amount provided under the regulations or the policy's fair market value, which as a practical matter would likely to be the value on Form 712. For pre-2003 agreements that are not materially modified, the employee paying the cash surrender value would suffice; see fn. 3122. Given that these older arrangements might not require the employee to pay the cash surrender value, one should look to Notice 2007-34 to try to make the policy qualify for being grandfathered from Reg. § 1.61-22 and comply with Code § 409A.

If the original non-owner is an irrevocable trust, during the economic benefit phase (and of course later) the grantor can make annual exclusion gifts to the trust and perhaps even use leveraged estate planning techniques[3191] to grow the trust so that the trust can afford to pay future premiums and perhaps even retire the split-dollar loans.

II.Q.4.f.ii. Technical Details of the Split-Dollar Economic Benefit Regime

II.Q.4.f.ii.(a). Is the Arrangement a Split-Dollar Arrangement?

Generally, in the split-dollar economic benefit regime, the idea is give only pure term protection to the "non-owner" and all other right to the actual or deemed "owner."

Reg. § 1.61-22(b)(1) provides:

> *In general*. A split-dollar life insurance arrangement is any arrangement between an owner and a non-owner of a life insurance contract that satisfies the following criteria-
>
> (i) Either party to the arrangement pays, directly or indirectly, all or any portion of the premiums on the life insurance contract, including a payment by means of a loan to the other party that is secured by the life insurance contract;
>
> (ii) At least one of the parties to the arrangement paying premiums under paragraph (b)(1)(i) of this section is entitled to recover (either conditionally or unconditionally) all or any portion of those premiums and such recovery is to be made from, or is secured by, the proceeds of the life insurance contract; and
>
> (iii) The arrangement is not part of a group-term life insurance plan described in section 79 unless the group-term life insurance plan provides permanent benefits to employees (as defined in § 1.79-0).

Even if the above requirements are not met, any arrangement between an owner and a non-owner of a life insurance contract is treated as a split-dollar life insurance arrangement if it qualifies as a certain compensatory arrangement or shareholder arrangement.[3192]

The following constitutes a split-dollar compensatory arrangement:[3193]

> (A) The arrangement is entered into in connection with the performance of services and is not part of a group-term life insurance plan described in section 79;[3194]

[3191] See part III.B.2.b General Description of GRAT vs. Sale to Irrevocable Grantor Trust.
[3192] Reg. § 1.61-22(b)(2)(i).
[3193] Reg. § 1.61-22(b)(2)(ii).
[3194] *Our Country Home Enterprises, Inc. v. Commissioner*, 145 T.C. No. 1 (2015), discussed this requirement in depth, including the requirement of Reg. § 1.79-1(a)(4) that a group term arrangement not involve individual selection:

(B) The employer or service recipient pays, directly or indirectly, all or any portion of the premiums; and

(C) Either-

(1) The beneficiary of all or any portion of the death benefit is designated by the employee or service provider or is any person whom the employee or service provider would reasonably be expected to designate as the beneficiary; or[3195]

> Guardian and Minnesota Life required that the Our Country and Environmental shareholder/employees tender information on their health, traveling tendencies, and/or driving traits. The need to submit that type of personal information as a condition to receiving the insurance strongly suggests, and we find, that the insurers were exercising underwriting judgment with respect to at least the Our Country and Environmental shareholder/employees in connection with the issuance of the life insurance related to them. This finding is further strengthened by the fact that, in the case of Guardian at least, Guardian specifically rated each of Our Country's participating employees for purposes of setting the premiums payable on their policies and offered to try to find a way to reduce the premium attributable to the Blake policy. The mere fact that an insurer such as Guardian or Minnesota Life may add up the premiums that apply to separate policies that it sells on a specific group of insureds and then tender the total as the amount due on a group policy does not necessarily recharacterize the separate policies as part of a single group term life insurance plan. Instead, as we have stated, the exercise of underwriting judgment with respect to the specific persons in a group is indicative of the issuance of individual insurance policies rather than group policies. We hold that the insurance policies at hand are not group term life insurance policies for Federal income tax purposes.

In contrast, if a group-term policy allows employees to buy additional pure term insurance on an after-tax basis without any such purchases affecting the employer-provided group plan, the employees' independent choices do not affect the employer-provided group plan's qualification as such. Letter Ruling 201542003.

[3195] *Our Country Home Enterprises, Inc. v. Commissioner*, 145 T.C. No. 1 (2015), discussed this requirement in depth:

> The shareholder/employees named the beneficiaries of the death benefits payable under their insurance policies by designating through the Sterling Plan the individuals who would receive the death benefits under the plan, which, in turn were the death benefits under the policy. In addition, those shareholder/employees were assured that their designated beneficiaries would receive any death benefits payable on those policies to the extent that the shareholder/employees died while participants in the plan. Petitioners seek a contrary holding essentially by looking at the life insurance policies through the wider end of a telescope towards its narrower end and seeing that the Sterling Plan is named as the beneficiary on the policies. They conclude from this view that none of the individuals who the participating employees designate to receive the death benefits payable by the Sterling Plan is [t]he beneficiary of all or any portion on the death benefit for purposes of section 1.61-22(b)(2)(ii)(C), Income Tax Regs. We, on the other hand, look telescopically at the life insurance benefit from the narrower end towards the wider end, as one commonly does, and see the ultimate recipient of the death proceeds as the person designated by the shareholder/employees. The fact that the death proceeds from the life insurance policies are funneled through the Sterling Plan to each of the ultimate recipients does not blur our view (or our conclusion) that each of those recipients is the beneficiary of the death benefit for purposes of section 1.61-22(b)(2)(ii)(C), Income Tax Regs. *Cf. Commissioner v. Court Holding Co.*, 324 U.S. 331, 334 (1945) (To permit the

(2) The employee or service provider has any interest in the policy cash value of the life insurance contract.[3196]

The following constitutes a split-dollar shareholder arrangement:[3197]

(A) The arrangement is entered into between a corporation and another person in that person's capacity as a shareholder in the corporation;

(B) The corporation pays, directly or indirectly, all or any portion of the premiums; and

(C) Either-

---

true nature of a transaction to be disguised by mere formalisms *** would seriously impair the effective administration of the tax policies of Congress.); *Minn. Tea Co. v. Helvering*, 302 U.S. 609, 613 (1938) (A given result at the end of a straight path is not made a different result because reached by following a devious path.). The light at the end of the tunnel brightly illuminates our conclusion, given that the Sterling Plan would pay no death benefit were it not for the life insurance policies, and the employee to whom a policy relates, rather than the Sterling Plan, is assured of receiving the entire amount that is payable under the terms of the policy.

[3196] *Our Country Home Enterprises, Inc. v. Commissioner*, 145 T.C. No. 1 (2015), discussed this requirement in depth:

> We also conclude that the shareholder/employees of Our Country and Environmental had interests in the their life insurance policies and the cash values thereof. This conclusion is supported by at least five facts. First, each life insurance policy and any funds related thereto were intended to be received by the corresponding employee or his or her designee(s) and no one else, and those employees were the only ones who had the right to receive or otherwise to redirect to someone else the cash value of the life insurance policies related to them. Second, the employees could elect to receive their policies upon retiring from employment with the employer. Third, the funds in the Sterling Plan could not be accessed by either the employer or by the employer's creditors, and Our Country and the Environmental employees, upon retiring or alternatively upon their employers' ceasing participation in the Sterling Plan, were certain to get those funds in the form of the policies that then passed to the employees. Fourth, a participating employee, before actually receiving the funds in his or her account, could be allowed to direct the investment of those funds and thus enjoy the benefit of any investment gain or suffer the detriment of any investment loss. Fifth, if the participating employee were to die while his or her insurance policy was in force, then the death benefit under that policy would ultimately be paid to his or her beneficiary in accordance with the terms of the policy.
>
> We also find important to our just-stated conclusion that the plan benefits were set to be fully vested either when a shareholder/employee satisfied the vesting requirements that he or she chose (or possibly could choose) in the name of the employer or when the employer terminated the plan. And as to vesting, the shareholder/employees were not necessarily bound by the vesting requirements that were initially set in their plans. Instead, at their whim they could accelerate or otherwise change the vesting requirements to their preference. In the case of Mr. Blake, for example, he executed an adoption agreement on July 30, 2006, retroactive to January 1, 2005, that lowered the normal retirement age for the employee participants in the Our Country plan and accelerated his complete vesting to the then-present time.

[3197] Reg. § 1.61-22(b)(2)(iii).

(1) The beneficiary of all or any portion of the death benefit is designated by the shareholder or is any person whom the shareholder would reasonably be expected to designate as the beneficiary; or

(2) The shareholder has any interest in the policy cash value of the life insurance contract.

II.Q.4.f.ii.(b). Treatment of Split-Dollar Arrangement under Reg. § 1.61-22

The rules below apply for purposes of the income tax, the gift tax, the Federal Insurance Contributions Act (FICA), the Federal Unemployment Tax Act (FUTA), the Railroad Retirement Tax Act (RRTA), and the Self-Employment Contributions Act of 1954 (SECA).[3198] Generally, the split-dollar economic benefit regime[3199] applies to any arrangement that is not subject to the split-dollar loan regime.[3200] It also applies to a loan arrangement if the following requirements of Reg. § 1.61-22(b)(3)(ii) apply:

(A) The arrangement is entered into in connection with the performance of services, and the employer or service recipient is the owner of the life insurance contract (or is treated as the owner of the contract under paragraph (c)(1)(ii)(A)(1) of this section); or

(B) The arrangement is entered into between a donor and a donee (for example, a life insurance trust) and the donor is the owner of the life insurance contract (or is treated as the owner of the contract under paragraph (c)(1)(ii)(A)(2) of this section).

Generally, "[w]ith respect to a life insurance contract, the person named as the policy owner of such contract generally is the owner of such contract.[3201]

However:[3202]

(1) An employer or service recipient is treated as the owner of a life insurance contract under a split-dollar life insurance arrangement that is entered into in connection with the performance of services if, at all times, the only economic benefit that will be provided under the arrangement is current life insurance protection as described in paragraph (d)(3) of this section; and

---

[3198] Reg. § 1.61-22(a)(1) provides the purposes.
[3199] The regulatory framework for the split-dollar economic benefit regime is valid. *Our Country Home Enterprises, Inc. v. Commissioner*, 145 T.C. No. 1 (2015).
[3200] Reg. § 1.61-22(b)(3)(i).
[3201] Reg. § 1.61-22(c)(1)(i), which further provides:

> If two or more persons are named as policy owners of a life insurance contract and each person has, at all times, all the incidents of ownership with respect to an undivided interest in the contract, each person is treated as the owner of a separate contract to the extent of such person's undivided interest. If two or more persons are named as policy owners of a life insurance contract but each person does not have, at all times, all the incidents of ownership with respect to an undivided interest in the contract, the person who is the first-named policy owner is treated as the owner of the entire contract.

[3202] Reg. § 1.61-22(c)(1)(ii)(A).

(2) A donor is treated as the owner of a life insurance contract under a split-dollar life insurance arrangement that is entered into between a donor and a donee (for example, a life insurance trust) if, at all times, the only economic benefit that will be provided under the arrangement is current life insurance protection as described in paragraph (d)(3) of this section.

Note that (1) above does not prevent an employee from setting up an endorsement arrangement with the employer, in which the employee owns the policy (including cash surrender value) and pays the premiums and the employer pays for some current life insurance protection. In such an arrangement, the employee's interest in the cash value means that current life insurance protection is not the employee's only interest in the policy; therefore, the employee's being named as the policy owner also makes the employee the owner for tax purposes.

Similarly, in a donor-donee economic split-dollar agreement, if the donee is designated the owner of the life insurance policy, then the donee will be treated as the owner for tax purposes if the donee has any interest other than current life insurance protection. Although the donee having actual ownership of the policy would seem risky for this reason, such an arrangement might save estate tax if the donor is not the insured, as described in part II.Q.4.f.iii Estate Tax Consequences of Split-Dollar Agreements.[3203]

For these purposes:[3204]

> the amount of the current life insurance protection provided to the non-owner for a taxable year (or any portion thereof in the case of the first year or the last year of the arrangement) equals the excess of the death benefit of the life insurance contract (including paid-up additions thereto) over the total amount payable to the owner (including any outstanding policy loans that offset amounts otherwise payable to the owner) under the split-dollar life insurance arrangement, less the portion of the policy cash value actually taken into account under paragraph (d)(1) of this section or paid for by the non-owner under paragraph (d)(1) of this section for the current taxable year or any prior taxable year.

In applying these rules, the "non-owner (and the owner for gift and employment tax purposes) must take into account the full value of all economic benefits …, reduced by the consideration paid directly or indirectly by the non-owner to the owner for those economic benefits."[3205]

[3203] Especially fns. 3214-3216.

[3204] Reg. § 1.61-22(d)(3)(i).

[3205] Reg. § 1.61-22(d)(1). Furthermore:

> Depending on the relationship between the owner and the non-owner, the economic benefits may constitute a payment of compensation, a distribution under section 301, a contribution to capital, a gift, or a transfer having a different tax character. Further, depending on the relationship between or among a non-owner and one or more other persons (including a non-owner or non-owners), the economic benefits may be treated as provided from the owner to the non-owner and as separately provided from the non-owner to such other person or persons (for example, as a payment of compensation from an employer to an employee and as a gift from the employee to the employee's child).

The requirement that the non-owner receive only current life insurance protection means that the non-owner cannot have any other economic benefits, such as current or future access to cash value.[3206] Policy cash value excludes surrender charges or other similar charges or reductions and includes policy cash value attributable to paid-up additions.[3207] A non-owner has current access to that portion of the policy cash value (A) to which the non-owner has a current or future right and (B) that currently is directly or indirectly accessible by the non-owner, inaccessible to the owner, or inaccessible to the owner's general creditors.[3208] Note that the policy's being inaccessible to the owner is not enough to attribute cash value to the non-owner; the non-owner must also have a current or future right to the cash value.[3209]

See text accompanying fn. 3206 for the economic benefits described in this regulation.

[3206] Reg. § 1.61-22(d)(2) provides:

> *Value of economic benefits*. The value of the economic benefits provided to a non-owner for a taxable year under the arrangement equals—
>
> (i) The cost of current life insurance protection provided to the non-owner as determined under paragraph (d)(3) of this section;
>
> (ii) The amount of policy cash value to which the non-owner has current access within the meaning of paragraph (d)(4)(ii) of this section (to the extent that such amount was not actually taken into account for a prior taxable year); and
>
> (iii) The value of any economic benefits not described in paragraph (d)(2)(i) or (ii) of this section provided to the non-owner (to the extent not actually taken into account for a prior taxable year).

[3207] Reg. § 1.61-22(d)(4)(i).

[3208] Reg. § 1.61-22(d)(4)(ii).

[3209] See fns. 3214-3216, in which the cash value seemed to be as inaccessible to the donor as it could possibly be, and the court dismissed out-of-hand arguments about inaccessibility because the non-owner had no current or future right to any part of the cash value. The split-dollar agreement provided:

> **Section 2.01. Policy Ownership.**
>
> (a) The Trust be the sole and absolute owner of the Policy. and may exercise all ownership rights granted to the owner thereof under the term of the Policy, except as otherwise provided in and limited by this Agreement.
>
> (b) It is the intention of the parties to this Agreement and the purpose of the Collateral Assignment that the Trust shall retain all rights that the Policy grants to the owner thereof, except as otherwise provided in and provided by this Agreement. The sole right of the Donor under this Agreement and under the Collateral Assignment shall be to be repaid the amount due to Donor under this Agreement. Specifically, but without limitation, the Donor shall neither have nor exercise any right as collateral assignee of the Policy that could in any way defeat or impair the Trust's right to receive the Policy Cash Value or the death benefit of the Policy in excess of the total amount due to the Donor under this Agreement. All provisions of this Agreement and of the Collateral Assignment shall be construed so as to carry out such intention and purpose.
>
> **Section 2.02. Dividends.** All dividends declared and paid on the Policy shall be applied as the Trust shall deem appropriate.

Section 6.01 of the split-dollar agreement said that the agreement is to be interpreted such that the only economic benefit is the current life insurance protection. Query whether the IRs and court assumed that this savings clause meant that the dividends could not be paid to the trust – rather that the trust merely had discretion how to apply the dividends to the policy's cash value; I do not recall them addressing the issue. Note that the trust having a right to be receive dividends itself would have violated the Reg. § 1.61-22(c)(1)(ii)(A)(2) rule that the only right to the policy be current life insurance protection and the consequence of violating that rule would have been that the trust would be deemed the owner for gift tax purposes.

Now that we have established that the non-owner receives only the term portion and the owner receives everything else, let's discuss how to treat money received with respect to the subject life insurance contract.

For death benefits (noting that Code § 101(a) exempts death benefits from income taxation except to the extent that the transfer for value rules apply, if at all):[3210]

(i) *Death benefit proceeds to beneficiary (other than the owner)*. Any amount paid to a beneficiary (other than the owner) by reason of the death of the insured is excluded from gross income by such beneficiary under section 101(a) as an amount received under a life insurance contract to the extent such amount is allocable to current life insurance protection provided to the non-owner pursuant to the split-dollar life insurance arrangement, the cost of which was paid by the non-owner, or the value of which the non-owner actually took into account pursuant to paragraph (d)(1) of this section.

Paragraph 2 of the collateral assignment (also not mentioned in the court's opinion) provided as follows:

> 2. It is expressly agreed that the Assignee's interest in the Policy under and by virtue of this Assignment shall be limited to die following specific rights, and no others: (a) the right to be paid the amount due to the Assignee under the Agreement by recovering said amount directly from the Insurer out of the net death proceeds of the Policy; upon the death of the Insured; and (b) the right to be paid the amount due to the Assignee under the Agreement by recovering said amount from the Assignor out of the Policy Cash Value (as defined in the Agreement), in the event the Policy is surrendered or cancelled by the Assignor or m the event the Agreement is terminated during the Insured's lifetime. The Assignee shall have no other rights or powers in and to the Policy as a result of the assignment of the Policy to the Assignee hereunder, and specifically shall not have the right or power to borrow against or obtain loans or advances on the Policy, make withdrawals from the Policy, nor cancel or surrender the Policy.
>
> 3. Except as otherwise provided in this Assignment and the Agreement, the Assignor shall specifically retain all incidents of ownership in and to the Policy, .including, but not limited to: (a) the sole right to cancel or surrender the Policy at any time provided by the terms of the Policy and at such other times as the Insurer may allow; (b) the sole right to collect and receive all distributions or shares of surplus, dividend deposits or additions to the Policy now or hereafter made or apportioned thereto, and to exercise any and all options contained in the Policy with respect thereto; (c) the sole right to exercise all non forfeiture rights permitted by the return of the Policy or allowed by the Insurer and to receive all benefits and advantages derived therefrom; (d) the sole right to designate and change the beneficiary of the Policy (for any amount in excess of the amount to the .Assignee under the Agreement); (e) the sole right to elect any optional mode of settlement permitted by the Policy or allowed by the Insurer; and (c) the sole right to collect directly from the Insurer that portion of the net death proceeds of the Policy in excess of those proceeds payable to the Assignee under the Agreement; *provided, however,* in no event shall the Assignor possess the right or power to receive loans or other advances respecting the Policy from the Insurer or any other lender; *provided, further,* all of the foregoing rights retained by the Assignor in the Policy hereunder shall be subject to the terms and conditions of the Agreement.

I view the collateral assignment as being limited by the split-dollar agreement.

Notwithstanding any of the above possible interpretations, I recommend making it clear that the donee is not entitled to dividends. This particular policy was variable life insurance but paid dividends presumably because it was a mutual insurance company.

[3210] Reg. § 1.61-22(f)(3).

(ii) *Death benefit proceeds to owner as beneficiary*. Any amount paid or payable to an owner in its capacity as a beneficiary by reason of the death of the insured is excluded from gross income of the owner under section 101(a) as an amount received under a life insurance contract to the extent such amount is not allocable to current life insurance protection provided to the non-owner pursuant to the split-dollar life insurance arrangement, the cost of which was paid by the non-owner, or the value of which the non-owner actually took into account pursuant to paragraph (d)(1) of this section.

Except for death benefits:[3211]

> [A]ny amount received under a life insurance contract that is part of a split-dollar life insurance arrangement … is treated, to the extent provided directly or indirectly to a non-owner of the life insurance contract, as though such amount had been paid to the owner of the life insurance contract and then paid by the owner to the non-owner. The amount received is taxable to the owner in accordance with the rules of section 72. The non-owner (and the owner for gift tax and employment tax purposes) must take the amount described in paragraph (e)(3) of this section into account as a payment of compensation, a distribution [from a corporation],[3212] a contribution to capital, a gift, or other transfer depending on the relationship between the owner and the non-owner.

The owner is the only party who is credited with "investment in the contract" under Code § 72(e)(6).[3213]

Reg. § 1.61-22(g) provides rules for unwinding the arrangement so that the non-owner becomes the owner.

II.Q.4.f.iii. Estate Tax Consequences of Split-Dollar Agreements

Note that the split-dollar economic benefit regime regulations do not apply for estate tax purposes. Apparently taking advantage of this gap, *Estate of Morrissette v. Commissioner*[3214] upheld a taxpayer's heavily discounted generational split-dollar

---

[3211] Reg. § 1.61-22(e)(1).

[3212] The actual text refers to Code § 301.

[3213] Reg. § 1.61-22(f)(2)(ii) provides:

> *To owner*. Any premium paid by an owner under a split-dollar life insurance arrangement subject to the rules of paragraphs (d) through (g) of this section is included in the owner's investment in the contract under section 72(e)(6). No premium or amount described in paragraph (d) of this section is deductible by the owner (except as otherwise provided in § 1.83-6(a)(5)). Any amount paid by a non-owner, directly or indirectly, to the owner of the life insurance contract for current life insurance protection or for any other economic benefit under the life insurance contract is included in the owner's gross income and is included in the owner's investment in the life insurance contract for purposes of section 72(e)(6) (but only to the extent not otherwise so included by reason of having been paid by the owner as a premium or other consideration for the contract).

[3214] 146 T.C. 171 (2016). For a complete discussion, see S. Gorin & H. Zaritsky, Tax Court Approves Some Key Issues with Intergenerational Split-Dollar Arrangements, 28 Probate Practice Reporter 1 (June 2016). For a link to various selected documents filed with the Tax Court, including the split dollar agreement and appraisal the IRS viewed as representative of the arrangements, see http://tcinstitute.com/rv/ff002894cb41394cda173f9fe7469759eae604bd. In agreement[3215] when the decedent bequeathed her interest to the other party in the split-dollar arrangement.[3216] In that case, the mother funded life insurance owned by

---

Estate of Cahill v. Commissioner, Tax Court Docket No. 10451-16, a petition filed May 3, 2016 indicates issues relating to valuation, Code §§ 2036, 2038 and 2703, among others – issues that the *Morrissette* court did not discuss; on December 29, 2016, the parties filed memoranda setting forth the issues that they say need to be resolved in the case; see https://www.ustaxcourt.gov/UstcDockInq/DocketDisplay.aspx?DocketNo=16010451. In *Estate of Levine v. Commissioner*, Tax Court docket no. 9345-15, a July 13, 2016 order granted summary judgment to the taxpayer because the parties agreed that *Morrissette* controlled, with the IRS preserving its right to appeal, indicating that it continued to disagree with *Morrissette*.

3215 Under the split-dollar rules, the decedent was the deemed owner of policies on younger insureds. Such an arrangement is referred to as generational because the insured is expected to outlive the decedent by a significant number of years. That the decedent's estate has to wait for many years to collect what it is owed and must also continue to expend funds during that time might cause the value of the decedent's economic rights to be discounted. However, the decedent's estate would benefit from the growth in the policy's cash value and would not bear the mortality charge (except to the extent that the mortality charge exceeded the rates under the IRS' Table 2001 rates), so it is unclear how much the policy should be discounted.

3216 The IRS apparently argued that bequeathing the decedent's split-dollar interest to the other party to the contract made the restrictions illusory. From the opinion:

> Respondent argues that the Dynasty Trusts had a direct or indirect right in the cash values of the insurance policies by virtue of the terms of the 2006 Amendment to the CMM Trust. Under that amendment, the CMM Trust's interest in the cash values of the policies would pass to the Dynasty Trusts or directly to Mrs. Morrissette's sons or their heirs upon her death. However, because the CMM Trust was a revocable trust with respect to Mrs. Morrissette, she retained an absolute right to alter the CMM Trust throughout her lifetime. Accordingly, the Dynasty Trusts did not have a legally enforceable right to the cash values of the policies during the lifetime of the grantor. Furthermore, the split-dollar life insurance arrangements did not require the CMM Trust to distribute the receivables to the Dynasty Trusts. Rather, Mrs. Morrissette retained the right to receipt of the receivables.

The decedent's ability to amend her revocable trust was pure legal fiction, which legal fiction this case takes to the extreme. From the finding of facts:

> [The decedent's sons] Arthur, Donald, and Kenneth petitioned the Circuit Court of Fairfax County, Virginia (Fairfax court) for appointment of a conservator for Mrs. Morrissette's estate and asked the conservator to transfer additional assets to the CMM Trust. On August 18, 2006, the court found Mrs. Morrissette to be permanently incapacitated and appointed Cathleen A. Hatfield, an employee of the Interstate Group, to serve as the conservator. The Fairfax court granted Ms. Hatfield broad authority to act on Mrs. Morrissette's behalf. The conservatorship expired on October 20, 2006.

The conservator did the following during that 2-month period:

1. Established Dynasty Trusts,
2. Amended the revocable trust to authorize entering into the split-dollar agreements and bequeathing the revocable trust's interest in each split-dollar agreement to the other party to the split-dollar agreement, and
3. Entered into a buy-sell agreement requiring the life insurance.

Then, the Dynasty Trusts bought the policies and together with the revocable trust (of which the sons were co-trustees), entered into the split-dollar agreements.

The idea that this arrangement would ever be modified was ludicrous, given that the sons orchestrated this entire transaction for their benefit, using as the conservator an employee of the company that they directly or beneficially owned, to set up a multi-million dollar transaction in a compressed period of time.

The following facts might have helped the estate's case:

irrevocable life insurance trusts ("ILITs") to fund cross purchase buy-sell obligations that her children had to each other. Because the mother had to wait until her children died to receive cash on the split-dollar receivables and the ILITs had full control over the policies, the mother's estate tax return reported that her right to receive the almost $30 million she invested was worth only approximately $7.5 million. Because the split-dollar receivable would have a low basis, repayment would have generated significant income tax; by bequeathing the receivable to the other party the agreement, the mother might have prevented that result.[3217]

Also consider potential estate tax inclusion when the insured also controls an employer that is a party to the split-dollar agreement. Because part of the death benefit is not payable to the employer,[3218] the IRS might argue that the insured has incidents of ownership over the policy that is subjected to the split-dollar arrangement. To avoid such an argument, the split-dollar agreement and any collateral assignments might limit the employer's rights to just those provided in the split-dollar agreement.[3219] Although

- The purchase of the policies was for a legitimate and significant nontax reason [my assumption that the *Bongard* test might have been in the court's mind] – to fund a buy-sell agreement.
- The donor lived 4 years after the arrangement was made.
- The gift tax returns used the IRS' Table 2001 rates instead of any alternative term rates provided by the insurance company.

3217 Presumably the bequest of the receivable or even a note under the loan regime would not generate income tax. Bequeathing a note (other than a note received in an installment sale) does not trigger cancellation of indebtedness income to the debtor; see fn. 5360, found in part III.B.5.a Promissory Notes.

3218 If all of the death benefit is payable to the employer or used for the employer's business purpose, the insurance policy is not included in the insured's estate by reasons of incidents of ownership, although the death benefit might very well affect the employer's value that is included in its deceased owner's estate. See part II.Q.4.a Funding the Buy-Sell, especially fn. 3113.

3219 For example, Letter Ruling 9651017 held:

> Under the split-dollar agreement in the present case, X is expressly prohibited from borrowing against any part of the policy. In addition, the power to change the beneficiary, the power to surrender or cancel the policy, the power to assign the policy or to revoke an assignment, and the power to pledge the policy for a loan or to obtain from the insurer a loan against the surrender value of the policy are vested in the trustee of Trust. Accordingly, we conclude, that X will possess no incidents of ownership in the policy acquired by the Trust. See Rev. Rul. 76-274, 1976-2 C.B. 278, modified by Rev. Rul. 82-145, 1982-2 C.B. 213.

Letter Ruling 9651030 had the same or similar language. Letter Ruling 9511046 elaborated:

> Under the split-dollar agreement in the present case, the corporation will, however, hold no incidents of ownership. The corporation will have no defacto ability to force the trustee to borrow against the policy because the corporation is required to make the necessary premium payments for the duration of the trust. The power to change the beneficiary, the power to surrender or cancel the policy, the power to assign the policy or to revoke an assignment, and the power to pledge the policy for a loan or to obtain from the insurer a loan against the surrender value of the policy are vested in the third party trustee of the irrevocable trust and are not attributable to the corporation. Accordingly, although the surviving spouse will hold control of the corporation for purposes of section 20.2042-1(c)(6), the corporation will hold no incidents of ownership in the second-to-die life insurance policy, and, thus, no incidents of ownership in the policy will be attributable to the surviving spouse.

Letter Ruling 9348009 held:

that approach would work for the split-dollar loan regime, it might not work so well for the economic benefit regime. The economic benefit regime provides that the non-owner is deemed to have current access to that portion of the policy cash value to which the non-owner has a current or future right and that currently is inaccessible to the owner.[3220] In other words, if the employer is generally the deemed owner but cannot access the cash value, the other party to the split-dollar agreement is deemed to benefit from that cash value if the other party has a current or future right to part of the cash value. Thus, the approach suggested in fn. 3219 risks being recharacterized as being owned by the employee (and therefore the employer's premium being considered paid to the employee to the extent not attributable to the employer's retained rights to absolutely control cash value) unless the split-dollar agreement is absolutely tight about the employer being entitled to the full cash value. For those less than absolutely confident that the agreement, when using the economic benefit regime consider making the case that the entire arrangement is for the employer's business purpose – the employer receives the employer's portion of the death benefit, and the balance of the death benefit was provided through reasonable compensation for valuable services that the insured provided to the employer or through sharing the premium. However, *Morrissette*'s approval of a split-dollar policy as being solely owned by the premium payer (other than current life insurance protection) will boost the confidence of practitioners regarding the ability to draft agreements without risking the named owner being treated as the owner for income and gift tax purposes; see fn. 3214.

For donor-donee arrangements on the life of the insured, naming the donor as owner is not available. If the donor is the insured, one must draw up an absolutely tightly woven split-dollar agreement preventing the donor from having incidents of ownership, if using the economic regime (as in fn. 3214); those who are risk averse should use the loan regime. If the donor is not the insured, preventing the donor from having incidents of ownership is not important; one can then either name the donor as owner to take a conservative approach or, using a tightly woven split-dollar to try to secure valuation discounts,[3221] name the donee as the owner.

Lee Slavutin suggests the following guidelines for drafting generational split dollar agreements:[3222]

1. Clearly state that the purpose of the split dollar agreement is to "fund a permanent life insurance policy for estate liquidity or business succession, for example."

> The facts in this case indicate that the Company's economic interest in the policy is limited to that of irrevocably designated beneficiary of that portion of the proceeds that is equal to the cash surrender of the policy. Additionally, we assume that no agreement or other factors exist that would cause the value of the decedent's stock holdings in the corporation not to be taken into account for purposes of section 2031. Under these circumstance, because the Company possesses no rights the exercise of which would impact that portion of the proceeds payable to a beneficiary other than the Company, the Company cannot be said to possess any incidents of ownership in the policy of the type that would be attributable to the surviving spouse under section 20.2042-1(6) of the regulations.

3220 Reg. § 1.61-22(d)(2)(ii) - see fns. 3206 and 3208 for text of the relevant regulations.

3221 See fns. 3214-3216.

3222 A Post-*Morrissette* Roadmap for Drafting Intergenerational Split Dollar Agreements, *Steve Leimberg's Estate Planning Email Newsletter* - Archive Message #2414 (5/12/2016).

2. Add a preliminary recital that the agreement is intended to qualify as an economic benefit arrangement under Reg. § 1.61-22 and that the ONLY benefit intended to be provided to the "donee" trust is life insurance protection.

3. Do NOT give the donee trust the right to borrow against the cash value.

4. At termination or death, make sure that the donor gets the GREATER of cash value or premiums paid.

5. The donor should be REQUIRED to pay all premiums. The donee has no obligation to pay premiums. If premiums are prepaid, there will be no additional benefit to the donee trust.

6. Do not mention the disposition of the receivable at death. Otherwise, it might be construed as an additional benefit to the donee trust.

II.Q.4.g. Income Tax Trap for Business-Owned Life Insurance

II.Q.4.g.i. Analysis of Code § 101(j)

Beware that an employer-owned life insurance contract might not qualify for the usual exclusion from regular income tax.[3223] An "employer-owned life insurance contract" (a term that applies to much more than one would think) does not receive the exclusion unless certain notice and consent requirements are met.[3224]

An "employer-owned life insurance contract" is a life insurance contract that (i) is owned by a person engaged in a trade or business and under which such person (or certain related party) is directly or indirectly a beneficiary under the contract, and (ii) covers the life of an insured who is an employee with respect to the trade or business of the applicable policyholder on the date the contract is issued.[3225] An "applicable policyholder" means, with respect to any employer-owned life insurance contract, the person described in the preceding sentence who owns the contract[3226] at the time it is issued.[3227]

"Employee" includes a "highly compensated employee" under Code § 414(q),[3228] and Code § 414(q)(1)(A) pulls in people who own at least 5% of the company.[3229] Thus, an

---

[3223] Code § 101(j).
[3224] Code § 101(j)(1), (2).
[3225] Code § 101(j)(3)(A).
[3226] Code § 101(j)(3)(B)(i).
[3227] The qualification at the time it is issued is not mentioned in any particular authority but appears to be implicit in the statutory scheme. See the text accompanying fn. 3231.
[3228] Code § 101(j)(5).
[3229] Notice 2009-48, A-8 provides:

> Section 101(j)(4) provides no exception that would excuse a wholly-owned corporation and its employee-owner from the notice and consent requirements that otherwise apply, nor can actual knowledge alone substitute for the statutory requirement that notice and consent be 'written.' Moreover, the requirement that notice and consent be written avoids factual controversies that otherwise could result where, for example, the sole owner of a corporation delegates financial matters to an employee.

owner who is not an employee is an "employee" for purposes of this rule by being a 5% owner.

The notice and consent requirements are met if, before the issuance of the contract, the employee (A) is notified in writing that the applicable policyholder intends to insure the employee's life and the maximum face amount for which the employee could be insured at the time the contract was issued, (B) provides written consent to being insured under the contract and that such coverage may continue after the insured terminates employment, and (C) is informed in writing that an applicable policyholder will be a beneficiary of any proceeds payable upon the death of the employee.[3230] The only way that this requirement makes any sense is if the policy was issued to the person treated as the insured's employer under these rules - this requirement would be impossible to satisfy if it was issued to the insured or someone else because the person treated as an employer might not even know about the policy. Thus, "applicable policyholder" should mean the person to whom the policy is issued when the insured is an "employee" of that person.[3231]

In addition to the notice and consent requirements, either the insured must have a qualifying relationship with the company or the death benefit must be put to certain uses:

- A qualifying relationship includes the insured being an employee, director, or 5% owner at any time during the 12-month period before the insured's death.[3232]

- Another qualifying relationship is if, when the contract is issued, the insured is a director, certain highly compensated employees, or a 5% owner.[3233] (Note that Code § 101(j) does not apply unless the insured is an employee with respect to the trade or business of the applicable policyholder when the contract is issued, so the concern for the qualifying relationship or qualifying use applies only when the insured is an employee who does not satisfy this bullet point when the contract is issued.)[3234]

- A qualifying use is being paid to a member of the family of the insured, any individual who is the designated beneficiary of the insured under the contract (other than the applicable policyholder), a trust established for the benefit of any such member of the family or designated beneficiary, or the estate of the insured.[3235]

3230 Code § 101(j)(4).

3231 Notice 2009-48, A-1, further below, clarifies that the person to whom this sentence refers generally is the entity that employs the insured rather than an owner of the entity and that the entity is treated as owning a policy owned by a grantor trust with respect to which the entity is the deemed owner.

3232 Code § 101(j)(2)(A)(i). The reference to director comes from Code § 101(j)(5), and a 5% owner is described in the text accompanying fns. 3228-3229.

3233 Code § 101(j)(2)(A)(ii). The reference to a 5% owner is described in the text accompanying fns. 3228-3229. The highly compensated employees are those described in Code § 414(q) (without regard to Code § 414(q)(1)(B)(ii)) or Code § 105(h)(5) (except that 35% is substituted for "25 percent" in Code § 105(h)(5)(C).

3234 See text accompanying fns. 3225-3227.

3235 Code § 101(j)(2)(B)(i). "Family member" refers to Code § 267(b)(4).

- Another qualifying use is the purchase of an equity (or capital or profits) interest in the applicable policyholder from any person described in the preceding bullet point.[3236] Beware of the proceeds exceeding this use.

A life insurance-funded buy-sell agreement might be structured to comply with these rules, in case the parties forget to do the required notice and consent.[3237] It also would guard against error in my suggestion that "applicable policyholder" is limited to being the person to whom the policy is issued when the insured is an "employee" of that person.

These rules impose various notice and other requirements that in most cases will not be a practical obstacle to implementing buy-sell agreements if signed <u>before</u> the application is signed.[3238] The employer might be able to cure a failure before the due date of its return for the year in which the policy was issued if the insured has not died yet.[3239]

[3236] Code § 101(j)(2)(B)(ii).

[3237] One might consider provisions such as that found in part II.Q.4.g.ii Consent Integrated into Operating Agreement. The sample is an attempt to be a catch-all in case clients do not follow the recommended procedure. Letter Ruling 201217017 approved what appears to have been a similar provision in a corporate buy-sell agreement:

> … the Agreement provides that Taxpayer will obtain life insurance on the life of each Shareholder, and that Taxpayer will be the owner and beneficiary of such life insurance. If the Agreement is terminated, or a Shareholder disposes of his interest in Taxpayer as allowed by the Agreement, a Shareholder has the right to purchase from Taxpayer any Taxpayer-owned life insurance covering his life. If the life insurance was not purchased, Taxpayer retained the right to surrender or otherwise dispose of the life insurance.

The ruling concluded:

> …considering all of Taxpayer's documentation as a whole, for the Contracts listed in the Appendix, all of the requirements of § 101(j)(4) were met before the issuance of the Contracts:
>
> a) through the Agreement and the Application, each Shareholder was notified in writing that Taxpayer intended to insure the Shareholder's life;
> b) through the Application, each Shareholder was notified in writing of the maximum face amount for which the Shareholder could be insured at the time the Contract was issued, in dollars;
> c) by signing both the Agreement and the Application, each Shareholder consented to being insured under the Contract;
> d) by signing the Agreement, each Shareholder consented that such coverage may continue after the Shareholder terminates employment; and
> e) through the Agreement and the Application, each Shareholder was informed in writing that Taxpayer will be a beneficiary of any proceeds payable upon the death of the Shareholder.

[3238] Leimberg and Zaritsky, IRS Provides New and Substantial Guidance on Employer-Owned Life Insurance, 36 *Estate Planning*, No. 8, 3 (August 2009).

[3239] Notice 2009-48, A-13 provides:

> Section 101(j) does not contain a provision for correcting an inadvertent failure to satisfy the notice and consent requirements of § 101(j)(4). The Service will not, however, challenge the applicability of an exception under § 101(j)(2) based on an inadvertent failure to satisfy the notice and consent requirements if the following conditions are met: (1) the applicable policyholder made a good faith effort to satisfy those requirements, such as by maintaining a formal system for providing notice and securing consents from new employees; (2) the failure to satisfy the requirements was inadvertent; and (3) the failure to obtain the requisite notice and consent was discovered and corrected no later than the due date of the tax return for the taxable year of the applicable policyholder in

Another cure would be to transfer the policy to the insured, then the insured transfers the policy back to the company (generally, transfers from the insured to the company are not subject to the rule, except with respect to increases in coverage);[3240] step transaction concerns might suggest that the insured transfer the policy into a life insurance LLC[3241] instead of waiting long enough (whatever that means) to avoid the step transaction doctrine.

Clients should obtain the insured's written consent before the life insurance application is signed.

Consider having the maximum face amount in that consent provide a cushion in excess of the largest amount that the parties can conceive of that death benefit being (including increased death benefits due to investing the cash value very successfully).

An insurance agent might provide such a consent form, which counsel should consider reviewing, or counsel could provide his/her own consent form to the client. Although some agents understand these issues, many agents do not know (or think they know but actually misunderstand) these rules. Accordingly, tax advisors should consider warning their clients that the tax advisors need to be involved before any policy is issued.

Every applicable policyholder owning one or more employer-owned life insurance contracts issued after August 17, 2006 is required to file IRS Form 8925 each year.[3242] "Applicable policyholder" and "employer-owned life insurance contract" are defined for purposes of this reporting rule the same way they are for determining whether a policy is subject to the notice and consent rules.[3243]

These rules for life insurance contracts issued or materially changed after August 17, 2006.[3244] Notice 2009-48 elaborates on the rules described above, as well

---

which the employer-owned life insurance contract was issued. Because § 101(j)(4)(B) requires that the employee's consent be written, failure to obtain such consent cannot be corrected after the insured employee has died.

[3240] Notice 2009-48, Q/A-8 provides:

> Q-8. Is notice and consent required with regard to an existing life insurance contract that an employee irrevocably transfers to an employer?
>
> A-8. No. The actual transfer of an existing life insurance contract by an employee to an employer is sufficient to satisfy the requirements that the employee be notified in writing of the intention to insure and the maximum face amount of insurance, that written consent be secured, and that the employee be notified that the employer will be a beneficiary upon his or her death. In the event the employer subsequently increases the face amount of the contract, however, written notice and consent must be secured to establish the requisite notice to the employee and consent to the new face amount.

[3241] See part II.Q.4.i Life Insurance LLC.

[3242] Code § 6039I(a) is the general reporting requirement, and Reg. § 1.6039I-1 specifies the form.

[3243] Code § 6039I(c).

[3244] P.L. 109-280, Sec. 863(a). Changing a split-dollar agreement without changing the underlying policy will not constitute a material modification under Code § 101(j), although it might very well affect other tax treatment. Notice 2008-42, discussed in part II.Q.4.f.i Split-Dollar Generally, especially the text accompanying fns. 3188-3190.

as providing rules for what constitutes a material modification,[3245] including guidance on tax-free exchanges.[3246]

As to buy-sell agreements, Notice 2009-48 provides that a contract that is owned by the owner of an entity engaged in a trade or business (such as for purposes of financing the purchase of an equity interest of another owner – in other words, a cross-purchase - is not subject to these rules.[3247] However, if the business owns it,[3248] the following rules apply (emphasis added):[3249]

> **Exceptions to the Application of § 101(j)(1)**
>
> Section 101(j)(2) provides several exceptions to the application of § 101(j)(1), ***provided the notice and consent requirements of § 101(j)(4) are met***. Specifically, under § 101(j)(2)(A), § 101(j)(1) does not apply if the insured either was an employee at any time during the 12-month period before death, or was a director, highly compensated employee or highly compensated individual, as defined, at the time the contract was issued. Under § 101(j)(2)(B), § 101(j)(1) does not apply to any amount received by reason of the death of an insured to the extent the amount is paid to or used to purchase an equity (or capital or profits) interest from a family member of the insured, an individual who is a designated beneficiary, a trust established for the benefit of a family member or designated beneficiary, or the estate of the insured.

[3245] Notice 2009-48, A-14 provides:

> The following changes are not treated as material changes for purposes of determining whether an existing contract is treated as a new contract for purposes of § 101(j): (1) increases in death benefit that occur as a result of either the operation of § 7702 or the terms of the existing contract (provided the insurer's consent to the increase is not required); (2) administrative changes; (3) changes from general account to separate account or from separate account to general account; or (4) changes as a result of the exercise of an option or right granted under the contract as originally issued. Thus, for example, a death benefit increase does not cause a contract to be treated as a new contract if the increase is necessary to keep the contract in compliance with § 7702, or if the increase results from the application of policyholder dividends to purchase paid-up additions, or if the increase is the result of market performance or contract design with regard to a variable contract. Notice and consent are required if a contract is treated as a new contract by reason of a material increase in death benefit or other material change, unless a valid consent remains in effect with regard to the insured.

[3246] Notice 2009-48, A-15 provides:

> Section 863(d) of the PPA provides that § 101(j) generally does not apply to a contract issued after August 17, 2006 in an exchange described in § 1035 for a contract issued on or before that date. Section 863(d) also provides that, for purposes of determining when a contract is issued, a material increase in the death benefit or other material change generally causes the contract to be treated as a new contract. A § 1035 exchange that results in a material increase in death benefit or other material change (other than a change in issuer) is treated as the issuance of a new contract after August 17, 2006 for purposes of determining whether § 101(j) applies to the contract.

[3247] A-1.

[3248] Including through a grantor trust that the business established, per A-1.

[3249] After A-3 and before Q-4.

If plans do change, the Notice allows consent to be given before the death benefit exceeds the amount shown in the consent. The Notice also provides for a change in the employer.

The Notice further provides:

Q-1. Can a contract be an employer-owned life insurance contract if it is owned not by a person engaged in a trade or business, but by a related person who is not engaged in a trade or business?

A-1. No. A contract is an employer-owned life insurance contract only if it is owned by a person engaged in a trade or business and is otherwise described in § 101(j)(3). Thus, a contract that is owned by the owner of an entity engaged in a trade or business (such as for purposes of financing the purchase of an equity interest of another owner), or by a qualified plan or VEBA that is sponsored by an entity engaged in a trade or business, is not an employer-owned life insurance contract. A contract, however, that is owned by a grantor trust (such as a rabbi trust), assets of which are treated as assets of a grantor that is engaged in a trade or business, is an employer-owned life insurance contract if the contract is otherwise described in § 101(j)(3).

Q-2. Can a contract be an employer-owned life insurance contract if it is subject to a split dollar arrangement?

A-2. Yes. A contract that is subject to a split dollar arrangement is an employer-owned life insurance contract if the contract is owned by a person engaged in a trade or business and is otherwise described in § 101(j)(3). See § 1.61-22(c)(1) (defining the owner of a contract subject to a split dollar arrangement to be the person named as the policy owner of the contract). Under § 101(j)(2)(B), however, the general rule of § 101(j)(1) does not apply to the extent any amount received by reason of the death of the insured is paid to a family member of the insured, an individual who is a designated beneficiary, a trust established for the benefit of a family member or designated beneficiary.

Q-3. Is a contract an employer-owned life insurance contract if it is owned by a partnership or sole proprietorship that is engaged in a trade or business; the partnership or sole proprietorship is directly or indirectly a beneficiary under the contract; and, the contract covers the life of an insured who is an employee with respect to the trade or business on the date the contract is issued?

A-3. Yes. If a life insurance contract is otherwise described in § 101(j)(3), ownership of the contract by a partnership or sole proprietorship does not prevent the contract from being treated as an employer-owned life insurance contract. A life insurance contract that is owned by a sole proprietor on his or her own life is not, however, an employer-owned life insurance contract.

Q-4. Under § 101(j)(2)(A) and (j)(4), when is a contract treated as "issued" for purposes of determining whether the notice and consent are timely, or whether the insured is a director, a highly compensated employee, or a highly compensated individual at the time the contract is issued?

A-4. Generally, the issue date of a contract is the date on the policy assigned by the insurance company, which is on or after the date the application was signed. Solely for purposes of § 101(j)(2)(A) and (j)(4), an employer-owned life insurance contract is treated as "issued" on the later of (1) the date of application for coverage, (2) the effective date of coverage, or (3) the formal issuance of the contract. Thus, if an employer-owned life insurance contract is effective for a limited period of time before formal issuance of the contract (such as to complete underwriting), the notice and consent requirements may be satisfied during the period between the effective date of coverage and formal issuance of the contract. In addition, an employer-owned life insurance contract may be treated as a new contract, and thus newly "issued," by reason of a material increase in death benefit or other material change in the contract. See A-14, this Notice.

Q-5. For purposes of § 101(j), is the term "employee" limited to common law employees?

A-5. No. Section 101(j)(5)(A) provides that the term "employee" includes an officer, director, and highly compensated employee (within the meaning of § 414(q)). A director is an independent contractor in his or her capacity as a director.

Section 414(q) contains special rules relating to certain former employees and self-employed individuals. For example, a former employee is treated as a highly compensated employee (within the meaning of § 414(q)) if the individual was a highly compensated employee when he separated from service, or was a highly compensated employee at any time after attaining age 55. In addition, the term "employee" for purposes of § 414(q) includes an individual who is a self-employed individual who is treated as an employee pursuant to § 401(c)(1).

Although policies used to fund redemptions are subject to the notice and consent rules if the insured is either an employee or holds at least 5% ownership, an exception applies if and to the extent that the company uses the policy to redeem the insured's stock shortly after death:

A-6. In order to know whether an amount received as a death benefit under an employer-owned life insurance contract is eligible for exclusion from gross income under § 101(a), or is ineligible for exclusion under the general rule of § 101(j)(1), it is necessary to determine the availability of the exception for amounts used to purchase an equity (or capital or profits) interest in the applicable policyholder. Accordingly, an amount must be so paid or used by the due date, including extensions, of the tax return for the taxable year of the applicable policyholder in which the applicable policyholder is treated as receiving a death benefit under the contract.

I insist on notice and consent - even for redemption arrangements - because the purchase might not be completed within that deadline, the parties might later all agree that the money would be better used in the business, or the death benefit might exceed the purchase price.

II.Q.4.g.ii. Consent Integrated into Operating Agreement

As with any sample, consultation with a qualified tax advisor and a lawyer are required before using the sample below. See fn. 3237 for authority for relying on such a provision; however, I recommend obtaining a separate notice and consent for more direct evidence to show the IRS. The rest of this part II.Q.4.g.ii is the sample:

The Company or Members may from time to time obtain life insurance policies on the lives of the Members. In the event those policies fall within the definition of "employer-owned life insurance policies" as defined in Code section 101(j), it is intended that the policies qualify for an exclusion from those rules (and thus the proceeds will be income tax-free) and that this Operating Agreement comply with the notice and consent requirements necessary to obtain that exclusion. Therefore, each Member is hereby given written notice that the Company or Members intend to insure his or her life by purchasing life insurance policy(ies) in the maximum face amount of $___________, and that the Company or Members will be the owner and beneficiary of that policy and of any proceeds payable on such Member's death. Each Member (by signing this Operating Agreement) hereby gives advance written consent to being insured under such policy(ies) and to the continuation of the policy(ies) after such Member ceases to have an Interest in the Company or otherwise terminates employment (as defined in Code section 101(j)(4)(B)) with the Company (and no inference is intended that a Member is an "employee" for any purposes other than the possible application of Code section 101(j)). The Members also agree to enter into a specific notice and consent containing these terms with regard to each policy obtained before the issuance of that policy.

II.Q.4.g.iii. Consent for Owner Who Is Not an Employee

As mentioned in part II.Q.4.g.i, a person owning at least 5% of a company is treated as an employee for purposes of this rule, even if that person not an employee. The rest of this part II.Q.4.g.iii is a sample. As with any sample, consultation with a qualified tax advisor and a lawyer are required before using the sample below.

Notice and Consent

For _____ Owner

Under I.R.C. Section 101(j)(4)

I acknowledge notification that ______________ (the "Employer") intends to obtain a policy insuring my life with a maximum face amount of $_______. Although the Employer does not employ me, I understand that my ownership in the Employer makes me considered an "employee" for purposes of I.R.C. Section 101(j). Therefore:

(A) I acknowledge that the Employer intends to insure my life regarding the death benefits listed in the attached schedule.

(B) I consent to being insured under these contracts and that such coverage may continue after I no longer own an interest in the Employer or otherwise terminate employment.

(C) I understand that the Employer will be a beneficiary of any proceeds payable upon my death.

[add signature line and date, dated on before policy issuance]

II.Q.4.g.iv. Consent for an Employee

The rest of this part II.Q.4.g.iv is a sample. As with any sample, consultation with a qualified tax advisor and a lawyer are required before using the sample below.

Notice and Consent

For _______ Employee

Under I.R.C. Section 101(j)(4)

I acknowledge notification that ____________ (the "Employer") intends to obtain a policy insuring my life with a maximum face amount of $_______, and:

(A) I acknowledge that the Employer intends to insure my life regarding the death benefits listed in the attached schedule.

(B) I consent to being insured under these contracts and that such coverage may continue after I terminate employment.

(C) I understand that the Employer will be a beneficiary of any proceeds payable upon my death.

[add signature line and date, dated on before policy issuance]

II.Q.4.h. Establishing Estate Tax Values

For estate tax purposes, fair market value is defined as "the price at which the property would change hands between a willing buyer and a willing seller, neither being under any compulsion to buy or to sell and both having reasonable knowledge of relevant facts."[3250] If a decedent owns voting and nonvoting shares, the shares are valued together as a single block.[3251]

[3250] Reg. § 20.2031-1(b). Rev. Rul. 59-60 and its progeny discuss valuation principles.
[3251] *Ahmanson Foundation v. United States*, 674 F.2d 761 (9th Cir. 1981).

Regarding buy-sell agreements:[3252]

> **(h) Securities subject to an option or contract to purchase.** Another person may hold an option or a contract to purchase securities owned by a decedent at the time of his death. The effect, if any, that is given to the option or contract price in determining the value of the securities for estate tax purposes depends upon the circumstances of the particular case. Little weight will be accorded a price contained in an option or contract under which the decedent is free to dispose of the underlying securities at any price he chooses during his lifetime. Such is the effect, for example, of an agreement on the part of a shareholder to purchase whatever shares of stock the decedent may own at the time of his death. Even if the decedent is not free to dispose of the underlying securities at other than the option or contract price, such price will be disregarded in determining the value of the securities unless it is determined under the circumstances of the particular case that the agreement represents a bona fide business arrangement and not a device to pass the decedent's shares to the natural objects of his bounty for less than an adequate and full consideration in money or money's worth. See section 2703 and the regulations at §25.2703 of this chapter for special rules involving options and agreements (including contracts to purchase) entered into (or substantially modified after) October 8, 1990.

Thus, a buy-sell or similar agreement must apply during a decedent's life as well as after death before it might be given effect. Recent cases have reaffirmed this requirement.[3253]

For purposes of gift, estate and GST tax, Code § 2703(a) provides that the value of any property shall be determined without regard to:

(1) any option, agreement, or other right to acquire or use the property at a price less than the fair market value of the property (without regard to such option, agreement, or right), or

(2) any restriction on the right to sell or use such property.

Thus, when a parent transfers an equity interest to a child pursuant to a legally binding stock option or buy-sell agreement, generally for gift, estate and GST tax purposes the

[3252] Reg. § 20.2031-2(h).

[3253] *True v. Commissioner*, 390 F.3d 1210 (10th Cir. 2004); *Estate of Blount*, T.C. Memo. 2004-116, *aff'd* in part, *rev'd* in part, 428 F.3d 1338 (11th Cir. 2005) (life insurance included in valuing company, but the Eleventh Circuit treated the buy-sell obligation as offsetting the inclusion); *Smith III v. U.S.*, 96 A.F.T.R.2d 2005-6549 (W.D. Pa. 2005). In a case citing *True* but taking an unusual tack, in *Huber v. Commissioner*, T.C. Memo. 2006-96, the IRS tried to use a buy-sell agreement against a taxpayer, but Judge Goeke ruled that a right of first refusal in the agreement did not increase the value of the subject stock. Not mentioned in the Huber opinion is that, according to one of the taxpayer's counsel, prior gift tax audits had accepted the taxpayer's appraisals or settled very close to it, so the IRS' posture was radically different than before. In *Estate of Cartwright v. Commissioner*, 183 F.3d 1034 (9th Cir. 1999), *aff'g* in part and *rev'g* in part T.C. Memo. 1996-286, life insurance proceeds did not increase the value of the decedent's interest in the law firm to which he had belonged, except as necessary to take into account advanced client costs and work in process pursuant to the buy-sell agreement.

parent is deemed to make a taxable transfer to the extent that the equity interest's value exceeds the payment under that agreement. These rules extend to all sorts of arrangements:[3254]

> A right or restriction may be contained in a partnership agreement, articles of incorporation, corporate bylaws, a shareholders' agreement, or any other agreement. A right or restriction may be implicit in the capital structure of an entity.

A waiver of the right to partition art was disregarded under Code § 2703(a)(2).[3255]

However, Code § 2703(b) provides that the above rules shall not apply to any option, agreement, right, or restriction which meets each of the following requirements:

(1) It is a bona fide business arrangement.[3256]

[3254] Reg. § 25.2703-1(a)(3).

[3255] *Elkins v. Commissioner*, 140 T.C. No. 5 (2013).

[3256] *Holman v. Commissioner*, 130 T.C. 170 (2008) held:

> We believe that [the transfer restrictions] were designed principally to discourage dissipation by the children of the wealth that Tom and Kim had transferred to them by way of the gifts. The meaning of the term bona fide business arrangement in section 2703(b)(1) is not self-apparent. As discussed supra, in *Estate of Amlie v. Commissioner*, T.C. Memo. 2006-76, we interpreted the term bona fide business arrangement to encompass value-fixing arrangements made by a conservator seeking to exercise prudent management of his ward's minority stock investment in a bank consistent with his fiduciary obligations to the ward and to provide for the expected liquidity needs of her estate. Those are not the purposes of [the transfer restrictions]. There was no closely held business here to protect, nor are the reasons set forth in the Committee on Finance report as justifying buy-sell agreements consistent with petitioners' goals of educating their children as to wealth management and disincentivizing them from getting rid of Dell shares, spending the wealth represented by the Dell shares, or feeling entitled to the Dell shares.

The court had cited this portion of the legislative history (an informal report of the Senate Committee on Finance):

> [Buy-sell agreements] are common business planning arrangements … that … generally are entered into for legitimate business reasons…. Buy-sell agreements are commonly used to control the transfer of ownership in a closely held business, to avoid expensive appraisals in determining purchase price, to prevent the transfer to an unrelated party, to provide a market for the equity interest, and to allow owners to plan for future liquidity needs in advance….

The Eighth Circuit affirmed, 601 F.3d 763 (2010):

> Here that context shows that the Tax Court correctly assessed the personal and testamentary nature of the transfer restrictions. Simply put, in the present case, there was and is no business, active or otherwise. The donors have not presented any argument or asserted any facts to distinguish their situation from the use of a similar partnership structure to hold a passbook savings account, an interest-bearing checking account, government bonds, or cash. We and other courts have held that maintenance of family ownership and control of [a] business may be a bona fide business purpose. *St. Louis County Bank*, 674 F.2d at 1207; see also *Estate of Bischoff v. Commissioner*, 69 T.C. 32, 39–40 (1977). We have not so held, however, in the absence of a business. [footnote described below]
>
> That is not to say we necessarily believe it will always be easy to apply § 2703(b)(1) or that investment-related activities cannot satisfy the subsection (b)(1) test. When the restrictions at issue, however, apply to a partnership that holds only an insignificant fraction of stock in a

highly liquid and easily valued company with no stated intention to retain that stock or invest according to any particular strategy, we do not view this determination as difficult. See, e.g., *Higgins v. Commissioner*, 312 U.S. 212, 217–18 (1941) (holding in another context that merely keeping records and collecting interest and dividends did not amount to carrying on a business); *Estate of Thompson v. Commissioner*, 382 F.3d 367, 380 (3d Cir. 2004) (Other than favorable estate tax treatment resulting from the change in form, it is difficult to see what benefit could be derived from holding an untraded portfolio of securities in this family limited partnership with no ongoing business operations.).

In footnote 3 discussing the *St. Louis County Ban*k case, 674 F.2d 1207 (8th Cir. 1982), the court pointed out:

In *St. Louis County Bank*, for example, the transferred interests were shares in a family company that had started out as a moving, storage, and parcel-delivery business and evolved into a real estate management company. *St. Louis Bank*, 674 F.2d at 1208–09. When engaged in the moving and storage business, the company had created a stock-purchase agreement based on a valuation formula keyed to income. *Id*. At 1209. Later, the family exited the moving and storage business but kept the business structure as a vehicle for renting real estate. *Id*. With this new activity, the formula resulted in a dramatically lower value. *Id*. We stated, We have no problem with the District Court's findings that the stock-purchase agreement provided for a reasonable price at the time of its adoption, and that the agreement had a bona fide business purpose—the maintenance of family ownership and control of the business. Courts have recognized the validity of such a purpose. *Id*. at 1210.

Judge Beam offered a strong dissent:

Here, the Tax Court made the express factual determination that the partnership agreement restrictions were designed principally to protect family assets from dissipation by the Holman daughters. *Holman*, 130 T.C. at 195 (emphasis added). In other words, the Tax Court determined that the restrictions were designed primarily to serve a non-tax purpose. Notably, the Tax Court did not find that the Holmans merely paid lip service to legitimate business purposes for the restrictions while, in reality, using the restrictions for the primary purpose of avoiding taxes. [footnote omitted] Additionally, the Tax Court did not find that the restrictions failed to match the partnership's legitimate, non-tax goals. [footnote omitted] The underlying purposes of § 2703 are not served where, as here, the bona fide business arrangement test is applied in a manner that discourages partners in family partnerships from creating restrictions principally to achieve non-tax, economic goals. Thus, I would hold that the Holman partnership agreement restrictions are bona fide business arrangements because they were not created for the primary purpose of avoiding taxes, and they served the following legitimate business purposes: (1) maintaining family control over the right to participate as a limited partner; (2) maintaining family control over the right to receive income from the partnership's investment assets; (3) protecting partnership assets from creditors and potential future ex-spouses; and (4) preserving the partners' fundamental right to choose who may become a partner….

Having determined that the partnership restrictions satisfy § 2703(b)(1), I now turn to § 2703(b)(2)'s device test. Under this test, the Holman partnership restrictions must not be a device to transfer such property to members of the decedent's family for less than full and adequate consideration in money or money's worth. I.R.C. § 2703(b)(2) (emphasis added). Treasury Regulation § 25.2703-1(b)(1)(ii) excises the phrase members of the decedent's family found in § 2703(b)(2) and substitutes in its place the phrase natural objects of the transferor's bounty, apparently because the Secretary of the Treasury interprets § 2703(b)(2) to apply to both inter vivos transfers and transfers at death. Holman, 130 T.C. at 195–96. Applying this regulation, the Tax Court held that the Holman partnership restrictions operate as a device to transfer property to the natural objects of the Holmans' bounty. The Holmans argue that Treasury Regulation § 25.2703-1(b)(1)(ii) is invalid because it fails to give effect to § 2703(b)(2)'s plain language. I agree. [discusses Chevron deference] The parties primarily dispute whether § 2703(b)(2) is ambiguous. The Holmans assert that the term decedent unambiguously refers to a deceased person and, therefore, § 2703(b)(2) asks only whether

(2) It is not a device to transfer such property to members of the decedent's family for less than full and adequate consideration in money or money's worth.

(3) Its terms are comparable to similar arrangements entered into by persons in an arms' length transaction.

---

restrictions operate as a device to transfer property to family members at death. The Holmans point out that only the term decedent, not the broader term transferor, is used throughout § 2703(b)(2)'s legislative history. Conversely, the Commissioner argues that the term decedent is ambiguous due to § 2703's location in the Internal Revenue Code. Specifically, § 2703 is located in Subtitle B of the Code, which includes three transfer taxes—the estate, gift and generation-skipping transfer taxes. More precisely, § 2703 is located in Subtitle B, Chapter 14. In Chapter 14, § 2703 joins a set of special valuation rules targeting transfer tax avoidance schemes. It is clear that the phrase members of the decedent's family unambiguously limits § 2703(b)(2)'s application to transfers at death. First, the term decedent is itself unambiguous. *Black's Law Dictionary* 465 (9th ed. 2009) plainly defines decedent as [a] dead person. Moreover, the phrase members of decedent's family is not ambiguous when read in the greater context of Chapter 14. While Congress used the term decedent in § 2703(b)(2), it used the broader term transferor in Chapter 14's other valuation statutes. See I.R.C. §§ 2701(a)(1) & 2702(a)(1). And, as the Holmans point out, the term decedent consistently appears in § 2703(b)(2)'s legislative history. Finally, I find it telling that members of Congress have failed in their attempts to amend § 2703(b)(2) by substituting the legislative phrase members of the decedent's family with the Commissioner's phrase natural objects of the transferor's bounty. See *Smith v. United States*, No. C.A. 02-264 ERIE, 2004 WL 1879212, at 6 n.3 (W.D. Pa. June 30, 2004). Thus, although Congress enacted Chapter 14 to generally address transfer tax avoidance schemes, § 2703(b)(2) applies specifically to transfers at death. Therefore, Treasury Regulation § 25.2703-1(b)(1)(ii) is invalid because it does not give effect to the plain language of § 2703(b)(2). Since the Holmans are living persons, they are, by definition, not decedents and § 2703(b)(2)'s device test is satisfied.

…Under § 2703(b)(3)'s comparable terms test, the Holman partnership restrictions' terms must be comparable to similar arrangements entered into by persons in an arms' length transaction. While the Tax Court did not decide whether the restrictions satisfied the comparable terms test, it noted that both parties' experts agree that transfer restrictions comparable to those found in [the Holman partnership agreement] are common in agreements entered into at arm's length. [footnote omitted] Holman, 130 T.C. at 198–99. The Tax Court explained that this would seem to be all that [the Holmans] need to show to satisfy section 2703(b)(3). Id. at 199. I agree, and I would hold that the Holman partnership restrictions satisfy § 2703(b)(3)'s comparable terms test. Thus, because the partnership restrictions satisfy all three of § 2703(b)'s tests, I would reverse and remand to the Tax Court for a valuation of the limited partnership interests that does not disregard the partnership restrictions.

The U.S. District Court for the Southern District of Indiana, following *Holman*, held that holding undeveloped land did not constitute a business that could qualify for the Code § 2703 safe harbor. *Fisher v. U.S.*, 106 A.F.T.R.2d 2010-6144. The court later ruled that the taxpayer could not introduce into evidence the discounts that the IRS had used on audit, ruling that the IRS' audit determination was irrelevant to determining the actual value. 106 A.F.T.R.2d 2010-6144.

For an in-depth discussion of the facts of some of these cases, see Aghdami, Mancini, & Zaritsky, *Structuring Buy-Sell Agreements*, ¶ 6.02[4] Restriction on Lifetime Transfer.

One way to satisfy this exception is if the entity is not family owned, using Code § 2701 principles:[3257]

> A right or restriction is considered to meet each of the three requirements … if more than 50 percent by value of the property subject to the right or restriction is owned directly or indirectly (within the meaning of § 25.2701-6) by individuals who are not members of the transferor's family. In order to meet this exception, the property owned by those individuals must be subject to the right or restriction to the same extent as the property owned by the transferor. For purposes of this section, members of the transferor's family include the persons described in § 25.2701-2(b)(5) and any other individual who is a natural object of the transferor's bounty. Any property held by a member of the transferor's family under the rules of § 25.2701-6 (without regard to § 25.2701-6(a)(5)) is treated as held only by a member of the transferor's family.

If the entity does not satisfy this non-family-controlled test, then one must satisfy each of the above three exceptions separately. The Code § 2703(b)(3) comparability test, which is the main test that Code § 2703 added to pre-1990 law, uses the following principles:[3258]

> (i) In general. A right or restriction is treated as comparable to similar arrangements entered into by persons in an arm's length transaction if the right or restriction is one that could have been obtained in a fair bargain among unrelated parties in the same business dealing with each other at arm's length. A right or restriction is considered a fair bargain among unrelated parties in the same business if it conforms with the general practice of unrelated parties under negotiated agreements in the same business. This determination generally will entail consideration of such factors as the expected term of the agreement, the current fair market value of the property, anticipated changes in value during the term of the arrangement, and the adequacy of any consideration given in exchange for the rights granted.
>
> (ii) Evidence of general business practice. Evidence of general business practice is not met by showing isolated comparables. If more than one valuation method is commonly used in a business, a right or restriction does not fail to evidence general business practice merely because it uses only one of the recognized methods. It is not necessary that the terms of a right or restriction parallel the terms of any particular agreement. If comparables are difficult to find because the business is unique, comparables from similar businesses may be used.

[3257] Reg. § 25.2703-1(b)(3).
[3258] Reg. § 25.2703-1(b)(4).

The Tax Court, convinced that the taxpayer's buy-sell agreement was arrived upon in a manner intended to arrive at fair market value, applied the comparability test in *Estate of Amlie*:[3259]

> For the reasons discussed below, we conclude that the estate has satisfied section 2703(b)(3). By its terms, the statute requires only a showing that the agreement's terms are "comparable" to similar arrangements entered at arm's length. While the regulations caution against using "isolated comparables", we believe that in context the regulations delineate more of a safe harbor than an absolute requirement that multiple comparables be shown.

Even if the above rules are not complied with, obligations do tend to affect a stock's marketability,[3260] in that they cloud the business' future operations.[3261]

Keeping a pre-1990 agreement outside of the application of Code § 2703 would avoid the statute's imposition of the comparability test. Any discretionary modification of a right or restriction, whether or not authorized by the terms of the agreement, that results in a significant change to the quality, value, or timing of the rights of any party with respect to property that is subject to the right or restriction is a substantial modification that's would subject it to this test.[3262] If the terms of the right or restriction require periodic updating, the failure to update is presumed to substantially modify the right or restriction unless updating would not have resulted in a substantial modification.[3263] Adding any family member as a party to a right or restriction is a substantial modification unless either the terms of the right or restriction require the addition or the added family member is assigned to a generation no lower than the lowest generation occupied by individuals already party to the right or restriction.[3264] However, a substantial modification does not include a modification required by the terms of a right or restriction, a discretionary modification of an agreement conferring a right or restriction if the modification does not change the right or restriction, a modification of a capitalization rate used with respect to a right or restriction if the rate is modified in a manner that bears a fixed relationship to a specified market interest rate, or a modification that results in an option price that more closely approximates fair market value.[3265] Amending an agreement to extend the number of years of payment, to clarify that the prime rate is to be established semi-annually, and to update the name of the banking institution from the original bank's name to its successor's name was not a substantial modification.[3266]

[3259] T.C. Memo. 2006-76.

[3260] Rev. Rul. 77-287 explains valuation adjustments due to stock being restricted from resale pursuant to Federal securities laws.

Memo. 1994-527, for the concept that, even if a provision does not bind the IRS as to estate tax value, it can still affect its value; *Estate of Blount*, 428 F.3d 1338 (11th Cir. 2005), *rev'g* T.C. Memo. 2004-116.

[3262] Reg. § 25.2703-1(c)(1).

[3263] Reg. § 25.2703-1(c)(1).

[3264] Reg. § 25.2703-1(c)(1).

[3265] Reg. § 25.2703-1(c)(2).

[3266] Letter Ruling 201313001.

Issuing nonvoting shares proportionately to the owners of voting stock in an S corporation was not a substantial modification.[3267]

Finally, many of the buy-sell restrictions in partnership agreements are no more restrictive than would otherwise apply under state law, so the application of Code § 2703 would not have a significant impact on the valuation. Yet the IRS makes a big deal of these issues on audit and acts as if some of the cases cited above give it a major advantage. Consider asking the appraiser to expressly state that (s)he is ignoring any provisions in the agreement that are more restrictive than otherwise applicable state law. That way, when the IRS makes a big deal about Code § 2703, one might respond that one has already assumed that Code § 2703 applied, so that issue is off the table.

II.Q.4.i. Life Insurance LLC

Wouldn't it be nice to avoid using a lot of policies, minimize life insurance income tax consequences to owners coming and going,[3268] and keep the life insurance policies in a safer environment? One solution is to place the policies in a limited liability company (LLC) taxed as a partnership. The owners of the business entity also would be the members (owners) of the LLC. A trust company could serve as manager, taking charge of the policies and ensuring that the proceeds are used as intended. Each owner would have an interest in policies insuring the other partners' lives. I obtained Letter Ruling 200747002, which approved such a strategy.

II.Q.4.i.i. The Facts of Letter Ruling 200747002

The flowcharts in the Appendices A and B illustrate the situation. Appendix A illustrates trusts that were set up. Appendix B explains the Insurance LLC's structure. Appendix C illustrates some creative planning described below.

In this case, an S corporation had three shareholders: Child A (Brother), Child B (Sister), and BA. BA was an unrelated shareholder. Although the ruling does not disclose the percentage ownership, in fact BA owned 5% of the stock, and Brother and Sister owned the rest in roughly equal amounts.

The grantor, parent of Brother and Sister, set up an irrevocable trust, Trust 2A, for Brother ("Brother's Irrevocable Trust"). This was a typical flexible generation-skipping trust. Brother was trustee and could make distributions under an ascertainable standard to Brother and Brother's descendants. Brother also had the power to appoint Brother's

---

[3267] Letter Ruling 201536009, reasoning:

> In this case, the stock split and amendment to the Articles will apply to all of the common shares (whether voting or nonvoting). Because each shareholder will receive c shares for every common share he or she currently holds, the beneficial interests in Company will not be affected by the stock split, amendment, and share dividend.
>
> Likewise, because the number of authorized voting shares will continue to be x, the shareholders' voting rights will remain unchanged.
>
> Consequently, the stock split, amendment to the Articles, and share dividend will not affect the quality, value or timing of any rights under the Articles, and the changes will not be a substantial modification of the Articles for purposes of § 25.2703-1(c). Accordingly, the Articles will remain exempt from the application of chapter 14.

[3268] See text accompanying fns. 3132-3134 regarding certain transfers involving partnerships.

Irrevocable Trust's assets at Brother's death to anyone except to Brother, Brother's creditors, Brother's estate or the creditors of Brother's estate. The grantor had allocated GST exemption to Brother's Irrevocable Trust, and Brother's Irrevocable Trust was not subject to the rule against perpetuities. Thus, Brother's Irrevocable Trust provides Brother with flexibility to use its assets during life and pass them to practically anyone at death. The grantor also set up Trust 2B for Sister with similar terms ("Sister's Irrevocable Trust").

Under a buy-sell agreement, Brother would buy Sister's and BA's stock at their deaths. Brother owned policies on their lives to fund this purchase. Brother also had the right to assign Brother's purchase rights and obligations to Brother's Irrevocable Trust or other trusts controlled by Brother. Brother would then transfer these policies to the LLC. Brother and Brother's Irrevocable Trust would contribute premiums to the LLC and receive the right to death benefits from Policies on Sister's and BA's lives in proportion to the premiums that Brother and Brother's Irrevocable Trust made these premium contributions. The goal was to maximize Brother's Irrevocable Trust's proportion of contributions, because Brother's Irrevocable Trust and any trusts created under it are excluded from the estate tax system. However, given the uncertainties of cash flow and the impracticality of frequently changing beneficiary designations, being flexible in sharing premiums was important and the LLC's use of partnership accounting seemed to be the best way to accomplish that. Brother and Sister had virtually identical goals regarding the buy-sell arrangement.

The LLC had some other features. The manager was a corporate trustee. Using a corporate trustee as manager provided security to ensure that no party to the buy-sell agreement would use the life insurance proceeds improperly. The manager was instructed to retain all life insurance proceeds until the parties agreed on their application toward the cross-purchase. Thus, the manager's roles were essentially the equivalent of a combination of trustee of an irrevocable life insurance trust before a shareholder's death and escrow agent for the buy-sell agreement after a shareholder's death.

The LLC's activity required special partnership accounting provisions. Each member had a separate capital account for each policy the member owned on a shareholder. Also, the members needed to contribute cash to pay the LLC's administrative expenses, requiring an additional set of capital accounts.

II.Q.4.i.ii. Summary of Estate Tax Rules Governing Life Insurance Payable to a Business Entity

Code § 2042 provides that a decedent's gross estate includes insurance proceeds from a policy on a decedent's life if the decedent, at his or her death, possessed any incidents of ownership over such policy, exercisable either alone or in conjunction with any other person.[3269] The term "incidents of ownership" includes more than ownership of the

[3269] Letter Ruling 200314009 found no incidents of ownership where a grantor had the power to name as a successor trustee anyone except himself or any party related or subordinate to (under Code § 672(c) – see fn. 1751) the grantor when the two designated trustees are unavailable to act as trustee or are removed; however, the grounds for removal were not spelled out. The IRS pointed out that Reg. § 20.2042-1(c)(4) provides that:

> A decedent is considered to have an incident of ownership in an insurance policy on his life held in trust if, under the terms of the policy, the decedent, (either alone or in

policy in the technical legal sense. Generally, it refers to the right of the insured or the insured's estate to the economic benefits of the policy. It also includes the power to change the beneficiary, to surrender or cancel the policy, to assign the policy, to revoke an assignment, to pledge the policy for a loan, or to obtain from the insurer a loan against the surrender value of the policy. If Code § 2042 applies, then generally the decedent must include all of the insurance proceeds in his or her gross estate.

Simple cross-purchase agreements avoid these issues. Rev. Rul. 56-397 ruled that when each of two business associates owns, is the beneficiary of and pays all premiums for an insurance policy on the other business associate, neither of the business associates possesses incidents of ownership in the policy on his or her respective life.

II.Q.4.i.ii.(a). Trust Ownership of Policy

Reg. § 20.2042-1(c)(4) provides, "A decedent is considered to have an 'incident of ownership' in an insurance policy on his life held in trust if, under the terms of the policy, the decedent…has the power (as trustee or otherwise) to change the beneficial ownership in the policy or its proceeds, or the time or manner of enjoyment thereof, even though the decedent has no beneficial interest in the trust." Does being the trustee of a trust containing an insurance policy on the trustee's life, with the trustee having no beneficial interest in the trust, results in estate tax inclusion under Code § 2042? The *Skifter* case[3270] held that the insured as trustee would not have an includable incident of ownership unless the insured had transferred the policy to the trust, implying this requirement into the regulation, which otherwise would not have complied with the statute. GCM 39317 followed this case. However, *Rose v. U.S.*[3271] held that there was no transfer requirement. Rev. Rul. 84-179 held:

> An insured decedent who transferred all incidents of ownership in a policy to another person, who in an unrelated transaction transferred powers over the policy in trust to the decedent, will not be considered to possess incidents of ownership in the policy for purposes of section 2042(2) of the Code, provided that the decedent did not furnish consideration for maintaining the policy and could not exercise the powers for personal benefit. The result is the same where the decedent, as trustee, purchased the policy with trust assets, did not contribute assets to the trust or maintain the policy with personal assets, and could not exercise the powers for personal benefit.

> conjunction with another person or persons) has the power (as trustee or otherwise) to change the beneficial ownership in the policy or its proceeds, or the time or manner of enjoyment thereof, even though the decedent has no beneficial interest in the trust.

The IRS looked to Rev. Rul. 77-182 (no Code § 2036 inclusion where decedent could appoint a successor corporate trustee if the original trustee resigned or was removed by judicial process) and 95-58 (no Code § 2036 inclusion where decedent could remove the trustee and appoint an individual or corporate successor trustee that was not related or subordinate to the decedent (under Code § 672(c) – see fn. 1751).

[3270] 468 F.2d 699 (2nd Cir. 1972).

[3271] 511 F.2d 259 (5th Cir. 1975).

Citing Rev. Rul. 84-179 with approval, Letter Ruling 9602010 reasoned and held:

> In the present case, the Indenture of Trust vests the trustees of the separate trusts with all rights, title, and interest in and to the policies and prohibits the trustees from distributing any portion of a life insurance policy or its proceeds to the insured daughter. In addition, neither A nor B can serve as a trustee under the Indenture of Trust. Therefore, we need not address specifically the problems concerning the application of 2042(2) where the insured holds powers over the life insurance policies in a fiduciary capacity. Instead, we must consider A and B's powers over the maintenance and distribution of the assets held in their separate trusts. The ability to control these assets may indirectly give A and B or their estates powers over the economic benefits of the life insurance policies.
>
> Although A and B are the income beneficiaries of their respective separate trusts and each has the right to receive distributions of principal, their rights to distributions of principal are subject to the trustees absolute discretion. Neither A nor B can direct corpus to be distributed to themselves.
>
> Under the Indenture of Trusts, the separate trusts were created by A and B's father. The annual premiums on the life insurance policies will be paid from the principal of the separate trusts. Neither A nor B can transfer assets to their separate trusts. Therefore, neither A nor B can maintain any life insurance policies held by their separate trusts with personal assets.
>
> Although both A and B have special powers of appointment to cause the trustees of their separate trusts to distribute principal of their separate trusts to such beneficiaries (other than the daughter, her creditors, her estate, or the creditors of her estate) as they designate, these powers of appointment are effective only when there are no life insurance policies on the life of the beneficiary included in trust assets. Generally, an inter vivos exercise of a special power of appointment could reduce the principal of a trust so that there are insufficient funds to pay the premiums on the life insurance policies. In addition, a testamentary exercise of a special power of appointment could result in a reversionary interest in the life insurance policies. In this case, the special powers of appointment are not effective when insurance policies on the life of the beneficiary-daughter are among trust assets. Therefore, A and B cannot exercise their special powers of appointment to gain any economic benefits of the life insurance policies.
>
> Based on the facts and representations made in your request for rulings and your subsequent submissions, we conclude that neither A nor B will possess any incidents of ownership over life insurance policies on their lives held by the trustees of their irrevocable trusts and that the proceeds of the policies will not be includible in their gross estates under section 2042(2).
>
> We express no opinion at this time with respect to the gift tax consequences to A or B where the trustees of their separate trusts invest in a nonincome-producing life insurance policy on their lives.

A decedent's right to veto a change in the transfer of a policy, where the decedent could gain no economic benefits from the veto power, did not constitute incidents of ownership.[3272]

The mere right to the dividends, by itself, is not an incident of ownership that would cause the value of the insurance proceeds to be included in Decedent's gross estate under Code § 2042(2).[3273] This conclusion was based on the view that dividends represent a return of premiums[3274] and did not address whether dividends in excess of premiums would be treated differently.

II.Q.4.i.ii.(b). Corporate Ownership of Policy

However, redemptions require further analysis, as do arrangements for cross-purchase agreements when all of the parties hold policies on each other through an entity. If a decedent is the sole or controlling shareholder of a corporation that owns an insurance policy on the decedent's life, then the decedent will not be deemed to possess incidents of ownership as a result of the decedent's stock ownership so long as the proceeds of the policy are payable to the corporation.

II.Q.4.i.ii.(c). Partnership Ownership of Policy

Neither Code § 2042 nor its Regulations specifically address the issues raised by insurance owned by a partnership in which the insured is a partner. However, case law and IRS rulings have analyzed these issues. The Tax Court has held that a general partner does not possess incidents of ownership in a policy that names a general partnership as the owner and beneficiary if the policy was purchased in the partnership's ordinary course of business and the insured partner owned less than a 50% interest in the general partnership.[3275] Rev. Rul. 83-147 held that a partner does possess incidents of ownership if the policy on the partner's life is owned by the partnership, designates a member of the partner's family as the beneficiary, and premiums were paid by the partnership in partial satisfaction of the partner's share of partnership income. The ruling stated that the result was different than the Tax Court case because the beneficiary was not the partnership.

In a number of Letter Rulings, the IRS has addressed Code § 2042 with respect to a partnership that owns and is designated as the beneficiary of an insurance policy on the life of one of its partners.

Letter Ruling 9623024 held that the insured general partner does not possess incidents of ownership in the policy if the partnership agreement states that the proceeds, once received by the partnership, can be distributed to the remaining partners in proportion to

---

[3272] *Estate of Rockwell v. Commissioner*, 779 F.2d 931 (3rd Cir. 1985).

[3273] CCA 201328030.

[3274] CCA 201328030 cited *Estate of Bowers v. Commissioner*, 23 T.C. 911, 917 (1955) (the right to dividends, which may be applied against a current premium, is nothing more than a reduction in the amount of premiums paid rather than a right to the income of the policy) and *Estate of Jordahl v. Commissioner*, 65 T.C. 92, 99 (1975) (since dividends are merely a reduction in the amount of premiums paid, the right to dividends is not an incident of ownership).

[3275] *Estate of Knipp v. Commissioner*, 25 T.C. 153 (1955), *acq*. in result, 1959-1 C.B. 4, *aff'd* on another issue 244 F.2d 436 (4th Cir.), *cert. denied*, 355 .S. 827 (1957).

their interests to the extent that the proceeds from the policy were not needed to pay the partnership's obligations. The IRS reasoned that the value of the deceased partner's interest would include his pro rata portion of the proceeds and therefore inclusion under Code § 2042 would amount to unwarranted double counting of the proceeds.

Letter Rulings 9625022 and 9625023 ruled that life insurance proceeds would not be included in the estate of a member in a limited liability company (that was taxed as a partnership) who could not participate in decisions regarding a policy insuring the member's life held. Letter Rulings 9625013-9625019 had the same result and also involved using the proceeds to fund the purchase of a deceased owner's share of a related corporation and also of the limited liability company, which held real estate that it rented to the corporation.

Letter Rulings 9843024 and 200111038 held that the insured limited partner does not possess incidents of ownership in the policy if the partnership agreement precludes the limited partners from exercising any control over the partnership's management and investment activities.

Letter Ruling 200017051 ruled that the insured general partner does not possess incidents of ownership in the policy if the partnership agreement expressly states that an insured partner "had no right or power to exercise or to otherwise participate in the exercise of any of the incidents of ownership with respect to such policy or policies."[3276]

In Letter Ruling 200214028, the IRS ruled that the insured general partner did not possess incidents of ownership because the proceeds were payable to or for the benefit of the partnership. In that case, the partnership agreement required that the proceeds be used to redeem the insured partner's interest in the partnership.

TAM 200432015 dealt with Code section 2042 and the transfer of insurance policies to a limited liability company. The TAM deals with Code §§ 2035 and 2042 and involves an insured who transferred an insurance policy on his own life to a limited liability company. If none of the insureds own policies on their own lives that they transfer to a limited liability company, the TAM would not apply.

II.Q.4.i.iii. IRS' Response to Request that Resulted in Letter Ruling 200747002

In response to my ruling request, Letter Ruling 200747002 held that none of the insureds possessed incidents of ownership on the policies that the others contributed to the LLC.

However, the IRS requested some modifications to the LLC's operating agreement. The IRS limited the members' ability to make decisions regarding the LLC's holding of policies. Not mentioned in the ruling is that the operating agreement originally allowed the members voting rights customarily given in a manager-managed LLC, limiting them only to the extent that no member could vote regarding insurance on that member's life. The IRS was concerned that the members could collude in a manner akin to the reciprocal trust doctrine, so it required that the operating agreement preclude members

[3276] I did not think to cite cases involving trust-owned insurance on a beneficiary's life, where no incidents of ownership were attributed to the beneficiary. Letter Rulings 9602010 and 9748020. Rev. Rul. 84-179 might also be helpful.

from voting on anything relating to any life insurance policy. Similarly, the IRS required that the operating agreement not expressly authorize amendments by the members, preferring that applicable state law defaults control the situation.

The ruling did not address the effect of the members' assigning their interests in the LLC to others. Although the IRS was not troubled by the prospect of that occurring, it did not wish to consider situations that might arise by reason of such an assignment.

An issue with respect to with a ruling was not sought is the transfer-for-value rules, which make death benefits taxable if policies are transferred in various taxable transactions.[3277] Formation of the LLC should not implicate these rules, because formation is a nontaxable transfer.[3278] Similarly, a Member receiving an increased ownership percentage of a policy due to an increased contribution is also a nontaxable transfer.[3279] In our case, the Members also participated in other LLCs that held rental real estate; because they were partners for income tax purposes, the transfer-for-value rules do not apply to transfers of policies between them.[3280]

II.Q.4.i.iv. Significance of Letter Ruling 200747002

The ruling has other implications. Using a corporate trustee to hold the policies as manager of the LLC provides security that the proceeds will be used as intended. As mentioned, one of the disadvantages of a cross-purchase is that a shareholder's creditors might be able to prevent application of the proceeds. Depending on applicable state law, the insurance being in an LLC might make a charging order the exclusive remedy. A charging order allows creditors to receive any distributions that belong to the debtor but does not allow the creditor to force the LLC to make distributions. The manager's duty to the other members would prevent the proceeds from being distributed without the consent of the deceased shareholder's beneficiaries.

The operating agreement's original restrictions on members' voting rights generally should be sufficient to avoid estate inclusion. The additional restrictions should be placed in the operating agreement only if seeking a Letter Ruling or advising a client who is willing to sacrifice flexibility to be as close as possible to the letter ruling's facts.

Letter Ruling 200747002 is not geared towards a policy with cash values. However, through a split-dollar arrangement, one might carve out the term portion for the LLC and make other arrangements with the cash value.[3281] Although the term portion eventually becomes uneconomic, one could use a variety of estate-planning techniques with the cash value portion before that happens so that, ultimately, the insurance arrangement becomes sustainable.

The ruling also held that Brother's Irrevocable Trust was a grantor trust, in which Brother was treated as owning Brother's Irrevocable Trust's assets for income tax purposes under Code § 678; Sister was similarly treated as the owner of Sister's Irrevocable Trust. This was critically important to allow Brother's Irrevocable Trust and Sister's Irrevocable

[3277] Code § 101(a)(2).
[3278] Code §§ 101(a)(2)(A), 721(a).
[3279] Code § 721(a).
[3280] Code § 101(a)(2)(B).
[3281] See footnote 3108 for a summary of how split-dollar arrangements work.

Trust to own stock in the S corporation. Brother initially had a withdrawal right in Brother's Irrevocable Trust that had since lapsed; the same tool was used for Sister and Sister's Irrevocable Trust. Although such withdrawal rights are usually used to obtain the gift tax annual exclusion, in this case a significant purpose of granting withdrawal rights was to obtain grantor trust status treating the beneficiary as the owner. Based on more recent informal conversations with a representative of the government, my understanding is that, although the IRS has no plans to change its approach toward Code Sec. 678 when it issues Letter Rulings, it also has no plans to issue a formal pronouncement upon which taxpayers can generally rely.

The above issues are as far as was the ruling was sought to cover. However, this structure has uses far beyond the issues discussed in the ruling.

First, Trusts 2A and 2B were originally funded with modest gifts that they invested in LLCs that used bank financing to buy real estate. These LLCs leased the real estate to the S corporation. The net cash flow from the rental operations would be used to pay the life insurance premiums through the insurance LLC. Thus, the income tax goal of holding real estate in partnerships was married with leveraging gifts to generation-skipping trusts.

Second, Trusts 2A and 2B were ideal for the tactic of selling stock to an irrevocable grantor trust.[3282] For example, Brother could sell S stock to Brother's Irrevocable Trust in exchange for a promissory note. No income tax would result during Brother's life, because Brother is treated for income tax purposes as owning Brother's Irrevocable Trust. If the IRS determined that the stock's value was too high and that therefore Brother made a gift, Brother would pay no gift tax because the gift is an incomplete gift due to Brother's power to appoint the trust's assets at death. If Brother's Irrevocable Trust were thinly funded, Brother and other trusts created by Grantor for Brother could guarantee the promissory note to provide additional economic reality to the sale.

If Brother dies during the term of the note, Sister and BA would use the insurance to buy Brother's Irrevocable Trust's stock, thus providing cash to retire the note to Brother.

If the sale of S stock to Brother's Irrevocable Trust generates cash flow in excess of the note payments, the excess cash could be used to pay premiums through the insurance LLC, allowing Brother's Irrevocable Trust to participate more in the buy-sell than it would have been able to do with just the net rental proceeds.

Note that Brother has access to the excess funds for Brother's support. The excess funds could also be used to help Brother's children when they are no longer legally dependents, without being limited by the annual gift tax exclusion or using Child 2A's applicable exclusion amount.

What if the parties had used a cash value policy subject to a split-dollar arrangement instead of term policies? After Brother's Irrevocable Trust fully repays the note on the sale of stock, it should have plenty of cash flow to repay the split-dollar obligations.

Sister would use the same strategy.

[3282] See part III.B.2.i Code § 678 (Beneficiary Grantor) Trusts.

II.Q.4.i.v. Practical Logistics for Life Insurance LLC

First, keep in mind that any person who is at least a 5% owner of the LLC would be considered an employee whose notice and consent are required, as described in part II.Q.4.g Income Tax Trap for Business-Owned Life Insurance. Whether the parties transfer the life insurance to the LLC or the LLC buys original issue insurance, the parties will probably use a notice and consent along the lines of part II.Q.4.g.iii Consent for Owner Who Is Not an Employee. However, the operating agreement might also include notice and consent as a safety valve.[3283]

Often, the operating business will pay the premiums on behalf of the owners – just to make sure it gets done so that the business' succession plan is funded as expected.

If the operating business is a C corporation, it would account for the premium payments as compensation (as an officer or director), because dividends are nondeductible to the company and taxable to the shareholders.

If the operating business is an S corporation, it would account for the premium payments as compensation or as a distribution. Compensation tends to be the more popular choice, in that it can be non-pro rata, but the parties' economic deal might make distributions more attractive, and any temporary timing differences of distributions should not cause problems with the S corporation single class of stock rules.[3284]

When the operating company is taxed as a partnership, it might consider setting up a separate distribution account for premiums paid on behalf of each owner. That way, the distributions can be reconciled more easily against what the life insurance LLC is doing.

When the operating company pays a term premium, the life insurance LLC would credit the relevant owner's capital account with a contribution and debit premium expense, with the premium expense separately allocated to the relevant owner.

II.Q.4.i.vi. Letter Ruling 200947006

The IRS has also ruled that an insured who was a partner in a partnership had no incidents of ownership. In Letter Ruling 200947006, the insured had direct and indirect ownership of a partnership that held a policy on his life.[3285] That partnership and other partnerships (in which the insured had direct or indirect ownership) were beneficiaries. The arrangement was restructured so that the insured had no right to make decisions on behalf of a trust that owned the partnership, and the insured's other direct or indirect interest in the partnership was terminated. The IRS ruled that the insured not only had no incidents of ownership after the transaction but also (to avoid Code § 2035) had no incidents of ownership before the transaction.

[3283] See fn. fn. 3237, which is found in part II.Q.4.g.i Analysis of Code § 101(j); for an example, see part II.Q.4.g.ii Consent Integrated into Operating Agreement.

[3284] See part II.A.2.j.ii Temporary Timing Differences.

[3285] See also Letter Rulings 200948001 and 200949004, which appear to be companion rulings.

II.Q.4.i.vii. Conclusion

The Insurance LLC provides security for the owners, facilitates flexibility in making premium payments, and demonstrates a model for reducing the number of policies that must be used in a cross-purchase. Convincing the business owners' parents to set up generation-skipping perpetual trusts to buy real estate used in the business can help the business owners continue to enjoy the business' financial success while moving the business outside of the estate tax system.

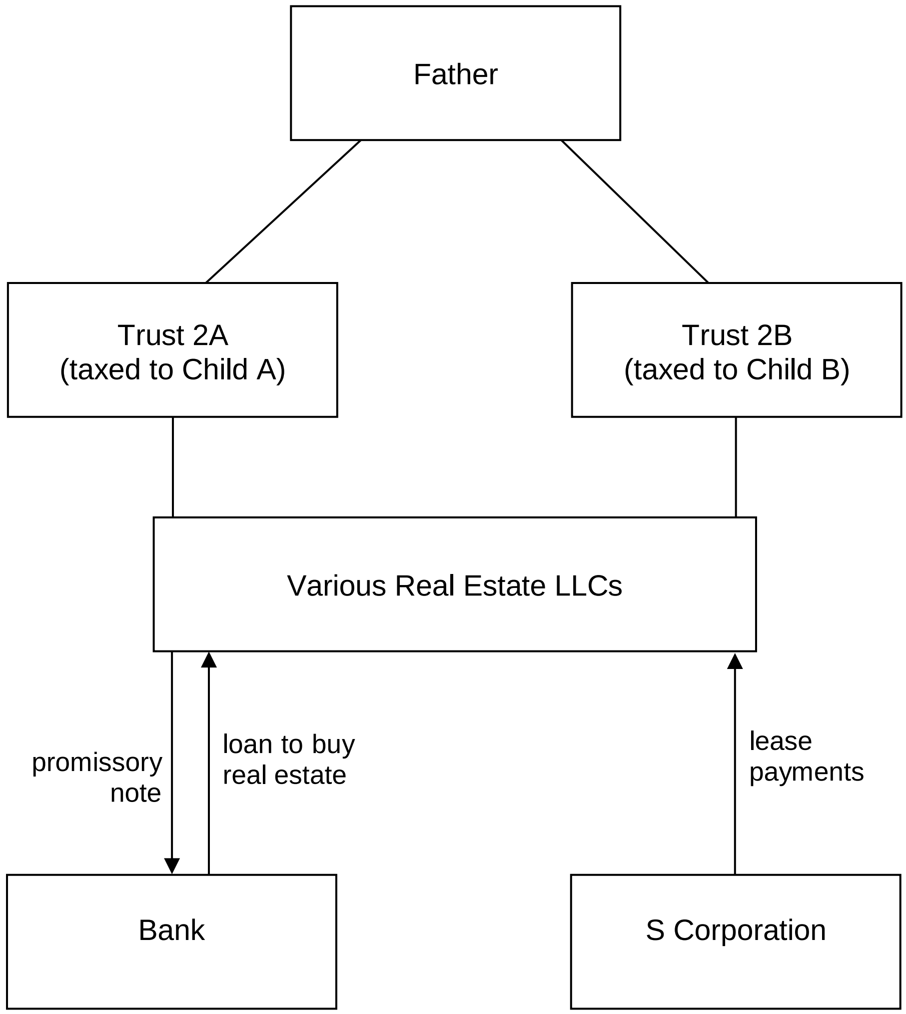
For income tax issues generally, see parts II.Q.4.e Income Tax Issues When the Owner Who Is Not the Insured Dies. If a life insurance policy owned on a surviving owner receives a new basis when the beneficial owner predeceases the surviving owner,[3286] consider whether this new basis increases the "investment in the contract" and, if not, whether additional steps should be taken to effectuate that increase.[3287]

[3286] For basis changes when a partner dies, see part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations. For basis changes on the death of an owner other than the insured, see part II.Q.4.e.i Life Insurance Basis Adjustment On the Death of an Owner Who Is Not the Insured.

[3287] See part II.Q.4.e.ii Practical Issues In Implementing Any Basis Adjustment On the Death of an Owner Who Is Not the Insured.

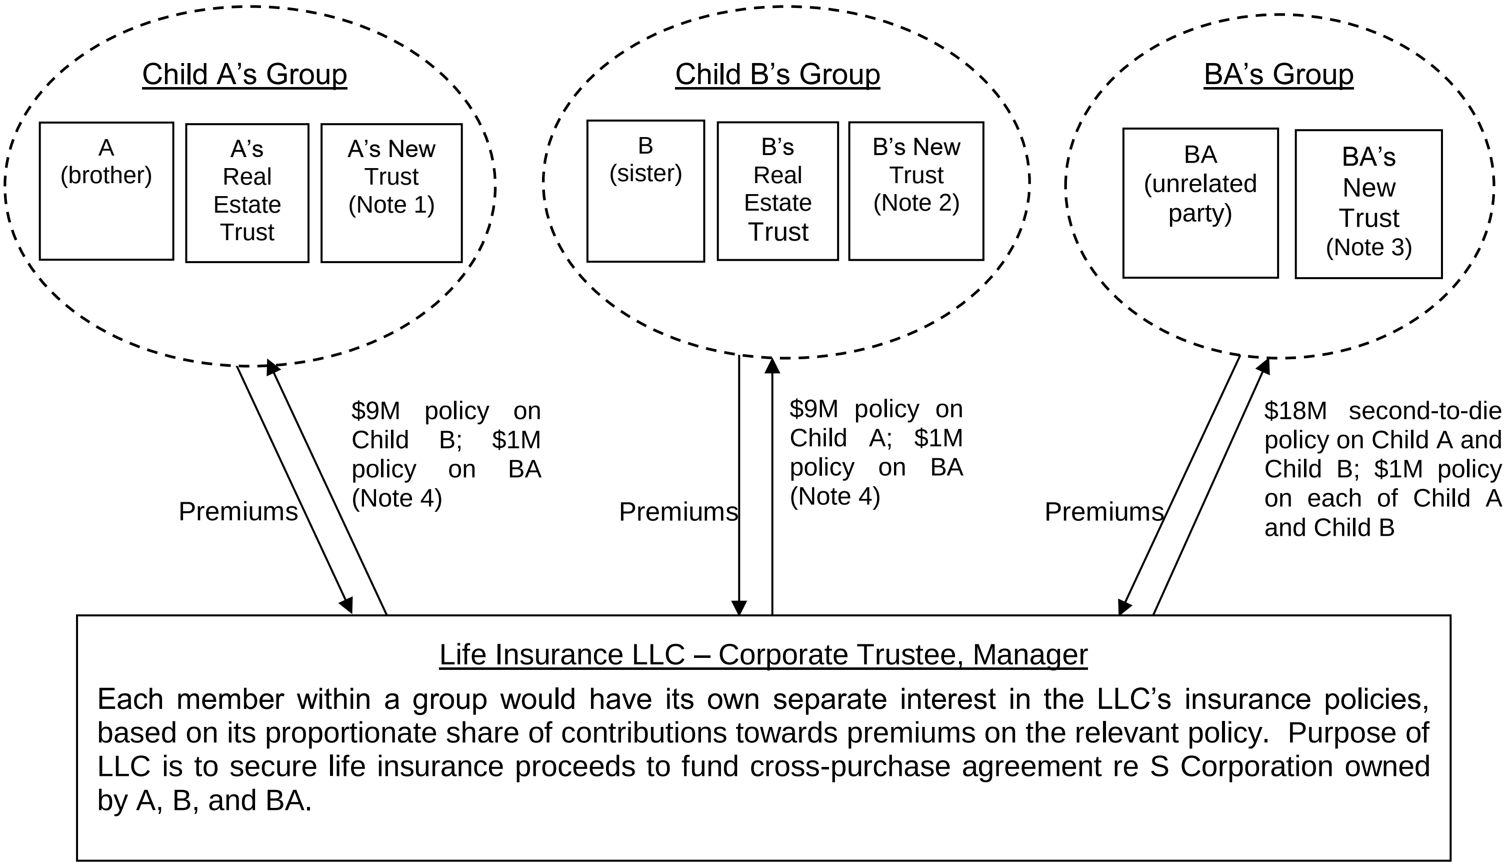
Appendix A

Prior Formation of Trusts



Appendix B

Insurance LLC Structure



Note 1: Child A would be the grantor and trustee of this irrevocable trust for his spouse's and their descendants' support, with appropriate prohibitions against discharging any support obligations.

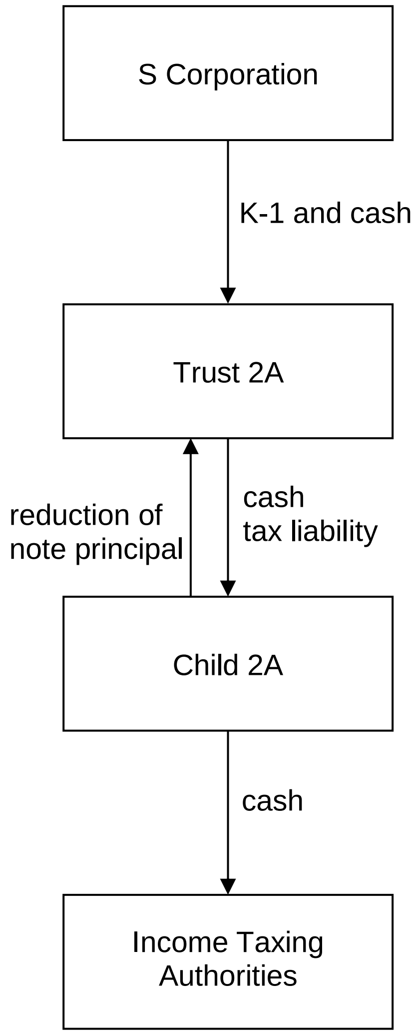
Note 2: Child B would be the grantor and trustee of this irrevocable trust for her descendants' support. (Her children are adults.) Her grandchild would be cut out, but her son could include him.

Note 3: BA would be the grantor and trustee of this irrevocable trust for his wife's and their descendants' support, with appropriate prohibitions against discharging any support obligations.

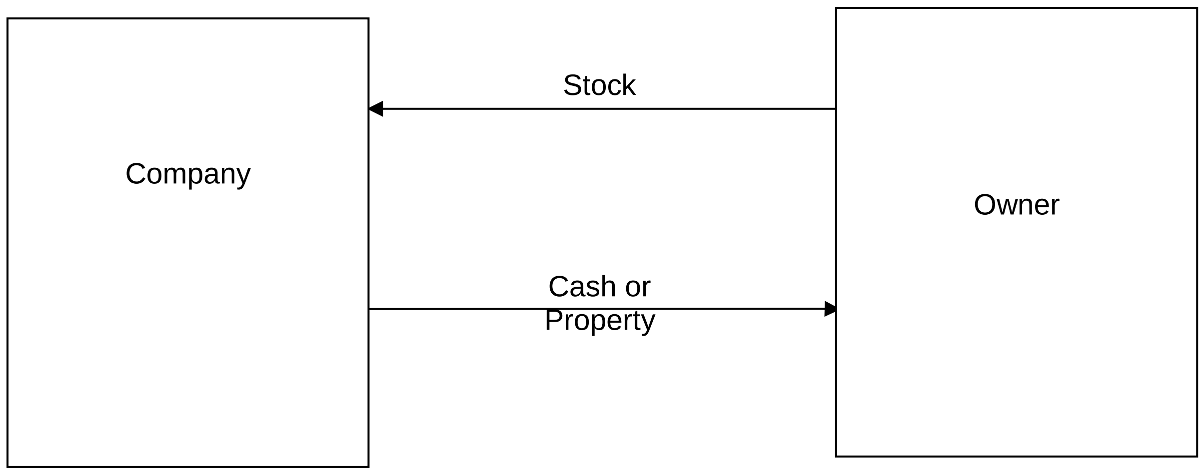
Note 4: If Child A dies first, Child B's group would become the premium payer with respect to Child A's group's policy on BA's life. If Child B dies first, Child A's group would become the premium payer with respect to Child B's group's policy on BA's life.

Appendix C

Later Sale of S Corporation Stock to Irrevocable Grantor Trust



II.Q.5. Dividing a Business Using a Redemption - Corporation vs. Partnership



II.Q.5.a. Corporations Generally

Code § 302 provides a number of rules determining whether a redemption for state law purposes is treated as a sale or exchange of the stock or as a distribution for income tax purposes.

Sale or exchange treatment has the following benefits:

- Possible installment sale deferral.

- Capital gain treatment.

- Use of a pro rata share of basis.

Distributions are treated as the following (generally):

1. Reduction in basis (no gain) to the extent of S corporation accumulated adjustments account (AAA), if applicable. If and to the extent that state-law redemption of S corporation stock is reclassified as a distribution, the redemption uses basis dollar-for-dollar rather than prorating basis.

2. Taxable dividend (no offset for basis, no installment sale deferral) to the extent of C corporation earnings and profits (E&P), if a C corporation or if an S corporation that had been a C corporation.

3. Return of basis.

4. Gain from the sale or exchange of stock.

No deferral applies if the corporation's issuance of a note is treated as a distribution.[3288]

Corporate redemptions are discussed in more detail at part II.Q.7.a Corporate Redemption.

II.Q.5.b. Partnerships Generally

Partnerships do not have a rule equivalent to Code § 302.

Subject to certain exceptions, distributions to a partner are not taxable to the extent of basis in the partner's partnership interest.[3289] Basis includes the partner's allocable share of the partnership's debt, a rule that does not apply to C or S corporations.

Partnership distributions are described generally in part II.Q.8 Exiting From or Dividing a Partnership.

Partnership redemptions use basis to offset payments (except to the extent of certain "hot assets") dollar-for-dollar until exhausted, whereas corporate redemptions often pro-rate basis or sometimes don't use basis at all (to the extent taxed as a dividend). Furthermore, if the seller dies while installments are being made, the gain is already locked in if a sale of corporate (S or C) stock, whereas arguably a basis step-up applies to a partnership interest being redeemed. See part II.Q.8.b.ii Partnership Redemption – Complete Withdrawal Using Code § 736, especially part II.Q.8.b.ii.(h) Interaction of Death with Code § 736 Payments.

II.Q.5.c. Distribution of Property

When a C corporation or an S corporation distributes property, it is deemed to have sold the property to its shareholders in a taxable transaction. In a C corporation, shareholders are taxed on dividend or partial or total liquidation. If a corporation contributes assets to charity, the contributed assets must not constitute substantially all of the corporation's assets, because a corporation recognizes gain if it conveys substantially all of its assets to a tax-exempt entity.[3290]

Generally, when a partnership distributes property, no tax consequences apply to anyone. Exceptions include:

- Property contributed no more than 7 years before distribution that is distributed to a partner other than the partner who contributed may generate a deemed sale by the contributing partner, the recipient partner, or both (but no double taxation). Code §§ 704(c)(1)(B), 737.

- A distribution of marketable securities might be deemed a distribution of cash. Code § 731(c).

[3288] See part II.Q.7.a.iii Redemption Taxed Either As Sale of Stock or Distribution; Which Is Better When, especially fn. 3453.
[3289] See part II.Q.8.b.i Distribution of Property by a Partnership.
[3290] Reg. § 1.337(d)-4(a)(1).

Partnership distributions of property are described in II.Q.8.b.i Distribution of Property by a Partnership.

II.Q.6. Contributing a Business Interest to Charity

After reading part II.Q.6.a General Concepts, see discussion of various issues, which are summarized below:

- •Part II.Q.6.b Possible Deemed Sale or Reduced Deduction When Contributing Partnership Interest to Charity. Transferring a partnership interest in a way that reduces the donor's share of the partnership's liabilities constitutes a bargain sale that may trigger income tax. Also, the amount of any charitable contribution is reduced by the amount of gain which would not have been long-term capital gain if the property contributed had been sold by the taxpayer at its fair market value (determined at the time of such contribution).

- Part II.Q.6.c Possible Adverse Consequences When Contributing Partnership Interest to Charitable Remainder Trust. A charitable remainder trust pays a 100% tax on any unrelated business taxable income generated from any actual or deemed sale of a partnership interest and or from any K-1 it receives from holding a partnership. Additionally, that income is taxed to the beneficiary when the trust makes distributions.

- Part II.Q.6.d Unrelated Business Income (UBTI) Particular UBTI topics are described below.

  - Part II.Q.6.d.i UBTI Related to a Partnership or Sole Proprietorship. UBTI can arise from the partnership's business operations or from income generated by acquisition indebtedness. Partnership debt may make the entire gain on the sale of the partnership interest constitute unrelated business income (UBI) in ways that may surprise advisors. Discussion includes whether UBI includes non-debt-financed income from operations and gain on sale.

  - Part II.Q.6.d.ii UBTI Related to an S Corporation. UBTI automatically includes items on a K-1 issued by an S corporation and gain on the sale of S corporation stock, even if the S corporation invests only in items that otherwise would not constitute UBI.

  - Part II.Q.6.d.iii Charitable Deduction Against UBTI. An entity that receives UBI can deduct against it charitable distributions to the extent of 10% if the entity is a corporation or 50% if the entity is a trust. To use this deduction, a donation for the benefit of an operating public charity should pass through a donor-advised fund taxed as a trust (or perhaps a supporting organization for the benefit of the charity).

- Part II.Q.6.e Assignment of Income on Property Being Sold. If property is subject to a legally binding obligation to sell before being donated, the donor will be taxed on the sale. However, careful drafting of the related letter of intent that typically is signed when negotiations open will avoid this issue.

- Part II.Q.6.f Incomplete Gift and Charitable Partial Interest Prohibitions:
    - Part II.Q.6.f.i Completed Gift Requirement. A gift to charity must be complete for gift tax purposes to qualify for an income tax deduction.
    - Part II.Q.6.f.iiForced Sale to Related Party for Note. When the donee was required to sell to a related party for a note, the IRS asserted that the donation was in substance the donation of a note, which is not deductible until paid.
    - Part II.Q.6.f.iii Charitable Partial Interest Prohibition. Most people are aware that split-interest gifts must be qualified charitable remainder or charitable lead trusts or qualify for other exceptions to be eligible for a charitable deduction. However, depending on the situation, slicing and dicing economic or control rights may also violate these rules.

II.Q.6.a. General Concepts

Contributions to public charities can work well, although any income from an S corporation K-1 or from the sale of S corporation stock constitutes unrelated business income subject to tax (regardless of the nature of the corporation's assets).[3291] Contributions of closely-held business interests to private foundations can be deducted only to the extent of the contributed property's basis.[3292] One might consider whether the entity should make the contribution instead of the owner making a contribution.[3293] For substantiation requirements, see part II.J.4.c Charitable Distributions.[3294]

To increase the deduction for C corporation stock, consider contributing it to a charitable remainder unitrust (CRUT),[3295] in which the donor's retained interest is worth only the 10% minimum.[3296] After the CRUT sells the stock, it will have cash, and the donor can contribute his or her unitrust interest to the charity. Thus, 90% of the donation will be of an interest in cash, valued without discounts and without the basis limitation, but it should be done more than one year after the contribution was made to the CRUT to make the unitrust interest be a long-term capital asset; also, be sure to avoid a step transaction, which the IRS might use to assert that the partial interest disallowance

---

[3291] See part II.Q.7.c S Corporations Owned by a Trust Benefitting Charity.

[3292] Code § 170(e)(1)(B)(ii).

[3293] See parts II.G.3.d.ii Basis Limitations on Deducting Charitable Contributions Made by an S Corporation or a Partnership and II.Q.7.c.i Income Tax Trap - Reduction in Trust's Charitable Deduction. For a comparison of S corporations donating business assets compared to donating S corporation stock when the donor owns all of the S corporation, see text accompanying fn. 3531.

[3294] Although part II.J.4.c is geared toward charitable deductions for fiduciary income tax purposes, fns. 1774-1775 and the accompanying text discuss substantiation requirements.

[3295] A CRUT may begin life as an income-only unitrust and then switch to a trust that pays the unitrust without regard to income (a flip unitrust). Reg. § 1.664-3(a)(1)(i)(c). A flip CRUT is often used when the assets contributed do not generate enough income to pay the unitrust. For those clients who have sufficient liquidity, rather than doing a flip CRUT they might consider doing a straight CRUT and then contribute cash to the CRUT so that it has enough money to pay them, thereby obtaining an additional charitable deduction with respect this additional gift to the CRUT.

[3296] Code § 664(d)(1)(D) requires the actuarial value of the charitable remainder interest to be at least 10% of the value of the property contributed to the trust.

applies.[3297] Also, if the sale turns out to generate fewer proceeds than expected, the donor might decide to keep part or all the unitrust interest.[3298] Deductions for contributions of partnership interests or S corporation stock may be reduced by the business entity's hot assets.[3299]

Charitable remainder trusts cannot hold stock in an S corporation;[3300] however, an S corporation may donate property to a charitable remainder trust.[3301] Also, generally they should not hold an interest in an entity taxed as a partnership, if the partnership has business income[3302] or debt-financed income,[3303] because their unrelated business taxable income is taxed at 100%.[3304]

Contributions of business interests can cause self-dealing issues (although bequests might be less likely to cause self-dealing issues)[3305] and might be subject to rules limiting the period in which a charity may own a significant part of a closely-held business.[3306]

3297 See part II.Q.6.f Incomplete Gift and Charitable Partial Interest Prohibition, especially fns. 3404-3405.

3298 A donation may not be made too close to a sale, as described in part II.Q.6.e Assignment of Income (but this concern tends to be overstated).

3299 See part II.Q.6.b Possible Deemed Sale or Reduced Deduction When Contributing Partnership Interest to Charity, especially fns. 3315-3320 (fn. 3320 explaining that the rules limiting the charitable deduction for partnership interests apply to S corporation stock as well).

3300 For what types of trusts can own stock in an S corporation, see part III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation. An election small business trust (ESBT) is the only type of trust described there into which a charitable remainder trust (CRT) might fit, but Code § 1361(e)(1)(B)(iii) prohibits a CRT from qualifying as an ESBT.

3301 See part II.Q.7.c.iv Using a Charitable Remainder Trust to Avoid Built-in Gain Tax.

3302 Code § 512(a)(1), referring to Code § 513. However, note that Code § 512(b) excludes various items, such as interest and dividends, as well as real estate rental income. For more on UBTI, see part II.Q.6.c Possible Adverse Consequences When Contributing Partnership Interest to Charitable Remainder Trust, especially fn 3335 and the accompanying text, some of which goes beyond the context of a partnership interest.

3303 Code § 512(b)(4), which is reproduced in fn. 3344 in part II.Q.6.d.i UBTI Related to a Partnership or Sole Proprietorship. Part II.Q.6.d.i discusses the scope of attributing debt to the sale of a partnership interest.

3304 Code § 664(c)(2)(A).

3305 Code § 4941. For example, Reg. § 53.4941(d)-2 mentions the sale or exchange of property, leasing, lending, furnishing of goods, services, or facilities, payment of compensation, or transfer or use of the income or assets of a private foundation as acts of self-dealing. However, Letter Ruling 201407023 held that the distribution from the donor's estate, revocable trust, or spouse's estate and retention by Foundation of non-voting units in an LLC following the death of the survivor of the donor's and the donor's spouse will not constitute indirect acts of self-dealing pursuant to Reg. § 53.4941(d)-1(b)(5), (6) and therefore will not violate Code § 4941 even though the LLC's sole assets will be the note and income generated by a note issued by the donor's daughter. See also Letter Rulings 200635017, 201446024, and 201723005, the latter of which reasoned:

> As holder of the nonvoting interests, Foundation will have no management rights or right to vote on the manager of New LLC. Revocable Trust (which will have become irrevocable at Founder's death) will own all of the voting interests, giving Revocable Trust the right to select and remove the manager of New LLC. As a holder of nonvoting interests, Foundation will have a right to receive distributions only if New LLC dissolves or chooses to make current distributions, but the timing and amount of such distributions will

Generally, the donor should contribute either all of the donor's interest in the business or an undivided interest in every right the donor has, including voting and other noneconomic rights.[3307] However, donating nonvoting stock and keeping voting stock would work.[3308] Similarly, one might create an LLC to control the sale of the donated partnership interest.[3309]

II.Q.6.b. Possible Deemed Sale or Reduced Deduction When Contributing Partnership Interest to Charity

When a partner transfers a partnership interest, any reduction in liabilities allocated to that partner is considered sale proceeds.[3310]

Similarly, if contributing a partnership interest results in the partner being relieved of liabilities[3311] (even nonrecourse liabilities)[3312] previously allocated to that partner, the

---

> be uncertain and could not be compelled by Foundation. Only Revocable Trust as the holder of the voting interests may elect or remove the manager of New LLC, and such manager will have the sole power to manage the affairs of New LLC and determine the timing and amount of distributions. Thus, Foundation and Foundation's managers (acting only in such capacity) will not have sufficient votes or positions of authority to cause New LLC to engage in a transaction.
>
> Additionally, Foundation will not have the power to compel dissolution of New LLC since New LLC may only be dissolved with written approval of all members, including Revocable Trust. The power associated with the nonvoting interests of New LLC as a necessary party to vote on the liquidation of the LLC is not considered equivalent to a "veto power" within the meaning of Treas. Reg. § 53.4941(d)-1(b)(5) because the power cannot be exercised over an action relevant to any potential act of self-dealing.
>
> Accordingly, Foundation's receipt from Revocable Trust upon Founder's death of nonvoting interests in New LLC will not constitute a loan or extension of credit between a private foundation and a disqualified person within the meaning of section 4941(d)(1) and Treas. Reg. § 53.4941(d)-2(c) because Foundation will not acquire an interest in the promissory note; instead, Foundation will acquire nonvoting interests in New LLC, with respect to which it will not have any management rights or control over distributions.

[3306] Code § 4943.

[3307] See part II.Q.6.f Incomplete Gift and Charitable Partial Interest Prohibition.

[3308] See fn. 3410 part II.Q.6.f Incomplete Gift and Charitable Partial Interest Prohibition. But donating voting stock and keeping the voting rights would not work. See fn. 3408.

[3309] See the paragraph of text accompanying fn. 3426 in part II.Q.6.f.iii Charitable Partial Interest Prohibition

[3310] Rev. Rul. 74-40, quoted in full in fn. 3859, found in part II.Q.8.b.i.(a) Code § 731: General Rule for Distributions. See also Rev. Rul. 77-402 (similar result when grantor trust status terminates with respect to a partnership interest), discussed in fn. 4974, found in part III.B.2.a Tax Basis Issues When Using Irrevocable Grantor Trusts.

[3311] See part II.C.3 Allocating Liabilities (Including Debt).

[3312] Letter Ruling 9533014 commented:

> We also note certain other consequences of the proposed transaction. A proposes to transfer to Y by gift an interest in X. The transfer of a partnership interest subject to nonrecourse liabilities to a charitable remainder trust is treated as a sale or exchange for purposes of section 1011(b) of the Code. See section 1.1001-2(c), Example (4) of the regulations; Rev. Rul. 75-194, 1975-1 C.B. 80; *Guest v. Commissioner*, 77 T.C. 9 (1981), *acq.*, 1982-1 C.B. 1. Under sections 752(d) and 1011(b) of the Code, the amount of A's share of partnership liabilities at the time of the transfer corresponding to the partnership interest transferred constitutes an amount realized by A. Consequently, in determining

donor has made a bargain sale.[3313] (Contributing various properties subject to debt, rather than a partnership interest, would result in the bargain sale rules applying to each property separately.[3314])

Also, the amount of any charitable contribution is reduced by the amount of gain which would not have been long-term capital gain[3315] if the property contributed had been sold by the taxpayer at its fair market value (determined at the time of such contribution).[3316]

A's gain, A's basis must be apportioned as required by section 1011(b) of the Code and 1.1011-2(b) of the regulations. It is not known whether section 751 of the Code applies to the transfer to require that part of the gain be treated as ordinary income (e.g., through the application of the recapture rules of section 1250). If section 751 applies, the amount of the charitable contribution may be reduced under section 170(e)(5) (applying to contributions of ordinary income property). In determining whether a charitable contribution is allowable, section 170(e)(5) is to be applied without regard to section 1011(b) and the amount by which the contributed portion of the property must be reduced is the amount determined by taking into account the amount of gain which would have been ordinary income or long-term capital gain if the contributed portion of the property had been sold by the donor at its fair market value at the time of the sale or exchange. See section 1.1011-2(a)(1) of the regulations. Finally, we note that although the liability is nonrecourse, the charity must take the liability into account in determining the net fair market value of the trust assets for calculating the unitrust amount.

[3313] Rev. Rul. 75-194 includes the following facts and conclusion:

> L became a limited partner in a partnership on its formation in 1971. In 1974, L contributed his entire limited partnership interest to a charitable organization described in section 170(c) of the Internal Revenue Code of 1954. On that date all of the partnership liabilities were liabilities on which neither L, the other partners, nor the partnership had assumed any personal liability. Also on that date, L's proportionate share of the value of the partnership assets was greater than his proportionate share of the partnership liabilities and because of partnership losses L's adjusted basis for his partnership interest was less than his proportionate share of the partnership liabilities. At the time of the contribution the partnership had no unrealized receivables or inventory items described in section 751.
>
> [Citations to Code §§ 170(a), 741, 752(c), 752(d), and 1011(b) and to Reg. §§ 1.170A-1(c), 1.752-1(e), 1.752-1(e), 1.170A-4(c)(2)(iii), 1.170A-4(c), and 1.1011-2 (including Reg. § 1.1011-2(a)(3)) follow.]
>
> Since the value of L's share of the partnership assets at the time he transferred his partnership interest exceeded his share of partnership liabilities at that time, a charitable contribution deduction is allowable under section 170 of the Code, subject to the reductions and limitations set forth therein. At the same time, pursuant to sections 752(d) and 1011(b), the amount of L's share of partnership liabilities at the time of the transfer constitutes an amount realized by L. Based on the foregoing, a bargain sale within the meaning of sections 170 and 1011(b) has occurred.
>
> Accordingly, in the instant case, L has a recognized gain on the transfer equal to the excess of the amount realized by L over that portion of the adjusted basis of L's partnership interest (at the time of the transfer) allocable to the sale under section 1011(b) of the Code. Since the partnership had no unrealized receivables or appreciated inventory items described in section 751, the gain is considered a gain from the sale of a capital asset under section 741.

[3314] Letter Ruling 201709001.

[3315] Determined without regard to Code § 1221(b)(3).

[3316] Code § 170(e)(1)(A).

Although the sale of a partnership interest generally is taxed as a capital gain[3317] (which might be long- or short-term), certain underlying assets might convert part or all of the gain to ordinary income.[3318] However, the partnership's holding of certain assets that otherwise might have severe limitations on deductions[3319] does not appear to taint the deduction for the partnership interest.[3320]

II.Q.6.c. Possible Adverse Consequences When Contributing Partnership Interest to Charitable Remainder Trust

Letter Ruling 9705013 approved a charitable remainder trust (CRT) investing in an in an investment partnership. However, contributing a partnership interest to a CRT is very complex and might not be worthwhile if the partnership operates a business or has significant debt-financed property. Below are some issues.

First is a possible gain on sale, as described in part II.Q.6.b Possible Deemed Sale or Reduced Deduction When Contributing Partnership Interest to Charity, especially fn. 3312.

3317 Code § 741; see part II.Q.8.e.ii.(b) Character of Gain on Sale of Partnership Interest, especially fns. 4124-4126 (look to partnership interest itself absent statutory authority to look through to the partnership's assets).

3318 See parts II.Q.8.b.i.(f) Code § 751 – Hot Assets and II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill), the latter including fn. 3681 the sale of partnership interests to a controlled corporation.

3319 Code § 170(e)(1)(B) reduces the deduction regarding contributions:

- (i) of tangible personal property—
  - (I) if the use by the donee is unrelated to the purpose or function constituting the basis for its exemption under section 501 (or, in the case of a governmental unit, to any purpose or function described in subsection (c)), or
  - (II) which is applicable property (as defined in paragraph (7)(C), but without regard to clause (ii) thereof) which is sold, exchanged, or otherwise disposed of by the donee before the last day of the taxable year in which the contribution was made and with respect to which the donee has not made a certification in accordance with paragraph (7)(D),
- (ii) to or for the use of a private foundation (as defined in section 509(a)), other than a private foundation described in subsection (b)(1)(F),
- (iii) of any patent, copyright (other than a copyright described in section 1221(a)(3) or 1231(b)(1)(C)), trademark, trade name, trade secret, know-how, software (other than software described in section 197(e)(3)(A)(i)), or similar property, or applications or registrations of such property, or
- (iv) of any taxidermy property which is contributed by the person who prepared, stuffed, or mounted the property or by any person who paid or incurred the cost of such preparation, stuffing, or mounting

3320 The flush language of Code § 170(e)(1), provides that, for purposes of applying Code § 170(e)(1) to the charitable contribution of stock in an S corporation, rules similar to those in fn. 3318 shall apply in determining whether gain on such stock would have been long-term capital gain if such stock were sold by the taxpayer. If the rules of Code § 170(e)(1)(B) looked through the partnership, presumably they would also look through an S corporation, which they do not.

Second, a charitable remainder trust (CRT) pays a 100% tax on any unrelated business taxable income (UBTI).[3321] The beneficiary also pays tax on this income (along with the rest of the CRT's income) when distributed to the beneficiary.[3322] A gift of any partnership interest that has significant debt risks significant UBTI – a risk that is probably too high for a CRT, given this 100% tax.[3323] One might avoid the UBI issue if the donor keeps part of the partnership interest and contractually assumes the burden of the partnership's debt;[3324] whether that idea is practical or too complex depends on the situation.

[3321] Code § 664(c)(2)(A); Reg. § 1.664-1(c). The latter refers to UBTI as defined in section 512, determined as if part III, subchapter F, chapter 1, subtitle A of the Internal Revenue Code applied to such trust.

[3322] Code § 664(b); Reg. § 1.664-1(c). The latter provides, Such excise tax shall be allocated to corpus and, therefore, is not deductible in determining taxable income distributed to a beneficiary.

[3323] See part II.Q.6.d Unrelated Business Income, especially fns. 3354-3364.

[3324] The TAM's holding regarding the escrow fund to reallocate nonrecourse debt, which was described in fn. 3355, together with its reference to Code § 752 (see fn. 3354). See 735 T.M. *Private Equity Funds*, part VIII.H.1., suggesting:

> A fund that allows its tax-exempt investors to replace their share of any fund level debt with a capital contribution should allocate the debt to the other investors. *See* TAM 9651001 (applying § 752 to determine portion of partnership debt allocable to tax-exempt partner).

For the assumption of liabilities when transferring a partnership interest to which liabilities have been allocated, see fn. 4975, found in part III.B.2.g Income Tax Concerns When Removing Property from the Estate Tax System.

Hill & Mancino, *Taxation of Exempt Organizations*, ¶ 26.03[3] Nonassumed Debt, direct the reader to GCM 39486 (1986), in which the IRS internally had asked:

> If an organization exempt from tax under section 501(a) is a limited partner in a partnership that lends money under or acquires wrap-around mortgages, are the wrap-around mortgages debt-financed property of the exempt organization?

Relying on Rev. Rul. 75-99, the GCM concluded:

> A wrap-around mortgage acquired by the partnership as an investment solely by advancing its own funds is not debt-financed property merely because the wrap-around note is for an amount in excess of the funds advanced by the partnership.

Rev. Rul. 75-99 involved the following:

> An unincorporated trust, qualifying as a real estate investment trust under section 856 of the Internal Revenue Code of 1954, invested in a wrap-around loan. In the wrap-around loan in this case a party owning real estate encumbered by a senior mortgage executed a note to the trust for the total of the unpaid principal balance of the senior mortgage, plus cash advanced by the trust. The borrower also executed a mortgage to the trust encumbering the real estate described in the senior mortgage. The trust agreed to look solely to the mortgaged property for the payment of the indebtedness and agreed not to seek or obtain any deficiency or other money judgment in respect thereof. The borrower received from the trust that sum by which the principal amount of the wrap-around loan exceeded the unpaid principal balance of the senior mortgage.
>
> The trust is not liable to the senior mortgagee on the underlying note. However, the trust agreed with the mortgagor-owner to make the periodic payments of principal and interest due on the senior obligation, provided, however, that if the mortgagor defaults on its payments on the note to the trust, the trust is relieved of its obligation to make payments on the senior mortgage. For purposes of making payments on the senior mortgage and performing other obligations required under the mortgage, the borrower appointed the trust its attorney-in-fact.

Consider whether, instead of contributing a partnership interest to a CRT, one might place the partnership interest in a corporation and contribute the corporation to the CRT. Such a corporation is commonly referred to as a blocker. Any partnership liabilities from which the donor is deemed to be relieved might trigger income on formation of the corporation.[3325] The CRT would not receive any UBTI; however, the corporation would pay tax on its share of the partnership's income and on any gain on sale of the partnership. If the partnership has little or no debt-financed property, then the corporation might save little tax and might even cost more tax; if it has much debt-financed property, then the corporation might produce a significant benefit. The benefit of forming the corporation would be taxing income at regular rates instead of 100% while getting the benefit of the deduction of the full value of the corporation (which presumably would be reduced by tax paid on the expected upcoming sale of the partnership interest). However, the corporation's sale of the partnership interest would be subject to income tax at corporate rates, whereas the CRT's sale of a partnership interest it owns

---

> In the wrap-around loan in this case, the trust determined that certain property with a 300x dollar senior mortgage bearing interest at 7 percent per annum was of sufficient value to support a wrap-around loan to the owner in the amount of 400x dollars at 8 percent per annum. The borrower executed a note, and a mortgage securing the note, in the amount of 400x dollars at 8 percent per annum. The trust advanced 100x dollars to the borrower, the amount by which the wrap-around loan exceeded the principal of the senior mortgage. The borrower periodically pays to the trust an amount equal to interest at the rate of 8 percent on the 400x dollar note, together with principal thereon.

Rev. Rul. 75-99 held:

> Section 856(c)(2) and (3) of the Code provides that for a trust to qualify as a real estate investment trust, certain percentages of its gross income must be derived from specified sources, including interest and interest on obligations secured by mortgages on real property.
>
> For purposes of section 856(c)(2) and (3) of the Code, the indebtedness between the trust and the borrower giving rise to an obligation to pay interest is not the total amount of the wrap-around loan. See *Mindlin v. Davis*, 74 So.2d 789 (Fla. 1954). Although the borrower signs a note for 400x dollars, the trust actually loans the borrower 100x dollars. Payments made by the trust on the senior obligation are considered to be made on behalf of the borrower from payments received from the borrower on the 400x dollar note. Accordingly, it is held that only the interest on 100x dollars, the amount of the cash advanced by the trust, is includible in the trust's gross income.

Analogizing, GCM 39486 reasoned:

> Here, as in Rev. Rul. 75-99, there is no indication that the contract between the partnership and the borrower creates a debtor-creditor relationship between the partnership and the lender under the first mortgage. The partnership does not contract with the lender under the first mortgage for liability for repayment of the first mortgage. Thus, it cannot be said, on these facts, that the partnership has borrowed the amount of the first mortgage in order to advance the funds to the borrower. Accordingly, there is not any acquisition indebtedness.
>
> The same conclusion is reached by analyzing the property acquired. In this case, the partnership acquires a note secured by an interest in property subordinate to one or more other mortgages or similar interests in the property. The partnership does not acquire the borrower's property that is subject to these senior obligations. Thus, the property acquired is not, in our opinion, subject to any acquisition indebtedness, rather, the property acquired (the note) is an obligation to pay secured by the borrower's encumbered property. Thus, we think it is clear that a wrap-around note acquired by the partnership solely by advancing its own funds is not debt-financed property.

[3325] See part II.M.2.b Initial Incorporation: Effect of Assumption of Liabilities.

directly would defer or avoid income tax on gain on the sale, if and to the extent that the sale would not generate UBTI. Furthermore, if the CRT sold its shares in the corporation, a purchaser would reduce the price to take into account the partnership's built-in gain, especially if the purchaser would have been able to benefit from depreciation or amortization deductions if it had bought the partnership interest directly.[3326] So, the blocker concept, although avoiding UBTI issues, might not save much money, and a donor concerned about UBTI might consider just selling the partnership interest and donating the proceeds.

Another way a CRT could avoid UBTI from a partnership is to contribute to a blocker any portion of the partnership interest that would generate UBTI. If the partnership interest is about to be sold and the sale itself would not generate UBTI, then the blocker can avoids UBTI on current income without subjecting the sale proceeds to the corporate tax regime. To avoid the prohibition described in part II.Q.6.f Incomplete Gift and Charitable Partial Interest Prohibition, the donor should contribute to the CRT a vertical slice of everything the donor owns in the partnership, and then the CRT contributes to the blocker the portion of the partnership interest that generates UBTI.

In either CRT scenario, the UBTI would be taxed at the corporate level and again when the CRT distributes the dividend to the recipient, rather than being taxed to the donor at the donor's ordinary income tax rates (which usually are higher than corporate rates but lower than corporate rates and capital gain rates combined), so the sale not taking place would increase the annual income tax burden. On the other hand, the charitable deduction might offset this tax disadvantage to a certain extent. Note also that distributions to the recipient, which are based on a percentage (5% or more) of the value of the CRT's assets, would likely be smaller than the annual distributions from the partnership.

Also note that the donor being compensated for services to the partnership or otherwise engaging in transactions with the partnership might be limited by self-dealing rules:[3327] Payment of compensation by a private foundation directly or indirectly to a disqualified person is self-dealing.[3328] One may be a disqualified person with respect to a CRT by being a "substantial contributor" to the CRT[3329] or a trustee of the CRT.[3330] The payment of compensation to a disqualified person by a partnership owned by the CRT is not direct self-dealing because the payment is not being made by the CRT to the recipient. Instead, one would look to rules governing indirect self-dealing[3331] between a disqualified person and an organization controlled[3332] by a private foundation.

[3326] See part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations.
[3327] See Letter Ruling 9533014.
[3328] Code § 4941(d)(1)(D).
[3329] A substantial contributor is the creator of a charitable trust and any donor who gives more than $5,000 to the private foundation if the amount given is more than 2% of the total contributions in the taxable year. Code §§ 4946(a)(2) and 507(d)(2).
[3330] Code § 4946(a)(1).
[3331] Reg. § 53.4941(d)-1(b), which provides the indirect self-dealing rules and various exceptions.
[3332] Reg. § 53.4941(d)-1(b)(5).

Also, if the partnership is unmarketable,[3333] then any required valuation (at initial contribution and annually for a unitrust) must be performed exclusively by an independent trustee or determined by a current qualified appraisal from a qualified appraiser.[3334]

II.Q.6.d. Unrelated Business Income (UBTI)

II.Q.6.d.i. UBTI Related to a Partnership or Sole Proprietorship

UBTI can arise from business operations[3335] or from income generated by acquisition indebtedness. If a trade or business regularly carried on by a partnership of which an

---

[3333] Reg. § 1.664-1(a)(7)(ii) provides:

> *Unmarketable assets*. Unmarketable assets are assets that are not cash, cash equivalents, or other assets that can be readily sold or exchanged for cash or cash equivalents. For example, unmarketable assets include real property, closely-held stock, and an unregistered security for which there is no available exemption permitting public sale.

[3334] Reg. § 1.664-1(a)(7)(i).

[3335] Code § 512(a)(1). Citing Code § 513(a), (c) and Reg. § 1.513-1(a), Letter Ruling 201626004 reasoned:

> Therefore, unless one of the specific exceptions of sections 512 or 513 is applicable, gross income of an exempt organization subject to the tax imposed by section 511 is includible in the computation of unrelated business taxable income if:
> (1) it is income from a trade or business;
> (2) such trade or business is regularly carried on by the organization; and
> (3) the conduct of such trade or business is not substantially related (other than through the production of funds) to the organization's performance of its exempt functions.

The Letter Ruling reviewed Reg. § 1.513-1(c)(1):

> Hence, for example, specific business activities of an exempt organization will ordinarily be deemed to be regularly carried on if they manifest a frequency and continuity, and are pursued in a manner, generally similar to comparable commercial activities of nonexempt organizations.

After reviewing Reg. § 1.513-1(d) (see fn. 3370 in part II.Q.6.d.i UBTI Related to a Partnership or Sole Proprietorship) for whether an activity is substantially related (other than through the production of funds) to the purposes for which exemption is granted, it reviewed case law:

> In *United States v. American Bar Endowment*, 477 U.S. 105 (1986), the Supreme Court held that a section 501(c)(3) organization's insurance program constituted both the sale of goods and the performance of services and, therefore, was a trade or business for purposes of the tax on unrelated business income. The organization was the group policyholder and administrator of insurance policies offering life, disability and medical coverage. Its activities included compiling a list of its members and soliciting their insurance business.
>
> In *Ohio Farm Bureau Federation, Inc., v, Commissioner*, 106 T.C. 222 (1996), the Tax Court concluded that a covenant not to compete did not constitute a trade or business. The Tax Court declined to treat the absence of activity as equivalent to the affirmative conduct of a trade or business in the context of unrelated business income.

The Letter Ruling addressed a donation of accounts receivable bequeathed to a foundation:

> At the time of Decedent's death, the Company's primary assets were receivables related to legal services provided by the Company in connection with certain lawsuits (the receivables). The receivables represent the Company's share of the remaining unpaid balance of the attorney's fees awarded upon settlement of the lawsuits. The fees due to the Company were determined under various settlement agreements and, under the terms of the settlement, payment of fees was deferred over time. Payments are expected

organization is a member is an unrelated trade or business with respect to the organization, the organization in computing its UBTI must, subject to the exceptions, additions, and limitations contained in Code § 512(b), include its share (whether or not distributed) of the gross income of the partnership from such unrelated trade or business and its share of the partnership deductions directly connected with such gross income.[3336] For UBI purposes, generally a trust looks to "any trade or business regularly carried on by such trust or by a partnership of which it is a member."[3337] Conversely,

---

> to continue for approximately x additional years. The Company's ownership in its share of the attorney's fees payable wholly vested when the lawsuits finally settled, which was prior to Decedent's death. Currently, none of the Estate, the Foundation, or the Company provides any services in relation to the legal services generating the receivables. Furthermore, the Foundation represents that it will not perform any act (including administrative acts) with respect to the receivables other than receiving payments related to satisfaction of the receivables.
>
> The Foundation represents that the receivables:
>
> - Are comprised solely of income from services previously provided by the Company, including Decedent;
> - Are not debt-financed property within the meaning of section 514(b); and
> - Are not gains or losses from the sale or exchange or other disposition of any property or gains or losses from the lapse or termination of options to buy or sell securities.

The Letter Ruling concluded:

> However, the Company completed provision of the legal services prior to Decedent's death. The Foundation represents that none of the Estate, the Foundation, or the Company currently provides any services in relation to the receivables and, further, that the Foundation will not perform any act (including administrative acts) other than receiving payments related to satisfaction of the receivables. The Foundation is merely the distributee of the assets of the Estate and the recipient of the payments. The Foundation is performing no activity, similar to the organization in *Ohio Farm Bureau Federation, Inc.*, *supra*, other than receiving payments. The Foundation is neither selling goods nor performing any services in order to receive income from the receivables, unlike the organization in *United States v. American Bar Endowment*, *supra*, that was engaged in a trade or business. See section 513(c); Treas. Reg. Sec. 1.513-1(b). Therefore, the income resulting from the receivables is not unrelated business income within the meaning of section 512(a) and will not be subject to the tax on unrelated business income described in section 511(a).

[3336] Code § 512(c)(1).

[3337] Code § 513(b) provides:

> The term "unrelated trade or business" means, in the case of—
>
> (1) a trust computing its unrelated business taxable income under section 512 for purposes of section 681 ; or
>
> (2) a trust described in section 401(a) , or section 501(c)(17) , which is exempt from tax under section 501(a);
>
> any trade or business regularly carried on by such trust or by a partnership of which it is a member.

Reg. 1.512(c)-1 provides:

> In the event an organization to which section 511 applies is a member of a partnership regularly engaged in a trade or business which is an unrelated trade or business with respect to such organization, the organization shall include in computing its unrelated business taxable income so much of its share (whether or not distributed) of the partnership gross income as is derived from that unrelated business and its share of the deductions attributable thereto. For this purpose, both the gross income and the deductions shall be computed with the necessary adjustments for the exceptions, additions, and limitations referred to in section 512(b) and in § 1.512(b)-1. For example,

when a foundation collects accounts receivable that the decedent had earned and bequeathed to it but the foundation did not conduct the business from which the accounts receivable arose, income from collecting the accounts was not UBI.[3338]

Although dividends,[3339] interest,[3340] annuity payments,[3341] royalties,[3342] rent from real property or from personal property incidental to the real property rental,[3343] and capital

---

> if an exempt educational institution is a partner in a partnership which operates a factory and if such partnership also holds stock in a corporation, the exempt organization shall include in computing its unrelated business taxable income its share of the gross income from the operation of the factory, but not its share of any dividends received by the partnership from the corporation. If the taxable year of the organization differs from that of the partnership, the amounts included or deducted in computing unrelated business taxable income shall be based upon the income and deductions of the partnership for each taxable year of the partnership ending within or with the taxable year of the organization.

[3338] Letter Ruling 201626004 reasoned:

> At the time of Decedent's death, the Company's primary assets were receivables related to legal services provided by the Company in connection with certain lawsuits (the receivables). The receivables represent the Company's share of the remaining unpaid balance of the attorney's fees awarded upon settlement of the lawsuits. The fees due to the Company were determined under various settlement agreements and, under the terms of the settlement, payment of fees was deferred over time. Payments are expected to continue for approximately x additional years. The Company's ownership in its share of the attorney's fees payable wholly vested when the lawsuits finally settled, which was prior to Decedent's death. Currently, none of the Estate, the Foundation, or the Company provides any services in relation to the legal services generating the receivables. Furthermore, the Foundation represents that it will not perform any act (including administrative acts) with respect to the receivables other than receiving payments related to satisfaction of the receivables.
>
> The Foundation represents that the receivables:
>
> - Are comprised solely of income from services previously provided by the Company, including Decedent;
> - Are not debt-financed property within the meaning of section 514(b); and
> - Are not gains or losses from the sale or exchange or other disposition of any property or gains or losses from the lapse or termination of options to buy or sell securities.

The Letter Ruling concluded:

> However, the Company completed provision of the legal services prior to Decedent's death. The Foundation represents that none of the Estate, the Foundation, or the Company currently provides any services in relation to the receivables and, further, that the Foundation will not perform any act (including administrative acts) other than receiving payments related to satisfaction of the receivables. The Foundation is merely the distributee of the assets of the Estate and the recipient of the payments. The Foundation is performing no activity, similar to the organization in *Ohio Farm Bureau Federation, Inc.*, *supra*, other than receiving payments. The Foundation is neither selling goods nor performing any services in order to receive income from the receivables, unlike the organization in *United States v. American Bar Endowment*, *supra*, that was engaged in a trade or business. See section 513(c); Treas. Reg. Sec. 1.513-1(b). Therefore, the income resulting from the receivables is not unrelated business income within the meaning of section 512(a) and will not be subject to the tax on unrelated business income described in section 511(a).

[3339] Code § 512(b)(1).

[3340] Code § 512(b)(1).

gains (and gain from certain other property) generally do not constitute unrelated business income (UBI) if the donee does not engage in business activity, but if they arise from debt-financed property then they may constitute UBI.[3344] Below is a discussion of gain on sale without considering debt-financing, then debt-financing is addressed.

The exclusion of gains, Code § 512(b)(5), provides:

> There shall be excluded all gains or losses from the sale, exchange, or other disposition of property other than-
>
> (A) stock in trade or other property of a kind which would properly be includible in inventory if on hand at the close of the taxable year, or
>
> (B) property held primarily for sale to customers in the ordinary course of the trade or business.

[3341] Code § 512(b)(1). Letter Ruling 200425027 held that bequests relating to the following were not UBI:

> In addition to receiving the residue of the Decedent's estate, Trust will be funded by a distribution from Decedent's Plan 1 and Decedent's Plan 2 (the "Plans"). In addition, Trust will be funded by a distribution from Decedent's Annuity. It is represented that (1) the Plans are qualified plans under section 401; (2) the Annuity is not a qualified plan under section 401 or an individual retirement account (IRA), but is a tax-sheltered annuity that was purchased by Decedent as an investment; and (3) the Decedent's basis in the Annuity was greater than the fair market value of the Annuity at the date of Decedent's death.

Similarly, Letter Ruling 200234019 held that bequests relating to the following, that an estate assigned to charity, were not UBI:

> Decedent's Estate included four contracts, represented as being annuities described in § 403(b), and three individual retirement accounts (IRAs), represented as being qualified IRAs described in § 408. Decedent was also the beneficiary of a custodial account held in the name of the Decedent's late spouse, represented as being an account described in § 403(b)(7).

[3342] Code § 512(b)(2).

[3343] Code § 512(b)(3). Short-term rentals involving significant services constitute UBI. Rev. Rul. 76-402 (ten-week summer tennis camp, in which a school provided tennis courts, furnished dormitory rooms, linens, maid service, meals, and dining facilities for use by the individual in conducting the camp), amplified Rev. Rul. 80-297; Rev. Rul. 80-298 (professional football team leases stadium from university for practice during several months of the year, with university providing heat, light, water, dressing room, linen, significant stadium security services, and maintenance of playing surface and all other ground.). The IRS' web page, at https://www.irs.gov/charities-non-profits/exclusion-of-rent-from-real-property-from-unrelated-business-taxable-income, provides an informal brief overview in "Exclusion of Rent from Real Property from Unrelated Business Taxable Income."

See also part II.L.2.a.ii Rental Exception to SE Tax, especially fns. 2379-2387, comparing the rental exception for self-employment tax to the rental exception for UBTI purposes (the latter being set forth in fn. 2384).

[3344] Superseding Code § 512(b)(5) and other exceptions, Code § 512(b)(4) provides:

> Notwithstanding paragraph (1), (2), (3), or (5), in the case of debt-financed property (as defined in section 514) there shall be included, as an item of gross income derived from an unrelated trade or business, the amount ascertained under section 514(a)(1), and there shall be allowed, as a deduction, the amount ascertained under section 514(a)(2).

> There shall also be excluded all gains or losses recognized, in connection with the organization's investment activities, from the lapse or termination of options to buy or sell securities (as defined in section 1236(c)) or real property and all gains or losses from the forfeiture of good-faith deposits (that are consistent with established business practice) for the purchase, sale, or lease of real property in connection with the organization's investment activities. This paragraph shall not apply with respect to the cutting of timber which is considered, on the application of section 631, as a sale or exchange of such timber.

This provision does not protect various depreciable or amortizable property from constituting UBI.[3345] When Code § 512(b)(5) refers to the sale, exchange, or other disposition of property, it encompasses "gains and losses from involuntary conversions, casualties, etc."[3346]

Special rules apply regarding options.[3347]

Beyond that, let's focus on whether property, held by an exempt organization itself, is inventory or held for the sale to customers, which depend on the organization's activities. An exempt organization's specific business activities ordinarily be deemed to be "regularly carried on" if they manifest a frequency and continuity, and are pursued in a manner, generally similar to comparable commercial activities of nonexempt organizations.[3348] "Where income producing activities are of a kind normally conducted

---

[3345] Reg. § 1.1245-6(b) (see part II.G.5.b Code § 1245 Property) may override Code § 512(b)(5):

> *Nonrecognition sections overridden*. The nonrecognition provisions of subtitle A of the Code, which section 1245 overrides include, but are not limited to, sections 267(d), 311(a), 336, 337, 501(a), 512(b)(5) and 1039. See section 1245(b) for the extent to which section 1245(a)(1) overrides sections 332, 351, 361, 371(a), 374(a), 721, 731, 1031, 1033, 1071, and 1081 (b)(1) and (d)(1)(A). For limitation on amount of adjustments reflected in adjusted basis of property disposed of by an organization exempt from income taxes (within the meaning of section 501(a)), see paragraph (a)(8) of § 1.1245-2.

[3346] Reg. § 1.512(b)-1(d)(1).

[3347] Reg. § 1.512(b)-1(d)(2) provides:

> There shall be excluded from the computation of unrelated business taxable income any gain from the lapse or termination after December 31, 1975, of options to buy or sell securities (as that term is defined in section 1236(c)). An option is considered terminated when the organization's obligation under the option ceases by any means other than by reason of the exercise or lapse of such option. If the exclusion is otherwise available it will apply whether or not the organization owns the securities upon which the option is written, that is, whether or not the option is "covered." However, income from the lapse or termination of an option is excludable only if the option is written in connection with the organization's investment activities. Thus, for example, if the securities upon which the options are written are held by the organization as inventory or for sale to customers in the ordinary course of a trade or business, the income from the lapse or termination will not be excludable under the provisions of this paragraph. Similarly, if an organization is engaged in the trade or business of writing options (whether or not such options are covered) the exclusion will not be available.

[3348] Reg. § 1.513-1(c)(1) provides:

> *General principles*. In determining whether trade or business from which a particular amount of gross income derives is "regularly carried on," within the meaning of section 512, regard must be had to the frequency and continuity with which the activities productive of the income are conducted and the manner in which they are pursued. This requirement must be applied in light of the purpose of the unrelated business income tax

by nonexempt commercial organizations on a year-round basis, the conduct of such activities by an exempt organization over a period of only a few weeks does not constitute the regular carrying on of trade or business." [3349] Assets that normally generate business income that the charity sells in an orderly disposition without undertaking further activity do not constitute UBI.[3350]

> to place exempt organization business activities upon the same tax basis as the nonexempt business endeavors with which they compete. Hence, for example, specific business activities of an exempt organization will ordinarily be deemed to be "regularly carried on" if they manifest a frequency and continuity, and are pursued in a manner, generally similar to comparable commercial activities of nonexempt organizations.

[3349] Reg. § 1.513-1(c)(2)(i), which continues:

> For example, the operation of a sandwich stand by a hospital auxiliary for only 2 weeks at a state fair would not be the regular conduct of trade or business. However, the conduct of year-round business activities for one day each week would constitute the regular carrying on of trade or business. Thus, the operation of a commercial parking lot on Saturday of each week would be the regular conduct of trade or business. Where income producing activities are of a kind normally undertaken by nonexempt commercial organizations only on a seasonal basis, the conduct of such activities by an exempt organization during a significant portion of the season ordinarily constitutes the regular conduct of trade or business. For example, the operation of a track for horse racing for several weeks of a year would be considered the regular conduct of trade or business because it is usual to carry on such trade or business only during a particular season.

Reg. § 1.513-1(c)(2)(ii) provides:

> *Intermittent activities; in general*. In determining whether or not intermittently conducted activities are regularly carried on, the manner of conduct of the activities must be compared with the manner in which commercial activities are normally pursued by non-exempt organizations. In general, exempt organization business activities which are engaged in only discontinuously or periodically will not be considered regularly carried on if they are conducted without the competitive and promotional efforts typical of commercial endeavors. For example, the publication of advertising in programs for sports events or music or drama performances will not ordinarily be deemed to be the regular carrying on of business. Similarly, where an organization sells certain types of goods or services to a particular class of persons in pursuance of its exempt functions or "primarily for the convenience" of such persons within the meaning of section 513(a)(2) (as, for example, the sale of books by a college bookstore to students or the sale of pharmaceutical supplies by a hospital pharmacy to patients of the hospital), casual sales in the course of such activity which do not qualify as related to the exempt function involved or as described in section 513(a)(2) will not be treated as regular. On the other hand, where the nonqualifying sales are not merely casual, but are systematically and consistently promoted and carried on by the organization, they meet the section 512 requirement of regularity.

Reg. § 1.513-1(c)(2)(iii) provides:

> *Intermittent activities; special rule in certain cases of infrequent conduct*. Certain intermittent income producing activities occur so infrequently that neither their recurrence nor the manner of their conduct will cause them to be regarded as trade or business regularly carried on. For example, income producing or fund raising activities lasting only a short period of time will not ordinarily be treated as regularly carried on if they recur only occasionally or sporadically. Furthermore, such activities will not be regarded as regularly carried on merely because they are conducted on an annually recurrent basis. Accordingly, income derived from the conduct of an annual dance or similar fund raising event for charity would not be income from trade or business regularly carried on.

[3350] Letter Ruling 9413020 provided:

A is a sole proprietor engaged in the business of cattle ranching and farming. In these operations, he raises cattle to be sold for beef ("slaughter cattle") and crops. The crops and the slaughter cattle are sold to customers in the ordinary course of his business. As a first step in a plan to wind up and retire from his ranching and farming operation, A will fund the unitrust with separate irrevocable transfers of slaughter cattle and crops with a total value of approximately X. These two transfers will take place within a period of several weeks, and both transfers will occur in 1993.

The trust agreement will permit A to make additional contributions to the unitrust at any time. A anticipates that he will transfer additional farming and ranching assets to the proposed unitrust in another series of transfers that will probably take place in about two years. That second series of transfers will occur as part of A's completion of his plan to wind up and retire from his ranching and farming operation. The items to be transferred at that time will include more slaughter cattle and crops, and also breeding cattle and farm machinery that A has used in his ranching and farming operations. (A is not in the business of selling either breeding cattle or farm machinery.) Although not all of these transfers will occur at one time, it is represented that they will all take place within a period of several months.

A is a cash-basis taxpayer who has deducted all costs incurred in raising the slaughter cattle and crops for the years in which such costs were incurred. A will claim no income tax charitable contribution deduction for any transfer of slaughter cattle, crops, breeding stock or farm machinery (collectively "farm items") to the unitrust.

C will have complete discretion as to whether and when to sell any farm items transferred to the proposed unitrust. It is likely that any quantity of farm items that is received by the unitrust in a particular transfer will be sold by the trustee in a single transaction, or at most two transactions, shortly after such farm items are transferred to the trust. However, at the time of a transfer to the unitrust, neither A nor C will be under any legally binding obligations to sell the transferred farm items.

The proposed unitrust will not take over any operations of A's farm whose farm land and buildings will continue to be owned by the donor, who may retire and discontinue farming in a few years. If C decides to sell any slaughter cattle or crops that A has transferred to the unitrust, it will hire an agent that will try to find a buyer for the items in question at an attractive price. This is a method often used by farmers in selling the agricultural products they raise. It is also one of the fastest and most economical ways of liquidating such items. C will arrange for the slaughter cattle to be fed and cared for on a strictly maintenance basis (*i.e.*, it will not be engaging in efforts to "fatten them for market") from the time it receives them until a sale occurs. If C decides to sell breeding stock, it will sell them at a single auction after arranging for them to be fed and cared for from the time it receives them until the auction. It will use a similar procedure for disposing of any farm machinery it decides to sell. Thus, it is represented that the unitrust will not engage in regularly carried on sales of the farm items as a dealer and that the farm items to be sold are not held by the unitrust for sale to customers in the ordinary course of any unitrust business. It is also represented that the sales of donated farm items will not involve property that is debt-financed under section 514 of the Code….

Section 1.513-1(c)(2)(iii) of the regulations indicates that business is not "regularly carried on" in the case of intermittent income-producing activities that occur so infrequently that neither their recurrence nor the manner of their conduct will cause them to be regarded as a business regularly carried on. See also the discussion of a similar principle in *Robert L. Adam and Judith W. Adam v. Commissioner*, 60 T.C. 996 (September 27, 1973), *Acq.* 1974-1 C.B. 1….

In this case, in regard to sections 511, 512, and 513 of the Code, occasional sales by the unitrust to dispose of the farm items described will not be "regularly carried on" within the meaning of section 512(a)(1) because such sales will be infrequent and intermittent. In addition, the farm items are the types of properties whose income from sales is excludible from unrelated business taxable income pursuant to section 512(b)(5), described above.

For case law in a related area discussing when property is inventory from a regularly carried on business and when sales might be viewed as not from the conduct of a business, see part II.L.2.a.iii Whether Gain from Sale of Property is Subject to SE Tax.[3351] Real estate might or might not constitute inventory.[3352]

A partnership holding debt-financed assets can generate UBI not only on annual income but also on the sale of the partnership interest. Debt of a lower-tier partnership is attributed to an upper-tier partnership and then to the owner,[3353] so creating a patchwork of partnerships will not help.

> Also, as to section 514, these transactions will not involve debt-financed property. Therefore, the unitrust's receipts of the proceeds from any sales of the farm items will not result in any unrelated business taxable income to the unitrust under sections 511 through 514.
>
> Accordingly, under sections 511, 512, 512(b)(5), 513, and 514 of the Code, the unitrust will not have any unrelated business taxable income on its sales, under the circumstances described, of the farm items which the donor may transfer to it.

[3351] Especially fn. 2389.

[3352] See part II.G.12 Future Development of Real Estate, especially fn. 1042. Referring to *Malat* cited in that fn., Letter Ruling 201630009 held:

> Foundation intends to hold the real estate properties as part of a diversified investment portfolio that will also contain cash and publicly traded securities and intends to continue to hold the properties, at least in the near term. Foundation anticipates that any sales of the real estate properties will be sporadic and occasional. The decision to retain or sell any of the real estate properties will be made by Foundation's Board of Directors based on the relevant facts and circumstances and in accordance with their fiduciary duty to prudently manage Foundation's investments. Any such decision will be made on a property-by-property basis, taking into consideration the overall investment portfolio, investment strategy, and capital appreciation. Foundation may decide to make capital improvements to the real estate properties as needed, but the real estate properties will not be held for the primary purpose of improving the properties for immediate resale. The real estate properties will be held as income producing properties and not as inventory used in a trade or business.

[3353] Reg. 1.514(c)-1(a)(2), Example (4), which was cited in TAM 9651001 (which is reproduced in part in fns. 3354-3355 and analyzed in fns. 3357-3365), provides:

> In 1972 X, an exempt organization, forms a partnership with A and B. The partnership agreement provides that all three partners shall share equally in the profits of the partnership, shall each invest $3 million, and that X shall be a limited partner. X invests $1 million of its own funds in the partnership and $2 million of borrowed funds. The partnership purchases as its sole asset an office building which is leased to the general public for purposes other than those described in section 514(b)(1)(A), (B), (C), or (D). The office building cost the partnership $24 million of which $15 million is borrowed from Y bank. This loan is secured by a mortgage on the entire office building. By agreement with Y bank, X s held not to be personally liable for payment of such mortgage. By reason of section 702(b) the character of any item realized by the partnership and included in the partner's distributive share shall be determined as if the partner realized such item directly from the source from which it was realized by the partnership and in the same manner. Therefore, a portion of X's income from the building is debt-financed income. Under these circumstances, since both the $2 million indebtedness incurred by X in acquiring its partnership interest and $5 million, the allocable portion of the partnership's indebtedness incurred with respect to acquiring the office building which is attributable to X in computing the debt/basis percentage (one-third of $15 million), were incurred in acquiring income-producing property, X has acquisition indebtedness of

TAM 9651001 asserted that gain from the sale of a partnership generated UBI with respect to the partnership's debt that was allocated to the seller,[3354] except to the extent

$7 million ($2 million plus $5 million). Similarly, the allocable portion of the partnership's adjusted basis in the office building which is attributable to X in computing the debt-basis percentage is $8 million (one-third of $24 million). Assuming no payment with respect to either indebtedness and no adjustments to basis in 1972, X's average acquisition indebtedness is $7 million and X's average adjusted basis is $8 million for such year. Therefore, X's debt/basis percentage with respect to its share of the partnership income for 1972 is 87.5 percent ($7 million/$8 million).

[3354] The TAM reasoned:

There is no disagreement concerning the fact that both Partnership and Z held debt-financed property. Sections 702(b) and 512(c)(1) of the Code make it clear that the income of a partnership retains its character in the hands of the partners. Thus, when Partnership and Z received income attributable to debt-financed property, X reported its share of this income as unrelated business income (UBI). The central area of disagreement is the treatment of income received from the sale of a partnership interest by an exempt organization when the interest of the exempt organization was not purchased with borrowed funds, but the property owned within the partnership was purchased by the partnership itself with (or partially with) borrowed funds.

The facts indicate that X reported for each taxable year its distributive share of rental income from Partnership as unrelated debt-financed income. X did not report as unrelated debt-financed income X's gain on the sale of its interests in Partnership and Z, which held debt-financed real estate. Had Partnership and Z instead sold the debt-financed real estate, X's distributive share of gain from the sale would have been reportable as unrelated debt-financed income. X maintains that because X did not borrow directly to purchase its interests in Partnership and Z, gain from the sale of the partnership interests, rather than from the sale of the debt-financed real estate itself held by the partnerships, was not reportable as unrelated debt-financed income. However, whether X sells its interests in the partnerships or the partnerships sell the real estate, X is accomplishing economically the same result of realizing its share of any appreciation in the debt-financed real estate.

A partnership can be viewed in two ways under subchapter K: as a separate entity or as an aggregate of its partners. See *Casel v. Commissioner*, 79 T.C. 424, 432-33 (1982). The entity view of partnerships treats each partner as owning no direct interest in partnership assets or operations, but only an interest in the partnership entity itself. The aggregate view treats each partner as the owner of a direct and undivided interest in partnership assets and operations. Subchapter K is an attempt to balance the entity view with the aggregate view to avoid the use of a partnership as a means of obtaining improper tax advantages. The many situations not clearly covered by subchapter K can be resolved by both looking to whether the subchapter applies an entity or aggregate approach in analogous situations and considering the purpose of the particular provision of the Code to be applied.

The House Conference Committee report addressing the enactment of Subchapter K states that, even though Subchapter K takes an entity approach in transactions between a partner and a partnership, no inference is intended, however, that a partnership is to be considered as a separate entity for purpose of applying other provisions of the internal revenue laws if the concept of the partnership as a collection of individuals is more appropriate for such provisions. H.R. Rep. No. 2453, 83d Cong., 2d Sess. 59 (1954).

Example (4) of section 1.514(c)-1(a)(2) of the regulations shows that BOTH debt incurred to acquire a partnership interest AND debt incurred by the partnership to acquire property are included in calculating that portion of a partnership's interest that is subject to acquisition indebtedness. The debt/basis percentage thus calculated for the partnership that the partnership's non-recourse debt was effectively defeased by the establishment of the independently trusteed, fully funded escrow account which is contractually committed to paying interest and principal on the debt.[3355] The latter is consistent with

---

> interest is the same whether the partnership sells the property or the partner sells its partnership interest.
>
> An interest in a partnership that holds debt-financed property is effectively an interest in the underlying assets and liabilities of the partnership. An anomalous result would occur if ownership of debt-financed property through a partnership would result in one tax treatment when direct ownership would result another. The aggregate view of the partnership interest, while not clearly delineated in section 514 of the Code, is suggested by Example (4) of section 1.514(c)-1(a)(2) of the regulations and is consistent with treatment of partnership interests elsewhere in the Internal Revenue Code (*e.g.*, section 751(a) and section 512(b)).
>
> For purposes of the debt-financed property rule of section 514 of the Code, the aggregate approach should be applied with respect to sales of partnership interests consistently with the aggregate approach contemplated in section 512(b)(4) with respect to items of income from debt-financed property that flow through to the partners. Analogously, when a partner sells a partnership interest, section 751(a) requires a look through of its partnership interest to determine the character of assets sold and the classification of gain. It would make no economic or policy sense that X should defeat the existing aggregate approach to section 512(b)(4) simply by selling an intermediary rather than have the intermediary sell the debt-financed property. We believe that Congress could not have intended that section 512(b)(4) could be so easily avoided. Consequently, X's sales of its interests in Partnership and Z at a gain result in unrelated business income under section 514.
>
> The debt on Partnership's revolving line of credit apparently existed, at least in part, when X acquired its interest in Partnership. Accordingly, X's share, if any, of this liability under section 752 and regulations thereunder constitutes acquisition indebtedness of X, because the indebtedness was effectively incurred by X in acquiring the partnership interest. See section 514(c)(1)(A) of the Code. In addition, X's share under the section 752 regulations of any increases in debt on the revolving line of credit after X acquires its interest in Partnership constitutes acquisition indebtedness to the extent the increases were incurred to acquire or improve property within the meaning of section 514(c)(1)(A), (B), or (C).
>
> Because the debt with respect to X's interest in Z was incurred before July 18, 1984, the effective date for application of this exception to organizations such as X, the exception provided in section 514(c)(9)(A) of the Code is not applicable. See P.L. 98-369. In addition, X has not shown that it meets the specific requirements of section 514(c)(9)(B).

Reg. 1.514(c)-1(a)(2), Example (4), which was referred to in the quote above, is reproduced in fn. 3353.

[3355] The TAM reasoned:

> Even though the properties of Z are collateral on the prior loan of Y's, the payment of the loan is not an obligation of Z, nor was it an obligation of Venture or a previous obligation of any of the other ventures. Y personally makes the payments and neither the loan nor the payments on it are considered in calculating partnership income. However, even though this is not a debt of Z, X could be at risk of loss of its share of the value of the property if the property should be foreclosed upon. Thus, X, in that case, though not contractually obligated, would in effect be paying on the loan. This risk is eliminated by the creation of the independently trusteed, fully funded, escrow account solely for the purpose of paying the loan should Y default. Therefore, the loan, although collateralized by Z property, is not an obligation or liability of Z or X, and the escrow account, which must at all times be maintained a level sufficient to pay off the loan, ensures that even if Y should default neither Z nor X would be at risk of any loss or be required to make any

Letter Rulings that held that loans from a partner to a partnership did not trigger debt-financed income.[3356]

The TAM was not clear how the UBI was computed. To me, the better view of the TAM's analysis is that one looks through the partnership to see the extent to which the debt constituted acquisition indebtedness with respect to the partnership's assets,[3357] which may extend to treatment as UBI of a portion of other assets held by the partnership as well,[3358] but would also mean that debt incurred merely to fund operations

---

> payments. Because neither Z nor X are obligated on the loan, and are not at risk to suffer any loss because of the loan, it is not a debt of either and can be excluded in calculating acquisition indebtedness.

[3356] Letter Ruling 8415105 included the following facts:

> In those instances in which the Partnership invests indirectly in a Project through a Joint Venture, the Partnership's investment may, in some transactions, consist of both a capital contribution and a loan to the particular Joint Venture. The monies invested by the Partnership in the Joint Venture will consist solely of the capital contributions received by the Partnership from Y {the corporate general partner] and the Limited Partners, including your capital contribution. Neither Y nor the Limited Partners will borrow any portion of their respective capital contributions. The Partnership's capital contribution and loan to the Joint Venture, together with the capital contribution, if any, of the developer, will be used by the Joint Venture to acquire the Project. Any funds used by the Joint Venture to acquire a Project will be obtained solely from the Partnership or the developer/co-venturer, and no part of the acquisition price will be financed by a third-party lender or the seller of a particular Project. The terms of the joint venture agreement to be entered into by the Partnership and a developer will provide that any such loan by the Partnership will be entitled to certain priorities established by the agreement or the laws of the jurisdiction under which the particular Joint Venture is formed, including for example, the repayment of the loan from any available liquidation proceeds prior to the return of either joint venturer's capital contribution.

Letter Ruling 8415105 concluded:

> The loans from the Partnership to any Joint Venture in which it is a co-venturer will be funded by each Limited Partner from each partner's capital, rather than by borrowing from third party sources. Accordingly, the properties acquired would not be considered to be debt-financed property within the meaning of section 514 of the Code. It follows that section 512(b)(4) would not apply in these situations.

Letter Ruling 8414066 appeared identical to Letter Ruling 8415105 in this respect.

[3357] Andersen Tax LLC, ¶ 20.02[2][c] Sources of UBTI and Exceptions From UBTI Characterization, *Tax Economics of Charitable Giving*, said in a footnote:

> To reach its conclusion, the IRS applied an aggregate (*i.e.*, not an entity) approach, so it looked through the partnership to determine if there was debt financing, and treated the situation the same as if the partnership itself sold the assets that had been debt financed.

591 T.M. *Real Estate Transactions by Tax-Exempt Entities*, part II.G.3.f., Sale of Partnership Interests, states:

> Applying an aggregate view of partnerships, the National Office advised that an interest in a partnership that holds debt-financed property is effectively an interest in the partnership's underlying assets and liabilities. Thus, the National Office deemed the charity to have received unrelated debt-financed income from the sale of its interest in the first partnership.

[3358] 723 T.M. *Publicly Traded Partnerships*, part III.D.2.c. Sale of a Partnership Interest, states:

> Based on the rationale expressed in TAM 9651001,[849] the IRS may attempt to include in a tax-exempt organization's UBTI any gains recharacterized as ordinary income under § 751(a) to the extent those gains are attributable to excluded property. In TAM 9651001, the IRS relied in part on § 751(a) to justify its application of the aggregate

view of partnerships.[850] The IRS also stated that the aggregate view of partnerships is consistent with the treatment of partnerships under § 512(b). This position also would be consistent with the IRS's apparent belief that the same result should occur regardless of whether the tax-exempt organization sold its interest in the partnership or the partnership sold its assets.[851]

[849] *Cf.* Rev. Rul. 89-108, 1989-2 C.B. 100 (gain from sale of partnership interest that is attributable to inventory is not eligible to be reported under installment sale rules because installment method would not be available if selling partner had sold its share of underlying inventory); CCA 200722027 (applying rationale of Rev. Rul. 89-108 to gain attributable to unrealized receivables). See also Rev. Rul. 91-32 (gain on sale of foreign partner's interest in partnership was ECI to extent attributable to U.S. trade or business property of partnership). [Gorin note: The Tax Court has repudiated Rev. Rul. 91-32. See fn. 3365.]

[850] It is not clear from the memorandum whether the IRS asserted that § 751(a) treats the transferor as selling an undivided interest in partnership assets rather than a partnership interest. Section 751(a) is merely an income recharacterization rule and should not constitute a basis for deeming a selling partner to have sold an interest in the underlying property of the partnership. The legislative history to the rules regarding transfers of partnership interests is consistent with this approach. *See, e.g.*, H.R. Rep. No. 83-1337, at 4096-7 (1954) (stating that § 751(a) was adopted to prevent the conversion of potential ordinary income into capital gain by virtue of transfers of partnership interests, but that [t]he general rule that the sale of an interest in a partnership is to be treated as the sale of a capital asset is retained).

[851] *See* TAM 9651001 ([a]n anomalous result would occur if ownership of debt-financed property through a partnership would result in one tax treatment when direct ownership would result another). For example, if a partnership conducting an unrelated trade or business recognized income from the sale of inventory, § 512(b)(5) would not exclude from a tax-exempt organization's UBTI its distributive share of that income. § 512(b)(5)(A). If, instead, the tax-exempt organization sold its partnership interest, § 751(a) would recharacterize any gain or loss recognized by the organization from the sale that is attributable to the inventory as ordinary income, which then would be included in the tax-exempt organization's UBTI.

Carman, "'Contract Units' As A Work-Around For UBTI," *Journal of Real Estate Taxation* (4th Quarter 2011), stated:

> If an exempt organization is a partner in a partnership that borrows money to make an investment, the unrelated debt-financed income rules are applied to the exempt organization as if the organization borrowed the money and owned the property directly.[9]
>
> [9] Rev. Rul. 74-197, 1974-1 CB 143, TAM 9651001.

In Rev. Rul. 74-197, an exempt organization invested in a general partnership, which borrowed money to acquire investment property. The ruling held that the partnership's borrowing constituted acquisition indebtedness and, accordingly, the exempt trust's investment activity may result in UBTI.

Hill & Mancino, *Taxation of Exempt Organizations*, ¶ 26.06[4] Disposition of Partnership Interests, also approaches the issue on an aggregate basis [footnotes citing to TAM omitted]:

> Importantly, the Service has also ruled that a partner of a partnership is treated as having unrelated debt-financed income on the disposition of a partnership interest that was not acquired with funds borrowed by the tax-exempt organization directly if the partnership itself had acquisition indebtedness with respect to partnership assets. The Service reasoned that a partnership is an aggregate of its partners and not a separate entity for this purpose and that a partnership interest is a direct and undivided interest in partnership assets and liabilities. The Service reasoned that [t]he 'aggregate' view of the partnership interest, while not clearly delineated in section 514 of the Code, is suggested by Example (4) of section 1.514(c)-1(a)(2) of the regulations and is consistent with treatment of partnership interests elsewhere in the Internal Revenue Code (*e.g.*,

after the CRT acquires the partnership interest would not generate debt-financed income.[3359] One article suggests that the TAM may be wrong[3360] but would apply the

> section 751(a) and section 512(b)). The Service also made the tax policy argument that [i]t would make no economic or policy sense that [the exempt partner] should defeat the existing aggregate approach to section 512(b)(4) simply by selling an intermediary rather than having the intermediary sell the debt-financed property. We believe that Congress could not have intended that section 512(b)(4) could be so easily avoided. The Service also ruled that this reasoning applied only to the extent that the partnership liabilities constituted acquisition indebtedness within the meaning of Section 514.

[3359] Hill & Mancino, *Taxation of Exempt Organizations*, ¶ 26.03[10] Indebtedness Incurred by Pass-Through Entities, commented on the TAM:

> In this technical advice memorandum, the Service also made an important distinction with regard to unsecured debt incurred by the partnership pursuant to a revolving line of credit: namely, that the partnership's unsecured debt under the revolving line of credit that was outstanding at the time the exempt organization became a partner was acquisition indebtedness of the partner with respect to its partnership interest, on the theory that a portion of the partnership's unsecured debt at the time of the exempt organization's admission became, in effect, a debt of the exempt partner. However, the Service also ruled that increases in debt on the revolving line of credit after the exempt organization acquires its partnership interest would constitute acquisition indebtedness only to the extent that the increases were incurred to acquire or improve property within the meaning of Section 514(c)(1)(A), Section 514(c)(1)(B) or Section 514(c)(1)(C). In other words, if the partnership drew down on its line of credit to fund operating expenses, rather than to fund acquisitions of property, increases in the debt incurred on the revolving line of credit after the exempt organization acquires its interest in the partnership would not constitute acquisition indebtedness.

[3360] Woodhull, Selling A Partnership Interest Means Complexity For Tax-Exempt Partners, *Taxation of Exempts* (WG&L) (Mar./Apr. 2012), stated that a number of practitioners have questioned whether the IRS position would be upheld if this issue were to be litigated and later argued:

> The IRS also noted that Example 4 of Reg. 1.514(c)-1(a)(2) provides further support for debt-financed UBTI characterization…. According to the IRS, the debt/basis percentage thus calculated for the partnership interest is the same whether the partnership sells the property or the partner sell its partnership interest.
>
> Notwithstanding the Service's statement in the TAM, Example 4 does not actually state that the debt/basis percentage is the same whether the partnership sells the property or the partner sells the partnership interest. Example 4 in fact provides that in 1972, X's average acquisition indebtedness is $7 million and X's average adjusted basis is $8 million for such year. Therefore, X's debt/basis percentage *with respect to its share of partnership income* [emphasis added] for 1972 is 87.5 percent. The conclusion that should be drawn from this example is that portfolio income (interest, rental income, and capital gains) that is reported to a tax-exempt partner on the partner's Schedule K-1 is debt-financed income to the extent of its entire debt/basis percentage. This conclusion in Example 4 is also consistent with Sections 512(c)(1) and 702(b). Both sections, as noted above, attribute the character of the income earned by the partnership to the partners. Furthermore, if the partnership sells its own debt-financed assets, it is clear under Sections 702(b), 512(c)(1), and 512(b)(4) that a portion of the realized gain will be characterized as debt-financed gain to the extent of the debt/basis percentage and that the debt portion of this percentage includes debt incurred to acquire the partnership interest as well as debt incurred by the partnership.
>
> Again, in this situation, the debt-financed gain is reported on the Schedule K-1 issued to the tax-exempt partner. The distinction that appears to be missing from the IRS interpretation of Example 4 in TAM 9651001 is that the above Code sections all relate to

TAM by referring to the partnership interest rather than looking at the underlying assets,[3361] the latter seeming to be supported by a statement made by a treatise that in other places looks to the aggregate theory.[3362] It's difficult to reconcile the TAM's looking

---

> income that is earned by the partnership and then allocated and reported on a Schedule K-1 as part of the partner's distributive share. The gain on the sale of a partnership interest is not earned by the partnership and is neither allocated nor reported on the partner's Schedule K-1. Thus, if one looks strictly at the Code and regulations, there is an argument that the gain from the sale of the partnership interest that was not acquired with debt should be excluded from characterization as debt-financed UBTI in that the partnership interest is not property subject to acquisition indebtedness. The fact that debt is used by the partnership to acquire underlying assets, and that this debt is used to determine the debt/basis percentage of the tax-exempt partner's distributive share of portfolio income allocated by the partnership, does not mean that the proceeds of the partner's sale of its ownership interest are subject to the debt-financed UBTI rules.
>
> The Service's conclusion in TAM 9651001 is that whether X sells its interests in the partnerships or the partnerships sell the real estate, X is accomplishing economically the same result of realizing its share of any appreciation in the debt-financed property. This may be true economically, but, as discussed above, the Code and regulations do not necessarily support that conclusion. Even when the IRS appears to acknowledge that the aggregate view is not clearly supported by Section 514, it still maintains that this approach is suggested by Example 4 and Sections 751 and 512(b), and notes that Congress could not have intended that Section 512(b)(4) could be so easily subverted.

[3361] Woodhull, Selling A Partnership Interest Means Complexity For Tax-Exempt Partners, *Taxation of Exempts* (WG&L) (Mar./Apr. 2012), stated:

> Assuming that [the TAM] is a correct interpretation, calculating debt-financed UBTI with respect to the tax-exempt partner's capital gain or loss on the sale of its interest in the partnership will require the partner to:
>
> (1.) Calculate the highest amount of the partnership's indebtedness during the 12-month period ending on the date of the sale, including the partnership's allocable share of any indebtedness in lower-tier partnerships.
>
> (2.) Calculate the tax-exempt partner's allocable share of that indebtedness. Assuming that the debt is nonrecourse debt secured only by the partnership assets, this may be determined by reference to the partner's overall interest in the partnership unless the partnership agreement provides otherwise. If the debt is recourse with respect to one or more partners, it would affect this determination.
>
> (3.) Divide the tax-exempt partner's share of the partnership's indebtedness by the partner's average adjusted basis in the partnership. The partner's average adjusted basis in the partnership is the average of the partner's adjusted basis as of the first day during the tax year of the partner during which it held the interest in the partnership and its adjusted basis as of the date of the sale.
>
> (4.) Multiply the tax-exempt partner's share of the partner's capital gain or loss on the sale of its interest in the partnership by the percentage calculated above. The resulting amount will be debt-financed UBTI to that partner.

It later concluded:

> To determine the portion of the partner's capital gain or loss that is debt-financed UBTI, the tax-exempt partner should multiply its capital gain realized from the sale of the partnership interest as calculated above by the debt/basis percentage, the numerator of which is the partner's share of the highest amount of the partnership's debt during the 12-month period preceding the sale, and the denominator of which is the partner's average adjusted basis in the partnership during the tax year in which the sale took place.

[3362] Compare from fn. 3359 & Mancino, *Taxation of Exempt Organizations*, ¶ 26.03[10] Indebtedness Incurred by Pass-Through Entities, stating that:

at the aggregate approach and then seeming to turn around and apply an entity approach.[3363] This uncertainty is not the only way in which the TAM's position creates serious tax issues for exempt organizations that acquire partnership interests for investment purposes.[3364]

On the other hand, the burden now appears to be on the IRS to point to a specific provision overriding the general rule that a partnership interest is taxed as a single asset, viewing the partnership as a single entity, rather than viewing the partnership interest as an aggregate of the underlying interests.[3365] In other words, even though Code § 702 preserves the character of income flowing through a partnership's K-1 and runs those items through a Code § 512 analysis, Code § 512(b)(5) does not look through the partnership interest in applying its exclusion from UBI to gain on sale of the interest (subject of course to the debt-financed override provided by Code § 512(b)(4)[3366]). Thus, although Code § 751 may recharacterize gain on sale of a partnership interest,[3367] Code § 751 does not purport to override Code § 512(b)(5),[3368] so that ordinary income

---

> the Service [took the position] that the partnership's unsecured debt under the revolving line of credit that was outstanding at the time the exempt organization became a partner was acquisition indebtedness of the partner with respect to its partnership interest, on the theory that a portion of the partnership's unsecured debt at the time of the exempt organization's admission became, in effect, a debt of the exempt partner.

with fn. 3358, Hill & Mancino, *Taxation of Exempt Organizations*, ¶ 26.06[4] Disposition of Partnership Interests:

> The Service reasoned that a partnership is an aggregate of its partners and not a separate entity for this purpose and that a partnership interest is a direct and undivided interest in partnership assets and liabilities. The Service reasoned that [t]he 'aggregate' view of the partnership interest, while not clearly delineated in section 514 of the Code, is suggested by Example (4) of section 1.514(c)-1(a)(2) of the regulations and is consistent with treatment of partnership interests elsewhere in the Internal Revenue Code (*e.g.*, section 751(a) and section 512(b)). The Service also made the tax policy argument that [i]t would make no economic or policy sense that [the exempt partner] should defeat the existing aggregate approach to section 512(b)(4) simply by selling an intermediary rather than having the intermediary sell the debt-financed property. We believe that Congress could not have intended that section 512(b)(4) could be so easily avoided. The Service also ruled that this reasoning applied only to the extent that the partnership liabilities constituted acquisition indebtedness within the meaning of Section 514.

[3363] The IRS might have been uncomfortable applying only an entity approach, in light of GCM 39486 (1986), described in detail in fn. 3324, in which debt from a wraparound mortgage was not deemed assumed by the tax-exempt partner.

[3364] Hill & Mancino, *Taxation of Exempt Organizations*, ¶ 29.05. Taxation of Pass-Through Income, made that observation, commenting:

> First, the sale of a partnership interest is not a sale of the underlying asset of the partnership, so the result is not necessarily economically the same. Second, the exempt organization may have no control over the timing of the incurrence or repayment of debt by the partnership. This position is problematic because Section 514 uses a twelve-month lookback rule.

[3365] *Grecian Magnesite Mining v. Commissioner*, 149 T.C. No. 3 (2017) (repudiating Rev. Rul. 91-32), discussed more fully in part II.Q.8.e.ii.(b) Character of Gain on Sale of Partnership Interest, especially fns. 4124-4126.

[3366] See fn. 3344.

[3367] See part II.Q.8.b.i.(f) Code § 751 – Hot Assets.

[3368] Code § 751(a) and Reg. § 1.751-1(a)(1) provide that part of the gain "shall be considered as an amount realized from the sale or exchange of property other than a capital asset." Other than would not constitute UBI.[3369] Furthermore, merely holding a partnership interest that was donated and then selling it does not mean that the owner was engaged in a trade or business even though the partnership itself was, so selling the partnership interest does not constitute engaging in a business and therefore would not be captured by Code § 511, the latter being the underpinning of all UBI taxation. A similar argument would apply for tax-exempt investors that hold partnership interests as part of their investment strategy, so long as they are not dealers and the partnership interests themselves (without looking inside the partnerships) qualify under Code § 512(b)(5).

All of the above assumes that any business activity is unrelated to the exempt organization's exempt function. Gross income is UBI only if the trade or business producing the income is not substantially related (other than through the production of funds) to the purposes for which exemption is granted.[3370] Thus, one must examine the relationship between the business activities which generate the particular income in question—the activities, that is, of producing or distributing the goods or performing the services involved—and the accomplishment of the organization's exempt purposes.[3371] The collection of accounts receivable as part of the continuing day to day operation of exempt activities is not UBI.[3372]

II.Q.6.d.ii. UBTI Related to an S Corporation

Any K-1 income or gain from the sale of the S corporation stock constitutes unrelated business income if the shareholder is an IRA holding bank stock before October 22, 2004 or is a qualified retirement plan (other than an ESOP) or a Code § 501(c)(3) charity.[3373]

A charitable remainder trust may not hold stock in an S corporation.[3374] Even if it could, the imposition of unrelated business income tax would be disastrous.[3375]

---

expressly not protecting certain noncapital assets such as inventory and property held for sale to customers, Code § 512(b)(5) does not require that property be a capital asset to qualify for its exclusion from UBI.

[3369] However, Woodhull, Selling A Partnership Interest Means Complexity For Tax-Exempt Partners, *Taxation of Exempts* (WG&L) (Mar./Apr. 2012), expressed a view that is inconsistent with my conclusion (footnotes omitted):

> In general, the portion of a partner's gain or loss on the sale of a partnership interest that is attributable to Section 751 assets is treated as ordinary income or loss, and is subject to tax as UBTI to tax-exempt partners.

I called the author, and he said that he had not considered the point I raised above. In an informal conversation on November 10, 2017, he said that he agrees with my conclusion.

[3370] Reg. 1.513-1(d)(1).

[3371] Reg. 1.513-1(d)(1).

[3372] Letter Ruling 9005068.

[3373] Code § 512(e), which was added by P.L. 104-188, effective for taxable years beginning after December 31, 1997.

[3374] For what types of trusts can own stock in an S corporation, see part III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation. An electing small business trust (ESBT) is the only type of trust described there into which a charitable remainder trust (CRT) might fit, but Code § 1361(e)(1)(B)(iii) prohibits a CRT from qualifying as an ESBT. However, an S corporation may donate property to a charitable remainder trust; see part II.Q.7.c.iv Using a Charitable Remainder Trust to Avoid Built-in Gain Tax.

Suppose a trust's remainder passes to charity, and the trust holds S corporation stock. Every day the trust holds the stock after the primary beneficiary's death generates more and more UBTI. Consider converting the S corporation into an LLC taxed as an S corporation in a tax-free Code § 368(a)(1)(F) reorganization[3376] as early as one can (if converting is not more expensive than selling to an unrelated third party),[3377] then when the primary beneficiary dies the LLC has 75 days to convert to partnership or disregarded entity status retroactive to the date of death.[3378]

II.Q.6.d.iii. Charitable Deduction Against UBTI

If the charity is a trust, it may deduct up to 50% of UBTI for gifts made to another charity.[3379]

If the charity is a corporation, it may deduct up to 10% of UBTI for gifts made to another charity.[3380]

[3375] See part II.Q.6.c Possible Adverse Consequences When Contributing Partnership Interest to Charitable Remainder Trust especially fns. 3321-3322.

[3376] See part II.P.3.i Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization.

[3377] If the S corporation holds assets that are depreciable or amortizable in the hands of the buyer, conversion might trigger ordinary income on the entire gain from sale of those assets, whereas sale to a third party might generate ordinary income only to the extent of recapture of amortization or accelerated depreciation deductions. Compare part II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill) to part II.G.5.b Code § 1245 Property.

[3378] See parts II.P.3 Conversions (timing of election to convert) and II.P.3.b From Corporations to Partnerships and Sole Proprietorships (effect of election to convert).

[3379] See part II.Q.7.c.i.(b) Business Income Limiting Trust Income Tax Deduction, especially fn.3549.

[3380] Code § 512(b)(1) provides:

> In the case of any organization described in section 511(a), the deduction allowed by section 170 (relating to charitable etc. contributions and gifts) shall be allowed (whether or not directly connected with the carrying on of the trade or business), but shall not exceed 10 percent of the unrelated business taxable income computed without the benefit of this paragraph.

Reg. § 1.512(b)-1(g)(3) provides:

> The contribution, whether made by a trust or other exempt organization, must be paid to another organization to be allowable. For example, a university described in section 501(c)(3) which is exempt from tax and which operates an unrelated business, shall be allowed a deduction… for gifts or contributions to another university described in section 501(c)(3) for educational work but shall not be allowed any deduction for amounts expended in administering its own educational program.

Code § 511(a) provides:

> (1) *Imposition of tax*. There is hereby imposed for each taxable year on the unrelated business taxable income (as defined in section 512) of every organization described in paragraph (2) a tax computed as provided in section 11. In making such computation for purposes of this section, the term "taxable income" as used in section 11 shall be read as "unrelated business taxable income".
>
> (2) *Organizations subject to tax*.
>
> (A) Organizations described in sections 401(a) and 501(c). The tax imposed by paragraph (1) shall apply in the case of any organization (other than a trust

A charity that spends donations it receives on programs (as opposed to using donations for grants to other charities) should consider not receiving directly a gift that would generate UBTI, because the charity will be taxed on all of the UBTI:

- Instead, the gift should be made to a trust that is a Type I supporting organization or donor advised fund, so that the UBTI can be reduced by the trust's up to 50% deduction for distributions to the ultimate charity.

- The trust should consider forming a single member LLC that is disregarded for income tax purposes, to accept the donation; the LLC should have significant other assets. Contributions to the LLC will be deductible as if made directly to the trust.[3381] Forming the LLC may avoid a trap that applies when the flow-through entity does not distribute to the trust before yearend at least as much cash as the amount of the trust's expected charitable contribution deduction.[3382] The LLC would use cash from its other assets to distribute to the trust cash at least equal in amount to the gross income flowing through the LLC to the trust. That way, the trust's receipts from the LLC will equal or exceed the gross income passing through the LLC, allowing the trust to meet the rules requiring its contribution to charity to be from gross income that the trust actually received. However, that concern applies to charitable distributions not made from unrelated business income (UBI) and therefore deductible under Code § 642(c)[3383] and presumably does not apply to charitable distributions made from UBI and therefore deductible under Code § 681 applying the Code § 170 rules.[3384]

II.Q.6.e. Assignment of Income on Property Being Sold

Although the IRS does not attack the donation of marketable securities that a charity sells immediately after the contribution,[3385] it has attempted to treat, as a sale by the

---

described in subsection (b) or an organization described in section 501(c)(1)) which is exempt, except as provided in this part or part II (relating to private foundations), from taxation under this subtitle by reason of section 501(a).

(B) *State colleges and universities*. The tax imposed by paragraph (1) shall apply in the case of any college or university which is an agency or instrumentality of any government or any political subdivision thereof, or which is owned or operated by a government or any political subdivision thereof, or by any agency or instrumentality of one or more governments or political subdivisions. Such tax shall also apply in the case of any corporation wholly owned by one or more such colleges or universities.

Code § 11 imposes tax on corporations.

[3381] See fn. 276, found in part II.B Limited Liability Company (LLC).

[3382] See part II.Q.7.c.i.(a) Contribution Must Be Made from Gross Income, describing the issue and a similar strategy in fns. 3540-3542.

[3383] See fn. 3382.

[3384] See part II.Q.7.c.i.(b) Business Income Limiting Trust Income Tax Deduction.

[3385] Rev. Rul. 74-53 (no assignment of income where no express or implied obligation imposed upon the trustee to sell or exchange). For the origin of the assignment of income rule, see *Lucas v. Earl*, cited in fn. 1268, found in part II.G.23 Taxing Entity or Individual Performing Services.

donor, the contribution of closely-held stock to a charity, followed by a redemption. After losing,[3386] the IRS ruled:[3387]

> In *Palmer*, the taxpayer had voting control of both a corporation and a tax-exempt private foundation. Pursuant to a single plan, the taxpayer donated shares of the corporation's stock to the foundation and then caused the corporation to redeem the stock from the foundation….The Service will treat the proceeds of a redemption of stock under facts similar to those in *Palmer* as income to the donor only if the donee is legally bound, or can be compelled by the corporation, to surrender the shares for redemption.

Taxpayers who fall within the no-binding-agreement safe harbor of Rev. Rul. 78-197 are protected from the IRS, even if the sale appears certain to occur.[3388] Given that the probability of sale affects valuation, a taxpayer might maximize the charitable deduction by waiting to make the donation until the dale before the sale closes.

An enforceable cause of action under the promissory estoppel theory counted as a legally binding commitment to sell stock.[3389] So did the tender of shares sufficient to bind the shareholders of a corporation being acquired by a taxable merger, even though the acquiring corporation had not legally bound itself to acquire the shares.[3390]

[3386] *Palmer v. Commissioner*, 62 T.C. 684 (1974), *aff'd* on another issue, 523 F.2d 1308 (8th Cir. 1975).

[3387] Rev. Rul. 78-197, followed Letter Rulings 8623007, 9413020, 9452020, 9452026, 9611047, and 200230004.

[3388] *Rauenhorst v. Commissioner*, 119 T.C. 157 (1993), which focused exclusively on legally binding commitments. In that case, the court faulted the IRS' nonspecific allegations of an informal agreement or understanding between the donees and other parties, accepting on their face affidavits the taxpayer produced. The court also rejected the IRS' contentions that certain facts caused the assignment of income doctrine to apply:

> In support of respondent's position that the right to sale proceeds had ripened to a practical certainty at the time of the contributions, he cites: (1) The September 28, 1993, letter of intent from WCP expressing its intention to purchase all the issued and outstanding stock of NMG; (2) the October 22, 1993, resolution by WCP's board of directors, which authorized its officers to negotiate and enter into the agreement for the purchase of all the issued and outstanding capital stock of NMG; and (3) a valuation report prepared by Houlihan, Lokey, Howard, & Zukin (Houlihan Lokey), which was attached to petitioners' 1993 return and which opined that, as of November 12, 1993, there was little chance the transaction involving WCP would not close on or before December 31, 1993. Those items might be particularly relevant for determining whether the stock warrant purchase ripened to a practical certainty; however, none of those items alone, or in combination, show that the donees were legally bound, or could be compelled, to sell their stock warrants.

[3389] *Blake v. Commissioner*, T.C. Memo 1981-579, *aff'd* 697 F.2d 473 (2nd Cir. 1982).

[3390] *Ferguson v. Commissioner*, 108 T.C. 244 (1997), *aff'd* 174 F.3d 997 (9th Cir. 1999), *followed Gail Vento, LLC v. U.S.*, 111 A.F.T.R.2d 2013-1505 (D.C. V.I. 2013). *Ferguson* included some contingencies that the court disregarded. In *Ferguson*, the gift was made September 9, 1988. Here is the timeline for the tender:

> On July 28, 1988, AHC, CDI Holdings, Inc. (CDI), and DC Acquisition entered into the merger agreement. According to the merger agreement, DC Acquisition would be merged into AHC, and AHC would thereupon become a wholly owned subsidiary of CDI as soon as practicable after DC Acquisition had purchased the stock of AHC pursuant to

II.Q.6.f. Incomplete Gift and Charitable Partial Interest Prohibitions

II.Q.6.f.i. Completed Gift Requirement

A Code § 170 deduction is allowed "only if the transfer at issue satisfies the six essential elements of a bona fide inter vivos gift:"[3391]

(1) a donor competent to make the gift;

(2) a donee capable of taking the gift;

(3) a clear and unmistakable intention on the part of the donor to absolutely and irrevocably divest himself of the title, dominion, and control of the subject matter of the gift, in praesenti;

> the tender offer. The merger agreement provided that each outstanding share of AHC stock, following the purchase of AHC stock pursuant to the tender offer, would be converted into the right to receive $22.50 a share in cash. On August 3, 1988, DC Acquisition made a tender offer for the stock of AHC at $22.50 a share. By the close of business on August 31, 1988, more than 50 percent of the outstanding shares of AHC stock had been tendered or guaranteed. At that time, despite the various contingencies to be discussed infra, we believe the reality and substance of the merger agreement and the tender offer indicate that the stock of AHC was converted from an interest in a viable corporation to a fixed right to receive cash.
>
> The tender or guarantee of more than 50 percent of the outstanding shares of AHC stock was the functional equivalent to a vote by the shareholders of AHC approving the merger. The terms of the tender offer provided that DC Acquisition, with the acquisition of a majority of AHC stock, could assure that the requisite number of affirmative votes in favor of the merger would be received even if no other shareholder voted in favor of the merger. Therefore, with the exception of the hypothetical possibility that a sufficient number of tendered or guaranteed shares of AHC stock could be withdrawn, DC Acquisition was positioned to proceed unilaterally with consummation of the merger by the close of business on August 31, 1988.

So the conditions to effectuate the merger had been satisfied before the gift, with the chance of the conditions being undone being viewed as remote.

Commissioner*, 51 T.C. 233, 234 (1968), *aff'd*, 23 A.F.T.R.2d (RIA) 69-1763 (1st Cir. 1969); *Perlmutter v. Commissioner*, 45 T.C. 311, 316-317 (1965); *DeJong v. Commissioner*, 36 T.C. 896, 899 (1961), *aff'd*, 309 F.2d 373, 376-379 (9th Cir. 1962); *Stjernholm v. Commissioner*, T.C. Memo. 1989-563, *aff'd*, 933 F.2d 1019 (10th Cir. 1991).

(4) the irrevocable transfer of the present legal title and of the dominion and control of the entire gift to the donee, so that the donor can exercise no further act of dominion or control over it;

(5) a delivery by the donor to the donee of the subject of the gift or the most effectual means of commanding the dominion of it; and

(6) acceptance of the gift by the donee.

A retained right to require the donee to transfer ownership to another nonprofit made the gift conditional and therefore nondeductible.[3392]

If a transfer for charitable purposes depends on the performance of some act or the happening of a precedent event in order that it might become effective, no deduction is allowable unless the possibility that the charitable transfer will not become effective is so remote as to be negligible.[3393]

II.Q.6.f.ii. Forced Sale to Related Party for Note

CCA 201507018 disallowed a deduction of a partnership interest (referred to as Units) that the charitable Organization immediately sold for a note to a related party for a note:

> In the present case, Partner has claimed a deduction under § 170 for a donation of Units to Organization. However, after Transaction, and within a day of Partner's assignment of Units to Organization, Organization does not hold any rights to Units. Organization holds Note. Further, Partner, through Partner's power to approve of Partnership distributions to Corp, controls when in fact interest payments will be made on Note. Had Partner or Corp contributed Note directly to Organization, a deduction under § 170 would not be allowed because payment of the donation would not have been made within the year and, under Rev. Rul. 68-174, Note would have been treated as a promise to make a donation, but not an actual donation….
>
> Under the terms of the Partnership Agreement, Organization is required to surrender its right as an assignee of Units to Partner on Partner's terms. Further,

---

[3392] *Fakiris v. Commissioner*, T.C. Memo. 2017-126, mentioning Reg § 1.170A-1(e) (see fn. 3393) but also noting *Graev v. Commissioner*, 140 T.C. 377, 390 (2013), and *Briggs v. Commissioner*, 72 T.C. at 656-659.

[3393] Reg § 1.170A-1(e), which provides:

> *Transfers subject to a condition or power*. If as of the date of a gift a transfer for charitable purposes is dependent upon the performance of some act or the happening of a precedent event in order that it might become effective, no deduction is allowable unless the possibility that the charitable transfer will not become effective is so remote as to be negligible. If an interest in property passes to, or is vested in, charity on the date of the gift and the interest would be defeated by the subsequent performance of some act or the happening of some event, the possibility of occurrence of which appears on the date of the gift to be so remote as to be negligible, the deduction is allowable. For example, A transfers land to a city government for as long as the land is used by the city for a public park. If on the date of the gift the city does plan to use the land for a park and the possibility that the city will not use the land for a public park is so remote as to be negligible. A is entitled to a deduction under section 170 for his charitable contribution.

under the Partnership Agreement, Organization had to obtain the approval of Partner to transfer its interest in Units. Partner, in Partner's sole discretion, could approve or disapprove any transfer. Partner, in exercising this discretion, had no fiduciary duty at the time of Transaction to Organization. If Organization attempted to transfer its interest in Units to a third party, Partner had the power to nullify the transfer. Further, the Special Call Price would become active and the call price provision limits the call price to Organization's contributions which are zero. Accordingly, Partner had the power to nullify the donation to Organization if Organization attempted to transfer its interest in Units without Partner's approval. Further, Organization could not retain its interest in Units without violating its representations to the Service that it would not hold an interest in a Partnership with nonexempt taxpayers. Partnership could call Organization's interest in Units at any time. Based on the above elements of Transaction, Organization was essentially compelled to engage in Transaction.

II.Q.6.f.iii. Charitable Partial Interest Prohibition

Generally, if a taxpayer contributes less than the taxpayer's entire interest in such property, for individual income tax purposes[3394] a charitable income[3395] tax deduction is allowed only to the extent that the value of the interest contributed would be allowable as a deduction if that interest had been transferred in trust:

- This rule does not apply if the donation is of "the taxpayer's entire interest in the property, such as an income interest or a remainder interest."[3396]

- However, if "the property in which such partial interest exists was divided in order to create such interest and thus avoid" the partial interest prohibition, the deduction is not allowed.[3397]

[3394] This provision applies for purposes of Code § 170, which is contributions deducted on a personal income tax return (including contributions through an S corporation or a partnership). It does not apply for the fiduciary income tax deduction under Code § 642(c); see part II.J.4.c Charitable Distributions. However, if and to the extent that the trust has unrelated business taxable income, Code § 170 would apply to calculate the percentage limitations of the deduction; I have not formed an opinion on whether the UBTI rules makes the charitable partial interest prohibition not apply for income tax purposes. See part II.Q.7.c.i Income Tax Trap - Reduction in Trust's Charitable Deduction, fns. 3545-3551. See also part II.Q.6.d Unrelated Business Income.

[3395] Code § 170(f)(3)(A). However, Code § 170(f)(3)(B) excludes from this rule a contribution of a remainder interest in a personal residence or farm, a contribution of an undivided portion of the taxpayer's entire interest in property, and a qualified conservation contribution.

[3396] Reg. § 1.170A-7(a)(2)(i), which further provides:

> Thus, if securities are given to A for life, with the remainder over to B, and B makes a charitable contribution of his remainder interest to an organization described in section 170(c), a deduction is allowed under section 170 for the present value of B's remainder interest in the securities.

[3397] Reg. § 1.170A-7(a)(2)(i), which further provides:

> Thus, for example, assume that a taxpayer desires to contribute to a charitable organization an income interest in property held by him, which is not of a type described in paragraph (b)(2) of this section. If the taxpayer transfers the remainder interest in such property to his son and immediately thereafter contributes the income interest to a

- On the other hand, the partial interest prohibition does not apply to a contribution of a partial interest in property if the contribution constitutes part of a charitable contribution not in trust in which all interests of the taxpayer in the property are given to a charitable organization.[3398]

- Nor does it apply "merely because the interest which passes to, or is vested in, the charity may be defeated by the performance of some act or the happening or some event, if on the date of the gift it appears that the possibility that such act or event will occur is so remote as to be negligible."[3399]

- Also, the prohibition does not apply to an undivided portion of a donor's entire interest in property, which "must consist of a fraction or percentage of each and every substantial interest or right owned by the donor in such property and must extend over the entire term of the donor's interest in such property and in other property into which such property is converted."[3400]

Although the preceding bullet points describe income tax rules, similar rules apply for gift tax[3401] and estate tax[3402] purposes, except that, where the initial division results in an interest being transferred to a noncharitable person, any later contribution of the donor's entire remaining interest in the property "will not be considered the donor's entire interest in the property" for estate and gift tax purposes.[3403] Donating 20% of the taxpayer's

---

> charitable organization, no deduction shall be allowed under section 170 for the contribution of the taxpayer's entire interest consisting of the retained income interest. In further illustration, assume that a taxpayer desires to contribute to a charitable organization the reversionary interest in certain stocks and bonds held by him, which is not of a type described in paragraph (b)(2) of this section. If the taxpayer grants a life estate in such property to his son and immediately thereafter contributes the reversionary interest to a charitable organization, no deduction will be allowed under section 170 for the contribution of the taxpayer's entire interest consisting of the reversionary interest.

[3398] Reg. § 1.170A-7(a)(2)(ii), which continues:

> Thus, if on March 1, 1971, an income interest in property is given not in trust to a church and the remainder interest in the property is given not in trust to an educational organization described in section 170(b)(1)(A), a deduction is allowed for the value of such property.

[3399] Reg. § 1.170A-7(a)(3), referring to Reg § 1.170A-1(e), which is reproduced in fn. 3393, found in part II.Q.6.f.i Completed Gift Requirement.

[3400] Reg. § 1.170A-7(b)(1)(i).

[3401] Code § 2522(c)(2), incorporating by reference the Code § 170(f)(3)(B) exclusion in fn. 3395; see Reg. § 25.2522(c)-3(c).

[3402] Code § 2055(e)(2), incorporating by reference the Code § 170(f)(3)(B) exclusion in fn. 3395; see Reg. § 20.2055-2(e)(2). Code § 2055(e)(3) may allow a post-mortem reformation.

[3403] Reg. §§ 25.2522(c)-3(c)(2)(i) and 20.2055-2(e)(2)(i). The former illustrates this rule:

> For example, if the donor gave a life estate in an office building to his wife for her life and retained a reversionary interest in the office building, the gift by the donor of one-half of that reversionary interest to charity while his wife is still alive will not be considered the transfer of a deductible interest; because an interest in the same property has already passed from the donor for private purposes, the reversionary interest will not be considered the donor's entire interest in the property. If, on the other hand, the donor had been given a life estate in Blackacre for the life of his wife and the donor had no other interest in Blackacre on or before the time of gift, the gift by the donor of one-half of that life estate to charity would be considered the transfer of a deductible interest;

unitrust interest in a charitable remainder trust six years after the trust's formation did not trigger the partial interest prohibition.[3404] Donating all of one's annuity interest in a charitable remainder annuity trust did not violate the prohibition.[3405]

---

because the life estate would be considered the donor's entire interest in the property, the gift would be of an undivided portion of such entire interest.

[3404] Letter Ruling 9550026 involved a joint-and-survivor net-income charitable remainder unitrust. The transaction involved the following steps:

(a) Taxpayer A will execute a disclaimer that is substantially similar to the one submitted with your ruling request. This disclaimer provides that Taxpayer A disclaims his contingent right to receive Taxpayer B's unitrust interest after Taxpayer B's death. Taxpayer B will execute a disclaimer that is substantially similar to the one submitted with your ruling request. This disclaimer provides that Taxpayer B disclaims her contingent right to receive Taxpayer A's unitrust interest after Taxpayer A's death.

(b) Taxpayers will make a gift of a twenty percent undivided interest in the Unitrust Payment to University, by execution and delivery of an irrevocable assignment valid under State A law.

(c) The income interest in Trust which University receives in this gift will merge with its remainder interest in Trust, leaving University with a twenty percent undivided interest in the entire trust and an eighty percent undivided interest in the remainder of the trust.

(d) Taxpayers and University will consent to the partial termination of Trust in their respective capacities as grantors and beneficiaries so that all of the grantors and beneficiaries will have consented to termination of twenty percent of the trust.

(e) The trustee of Trust will distribute to University twenty percent of the trust assets. The distributed assets will be fairly representative of the relative bases of the various assets in the trust. The trustee will continue to hold the balance of the Trust assets in accordance with the terms of the trust.

The ruling concluded:

(1) Taxpayers will be entitled to an income tax deduction under section 170 of the Code for the value of the undivided interest in the Unitrust Payment transferred to University.

(2) Taxpayers will be entitled to a gift tax deduction under section 2522 of the Code for the value of the undivided interest in the Unitrust Payment transferred to University.

(3) The value of Taxpayers' gift under sections 170 and 2522 of the Code will be the present value of the right to receive annual payments equal to nine percent of the value of twenty percent of the Trust assets determined annually for a term starting on the date of the transfer of the gift to University and ending on the date of death of the survivor of Taxpayers.

(4) The gift of the undivided part interest in Trust will not cause the trust to cease to be a trust described in 664(d)(2) of the Code.

(5) To the extent that in prior years, Trust had capital gain income, and that income was not realized or included in the income of Taxpayers, such capital gain shall not be included in the income of, or realized by, Taxpayers solely because of the transfer of the undivided interest in the Unitrust Payment to University.

[3405] Rev. Rul. 86-60 involved the following facts:

Situation 1. In 1980, A created a charitable remainder annuity trust (hereinafter, CRAT) described in section 664(d)(1) of the Code. A retained the annuity interest in the trust for life. The remainder beneficiary was X, a charitable organization described in sections 170(c) and 2522(a). In 1984 A transferred the annuity interest in the trust to X.

Situation 2. In 1980, A created a CRAT described in section 664(d)(1) of the Code. The trust instrument provides that the trustee shall pay the annuity amount annually to A for life and upon A's death to B, the successive life interest beneficiary, for such time as

Rev. Rul. 76-143 held that the partial interest prohibition denied charitable deductions when the taxpayer donated the cash surrender value and retained the right to the death benefit, even if all of the rights were fixed (including making the beneficiary designation irrevocable). The denial applied whether the cash value was fully paid[3406] or was for cash value build-up due to the current year's premium.[3407] Now, Code § 170(f)(10) also prohibits various split-dollar and similar arrangements from qualifying for the charitable deduction.

If a donor transfers voting stock but retains the voting rights, Rev. Rul. 81-282 asserted that retaining the voting rights violated the partial interest prohibition.[3408] However, when

---

> B survives. Upon the death of the survivor of A and B, the corpus is to be distributed to X, a charitable organization that meets the requirements of sections 170(c) and 2522(a). In 1984, A and B assigned their interests in the trust to the charitable remainder beneficiary.
>
> No property interests were created for the purpose of avoiding the rules of section 170(f)(2) and (f)(3)(A).

The ruling held:

> In *Situation 1*, the gift by A, the grantor, to the remainder beneficiary of A's retained life annuity interest in a charitable remainder annuity trust qualifies for an income tax charitable deduction under section 170 of the Code and a gift tax charitable deduction under section 2522.
>
> In *Situation 2*, where A has created a charitable remainder annuity trust with life annuity interest to A and survivor life annuity interest to B, the gifts by A and B of their life annuity interests in the trust to the charitable remainder beneficiary qualify for an income tax charitable deduction and a gift tax charitable deduction. A's gift of the life annuity, however, qualified for the gift tax charitable deduction only because the interest that was transferred was in one of the forms set out in section 25.2522(c)-3(c)(2) of the regulations.

[3406] The ruling reasoned:

> In *Situation 1*, the gift made by the taxpayer of the right to the cash surrender value of the policy was a gift of less than an entire interest in the property. Furthermore, a gift of this kind is not a gift of a fraction or percentage of each and every substantial interest owned by the donor in such property since the taxpayer retained the right to designate the beneficiary. Even if the taxpayer irrevocably designated the beneficiary prior to making the gift in order to create a remainder interest that would then constitute the taxpayer's entire interest in the property, such division would be regarded as having been made to avoid section 170(f)(3)(A) of the Code and the deduction would not be allowed.

[3407] The ruling reasoned:

> In *Situation 2*, the gift made by the taxpayer of the right to the cash surrender value of a nonpaid-up life insurance policy was also a gift of less than the taxpayer's entire interest in the property. Since the taxpayer retains the right to designate the beneficiary, and the right to surrender the policy and defeat the college's interest, the gift is not a gift of a fraction or percentage of each and every substantial interest in the property.

[3408] The ruling reasoned:

> The right to vote stock is inherent in the ownership of common stock and, as such, is a property right. This right gives the holder a voice in the management of the corporation and is crucial in protecting the stockholder's financial interest. Therefore, the right to vote the stock of X is a substantial right in that stock. See *Brown v. McLanahan*, 148 F.2d 703 (4th Cir. 1945); and *DuVall v. Moore*, 276 F.Supp. 674 (N.D. Iowa 1967).
>
> While A's retention of the right to vote the stock will not defeat Y's right to dividends or the right to dispose of the stock, and, while the right retained by the donor will not defeat the donee's interest in the transferred property, nevertheless, A has not transferred all

a donor kept voting and donated nonvoting restricted[3409] stock, the donation did not constitute a partial interest;[3410] this reasoning also applied to an estate.[3411] Furthermore, when the donated voting stock was subject to a voting agreement created eight years previously for business purposes, the lack of voting rights did not make the gift a nondeductible partial interest.[3412] However, when the terms of the bequest required the

---

> substantial rights in the stock to Y. Therefore, A has transferred a partial interest in property to Y within the meaning of section 170(f)(3) of the Code. See Rev. Rul. 76-143.

[3409] Comparing Class A voting to Class B nonvoting:

> The rights of the Class A shares are freely transferable. In contrast, the Class B shares are not transferable except: (1) to the Corporation; (2) in connection with an acquisition of the Corporation; (3) in the case of natural persons, upon death or pursuant to a valid and binding court order mandating transfer; or (4) with the consent of the Corporation's Board of Directors.

[3410] Letter Ruling 201129033, holding:

> In the present case, Donor and Donor's Spouse propose to transfer Class B common stock to Charity. The Class B common stock is a separate property interest apart from the other class of stock in Corporation. Under the facts as presented, the shares of one class of stock do not constitute an interest in the shares of any other class of stock. Therefore, we conclude that for gift tax purposes the plan described above will not result in interests in the same property passing for both charitable and noncharitable purposes within the meaning of § 2522(c)(2).

[3411] Letter Ruling 9022010 reasoned:

> In the present case, [four separate charities] will receive, in effect, under the terms of the will and the Trust, the residue of A's estate, which may include a portion of the Class A nonvoting shares of V. The outright distribution of the Class A nonvoting shares to [the charities] while the Class B voting shares are held in trust for the benefit of individuals will not be a distribution of property for both charitable and noncharitable purposes under section 2055(e)(2) of the Code.
>
> Each class of stock represents a separate property interest. Further, considering that the dividend rights and liquidation preferences of the respective classes are identical and considering the currently issued and outstanding shares in the various classes, each distributee of the respective classes of stock will receive all the property rights and economic benefits inherent in the equity interests represented by those shares. Under the facts as presented, the shares of one class of stock do not constitute an interest in the shares of any other class of stock. Therefore, we conclude that the estate plan described above will not result in interests in the same property passing for both charitable and noncharitable purposes, within the meaning of section 2055(e)(2) of the Code.

[3412] Letter Rulings 200108012, 200108013 and 200108014 included the following facts and holding:

> In 1992, Taxpayer and other Company shareholders entered into a voting agreement. The purpose of the voting agreement was to facilitate any future negotiations to sell Company. Pursuant to the voting agreement, Taxpayer transferred to Individual her voting rights with respect to corporate events affecting change of ownership or control of Company. The voting agreement required Taxpayer to agree to vote as directed by Individual. Recently, the voting agreement was amended to provide that the votes would be directed by a person who is not Individual and is not related to Taxpayer….
>
> When Taxpayer contributes her shares in Company stock to Foundation, she will not contribute all interests in the shares. Certain voting rights have already been transferred to a third party. The voting rights are substantial rights. See Rev. Rul. 81-282. However, because those rights had been transferred eight years ago for a business purpose, the interests were not divided in order to avoid section 170(f)(3)(A). Thus,

executor to retain the stock and pay the dividends to an individual during the period of administration and to distribute the stock to the charity after administration is completed, Rev. Rul. 83-45 asserts that the dividend payment violates the partial interest rule. On the other hand, when a charity separated a debt obligation it issued into principal and income receipts that were legally separate rights, the partial interest prohibition did not apply when holders donated those rights.[3413]

Rev. Rul. 75-373 allowed a charitable contribution deduction in the manner and to the extent provided by Code § 170 for the value of the restricted easement granted in the following situation:

> An individual conveyed an easement in a tract of 50 acres of vacant, beachfront property to the county in which the property was located to be used solely as a public bathing beach and recreational area operated and maintained by the county. The land is located in a rapidly expanding urban area. The county is a political subdivision of state X.
>
> The deed from the taxpayer to the county granted the easement in gross in perpetuity but reserved to the taxpayer certain rights, including the right of access to and from the open water by boat from the remainder of the land owned by the grantor or his heirs, the right to have an open and usable channel connecting the open sea with the lands retained by the grantor, and the retention of all mineral rights in the land underlying the easement. Any prospective drilling and/or mining is to be done by slant from adjacent property so that the surface of the land will not be disturbed. The donor is responsible for all taxes, levies, and assessments of any kind to which the conveyed property is or shall be subject, but the assessment will be reduced to reflect the value of the easement conveyed....
>
> Under the law of state X, an easement in gross in perpetuity is a valuable property right or interest in favor of the party for whose benefit the easement is created and is enforceable by that party.
>
> In the instant case, the easement in gross in perpetuity is an open space easement within the meaning of section 1.170A-7(b)(1)(ii) of the regulations.

Rev. Rul. 76-253 disallowed a deduction for the contribution of land when the taxpayer retained timber-cutting rights.

> section 1.170A-7(a)(2)(i) of the Regulations does not cause disallowance of the charitable contribution deduction in this case.

[3413] Letter Ruling 8939014 described the approved rights as follows:

> Each debenture receipt represents, in form, the right to receive specific future interest or principal payments on the debenture. Accordingly, the debenture receipts will be denominated as coupon receipts and principal receipts. Each coupon receipt will represent the right to receive a single payment at the date of a specific interest payment on the debenture. Each principal receipt will represent the right to receive a specific payment of principal on the debenture. No payments, however, will be made on any debenture receipt prior to the date on which the specific payment of interest or principal, respectively, is made on the debenture.

Rev. Rul. 76-331 applied the partial interest rule to disallow the following contributions:

> *Situation 1*. A corporation transferred a tract of land to an organization described in section 170(c)(2) of the Code. However, it retained all mineral rights with respect to the property, including the sole right to exploit and sell any minerals obtained from the property.
>
> *Situation 2*. An individual, aged 50 and in good health, owned timberland that the individual leased to a corporation in 1975 for a term of 60 years. In 1976, the individual transferred this land to an organization described in section 170(c)(2) of the Code, subject to the individual's receiving, during the individual's lifetime, all the payments due under the lease. Upon the individual's death, all rights under the lease will pass to the charitable organization.

However, if the retained mineral interest cannot ever interfere with the charity's interest, the retained interest might be too insubstantial to invoke the partial interest disallowance.[3414] Donating land to the U.S. did not trigger the prohibition when the donor reserved the right to train a hunting dog and maintain paths for that purpose.[3415] Also, a donation of undivided interests in real estate subject to leases was not subject to the partial interest disallowance when it conveyed all of the donor's rights and duties and substantial interests with respect to the leases and the undivided interests in the property.[3416] (Additional rulings regarding easements need to be reviewed.) But taxpayers who granted a fire department the right to conduct training exercises on their property and destroy a building thereon during the exercises were held not to donate any ownership interest in property to the fire department, and the partial interest rule prohibit deducting the value of the use of the property.[3417]

[3414] *Stark v. Commissioner*, 86 T.C. 243 (1986).

[3415] Rev. Rul. 75-66 involved the following facts and holding:

> An individual donated his entire interest in 800 acres of land to the United States and retained the right during his lifetime to train his personal hunting dog, and any other hunting dog he may subsequently own, on trails extending over the entire tract, including the right to maintain paths and lanes relating to the reserved use. The individual was informed by the United States Department of the Interior that the reservation would not interfere with the Government's use and enjoyment of the donated property. The trails for training the dog are used in accordance with the Department of the Interior's regulations on such use.
>
> the instant case, the retained right during the taxpayer's lifetime to train his personal hunting dog on the entire tract, in accordance with the regulations of the Department of the Interior on such use, is not substantial enough to affect the deductibility of the property contributed.

[3416] Letter Ruling 8639019.

[3417] *Patel v. Commissioner*, 138 T.C. 395 (2012), the official syllabus mentioning the following:

> At the end of May 2006, Ps purchased property in Vienna, Virginia (Vienna property), with the intention to demolish the house situated thereon (house) and construct a new one on the site. Their realtor told them about the Fairfax County Fire and Rescue Department (FCFRD) Acquired Structures Program, where a property owner allows FCFRD to conduct live fire training exercises on his or her property. As part of the exercises, FCFRD destroys, by burning, the designated building on the owner's property. Within a few weeks of purchasing the Vienna property, Ps contacted FCFRD and obtained information about the requirements for participating in the program. After Ps

If the owner of the working interest under an oil and gas lease[3418] gives an overriding royalty interest[3419] or a net profits interest[3420] to a charitable organization, Rev. Rul. 88-37 asserts that the partial interest rule bars the deduction. The ruling viewed the right to control or to participate in control, which a working interest has but which neither an overriding royalty interest nor a net profits interest has, as a substantial right, the retention of which prevents the donated interest from being considered an undivided interest in the donor's property rights.[3421]

---

obtained a demolition permit and completed all of the other requirements, they executed documents granting FCFRD the right to conduct training exercises on the Vienna property and to destroy the house by burning during the exercises. During October 2006, FCFRD, along with six other fire departments, used the Vienna property to conduct live fire training exercises, during which the house was destroyed.

[3418] The ruling describes a working interest:

> A working interest is the operating interest under an oil and gas lease. It is typically created by a transaction in which the owner of a tract of land, or the owner of the mineral rights to a tract of land, grants the right to exploit the oil and gas under the land, while at the same time retaining a royalty interest in production. Alternatively, the owner of a tract of land, or the owner of mineral rights to a tract of land, may, as in the instant case, retain the working interest and grant a royalty interest to another person. The owner of the working interest has the exclusive right to exploit the oil and gas resources. For federal tax purposes, a working interest is defined as an interest in oil and gas in place that is burdened with the cost of development and operation of the property. *Brooks v. Commissioner*, 424 F.2d 116 (5th Cir. 1970).

After defining an overriding royalty interest (see fn. 3419) and a net profits interest (see fn. 3420), the ruling comments:

> The right to exploit the oil and gas resources under the land is a right inherent in the ownership of a working interest. Even an owner of only a percentage of the working interest has the right to participate in decisions on the exploitation of the oil and gas resources. The owner of an overriding royalty interest or a net profits interest does not have this right.

[3419] The ruling describes an overriding royalty interest:

> An overriding royalty interest is an economic interest in oil and gas in place, created from the working interest. An overriding royalty entitles its owner to a specified fraction of gross production, free of operating and developing costs. The term of an overriding royalty interest is coextensive with the term of the working interest from which it was created. The transfer of an overriding royalty is an assignment of a property interest and is not an anticipatory assignment of income. See Rev. Rul. 67-118, 1967-1 C.B. 163.

[3420] The ruling describes a net profits interest:

> A net profits interest is, for federal tax purposes, an interest in oil and gas in place that is defined as a share of gross production measured by net profits from operation of the property. It is created out of the working interest and has the same duration. Unlike the income accruing to an overriding royalty, the income accruing to the net profits interest is reduced by specified operating and development costs, but the interest bears these expenses only to the extent of its share of the income. Unlike the working interest, the net profits interest is not required to pay out, advance, or become liable for such costs. *Burns v. Commissioner*, 78 T.C. 185, 209 (1982). Like a transfer of an overriding royalty, the transfer of such a net profits interest conveys, for federal tax purposes, a depletable property interest in oil and gas in place. See *Kirby Petroleum Co. v. Commissioner*, 326 U.S. 599 (1946), 1946-1 C.B. 69; *Burton-Sutton Oil Co., Inc. v. Commissioner*, 328 U.S. 25 (1946), 1946-1 C.B. 237.

[3421] The IRS reasoned:

On the other hand, separate bequests of preferred stock and common stock did not trigger the partial interest prohibition.[3422]

Rev. Rul. 2003-28 asserted that the partial interest prohibition applies to patents:

(1) A taxpayer's contribution to a qualified charity of a license to use a patent is not deductible under § 170(a) if the taxpayer retains any substantial right in the patent.[3423]

(2) A taxpayer's contribution to a qualified charity of a patent subject to a conditional reversion is not deductible under § 170(a), unless the likelihood of the reversion is so remote as to be negligible.

(3) A taxpayer's contribution to a qualified charity of a patent subject to a license or transfer restriction is deductible under § 170(a), assuming all other

… the donor did not contribute the donor's entire interest in the property but carved out and contributed only a portion of that interest. Further, the portion contributed was not an undivided portion of the donor's interest because it did not convey a fraction of each and every substantial interest or right owned by the donor in the property. By transferring an overriding royalty interest or a net profits interest, the donor has retained the right inherent in the ownership of a working interest to control, or, in the case of ownership of a part of the working interest, to participate in the control of, the development and operation of the lease. This right to control or to participate in control, similar to the retained voting rights in Rev. Rul. 81-282, is a substantial right, the retention of which prevents the donated interest from being considered an undivided portion.

After the transfer, … the contributed interest is a separate property interest for federal tax purposes. However, if the charitable interest is created by dividing a greater interest held by the donor, the application of section 170(f)(3) to deny the charitable contribution deduction is not precluded merely because the contributed interest is a separate property in the hands of the donee and the incidence of taxation on income from the contributed interest is shifted from the donor to the donee. Rev. Rul. 70-477, 1970-2 C.B. 62, for example, holds that for years after the effective date of section 170(f)(3), a contribution of rent-free use of property, even if recognized as a conveyance of property under local law, does not give rise to a deduction under section 170.

In both Situation 1 and Situation 2, therefore, the contributed interest is less than the taxpayer's entire interest within the meaning of section 170(f)(3) of the Code, and is not an undivided portion of the taxpayer's entire interest. In each case, the partial interest was not transferred in trust and was not in a form that would have resulted in an allowable deduction under section 170(f)(2) had it been transferred in trust.

[3422] Letter Ruling 8950071.

[3423] The ruling reasoned:

In *Situation 1*, X contributes a license to use a patent, but retains a substantial right, i.e., the right to license the patent to others. The license granted to University is similar to the rent-free lease described in § 1.170A-7(a)(1) and the partial interest in motion picture films described in § 1.170A-7(b)(1)(i), in that it constitutes neither X's entire interest in the patent, nor a fraction or percentage of each and every substantial interest or right that X owns in the patent. As a result, the contribution in Situation 1 constitutes a transfer of a partial interest, and no deduction under § 170(a) is allowable. The result would be the same if X had retained any other substantial right in the patent. For example, no deduction would be allowable if X had contributed the patent (or license to use the patent) solely for use in a particular geographic area while retaining the right to use the patent (or license) in other geographic areas.

> applicable requirements of § 170 are satisfied, and subject to the percentage limitations of § 170, but the restriction reduces what would otherwise be the fair market value of the patent at the time of the contribution, and therefore reduces the amount of the charitable contribution for § 170 purposes.[3424]

Generally, all the rights to a partnership are considered a single property interest.[3425] It would not appear to be susceptible to being split up as separate assets the way that corporate stock would be. Thus, a donor should transfer a vertical slice of all of the donor's interest in the partnership. For example, one might target one's donation, divide it by 49%, and put that among into an LLC in which a majority vote can direct the manager to sell the LLC's assets. For example, one owns a 20% partnership interest and wants to give away 5%. Transfer a 10.2% partnership interest (5% divided by 49%) into the LLC and then donate a 49% interest in the LLC to the charity. To encourage the charity – especially a donor-advised fund or supporting organization – to use any distributions from the LLC,[3426] one might also consider obligating the non-charitable member of the LLC to pay any expenses (such as from a seller's representations and warranties) either through its share of sale proceeds or by paying the expenses directly.

Donating an assignee interest and retaining the voting rights might be comparable to Rev. Rul. 81-282[3427] and violate the split-interest prohibition. However, when taxpayers donated all of their interest, which was an interest as a limited partner, but the donees received only an interest as an assignee, the Tax Court[3428] and Fifth Circuit in *McCord* allowed a charitable gift tax deduction for an interest as an assignee.[3429] On the other hand, Judge Swift's concurring opinion in the Tax Court argued that the partial interest prohibition applied to assignee interests. Judge Swift pointed out that the donor transferred the economic rights but not the voting and other noneconomic rights[3430] to

---

[3424] The ruling reasoned:

> In *Situation 3*, Z transfers to University all of Z's interests in the patent with the restriction that University cannot transfer or license the patent for a period of 3 years after the transfer. Unlike the conditional reversion in Situation 2, the restriction on transfer or license is not a condition that can defeat the transfer. Thus, Z's contribution is deductible under § 170(a), assuming all other applicable requirements of § 170 are satisfied, and subject to the percentage limitations of § 170. See Publication 526, Charitable Contributions (describing other requirements for, and limitations on, the deductibility of charitable contributions). Under § 1.170A-1(c), however, the restriction reduces what would otherwise be the fair market value of the patent, and therefore reduces the amount of Z's charitable contribution. If Z had received a benefit in exchange for the contribution, the value of the benefit would further reduce the amount of Z's charitable contribution. See § 1.170A-1(h); Rev. Rul. 67-246, 1967-2 C.B. 104. See also *Singer Co. v. United States*, 449 F.2d 413, 423-424 (Ct. Cl. 1971).

[3425] See part II.Q.8.e.ii.(a) Unitary Basis, citing Rev. Rul. 84-53.

[3426] See part II.Q.6.d.iii Charitable Deduction Against UBTI, pointing out that a donor-advised fund or supporting organization may generate a deduction against unrelated business income (UBI) by making distributions to a charity in the same calendar year that the entity receives the UBI.

[3427] See fn. 3408.

[3428] *McCord v. Commissioner*, 120 T.C. 358 (2003) (reviewed opinion).

[3429] *Succession of McCord, Jr. v. Commissioner*, 461 F.3d 614 (5th Cir. 2006), allowing the deduction without even mentioning the partial interest rule.

[3430] The majority described certain rights:

> Limited partners generally do not participate in the management of the partnership's affairs. However, limited partners do have veto power with respect to certain major

charity. The majority and Fifth Circuit did not address the issue, being content with the donor having transferred all of the donor's rights.[3431] Both arguments are correct, but neither pointed out what happened to the donor's voting rights. When a partner transfers all of the partner's interest in a partnership and the transferee is not admitted as a partner, the transferor's voting rights lapse. This lapse then gives others who have the right to vote on those matters a higher proportionate vote. Judge Swift, although pointing out that that the charity did not receive noneconomic rights, did not articulate that the donor's voting rights essentially shifted to the other limited partners. Neither the majority nor the Fifth Circuit addressed this shift; their written opinions did not indicate whether they understood that the shift occurred. Thus, one can point to *McCord* as support for the proposition that one does not need to transfer one's noneconomic rights to a charity to avoid the partial interest prohibition, if one does not retain any noneconomic rights, but the strength of this support is unclear, given the lack of analysis of what happened to the voting rights. To avoid any doubt, one might suggest transferring voting rights as well.

II.Q.7. Exiting From or Dividing a Corporation

Double taxation applies to C corporations: taxation when the corporation earns profits and taxation when it distributes the profits. To encourage corporations to distribute profits (triggering the second level of taxation), penalties are imposed for accumulating excessive profits. Before discussing these concepts, consider strategies to avoid future double taxation.

Although dividends are taxed at the same rates as capital gains, taxation of dividends might be less favorable, in that the recipient of a dividend generally cannot use his or her basis to reduce the gain on sale and would not be able to defer tax (with respect to the amount treated as a dividend) if a note is used in the redemption.[3432] A majority shareholder who waives a dividend that is paid to other shareholders does not recognize income if done for a bona fide business reason but does recognize income if the waiver is primarily to benefit family members.[3433] The IRS will consider a ruling request

---

> decisions, most notably relating to voluntary bankruptcy filings. In addition, if any two of the children are not serving as managing partners, class B limited partners have voting rights with respect to certain large dollar managerial decisions. Limited partners also have access to certain partnership financial information.

[3431] See fn. 3400, providing that transferring an undivided interest in all of the donor's rights is an exception to the partial interest rules. In *McCord*, the assigned interests also carried with them the right to sell their interests at fair market value for cash, which sale took place shortly after the transfer. Perhaps this quick liquidation made the court more sympathetic to allowing the charitable deduction?

[3432] Code § 301(c)(1) states that the amount distributed as a dividend is ordinary income. Code § 316 generally provides that distributions are taxable as dividends to the extent of the corporation's current and accumulated earnings and profits. However, if and to the extent that a distribution is not a dividend, it is treated more favorably than a sale, in that such distributions first reduce the stock's basis, without any portion of the distribution considered to be a profit, until basis is exhausted. Code § 301(c)(2).

[3433] Rev. Rul. 56-431, holding:

> On the basis of facts in the instant case it is deemed that the benefits to be afforded the taxpayer's relatives by the waiver of his right to share in the dividend payments was the primary purpose for signing the waiver. The alleged business purpose to be served, namely, the payment of a larger dividend to minority stockholders who are key

approving a waiver when the amounts benefitting family members are relatively incidental.[3434] When a subordinated note's value became an issue relating to a merger with an unrelated third party, the IRS waived dividend treatment when the note was disposed of in a disproportionate manner.[3435]

Once commonly used strategy is to distribute the profits to owners through wages to owners (subject to immediate income and FICA taxation at individual rates) or through contributions to qualified retirement plans (subject to income taxation upon distribution from the plans).[3436] However, note that a corporation may not deduct unreasonably high

---

employees to maintain their good will, is merely incidental. No opinion is expressed whether such a purpose might be appropriate in other circumstances. Since the amounts distributed to the minority stockholders do not impair the capital by any greater amount than if distributed pro rata to all stockholders, the waiver is not considered necessary to protect the working capital of the corporation. Thus, the taxpayer's disposition of his power to receive his pro rata share of any dividends declared by the corporation, through effecting payment of such pro rata share to his relatives (including his minor children) as well as to his employees by the signing of a waiver must be considered the realization of income by him to the extent of dividend payments waived.

For example, if the corporation in the instant case declared dividends of $1000 on January 31, 1955, and, in accordance with the waiver previously executed by the majority stockholder, it paid the total of such dividends, pro rata, to the minority stockholders, the taxpayer, or majority stockholder, will be considered to have realized income to the extent of 65 percent of the total dividends paid, or $650, since he owned 65 percent of the capital stock of the corporation. The minority stockholders will be considered to have received, as dividends, only $350.

The above conclusion is not in conflict with Revenue Ruling 45, C. B. 1953-1, 178, which holds that the declaration of a dividend upon minority shares did not result in the receipt of income by the majority stockholder who had waived his right to share in the dividend. That ruling was based upon a factual situation in which no family or direct business relationship existed between the majority and minority stockholders and the arrangement was entered into only for bona fide business reasons, situations which do not exist in the instant case.

[3434] Section 3 of Rev. Proc. 67-14 provides that the IRS will consider a ruling request if all of the following conditions exist:

.01. A bona fide business reason must exist for the proposed waiver of dividends.

.02. The relatives of the stockholder proposing to waive his right to future dividends must not be in a position to receive more than 20 percent of the total dividends distributed to the nonwaiving shareholders. For this purpose the relatives of a waiving stockholder include his brother and sister (whether by the whole or half blood), spouse, ancestors, and lineal descendants, the spouses of his brothers and sisters (whether by the whole or half blood) and the spouses of his lineal descendants.

.03. A ruling issued on a proposed waiver of dividends transaction will clearly indicate that the ruling will no longer be applicable if any change in the stock ownership during the waiver period enables nonwaiving relatives to receive more than 20 percent of a dividend, unless the change occurs because of death.

.04. A ruling issued on a proposed waiver of dividends transaction will not be effective for a period longer than three years from the date of the ruling.

.05. A request for a ruling on a proposed waiver of dividends transaction must be submitted to the National Office in accordance with Revenue Procedure 67-1, page 544, this Bulletin.

[3435] Letter Ruling 201636037.

[3436] See part II.A.1.b C Corporation Tactic of Using Shareholder Compensation to Avoid Dividend Treatment.

compensation. This issue applies primarily when profits come from the sale of goods (rather than services) or from the efforts of non-owners. Generally, a professional should be able to justify compensation based on profits derived directly from the professional's work.

When a shareholder takes money out of a corporation without declaring compensation, the transfer constitutes a distribution unless the shareholder can prove that it was a bona fide loan to the shareholder[3437] or perhaps a repayment of a loan the shareholder made to the corporation.[3438]

Any assets that could appreciate may be held by the owners directly and rented to the corporation. The owners should hold these assets in one or more LLCs.

II.Q.7.a. Corporate Redemption

II.Q.7.a.i. Redemption Compared to Cross-Purchase

The remaining parts of this part II.Q.7.a and part II.Q.7.b Redemptions or Distributions Involving S Corporations describe various issues involved in corporate redemptions.

How might one compare a redemption to a purchase by a new or existing shareholder (a cross-purchase)? One should consider the reliability (or lack thereof) of the corporation as a purchaser compared with a shareholder as a purchaser. A cross-purchase generally avoids the tax issues that involve redemptions. If C corporation stock is involved, one might consider preserving for the buyer the possibility that up to $10 million[3439] of future gain might be excluded from income;[3440] that benefit applies only to stock issued by the corporation, and a redemption that occurs to close to a stock issuance can disqualify the stock issuance.[3441] The special rule for ordinary loss

---

[3437] *Zang v. Commissioner*, T.C. Memo. 2017-55, which held that the payments constituted income, without specifying the type of income. The court set forth the law:

> Objective factors are considered to determine the parties' intent and whether a bona fide loan occurred, and no single factor is dispositive. See *Welch v. Commissioner*, 204 F.3d 1228, 1230 (9th Cir. 2000), *aff'g* T.C. Memo. 1998-121; *Frierdich v. Commissioner*, 925 F.2d 180, 182 (7th Cir. 1991), *aff'g* T.C. Memo. 1989-393. We examine the following factors to determine whether the additional checks and cash withdrawals that petitioners received were loans:
> (1) the ability of the borrower to repay;
> (2) the existence or nonexistence of a debt instrument;
> (3) security, interest, a fixed repayment debt, and a repayment schedule;
> (4) how the parties' records and conduct reflect the transaction;
> (5) whether the borrower has made repayments;
> (6) whether the lender had demanded repayment;
> (7) the likelihood that the loans were disguised compensation for services; and
> (8) the testimony of the purported borrower and lender.
> *Welch v. Commissioner*, 204 F.3d at 1230; see also *Kaider v. Commissioner*, T.C. Memo. 2011-174.

[3438] See part II.G.19 Debt vs. Equity.

[3439] Or ten times the stock's basis, if greater. Code § 1202(b)(1)(B).

[3440] See part II.Q.7.j Exclusion of Gain on the Sale of Certain Stock in a C Corporation.

[3441] See text accompanying fns. 3756 -3759.

treatment of up to $50,000 on the sale of stock also applies only to stock issued to the holder.[3442]

II.Q.7.a.ii. Hybrid Between Redemption and Cross-Purchase When Selling to New Shareholder or Other Shareholders

Instead of a shareholder selling all of his or her C corporation stock to a buyer, consider selling some of the stock and having the corporation redeem the rest. That way, instead of the buyer having to pay tax on dividends used to buy the stock, the buyer pays tax only on dividends the buyer uses to buy the seller's stock, and corporation completes the rest of the purchase, reducing the corporation's earnings and profits.[3443] This imposes double taxation (the corporation paying tax on its earnings used to buy the seller's stock, and the seller paying capital gain tax) instead of triple taxation (the corporation paying tax on its earnings used to pay a dividend to the buyer, then the buyer paying dividend tax, and the seller paying capital gain tax).[3444]

The redemption reduces the corporation's earnings and profits,[3445] thereby reducing potential dividend treatment and facilitating an S election.[3446] If the corporation does not make an S election, consider whether the buyer should first buy the stock directly from the corporation, which may make the stock eligible for a certain capital gain

---

[3442] See part II.Q.7.k Special Provisions for Loss on the Sale of Stock in a Corporation under Code § 1244.

[3443] In *Zenz v. Quinlivan*, 213 F.2d 914 (6th Cir. 1954):

> Prospective buyer did not want to assume the tax liabilities which it was believed were inherent in the accumulated earnings and profits of the corporation. To avoid said profits and earnings as a source of future taxable dividends, buyer purchased part of taxpayer's stock for cash. Three weeks later, after corporate reorganization and corporate action, the corporation redeemed the balance of taxpayer's stock, purchasing the same as treasury stock which absorbed substantially all of the accumulated earnings and surplus of the corporation.

The IRS and lower court did not like this tax-motivated structure. The Sixth Circuit said that taxpayers can use the structure that is most favorable, holding:

> Since the intent of the taxpayer was to bring about a complete liquidation of her holdings and to become separated from all interest in the corporation, the conclusion is inevitable that the distribution of the earnings and profits by the corporation in payment for said stock was not made at such time and in such manner as to make the distribution and cancellation or redemption thereof essentially equivalent to the distribution of a taxable dividend.

The IRS agreed to follow *Zenz* in Rev. Ruls. 54-458 (1939 Code) and 55-745 (1954 Code), which was followed (although in a different context) by Rev. Ruls. 75-447, 77-226, 79-273, 81-186, and 84-114.

[3444] For triple taxation, see parts II.Q.1.a.i.(b) C Corporation and II.Q.1.a.ii.(b) C Corporation Redemption (California).

[3445] See fn. 3526, found in part II.Q.7.b.iv.(b) S Corporation Redemptions Using Life Insurance Proceeds.

[3446] The main issue is avoiding possible termination of an S election described in part II.P.3.c.iii Excess Passive Investment Income, which is not difficult to avoid if one is attuned to the issue. See also parts II.P.3.c.iv Problem When S Corporation with Earnings & Profits Invests in Municipal Bonds and II.Q.7.b.iv.(a) S Corporation Distributions of Life Insurance Proceeds - Warning for Former C Corporations.

exclusion,[3447] followed by the seller being redeemed after a waiting period that is generally at least two years.[3448]

This method, however, does not provide the buyer with basis except to the extent that the buyer, rather than the corporation, buys the seller's stock.

II.Q.7.a.iii. Redemption Taxed Either As Sale of Stock or Distribution; Which Is Better When

In a redemption by an entity taxed as a corporation, the seller generally is taxed on the extent to which the redemption proceeds exceed the seller's tax basis.[3449] However, if the seller retains an interest in the corporation, or other family members also retain an interest, the redemption might be considered a distribution rather than a sale of the stock.[3450] In other words, what for state law purposes is a redemption is not necessarily treated as a redemption for income tax purposes.[3451]

A redemption for a promissory note that is recast as a dividend[3452] is immediately taxed; installment sale deferral does not apply – not even to the capital gain portion.[3453]

On the other hand, taxing as a distribution the redemption of S corporation stock might be more favorable than taxing it as the sale of the stock, because generally the former allows basis to apply first to all of the proceeds[3454] and the latter would use only the basis attributable to the block redeemed.

[3447] See part II.Q.7.j Exclusion of Gain on the Sale of Certain Stock in a C Corporation.
[3448] See the text accompanying fns. 3756–3766 in part II.Q.7.j.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.
[3449] Code §§ 302(a), 1001.
[3450] Code §§ 302(b)(2)(C) and 302(c) provide that family attribution can cause redemptions to be treated as distributions that might be taxed as dividends rather than as sales.
[3451] However, since Code § 302(a) looks to the Code § 317(b) definition of redemption, generally a transaction must be a redemption for state law purposes before it might be considered a redemption for tax purposes.
[3452] See fn. 3432 in part II.Q.7 Exiting From or Dividing a Corporation.
[3453] Reg. §§ 1.301-1(b), 1.301-1(*l*); *Cox v. Commissioner*, 78 T.C. 1021 (1982); *Brams v. Commissioner*, 734 F.2d 290 (6th Cir. 1984), *aff'g* T.C. Memo. 1983-25. *Cox* held at 1028-1029:

> Section 453(b) requires a sale. Section 301(c)(3)(A) is intended to tax distributions which impair a corporation's capital as capital gains (*Cloutier v. Commissioner*, 24 T.C. 1006, 1013 (1955)). We can see no reason why a taxpayer should be allowed to account for section 301(c)(3)(A) gain differently from income under section 301(c)(1), especially since the applicability of section 301(c)(3)(A) depends, to a large extent, upon the combination of a fortuitous lack of corporate earnings and profits and a small stock basis. We find no intent in section 301(c)(3)(A) to afford shareholders access to a more desirable method of accounting. Section 301(c)(3)(A) merely characterizes the gain as gain from a sale or exchange, it does not provide the sale needed for section 453(b).

[3454] See part II.Q.7.b.i Redemptions or Distributions Involving S Corporations - Generally, especially the text accompanying fns. 3507-3508.

II.Q.7.a.iv. Dividends; Avoiding Dividend Treatment Using Redemptions under Code §§ 302 and 303

The amount of cash (or fair market value of property)[3455] that a C corporation distributes to its shareholders:[3456]

(1) Is included in income to the extent that it is a dividend.

(2) Is applied against the adjusted basis of their stock, to the extent it is not a dividend and basis is available.

(3) Constitutes "gain from the sale or exchange of property" to the extent (1) and (2) do not apply.

"Dividend" means any distribution of property[3457] made by a corporation to its shareholders out of its earnings and profits accumulated after February 28, 1913, or out of its earnings and profits of the taxable year (computed as of the close of the taxable year without diminution by reason of any distributions made during the taxable year), the latter without regard to the amount of the earnings and profits at the time the distribution was made.[3458]

Although qualified dividends are taxed at the same rate as capital gains,[3459] redemptions have an advantage in that the shareholders may deduct tax basis against redemption proceeds. For stock passing from a decedent, the basis adjustment at death might eliminate any tax on redemption. Also, tax deferral using the installment method is not available if the state law redemption is treated for tax purposes as a dividend.[3460] Furthermore, to the extent that a redemption recharacterized as a distribution is treated as a return of capital (because it exceeds earnings and profits and the excess is not treated as a dividend), presumably the distribution would be a return of basis pro rata, which could create unexpected capital gain if some shares have high basis and others have low basis.[3461]

[3455] Code § 301(b)(1). Fair market value is determined as of the date of the distribution. Code § 301(b)(3).

[3456] Code § 301(c).

[3457] Reg. § 1.316-1(a)(1) refers to "any distribution of property as defined in section 317 in the ordinary course of business, even though extraordinary in amount." Code § 317(a) provides:

> For purposes of this part, the term "property" means money, securities, and any other property; except that such term does not include stock in the corporation making the distribution (or rights to acquire such stock).

However, cases tax as a constructive dividend either the value or the out-of-pocket costs of goods or services a corporation provides to a shareholder in that person's capacity as such. See 764(3d) T.M. IV.F. (detailed discussion); *Federal Tax Coordinator* ¶J-2701 Distribution made for shareholder's benefit in his capacity as a shareholder; Bittker & Eustice, ¶8.06. Constructive Distributions, *Federal Income Taxation of Corporations & Shareholders* (WG&L).

[3458] Code § 316(a).

[3459] Code § 1(h)(11).

[3460] See Regs. §§ 1.301-1(d)(1)(ii), 1.301-1(h)(2)(i) and 1.301-1(l) and Code § 312(a)(2).

[3461] See part II.Q.7.h.ii Taxation of Shareholders When Corporation Distributes Cash or Other Property, especially the text accompanying fn. 3686.

Code §§ 302 and 303 set forth two methods by which a stock redemption can be qualified to avoid dividend treatment.

Code § 303 provides a way for the estate of a deceased shareholder to obtain cash from a closely held corporation to pay estate taxes and expenses while obtaining the favored tax treatment of an exchange. To qualify for Code § 303, the estate's total stock holdings in the closely held corporation must exceed 35% of the total adjusted gross value of the estate, and the distribution must occur within 90 days after the expiration of the three-year limitations period for the assessment of estate tax set forth in Code § 6501(a) (subject to extension in Tax Court proceedings or if a Code § 6166 election is in place). The amount eligible for Code § 303 redemption cannot exceed the total administration expenses allowable under Code § 2053, including estate taxes and interest.

For amounts exceeding estate taxes and expenses, one of the following four exceptions must apply to qualify as an exchange under § 302:

(a) The redemption is not essentially equivalent to a dividend. This applies on a case-by-case basis, based on whether the redemption results in a "meaningful" reduction in ownership.[3462]

(b) The redemption is substantially disproportionate. A substantially disproportionate redemption is one that decreases the shareholder's voting stock interest below 80% and the shareholder's ownership of outstanding stock below 50% immediately following the redemption. Attribution make this exception difficult to satisfy.[3463]

(c) The redemption is a complete termination of the shareholder's interest. If the shareholder completely terminates his or her interest in the corporation, the redemption may qualify under Code § 302.[3464] A gift of stock to a family member, followed by a redemption of the donor's remaining stock, qualified as a complete termination.[3465]

(d) The redemption is a partial liquidation distribution. A distribution is a partial liquidation[3466] if:[3467]

    (1) it is not essentially equivalent to a dividend (determined at the corporate level rather than the shareholder level);

[3462] *U.S. v. Davis*, 397 U.S. 301 (1970); Rev. Ruls. 75–502, 75–512, and 78–401. The transaction should also have a business purpose. See footnote 31 of *H.J. Heinz Company & Subs. v. U.S.*, 99 AFTR 2d 2007-2940, 76 Fed. Cl. 570 (2007).

[3463] Code §§ 302(c)(1), 318. See Harris & Kessler, Constructive Ownership under Section 318, *Business Entities* (WG&L), Mar/Apr 2016.

[3464] Reg. §§ 1.302-4, 1.302-4T. When a beneficiary grantor trust owns stock in a corporation, the beneficiary is the owner whose complete termination must be tested. Rev. Rul. 72-471, cited with approval in Rev. Rul. 85-13.

[3465] Letter Ruling 200939011.

[3466] Code § 302(b)(4) provides that redemption treatment applies if the distribution is:

(A) in redemption of stock held by a shareholder who is not a corporation, and

(B) in partial liquidation of the distributing corporation.

[3467] Code § 302(e).

(2) the distribution is pursuant to a plan and occurs within the taxable year in which the plan is adopted or within the succeeding taxable year;

(3) the distribution is attributable to the distributing corporation's ceasing to conduct, or consists of the assets of, a qualified trade or business which the corporation has actively conducted for the five years immediately prior to the distribution; and

(4) the distributing corporation is actively engaged in the conduct of a qualified trade or business.

However, a buy-sell agreement might convert what appears to be a redemption above into a deemed dividend followed by a deemed cross-purchase. The IRS takes this position if a shareholder has the primary, unconditional obligation to enter into a cross-purchase and the corporation redeems the stock instead.[3468] However, the IRS does not take this position if a shareholder has a mere option to cross-purchase, if a shareholder's purchase obligation is contingent on the corporation not redeeming the stock, if a shareholder has the right to assign the purchase obligation to the corporation, or if the agreement is amended before a shareholder's purchase obligation became unconditional.[3469]

Also certain Code § 302(d) redemptions and other transactions might be recharacterized if any of the company's stock "is structured so that dividends (as defined in section 316) paid by the corporation with respect to the stock are economically (in whole or in part) a return of the holder's investment (as opposed to only a return on the holder's investment)."[3470]

II.Q.7.a.v. Redemptions and Alternative Minimum Tax

Life insurance proceeds received by a C corporation may be taxed under the corporate alternative minimum tax (AMT) because insurance proceeds increase a corporation's book earnings, but are not included in the taxable income of the corporation.[3471] As the cash value of corporate owned life insurance policy grows over the amount of premiums paid each year, annual exposure to AMT will grow as well.

However, AMT does not apply to corporations whose average annual gross receipts do not exceed a threshold. Generally, the corporation's average annual gross receipts for all 3-taxable-year periods beginning after December 31, 1993 and ending before such taxable year cannot have exceeded $7,500,000.[3472] However, for the first 3-taxable-year

period (or portion thereof) of the corporation which is taken into account under this test, average annual gross receipts cannot have exceeded $5,000,000.[3473]

This tax does not apply to S corporations.[3474]

II.Q.7.a.vi. Redemptions and Accumulated Earnings Tax

Generally, a C corporation that accumulates funds could also be subject to the 20% accumulated earnings tax.[3475] The tax applies to every corporation "formed or availed of for the purpose of avoiding the income tax with respect to its shareholders or the shareholders of any other corporation, by permitting earnings and profits to accumulate instead of being divided or distributed,"[3476] except:[3477]

(1) a personal holding company (as defined in section 542),

(2) a corporation exempt from tax under subchapter F (section 501 and following), or

(3) a passive foreign investment company (as defined in section 1297).

Thus, it complements the personal holding company tax, which is also designed to force C corporations to declare dividends. See part II.A.1.e Personal Holding Company Tax.

The tax is on "accumulated taxable income."[3478] "Accumulated taxable income" means the adjusted taxable income,[3479] minus the sum of the dividends paid deduction[3480] and the accumulated earnings credit.[3481]

The accumulated earnings credit works as follows:

- "If the corporation is a mere holding or investment company, the accumulated earnings credit is the amount (if any) by which $250,000 exceeds the accumulated earnings and profits of the corporation at the close of the preceding taxable year."[3482]

- Otherwise, the accumulated earnings credit is equal to such part of the earnings and profits for the taxable year as are retained for the business' reasonable needs, minus a certain deduction relating to U.S.-source capital gains.[3483] The dividends paid

[3481] Code § 535(b).
[3482] Code § 535(c)(3).
[3483] Code § 535(c)(1).

deduction[3484] reduces retained earnings and profits.[3485] The accumulated earnings credit for such a corporation is no less than the amount by which $250,000 exceeds the corporation's accumulated earnings and profits at the close of the preceding taxable year.[3486] The $250,000 amount is reduced to $150,000 for a corporation the principal function of which is the performance of services in the field of health, law, engineering, architecture, accounting, actuarial science, performing arts, or consulting.[3487]

Let's examine how the $250,000 credit would work for a mere holding or investment company. Suppose the accumulated earnings and profits at the close of the preceding taxable year were $250,000 or more. The credit would be zero, because $250,000 did not exceed the accumulated earnings and profits at the close of the preceding taxable year. Suppose the accumulated earnings and profits at the close of the preceding taxable year were $200,000. The credit would be $50,000, leaving $200,000 subject to the tax. the sweet spot would seem to be $125,000 accumulated earnings and profits at the close of the preceding taxable year, where a credit of $125,000 ($250,000 minus $125,000) would offset the $125,000 accumulated earnings and profits at the close of the preceding taxable year. Of course, that assumes that the corporation is not a personal holding company, which is exempt from the accumulated earnings tax.[3488]

Earnings and profits of a corporation accumulating beyond the business' reasonable needs is determinative of the purpose to avoid the income tax with respect to shareholders, unless the corporation by the preponderance of the evidence proves otherwise.[3489] A corporation being a mere holding or investment company is prima facie evidence of the purpose to avoid income tax with respect to shareholders.[3490] If the corporation does not the liquidity to pay a cash distribution, it should consider declaring a Code § 565 consent dividend,[3491] being extra careful about the consent dividend if a trust that makes charitable contributions is a shareholder.[3492]

However, reasonable business needs include the business' reasonably anticipated needs, funding a redemption to pay estate tax or expenses of estate administration, or is being used to fund certain redemptions of charitable shareholders.[3493] Consider documenting the business purposes for accumulating earnings in annual meeting minutes. If the earnings get too high and cannot be reduced through high but

reasonable compensation (especially qualified retirement plans) or rent, consider making an S election.[3494]

II.Q.7.a.vii. Corporate Liquidation

When a corporation liquidates completely:

- Generally, the liquidating corporation recognizes gain or loss on the distribution of property in complete liquidation as if such property were sold to the distributee at its fair market value.[3495] Code § 337 (liquidation of an 80%-owned corporate subsidiary) and other provisions of Code § 336 provide exceptions. The entire gain (not just depreciation recapture) from the deemed sale of any depreciable or amortizable property may be taxed as ordinary income (which, in addition to having consequences to S corporation owners, can be an issue to C corporations that have capital losses that could otherwise be offset).[3496]

- The shareholder's proceeds are considered to be proceeds from selling the shareholder's stock.[3497] Such proceeds are reduced by any liabilities the shareholders assume.[3498] Subject to a particular exception, dividend taxation does not apply to the deemed sale proceeds.[3499]

Rather than applying installment sale rules to the gain on sale, basis is applied to each receipt until basis runs out, and then gain is recognized for proceeds in excess of basis.[3500]

"As a general rule, losses resulting from a complete liquidation will be recognized only after the corporation has made its final distribution."[3501] However, if at least 99% of the proceeds have been paid to the shareholders, they can recognize loss on the liquidation at that time.[3502] Furthermore, "certain exceptions to the general rule have been recognized by the courts where the stock is shown to have been worthless prior to complete liquidation, such as, for example, where the corporation's liabilities exceeded

3494 Although S corporations cannot have excessive income from investments, that prohibition is easy to avoid using a modest amount of oil and gas investments. See part II.P.3.c.iii Excess Passive Investment Income, especially fn. 2867.

3502 Rev. Rul. 69-334.

its assets,"[3503] or "where the losses are so reasonably certain in fact and ascertainable in amount as to justify their deductions before they were absolutely realized."[3504]

Suppose, a corporation transfers assets to a trust for the benefit of the shareholders to take of post-liquidation winding-up issues, such as contingent liabilities. In such a case, the shareholders are considered the "owners" of the trust under the grantor trust rules.[3505] If in a subsequent year, the shareholders or the trust discharge a contingent liability of the corporation, such discharge will give rise to a capital loss in the year of discharge.[3506]

One might decide that the above constitutes substantial authority for taking the following position:

1. When shareholders liquidate a corporate at a loss and some of the liquidating proceeds are escrowed to cover contingent liabilities, the loss is recognized at the time the proceeds are escrowed based on the amount of the escrow.

2. Any payments from the escrow for contingent liabilities are recognized as capital losses when paid. Any amounts escrowed for known liabilities would constitute liabilities assumed, reducing the net sale proceeds and causing or increasing the loss.

It has been suggested to me that the IRS might take a rigid position that losses are not allowed until all contingencies are finally resolved and that the above position is stronger when a liquidating trust is used rather than an escrow account. However, the language quoted in the analysis persuades me enough to take the deduction as described above.

[3503] *Schmidt v. Commissioner*, 55 T.C. 335, 340-341 (1970), citing *Dresser v. United States,* 55 F.2d 499, 512 (Ct. Cl. 1932), *certiorari denied* 287 U.S. 635 (1932)*; Industrial Rayon Corp. v. > The *Winthrop* case was held to be controlling in *Palmer v. United States*, an unreported case (D. Conn. 1958, 1 A.F.T.R. 2d 863, 58-1 U.S.T.C. par. 9288). In that case, a corporation contracted to sell all of its assets, except cash, to another corporation and adopted a resolution to liquidate and dissolve. The purchase price was paid, 70 percent in cash and 30 percent in notes secured by a first mortgage on the property sold. The District Court held that the taxpayer sustained a loss in 1952, the year of the sale, since there was no uncertainty as to the amount of cash and the notes, secured by the mortgage, could reasonably be valued at par.

[3505] Rev. Rul. 72-137. Rev. Proc. 82-58 which specifies the conditions that must be present before the IRS will consider issuing advance rulings whether a liquidating trust is treated as such or as a business entity under Reg. § 301.7701-4, and Rev. Proc. 91-15 provides a checklist that must accompany all such requests. For rules governing liquidating trusts generally, see part II.D.4.b Liquidating Trusts. For grantor trusts generally, see part III.B.2 Grantor Trust Planning, Including GRAT vs. Sale to Irrevocable Grantor Trust.

[3506] Rev. Rul. 72-137.

II.Q.7.b. Redemptions or Distributions Involving S Corporations

II.Q.7.b.i. Redemptions or Distributions Involving S Corporations - Generally

If the corporation has an S election in place, then taxation as a distribution generally is favorable, in that distributions generally reduce basis,[3507] without any part of the distribution being treated as profit on the sale of stock.[3508] Redemptions might very well be taxed as distributions,[3509] so long as they are not partial liquidations.[3510]

If the corporation has no accumulated C corporation earnings and profits (E&P), distribution treatment produces the same result as redemption treatment after basis is used up. As described below, if the corporation has no accumulated C corporation earnings and profits and the distributions exceed the corporation's accumulated adjustments account (AAA), dividend treatment can result in a qualified dividend that might receive capital gain tax rates (if such rates apply to dividends that year). In corporations with accumulated C corporation earnings and profits, consider to elect treating the distribution first as a dividend coming from C corporation earnings and profits.[3511]

See also part II.Q.7.a.vii Corporate Liquidation. Any activity for the year that affects basis is applied in determining the basis of the liquidated stock.[3512]

For the termination of the S election wiping out AAA, see part II.P.3.c.v Conversion from S Corporation to C Corporation then Back to S Corporation.

For the effect of a transfer on the allocation of income reported on the involved shareholders' K-1s, see part III.B.2.j.ii Tax Allocations on the Transfer of Stock in an S Corporation, within part III.B.2.j Tax Allocations upon Change of Interest.

[3507] If the corporation has always been an S corporation, then earnings increase basis under Code § 1367(a)(1)(A) and distributions reduce basis under Code §§ 1367(a)(2)(A) and 1368(b)(1) (without the need to maintain an accumulated adjustments account). If the corporation has prior C corporation earnings, then taxable earnings give rise to an accumulated adjustments account (AAA) under Code § 1368(e) and distributions reduce basis under Code §§ 1367(a)(2)(A) and AAA under Code § 1368(c)(1).
Note, however, that distributions from a Qualified Subchapter S Subsidiary to its parent are ignored. See Reg. § 1.1361-4(a)(1)(ii), the principles of which were adopted in Reg. § 1.1361-5(a)(4), Example (4).

[3508] Code § 1368; Rev. Rul. 95-14. However, life insurance and other nontaxable income will increase stock basis but will not increase the accumulated adjustments account (AAA). Code § 1368(e)(1). Similarly, premiums paid on life insurance owned by the S corporation do not reduce AAA. Rev. Rul. 2008-42. If the S corporation has prior C corporation earnings and profits, then a distribution in excess of AAA will constitute a taxable dividend rather than merely being applied against the basis acquired by that life insurance or other nontaxable income. Code §§ 1368(c)(2), 301(c).

[3509] See part II.Q.7.a.iv Dividends; Avoiding Dividend Treatment Using Redemptions under Code §§ 302 and 303.

[3510] See fns. 3466-3467 and accompanying text.

[3511] Code § 1368(e)(3). See part II.P.3.c Conversion from C Corporation to S corporation, for special considerations involving S corporations that used to be C corporations.

[3512] Letter Ruling 200106009.

II.Q.7.b.ii. Redemptions or Distributions Involving S Corporations Compared with Partnerships

Presumably any payment for stock treated as a distribution instead of a redemption would be applied pro rata to the owner's shares, which might cause premature taxation if some shares have much lower basis than other shares.[3513] However, if all shares have the same adjusted basis, this would not be a concern.

The owner of a partnership interest, however, treats all of the owner's interest in the partnership as a single holding,[3514] allowing the entirety of the owner's basis to be applied against any distribution before triggering gain.[3515] For more about partnership redemptions compared with installment sales of stock, see parts II.Q.8.b.ii.(d) Comparing Code § 736(b) to an Installment Sale and II.Q.8.b.ii.(e) Effect of Code § 736 Payments, Installment Sale Payments, or Deferred Compensation on Balance Sheet; be cautious, however, about property distributions,[3516] especially those within seven years of any contribution to a partnership in exchange for a partnership interest.[3517]

Partial liquidations would not receive this favorable distribution treatment for an S corporation,[3518] but classifying a pro rata distribution as a partial liquidation would not change its treatment under Code § 736 as described above, so partnership treatment allows more rapid use of basis.

Also, suppose the corporation redeemed stock in exchange for a promissory note, and the redemption was treated as a distribution. Installment treatment is not permitted in a corporate setting for notes that are treated as distributions,[3519] thereby accelerating income, whereas a naked promise to pay a partner in redemption of a partnership interest does not count until cash is paid.[3520]

II.Q.7.b.iii. S Corporation Receipt of Life Insurance Proceeds

In Letter Ruling 200409010, upon the death of the key person, the S corporation (presumably using the accrual method of accounting) would immediately redeem the stock held by the key person at the time of death by issuing a promissory note to the key person's estate. After the redemption, the remaining shareholders would elect to cut off

3515 See part II.Q.8.b.i.(a) Code § 731: General Rule for Distributions.
3516 See part II.Q.8.b.i Distribution of Property by a Partnership.
3517 See part II.Q.8.b.i.(e) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value, including a warning that a partner contributing cash in exchange for a partnership interest also causes these issues to arise, as described in the text accompanying fn. 3932.
3518 See fns. 3466-3467 and accompanying text.
3519 See fn. 3453.
3520 See part II.Q.8.b.ii.(d) Comparing Code § 736(b) to an Installment Sale.

the taxable year.[3521] By terminating the taxable year after the redemption but before submitting a claim on the life insurance policy, the remaining shareholders sought to have all of the insurance proceeds allocated to their stock for purposes of increasing their tax basis. The IRS ruled that the life insurance death benefit will be required to be recognized as of the date of death. Notwithstanding needing to go through the claims submission and evaluation process, death would establish the corporation's rights to the proceeds as a beneficiary of the insurance policy.

Thus, the basis increase due to the receipt of the life insurance death benefit would not be allocated solely to the surviving shareholders. By using a redemption, they would have received a smaller basis increase than if they had received the life insurance proceeds directly and bought the decedent's stock.

II.Q.7.b.iv. S Corporation Distributions of, or Redemptions Using, Life Insurance Proceeds

II.Q.7.b.iv.(a). S Corporation Distributions of Life Insurance Proceeds - Warning for Former C Corporations

Below is a variation of the theme of part II.P.3.c.iv Problem When S Corporation with Earnings & Profits Invests in Municipal Bonds.

In Rev. Rul. 2008-42,[3522] an S corporation purchased an employer-owned life insurance contract on the life of one of its employees in order to cover expenses the company would incur as a result of the death of the employee (also known as a key-man policy). The employee was a highly compensated employee of the corporation. The corporation paid all of the premiums for the policy and was the beneficiary of the policy. At the end of the taxable year, the corporation had earnings and profits ("E&P"). The IRS reminded us that Code 101(j) imposes notice and reporting requirements regarding employer-owned life insurance to preserve the Code § 101 exclusion of life insurance proceeds from income taxation.[3523]

The IRS ruled that premiums paid did not reduce the S corporation's AAA. It also ruled that the death benefit received does not increase the S corporation's AAA. What the IRS does not point out is the general ordering rules of Code § 1368, which are that distributions from an S corporation are treated as the following with respect to each shareholder:

1. A tax-free distribution to the extent of the lesser of stock basis or a pro rata share of AAA, then

2. A taxable dividend to the extent of a pro rata share of E&P, then

3. Return of principal to the extent of remaining basis, and finally

---

[3521] Code § 1377(a)(2); for more details, see part III.B.2.j.ii.(c) Transfer of Shareholder's Entire Interest.

[3522] See New Ruling Provides Guidance on AAA of S corporations, *Business Entities* (WG&L) (Jan./Feb. 2009).

[3523] See part II.Q.4.g Income Tax Trap for Business-Owned Life Insurance.

4. Capital gain.

Suppose, for example, that the shareholders contributed $10,000 to the corporation at its inception, and no stock has been transferred since inception. It operated as a C corporation and earned $1,000,000 of E&P. Then it elects S status and has $250,000 of AAA. A key employee dies, and the corporation receives $1,500,000 of life insurance proceeds from a term policy and then distributes $700,000 to the shareholders. The consequences are:

- Immediately before the employee died, the shareholders had tax basis in their stock of $260,000, which is the sum of the initial $10,000 contribution and the $250,000 of AAA. Immediately after the death, this tax basis is increase to $1,760,000 due to the receipt of death benefits.

- Of the $700,000 the shareholders receive, $250,000 is a tax-free return of AAA that they could have pulled out tax-free before the employee died; their stocks' tax basis is reduced to $1,510,000 by reason of the $250,000 tax-free distribution. The remaining $450,000 is a taxable dividend out of the $1,000,000 E&P, even though it can be traced to the tax-free life insurance proceeds and even though the shareholders have ample basis to receive distributions if the corporation had never been a C corporation. E&P is reduced to $550,000, since $450,000 out of the $1,000,000 E&P has been distributed.

Turning tax-free life insurance proceeds into taxable dividends – not a good deal!

Suppose instead that the shareholders had owned the policy, had been the beneficiaries, and had received distributions from the corporation to pay premiums:

- Each year, AAA would have been reduced to the extent of the distributions that were used to pay premiums.

- The shareholders receive the life insurance proceeds tax-free, assuming they complied with Code § 101(j) as in the Revenue Ruling.

- When the shareholders invest into the company the $800,000 that, under the above example was retained in the corporation, their stock basis increases by that $800,000 to $1,060,000 from the pre-death $260,000 used in the example.

- Thus, the shareholders have lower basis than in the first example, which is the price they pay for not having dividend income.

- If future distributions exceed AAA, they could have dividend income up to the full $1,000,000 of E&P.

Thus, this alternative defers dividend taxation but does not avoid it if future distributions significantly exceed AAA. However, if future distributions in excess of AAA are in the form of redemptions that are taxed as such, then this alternative might very well avoid dividend taxation.

A more tax-efficient way to structure this alternative would be for the shareholders to contribute their $800,000 investment of the life insurance proceeds to a new limited liability company taxed as a partnership. Then either:

- The new LLC loans the proceeds to the S corporation as needed, documenting the loan with interest at the applicable federal rate.

- The S corporation then contributes all of its business assets to the LLC. Later, when the LLC does not need part or all of the $800,000 anymore, it can distribute that excess money to the shareholders as a tax-free return of their capital contribution. This might or might not be a practical alternative, depending on the non-tax issues caused by transferring the S corporation's assets, as well as the annual expense of filing two business income tax returns instead of one. This is more cumbersome than the loan alternative, but it might have the positive effect of shifting a significant portion of the business operations to a partnership income tax model, which is more tax-efficient when changing the composition of the business' equity ownership, as discussed at the beginning of part II.M Buying into a Business, as well at part II.M.4 Providing Equity to Key Employees and an Introduction to Code § 409A Nonqualified Deferred Compensation Rules, of these materials.

Finally, to protect the life insurance from various business exigencies inherent in the shareholders owning life insurance under the alternative, the shareholders should consider forming a limited liability company to hold the life insurance.

These issues could be avoided if the corporation had an S election in place from inception or to the extent it had distributed all of its E&P in the past. Owners of S corporations with E&P might consider cleansing the corporation's E&P while dividend rates are low. Code § 1368(e)(3) allows taxpayers to elect to reverse the normal distribution rules and have distributions come first from E&P and then from AAA to implement this strategy.[3524]

Finally, owners of limited liability companies or other entities taxed as partnerships would not need to even consider this issue.

II.Q.7.b.iv.(b). S Corporation Redemptions Using Life Insurance Proceeds

When an S corporation redeems stock under Code § 302(a) or 303(a):

- AAA is reduced by an amount equal to the AAA multiplied by the number of shares redeemed and divided by the number of shares of stock in the corporation immediately before the redemption.[3525]

- E&P is reduced by a ratable share of post-2/28/1913 E&P.[3526]

[3524] See part II.P.3.c, for issues relating to S corporations that have E&P.
[3525] Code § 1368(e)(1)(B); Reg. § 1.1368-2(d)(1)(i).
[3526] Code § 312(n)(7), superseding the limitations of Reg. § 1.312-5. Rev. Rul. 79-376, which had governed, was obsoleted by Rev. Rul. 95-71, presumably in response to this change; see T.M. 767 Redemptions IV.A.2.c. The Senate Report to P.L. 98-369 that enacted the current statutory language provides:

- These reductions in AAA and E&P are independent of each other.[3527]

If an S corporation is a former C corporation with significant E&P, then a disadvantage of a redemption relative to a cross-purchase is that AAA is reduced in a redemption, whereas in a cross-purchase AAA is not affected. (It could be an advantage if the goal is to cleanse the corporation of E&P to avoid worrying about the passive investment income rules, but those rules are easy to work around by investing in oil and gas partnerships; see part II.P.3.c.iii Excess Passive Investment Income.)

II.Q.7.b.v. Donation of Stock to Charity Followed by S Corporation Redemption

See part II.Q.6.d.ii UBTI Related to an S Corporation.

If the donee is not an eligible shareholder (for example, a government),[3528] consider donating to a donor advised fund and then having the proceeds go to the charity.

II.Q.7.c. S Corporations Owned by a Trust Benefitting Charity

S corporation stock is a challenging asset for a charity to hold.

Note that a charitable remainder trust can own a partnership but not an S corporation;[3529] however, an S corporation may donate property to a charitable remainder trust.[3530]

Also see parts II.G.3.d.ii Basis Limitations on Deducting Charitable Contributions Made by an S Corporation or a Partnership and II.Q.6 Contributing a Business Interest to Charity. For a discussion of S corporation contributions to charity, see C. Hoyt, "Charitable Gifts By Subchapter S Corporations and by Shareholders of S Corporation Stock," *ALI-ABA Estate Planning Course Materials Journal* (April 2006).[3531]

The S corporation's business activities are not attributable to the charity in determining the nature of the charity's activities, which means that a lot of S corporation business income does not destroy the charity's otherwise exempt status.[3532]

> In the case of a distribution by a corporation in redemption of its own stock, earnings and profits are to be reduced in proportion to the amount of the corporation's outstanding stock that is redeemed. However, the Senate does not intend that earnings and profits be reduced by more than the amount of the redemption.

[3527] Reg. § 1.1368-2(d)(1)(iii).

[3528] See part II.A.2.g Shareholders Eligible to Hold S Corporation Stock, especially fn. 131.

[3529] For what types of trusts can own stock in an S corporation, see part III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation. An electing small business trust (ESBT) is the only type of trust described there into which a charitable remainder trust (CRT) might fit, but Code § 1361(e)(1)(B)(iii) prohibits a CRT from qualifying as an ESBT.

[3530] See part II.Q.7.c.iv Using a Charitable Remainder Trust to Avoid Built-in Gain Tax.

[3531] http://files.ali-cle.org/thumbs/datastorage/lacidoirep/articles/EPCMJ_EPCMJ0604-HOYT_thumb.pdf.

[3532] Letter Ruling 201441018.

II.Q.7.c.i. Income Tax Trap - Reduction in Trust's Charitable Deduction

II.Q.7.c.i.(a). Contribution Must Be Made from Gross Income

Although trusts can deduct amounts of gross income[3533] paid to charity, the trust must actually receive the income and must be authorized to make the payment to charity.[3534] Gain recognized on the in-kind satisfaction of a pecuniary distribution to charity meets this test.[3535] Income included on an estate's K-1 from an S corporation does not support

[3533] The amount must be payable out of gross income and not out of corpus. Rev. Rul. 2003-123 pointed out the requirement to trace gross income:

> Under section 642(c), a trust is generally allowed an unlimited charitable deduction for amounts that are paid from gross income for charitable purposes pursuant to the terms of the governing instrument. Because section 642(c) specifically requires that a charitable deduction is available only if the source of the contribution is gross income, tracing of the contribution is required in determining its source. *Van Buren v. Commissioner*, 89 T.C. 1101, 1109 (1987); *Riggs National Bank v. United States*, 352 F.2d 812 (Ct. Cl. 1965); *Mott v. United States*, 462 F.2d 512 (Ct. Cl. 1972), *cert. denied*, 409 U.S. 1108 (1973); see also *Crestar Bank v. Internal Revenue Service*, 47 F. Supp.2d 670 (E.D. Va. 1999).

However, various conventions apply to this tracing rule. Satisfaction of a formula pecuniary bequest that is not allocated income does not qualify for this charitable deduction. Rev. Rul. 68-667. On the other hand, if the trust instrument is silent, a charitable deduction is allowed when applicable state law provides that, where the trust instrument is silent, payments are required to be made first from income of the trust and, if the income is not sufficient, then from its principal. Rev. Rul. 71-285. Thus, the IRS is not looking to trace dollars mechanically but rather looks to whether the income was first earned and then allocated to the contribution.

[3534] Rev. Rul. 2004-5 stated:

> For a trust to claim a charitable deduction under § 642(c) for amounts of gross income that it contributes for charitable purposes, the governing instrument of the trust must give the trustee the authority to make charitable contributions. This requirement is an essential element to qualify the trust to claim a deduction for a charitable contribution made directly by the trust. In the case of a trust's investment in a partnership, the partnership may make a charitable contribution from the partnership's gross income, and that income is never available to the trust. For federal tax purposes, however, the trust must take into account its distributive share of the partnership's income, gain, loss, deductions (including charitable contributions), and credits. Under these circumstances, a trust's deduction for its distributive share of a charitable contribution made by a partnership will not be disallowed under § 642(c) merely because the trust's governing instrument does not authorize the trustee to make charitable contributions.

FSA 200140080 reached the same conclusion, pointing out that the UBTI concerns described below must also be addressed. CCA 200928029 (which appears to have been a quick email) asserted:

> Rev. Rul. 2004-5 does permit trusts to claim charitable contributions made by a partnership of which the trust is a partner, even if the trust instrument does not provide for charitable contributions. However, the Rev. Rul. does not eliminate a second requirement that this charitable contribution be made out of the trust's gross income. Therefore, the contribution of the easement does cannot be claimed as a charitable contribution.

Gross income distributed to charity under an inter vivos power of appointment to distribute to charity satisfies the requirement that the charitable distribution be authorized under the trust agreement. Letter Ruling 200906008.

[3535] Rev. Rul. 83-75, holding that the distribution by a trust of corpus consisting of appreciated securities in satisfaction of its obligation to pay a fixed annuity to a qualified charitable a Code § 642(c) deduction unless the S corporation distributes that income to the estate; this issue can also arise with consent dividends[3536] and partnership income.[3537] The latter problem does not apply if an electing small business trust election is made;[3538] so, instead of electing to be taxed as an estate,[3539] a qualified revocable trust might want to make an ESBT election. This policy is so strong that an estate was not permitted a charitable set-aside deduction with respect to undistributed S corporation income even though the estate was the sole owner of the S corporation and the charity would ultimately receive all of the estate's residue, including the S corporation stock.[3540] An S corporation was able to satisfy this requirement by distributing accounts receivable, which would first be used to satisfy remaining estate liabilities and then either be distributed to or set aside for the estate's sole beneficiary, a private foundation.[3541] If there is a disconnect between cash flow and K-1 items, consider creating an LLC that holds plenty of cash and also holds the partnership or S corporation. That way, the K-1 from the partnership or S corporation can be accompanied by cash. In other words, if the K-1 is $100,000, the LLC distributes $100,000 to the trust. If the pass-through entity is an S corporation, the estate must be the LLC's sole owner so that the LLC can be disregarded for income tax purposes; an LLC taxed as a partnership would not be an eligible S corporation shareholder.[3542]

The extent to which gross income the trust received during the year must be traced to a distribution from the trust to charity is unclear; the IRS appears to believe that, the

---

organization is a sale or exchange of the securities that results in taxable gain to the trust, but the trust is entitled to a charitable deduction equal to the amount of gain recognized upon the distribution of appreciated securities (after making adjustment for any deduction of capital gain provided under the tax law at that time). Letter Ruling 9044047 provided a similar result.

[3536] A consent dividend is a deemed (not actually distributed) dividend from a corporation to avoid accumulated earnings tax; see fn. 3491, found in part II.Q.7.a.vi Redemptions and Accumulated Earnings Tax. *Estate of Esposito v. Commissioner*, 40 T.C. 459 (1963), denied a charitable set-aside deduction for consent dividends, even though the entire residue was set aside for charity.

[3537] In *Estate of Freund v. Commissioner*, 35 T.C. 629, *aff'd* 303 F.2d 30 (2nd Cor. 1962), the estate received a K-1 for all of the partnership's earnings, some of which decedent withdrew before death and some of which the estate withdrew after death. The charitable deduction was allowed only with respect to the amount the partnership to the estate distributed after death.

[3538] Under 2017 tax reform, Code § 642(c) does not apply to an ESBT; see fn 4529 in part III.A.3.e.ii.(b) ESBT Income Taxation - Overview and also note that fn 4528 allows an ESBT to deduct charitable contributions against its S corporation income only to the extent they are on the K-1 from the S corporation.

[3539] See part II.J.7 Election to Treat a Revocable Trust as an Estate.

[3540] *Sid W. Richardson Foundation v. U.S.*, 430 F.2d 710 (5th Cir. 1970), *reh. den.* 430 F.2d 710 [the decision and the denial of rehearing were published together], *cert. den.* 4/5/1971, *reh. den.*, 403 US 912 (1971). The tax years in question were 1960 and 1961 – before Code § 681 moved UBTI items from Code § 642(c) into Code § 170. Generally, Code § 512(e) treats as unrelated business income S corporation K-1 items and gain from the sale of S corporation stock, even if the S corporation never engaged in any business or debt-financed activities.

[3541] Letter Ruling 201246003.

[3542] See part II.A.2.f.v Relief for Late S Corporation and Entity Classification Elections for the Same Entity, especially fns. 134-138, the latter which makes me very confident that a disregarded entity treated as owned by one qualified individual can hold stock in an S corporation so long as the entity continues to be disregarded in that manner.

distribution to charity can be deducted to the extent that the distributed property itself constituted gross income in the current or in any prior year.[3543]

II.Q.7.c.i.(b). Business Income Limiting Trust Income Tax Deduction

Although normally trusts may deduct all of their gross income that they pay to charity,[3544] this deduction is eliminated to the extent that the trust has unrelated business taxable income (UBTI).[3545] However, in computing the UBTI causing this disallowance, a charitable contribution deduction is allowed, using the percentages that apply to contributions by an individual.[3546] Thus, a partial charitable contribution is allowed to be made out of unrelated business income.[3547] The contribution must be made during the taxable year; the one-year delay permitted by Code § 642(c)(1) does not apply to this

---

[3543] CCA 201042023 (trust's charitable contribution deduction should be limited to the adjusted basis of the properties purchased from accumulated gross income). Contradicting the CCA and holding in the taxpayer's favor is *Green v. United States*, 2015 BL 363697, W.D. Okla., No. 5:13-cv-01237, 11/4/15 (trust's charitable contribution deduction are *not* limited to the adjusted basis of the properties purchased from accumulated gross income). *U.S. v. Benedict*, 338 U.S. 692 (1950) (capital gains which expressly is not to be taken into account in computing taxable net income as also excluded from statutory gross income) denied a deduction under for a contribution of certain capital gains because those gains were excludable from gross income under another provision. The CCA cited that case and *W.K. Frank Trust of 1931 v. Commissioner*, 145 F.2d 411 (3d Cir. 1944), both of which the *Green* judge rejected as controlling.
See also fn. 3533 (tracing requirement applies but uses accounting conventions rather than actual tracing); Fox, ¶12.04 Requirement That Source of Contribution Be From Gross Income, *Charitable Giving: Taxation, Planning, and Strategies* (WG&L); WTAS LLC, ¶31.09 Source of Payment: Gross Income Only, *Tax Economics of Charitable Giving* (WG&L), citing *Old Colony Trust Co. v. Commissioner*, 301 U.S. 379 (1937) (charitable contributions by a trust need not be shown to have been paid out of income received in the year in which they were made if, by the terms of the trust, no limitation was prescribed on the source of payment), and its progeny.
Jonathan Blattmachr's 2015 Heckerling materials stated:

> It seems that if the partnership's gross income is used to acquire another asset, the contribution to charity of the asset, so acquired with the trust's gross income, should be treated as a contribution of gross income for purposes of Section 642(c).[23]
>
> [23] See, e.g*., Old Colony Trust Co. v. Commissioner*, 301 U.S. 379 (1937), dealing with the predecessor to current Section 642(c) and in which the Court deferred to the fiduciary's accounting treatment to answer the question whether a certain payment was made from gross income or principal. See, also, Chief Counsel Advice (CCA) 201042023 (the Service ruled that a property bought with accumulated income of a trust was deductible under Section 642(c) when distributed to charity because it was out of gross income. However, the charitable deduction was limited to the trust's adjusted basis in the property. (Not precedent.) Cf. *Crestar Bank v. Internal Revenue Service*, 47 F.Supp.2d 670 (E.D. Va. 1999); *Freund's Estate v. Commissioner*, 303 F.2d 30 (2nd Cir. 1962); *Sid W. Richardson Foundation v. U.S.,* 430 F.2d 710 (5th Cir. 1970); *Frank Trust of 1931 v. Commissioner*, 145 F.2d 411 (1944); *Estate of Joseph Esposito v. Commissioner*, 40 TC 459 (1963).

[3544] Code § 642(c).
[3545] Code §§ 642(c)(4) and 681. See part II.Q.6.d Unrelated Business Income.
[3546] Code § 512(b)(11); Reg. § 1.512(b)-1(g).
[3547] Reg. § 1.681(a)-2(b).

deduction.[3548] Furthermore, consider whether the trust also becomes subject to an individual's restrictions[3549] regarding substantiation[3550] and identity of donee.[3551]

Any K-1 income or gain from the sale of the S corporation stock constitutes unrelated business income if the shareholder is an IRA holding bank stock before October 22, 2004 or is a qualified retirement plan (other than an ESOP) or a Code § 501(c)(3) charity;[3552] as mentioned in fn. 3549 above, Code § 681(a) takes away the Code § 642(c) deduction from trusts (and instead applies the individual percentage limitations) to the extent that they have unrelated business income, determined as if the trust were a Code § 501(c)(3) charity. This is yet another disadvantage of S corporations compared to partnerships, the income from which is unrelated business income only to the extent it fits within the usual unrelated business income (UBI) categories; see part II.Q.6.d Unrelated Business Income. If a trust that owns S corporation stock that is includible in the income beneficiary's estate and has a charitable remainderman, the S corporation might liquidate immediately after the beneficiary's death, to minimize UBTI; one easy way might be to convert the S corporation to an LLC taxed as an S corporation during the planning stage,[3553] then

[3548] Reg. § 1.681(a)-2(a).

[3549] Reg. § 1.681(a)-2(a) provides:

> While the charitable contributions deduction under section 642(c) is entirely disallowed by section 681(a) for amounts allocable to unrelated business income, a partial deduction is nevertheless allowed for such amounts by the operation of section 512(b)(11), as illustrated in paragraphs (b) and (c) of this section.

Code § 512(b)(11) provides:

> In the case of any trust described in section 511(b), the deduction allowed by section 170 (relating to charitable etc. contributions and gifts) shall be allowed (whether or not directly connected with the carrying on of the trade or business), and for such purpose a distribution made by the trust to a beneficiary described in section 170 shall be considered as a gift or contribution. The deduction allowed by this paragraph shall be allowed with the limitations prescribed in section 170(b)(1)(A) and (B) determined with reference to the unrelated business taxable income computed without the benefit of this paragraph (in lieu of with reference to adjusted gross income).

Tying in the final piece of statutory authority, Code § 511(b) provides:

> (1) *Imposition of tax*. There is hereby imposed for each taxable year on the unrelated business taxable income of every trust described in paragraph (2) a tax computed as provided in section 1(e). In making such computation for purposes of this section, the term taxable income as used in section 1 shall be read as unrelated business taxable income as defined in section 512.
>
> (2) *Charitable, etc., trusts subject to tax*. The tax imposed by paragraph (1) shall apply in the case of any trust which is exempt, except as provided in this part or part II (relating to private foundations), from taxation under this subtitle by reason of section 501(a) and which, if it were not for such exemption, would be subject to subchapter J (sec. 641 and following, relating to estates, trusts, beneficiaries, and decedents).

[3550] See part II.J.4.c Charitable Distributions, fn. 1774.

[3551] See part II.J.4.c Charitable Distributions, fn. 1776.

[3552] Code § 512(e), some of which was added by P.L. 104-188, effective for taxable years beginning after December 31, 1997.

[3553] See part II.P.3.i Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization. Instead of doing a merger or former conversion, the S corporation might transfer all of its assets to the LLC and then liquidate, trying to use the statute of limitations for claims against liquidated companies to avoid claims by creditors from when the revoke the election to be taxed as a corporation as of the beneficiary's death. On the other hand, an ESBT might be in a better position to deduct charitable contributions flowing from an S corporation's K-1 than any other fiduciary entity holding an interest in a pass-through entity.[3554]

This partial deduction means that the trustee should not distribute all of the UBI to charity, because the trust will need to pay income tax on the UBI that cannot be fully offset by the charitable deduction.[3555] If the trust mandates that all of the income be paid to charity, the trustee may still allocate the taxes as an expenditure charged against income so that the trustee can pay the taxes.[3556]

Fortunately, these rules do not apply to estates.[3557] If a qualified revocable trust elects to be taxed as an estate, then it should escape this limitation.[3558] These rules also would not apply to QSSTs, because the beneficiary is treated as the owner of the S corporation stock for income tax purposes;[3559] of course, the beneficiary would have the overall charitable deduction contribution limitations, which limitations do not apply to trusts that do not have unrelated business income. An ESBT cannot deduct contributions it makes but can, subject to the rules of this part II.Q.7.c.i, deduct its distributive share of contributions the S corporation makes.[3560]

Once all of this analysis regarding unrelated business income is done at the trust level, presumably it will not be repeated at the charity's level, because the trust does not give the charity a K-1.[3561] When deciding whether to have a business run by a charity itself or by a trust that benefits charity, consider the following:

S corporation operated a business or otherwise subjected itself to tort liabilities; see part II.F.2 Asset Protection Benefits of Dissolving the Business Entity After Asset Sale.

[3554] See part II.Q.7.c.i.(a) Contribution Must Be Made from Gross Income, especially fn 3538 and the text preceding it.

[3555] For example, in Reg. § 1.681(a)-2(c), Ex. 3, the trust paid the charity all $31K of its UBI, but it still had $24K of taxable income (based on a 20% charitable deduction limitation). It reserved no cash to pay that tax, a fact not pointed out by the Example.

[3556] Section 506(a)(2) of the Uniform Principal and Income Act.

[3557] Code § 681 and the regulations thereunder apply to trusts; they does not mention estates. Letter Ruling 201246003 authorized a full Code § 642(c) deduction for income from an S corporation set aside for the estate's sole beneficiary, which was a private foundation.

[3558] See part II.J.7 Election to Treat a Revocable Trust as an Estate.

[3559] See fn. 4478.

[3560] See part III.A.3.e.ii.(b) ESBT Income Taxation - Overview, especially fns. 4528.

[3561] Consistent with Code § 663(a)(2), Reg. § 1.663(a)-2 provides:

> Any amount paid, permanently set aside, or to be used for the charitable, etc., purposes specified in section 642(c) and which is allowable as a deduction under that section is not allowed as a deduction to an estate or trust under section 661 or treated as an amount distributed for purposes of determining the amounts includible in gross income of beneficiaries under section 662. Amounts paid, permanently set aside, or to be used for charitable, etc., purposes are deductible by estates or trusts only as provided in section 642(c). For purposes of this section, the deduction provided in section 642(c) is computed without regard to the provisions of section 508(d), section 681, or section 4948(c)(4) (concerning unrelated business income private foundations).

Notice 2004-35 provides:

- If the activity definitely would generate UBTI, run it through the trust. Instead of all of the UBTI being taxed, the trust will be taxed on only the excess UBTI over the charitable deduction.

- If there is substantial authority for the activity not generating UBTI, for example because it is related to the charity's exempt purpose, then perhaps the charity should undertake the activity and report it as not being subject to UBTI.

II.Q.7.c.ii. Private Foundations, Etc.

A private foundation may hold only limited amounts of an S corporation[3562] (or similar amounts for other entities, including C corporations and partnerships),[3563] and any excess amounts may be held for only five or so years.[3564] However, if the business entity does not operate a business and instead merely generates investment income, it will not be subject to this rule.[3565]

II.Q.7.c.iii. Cleansing Earnings and Profits from a Prior C Corporation

As discussed above, dividend treatment applies to the extent that a distribution exceeds AAA and is made out of C corporation earnings and profits. This treatment would not apply on liquidation of the corporation.[3566] What happens when a trust that owns an interest in an S corporation has a charity as its beneficiary?

The charitable income tax deduction should offset dividend income received by the trusts from the corporation.[3567] Making an ESBT election should not affect the charitable

---

> The Treasury Department and the Internal Revenue Service intend to propose regulations modifying Treas. Reg. § 53.4940-1(d)(2) to provide that a private foundation's net investment income for purposes of section 4940 does not include distributions from trusts and estates. Until further guidance is promulgated, income distributions from trusts and estates will not retain their character in the hands of a distributee private foundation for purposes of determining the foundation's net investment income under section 4940(c).

[3562] See Potter, "Using S Corporation Stock to Fund an Individual Shareholder's Private Foundation," *Estates, Gifts & Trusts Journal* (BNA) 5/11/2017, saved as Thompson Coburn LLP document number 6561372.

[3563] Reg. § 53.4943-3(c) applies these rules to partnerships, sole proprietorships, trusts, etc. See Wilson, Better Late than Never: Incorporating LLCs into Section 4943 (3/31/2015), available at http://papers.ssrn.com/sol3/papers.cfm?abstract_id=2587781 or Thompson Coburn LLP document number 6174131; I am not expressing an opinion on the article's recommendations.

[3564] Code § 4943. The founder might be able to give all of his or her C corporation voting stock to one or more trusts and all of his or her nonvoting stock to charitable remainder trusts. See Letter Ruling 201303021.

[3565] Letter Ruling 201447043, citing Code § 4943(d)(3).

[3566] See Letter Ruling 200402003 regarding an S corporation that merges into a nonprofit corporation.

[3567] Code § 642(c). Code § 512(e)(1) characterizes S corporation items as unrelated business income; however, those items are just items on the K-1 issued by the S corporation, together with any gain or loss on the disposition of the stock in the S corporation. Congress appeared to recognize that distributions of C corporation earnings and profits would escape this tax when it provided for basis reductions with respect to some of that dividend income, as described in the text accompanying fn. 3569; this basis reduction provision was enacted at the same time as the income tax deduction, because the dividend is not considered part of the S portion.[3568] If the trust's basis in the S corporation stock was determined by reason of purchase, the dividend income reduces the basis of the S stock in determining the gain or loss on the sale that constitutes unrelated business taxable income.[3569]

If distributions exceed AAA and earnings & profits, that excess would be treated as a return of capital,[3570] reducing basis.[3571] Any amount that exceeds basis would be treated as a gain from the sale of stock,[3572] which would be treated as part of the S portion and, if an ESBT election is in effect, would not be offset by the charitable income tax deduction.

If an amount is intended to be accumulated in the trust, then using AAA is the easiest way.

If an amount is intended to be distributed to charity and it's possible that future distributions will need to be accumulated, then a Code § 1368(e)(3) election should be made to treat the distribution as a dividend from earnings and profits so that AAA is used only for future accumulated distributions.

II.Q.7.c.iv. Using a Charitable Remainder Trust to Avoid Built-in Gain Tax

If an S corporation contributes built-in gain property to a term-of-years (typically 20 years) charitable remainder trust ("CRT") for the benefit of the corporation[3573] and that property is sold for a capital gain, then the sale will not trigger immediate tax. Instead, the CRT's distributions will come first from ordinary income and not from any built-in gain, and during the recognition period distributions will be subject to built-in gain tax only to the extent that capital gain constituting built-in gain is distributed to the S corporation.[3574] The contributed assets must not constitute substantially all of the corporation's assets, since a corporation recognizes gain if it conveys substantially all of

---

tax K-1 items and gain on the sale of stock. See Conference Report 104-737, reproduced in *RIA Checkpoint* at COMREP ¶13,611.001 S corporations permitted to have 75 shareholders. (Small Business Job Protection Act of 1996, PL 104-188, 8/20/96), P.L. 104-188, Sec. 1316(c), and P.L. 105-34, Sec. 1523(a).

[3568] Reg. §§ 1.641(c)-1(g)(2), 1.641(c)-1(l), Example (1)(iii).

[3569] Code § 512(e)(2). This rule would not apply if the trust acquired its stock by reason of death, since that provision (by way of Code § 1361(e)(1)(C)) refers to Code § 1012, not Code § 1014.

[3570] Code § 1368(c)(3).

[3571] Code § 1368(b)(1).

[3572] Code § 1368(b)(2).

[3573] The term interest must benefit the corporation; if it benefits the shareholders, then the gratuitous transfer will be treated as a constructive distribution to such partners or shareholders for tax purposes and the partners or the shareholders will be treated as the grantors of the trust. Letter Ruling 200203034, citing Reg. § 1.671-2(e)(4), and also holding that the trust would not qualify as a charitable remainder trust.

[3574] Letter Ruling 200644013 focused on whether a contribution of property that had built-in gain accumulated from prior C corporation years would trigger Code § 1374 built-in gain tax. In that ruling, the corporation contributed real estate to a 20-year CRT. Later, but before the end of the Code § 1374 recognition period, the CRT would sell the property and use the sale proceeds to invest in stocks, bonds, and other securities that pay interest and dividends. The IRS declined to rule on whether the corporation would have recognized built-in gain under Code § 1374 on unitrust amounts received by it after the recognition period.

its assets to a tax-exempt entity.[3575] See also part II.D.2 Business Entity as Grantor of Trust.

Also, if and to the extent that sale (or holding) of the asset constitutes unrelated business taxable income (UBTI), this strategy will not work. Any UBTI a CRT earns is subject to a 100% excise tax, in addition to being taxable when distributed to the beneficiary, resulting in an ultimate tax well in excess of 100%.[3576] For example, a so-called "negative basis asset"[3577] generally has significant debt-financed income, and debt-financed income/gain and ordinary business income are UBTI.[3578]

II.Q.7.d. Special Rules for Certain Sales of Stock in an S Corporation

The sale of stock in an S corporation can be treated as a sale of the corporation's assets, followed by the corporation's liquidation. See part II.Q.8.e.iii.(f) Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold.

II.Q.7.e. Bequest to a Corporation

A bequest to a corporation is treated as a bequest to the remaining shareholders, followed by a contribution of capital to the corporation.[3579] Thus, the remaining shareholders receive an increased basis in their stock in the corporation.

If the bequest is of stock in the corporation, a bequest to the remaining shareholders directly would be cleaner from an income tax perspective, in that the remaining shareholders may specifically identify lots of stock when they sell or otherwise transfer their stock. However, a bequest to the corporation might be simpler, in that ownership might vary over time, and a "transfer on death" designation to the corporation will accomplish the objective in a simple manner.

Naming a corporation as the beneficiary of a life insurance policy might generate some challenging disclosures on the estate tax return.[3580]

[3575] Reg. § 1.337(d)-4(a)(1).

[3576] See part II.Q.6.c Possible Adverse Consequences When Contributing Partnership Interest to Charitable Remainder Trust, especially fns. 3321-3322.

[3577] See fn. 4973.

[3578] Code §§ 512, 513, and 514. Consider whether Code § 514(c)(2)(B) might address that concern.

[3579] Rev. Rul. 74-329.

[3580] Reg. § 20.2031-2(f) provides:

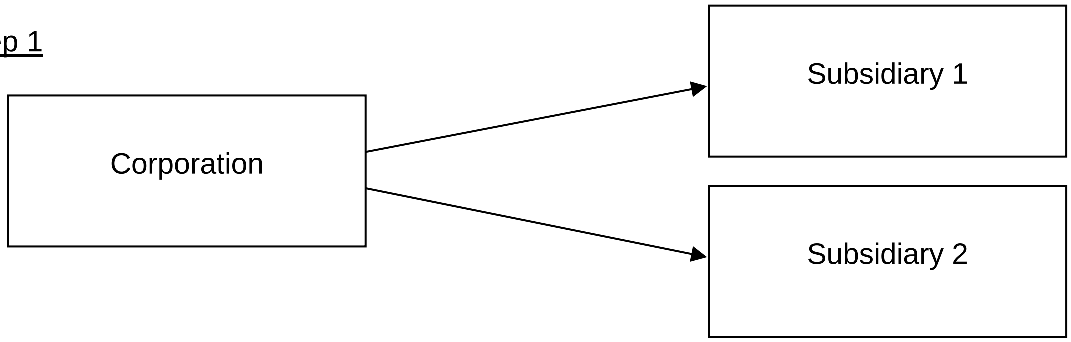
> In addition to the relevant factors described above, consideration shall also be given to nonoperating assets, including proceeds of life insurance policies payable to or for the benefit of the company, to the extent such nonoperating assets have not been taken into account in the determination of net worth, prospective earning power and dividend-earning capacity.

If the decedent gratuitously named the corporation as the beneficiary of a life insurance policy, arguably the death benefits' inclusion under Code § 2042 should be the only inclusion under the principle that it is really a bequest to the other shareholder and not to the corporation. Consideration of the death benefit should not equate to required inclusion in value in a situation such as that. However, the result is not nearly as clean as when the corporation itself owns the

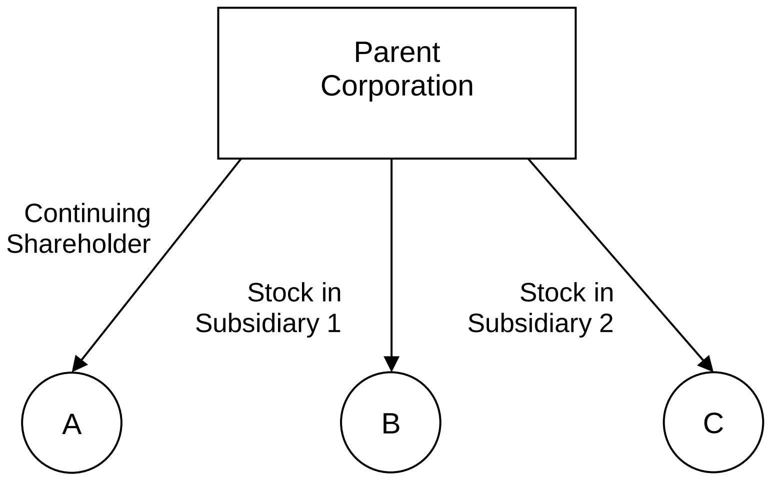
II.Q.7.f. Corporate Division Into More Than One Corporation

II.Q.7.f.i. Overview

<u>Step 1</u>



<u>Step 2</u>



If a corporation owns another corporation, the parent corporation has no earnings and profits, and the subsidiary's value equals the parent's basis in its stock, then distributing the subsidiary might not have much tax effect. However, that is often not the case, and one wants to look for a way to do a tax-free corporate division, as described below.

---

policy, which Reg. § 20.2042-1(c)(6) provides generally does not result in incidents of ownership even if the decedent controls the corporation. So a business owner who wants the business entity to hold insurance on the owner's life should consider instead having the entity own the policy. Consider Code § 2035 if transferring an existing policy. A tax-efficient way to move the policy might involve part II.Q.4.i Life Insurance LLC. When an entity owns a life insurance policy, consider part II.Q.4.g Income Tax Trap for Business-Owned Life Insurance.

 6656226

In a spin-off, split up, etc., a corporation transfers one or more active businesses into one of more subsidiaries:

- "Active business" includes active real estate rental.
- It also includes an interest in an LLC that conducts an active business – 20% if the corporation performs management functions and 33-1/3% if not.

The active business needs to be at least 5 years old.

The transaction needs a business purpose that could not be accomplished in another nontaxable transaction.

- Estate planning is not a valid reason to split up a business.
- Differences in management objectives generally constitute a valid reason.
- Personal dislike is not enough; resolving disputes over business strategy generally is.

Letter Ruling 200842003 was a creative estate planning technique:[3581]

- Parent split corporation into 5 different entities.
- Parent sold an interest in each entity to a different irrevocable grantor trust for a different child.
- Although Code § 355 required the parent to continue to hold on to the new corporations, the parent was deemed not to have sold the corporations because the sale to the irrevocable grantor trust was disregarded for income tax purposes.

Also, a transaction in which (1) a parent corporation transfers all of the interests in its limited liability company that is taxable as a corporation to the first subsidiary in exchange for additional stock, (2) the first subsidiary transfers all of the interests in the limited liability company to the second subsidiary in exchange for additional stock, (3) the second subsidiary transfers all of the interests in the limited liability company to the third subsidiary in exchange for additional stock, and (4) the limited liability company elects to be disregarded as an entity separate from its owner for federal income tax purposes effective after it is owned by the third subsidiary, is properly treated for federal income tax purposes as two transfers of stock in Code § 351 exchanges followed by a Code § 368(a)(1)(D) reorganization.[3582]

If the corporation has a complex corporate structure implicating Code § 2701, one can prevent gift tax problems by making sure that the shareholders' rights in each corporation are identical to those they held in the parent corporation.[3583]

[3581] See part II.Q.7.f.iii.(g) Combining Split Up With Sale to Irrevocable Grantor Trust.
[3582] Rev. Rul. 2015-10.
[3583] See Letter Ruling 9843010, discussed in fn. 5540.

II.Q.7.f.ii. Code § 355 Requirements

Code § 355 provides seven requirements that must be met for a tax-free corporate division. The main corporation to be divided may be referred to as the distributing corporation. A corporation, stock in which is being distributed, may be referred to as the controlled corporation.

If a corporation cannot satisfy these rules, consider part II.Q.7.h.ix Value Freeze as Alternative to Code § 355 Division.

The IRS will not issue private letter rulings merely to provide comfort. Instead, it will rule on only an issue of law the resolution of which is not essentially free from doubt and that is germane to determining the tax consequences of the transaction.[3584]

Furthermore, the IRS ordinarily will not issue letter rulings:[3585]

- If property owned by any distributing corporation or any controlled corporation becomes the property of a regulated investment company (RIC), within the meaning of Code § 851, or a real estate investment trust (REIT), within the meaning of Code § 856, in a certain type of transaction.[3586]

- If, immediately after any such distribution, the fair market value of the gross assets of the trade(s) or business(es) on which the distributing corporation or the controlled corporation relies to satisfy the active trade or business requirement of Code § 355(b) is less than 5% of the total fair market value of the gross assets of such corporation.[3587]

II.Q.7.f.ii.(a). Distribution to a Shareholder with Respect to the Shareholder's Stock

The first requirement Code § 355 sets out for a tax-free corporate division is that a distribution is made to a shareholder with respect to the shareholder's stock***.***[3588]

The distribution can be made in the following ways:

[3584] Rev. Proc. 2013-32.

[3585] Rev. Proc. 2015-43. Notice 2015-59 announced these changes because, depending on the situation:

> The Treasury Department and the Service believe that these transactions may present evidence of device for the distribution of earnings and profits, may lack an adequate business purpose or a Qualifying Business, or may violate other § 355 requirements. In addition, these transactions may circumvent the purposes of Code provisions intended to repeal the Supreme Court's decision in *General Utilities & Operating Co. v. Helvering*, 296 U.S. 200 (1935) (General Utilities repeal). See, *e.g.*, §§ 311(b), 337(d), 367(a)(5), and 367(e); H.R. Rep. No. 100-391, at 1080-1084 (1987).

Section 3 of Notice 2015-59 was obsoleted by REG-134016-15 (7/15/2016).

[3586] Adding paragraph (57) to section 4.01 of Rev. Proc. 2015-3.

[3587] Adding paragraph (58) to section 4.01 of Rev. Proc. 2015-3.

[3588] Code § 355(a)(1)(A)(i). A distribution with respect to other securities is beyond the scope of these materials.

- First, the distribution could be a disproportionate distribution, where some of the shareholders receive a distribution and some do not. This type of division, a "split-off," is most often used when all of a company's stock is owned by the second generation of a family. One group of shareholders will receive a distribution of stock in the controlled corporation in exchange for their stock in the distributing corporation. The distribution could also be a pro-rata distribution.[3589] However, in family business succession planning, the pro-rata distribution scheme can be hard to use, since tax-free treatment might not be allowed if the distribution's stated purpose was to end shareholder dispute.

- Another option for distributions under Code § 355 would be a partially disproportionate distribution that involves a shareholder or group of shareholders leaving the distributing corporation completely, as in the disproportionate distribution, but one shareholder keeps his stock in the distribution corporation and receives some stock in the controlled corporation. This is another "split-off" scenario and is usually used when the corporate separation occurs before the death of the business founder or family patriarch and that person holds the ownership interest in both corporations.

II.Q.7.f.ii.(b). Distribute Stock of a "Controlled Corporation" Which Distributing Corporation Controls Immediately Before the Distribution

The second requirement for a tax-free division under Code § 355 is that the distributing corporation must distribute stock of a "controlled corporation" which it controls immediately before the distribution.[3590]

Additionally, the distributing corporation must distribute all of the stock of the controlled corporation that it owns or at least must distribute enough of the stock to meet the Code § 368 control requirements.[3591] Under Code § 368, a corporation controls another if it owns at least 80% of the total combined voting power of the controlled corporation and at least 80% of the total number of shares of all other classes of stock of the controlled corporation. If the distributing corporation retains any of the controlled corporation's stock, it must establish that the retention was not in pursuance of a plan to avoid taxes.[3592]

Determining whether an acquisition of control has substance for federal tax purposes can be difficult and fact-intensive.[3593] The government became concerned that, in some

[3589] Code § 355(a)(2)(A).
[3590] Code § 355(a)(1)(A).
[3591] Code § 355(a)(1)(D); Reg. § 1.355-2(e)(1).
[3592] Reg. § 1.355-2(e)(2).
[3593] Rev. Proc. 2016-40, Section 2.10. In describing the background for this concern, various parts of Section 2 pointed to Rev. Rul. 56-117, Rev. Ruls. 63-260, 69-407, and 98-27 (limiting the application of *Commissioner v. Court Holding Co.*, 324 U.S. 331 (1945), the limitation being based, in part, on § 1012(c) of the Taxpayer Relief Act of 1997, Pub. L. No. 105-34, 111 Stat. 788, 916-17, which added Code § 355(e)). Rev. Proc. 2016-40, Section 2.09 explained:

> Although the § 355(e) legislative history states, and Rev. Rul. 98-27 provides, that post-distribution events are not to be taken into account in determining whether a distributing corporation has control of the distributed corporation, this interpretation of § 355 applies

cases, taxpayers may not be able to determine whether such an acquisition has substance with sufficient certainty to proceed with transactions that otherwise satisfy the requirements of Code § 355.[3594] Rev. Proc. 2016-40 provides a safe harbor[3595] for the following transactions that meet certain requirements:[3596]

(1) D owns C stock not constituting control of C;

(2) C issues shares of one or more classes of stock to D and/or to other shareholders of C (the issuance), as a result of which D owns C stock possessing at least 80 percent of the total combined voting power of all classes of C stock entitled to vote and at least 80 percent of the total number of shares of all other classes of stock of C;

(3) D distributes its C stock in a transaction that otherwise qualifies under § 355 (the distribution); and

(4) C subsequently engages in a transaction that, actually or in effect, substantially restores

(a) C's shareholders to the relative interests, direct or indirect, they would have held in C (or a successor to C) had the issuance not occurred; and/or

(b) the relative voting rights and value of the C classes of stock that were present prior to the issuance (an unwind).

The IRS will not assert that such a transaction lacks substance, and that therefore D lacked control of C immediately before the distribution, within the meaning of Code § 355(a)(1)(A), if the transaction is also described in one of the following safe harbors:[3597]

.01 No Action Taken Within 24 Months. No action is taken (including the adoption of any plan or policy), at any time prior to 24 months after the distribution, by C's board of directors, C's management, or any of C's controlling shareholders (as defined in § 1.355-7(h)(3)) that would (if implemented) actually or effectively result in an unwind.

---

only after it has been determined that, at the time of the distribution, the distributing corporation otherwise had control of the distributed corporation in substance. Thus, the § 355(e) legislative history and Rev. Rul. 98-27 do not prevent the step transaction doctrine from applying to determine if, taking into account all facts and circumstances (including post-distribution events), a pre-distribution acquisition of control has substance such that a distributing corporation has control of a corporation within the meaning of § 355(a)(1)(A) immediately prior to a distribution of the stock of that corporation.

[3594] Rev. Proc. 2016-40, Section 2.10.

[3595] Rev. Proc. 2016-40, Section 5 describes scope and effect of being within or not being within the safe harbors.

[3596] Rev. Proc. 2016-40, Section 3.

[3597] Rev. Proc. 2016-40, Section 4.

.02 Unanticipated Third Party Transaction. C engages in a transaction with one or more persons (for example, a merger of C with another corporation) that results in an unwind, regardless of whether the transaction takes place more or less than 24 months after the distribution, provided that--

(1) There is no agreement, understanding, arrangement, or substantial negotiations (within the meaning of § 1.355-7(h)(1)) or discussions (within the meaning of § 1.355-7(h)(6)) concerning the transaction or a similar transaction (applying the principles of § 1.355-7(h)(12) and (13), relating to similar acquisitions), at any time during the 24-month period ending on the date of the distribution; and

(2) No more than 20 percent of the interest in the other party, in vote or value, is owned by the same persons that own more than 20 percent of the stock of C. For purposes of this section, ownership is determined by application of the constructive ownership rules of § 318(a) as modified by § 304(c)(3), except that for purposes of applying § 318(a)(3)(A) and (B), the principles of § 304(c)(3)(B)(ii) (without regard to § 304(c)(3)(B)(ii)(I)) apply.

II.Q.7.f.ii.(c). Cannot Be Used Principally As a Device to Distribute the Earnings and Profits of either the Distributing or Controlled Corporations or Both

The third requirement is that the corporate division cannot be used principally as a device to distribute the earnings and profits of either the distributing or controlled corporations or both.[3598]

This rule prevents a corporation from helping its shareholders avoid dividend treatment by abusing Code § 355 and enabling shareholders to avoid immediate tax consequences, and to get capital gains treatment when one of the divided corporations is eventually sold. Although changes in the tax law since 2003 diminished the incentive to transform dividends into capital gains by lowering the tax rate on dividend income, sale treatment remains more beneficial than dividend treatment, because sale treatment allows the seller to use the seller's basis to offset gain and to defer tax using the installment method.[3599]

The determination that a division is being used as a device to avoid taxes is a facts and circumstances based test, but a number of "device factors" are strong evidence of tax avoidance. For example, when a distribution is pro-rata and no stock is surrendered back to the corporation, the IRS will take a close look at the transaction and make sure the distribution is not in fact a dividend.[3600] Another factor that may indicate abuse is when stockholders "cash-out" shortly after the division.[3601] The purpose of the Code § 355 tax-free provisions is to allow a corporation to continue its business is the

[3598] Code § 355(a)(1)(B).
[3599] See part II.Q.7.a.iii Redemption Taxed Either As Sale of Stock or Distribution; Which Is Better When.
[3600] Reg. § 1.355-2(d)(2)(ii).
[3601] Reg. § 1.355-2(d)(2)(iii).

form of two corporations instead of one, not to allow stockholders a quick tax-free way out of the company. The IRS will take into consideration significant changes in economic conditions that may have caused a stockholder to cash-out shortly after a distribution,[3602] but it is a situation the IRS will examine closely. The IRS will also examine the "nature, kind, amount, and use of the assets" of both the distributing and controlled corporations immediately after the transaction.[3603] This examination prevents a company from attempting to distribute assets unrelated to the corporation's business under a guise of splitting the corporation's active business. Another questionable situation arises when the controlled corporation and the distributing corporation have an exclusionary post-division relationship where one corporation is the secondary corporation that essentially serves the other.[3604] When such a relationship exists and the secondary corporation could be sold without adversely affecting the other corporation's business, the IRS considers this to be evidence of a tax-avoidance device.[3605] Proposed regulations would modify the nature and use of assets device factor.[3606]

In addition to listing numerous "device factors" in the Regulations, the IRS also provides a number of "nondevice factors" that are evidence of no tax avoidance purpose. Again, this determination is based on facts and circumstances, but the presence of one of these factors can help a corporation defend its division. These "nondevice factors" include having a strong business purpose of the transaction, having a distributing corporation that is publicly traded and widely held, and having a distribution to shareholders that are domestic corporations eligible for the dividends-received deduction.[3607] Proposed regulations would modify the corporate business purpose nondevice factor.[3608]

Proposed regulations would add a per se device test to the device determination.[3609]

The IRS has removed this test from its list of areas on which it will not issue a private letter ruling.[3610]

[3602] PLR 9030037 (approving later trades when publicly traded stock was to be sold, but not by insiders), PLR 8932038 (approving post-division gift of 10% of corporation), PLR 9041078 (approving later trades when publicly traded stock was to be sold, but not by insiders).

[3608] REG-134016-15 (7/15/2016).
[3609] REG-134016-15 (7/15/2016), providing:

> Under proposed § 1.355-2(d)(5), if designated percentages of Distributing's and/or Controlled's Total Assets are Nonbusiness Assets, the transaction would be considered a device, notwithstanding the presence of any other nondevice factors, for example, a corporate business purpose or stock being publicly traded and widely held. By their nature, these transactions present such clear evidence of device that the Treasury Department and the IRS have determined that the nondevice factors can never overcome the device potential. The only exceptions to this per se device rule would apply if the distribution is also described in § 1.355-2(d)(3)(iv) (distributions in which the corporate distributee would be entitled to a dividends received deduction under section 243(a) or 245(b)) or in redesignated § 1.355-2(d)(6) (§ 1.355-2(d)(5) of the current regulations, relating to transactions ordinarily not considered as a device).

[3610] Rev. Proc. 2016-45.

II.Q.7.f.ii.(d). Active Business

The fourth requirement of Code § 355 is the "active business" test. For what is an "active business," see part II.Q.7.f.iii Active Business Requirement for Code § 355.

Both the distributing corporation and the controlled corporation must be engaged in an active trade or business for five years before the distribution. Thus, it may not always be easy for a business owner to separate the business into two distinct corporations, and sometimes it may be more costly for the business owner to do so than it would be for him to maintain the business as a whole and use less tax-advantageous business separation techniques when such separation becomes necessary. For example, two divisions could be separated into two wholly owned limited liability companies.

Code § 355(b)(1) requires that either (A) immediately after the division the distributing and controlled corporations are engaged in the active conduct of a trade or business, or (B) immediately before the distribution, the distributing corporation has no assets other than stock or securities of the controlled corporation and the controlled corporation is engaged in an active business immediately after the distribution. Four specific requirements must be met in order for a corporation to be treated as engaged in an active business. First, the corporation must be engaged in the active conduct of a trade or business, or, immediately after the distribution, substantially all of its assets are stock and securities of a corporation controlled by it which is engaged is such a trade or business.[3611] "Active trade or business" for purposes of Code § 355 is defined as a specific group of activities of the corporation being carried on for purposes of earning income or profit and the activities included in such group include all operations that form any part of, or step in, the process of earning income or profit.[3612] Next, such trade or business is required to have been actively conducted throughout the five-year period ending on the date of the distribution.[3613] The trade or business also must not have been acquired within that five-year period in a transaction in which gain or loss was recognized either in whole or in part.[3614] Finally, the control of a corporation conducting an active trade or business must not have been acquired in a taxable transaction in the same five year period.[3615] Additional details are further below.

[3611] Code § 355(b)(2)(A).

[3612] Reg. § 1.355-3(b)(2)(ii). Specifically excluded from the definition of an active trade or business are activities such as holding of stock, securities, land or other property for investment purposes. Reg. § 1.355-3(b)(2)(iv). Additionally, owning or operating real or personal property used in a trade or business is not considered an active trade or business unless the owner also performs significant services with respect to the operation and management of the property. Reg. § 1.355-3(b)(2)(iv). Rev. Rul. 2007-42 approved a real estate rental activity that included certain services. The corporate parent of the LLC that engaged in those activities was deemed engaged in an active trade or business when the corporation owned 1/3 (but not 20%) of the LLC. Note also that proposed regulations have been issued that the author has not undertaken to study; see Cummings, The New Section 355(b) Active Trade or Business Proposed Regulations, *Journal of Taxation*, August 2007, page 74.

[3615] Code § 355(b)(2)(D). Letter Ruling 201551005 approved the target shareholders' receipt of cash boot and consequential recognition of gain when all of the target corporation's assets had a carryover basis. Letter Ruling 201551009 approved the recognition of income under

II.Q.7.f.ii.(e). Transaction Must Have At Least One Corporate Business Purpose

The fifth requirement is that the transaction must have at least one corporate business purpose.[3616]

This requirement ensures that nonrecognition treatment is given only to distributions that are part of readjustments of corporate structures caused by business exigencies and to readjustments of continuing interests in property under modified corporate form.[3617] The purpose must be a "real and substantial non Federal tax purpose."[3618] The distribution to shareholders does not satisfy a corporate business purpose if the corporate business purpose can be achieved through a nontaxable transaction that does not involve the distribution of stock of a controlled corporation and is neither impractical nor unduly expensive.[3619]

The Regulations also note that a "shareholder purpose… is not a corporate business purpose."[3620] However, sometimes a shareholder's purpose is so coextensive with the corporate business purpose that no real distinction exists between the two, and in such cases, the transaction will be considered to have a corporate business purpose.[3621] Clearly, not all shareholder disputes will rise to the level of a corporate business purpose. For example, a dispute between shareholders who are not part of management would have little effect on the business itself, thus, such a dispute would not be co-extensive with a business purpose. The Regulations provide an example of a shareholder dispute that would be coextensive with a corporate business purpose.[3622] The example involves a corporation, owned by two shareholders, engaged in two businesses – manufacturing and selling furniture and selling jewelry. Shareholder A wants to continue the furniture business, and Shareholder B wants to continue the jewelry business. If A and B decide to split up the business and cut ties with one another, the transaction will be considered to have a corporate business purpose – the business will likely benefit from having the interested shareholder running the business – even though the separation was also driven by a shareholder purpose.

Code §§ 481 (change of accounting method) and 751 (relating to differing interests in hot assets – see part II.Q.8.b.i.(f) Code § 751 – Hot Assets).

[3616] Reg. § 1.355-2(b).

[3617] Reg. § 1.355-2(b).

[3618] Reg. § 1.355-2(b).

[3619] Reg. § 1.355-2(b)(3). Reg. § 1.355-2(b)(5), Example (3) provides:

> Corporation X is engaged in the manufacture and sale of toys and the manufacture and sale of candy. The shareholders of X wish to protect the candy business from the risks and vicissitudes of the toy business. Accordingly, X transfers the toy business to new corporation Y and distributes the stock of Y to X's shareholders. Under applicable law, the purpose of protecting the candy business from the risks and vicissitudes of the toy business is achieved as soon as X transfers the toy business to Y. Therefore, the distribution is not carried out for a corporate business purpose. See paragraph (b)(3) of this section.

[3620] Reg. § 1.355-2(b)(2).

[3621] Reg. § 1.355-2(b).

[3622] Reg. § 1.355-2(b)(5), Example (2).

Real world businesses may not have such neatly separable businesses within one corporation, as in the example from the Regulations. But even in "single function" businesses, a shareholder purpose (shareholder dispute) can still rise to the level of a corporate business purpose. The IRS has approved a Code § 355 tax-free corporate division where the division was driven by friction that had developed between shareholders "regarding fundamental management policy and the expansion of the business" and the shareholders had been "unable to agree to a current fair market value of the stock."[3623]

Thus, for a shareholder dispute to rise to the level of a corporate business purpose, the dispute must be one that will negatively affect the corporation's business if it is not carried out. Disputes between purely passive shareholders will not reach that threshold. But disputes between active shareholders on whether to grow the company or other differences in business philosophies would likely reach the necessary corporate business purpose threshold. Essentially, as long as the dispute is between active shareholders, as is usually the case in the standard family business model, it should be relatively easy to establish that the dispute would affect the corporation's operations, thus establishing that the shareholder purpose is co-extensive with a corporate business purpose.

The IRS has removed this test from its list of areas on which it will not issue a private letter ruling.[3624]

II.Q.7.f.ii.(f). Continuity of Interest

The sixth requirement is "continuity of interest."[3625]

The division really must be a division and not essentially a sale. One or more direct or indirect owners of the distributing corporation before the distribution must own, in the

---

[3623] Letter Ruling 8943038. See also Letter Ruling 201411012, which, consistent with IRS ruling policy, declined to rule on business purpose:

> Sibling 1 is President of Distributing, operating and managing the businesses with active input from Sibling 2 and both siblings' adult children. In recent years, however, the Shareholders have disagreed significantly about the direction in which to take each of the businesses. Therefore, they propose the following transaction:
>
> (i) Distributing will form Controlled and transfer to it approximately c percent of Distributing's active trade or business assets, including some of the separable tracts of land, in exchange for all of Controlled's outstanding stock (the Contribution).
>
> (ii) Distributing will distribute to Sibling 2 all of the Controlled shares in exchange for all of Sibling 2's stock in Distributing (the Split-Off).
>
> After the Split-Off, Sibling 1 will hold all of the outstanding stock of Distributing, which will remain actively engaged in its historic businesses using the remaining d percent of its historic business assets. Sibling 2 will hold all of the outstanding stock of Controlled, which will be actively engaged in Business E using the c percent of Distributing's historic business assets received in the Contribution.

Presumably the taxpayers request the ruling to approve Code § 355's other requirements (although the IRS also declined to rule on the device test or whether the split-off was part of a plan proscribed by Reg. § 1.355-7).

[3624] Rev. Proc. 2016-45.

[3625] Reg. § 1.355-2(c).

aggregate, an amount of stock establishing a continuity of interest in each of the modified corporate forms in which the enterprise is conducted after the separation. Continuing ownership of 50% or more should be enough to establish a continuity of interest.[3626] In most family business divisions, meeting this test will not be a problem, since both the distributing and controlled corporations will be owned by original shareholders.

II.Q.7.f.ii.(g). The Active Trade or Business That Existed Five Years Before the Separation Must Exist After The Separation

The final requirement is that the active trade or business that existed five years before the separation must exist after the separation.[3627]

This requirement will normally be easy to fulfill, as long as all other requirements are met, since corporations that meet the "active business" requirements will likely meet this requirement as well.

II.Q.7.f.iii. Active Business Requirement for Code § 355

The IRS and Treasury have provided significant guidance for what qualifies as an active business. Below is a history of some of the most important guidance.

II.Q.7.f.iii.(a). Farming

In Rev. Rul. 73-234, a corporation engaged in a farm operation as follows:

- The planting, raising, and harvesting of crops and the breeding and raising of livestock in the corporation's farm operation are done by tenant farmers, acting as independent contractors. The tenant farmers are compensated by a share of the proceeds from the sale of all crops and livestock resulting from the farm operation. The corporation employs a general handy-man to maintain the farm property and equipment.

- The corporation employs its sole shareholder and president to participate in the farm operation. He prefers to contract with tenant farmers who have experience with farm machinery and livestock. He supplies all equipment and arranges for all financing necessary for the corporation's operation. With regard to the farm equipment, he engages a local mechanic for the maintenance and repair thereof that is not performed by the general handy-man or the tenant farmers.

- The president devotes significant time and effort to the corporation's farm business. He studies Federal price support and acreage reserve programs, plans all rotation, planting, and harvesting of crops, and purchases and plans the breeding of livestock. He hires seasonal workers and purchases farming equipment, is responsible for handling sales of all crops and livestock, and is responsible for accounting to the tenant farmers for their shares of the proceeds of the sales.

[3626] See Reg. § 1.355-2(c)(2), Example (2) and Rev. Proc. 96-30, § 4.07.
[3627] Code § 355(b), Reg. § 1.355-2(h) and 1.355-3(b)(3). See also the last sentence of fn 3612 regarding proposed regulations under Reg. § 1.355-3.

The IRS ruled that the corporation's farm activities included its direct performance of substantial management and operational functions, apart from those activities performed by the tenant farmers acting as independent contractors. Therefore, the corporation satisfied the active business requirements.

Rev. Rul. 86-126 explains that not all tenant farming qualifies as an active business. In that case:

- The sole officers and shareholders are both farmers who are engaged in the business of farming their own individual tracts of farmland not owned by the corporation, which holds title to large tracts of farmland elsewhere in the same state. Each tract of land held by the corporation is leased for one year at a time to a tenant farmer who has agreed with the corporation to share one-half of all income and expenses of the farm. Each party to the lease is responsible for securing the financing necessary to pay that party's share of expenses. In the case of each tract leased, the planting, raising, and harvesting of corn and soybeans (the only crops grown on these farms) are done by the tenant farmer. The tenant farmer also supplies the farm equipment used in these activities. The tenant farmer repairs and maintains the equipment, and also maintains the irrigation system, fences, and other fixtures located on the property. After consulting with the corporation's officers, the tenant farmer purchases all herbicides, insecticides, and fertilizers used on the property. Also after consulting with them, the tenant farmer contracts to sell the crops at a future date, or sells them when harvested. Each tenant farmer is responsible for accounting to the corporation's officers for the corporation's share of the proceeds.

- The officers each devote to substantial part of their time to the operation of their own respective farms which are unconnected with the farmland owned by the corporation. After completing work on their own properties, the officers occasionally inspect the crops and improvements located on each leased tract. If any corrective steps must be taken, an officer points out the problem to the tenant farmer, who makes the necessary corrections in the way the tenant farmer sees fit. The officers also decide each year what portion of each tract will be leased, in the light of soil conservation needs, market conditions, and federal price support and acreage reserve programs. They review each tenant farmer's accounting of operations and sales.

The IRS contrasted this situation with Rev. Rul. 73-234. In that case, the corporation was engaged in hiring seasonal workers, purchasing and supplying equipment, maintaining equipment, arranging financing, planning all rotation and planting and harvesting of crops, purchasing livestock, planning livestock breeding, selling all crops and livestock, and accounting to the tenant farmers for their shares of the proceeds. That corporate activity, carried on through its own employees and constituting active and substantial managerial and operational activity, contrasts with the activity carried on by the employees of P in the present situation. Here, the IRS said, the corporation either did not engage in the above activities at all, or engaged in them only on a limited basis. At best, it said, the corporation could be considered to engage in some managerial and operational activity but not enough to "qualitatively distinguish its operations from mere investments."

Because of the absence of active and substantial operational and managerial activities, the corporation did not satisfy the active business requirement.

II.Q.7.f.iii.(b). Rev. Rul. 79-394 – Commercial Real Estate

In this ruling, the stock of corporation P is owned by four unrelated individuals. For over five years, P has owned all the stock of corporations X and Y. During that period, P has acted solely as a holding company, X has been engaged in the general contracting business, and Y has been engaged in renting its commercial and residential real estate to unrelated third parties. X's employees have performed all operational activities in connection with Y's rental business. X has paid its employees for these services and has been reimbursed by Y. Y's three officers, who are also officers of P and X, supervise, control and direct the employees of X performing work for Y. Y's officers receive no compensation from Y for the amount of their time devoted to the management and supervision of Y's affairs. These officers are paid only by P and X, and P and X have been reimbursed by Y for the services rendered by the officers to Y.

Y holds title to several commercial and residential rental buildings and associated realty. Y, through its officers and X's employees, continuously seeks additional property of a similar nature for expansion of its rental business. When property is located, Y negotiates its purchase and required financing. Y is primarily obligated on the mortgages relating to its property and pays the principal and interest due thereon. Newly acquired buildings are renovated or altered to reflect the design by Y of custom floor plans that make the property suitable for rental. Y periodically repaints and refurbishes its existing property.

Y endeavors to keep its property rented at all times. When new property is available or when existing property is vacated, Y immediately advertises to attract new tenants. Y verifies the information contained in a prospective tenant's application and negotiates the lease provisions.

Pursuant to the terms of its leases, Y provides and pays for gas, water, electricity, sewage, and insurance for the property and pays the taxes assessed thereon. Moreover, the lease agreements require Y to provide day-to-day maintenance and repair services. These services include insect control, janitorial service, trash collection, ground maintenance, and heating, air conditioning and plumbing maintenance. Y routinely inspects its properties.

Y maintains separate records and accounts to reflect income and expenses relating to each of Y's rental properties as well as Y's general expenses.

Y's above described activity in acquiring, renovating, refurbishing, maintaining, servicing and leasing its rental property is accomplished under the supervision and control of Y's officers using the employees of X.

For valid business reasons, P proposes to distribute all of the Y stock to one of its shareholders solely in exchange for all of that shareholder's P stock in a transaction intended to be tax-free under Code § 355(a). The fair market value of the Y stock to be distributed and the P stock to be surrendered in the exchange are equal.

After the proposed distribution, Y will continue its rental activities as discussed above, and will directly employ, on a full time basis, most of those employees who have worked on its behalf before the distribution.

The IRS held that Y was engaged in the active conduct of a trade or business under Code § 355(b) for the five year period preceding distribution of its stock, notwithstanding the fact that during that period it had no employees other than its officers. Moreover, Y will be engaged immediately after the distribution in the active conduct of a trade or business.

The IRS viewed the only factor tending to prove the lack of a pre-distribution active trade or business conducted by Y to be the absence of salaried employees of Y. The IRS reasoned that, given the nature of Y 's conduct of its pre-distribution rental operations and the existence of substantial objective factors that otherwise adequately demonstrate the active conduct of a trade or business, Y's failure to have salaried employees should not, without more, result in failure to meet the Code § 355(b) active trade or business requirement. However, the IRS further stated that the presence or absence of formal employment of employees other than officers, in the distributing corporation or the controlled corporation, will be one factor for consideration in making this determination under Code § 355(b).

II.Q.7.f.iii.(c). Rev. Rul. 80-181 – Reimbursement for Services

The IRS amplified Rev. Rul. 79-394, ruling that the Code § 355(b) active trade or business requirement is satisfied even if Y does not reimburse P and X for the use of their employees and officers in the conduct of Y's real estate activities.

The IRS pointed out, however, that, if Y did not reimburse X and P for the services that X's employees and X's and P's officers rendered to Y, then the IRS would apply Code § 482 to allocate income to X and P in an amount equal to an arm's length charge for the services rendered by the employees of X and the officers of X and P to Y. Y would then deduct the amounts deemed paid by Y to X and P for the services rendered.

II.Q.7.f.iii.(d). Rev. Rul. 92-17 – Participation by Partners in Rental LP

For more than 5 years, limited partnership LP has owned several commercial office buildings that are leased to unrelated third parties. Corporation D has owned a 20% interest in LP for more than 5 years, and throughout that period of time D has been a general partner of LP. The partnership agreement requires that D, as a general partner, provide the managerial services to LP necessary to operate LP's rental business. For more than 5 years, D has owned all the stock of C, a corporation which has been actively engaged for more than 5 years in the conduct of a trade or business that is unrelated to D's activities.

LP continuously seeks additional properties to expand its rental business. When a property is located, LP negotiates its purchase and financing and determines whether renovations or alterations are necessary to make the building suitable for rental. LP periodically repaints and refurbishes its existing properties.

LP's leases require LP to provide day-to-day upkeep and maintenance services for its office buildings. These services include trash collection, ground maintenance, electrical and plumbing repair, and insect control. Additionally, LP advertises for new tenants, verifies information contained in lease applications, negotiates leases, handles tenant complaints, prepares eviction notices and warnings for delinquent tenants, collects rent, and pays all expenses, including gas, water, sewage, electricity and insurance for the office buildings. LP also maintains financial and accounting records to reflect income and expenses relating to each of its rental properties as well as LP's general expenses.

LP has conducted these activities for more than five years. Officers of D form active and substantial management functions with respect to LP's activities, including making significant business decisions of the partnership (e.g., decisions with respect to significant renovations of partnership properties, the purchase and sale of properties, and significant financings and refinancings). In addition, D's officers regularly participate in the overall supervision, direction and control of LP's employees in their performance of LP's operational functions.

For a valid business purpose, D proposes to distribute all its C stock pro rata to D's shareholders in a transaction intended to satisfy Code § 355. After the distribution, officers of D will continue to provide LP with the services described above.

Except for the issue of whether the activities performed by D in connection with the operation of LP's rental business constitute an active trade or business, the transaction will otherwise meet all the requirements of Code § 355.

The IRS held that, if officers of a corporation that is a general partner in a limited partnership perform active and substantial management functions for the partnership, including making significant business decisions of the partnership and regular participation in the overall supervision, direction and control of the employees of the partnership in operating the partnership's rental business, the corporation is engaged in the active conduct of a trade or business under Code § 355(b) and the distribution of the stock of C by D to D's shareholders is tax-free to the D shareholders under section 355.

The IRS reasoned that the fact that a partnership engages in activities that would constitute the active conduct of a trade or business if conducted by a corporation does not mean that each partner in the partnership is considered to engage in the active conduct of a trade or business for purposes of Code § 355(b). It stated that whether a partner is considered to engage in the active conduct of a trade or business must be made with reference to the activities of the partner as well as the partnership.

It further reasoned that, D, like Y in Rev. Rul. 79-394, performs through its officers and the employees of LP significant services with respect to the operation and management of LP's rental business. The only factor tending to prove that D has not been engaged in the active conduct of a trade or business is D's lack of employees to perform the operational services necessary to operate LP's office buildings. However, this factor, standing alone, will not cause D to fail the Code § 355(b) active trade or business test.

II.Q.7.f.iii.(e). Rev. Rul. 2007-42 – Level of Participation in Rental LLC

The IRS contrasted two situations in which a corporation (D) owns a membership interest in an LLC taxed as a partnership, holding that in one case D was deemed engaged in the active conduct of a trade or business and the other case D was not deemed to be so engaged.

In Situation 1, D was deemed to be deemed engaged in the active conduct of a trade or business. For more than five years, LLC owned several commercial office buildings that are leased to unrelated third parties. LLC has one class of membership interests outstanding. For more than five years, D has owned a 33.3% membership interest in LLC and has owned all the stock of a subsidiary (C), a corporation that has been engaged for more than five years in the active conduct of a trade or business that is unrelated to D's activities.

LLC continuously seeks additional properties to expand its rental business. When a property is located, LLC negotiates its purchase and financing and determines whether renovations or alterations are necessary to make the building suitable for rental. LLC periodically repaints and refurbishes its existing properties.

Pursuant to the terms of its leases, LLC provides day-to-day upkeep and maintenance services for its office buildings. These services include trash collection, ground maintenance, electrical and plumbing repair, and insect control. Additionally, LLC advertises for new tenants, verifies information contained in lease applications, negotiates leases, handles tenant complaints, prepares eviction notices and warnings for delinquent tenants, collects rent, and pays all expenses, including gas, water, sewage, electricity and insurance for the office buildings. LLC also maintains financial and accounting records to reflect income and expenses relating to each of its rental properties as well as LLC's general expenses.

The above described activities of LLC have been conducted for more than five years. The employees of LLC perform all management and operational functions with respect to LLC's rental business. Neither D nor any other member of LLC performs services with respect to LLC's business.

The IRS ruled that D is engaged in the active conduct of LLC's rental business for purposes of Code§ 355(b) because D owns a significant interest in LLC and LLC performs the required activities that constitute an active trade or business under the regulations.

In Situation 2, the facts are the same as Situation 1 except that D owns a 20% membership interest in LLC. The IRS ruled that D was not engaged in the active conduct of LLC's rental business for purposes of Code§ 355(b) because a 20% interest was not sufficiently significant.

The IRS reasoned that the fact that a partnership engages in activities that would constitute the active conduct of a trade or business if conducted by a corporation does not necessarily mean that each partner in the partnership is considered to be engaged in the active conduct of a trade or business for purposes of Code § 355(b). In such a case, the determination of whether a partner is considered to be engaged in the active conduct of a trade or business must be based on the requirements of Code § 355 and the regulations thereunder taking into account the activities of the partner (if any), the partner's interest in the partnership, and the activities of the partnership.

Although Rev. Rul. 92-17 viewed a 20% interest in a partnership to be sufficient, in that case the corporate partner performed management functions. The IRS pointed out that D's officers performed active and substantial management functions with respect to LP, including the significant business decision-making of the partnership, and regularly participated in the overall supervision, direction, and control of LP's employees in operating LP's rental business. Rev. Rul. 2002-49 reached a similar conclusion where

D and another corporation (X) each own a 20% interest in a member-managed LLC and D and X jointly managed the LLC's business.

The IRS looked to Reg. § 1.368-1(d)(4)(iii)(B) to validate its position that a one-third interest was sufficient to impute activity to a partner that does not perform active and substantial management functions for the business of the partnership. That regulation, regarding the continuity of business enterprise requirement applicable to corporate reorganizations, provides that the issuing corporation will be treated as conducting a business of a partnership if members of the qualified group, in the aggregate, own an interest in the partnership representing a significant interest in that partnership business.

II.Q.7.f.iii.(f). Proposed Regulations on Active Conduct of Business

Recent proposed regulations would provide that, for purposes of the active conduct of a business rule, a partner in a partnership will be attributed the trade or business assets and activities of that partnership during the period that such partner satisfies the requirements; however: the stock of a corporation owned by the partnership is not attributed to a partner; for purposes of determining the activities that are conducted by the partnership that may be attributed to the partner, the activities of independent contractors, and partners that are not affiliates of the partner, are not taken into account; and, generally, the activities of partners that are affiliates of the partner are only taken into account during the period that such partners are affiliates of the partner.[3628] The trade or business assets and activities of a partnership will be attributed to a partner if the partner owns a ***significant*** interest in the partnership.[3629] Generally, the trade or business assets and activities of a partnership will be attributed to a partner if the partner performs active and substantial management functions for the partnership with respect to the trade or business assets and activities (for example, makes decisions regarding significant business issues of the partnership and regularly participates in the overall supervision, direction, and control of the employees performing the operational functions for the partnership), and the partner owns a ***meaningful*** interest in the partnership.[3630]

Examples illustrate these concepts:[3631]

Example (8). Jointly owned partnership. For more than five years, D has owned all of the stock of C, and D and C each have owned a 17-percent interest in Partnership. Throughout this period, D and Partnership have engaged in the active conduct of ATB1 and ATB2, respectively. In year 6, D transfers its 17-percent interest in Partnership to C and distributes all of the C stock to the D shareholders. Because D owns Code § 1504(a)(2) stock of C, D and C are treated as one corporation for purposes of determining whether D and C are engaged in the active conduct of a trade or business.[3632] Accordingly, throughout the pre-distribution period, D and C are each treated as owning a 34-percent interest in Partnership, and both D and C are treated as engaged in the active conduct of both ATB1 and ATB2 throughout the pre-distribution period.[3633] The transfer of the Partnership interest is disregarded.[3634] After the

[3628] Prop. Reg. § 1.355-3(b)(2)(v)(A).
[3629] Prop. Reg. § 1.355-3(b)(2)(v)(B).
[3630] Prop. Reg. § 1.355-3(b)(2)(v)(C).
[3631] Prop. Reg. § 1.355-3(d)(2).
[3632] Prop. Reg. § 1.355-3(b)(1)(ii).
[3633] Prop. Reg. § 1.355-3(b)(2)(v)(A), (B).

distribution, C owns 34% of Partnership and is therefore engaged in the active conduct of ATB2.[3635] Therefore, both D and C satisfy Code § 355(b).

Example (22). Partnership—meaningful but not significant. For more than five years, unrelated X and Y have owned a 20% and one-third interests, respectively, in Partnership. The remaining interests in Partnership are owned by unrelated parties. For more than five years, Partnership has manufactured power equipment. But for the performance of all its management functions by employees of X, Partnership would satisfy all the requirements of Prop. Reg. § 1.355-3(b)(2)(i). X and/or Y will be attributed the trade or business assets and activities of Partnership only if the corporation satisfies the requirements of Prop. Reg. § 1.355-3(b)(2)(v)(B) or (C).[3636] While X does not satisfy the requirements of Prop. Reg. § 1.355-3(b)(2)(v)(B) because X's interest in Partnership is not significant, under Prop. Reg. § 1.355-3(b)(2)(v)(C), X owns a meaningful interest in Partnership and performs active and substantial management functions for the trade or business assets and activities of Partnership. Therefore, X is attributed the trade or business assets and activities of Partnership. Accordingly, X is engaged in the active conduct of the business of manufacturing power equipment.[3637] In determining whether Y is engaged in the business of manufacturing power equipment, the management functions performed by X for Partnership are not taken into account.[3638] Therefore, although Y is attributed Partnership's trade or business assets and activities under Prop. Reg. § 1.355-3(b)(2)(v)(B) because Y owns a significant interest in Partnership, Y is not engaged in the business of manufacturing power equipment because neither Y nor Partnership perform any management functions for the business.[3639]

Example (23). Partnership—significant but not meaningful. The facts are the same as Example 22 except that all the management functions related to the business of Partnership are performed by employees of Partnership. Because employees of Partnership perform all of the management functions related to the trade or business assets and activities of manufacturing power equipment, Partnership itself satisfies all the requirements of Prop. Reg. § 1.355-3(b)(2)(i). X neither owns a significant interest in Partnership nor performs active and substantial management functions with respect to the trade or business assets and activities of Partnership. Accordingly, X does not satisfy the requirements Prop. Reg. § 1.355-3(b)(2)(v)(B) or (C), X is not attributed the trade or business assets and activities of Partnership's business of manufacturing power equipment, and X is not engaged in the active conduct of the business of manufacturing power equipment. On the other hand, because Y owns a significant interest in Partnership, Y satisfies the requirements of Prop. Reg. § 1.355-3(b)(2)(v)(B). Therefore, Y is attributed the trade or business assets and activities of Partnership's business. Accordingly, Y satisfies the requirements of Prop. Reg. § 1.355-3(b)(2)(i) and is engaged in the active conduct of the business of manufacturing power equipment.

Example (24). Partnership—significant by many. The facts are the same as Example 23 except that X, Y, and Z each own a one-third interest in Partnership.

3634 Prop. Reg. § 1.355-3(b)(1)(ii).
3635 Prop. Reg. § 1.355-3(b)(2)(v)(A), (B).
3636 Prop. Reg. § 1.355-3(b)(2)(v)(A).
3637 Prop. Reg. § 1.355-3(b)(2).
3638 Prop. Reg. § 1.355-3(b)(2)(v)(A).
3639 Prop. Reg. § 1.355-3(b)(2)(iii).

Because X, Y, and Z each own a significant interest in Partnership, each of X, Y, and Z satisfies the requirements of Reg. § 1.355-3(b)(2)(v)(B). Accordingly, each of X, Y, and Z is attributed the trade or business assets and activities of Partnership, satisfies the requirements of Reg. § 1.355-3(b)(2)(i), and is engaged in the active conduct of the business of manufacturing power equipment.

II.Q.7.f.iii.(g). Combining Split Up With Sale to Irrevocable Grantor Trust

While we waited for those proposed regulations to be finalized, Letter Ruling 200842003 was issued, providing an excellent example of how a family business can be divided and then sold using a sale to a separate irrevocable grantor trust for each adult child. First, the parent split the corporation into five different entities. Then, the parent sold an interest in each entity to a different irrevocable grantor trust for a different child. Although Code § 355 required the parent to continue to hold on to the new corporations, the parent was deemed not to have sold the corporations because the sale to the irrevocable grantor trust was disregarded for income tax purposes. Below are details excerpted from the ruling.

Distributing is a C corporation. Less than 10 years ago, Distributing elected taxation as an S corporation. Distributing has two classes of common stock that differ only by the number of votes per share. All of the Distributing stock is owned by one family. Shareholder 5 is the parent of each of Shareholders 1 through 4. The parent and the children own the Series A stock. The children own the Series B stock. The parent is the majority shareholder of Distributing.

Distributing has directly had gross receipts and operating expenses representative of the active conduct of a trade or business for each of the past five years.

For what are represented to be valid business reasons, Distributing has proposed the following transactions (the "Proposed Transactions"):

(i) Distributing will create Controlled 1, Controlled 2, Controlled 3, and Controlled 4 (collectively, the "Controlled corporations").

(ii) Distributing will transfer all of its assets to the Controlled corporations in exchange for all of the stock of each of the Controlled corporations and the assumption by each of the Controlled corporations of the liabilities associated with the assets transferred (collectively, the "Contributions").

(iii) Distributing will distribute pro rata all of its stock in each of the Controlled corporations to Shareholders 1 through 5 in exchange for all of the stock of Distributing held by Shareholders 1 through 5 (collectively, the "Distributions"). Each of the Controlled corporations will make an S election on the first available date after the Distributions.

(iv) Distributing will liquidate.

Shareholder 5 will establish four irrevocable grantor trusts: Trust 1, Trust 2, Trust 3, and Trust 4 (collectively, the "Trusts"). Distributing represents that Shareholder 5 will be the grantor of each of the Trusts and will be treated as the owner of each Trust's assets under Code § 671. Shareholder 1 will be the sole beneficiary of Trust 1, Shareholder 2 will be the sole beneficiary of Trust 2, Shareholder 3 will be the sole beneficiary of Trust 3, and Shareholder 4 will be the sole beneficiary of Trust 4.

Shareholder 5 will transfer e% of her stock in Controlled 1 to Trust 1, e% of her stock in Controlled 2 to Trust 2, e% of her stock in Controlled 3 to Trust 3, and e% of her stock in Controlled 4 to Trust 4 (the "Gift Transactions"). Shareholder 5 will sell f% of her stock in Controlled 1 to Trust 1, f % of her stock in Controlled 2 to Trust 2, f% of her stock in Controlled 3 to Trust 3, and f% of her stock in Controlled 4 to Trust 4 in exchange for promissory notes from each Trust (the "Sale Transactions"). Distributing has represented that the Gift Transactions and the Sale Transactions are disregarded for federal income tax purposes.

Shareholder 5's estate plan provides that her ownership interests in each of the Controlled corporations will be separated, so that Shareholder 1 will only inherit the stock of Controlled 1, Shareholder 2 will only inherit the stock of Controlled 2, Shareholder 3 will only inherit the stock of Controlled 3, and Shareholder 4 will only inherit the stock of Controlled 4.

The taxpayer made the following representations regarding the Proposed Transactions:

(a) Neither the business nor control of any entity conducting this business was acquired during the five-year period ending on the date of the Distributions in a transaction in which gain or loss was recognized (or treated as recognized) in whole or in part.

(b) The fair market value of the stock of each of the Controlled corporations to be received by each shareholder of Distributing will be approximately equal to the fair market value of the Distributing stock surrendered by each shareholder in exchange therefor.

(c) No part of the consideration to be distributed by Distributing will be received by a shareholder as a creditor, employee, or in any capacity other than that of a shareholder of the corporation.

(d) Following the Proposed Transactions, the Controlled corporations will each continue, independently and with its separate employees, the active conduct of its share of all the integrated activities of Business D conducted by Distributing prior to consummation of the Proposed Transactions.

(e) The distribution of the stock of each of the Controlled corporations is carried out for the following corporate business purposes: (1) to implement business succession planning; and (2) to avoid shareholder deadlock after implementation of the plan by allowing each shareholder in the post-transition structure to independently manage his or her portion of Distributing's business.

(f) The Proposed Transactions are not used principally as a device for the distribution of the earnings and profits of Distributing or the Controlled corporations.

(g) For purposes of Code § 355(d), immediately after the Distributions, no person (determined after applying Code § 355(d)(7)) will hold stock possessing 50% or more of the total combined voting power of all classes of Distributing stock entitled to vote or 50% or more of the total value of shares of all classes of Distributing stock, that was acquired by purchase (as defined in Code § 355(d)(5) and (8)) during the five-year period (determined after applying Code § 355(d)(6)) ending on the date of the Distributions.

(h) For purposes of Code § 355(d), immediately after the Distributions, no person (determined after applying Code § 355(d)(7)) will hold stock possessing 50% or more of the total combined voting power of all classes of any Controlled stock entitled to vote or 50% or more of the total value of the shares of all classes of any Controlled stock, that was either (i) acquired by purchase (as defined in Code § 355(d)(5) and (8)) during the five-year period (determined after applying Code § 355(d)(6)) ending on the date of the Distribution, or (ii) attributable to distributions on Distributing stock that was acquired by purchase (as defined in Code § 355(d)(5) and (8)) during the five-year period (determined after applying Code § 355(d)(6)) ending on the date of the Distributions.

(i) Any liabilities assumed (within the meaning of Code § 357(d)) by the Controlled corporations in the Proposed Transactions were incurred in the ordinary course of business and are associated with the assets being transferred.

(j) With respect to each Contribution to a Controlled corporation, the total adjusted bases and the total fair market value of the assets transferred to the Controlled corporation by Distributing in the Proposed Transactions will exceed the sum of the amount of any liabilities assumed (within the meaning of Code § 357(d)) by the Controlled corporation in the exchange.

(k) No intercorporate debt will exist between Distributing and any of the Controlled corporations at the time of, or subsequent to, the Distributions.

(l) Payments made in connection with all continuing transactions, if any, between any of the Controlled corporations will be for fair market value based on terms and conditions arrived at by the parties bargaining at arm's length.

(m) No parties to the Proposed Transactions are investment companies as defined in Code § 368(a)(2)(F)(iii) and (iv).

(n) The Distributions are not part of a plan or series of related transactions (within the meaning of Treas. Reg. § 1.355-7) pursuant to which one or more persons will acquire directly or indirectly stock representing a 50% or greater interest (within the meaning of Code § 355(d)(4)) in either Distributing or any of the Controlled corporations (including any predecessor or successor of Distributing or any of the Controlled corporations).

(o) Immediately after the Distributions, either (i) no person will hold a 50% or greater interest (within the meaning of Code § 355(g)) in the stock of Distributing or any of the Controlled corporations who did not hold such an interest immediately before the distribution, or (ii) neither Distributing nor any of the Controlled corporations will be a disqualified investment corporation (within the meaning of Code § 355(g)(2)).

The IRS ruled as follows:

(1) Each Contribution, together with its respective Distribution, will be a reorganization within the meaning of Code § 368(a)(1)(D). With respect to each such reorganization, Distributing and the respective Controlled corporation will be “a party to a reorganization” within the meaning of Code § 368(b).

(2) No gain or loss will be recognized by Distributing on the Contributions (Code § 357(a) and 361(a)).

(3) No gain or loss will be recognized by any of the Controlled corporations on the Contributions (Code § 1032(a)).

(4) The basis of each asset received by each of the Controlled corporations in the Contributions will equal the basis of that asset in the hands of Distributing immediately before the Contributions (Code § 362(b)).

(5) The holding period of each asset received by each of the Controlled corporations in the Contributions will include the period during which Distributing held the asset (Code § 1223(2)).

(6) No gain or loss will be recognized by (and no amount will be included in the income of) Shareholder 1, Shareholder 2, Shareholder 3, Shareholder 4, or Shareholder 5 on their receipt solely of the stock of the Controlled corporations in the Distributions (Code § 355(a)).

(7) No gain or loss will be recognized by Distributing in connection with the Distributions (Code § 361(c)(1)).

(8) With respect to each of Shareholders 1 through 5, the aggregate basis of the stock of the Controlled corporations in their hands after the Distributions will equal the aggregate basis of the Distributing stock surrendered in exchange therefor, and this aggregate basis will be allocated between the stock of the Controlled corporations in proportion to the fair market value of each immediately following the Distributions in accordance with Treas. Reg. § 1.358-2(a) (Code § 358(a) and (b)(2)).

(9) The holding period of the stock in each of the Controlled corporations received by each of Shareholders 1 through 5 in the Distributions will include the holding period of the Distributing stock surrendered in exchange therefor, provided the Distributing stock was held as a capital asset on the date of the Distributions (Code § 1223(1)).

(10) The earnings and profits of Distributing (if any) will be allocated to each of the Controlled corporations in accordance with Code § 312(h) and Treas. Reg. section 1.312-10(a).

(11) Each of the Controlled corporations will be subject to Code § 1374 with respect to any asset transferred from Distributing to the Controlled corporations to the same extent Distributing was subject to Code § 1374 with respect to such asset. For purposes of Code § 1374, the recognition period of each of the Controlled

corporations will be reduced by the portion of Distributing's recognition period that expires prior to Distributing's transfer of the assets (Code § 1374(d)(8) and IRS Ann. 86-128).

The IRS specifically expressed no opinion regarding:

(i) Whether the Distributions satisfy the business purpose requirement of Treas. Reg. § 1.355-2(b);

(ii) Whether the Distributions are used principally as a device for the distribution of the earnings and profits of Distributing or the Controlled corporations;

(iii) Whether the Proposed Transactions are part of a plan (or series of related transactions) under Code § 355(e)(2)(A)(ii);

(iv) Whether Distributing's election to be taxed as a subchapter S corporation is valid; whether the Controlled corporations are otherwise eligible to be taxed as subchapter S corporations; and whether the Controlled corporations' elections to be taxed as subchapter S corporations will be valid under Code § 1362(a);

(v) The gift and estate tax treatment of the proposed transactions, including whether the Gift Transactions and the Sale Transactions constitute separate transactions for gift tax purposes and the extent to which the Gift Transactions and the Sale Transactions constitute transfers for adequate consideration in money or money's worth; and

(vi) Whether the Trusts are trusts grantor trusts.

II.Q.7.f.iii.(h). Other Estate Planning Applications of Split Ups

Other letter rulings involving Code§ 355 transactions in estate planning situations include:

- Letter Ruling 200850018 (Code § 303 redemption)
- Letter Ruling 200809017 (two families)
- Letter Ruling 200645010 (two locations)
- Letter Ruling 200645010 (three subsidiaries)

II.Q.7.f.iv. Tax Effects When Code § 355 Provisions Are Not Met

If a corporation might not be able to satisfy Code § 355, consider part II.Q.7.h.ix Value Freeze as Alternative to Code § 355 Division to avoid the consequences described in this part II.Q.7.f.iv.

II.Q.7.f.iv.(a). Distributing Corporation

In a number of situations, a distributing corporation may have to recognize gain on a distribution that would otherwise qualify as tax-free, Code § 355 distribution.[3640] The first of these exceptions to the non-recognition rule is the "disguised sale" rule of Code § 355(c)(2), as modified by Code § 355(d). Code § 355(c)(2) requires the distributing corporation to recognize gain when it distributes property, other than stock of the controlled corporation, if the fair market value of the property exceeds it adjusted basis.[3641] Code § 355(d) applies to certain distributions of the controlled corporation's stock, and requires that the distributing corporation recognize gain if any one person holds a 50% or greater interest in disqualified stock in either the distributing or controlled corporation after the distribution.[3642] In family business situations, often the majority shareholder (usually the founder) has owned the business for more than five years. Additionally, even if the founder has transferred equity in the business within the past five years through gifts or through a transfer at death, the disguised sale rule still will not apply, since they only apply to purchase transfers.[3643]

Code § 355(e) is similar to Code § 355(d), but applies when distributions are part of a plan in which one or more persons will acquire 50% or greater interest in either the distributing or controlled corporation.[3644] No five year requirement similar to Code § 355(d) applies, but if one or more persons acquires the 50% or greater interest in either corporation within two years before or after the distribution, then the transaction is considered to be "pursuant to a plan."[3645] Additionally, Code § 355(e) makes no distinction between transfers made for consideration and those made for no consideration. However, to prevent Code § 355(e) from making tax-free corporation division impossible, a number of exceptions limit what is considered an "acquisition" for Code § 355(e) purposes. For example, Code § 355(e)(3)(A)(i) states that the acquisition of stock in a controlled corporation by a distributing corporation will not be taken into account for Code § 355(e) purposes. Temporary and proposed regulations flesh out these rules some and describe the gain resulting from applying these rules.[3646] Additionally, in most family businesses, Code § 355(e) will not be an issue because of a related party provision similar to the one present in Code § 355(d), causing all stock owned by family members to be treated as owned by one person.[3647] The only time that Code § 355(e) is likely to come into play in family business succession planning would be in cases where the founder plans to shift ownership to second generation family

---

[3640] Code § 355(c)(2).

[3641] Code § 355(c)(2)(A)(ii). The distributing corporation is taxed as if it had sold the property to the distributee at fair market value. Code § 355(c)(2)(A) (flush language).

[3642] Code § 355(d)(2). Under Code § 355(d)(4), the 50% or greater interest means stock possessing at least 50% of the total combined voting power of all classes of stock entitled to vote or at least 50% of the total value of shares of all classes of stock. Disqualified stock is defined in Code § 355(d)(3) as any stock of the distributing corporation acquired by purchase during the five year period leading up to the distribution and as any stock in the controlled corporation that was acquired by purchase in the five years leading up to the distribution or by distribution on disqualified stock in the distributing corporation.

[3643] Reg. § 1.355-6(d)(1)(i)(A).

[3645] Code § 355(e)(2)(B).

[3646] Reg. § 1.355-8T; Prop. Reg. § 1.355-8.

[3647] Code § 355(e)(4)(C)(i).

members who are not lineal descendants of the founder. In such cases, additional planning needs to be done to ensure the transfers and tax-free division will not be considered "pursuant to a plan."

All of the above assumes that the distribution satisfies the requirements of Code § 355 but for the conditions described above. If a transaction does not fit above, consider whether other tax-free provisions apply; otherwise, consider whether the distributing corporation might be taxed on the distribution, as provided in part II.Q.7.h.iii Taxation of Corporation When It Distributes Property to Shareholders.

II.Q.7.f.iv.(b). Controlled Corporation

Regardless of whether Code § 355 is met, the controlled corporation will not recognize gain or loss on a corporate division.[3648] Thus, the controlled corporation's basis in the property distributed to it by the distributing corporation before the distribution of the controlled corporation's stock will be equal to the property's basis in the hands of the distributing corporation, increased by any gain recognized by the distributing corporation on the transfer.[3649] When such property distributions are made to the controlled corporation, the distributing corporation must allocate part of its earnings and profits to the controlled corporation.[3650] This allocation will generally be made in proportion to the fair market value of the business and property interests retained by the distributing corporation and the business and property interests of the controlled corporation immediately after the distributions.[3651]

II.Q.7.f.iv.(c). Shareholders

Generally speaking, shareholders of the distributing and controlled corporations will not recognize any gain or loss on the receipt of the controlled corporation's stock in a Code § 355 division. However, if the shareholders of the controlled corporation receive "boot" in addition to stock, then they will have to recognize some gain. This situation will arise when a controlled corporation's shareholder receives other property or money, in addition to the controlled corporation's stock, so that the amount received is equal to the fair market value of the stock the shareholder gave up in the distributing corporation. When this occurs, the shareholder must recognize gain, but not more than the sum of the fair market value of other property and money received.[3652] This type of distribution could also lead to gift tax consequences if one of the shareholders receives more stock than he would have been entitled to, based on his original ownership in the distributing corporation. If the proper donative intent exists, the shareholder may be deemed to have received a gift from the other shareholders. Thus, it is important to make sure that when a shareholder receives more than he was entitled to (based on his ownership), the transfer is properly documented so that it is clear whether there was any intent to gift and the transfer can be properly taxed.

[3649] Code § 362(b). However, Reg. § 1.362-3 reduces the basis of property acquired in loss importation transaction.

[3650] Reg. § 1.312-10(a). However, a distributing corporation's unused NOL carryover will not be allocated to the controlled corporation. Rev. Rul. 77-133.

[3651] Reg. § 1.312-10(a).

[3652] Code § 356(a)(1).

The total basis of all shareholders' stock in the distributing and controlled corporation after the division will be the same as the total basis of all shareholders' stock in the distributing corporation before the division, increased by gain or other income each shareholder recognized and reduced by returns of capital each shareholder received or loss recognized.[3653] However, each individual shareholder's basis may be different before and after the division and must be recalculated after the division. The shareholder's basis is allocated among stock held after the distribution in based on each share's fair market value relative to the fair market value of all shares.[3654]

II.Q.7.g. Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill)

Generally, a sale or exchange of property, directly or indirectly,[3655] between related persons, will treat as ordinary income any gain recognized to the transferor if such property is depreciable or amortizable property in the hands of the transferee.[3656] Also beware similar issues relating to patents.[3657]

In this context, "related persons" means:[3658]

- a person and all entities which are controlled entities with respect to such person,
- a taxpayer and any trust in which such taxpayer (or his spouse) is a beneficiary, unless such beneficiary's interest in the trust is a remote contingent interest,[3659] and
- except in the case of a sale or exchange in satisfaction of a pecuniary bequest, an executor of an estate and a beneficiary of such estate.

As used above, "controlled entity" means, with respect to any person:[3660]

- a corporation more than 50% of the value of the outstanding stock of which is owned (directly or indirectly) by or for such person,[3661]
- a partnership more than 50% of the capital interest or profits interest in which is owned (directly or indirectly) by or for such person, and

[3661] A requirement to elect an independent director does not cause the shareholder's voting power to drop below this threshold. *Fish v. Commissioner*, T.C. Memo. 2013-270.

- any entity which is a related person to such person under certain attribution rules.[3662]

Certain constructive ownership rules apply in determining ownership.[3663] These rules do not attribute ownership from beneficiaries to a trust.[3664] Thus, the sole owner of an S corporation can avoid application of Code § 1239 after his/her death if he/she bequeaths the stock so than no trust owns more than 50% of the value of the outstanding stock. Note that any ESBT would be considered unrelated to another ESBT; however, a QSST generally is deemed owned by its beneficiary, so presumably the beneficiary's deemed ownership would cause family attribution to apply.[3665]

Code § 1239 applies not only to depreciable property but also to "an amortizable section 197 intangible."[3666] A "section 197 intangible" includes goodwill,[3667] going concern value,[3668] workforce in place,[3669] any information base,[3670] know-how,[3671]

[3662] Code § 267(b)(3), (10), (11), or (12).

[3663] Code § 1239(c)(2), applying Code § 267(c) (other than Code § 267(c)(3)) for purposes of Code § 1239.

[3664] Code § 267(c) provides the following constructive ownership rules:

(1) Stock owned, directly or indirectly, by or for a corporation, partnership, estate, or trust shall be considered as being owned proportionately by or for its shareholders, partners, or beneficiaries;

(2) An individual shall be considered as owning the stock owned, directly or indirectly, by or for his family;

(3) An individual owning (otherwise than by the application of paragraph (2)) any stock in a corporation shall be considered as owning the stock owned, directly or indirectly, by or for his partner;

(4) The family of an individual shall include only his brothers and sisters (whether by the whole or half blood), spouse, ancestors, and lineal descendants; and

(5) Stock constructively owned by a person by reason of the application of paragraph (1) shall, for the purpose of applying paragraph (1), (2), or (3), be treated as actually owned by such person, but stock constructively owned by an individual by reason of the application of paragraph (2) or (3) shall not be treated as owned by him for the purpose of again applying either of such paragraphs in order to make another the constructive owner of such stock.

Although paragraph (3) is reproduced above, note that Code § 1239(c)(2) precludes its application to Code § 1239.

[3665] See part III.A.3.e QSSTs and ESBTs. Query if the S corporation is liquidated or substantially all of its assets are sold, in which case the gain would be taxed to the trust. For QSST taxation, see fns. 4478-4482.

[3666] Code § 197(f)(7); Reg. § 1.197-2(g)(8) (which is also consistent with the Joint Committee of Taxation report).

[3667] In this context, the value of a trade or business attributable to the expectancy of continued customer patronage, which expectancy may be due to the name or reputation of a trade or business or any other factor.

[3668] In this context, the additional value that attaches to property by reason of its existence as an integral part of an ongoing business activity, including the value attributable to the ability of a business to continue functioning or generating income without interruption notwithstanding a change in ownership, as well as the use of the revenues or net earnings that otherwise would not be received during any period if the acquired trade or business were not available or operational.

[3669] This includes the existence of a highly-skilled workforce, any existing employment contracts, or a relationship with employees or consultants.

customer-based intangibles,[3672] supplier-based intangibles,[3673] any license, permit, or other right granted by a governmental unit (even if the right is granted for an indefinite period or is reasonably expected to be renewed for an indefinite period), any covenant not to compete, any franchise, trademark, or trade name, and any right under a license, contract, or other arrangement providing for the use of property described above.[3674]

Does Code § 1239 apply to the sale of goodwill? This rule applies only if these assets are "amortizable." However, amortizable section 197 intangibles do not include any intangible created by the taxpayer (a self-created intangible).[3675] On the other hand, the exception for self-created intangibles does not apply to any intangible created in connection with the purchase of a business.[3676] Does the sale of a business transform self-created intangibles into amortizable section 197 intangibles at the time of the sale, so that Code § 1239 applies?[3677] The Tax Court has held that Code § 1239 applies to gain if the property is an amortizable section 197 intangible in the transferee's hands.[3678] (Also note that goodwill that is not being amortized and is held by a partnership would be eligible for a basis step if a Code § 754 election is in place.[3679])

However, Code § 1239 does not apply to depletable property.[3680]

[3670] This includes the intangible value of technical manuals, training manuals or programs, data files, and accounting or inventory control systems, customer lists, subscription lists, insurance expirations, patient or client files, or lists of advertisers.

[3671] This includes any patent, copyright, formula, process, design, pattern, know-how, format, package design, internally developed or modified computer software, or interest in a film, sound recording, video tape, book, or other similar property.

[3672] This includes the existence of a customer base, a circulation base, an undeveloped market or market growth, insurance in force, the existence of a qualification to supply goods or services to a particular customer, a mortgage servicing contract, an investment management contract, or other relationship with customers involving the future provision of goods or services.

[3673] This includes the existence of a favorable relationship with persons providing distribution services (such as favorable shelf or display space at a retail outlet), the existence of a favorable credit rating, or the existence of favorable supply contracts.

[3674] Reg. § 1.197-2(b).

[3675] Reg. § 1.197-2(d)(2)(i). See also fn. 3030 regarding amortization of purchased goodwill.

[3676] Reg. § 1.197-2(d)(2)(iii)(B).

[3677] One reading is that Reg. § 1.197-2(g)(8) would have omitted amortizable if this result had been intended. A contrary argument is that Code § 1239 looks to the property in the hands of the transferee, and the self-created goodwill becomes purchased goodwill in the transferee's hands and is therefore amortizable. The contrary argument is more consistent with the purpose of Code § 1239, but Congress might have had other thoughts when it later enacted Code § 197.

[3678] *Fish v. Commissioner*, T.C. Memo. 2013-270.

[3679] See part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000, fn. 4155. For an example of the effect of a Code § 754 election on goodwill that is being amortized, see fn. 4310 in part II.Q.8.e.iv Transfer of Partnership Interests Resulting in Deemed Termination: Effect on Partnership.

[3680] Letter Ruling 8139052, reasoning:

> Depletion is based upon the concept of the exhaustion of a natural resource, whereas depreciation is based upon the concept of exhaustion, wear and tear, and also obsolescence of property, not otherwise a natural resource, used in a trade or business or held for the production of income. Depletion and depreciation are made applicable to different types of assets and the method by which a depletion allowance is spread over

Furthermore, when a husband and wife who own all of a partnership sell the partnership to a corporation they control, Rev. Rul. 72-172 asserted that Code § 1239 applies to the distribution of the partnership's depreciable property.[3681]

Although sales of partnership interests holding depreciable property trigger ordinary income taxation, that provision does so only to the extent of accumulated depreciation,[3682] whereas Code § 1239 applies with respect to the entire gain. Thus, placing depreciable property into a limited partnership,[3683] before liquidating the corporation or otherwise distributing the partnership interest, may avoid the full brunt of Code § 1239, subject to cautions about doing so too close to the liquidation.[3684]

The partnership provision most closely resembling Code § 1239 is part II.Q.8.c Related Party Sales of Non-Capital Assets By or To Partnerships.

the taxable years is different from that applied in the case of depreciation. 4 J. Mertens, *Law of Federal Income Taxation* 24.02 (1980 rev.).

[3681] The ruling stated:

In the instant circumstances, the transaction had the effect of transferring to the corporation, the partnership assets attributable to the partners' interests in the partnership. See *United States v. R. T. and Gertrude Woolsey et al.*, 326 F.2d 287 (1963); *Edwin E. McCauslen v. Commissioner*, 45 T.C. 588 (1966); and Rev. Rul. 67-65, C.B. 1967-1, 168. Compare *Kimbell-Diamond Milling Company*, 14 T.C. 74 (1950), *affirmed per curiam* 187 F.2d 718 (1951) *certiorari denied*, 342 U.S. 827 (1951).

[3682] See part II.Q.8.b.i.(f) Code § 751 – Hot Assets.

[3683] See part II.Q.7.h Distributing Assets; Drop-Down into Partnership.

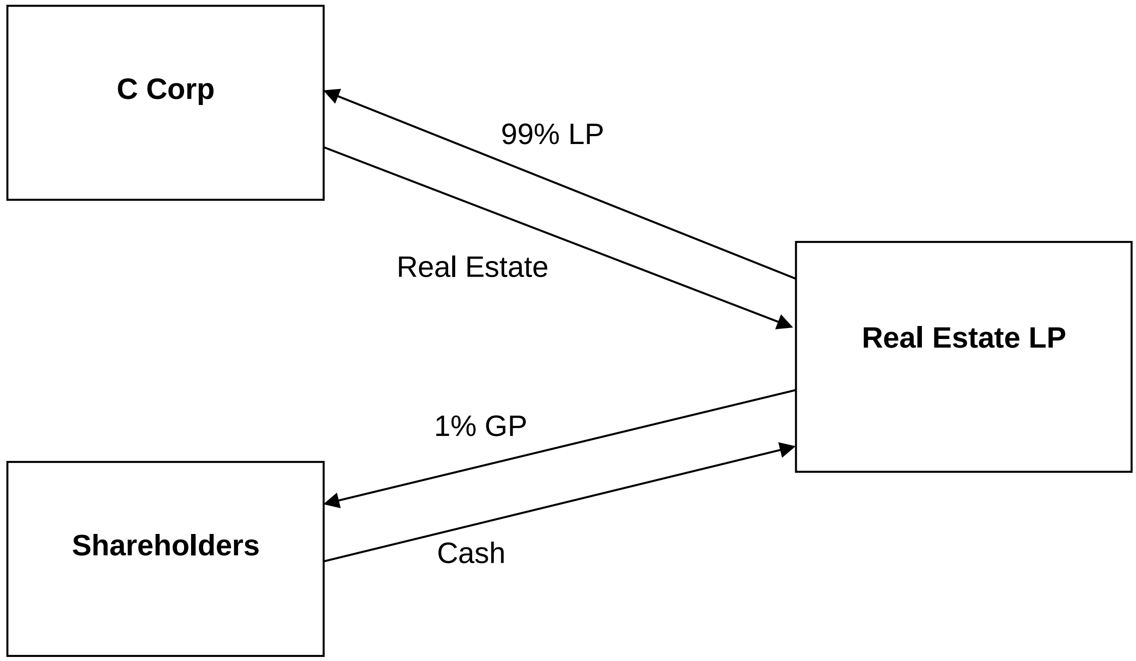
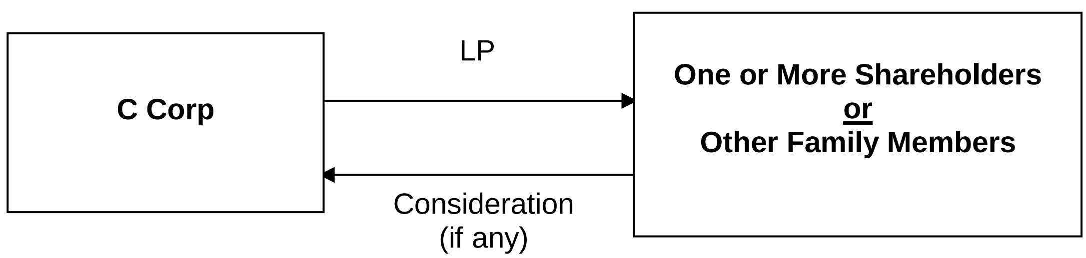
II.Q.7.h. Distributing Assets; Drop-Down into Partnership

II.Q.7.h.i. Structure

<u>Step 1</u>



<u>Step 2</u>



Step 1

General rule under Code § 721 is no gain or loss to contributing partner or receiving partnership when a partnership interest is issued in exchange for cash or other property.

Although real estate is illustrated here, this transaction could involve a line of business or marketable securities. However, if it involves marketable securities and the other partners contribute more than a de minimis amount, then one needs to consider additional issues to avoid gain recognition. Code § 721(b).

Step 2

The corporation recognizes gain as if it had sold the property that was distributed. Code § 311. Given that what is transferred is an interest as a limited partner, valuation discounts would reduce the transfer's value and therefore the gain that it triggers.

Shareholders recognize dividend income to the extent of the corporation's earnings and profits (E&P) if it is a distribution (or a state law redemption that does not qualify as an income tax redemption under Code § 302). The balance of the distribution simply reduces the stock's basis and is capital gain after that.

Step 2 could also be done as a taxable sale.

Step 2 might be done in stages to minimize step transaction attacks, including those mentioned in footnote 3694.

II.Q.7.h.ii. Taxation of Shareholders When Corporation Distributes Cash or Other Property

For taxation of distributions by S corporations, see part II.Q.7.b.iv.(a) S Corporation Distributions of Life Insurance Proceeds - Warning for Former C Corporations.

Distributions to shareholders of a C corporation are taxed as dividends to the extent of earnings and profits (E&P), then as return of basis, and then as gain on the sale of stock.[3685] The distributions are applied to each block of share proportionately; if a block of stock has basis lower than other blocks of stock and runs out of basis, then distributions attributable to that block trigger gain, even if the shareholder has plenty of basis available in other blocks of stock that would otherwise have been available to absorb the distribution tax-free.[3686]

Redemptions reduce E&P.[3687]

II.Q.7.h.iii. Taxation of Corporation When It Distributes Property to Shareholders

The rules below apply to S corporations as well as C corporations.[3688]

II.Q.7.h.iii.(a). Taxable Gain to Corporation When It Distributes Property to Shareholders Other Than in Liquidation of the Corporation

Code § 311(b)(1) taxes a corporation when it distributes appreciated assets to its shareholders in a distribution described in Code §§ 301-307 (note that corporate liquidations are described in Code §§ 331-346).[3689] The corporation is deemed to have

---

[3685] Code § 301(c).
[3686] *Johnson v. United States*, 435 F.2d 1257 (4th Cir. 1971), *rev'g* 303 F.Supp. 1 (E.D. Va. 1969).
[3687] Code § 312(n)(7), superseding the limitations of Reg. § 1.312-5. Rev. Rul. 79-376, which had governed, was obsoleted by Rev. Rul. 95-71, presumably in response to this change; see T.M. 767 Redemptions IV.A.2.c. The Senate Report to P.L. 98-369 that enacted the current statutory language provides:

> In the case of a distribution by a corporation in redemption of its own stock, earnings and profits are to be reduced in proportion to the amount of the corporation's outstanding stock that is redeemed. However, the Senate does not intend that earnings and profits be reduced by more than the amount of the redemption.

[3688] Code § 1371(a).
[3689] For the latter, see part II.Q.7.a.vii Corporate Liquidation.

sold the assets to the distributee.[3690] If the corporation is a C corporation, then the deemed sale is taxed at ordinary income rates, just like any other corporation gain or loss would be. If the corporation is an S corporation, then it is taxed to the shareholders on their K-1s,[3691] subject of course to any applicable built-in gain tax under Code § 1374.[3692] The entire gain (not just depreciation recapture) from the deemed sale of any depreciable or amortizable property may be taxed as ordinary income (which, in addition to having consequences to S corporation owners, can be an issue to C corporations that have capital losses that could otherwise be offset).[3693]

If the distribution is of all of the corporation's interest in the property, the IRS will attempt to disregard any valuation discounts that would not have applied if the corporation had distributed all of the corporation's interest in the property to one shareholder.[3694] Furthermore, if the IRS determines that a corporation's receipt of a partnership interest does not constitute adequate and full consideration for the property it transferred to the partnership, the IRS will argue that a dividend was made to the other partners and that the corporation recognized gain on the property deemed distributed to the other partners.[3695] However, in what might be the same case, the IRS lost that argument, when the taxpayer convinced the court of the taxpayer's business purpose, in *Cox Enterprises, Inc. & Subsidiaries v. Commissioner*.[3696]

II.Q.7.h.iii.(b). Nondeductible Loss to Corporation When It Distributes Property to Shareholders

Under Code § 311(a), a corporation cannot deduct a loss when distributing property, the value of which is less than its basis.

CCA 201421015 concluded:[3697]

[3690] Although a bargain sale of property to a shareholder is a deemed sale for full fair market value with the bargain element constituting a divided, a corporation is not required to make a profit when it provides services to a shareholder – reimbursing the corporation for the costs it incurred is sufficient to avoid any sale or dividend treatment. *Welle v. Commissioner*, 140 T.C. 420 (2013) (services were incidental; business generally was conducted to make a profit in serving the general public).

[3691] Code § 1366.

[3692] See part II.P.3.c.ii Built-in Gain Tax.

[3693] See part II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill).

[3694] TAM 200443032; *Pope & Talbot, Inc. v. Commissioner*, 104 T.C. 574 (1995), *aff'd* 162 F.3d 1236 (9th Cir. 1999). See also *Robert E. Smith, III v. Commissioner*, T.C. Memo. 2017-218, in which an S corporation was formed and liquidated in the same year and claimed a loss on the deemed sale of the limited partnership interest it received when it also formed the partnership in the same year; the economic substance doctrine disallowed the loss and imposed penalties (see part II.G.16 Economic Substance Penalty and Doctrines, but the tax year was before Code § 7701(o) was enacted, so penalties applied even without that statute).

[3695] TAM 200239001 (property deemed distributed is based on the value of the property contributed to the partnership rather than the value of the partnership interests received by the partner).

[3696] T.C. Memo. 2009-134.

[3697] This disallowed loss nevertheless reduces the S stock's basis. See fn. 819.

Disallowed § 311(a) losses will be treated as non-deductible, non-capital expenses pursuant to § 1367(a)(2)(D). Thus, a § 311(a) loss will reduce shareholders' bases in S corporation stock, and the S corporation must reduce its accumulated adjustments account.

II.Q.7.h.iv. Taxpayer Win in *Cox Enterprises* When IRS Asserted That Contributing Property to Partnership Constituted Distribution to Shareholders (2009)

The *Cox* court held that a corporation's contribution of a television station to a partnership did not constitute a dividend even though the partnership interest it received was originally worth $60.5 million less than the assets it contributed. The partners in the partnership were the remaindermen of certain trusts. These trusts, indirectly and collectively, owned 98% of the corporation's stock.

The corporation contributed assets worth $300 million, became the managing general partner, and received a majority partnership interest, which entitled it to 55% of partnership distributable profits and liquidation proceeds up to specified base amounts and 75% of distributable profits and liquidation proceeds in excess of those base amounts. The other partners contributed assets worth $62 million and received the balance of the rights to distributions. Thus, the corporation contributed nearly 83% ($300 million divided by $362 million) of the assets and received the right to profits of 55%-75%.

The IRS argued that the transfer to the partnership should be deemed an indirect distribution to the remaindermen of the trusts and therefore a distribution to the trusts. Judge Halpern rejected the IRS' contention. First, he held that the corporation's transfer to the partnership "was not intended to provide a gratuitous economic benefit to the other partners…." Second, he held that, even if the corporation had made such a gratuitous transfer, the transfer did not benefit the shareholder trusts.

In *Cox*, several factors demonstrated that the corporation's directors did not intend a gratuitous transfer:

1. The partnership's formation had nontax business reasons. As recommended by independent consultants, the corporation tried to sell these operating assets but was unable to do so. The partnership's formation allowed the corporation to retain, for use in other areas, the working capital it had previously needed for the television station.

2. The corporation's board's executive committee adopted a resolution that the other partners be required to make cash contributions to the partnership "in an amount corresponding to the fair market value of the partnership interests acquired by" those other partners. Furthermore, the other partners' acquisition of partnership interests was to "be on terms and conditions no less favorable to" the corporation "than the terms and conditions that would apply in a similar transaction with persons who are not affiliated with" the corporation.

3. The corporation retained an outside accounting firm "to render an opinion of appropriate marketability and minority interest discounts applicable to a minority interest" in the partnership as of the date of formation. The partners made

contributions based on the appraised amount. Three years later, the corporation's management discovered errors in computing the other partners' interests in the partnership and obtained a new appraisal. The other partners made additional contributions to bring their contributions up to the appraised value.

4. The court relied on *United States v. Byrum* [3698] to find that the controlling shareholders were subject to fiduciary duties to the minority shareholders. In the *Cox* case, two percent of the stock was owned by people who were not members of the controlling family; these minority shareholders were principally employees of the corporation. Judge Halpern pointed out that the minority shareholders did not own interests in the other partners and "would not be made financially whole for the likely shortfall in income and liquidation (or sale) proceeds" if the corporation's contribution to the partnership constituted a transfer to the other partners.

The court also found that any gratuitous transfer to the other partners would not have benefitted the shareholder trusts. The remaindermen of the trusts held significant interests in the partners, so a transfer to the other partners would have accelerated the remaindermen's interests in violation of the trust agreements. Because the trusts were the controlling shareholders (and the court assumed for the sake of argument that the trustees also controlled the actions of the other board members), the trustees would have violated their fiduciary duties by accelerating the interests of the remaindermen. Thus, a gratuitous transfer to the other partners would have been detrimental to the shareholder trusts as entities and would have violated the trustees' fiduciary duties.

The court concluded that any gratuitous transfer of an interest from the corporation to the other partners did not constitute a distribution to the shareholder trusts subject to Code § 311.[3699]

Other issues relating to these parties were still before the court when Judge Halpern wrote this opinion, some of which involved the trusts themselves. Subject to any light shed by those cases, one may draw some planning tips from this case:

1. As usual, documenting a transaction very well is always advisable, particularly documentation demonstrating an intent to deal at arms-length.

2. Although the Tax Court seems to place little weight on the *Byrum* case in family limited partnership cases under Code § 2036, having nonfamily member employees hold 2% of the stock might do the trick.

3. Practitioners often wonder whether parties must contribute assets with fair market value to obtain capital accounts proportionate to their interests in profits when all partners are making their initial contributions on formation of the partnership. In this case, the majority partner (the corporation) contributed assets with value significantly in excess of the value of its partnership interest. However, the minority partners contributed assets equal to the value of their interests in the partnership. Thus, the majority partners received capital accounts that were higher relative to their interests

[3698] 408 U.S. 135, 137-138 (1972).

[3699] For information on Code § 311, see part II.Q.7.h.iii Taxation of Corporation When It Distributes Property to Shareholders.

> in profits compared with the minority partners' capital accounts relative to their respective interests in profits. Judge Halpern did not seem to recognize this issue; if he did, he did not mention it in analyzing the dividend issue.[3700] It will be interesting to see whether the companion cases consider this issue to be of consequence.

II.Q.7.h.v. Taxpayer Win in *Bross Trucking* When IRS Asserted Corporation Distribution of Goodwill to Shareholder Followed by Gift to Shareholder of New Corporation (2014)

In *Bross Trucking, Inc. v. Commissioner*,[3701] the IRS asserted that the existing corporation (Bross Trucking) distributed appreciated intangible assets to its sole shareholder, who then made a gift of the intangibles to his three sons, who organized their own[3702] corporation (LWK Trucking). The alleged value of the intangible assets would have required both filing a gift tax return and paying gift tax.

The court held:

> there are two regimes of goodwill: (1) personal goodwill developed and owned by shareholders; and (2) corporate goodwill developed and owned by the company. Bross Trucking's goodwill was primarily owned by Mr. Bross personally, and the company could not transfer any corporate goodwill to Mr. Bross in tax year 2004.

[3700] If this case is the same as TAM 200239001, then the IRS must have pressed this issue, because the TAM specifically addressed it. The judge did point out that the IRS argued, in the alternative, that the dividend was of the TV station or of a partnership interest. However, he still did not seem to notice the disproportionality on which the TAM focused.

[3701] T.C. Memo. 2014-107.

[3702] The sons were not actually the owners – it was their Roth IRAs, as the court explained:

> LWK Trucking was organized on October 1, 2003. Its stock was divided into two classes when it was organized: class A voting stock and class B nonvoting stock. Class A stock represented a 98.2% interest in LWK Trucking and class B stock represented the remaining 1.8%. In December of 2003 each of the three Bross sons established a self-directed Roth IRA. Later that month, each of the Bross sons directed his respective Roth IRA to acquire 2,000 shares of class A shares in LWK Trucking. Together, the 6,000 shares acquired by the three Roth IRAs represented all of the class A shares in LWK Trucking, giving the three sons a combined 98.2% interest in LWK Trucking.[8] The remaining class B shares were acquired by an unrelated third party.

Footnote 8 commented:

> As stated infra note 19, a discussion on the merits of this structure is not relevant to the issues in these cases and the Court does not address the validity of this transaction.

Footnote 19 stated:

> Thus, Mr. Bross could not transfer Bross Trucking assets to his three sons, and it follows that the three Bross sons could not transfer Bross Trucking assets to each of their respective Roth IRAs. Accordingly, IRS Notice 2004-8, 2004-1, C.B. 333, is outside the scope of these cases because Bross Trucking and LWK Trucking never shared any assets. Further, a discussion on the structure of the Bross sons' ownership of LWK Trucking is outside the scope of this opinion.

My understanding is that the IRS initiated this audit to explore Roth IRA issues, then focused its attack on the corporate issues, trying to get more money from the taxpayers. For more on Roth IRAs owning businesses, see part II.G.21 IRA as Business Owner.

Although a lack of non-compete agreements generally facilitates the lack of corporate goodwill,[3703] in this case regulatory action jeopardized Bross Trucking's business and

[3703] See part II.Q.1.c.iii Does Goodwill Belong to the Business or to Its Owners or Employees? Focusing on the authority cited in fn. 3048, the *Bross Trucking* court held that any goodwill associated with Bross Trucking was personally owned by its shareholder:

> The remaining attributes assigned to Bross Trucking's goodwill all stem from Mr. Bross's personal relationships. Bross Trucking's established revenue stream, its developed customer base, and the transparency of the continuing operations were all spawned from Mr. Bross's work in the road construction industry.
>
> Any established revenue stream, developed customer base, or transparency of continuing operations was a direct result of Mr. Bross's personal efforts and relationships. Like the shareholder in Martin Ice Cream Co., Mr. Bross developed the crucial relationships with the businesses' customers. Bross Trucking's customers chose to patronize the company solely because of the relationships that Mr. Bross personally forged. Mr. Bross had close, personal relationships with the owners of Bross Trucking's primary customers. For example, Mark Twain Redi-Mix, a substantial Bross Trucking customer, was owned by Mr. Bross's wife and two sons. As with the taxpayer in *Norwalk v. Commissioner*, T.C. Memo. 1998-279, it is safe to assume that Bross Trucking's customers sought Mr. Bross' personal ability and reputation when hiring Bross Trucking because he was a successful construction businessman who has been in the road construction industry since the 1960s.
>
> Bross Trucking may have had a developed revenue stream, but only as a result of Mr. Bross' having personal relationships with the customers. It follows that Bross Trucking's developed customer base was also a product of Mr. Bross' relationships. Mr. Bross was the primary impetus behind the Bross Family construction businesses, and the transparency of the continuing operations among the entities was certainly his personal handiwork. [footnote omitted] His experience and relationships with other businesses were valuable assets, but assets that he owned personally.
>
> A company does not have any corporate goodwill when all of the goodwill is attributable solely to the personal ability of an employee. See *MacDonald v. Commissioner*, 3 T.C. 720, 727 (1944); *Norwalk v. Commissioner*, T.C. Memo. 1998-279. Unlike the taxpayer's products in *Solomon v. Commissioner*, T.C. Memo. 2008-102, Bross Trucking's products did not contribute to developing the goodwill. This is demonstrated in part by the services performed by Bross Trucking. Bross Trucking's business model involved hiring independent contractors to haul equipment and supplies around the State. There were very few obstacles to obtaining authority and directly hiring the independent contractors who performed the actual work for Bross Trucking. The State of Missouri's deregulation of the trucking industry allows new entrants to easily begin trucking operations. In other words, it was not Bross Trucking's product which enticed customers to use its services because the services were not unique. *Cf. Schilbach v. Commissioner*, T.C. Memo. 1991-556 (holding that a single-shareholder-owned professional corporation possessed all of the goodwill because the corporation's services were unique and was not based on the ability of the shareholder). The expectation of continuing patronage must have been a result of the unique relationships between Mr. Bross and the customers.
>
> ….
>
> Mr. Bross did not transfer any goodwill to Bross Trucking through an employment contract or a noncompete agreement. A key employee [footnote omitted] who develops relationships for his or her employer may transfer goodwill to the employer through employment contracts or noncompete agreements. See *Martin Ice Cream Co. v. Commissioner*, 110 T.C. at 207. The transfer is evidenced by the employee's covenant to not use his or her goodwill to compete against the employer. *O'Rear v. Commissioner*, 28 B.T.A. 698, 700 (1933) ([I]t is at least doubtful whether a professional man can sell or

necessitated forming a new company.[3704] Therefore, the court held that "the sole attribute of goodwill displayed by Bross Trucking was a workforce in place, and it is

dispose of any good will which may attach to his practice except perhaps by contracting to refrain from practicing.), *aff'd*, 80 F.2d 473 (6th Cir. 1935). In other words, an employee transfers the benefit of his or her relationships to an employer when the employee cannot benefit from the relationships without the employer.

An employer has not received personal goodwill from an employee where an employer does not have a right, by contract or otherwise, to the future services of the employee. See *MacDonald v. Commissioner*, 3 T.C. at 727-728. Mr. Bross did not have an employment contract with Bross Trucking and was under no obligation to continue working for Bross Trucking. A contractual duty to continue to use his or her assets for the benefit of the company may show that an employee transferred personal goodwill to an employer for the length of the obligation. Mr. Bross, however, was under no such obligation: he was free to leave the company and take his personal assets with him. Similarly, the lack of an employment contract shows that there was not an initial obligation for Mr. Bross to transfer any of his personal assets to Bross Trucking. Bross Trucking did not take an ownership interest in Mr. Bross' goodwill from the beginning because Mr. Bross never agreed to transfer those rights. Thus, the lack of an employment contract between Mr. Bross and Bross Trucking shows that Bross Trucking did not expect to--and did not--receive personal goodwill from Mr. Bross. Accordingly, Mr. Bross' personal goodwill remained a personal asset separate from Bross Trucking's assets.

An employee may transfer personal goodwill to an employer through a covenant not to compete. See *Martin Ice Cream Co. v. Commissioner*, 110 T.C. at 207-208; *H & M Inc. v. Commissioner*, T.C. Memo. 2012-290. In those cases the Court held an employee did not transfer personal goodwill to the employer because he or she did not sign a noncompete agreement. Similar to those taxpayers, Mr. Bross never transferred any personal goodwill to Bross Trucking by signing a noncompete agreement. Much in the same way that Bross Trucking did not have any contractual expectation of continued services from Mr. Bross while he was an employee, Bross Trucking could also not expect to benefit from Mr. Bross's personal goodwill after he left the business. Mr. Bross' freedom to use his personal goodwill in direct competition with Bross Trucking if he stopped working for the company shows that he did not transfer it to Bross Trucking.

[3704] The *Bross Trucking* court stated:

Bross Trucking might have had elements of corporate goodwill at some point but had lost most of it by the time of the alleged transfer. Specifically, through various regulatory infractions Bross Trucking lost any corporate goodwill because of an impending suspension and the negative attention brought by the Bross Trucking name. During the late 1990s and early 2000s Bross Trucking was investigated extensively by the DOT and the MCRS. As a result of the investigations, Bross Trucking faced a possible suspension of operations and several fines because the authorities gave Bross Trucking unsatisfactory safety ratings. Further, the various regulatory authorities were hounding Bross Trucking to the point that LWK Trucking wanted to immediately remove the Bross name from leased trucks to avoid their being spotted and stopped.

The impending suspension would cause customers to reevaluate whether to trust Bross Trucking and continue to do business with it. Indeed, Mr. Bross expressed his concern to his attorney that Bross Trucking might not be able to perform necessary functions as a result of the suspension. Mr. Bross's solution was to find or create another business to take over the trucking needs for the Bross family businesses. This is the antithesis of goodwill: Bross Trucking could not expect continued patronage because its customers did not trust it and did not want to continue doing business with it.

Further, the lack of corporate goodwill is demonstrated by the necessity to separate LWK Trucking from Bross Trucking by hiding the Bross name on leased trucks. Trade names therefore the only attribute that the corporation could have distributed to Mr. Bross." The court rejected the IRS' assertion that Bross Trucking's intangible workforce assets were transferred to LWK Trucking[3705] or that any other transfers occurred.[3706]

> and trademarks are the embodiment of goodwill. *Canterbury v. Commissioner*, 99 T.C. 223, 252 (1992). LWK Trucking specifically chose to quickly remove the Bross Trucking name from any leased equipment to avoid confusion between the two companies. This shows that any transferred corporate goodwill was not valuable and may have actually been detrimental to LWK Trucking. In other words, LWK Trucking was trying to hide any relationship with Bross Trucking because association with the targeted company was seen in a negative light. A new company trying to use the transferred goodwill of another company would likely try to associate with the recognized company, not hide the company logo.
>
> Mr. Bross credibly testified that Bross Trucking had relationships with several national suppliers for fuel and parts, but no evidence was submitted showing that LWK Trucking benefited from any transferred supplier relationships. Further, it is unclear whether Mr. Bross or Bross Trucking cultivated the supplier relationships.
>
> ….
>
> Bross Trucking's customers had a choice of trucking options and chose to switch from Bross Trucking to LWK Trucking. Respondent's contention that Bross Trucking transferred a developed customer base and an established revenue stream is misleading because it suggests that the transfer was organized between Bross Trucking and LWK Trucking. It appears, however, that Bross Trucking's customers were interested in changing trucking providers because of the impending suspension, showing that the act was not a transfer of intangibles at the service provider level but a business choice made at the customer level. For example, forming LWK Trucking gave Mark Twain Redi-Mix, which shared ownership with LWK Trucking and one of Bross Trucking's primary customers, the option to use a trucking company with an untarnished reputation and clean service record. Thus, the facts support a finding that Bross Trucking did not transfer its customers but that the customers chose to use a new company because of Bross Trucking's troubled past.

[3705] The *Bross Trucking* court stated:

> As discussed above, the only aspect of corporate goodwill that Bross Trucking displayed was a workforce in place, but Bross Trucking did not transfer an established workforce in place to Mr. Bross. Respondent repeatedly contends that most of the Bross Trucking employees became LWK Trucking employees. The evidence, however, shows that only about 50% of LWK Trucking's employees formerly worked at Bross Trucking. The Court is unconvinced that most of a workforce in place was transferred when only 50% of the current employees were previously employees by the alleged transferor. Instead it appears that LWK Trucking assembled a workforce independent of Bross Trucking. This is demonstrated by the new key employees and services offered by LWK Trucking. Mr. Bross's sons managed LWK Trucking and also engaged in services different from those performed at Bross Trucking. For instance, in 2004 LWK Trucking started One Star Midwest, which sold GPS services, and LWK Trucking later started performing truck maintenance for third parties. Bross Trucking did not perform these services and could not have provided employees to start the separate service lines . LWK Trucking may have hired former Bross Trucking employees, but there is no evidence that these employees were transferred to LWK Trucking rather than hired away on their own merit. It is also unclear whether any of the alleged transferred employees that moved to LWK Trucking were independent contract drivers. These drivers were not obligated to work solely for Bross Trucking and in fact were almost certainly expected to have contracts with companies outside of Bross Trucking. Independent contractors' choosing to accept work from a different business is not a transfer of workers.

II.Q.7.h.vi. IRS' Conservative Roadmap: Letter Ruling 200934013

This ruling approved a corporation's contribution of marketable securities to a partnership in exchange for a partnership interest.[3707] Unlike *Cox Enterprises*, no value was shifted, although future appreciation would be effectively shifted out. This ruling followed the IRS' position that one cannot create discounts by placing assets in a partnership and then distributing all of the corporation's partnership interests to the shareholders. A family-owned S corporation ("Corp") owned 100% of the membership interests in LLC, which was disregarded as an entity separate from Corp for federal tax purposes. LLC's operations consist solely of investing in a diversified portfolio of passive investment assets, including hedge funds, mutual funds, and private equity funds. LLC has no outstanding liabilities. Shareholder A and Corp reached an agreement pursuant to which Shareholder A was admitted as a new member of LLC. Specifically, Shareholder A contributed cash to LLC in exchange for a newly issued, non-voting, preferred interest in LLC. The terms and pricing of the preferred interest were based on an independent appraiser's determination of market rate terms for similar equity investments.

For what have been represented to be valid business purposes, the following steps were proposed: (i) Corp will distribute some of its membership interests in LLC pro-rata to its stockholders (the "Distributed LLC Interests") and (ii) LLC's operating agreement will be amended to provide Corp with a share of LLC's profits disproportionate to capital in exchange for Corp providing future management services to LLC with respect to LLC's ongoing activities. Corp made the following representations with respect to this ruling request:

(a) The principal purpose of the Shareholder A contribution to LLC in exchange for a preferred membership interest was to allow Shareholder A to invest his excess cash directly in a diversified portfolio of investment assets managed by a team of

---

[3706] The *Bross Trucking* court stated:

> In addition, Bross Trucking did not distribute any cash assets and retained all the necessary licenses and insurance to continue business. Further, Mr. Bross remained associated with Bross Trucking and was not involved in operating or owning LWK Trucking. He was free to compete against LWK Trucking and use every cultivated relationship in order to do so. In other words, the fact that Bross Trucking could have resumed its hauling business supports the view that it retained any corporate intangibles. Accordingly, there was no transfer of intangible assets because Bross Trucking's customers chose to use a different company and Bross Trucking remained a going concern.
>
> LWK Trucking did not benefit from any of Bross Trucking's assets or relationships. LWK Trucking was independently licensed and developed a wholly new trucking company. LWK Trucking did not take a transferred basis in any assets such as property or purchased authority. There is no indication that LWK Trucking used any relationship that Mr. Bross personally forged. The Bross sons were in a similarly close capacity to Bross Trucking's customers to develop relationships apart from Mr. Bross. Cultivating and profiting from independently created relationships are not, however, the same as receiving transferred goodwill. It is true that LWK Trucking's and Bross Trucking's customers were similar, but it does not mean that Bross Trucking transferred goodwill; instead the record shows that LWK Trucking's employees created their own goodwill.

[3707] For more information on preferred partnerships, see part II.H.11 Preferred Partnership to Obtain Basis Step-Up on Retained Portion.

experienced professionals, in a manner that allows Shareholder A to enjoy a high rate of preferred return and a priority on distributions. The principal purposes of the Proposed Transaction are to: (1) increase flexibility with respect to the allocation of profits, losses, and cash distributions associated with the LLC asset pool through issuance of various classes of interests in LLC, (2) provide increased liability protection to the LLC asset pool from the ongoing business operations of Corp, (3) facilitate estate planning and charitable objectives of Corp shareholders with respect to their investment in LLC, and (4) facilitate continued co-investment amongst family members outside of Corp.

b) Shareholder A cannot independently cause Corp to distribute its interest in LLC. Additionally, Shareholder A's contribution to LLC was not dependent upon the consummation of the Proposed Transaction and the Corp stockholders had not ratified the Proposed Transaction as of the date of the ruling request.

(c) Following the Proposed Transaction, it is intended that LLC will continue to carry on the operations that were carried on by LLC before the Proposed Transaction.

(d) At the time of the Proposed Transaction, there will be no amounts payable or receivable between LLC and Corp or LLC and Shareholder A.

(e) For purposes of measuring the Code § 311(b) gain to Corp on the Proposed Transaction, if any, the Distributed LLC interests will be valued as a percentage of the value of the assets held by LLC.[3708]

(f) To the best of Corp's knowledge and belief, there is no plan or intention for any transferor to transfer assets to LLC other than cash and/or a diversified portfolio of stocks and securities.[3709]

(g) The assets of LLC immediately prior to the admission of Shareholder A consisted of a diversified portfolio of stocks and securities.[3710]

(h) There is no intention following the Proposed Transaction to dispose of any material assets of LLC (other than dispositions in the ordinary course of business).

(i) To the best of Corp's knowledge and belief, the Corp stockholders have no plan or intention to dispose of any portion of the distributed LLC interests except for the potential transfer to irrevocable trusts which will be taxed as grantor trusts to the respective grantor.

(j) LLC has not, and will not, elect to be classified as a corporation.

[3708] Citing *Pope & Talbot, Inc. v. Commissioner*, 104 T.C. 574 (1995), aff'd 162 F.3d 1236 (9th Cir. 1999). See part II.Q.7.h.iii Taxation of Corporation When It Distributes Property to Shareholders.

[3709] For this representation, a portfolio of stocks and securities is diversified under Reg. § 1.351-1(c)(6)(i) if it satisfies the 25% and 50% tests of Code § 368(a)(2)(F)(ii), applying the relevant provisions of Code § 368(a)(2)(F)(ii), except that in applying Code § 368(a)(2)(F)(iv), government securities are included in determining total assets unless government securities are acquired to satisfy the requirements of Code § 368(a)(2)(F)(ii).

[3710] As defined under Reg. § 1.351-1(c)(6)(i).

(k) No property, other than cash, has ever been contributed by Corp to LLC, and LLC has never made a distribution of property to Corp.

The IRS ruled:[3711]

- The admission of Shareholder A to LLC caused LLC to convert to a partnership for U.S. federal income tax purposes. Corp, as the sole owner of LLC prior to the admission of Shareholder A, is deemed to contribute the existing assets of LLC to the newly-formed LLC partnership in exchange for a membership interest in LLC.[3712] This deemed transaction is treated as a nontaxable contribution of property to LLC by Corp.[3713] Additionally, because the assets of LLC are represented to be a diversified portfolio of assets, Code § 721(b) does not cause taxation with respect to Shareholder A's contribution of cash and to Corp's deemed contribution of property to LLC.

- Corp's adjusted basis in the Distributed LLC Interests is equal to the product of (A) the amount of Corp's adjusted tax basis in its entire membership interest in LLC and (B) a fraction, the numerator of which is the fair market value of the Distributed LLC Interests on the date of the distribution, and the denominator of which is the fair market value of Corp's entire membership interest in LLC as of that date.

- Corp will recognize gain, if any, on the pro-rata distribution of the Distributed LLC Interests to its stockholders to the extent the fair market value of the Distributed LLC Interests exceeds their adjusted tax basis in the hands of Corp on the date of the distribution.[3714]

II.Q.7.h.vii. What We Learned

The *Cox* case represented a significant shift in value from the corporation to the shareholders' family members. The corporation's contribution was based on a full pro-rata share of its interest in the partnership, but the family members' contribution was based on the discounted value of its interest in the partnership. The IRS argued that the value shift was a disguised dividend to the shareholders, who wanted to benefit their family members, but the taxpayer convinced the court of the transaction's strong business purpose. The IRS would probably attack similar transactions, so tax advisors should go to extra lengths to document a strong business purpose and warn clients of the risks.

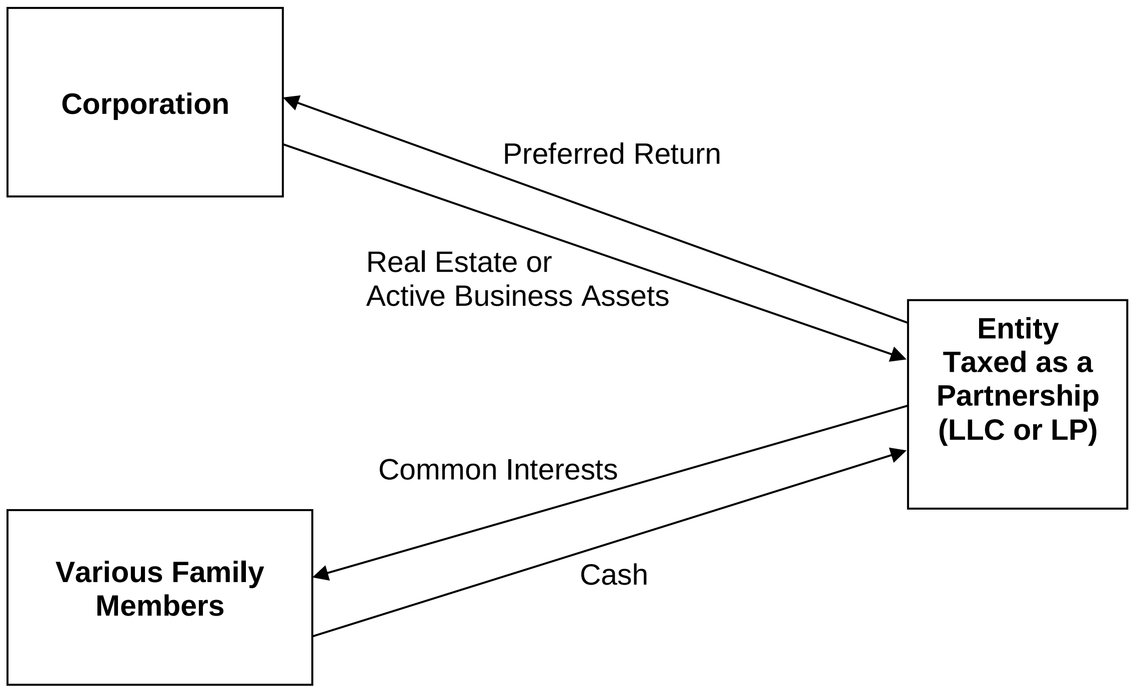
The Letter Ruling shows what the IRS is willing to approve. The IRS continues to want to treat a distribution of a recently formed partnership to its shareholders as if the corporation owned and was distributing the partnership's underlying property. Corporations might want to consider waiting for a while after forming the partnership, then they might consider selling the partnership interests to shareholders at various

[3711] The IRS also ruled regarding Code § 2701 – that a preferred payment right, the rate at which changes over time, was not a qualified payment right except to the extent that a qualified payment right election is made. Reg. § 25.2701-2(b)(6).
[3712] Rev. Rul. 99-5.
[3713] Code § 721(a).
[3714] Code § 311(b). See part II.Q.7.h.iii Taxation of Corporation When It Distributes Property to Shareholders.

times in separate minority blocks of the partnership, but again they should be prepared for an IRS attack.

II.Q.7.h.viii. Value Freeze as Conservative Alternative

Consider the following structure:



The corporation contributes the real estate or other business assets to a partnership,[3715] taking in return a large preferred partnership interest, with the other partners receiving a common interest in the partnership (an interest in whatever is left whenever the preferred payment obligations have been satisfied). Thus, any total return (appreciation plus cash flow) that exceeds the preferred interest will be outside of the corporation. Moving to this structure is diagrammed in part II.E.7.c Flowcharts: Migrating Existing Corporation into Preferred Structure, culminating in the above structure, which is shown at part II.E.7.c.ii Moving New LLC into Preferred Structure.

The preferred return is to be satisfied out of the partnership's net cash flow and payable at the AFR or another appropriate fixed rate. The preferred return should be cumulative and payable on a periodic basis (at least annually) to constitute a qualified payment

[3715] If the owners perceive difficulty in transferring all of its assets, the owners can form an identical corporation, contribute all of the stock in the old corporation to the new corporation, then merge or convert the old corporation into an LLC owned solely by the new corporation. This first step should constitute a nontaxable F reorganization; see part II.P.3.i Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization. The LLC can be the main organization in which the owners are separately admitted as members, but in most cases the corporation would just contribute its interest as the LLC's sole member to a limited partnership. See part II.E Recommended Structure for Entities.

under Code § 2701.[3716] For more information on preferred partnerships, see part II.H.11 Preferred Partnership to Obtain Basis Step-Up on Retained Portion. Also, be sure that the preferred partner has more economic risk than that undertaken by a lender.[3717]

If the corporation is receiving a return whose present value is equal to the value of the contributed goodwill (if any), it should not be treated as having distributed such goodwill to its shareholders. Using a preferred partnership adds safety, in that a corporation can easily escape the disguised sale rules. If the preferred profits distribution is payable at no more than 150% of the AFR and is limited to the extent of operating cash flow, each of two regulations[3718] separately creates a presumption that a sale has not occurred.[3719]

[3716] Reg. § 25.2701-2(b)(6)(i)(B).

[3717] *Chemtech Royalty Associates, L.P. v. U.S.*, 114 A.F.T.R.2d 2014-5940 (5th Cir 2014) (1% partnership interest by provider of capital was not sufficient to make provider a partner where partner's preferred return was virtually certain to be paid and 99% partner indemnified provider for any losses; partnership lacked economic substance). Dow provided the partnership with a stable revenue stream and indemnified the banks that provided the capital against any liabilities the partnership incurred:

> First, the transactions were structured to ensure that Dow paid the foreign banks a fixed annual return on their investment regardless of the success of the [Chemtech] venture, just as in the transaction in *Castle Harbour II*….
>
> Second, Dow agreed to bear all of the non-insignificant risks arising out of the Chemtech transactions, which further shows that the parties did not intend to share any possible losses….
>
> Third, just as in *Castle Harbour II*, the foreign banks did not meaningfully share in any potential upside.

The court pointed out:

> As a practical matter, payment of less than the full priority return was highly unlikely because (i) the minimum royalty payments from Dow sufficiently funded the priority return, and (ii) Chemtech could not incur more than $1 million in annual expenses without the banks' approval.

Also, regarding penalties, the court held that:

> the district court erred in foreclosing the applicability of both the substantial-valuation and gross-valuation misstatement penalties. We remand for the court to determine whether to impose either or both of those penalties. We express no opinion on whether the court erred in imposing the negligence and substantial-understatement penalties. On remand, the court should consider the extent to which imposing those penalties remains consistent with this opinion.

Although the court held that the partnership lacked economic substance, no consideration appears to have been given to the penalty described in part II.G.16 Economic Substance.

Also note that the *Castle Harbour* trial court refused to uphold negligence penalties on the taxpayer's actions, *TIFD III-E, Inc. v. U.S.*, 113 A.F.T.R.2d 2014-1557 (D.C. Conn.), which is analyzed by Lipton, *Castle Harbour* V—The Government Loses (Again) in the District Court, *Journal of Taxation* (Oct. 2014).

[3718] Reg. §§ 1.707-4(a)(2) and 1.707-4(b), discussed further in part II.M.3.e Exception: Disguised Sale.

[3719] As discussed in part II.M.3.e Exception: Disguised Sale, it is unlikely that the partnership anti-abuse rules would come into play. The transaction is consistent with the intent of the partnership income tax rules:

- The partnership must be bona fide, and each transaction must have a substantial business purpose. The proposed transaction splits income for generally around 5 years, and it provides the old owner with a way to take control over the business more quickly if the

Although technically not necessary, giving the corporation a small but significant profits interest in the partnership would help show that the corporation really is a partner.

Although one might be inclined to use an LLC, a limited partnership is better if the partnership engages in a trade or business, to help avoid self-employment tax.[3720] When using a limited partnership, consider using an entity taxed as an S corporation for the general partner and conducting business through various single-member LLCs that the limited partnership owns.[3721] For more description showing how to move in such a structure, see part II.E.7 Migrating into Partnership Structure, especially part II.E.7.c Flowcharts: Migrating Existing Corporation into Preferred Structure.

Be careful about possible changes in accounting method. For example, if a cash method C corporation contributes its business to a partnership, the partnership might not be able to continue using the cash method;[3722] for example, if the corporation were a personal service corporation[3723] before the transaction and all of its personal service activities were moved to the partnership, the corporation might no longer qualify and therefore the partnership might not qualify as well. The corporation can avoid this limitation by making an S election[3724] but needs to plan around the built-in gain tax.[3725]

If the corporation has subsidiaries, the subsidiaries could convert to single-member disregarded LLCs, then do a tax-free liquidation;[3726] if the parent and subsidiaries file a consolidated return, be sure that the subsidiaries do not have any excess loss accounts[3727] or deferred intercompany transactions.[3728] Before the liquidation, the parent might consider contributing to the subsidiary any obligations of the subsidiary that the

---

transaction does not work out than in a traditional sale. The new owner benefits by minimizing his risk, in that he is not personally liable. These are substantial, practical business issues.

- <u>The form of each transaction must be respected under substance over form principles.</u> No games are being played here: the parties have every incentive to ensure that the new entity's cash flow is distributed as promised in the transaction.
- <u>Clear reflection of income.</u> All distributions the old owner receives are being taxed. The new owner is not being taxed on income the new owner does not receive.

For more information on possible attacks, see fn. 2515.

[3721] See part II.E Recommended Structure for Entities.

[3722] Code § 448(a)(2).

[3723] See part II.G.9 Personal Service Corporations.

[3724] See generally part II.P.3.c Conversion from C Corporation to S corporation.

[3725] See part II.P.3.c.ii Built-in Gain Tax.

[3726] Code §§ 332, 337. See 784 T.M. *Corporation Liquidations*; Bittker & Eustice, *Federal Income Taxation of Corporations & Shareholders* (WG&L), Chapter 10: Complete Liquidations and Other Taxable Dispositions of Corporate Stock and Assets in Bulk, part B. Subsidiary Liquidations.

[3727] Reg. § 1.1502-19. See Hennessey, Yates, Banks & Pellervo, The Consolidated Tax Return (WG&L), ¶13.04. Excess-Loss Accounts.

[3728] Reg. § 1.1502-13 (intercompany transactions). I am not an expert in Code § 332 and consolidated returns; one of my partners told me to watch for excess loss accounts or deferred intercompany transactions. The concept is that certain transactions not recognized in a consolidated environment are recognized when a corporation leaves the consolidated group – in this case, by liquidating a subsidiary.

parent holds or cancelling them outright,[3729] particularly as needed to cause them to have a positive net worth on liquidation.[3730] If the corporation has affiliated corporations, they might combine in a tax-free reorganization[3731] before forming the new entity, so that only one corporation remains as the general partner; each corporation that does not survive the merger as a corporation could survive as an LLC (disregarded for tax purposes) wholly owned by the surviving corporation and then contributed to the limited partnership intact as an LLC that is then wholly owned by the partnership. Generally, among other requirements, reorganizations require a continuity of business to be tax-free; this continuity can be satisfied when the acquired business is continued through the new partnership.[3732] Consider the effect of mergers on accounting methods, in that affiliated corporations using different accounting methods might need to change in some manner when combined into a single taxpayer.

If any owners are members of the same family or if any owner might split up his ownership in the corporate general partner from his interest as a limited partner when making transfers to family members, see parts III.B.7.b Code § 2701 Overview and III.B.7.c Code § 2701 Interaction with Income Tax Planning.

Transferring the common interest in a preferred partnership is less tax-efficient than selling (to an irrevocable grantor trust)[3733] an interest in a partnership that just has one class of owners, because (appraisers tell us that) the return required on an equity interest in a partnership generally is significantly higher than the AFR. However, a traditional sale to an irrevocable grantor trust is not practical here, as the corporation would have to form the irrevocable grantor trust for its benefit,[3734] which would undermine the whole concept of getting the property out of corporate solution.

II.Q.7.h.ix. Value Freeze as Alternative to Code § 355 Division

Consider separately applying part II.Q.7.h.viii Value Freeze as Conservative Alternative to different lines of business or groups of assets to split up future growth in each line or group.

[3729] See Reg. § 1.332-7 if the parent does not do this. In a consolidated return environment, the parent can take a bad debt deduction based on the partial or complete worthlessness of the debt. Reg. § 1.1502-13(g)(7), Example 3(iii). For more details, see 784 T.M. *Corporate Liquidations*, part IV Tax Treatment of Intercorporate Debt in a Liquidation of a Subsidiary.

[3730] See 784 T.M. Corporate Liquidations, III. Subsidiary Liquidations Not Qualifying Under §332, C. Insolvent Subsidiary. Reg. § 1.332-2(b) provides:

> Section 332 applies only to those cases in which the recipient corporation receives at least partial payment for the stock which it owns in the liquidating corporation. If section 332 is not applicable, see section 165(g) relative to allowance of losses on worthless securities.

[3731] Code § 368.

[3732] Reg. § 1.368-1(d)(4)(iii)(A).

[3733] As described in part III.B.2 Grantor Trust Planning, Including GRAT vs. Sale to Irrevocable Grantor Trust.

[3734] If a corporation makes a gratuitous transfer to a trust that is not for a business purpose of the corporation but is for the personal purposes of one or more of the shareholders, the gratuitous transfer will be treated as a constructive distribution to such shareholders under federal tax principles and the shareholders will be treated as the grantors of the trust. Reg. § 1.671-2(e)(4). See part II.D.2 Business Entity as Grantor of Trust.

The common (non-preferred) interests might be owned by those who have the most interest in particular lines or groups.

Alternatively, each subsidiary depicted at the bottom of part II.E.6 Recommended Partnership Structure – Flowchart can remain wholly owned but might have a separate incentive plan, such as the partnership equivalent of a stock appreciation right.[3735]

None of these alternatives provides the clean break, disentangling shareholders from each other, provided by part II.Q.7.f Corporate Division Into More Than One Corporation.

II.Q.7.i. Distribution or Sale to Shareholder to Defer Gain on the Sale of Corporate Assets and Perhaps Avoid Double Taxation on Part

Consider forming a partnership, using one of the techniques described in part II.Q.7.h Distributing Assets; Drop-Down into Partnership, more than two years before selling property.

The corporation then might sell the partnership interest using an installment note to defer tax.[3736] If the corporation is an S corporation, be sure not to convert capital gain into ordinary income by using depreciable or amortizable assets.[3737]

The partnership's tax return for the year of the sale of the partnership interest (or before) would elect to step-up the basis of its underlying assets.[3738]

If and to the extent that the corporation is a C corporation that can sell the partnership interest at a discount relative to the partnership's underlying assets, that discount reduces income subject to C corporation income tax.

Be careful if the corporation is an S corporation that was a C corporation within the past 10 years.[3739]

II.Q.7.j. Exclusion of Gain on the Sale of Certain Stock in a C Corporation

II.Q.7.j.i. Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation

This part II.Q.7.j applies to stock issued on or after August 11, 1993. The amount of gain that is subject to partial or complete exclusion from income cannot exceed the greater of:[3740]

[3735] See part II.M.4.g Options to Acquire Equity, especially the text accompanying fn. 2688. See also part III.B.7.c Code § 2701 Interaction with Income Tax Planning.
[3736] See parts II.Q.3 Deferring Tax on Lump Sum Payout Expected More than Two Years in the Future and II.Q.8.e.ii Transfer of Partnership Interests: Effect on Transferring Partner.
[3737] See part II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill).
[3738] See part II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754 Election or Required Adjustment for Built-in Loss).
[3739] See part II.P.3.c.ii Built-in Gain Tax.
[3740] Code § 1202(b)(1).

(A) $10 million ($5 million for married filing separately)[3741] reduced by the aggregate amount of eligible gain taken into account under this rule for prior taxable years and attributable to dispositions of stock issued by such corporation, or

(B) 10 times the aggregate adjusted bases[3742] of qualified small business stock issued by such corporation and disposed of by the taxpayer during the taxable year.

A taxpayer who wishes to try to exceed these limitations might transfer stock to family members or others by gift before the stock appreciates, and presumably each donee would separately apply the limitation.[3743]

For "qualified small business stock" issued after September 27, 2010 and held for more than five years, Code § 1202 excludes from income all of the gain from its sale or exchange.

For "qualified small business stock" issued before September 28, 2010 and held for more than five years, Code § 1202 excludes from income a portion of the gain from its sale or exchange:

- If the above and other requirements are satisfied, then the portion excluded from income is 50% for stock (60% for gain attributable to an empowerment zone business) acquired before February 18, 2009 and 75% for stock acquired on or after or on or before September 27, 2010.[3744]

- Any gain that is not excluded is subject to 28% tax instead of the usual, lower capital gain rates.[3745]

- Note also that taxable gain from the sale of C corporation stock is subject to the 3.8% tax on net investment income,[3746] whereas gain on the sale of a partnership or S corporation stock engaged in a trade or business is largely excluded from that tax.[3747]

Alternative minimum taxable income includes 7% of the amount excluded from regular taxable income.[3748]

Code § 1045 allows a taxpayer to rollover the gain into new qualified small business stock. Levun describes the Code § 1045 rollover:[3749]

3741 Code § 1202(b)(3).
3742 Only the basis on the date of issuance counts for purposes of this test. See the flush language at the end of Code § 1202(b)(1).
3743 See Code § 1202(h), discussed at fns. 3792-3793.
3744 Code § 1202(a).
3745 Compare Code § 1(h)(4) (tax on Code § 1202 gain) to Code § 1(h)(1) (tax on capital gains generally).
3746 See part II.I 3.8% Tax on Excess Net Investment Income (NII).
3747 See part II.I.8.e NII Components of Gain on the Sale of an Interest in a Partnership or S Corporation.
3748 Code § 57(a)(7).

1. The QSBC stock being sold must have been held for more than six months (i.e., the five-year QSBC stock holding period requirement only applies to obtain the QSBC gain exclusion).

2. There is a 60-day period to roll over into qualifying replacement QSBC stock. Note that the taxpayer can hold the proceeds of sale during this period—there is no qualified escrow or qualified intermediary requirements, as there are with respect to like-kind exchanges under Code Sec. 1031.

3. Gain is recognized to the extent of the lesser of gain realized or "boot" received (the same as under the Code Sec. 1031 rules—there is no basis offset against boot).

4. The tax basis of the replacement stock is its purchase price less excluded gain.

5. The holding period of the replacement QSBC stock includes the holding period of the QSBC stock that was sold.

6. The active business requirement of Code Sec. 1202(c) only needs to be met for a period of more than the first six months after the rollover stock is acquired.

"Qualified small business stock" means any stock in a C corporation which the taxpayer acquires on original issue by a qualified small business either in exchange for money or other property (not including stock) or as compensation for services provided to such corporation (other than services performed as an underwriter of such stock).[3750]

If any stock in a corporation is acquired solely through the conversion of other stock in such corporation which is qualified small business stock in the hands of the taxpayer, the stock so acquired is treated as qualified small business stock in the hands of the taxpayer and is treated as having been held during the period during which the converted stock was held.[3751]

Special rules apply to C corporation stock owned by certain pass-through entities.[3752] If any amount included in gross income by reason of holding an interest in a pass- through entity meets the requirements of the following sentence, the amount shall be treated as Code § 1202(a) gain and, for purposes of applying Code § 1202(b), such amount shall be treated as gain from a disposition of stock in the corporation issuing the stock disposed of by the pass-thru entity and the taxpayer's proportionate share of the adjusted basis of the pass-through entity in such stock shall be taken into account.[3753]

[3749] See fn. 3823. Also, Rev. Proc. 98-48 explains how to elect Code § 1045 deferral, the deadline for which may be extended using Reg. § 301.9100-3 relief (see, *e.g.*, Letter Ruling 201650010). Reg. § 1.045-1 provides rules for partnerships and supersedes Rev. Proc. 98-48 to that extent (see T.D. 9353 8/14/2007).
[3750] Code § 1202(c)(1).
[3751] Code § 1202(f).
[3752] Code § 1202(g). Code § 1202(g)(4) defines such a pass-through entity as any partnership, any S corporation, any regulated investment company, or any common trust fund.
[3753] Code § 1202(g)(1).

The amount must be attributable to gain on the sale or exchange by the pass-through entity of stock which is qualified small business stock in the hands of such entity (determined by treating such entity as an individual) and which was held by such entity for more than 5 years, and such amount must be includible in the gross income of the taxpayer by reason of the holding of an interest in such entity which was held by the taxpayer on the date on which such pass-through entity acquired such stock and at all times thereafter before the disposition of such stock by such pass-through entity.[3754] This gain exclusion does not apply to any amount to the extent such amount exceeds the amount to this rule would have applied if the amount were determined by reference to the interest the taxpayer held in the pass-through entity on the date the qualified small business stock was acquired.[3755]

The original issuance requirement means that stock bought from another shareholder would not qualify. May one avoid this prohibition by redeeming the seller and issuing stock to the buyer? Code § 1202(c)(3) imposes a waiting period related to redemption activity. Stock is disqualified if, at any time within 2 years before or after the issuance of such stock, the corporation issuing such stock purchased (directly or indirectly) any of its stock from the taxpayer or from a person related[3756] to the taxpayer.[3757] In applying the preceding sentence, one can ignore stock acquired from the taxpayer or a related person if the aggregate amount paid for the stock does not exceed $10,000 and no more than 2% of the stock held by the taxpayer and related persons is acquired.[3758] Also, stock is disqualified if, within the year before or after the issuance of such stock, the corporation made one or more purchases of its stock with an aggregate value (as of the time of the respective purchases) exceeding 5% of the aggregate value of all of its stock as of the beginning of that 2-year period.[3759] The preceding sentence has a similar de minimis rule.[3760] Although generally a shareholder who transfers stock to an employee or independent contractor (or to a beneficiary of an employee or independent contractor) is treated has transferring the stock to the corporation and the corporation then transferring the stock to the employee or independent contractor,[3761] any such deemed

[3754] Code § 1202(g)(2).

[3755] Code § 1202(g)(3).

[3756] Within the meaning of Code § 267(b) or 707(b).

[3757] Code § 1202(c)(3)(A).

[3758] Reg. § 1.1202-2(a)(2), which further provides:

> The following rules apply for purposes of determining whether the 2-percent limit is exceeded. The percentage of stock acquired in any single purchase is determined by dividing the stock's value (as of the time of purchase) by the value (as of the time of purchase) of all stock held (directly or indirectly) by the taxpayer and related persons immediately before the purchase. The percentage of stock acquired in multiple purchases is the sum of the percentages determined for each separate purchase.

[3759] Code § 1202(c)(3)(B).

[3760] Reg. § 1.1202-2(b)(2) provides that, for purposes of this exception:

> … stock exceeds a de minimis amount only if the aggregate amount paid for the stock exceeds $10,000 and more than 2 percent of all outstanding stock is purchased. The following rules apply for purposes of determining whether the 2-percent limit is exceeded. The percentage of the stock acquired in any single purchase is determined by dividing the stock's value (as of the time of purchase) by the value (as of the time of purchase) of all stock outstanding immediately before the purchase. The percentage of stock acquired in multiple purchases is the sum of the percentages determined for each separate purchase.

[3761] Reg. § 1.83-6(d)(1).

transfer to the corporation is not treated as such for purposes of the anti-redemption rules.[3762] The anti-redemption rules also are not triggered by any of the following:

- The stock was acquired by the seller in connection with the performance of services as an employee or director and the stock is purchased from the seller incident to the seller's retirement or other bona fide termination of such services.[3763]

- Before a decedent's death, the stock (or an option to acquire the stock) was held by the decedent or the decedent's spouse (or by both), by the decedent and joint tenant, or by a trust revocable by the decedent or the decedent's spouse (or by both), and the stock is purchased from the decedent's estate, beneficiary (whether by bequest or lifetime gift), heir, surviving joint tenant, or surviving spouse, or from a trust established by the decedent or decedent's spouse; and the stock is purchased within 3 years and 9 months from the date of the decedent's death.[3764]

- The stock is purchased incident to the disability or mental incompetency of the selling shareholder.[3765]

- The stock is purchased incident to the divorce (within the meaning of Code § 1041(c)) of the selling shareholder.[3766]

During substantially all of the taxpayer's holding period for such stock, the corporation must be a C corporation and use at least 80% (by value) of its assets in the active conduct of one or more qualified trades or businesses.[3767] See part II.Q.7.j.ii Limitation on Assets a Qualified Small Business May Hold.

The corporation's aggregate gross assets cannot have a basis (including cash) exceeding $50 million (at or before issuance – see footnote for details).[3768]

[3762] Reg § 1.1202-2(c).

[3763] Reg. § 1.1202-2(d)(1)(i).

[3764] Reg. § 1.1202-2(d)(2).

[3765] Reg. § 1.1202-2(d)(3).

[3766] Reg. § 1.1202-2(d)(4).

[3767] Code § 1202(c)(2)(A), (e). The taxpayer must affirmatively prove what the business assets are and that they met this 80% test. *Holmes v. Commissioner*, T.C. Memo. 2012-251, held:

> The record is again devoid of documentary evidence showing the amount of corporate assets owned during the years in which he held the stock and the amount of those assets used in its business of providing on demand physician practice management software. In fact, the only evidence in the record concerning LeonardoMD's business is a stipulated paragraph describing its business as providing on demand physician practice management software delivered over the Web, and petitioner's above-cited testimony. We cannot, on the basis of uncorroborated testimony and a stipulation that does not rule out inactive business assets and income, reasonably conclude that petitioner met his burden of proving that, during substantially all of his holding period for LeonardoMD stock, the corporation used at least 80% of its assets in the active conduct of one or more qualified trades or businesses.

[3768] Code § 1202(d). This applies to gross assets at all times on or after the date of the enactment of the Revenue Reconciliation Act of 1993 and before the issuance, as well as immediately after the issuance (determined by taking into account amounts received in the issuance).

The following businesses are not eligible for this treatment:[3769]

- any trade or business involving the performance of services in the fields of health, [3770] law, engineering, architecture, accounting, actuarial science,

---

[3769] Code § 1202(e)(3).

[3770] Letter Ruling 201436001 held that the health service and related exclusion did not apply to the taxpayer:

> Section 1202(e)(3) excludes various service industries and specified non-service industries from the term qualified trade or business. Thus, a qualified trade or business cannot be primarily within service industries, such as restaurants or hotels or the providing of legal or medical services. In addition, § 1202(e)(3) excludes businesses where the principal asset of the business is the reputation or skill of one or more of its employees. This works to exclude, for example, consulting firms, law firms, and financial asset management firms. Thus, the thrust of § 1202(e)(3) is that businesses are not qualified trades or businesses if they offer value to customers primarily in the form of services, whether those services are the providing of hotel rooms, for example, or in the form of individual expertise (law firm partners).
>
> Company is not in the business of offering service in the form of individual expertise. Instead, Company's activities involve the deployment of specific manufacturing assets and intellectual property assets to create value for customers. Essentially, Company is a pharmaceutical industry analogue of a parts manufacturer in the automobile industry. Thus, although Company works primarily in the pharmaceutical industry, which is certainly a component of the health industry, Company does not perform services in the health industry within the meaning of § 1202(e)(3). Neither are Company's business activities within any of the prohibited categories set forth in § 1202(e)(3).

Letter Ruling 201717010 held that the health service and related exclusion did not apply to a lab:

> Company provides laboratory reports to health care professionals. However, Company's laboratory reports do not discuss diagnosis or treatment. Company neither discusses with, nor is informed by, healthcare providers about the diagnosis or treatment of a healthcare provider's patients. Company's sole function is to provide healthcare providers with a copy of its laboratory report.
>
> Company neither takes orders from nor explains laboratory tests to patients. Company's direct contact with patients is billing patients whose insurer does not pay all of the costs of a laboratory test.
>
> In addition, you represent that the skills employees bring to Company are not useful in performing X tests and that skills they develop at Company are not useful to other employers.
>
> Further, none of Company's revenue is earned in connection with patients' medical care. Other than the laboratory director [who federal law required to have certain qualifications], Company's laboratory technicians are not subject to state licensing requirements or classified as healthcare professionals by any applicable state or federal law or regulatory authority.
>
> Although Company's laboratory reports provide valuable information to healthcare providers, Company does not provide health care professionals with diagnosis or treatment recommendations for treating a healthcare professional's patients nor is Company aware of the health care provider's diagnosis or treatment of the healthcare provider's patients. In addition, the skills that Company's employees have are unique to the work they perform for Company and are not useful to other employers.
>
> Thus, based on the facts and representations submitted, we conclude that for purposes of § 1202(e)(3), Company is not in a trade or business (i) involving the performance of services in the field of health or (ii) where the principal asset of the trade or business is the reputation or skill of one or more of its employees.

performing arts,[3771] consulting,[3772] athletics, financial services, brokerage services, or any other trade or business where the principal asset of such trade or business is the reputation or skill of one or more of its employees,[3773]

- any banking, insurance, financing, leasing, investing, or similar business,
- any farming business (including the business of raising or harvesting trees),
- any business involving the production or extraction of products, such as oil, gas and mines, eligible for certain depletion deductions, or
- any business of operating a hotel, motel, restaurant, or similar business.

The corporation must be a domestic corporation other than a DISC or former DISC, corporation with respect to which an election under Code § 936 is in effect or which has a direct or indirect subsidiary with respect to which such an election is in effect, regulated investment company, real estate investment trust, REMIC, or cooperative.[3774]

For additional context, when Congress enacted Code § 199A and referred to Code § 1202(e)(3), it also looked to Code § 448. See fn. 625 in part II.E.1.c.ii Types of Income and Activities Eligible for Deduction.

[3771] For additional context regarding performing arts, when Congress enacted Code § 199A and referred to Code § 1202(e)(3), it also looked to Code § 448. See fn. 626 in part II.E.1.c.ii Types of Income and Activities Eligible for Deduction.

[3772] For additional context regarding consulting, when Congress enacted Code § 199A and referred to Code § 1202(e)(3), it also looked to Code § 448. See fn. 627 in part II.E.1.c.ii Types of Income and Activities Eligible for Deduction.

[3773] However, a commission sales business might not be disqualified under this provision. In *Owen v. Commissioner*, T.C. Memo. 2012-21, a company that sold prepaid legal service policies, including estate planning services, which were like insurance in that purchasers would get a reduced fee in legal cost by joining this prepaid legal membership, was a qualified small business. The court seemed to accept the taxpayer's testimony that, in the industry, independent contractors generally sold the products and services offered by the company. The taxpayer performed services as an executive and as a sales representative and his compensation was reported on Form W-2 (as an executive) and Form 1099-MISC (as an independent consultant who furnished services through his personal corporation that received commissions and in turn paid him using Form 1099-MISC. The court held:

> Although respondent argues that FFAEP is not qualified because one of the principal assets is the skill of Mr. Owen, the Court disagrees. While we have no doubt that the success of the Family First Companies is properly attributable to Mr. Owen and Mr. Michaels, the principal asset of the companies was the training and organizational structure; after all, it was the independent contractors, including Mr. Owen and Mr. Michaels in their commission sales hats, who sold the policies that earned the premiums, not Mr. Owen in his personal capacity.

However, ultimately this holding was moot (which did not stop the court from opining on it), because the taxpayer was trying to do a Code § 1045 rollover of gain on sale from one company to another. Although the new company qualified as described above, the company being sold did not (fn. 3782), resulting in the taxpayer losing the case. So, keep in mind the IRS' lack of incentive to appeal this holding when viewing it as instructive.

[3774] Code § 1202(e)(4).

II.Q.7.j.ii. Limitation on Assets a Qualified Small Business May Hold

The corporation must use at least 80% (by value) of its assets in the active conduct of one or more qualified trades or businesses while the corporation is an eligible corporation.[3775] A specialized small business investment company automatically meets the active business requirement.[3776]

In applying the requirement that the corporation hold active business assets, stock and debt in any subsidiary corporation are disregarded and the parent corporation is deemed to own its ratable share of the subsidiary's assets and to conduct its ratable share of the subsidiary's activities.[3777] The parent owns more than 50% of the combined voting power of all classes of stock entitled to vote, or more than 50% in value of all outstanding stock, of a corporation for the parent to be able to treat the corporation as a subsidiary.[3778] If the holding falls below this threshold, then watch out – the parent fails the active business asset test for any period during which more than 10% of the value of its assets (in excess of liabilities) consists of stock or securities in other corporations which are not subsidiaries of such corporation (other than assets described under the "working capital" exception).[3779]

Under the "working capital" exception, active business assets include assets held as a part of the reasonably required working capital needs of a qualified trade or business of the corporation, or held for investment and are reasonably expected to be used within two years to finance research and experimentation in a qualified trade or business or increases in working capital needs of a qualified trade or business.[3780] However, for periods after the corporation has been in existence for at least two years, no more than 50% of the assets of the corporation may qualify as used in the active conduct of a qualified trade or business by reason of this rule.[3781] Be careful not to start the C corporation just accumulating cash for possible business operations, which will disqualify the corporation.[3782] To avoid this issue and for other reasons as well, consider

---

[3775] Code § 1202(e)(1).

[3776] Code § 1202(c)(2)(B), referring to an eligible corporation licensed to operate under section 301(d) of the Small Business Investment Act of 1958 (as in effect on May 13, 1993).

[3777] Code § 1202(e)(5)(A).

[3778] Code § 1202(e)(5)(C).

[3779] Code § 1202(e)(5)(B).

[3780] Code § 1202(e)(6).

[3781] Code § 1202(e)(6).

[3782] *Owen v. Commissioner*, T.C. Memo. 2012-21. The court addressed the qualifications of two companies, one of which did not qualify (this footnote) and one of which did qualify (fn. 3773). In discussing why the company was not a qualified small business under Code § 1202 and therefore not eligible for a capital gain deferral under Code § 1045 (which rollover is not necessary for newer companies), the court imposed a 20% accuracy-related penalty:

> We also find that the Owens did not act with good faith with respect to the section 1045 transaction. Mr. Owen explained that it was his vision to build up J&L Gems as he had the Family First Companies; yet even as late as 2 years after the money had been deposited in the company, J&L Gems had only 16 pieces of jewelry. Mr. Owen should not in good faith have believed that deferring income tax under section 1045, by operating a business, merely involved depositing a large amount of cash in an account. Nor could he reasonably believe that using less than 8 percent of that cash to purchase inventory and selling only a part of what little inventory he did buy to his friends and coworkers was sufficient to defer the tax. Even under Mr. Owen's understanding of

instead starting as an LLC taxable as a partnership then later converting to a corporation.[3783]

A corporation also fails the active business assets test for any period during which more than 10% of the total value of its assets consists of real property which is not used in the active conduct of a qualified trade or business.[3784] In applying the preceding sentence, the ownership of, dealing in, or renting of real property is not treated as the active conduct of a qualified trade or business.[3785]

In applying the active business asset test, rights to computer software which produces active business computer software royalties[3786] are treated as an asset used in the active conduct of a trade or business.[3787]

Although Code § 1202 authorizes qualified small business stock to be held by a partnership[3788] and corporate subsidiaries,[3789] it does not discuss the corporation conducting its business through one or more partnerships. Accordingly, from a planning perspective, I would not recommend having a corporation seeking qualified small business status invest its assets in a partnership. However, if one is asked to advice an owner of a corporation that is already invested in a partnership, I would look to the active business rules for corporate split-ups, which describe when an interest in a partnership constitutes an active business asset.[3790]

Special rules apply to certain tax-free transfers.[3791] If a transfer is by gift, at death, or from a partnership,[3792] the transferee shall be treated as having acquired such stock in the same manner as the transferor and having held such stock during any continuous period immediately preceding the transfer during which it was held (or treated as held under these rules) by the transferor:[3793]

- Presumably a taxpayer whose stock's value exceeds the cap of the exclusion of gain[3794] by giving the stock to family members, each of whom could sell the stock separately.

section 1045, that he had to operate the business in good faith and reasonably, he failed to meet that requirement.

[3783] See part II.Q.7.j.iii Does the Exclusion for Sale of Certain Stock Make Being a C Corporation More Attractive Than an S Corporation or a Partnership? (especially the text accompanying fns. 3815-3821).

[3784] Code § 1202(e)(7).

[3785] Code § 1202(e)(7).

[3786] Within the meaning of Code § 543(d)(1).

[3787] Code § 1202(e)(7).

[3788] See part II.Q.7.j.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation, especially fns. 3752-3755.

[3789] See fns. 3777-3779.

[3790] See part II.Q.7.f.iii Active Business Requirement for Code § 355.

[3791] Code § 1202(h).

[3792] Code § 1202(h)(2).

[3793] Code § 1202(h)(1).

[3794] See fn. 3740.

- If the transfer is from a partnership, it must be to a partner of stock with respect to which requirements similar to the pass-through rules described above are met at the time of the transfer (without regard to the 5-year holding period requirement).[3795]

In a Code § 351 formation of a corporation or a Code § 368 reorganization, if qualified small business stock is exchanged for other stock which would not qualify as qualified small business stock but for this rule, such other stock shall be treated as qualified small business stock acquired on the date on which the exchanged stock was acquired.[3796] Unless the stock treated as qualified small business stock by reason of the preceding sentence is issued by a corporation which (as of the time of that transfer) is a qualified small business, Code § 1202 applies to gain from the sale or exchange of stock treated as qualified small business stock by reason of the preceding sentence only to the extent of the gain which would have been recognized at the time of the transfer described in the preceding sentence if Code § 351 or 368 had not applied at such time.[3797]

To the extent provided in regulations, stock in a corporation, the basis of which (in the hands of a taxpayer) is determined in whole or in part by reference to the basis in his hands of stock in such corporation which meets certain requirements or which is received in a reorganization that is a mere change in form[3798] in exchange for stock which meets such requirements, shall be treated as meeting such requirements.[3799]

Generally, built-in gain of property contributed for Code § 1202 stock will not be eligible for the Code § 1202 exclusion.[3800] A similar rule applies to the built-in gain of later contributions to capital with respect to such stock.[3801]

[3795] Code § 1202(h)(2)(C).

[3796] Code § 1202(h)(4)(A). Letter Ruling 9810010 applied Code § 1202(h)(4) to a corporate split-up that was partly tax-free under Code §§ 355(a)(1) and 368(a)(1)(D).

[3797] Code § 1202(h)(4)(B). Code § 1202(h)(4)(C) provides:

> *Successive application*. For purposes of this paragraph, stock treated as qualified small business stock under subparagraph (A) shall be so treated for subsequent transactions or reorganizations, except that the limitation of subparagraph (B) shall be applied as of the time of the first transfer to which such limitation applied (determined after the application of the second sentence of subparagraph (B)).

[3798] See part II.P.3.i Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization. Converting a corporation into an LLC taxed as a corporation was such a change. Letter Rulings 201603010-201603014.

[3799] Code § 1202(h)(3), incorporating by reference Code § 1244(d)(2).

[3800] Code § 1202(i)(1) provides that, for purposes of Code § 1202:

> *Stock exchanged for property*. In the case where the taxpayer transfers property (other than money or stock) to a corporation in exchange for stock in such corporation—
>
> (A) such stock shall be treated as having been acquired by the taxpayer on the date of such exchange, and
>
> (B) the basis of such stock in the hands of the taxpayer shall in no event be less than the fair market value of the property exchanged.

[3801] Code § 1202(i)(2) provides that, for purposes of Code § 1202:

> *Treatment of contributions to capital.* If the adjusted basis of any qualified small business stock is adjusted by reason of any contribution to capital after the date on which such stock was originally issued, in determining the amount of the adjustment by reason of such contribution, the basis of the contributed property shall in no event be treated as less than its fair market value on the date of the contribution.

If the taxpayer has an offsetting short position with respect to any qualified small business stock, Code § 1202(a) shall not apply to any gain from the sale or exchange of such stock unless the stock was held by the taxpayer for more than 5 years as of the first day on which there was such a short position, and the taxpayer elects to recognize gain as if such stock were sold on such first day for its fair market value.[3802] For purposes of the preceding sentence, the taxpayer shall be treated as having an offsetting short position with respect to any qualified small business stock if the taxpayer has made a short sale of substantially identical property, the taxpayer has acquired an option to sell substantially identical property at a fixed price, or to the extent provided in regulations, the taxpayer has entered into any other transaction which substantially reduces the risk of loss from holding such qualified small business stock; in applying this rule, any reference to the taxpayer shall be treated as including a reference to any person who is related (within the meaning of Code § 267(b) or 707(b)) to the taxpayer.[3803]

II.Q.7.j.iii. Does the Exclusion for Sale of Certain Stock Make Being a C Corporation More Attractive Than an S Corporation or a Partnership?

Does the exclusion for the sale of certain stock make being a C corporation more attractive than an S corporation or a partnership? First, we will explore when the sale of such stock has advantages, when the sale does not have advantages, and operational income tax issues.

If and to the extent that the gain on the sale of a business relates to the sale of self-created goodwill, the basis of the ownership interest does not reflect that basis, no matter what kind of entity owns the business. To that extent, the sale of such stock is more favorable than the sale of stock in an S corporation[3804] and the sale for cash of a partnership interest.[3805] However, the seller-financed sale of a partnership interest still produces better results than the sale of such stock.[3806]

[3802] Code § 1202(j)(1).

[3803] Code § 1202(j)(2).

[3804] Compare part II.Q.1.a.i.(c) with part II.Q.1.a.i.(d) (moderate tax states) and part II.Q.1.a.ii.(c) with part II.Q.1.a.ii.(d) (California).

[3805] The sale of a partnership interest for cash generally would have similar dynamics regarding goodwill as the sale of S corporation stock. The sale of a partnership interest would have a slight advantage, in that the goodwill could obtain a basis step-up (part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations and fn. 4148, unless the anti-churning rules apply per part II.Q.1.c.iv Goodwill Anti-Churning Rules, especially fn. 3068), but amortization would be over a 15-year period under Code § 197 (fn. 4043). Also, amortizing goodwill turns it into a hot asset, reducing opportunities for deferral on its sale; for more information on the sale of goodwill, including disadvantages of goodwill being amortized, see part II.Q.1.c.i Taxation When a Business Sells Goodwill; Contrast with Nonqualified Deferred Compensation.

[3806] See parts II.Q.1.a.i.(g) Partnership Use of Same Earnings as C Corporation (Either Redemption or No Tax to Seller per Part II.Q.7.j Exclusion of Gain on the Sale of Certain Stock in a C Corporation) in Sale of Goodwill and II.Q.1.a.ii.(g) Partnership Use of Same Earnings as C Corporation (Either Redemption or No Tax to Seller per Part II.Q.7.j Exclusion of Gain on the Sale of Certain Stock in a C Corporation) in Sale of Goodwill (California).

In some situations, the exclusion for the sale of certain C corporation stock does not provide any particular advantage, if and to the extent that the owner of a pass-through interest would not have gain on sale. If and to the extent that the sale of the business interest arises from reinvested earnings, the basis of a partnership interest[3807] or stock in an S corporation is increased.[3808] Furthermore, if a pass-through entity redeems only part of one's ownership, the reinvested earnings might offset part or all of the gain on the sale – perhaps even that attributable to self-created goodwill.[3809]

Furthermore, the exclusion is available only for qualified stock that is issued, gifted, or bequeathed to the taxpayer,[3810] making it unavailable to subsequent purchasers of the stock.

Many business sales are asset sales, much of which would be capital gain subjected to lower tax rates to the owners of pass-throughs and subjected to higher rates when sold by a C corporation.[3811] This is especially important when an entity sells only a business line,[3812] rather than the entire business. When the entity sells all of its assets, it might as well liquidate to take full advantage of the exclusion on the gain on sale of the stock and let the shareholders move the sale proceeds outside of a potentially risky business environment.[3813]

[3807] Code § 705. However, as described in part II.Q.8.e.ii.(a) Unitary Basis, a partner does not have the flexibility of a shareholder to pick and choose which shares to sell.

[3808] Code § 1367.

[3809] For S corporations, see part II.Q.7.b.i Redemptions or Distributions Involving S Corporations - Generally, especially fns. 3507-3509. Of course, the basis resulting reduction basis reduces the ability to take distributions and increases future gains on the sale of the stock, the latter which might not be of concern if and to the extent the stock receives a new basis on the shareholder's death. See part II.H.9 Basis Step-Up In S Corporations That Had Been C Corporations.
For partnerships, see part II.Q.8.b Partnership Redemption or Other Distribution.

[3810] See various requirements described in part II.Q.7.j.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.

[3811] See part II.A.1.a C Corporations Generally, especially fns. 5-7.

[3812] One cannot easily divide a business tax-free, sell a business line, and liquidate the corporation owning just that business lines. See part II.Q.7.f.ii Code § 355 Requirements.

[3813] See part II.F.2 Asset Protection Benefits of Dissolving the Business Entity After Asset Sale. Levun's article, cited at fn. 3823, comments:

> Note that the receipt of liquidation proceeds after a corporate asset sale also qualifies for the QSBC exclusion. However, because of the corporate-level tax exacerbated by the lack of a corporate capital gains rate, the scales would still tip in favor of flow-through taxation, notwithstanding no tax due on liquidation. In other words, assume all an entity owns is zero-basis self-created goodwill having a value of $1 million. In the case of an asset sale as an LLC, there would be federal tax due of $200,000 (assuming a 20-percent maximum capital gains rate). In the case of the same asset sale by a QSBC, while there would be no shareholder tax on the liquidation of the corporation, the corporate entity-level federal tax burden would be $340,000 (or tax at a 35-percent rate, to the extent the corporation has taxable income in excess of $10 million).

A stock sale tends to have a lower sale price than an asset sale, due to buyer's concerns about assuming undisclosed or unseen liabilities and perhaps not receiving a basis step-up in the corporation's assets.[3814]

For the effect of structure on operations, see:

- Part **Error! Reference source not found. Error! Reference source not found.** (concluding that they don't)

- Part II.E Recommended Structure for Entities (explaining why a partnership structure is better than a corporate structure).

Furthermore, if one decides that a C corporation structure is ultimately desirable, one might consider instead starting as an LLC taxable as a partnership or sole proprietorship, which enables start-up losses to be deducted more easily anyway;[3815] then, if one determines that a C corporation is the ideal structure, convert[3816] to a qualified small business corporation[3817] the earlier of five years before a sale is anticipated or shortly before the $50 million gross asset limitation is exceeded.[3818] The delay in forming the corporation can help avoid being disqualified for not deploying start-up capital quickly enough.[3819] During this initial operating period, the owners could build basis in the assets that are contributed (or deemed contributed) at the time of conversion, which basis increase might lead to a larger exclusion on the sale of the

---

[3814] Regarding the latter, see part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations, noting that the inside basis step-up may apply under part II.Q.8.e.iii.(f) Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold, the latter which is considered most attractive for S corporation holders but also may be attractive when using the Code § 1202 exclusion.

[3815] See part II.G.3 Limitations on Losses and Deductions; Loans Made or Guaranteed by an Owner, especially part II.G.3.c.iii Comparing C Corporation Loss Limitations to Those for Partnership and S Corporation Losses.

[3816] See part II.P.3.d Conversions from Partnerships and Sole Proprietorships to C Corporations or S Corporations. One might simply file Form 8832 to elect corporate taxation, assign the LLC to a corporation, or convert or merge the LLC into a corporation. As to the former, Letter Ruling 201636003 held:

> While ownership of a corporation is normally tied to stock ownership, and under state law LLC owners hold a member interest and not formal stock, the term "stock" for federal tax purposes is not restricted to cases where formal stock certificates have been issued. Rather, it has been consistent Service position that for federal tax purposes stock ownership is a matter of economic substance, *i.e.*, the right to which the owner has in management, profits, and ultimate assets of a corporation. The presence or absence of pieces of paper called "stock" representing that ownership is immaterial. See Rev. Rul. 69-591, 1969-2 C.B. 172.
>
> Therefore, based on the facts and representations submitted, we rule that the Corporation stock meets the definition of qualified small business stock under §§§ 1202(c), 1202(f) and 1202(h).

[3817] See part II.P.3.d Conversions from Partnerships and Sole Proprietorships to C Corporations or S Corporations.

[3818] See fn. 3768.

[3819] See part II.Q.7.j.ii Limitation on Assets a Qualified Small Business May Hold, especially the text accompanying fns. 3780-3782.

stock.[3820] However, if the entity accumulates debt in excess of basis, forming the corporation might be a taxable event.[3821]

For a case study on converting a partnership to a C corporation to accommodate a venture capital firm's desire for this exclusion, whether converting to a C corporation is a good idea, the Code § 1045 rollover, and issues facing recipients of profits interests on conversion,[3822] see Levun, "Using Partnerships to Leverage "Zero-Tax" Code Sec. 1202 Stock."[3823]

II.Q.7.k. Special Provisions for Loss on the Sale of Stock in a Corporation under Code § 1244

An individual[3824] may deduct the first $50,000 of loss[3825] on the sale of "section 1244 stock" as an ordinary loss, rather than a capital loss.[3826]

"Section 1244 stock" is stock of a domestic corporation if:[3827]

[3820] See part II.Q.7.j.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation, especially fn. 3742.

[3821] See parts II.M.2.b Initial Incorporation: Effect of Assumption of Liabilities and II.M.2.c Contribution of Partnership Interest to Corporation.

[3822] See part II.M.4.f Issuing a Profits Interest to an Employee. Levun, fn. 3823, points out:

> As a final observation, and somewhat of a frolic and detour, let's assume that the LLC being discussed in this column had a service provider that had been previously admitted as a partner (either by reason of (1) having received a fully vested LLC interest, (2) having received a profits interest subject to a substantial risk of forfeiture but for which the requirements of Rev. Proc. 2001-43, 2001-2 CB 191, had been satisfied or (3) having received a capital interest subject to a substantial risk of forfeiture for which a timely Code Sec. 83(b) election had been made. Also assume that, as part of the incorporation transaction contemplated above (to obtain QSBC stock), the service provider was required to agree to a substantial risk of forfeiture with respect to the C corporation stock he was now obtaining in the LLC to C corporation conversion transaction. Rev. Rul. 2007-49, 2007-2 CB 237, would require that a Code Sec. 83(b) election be made in order for the service partner to be treated as a shareholder in the corporation. This revenue ruling provides that the transfer of vested stock in exchange for nonvested stock in a tax-free corporate reorganization requires a Code Sec. 83(b) election in order for the service provider to be considered the tax owner of the shares received in the reorganization. While the revenue ruling addresses a tax-free reorganization under Code Sec. 368(a), there is no reason to believe that the result would be any different in a Code Sec. 351 transaction. Note that making a Code Sec. 83(b) election does not result in any tax to the service provider, as under the principles contained in Rev. Rul. 2007-49, the service provider would be considered to have paid an amount for the QSBC stock equal to its fair market value.

[3824] Trust, estates, and corporations are not eligible for this treatment. Code § 1244(d)(4); see Part II.J.11.b Code § 1244 Treatment Not Available for Trusts. Individuals may deduct losses flowing through partnerships if the partnerships were the original owners, and corporations may not claim this benefit. Reg. § 1.1244(a)-1(b)(2).

[3825] $100,000 if married filing jointly. Code § 1244(b).

[3826] Code § 1244(a).

[3827] Code § 1244(c).

- at the time such stock is issued, such corporation was a small business corporation,

- such stock was issued by such corporation for money or other property (other than stock and securities), and

- such corporation, during the period of its five most recent taxable years ending before the date the loss on such stock was sustained, derived more than 50% of its aggregate gross receipts from sources other than royalties, rents, dividends, interests, annuities, and sales or exchanges of stocks or securities.

The corporation cannot be capitalized with more than $1 million adjusted basis of assets.[3828]

Although it applies to the sale of stock in an S corporation, it might not provide much of a benefit, as often such a loss arises from loss due to operations and therefore was already deducted as a loss on the K-1 issued to the shareholder each year. Similarly, this provision might not provide much of a benefit when choosing whether to be taxed as a corporation instead of a partnership, as often such a loss arises from loss due to operations and therefore was already deducted as a loss on the K-1 issued to the partners each year. Furthermore, S corporation shareholders and partners in a partnership would likely obtain a current deduction for such losses, rather than having to wait until their ownership is disposed of, and they would not be required to jump through any statutory hoops similar to Code § 1244 to obtain the ordinary loss deduction. For more information on the concepts described in this paragraph, see part II.G.3 Limitations on Losses.

II.Q.7.l. Deferring Gain on Sale of Marketable Securities by Investing in a Specialized Small Business Investment Company

Generally, an individual may defer $50,000 or a corporation may defer $250,000 of gain on the sale of any publicly traded securities by reinvesting in a specialized small business investment company (SSBIC).[3829]

An SSBIC is any partnership or corporation licensed by the Small Business Administration under section 301(d) of the Small Business Investment Act of 1958 as in effect on May 13, 1993.[3830] That provision authorizes the licensing of small business investment companies organized to invest in small business concerns in such a way as to facilitate ownership by persons whose participation in the free enterprise system has been hampered by social or economic disadvantages.[3831]

[3828] Code § 1244(c)(3).
[3829] Code § 1044.
[3830] Code § 1044(c)(3).

II.Q.8. Exiting From or Dividing a Partnership

Below, a few themes emerge:

- Exiting a partnership in exchange for a portion of the partnership's assets can be a nontaxable event, in which the exiting partner's basis is reallocated among the distributed assets.[3832]

- Seller-financed redemptions for cash can save a level of capital gain tax, and the buyer and seller can come out ahead, if structured properly.

- If a partner contributes property with a basis not equal to its fair market value, and that partner or that property leaves the partnership within seven years of the contribution, beware of the tax effects!

Contrasting partnership and corporate tax-free divisions:

- A partnership division does not require a business purpose to be nontaxable, but a corporate division does. Generally, a partnership division is not taxable.[3833]

- Contrast a seven-year waiting period for partnership distributions (other than divisions) described further below with a five-year waiting period for corporate divisions. However, the waiting periods are for different reasons! In partnerships, it is to account for contributed property. In corporations, it is to make sure business activities are conducted continuously for at least five years.

Generally, the parties can designate whether a transaction constitutes a sale between partners or a redemption by the partnership.[3834]

See also part II.P.3.g Conversions from Partnership to Sole Proprietorships and Vice Versa.

II.Q.8.a. Partnership as a Master Entity

II.Q.8.a.i. Partnership Rules Allowing Basis Shifting

Partnerships provide the opportunity to shift basis from one asset to another, which can be helpful when it appears that a low basis asset will be sold; see part II.Q.8.b.i.(d) Basis in Property Distributed from a Partnership; Possible Opportunity to Shift Basis or Possible Loss in Basis When a Partnership Distributes Property.[3835]

[3832] See Abrams, Now You See It; Now You Don't: Exiting a Partnership and Making Gain Disappear, *TM Memorandum* (2/16/2009).

[3833] Reg. § 1.708-1(d).

[3834] Letter Ruling 9715008 (respecting the form of a sale between partners). The ruling relied on *Foxman v. Commissioner*, 41 T.C. 535, 551 (1964) (treating a transaction as a sale between partners), aff'd 352 F.2d 466 (3d Cir. 1965) and also cited *Cooney v. Commissioner*, 65 T.C. 101, 109 (1975) (treating a transaction as a redemption).

[3835] Paul S. Lee of Northern Trust has been exploring this idea and has called this the mother ship partnership.

However, the partnership needs to be properly seasoned, which generally means at least 7 years from the time that property is contributed to the partnership until the time property is distributed.[3836] Changes in or issuances of partnership interests when the partnership has property with basis different from fair market value can also bring this 7-year waiting period into play.[3837]

If one has considerable marketable securities that one would like to be in a partnership, one should consider placing them in a partnership that has no business assets.[3838] Although the strategy described in this part II.Q.8.a is not geared toward marketable securities, if the estate is large enough then one might consider dividing the marketable securities into a few partnerships that move in different directions and using a series of rolling, asset-splitting GRATs to shift value to the next generation.[3839] This might be a good strategy for the cash generated from an equity-stripping transaction designed to obtain a basis step-up on real estate with minimal estate tax cost.[3840]

The basis shifting opportunity might work best when few assets are involved. Furthermore, generally it requires a Code § 754 election to be in effect, and such an election requires record-keeping that is often quite complex.[3841] Thus, one might consider dividing the partnership and making the Code § 754 election only with respect to the property involved in the basis shifting strategy.[3842]

Various basis stripping strategies involve plays on differences between outside basis and inside basis.[3843] A transfer of a partnership interest allocates basis according to the

---

3836 See part II.Q.8.b.i.(e) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value.

3837 See text accompanying fn. 3932, which is part of the link from fn. 3836.

3838 Distributions of marketable securities from a partnership might be a taxable transaction. See parts II.Q.8.b.i.(a) Code § 731: General Rule for Distributions (distributions from a partnership generally do not generate income tax) and II.Q.8.b.i.(b) Code § 731(c): Distributions of Marketable Securities (Or Partnerships Holding Them) (special rules taxing such distributions). See particularly text accompanying fn. 3877 et. seq.

3839 See part III.B.2.b General Description of GRAT vs. Sale to Irrevocable Grantor Trust, especially the text accompanying fn. 4901.

3840 See part II.H.10 Extracting Equity to Fund Large Gift. This strategy requires leveraging and maintaining a security interest in loan proceeds, and placing different baskets of marketable securities into separate LLCs (that start as single member LLCs but sooner or later become taxed as partnerships) can facilitate maintaining this security interest. See part II.H.10.d Maintaining the Security Interest in the Loan Proceeds If Using a Donee Guarantee.

3841 See generally part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000.

3842 See part II.Q.8.d Partnership Division, especially fn. 4056 (division should result in identical percentage interests before and after the division for each partnership).

3843 For an example, see part II.Q.8.e.iii.(a) Illustration of Inside Basis Issue. For a more generic description of inside basis and outside basis, see my blog article, "Tax basis: The key to reducing gain on sale or deducting asset purchases," at http://www.thompsoncoburn.com/insights/blogs/business-succession-solutions/post/2017-01-10/tax-basis-the-key-to-reducing-gain-on-sale-or-deducting-asset-purchases.

value of the transferred interest, rather than according to the proportion of rights to income, distributions, etc.[3844]

One might consider having any marketable securities be held in their own partnership that qualifies as an "investment partnership." See part II.Q.8.b.i.(b) Code § 731(c): Distributions of Marketable Securities (Or Partnerships Holding Them).

Also, note that certain assets are not conducive to non-pro rata distributions of property. See part II.Q.8.b.i.(f) Code § 751 – Hot Assets. To the extent practicable, one might consider holding such assets in a separate partnership and leasing them to the businesses they serve.[3845] Consider the effect, if any, this isolation of leasing activity might have on the passive loss rules and the 3.8% net investment income tax.[3846]

Similarly, consider whether consolidating assets inside of a partnership affects the passive loss grouping rules,[3847] which impact not only the use of passive losses and credits but also the 3.8% tax on net investment income.[3848]

Check to see whether the applicable jurisdiction imposes fees or taxes on partnerships or LLCs.[3849]

II.Q.8.a.ii. Caution When Using Master Entity If Liquidity Needed to Pay Estate Tax

Estate tax generated by business interests can be deferred. Obtaining a deferral for a year or two does not require any special structuring.[3850] Obtaining longer deferrals

---

[3844] See part II.Q.8.e.ii.(a) Unitary Basis.

[3845] Leasing tangible personal property generally constitutes self-employment income, whereas leasing real generally does not. See part II.L.1 FICA: Corporation

For corporations, compensation, including any distributions re-characterized as salaries, is subject to income tax and FICA tax. Income retained by the corporation and not paid as compensation is not subject to FICA tax.

If all of the remuneration to an individual from related corporations is disbursed through the common paymaster, the total amount of FICA imposed on the employer and employee is determined as though the individual has only one employer (the common paymaster). The common paymaster is responsible for filing information and tax returns and issuing Forms W-2 with respect to wages it is considered to have paid under this rule.

For S corporations, shareholders' health insurance is deductible to the S corporation and considered compensation to owners. However, it is subject to FICA only if offered in a plan that discriminates in favor of owners. The owners may deduct health insurance subject to the same rules as partners and sole proprietors.

Income Subject to Self-Employment Tax.

[3846] See parts II.K Passive Loss Rules and II.I 3.8% Tax on Excess Net Investment Income (NII), especially II.K.1.e Rental Activities.

[3847] See part II.K.1.b Grouping Activities.

[3848] See part II.I.8 Application of 3.8% Tax to Business Income, especially part II.I.8.a.ii Passive Activity Grouping Rules.

[3849] For example, New York City imposes a 4% tax on unincorporated business organizations.

[3850] See part III.B.5.d.i Overview of Discretionary Extensions Under Section 6161.

requires the right structure and involves more uncertainty with partnerships than with corporations.[3851]

If one places assets in a master partnership, consider whether those might affect the owner's estate's ability to make a Code § 6166 to defer estate tax if the owner has insufficient liquidity.[3852] If the partnership is merely a holding entity and does not itself engage in business activity, it might be considered a nonbusiness asset ineligible for such an election.[3853]

II.Q.8.a.iii. Examples of Using Partnership to Shift Basis

II.Q.8.a.iii.(a). Applying Outside Basis to Very Low Inside Basis

Each of A, B, and C invests $500 in a partnership that uses its $1,500 capital to buy land: Parcel X for $100 and Parcel Y for $1,400.

Parcel X grows in value to $900, and Parcel Y increases in value to $1,800. Thus, the partnership's assets are worth $2,700 ($900 plus $1,800). Thus, ignoring valuation adjustments, each partner's interest is worth $900 ($2,700 divided by 3).

The partnership distributes Parcel X to C in liquidation of C's partnership interest. C's $500 basis is applied to Parcel X, increasing its basis from $100 to $500.

If a Code § 754 election is not in place, then Parcel Y's basis does not change.

Although as a group the partners have managed to increase the real estate's tax basis, C did not get a great deal. If C sells Parcel X, C recognizes a $400 gain ($900 value minus its new $500 basis). If the partnership had sold Parcel X, the $800 gain ($900 value minus $100 basis before the distribution), then each partner (including C) would recognize a $267 gain ($800 divided by 3). Thus, C would pay tax on $133 more gain ($400 minus $267) than if the partnership had not distributed Parcel X. On the other hand, C is relieved of responsibility for $133 gain inherent in Parcel Y ($1,800 value minus $1,400 basis equals $400 gain; $400 gain divided by 3 partners equals $133).

II.Q.8.a.iii.(b). Basis Stripped from Distributed Property and Applied to Remaining Property

Each of D, E, and F contributes $200 to a partnership, which uses its $600 contributions to buy land: $200 for Parcel M and $400 for Parcel N. Parcel M increases in value to $400, and Parcel N decreases in value to $200. The partnership distributes Parcel N to F in redemption of F's partnership interest. Parcel N's basis is reduced to F's $200 basis, which is a $200 ($400 basis inside the partnership minus $200 in F's hands) basis reduction. If the partnership has a Code § 754 election in place, the $200 basis

---

[3851] See part III.B.5.d.ii Code § 6166 Deferral.

[3852] See part III.B.5.d.ii Code § 6166 Deferral, especially part III.B.5.d.ii.(a) What is a Business?

[3853] Code § 6166(b)(9). Although Code § 6166(b)(8) provides special rules making corporate holding companies eligible, it does not apply to partnership holding companies. For more details, see fn. 5373.

that is stripped from Parcel N is added to the basis of Parcel M, which is increased from $200 to $400.

II.Q.8.a.iii.(c). Basis Stripped from New Property and Applied to Existing Property

Each of G, H, and I contributes $100 to a partnership, which buys Parcel T (raw land) for $300. Parcel T's value increases to $900, and the partners take advantage of this value increase by causing the partnership to borrow $600 (which is $200 debt per partner) and distribute that $600 equally to G, H and I ($600 divided by 3 equals $200 distribution each), resulting in each having a capital account of -$100 ($100 initial contribution minus $200 distribution), which also happens to equate to $100 debt in excess of basis ($200 share of debt minus $100 original capital contribution). Note that each partner's share of Parcel T's unrealized appreciation is $200, which is $600 ($900 value minus $300 basis) divided by 3.

The partnership borrows $300 to buy Parcel U (raw land) for $300. Parcel U retains its value. Thus, the partnership's net value continues to be $300, which is the excess of the $1,200 values of Parcels T ($900) and U ($300) over the partnership's debt of $900 ($600 on Parcel T and $300 on Parcel U).

The partnership distributes Parcel U to G to redeem G's partnership interest. G assumes $200 of the debt on Parcel U, and the partnership shifts $100 of the debt on Parcel U to Parcel T. Thus, G receives $100 net value ($300 value of Parcel U minus $200 debt assumed). The basis of G's partnership interest before the distribution was $200, consisting of $100 original contribution plus $300 debt (1/3 of the partnership's $900 debt before distribution) minus $200 prior cash distribution. On the distribution, G assumed $200 of debt and was relieved of $300 of debt, for a net reduction in debt of $100. This $100 net debt reduction is treated as a $100 cash distribution. Thus, the basis of G's partnership interest after the distribution is $100 ($200 basis before distribution minus $100 deemed distribution), and G recognizes no gain or loss on the redemption on G's partnership interest. After the redemption:

- Parcel U's basis is reduced from its original $300 to the $100 basis of G's partnership interest. This $200 basis strip ($300 original basis minus $100 remaining basis) from Parcel U will be applied to increase the partnership's basis in Parcel T from its initial $300 to a new $500 if the partnership has a Code § 754 election in effect.

- G winds up with Parcel U with a $300 value, $100 basis, and a $200 debt. Thus, the net value of G's position is $100 ($300 value minus $200 debt). Before the redemption, G had net debt in excess of basis of $100; after the redemption, G continues to have $100 debt in excess of basis ($200 debt minus $100 basis in Parcel U).

- The partnership has Parcel T with $900 value, $500 basis, and $700 debt ($600 from the original borrowing and $100 from Parcel U). Thus, the partnership has property with $400 value in excess of basis ($900 value minus $500 basis), which is $200 value in excess of basis per partner ($400 divided by 2 partners), the same as before the redemption. Furthermore, the partnership has $200 debt in excess of basis ($700 debt minus $500 basis), which translates to each partner having $100 debt in excess of basis ($200 divided by 2 partners).

Has the partnership made a disguised sale of Parcel U to G? See Reg. § 1.707-6(b)(2).

II.Q.8.a.iii.(d). Basis Shift When Parent Owns Large Majority

Parent owns 98%, Son owns 1%, and Daughter owns 1% of a partnership. The partnership has land that the partnership previously bought that has $100 value and $100 debt, so the partnership has net equity of zero and each partner's interest is worthless. Based on prior distributions that zeroed out everyone's basis, Parent is allocated $98 debt in excess of basis, and each of Son and Daughter is allocated $1 debt in excess of basis ($2 total).

Partnership plans to sell the property, would result in $98 gain to Parent, $1 gain to Son, and $1 gain to Daughter.

Instead, Parent contributes $25 to the partnership, which the partnership uses, together with $100 of additional borrowing to buy Parcel Q (land) for $125.

The partnership then redeems Parent, distributing Parcel Q and its associated $100 debt to Parent. Parent's basis in Parent's partnership interest before the redemption was $123, which comes from $98 original debt plus $98 new debt (98% of the $100 borrowed to buy Parcel Q) plus $25 contributed toward the purchase of Parcel Q minus $98 prior distributions. In the redemption, Parent assumed the $100 debt but was relieved of Parent's $196 ($98 original debt plus $98 new debt) share of liabilities before the redemption, the basis of Parent's partnership interest decreased by $96 ($196 liabilities relieved minus $100 liabilities assumed) to $27 ($123 minus $96). Thus, Parcel Q's basis deceases from its original $125 basis to $27 (the basis of Parent's partnership interest), a $98 reduction in basis. If the partnership has a Code § 754 election in place, this $98 basis strip from Parcel Q translates into a $98 increase in the basis of the original land.

After the redemption, each of Son and Daughter owns one half of the partnership. The partnership has the original land, with a value of $100, basis of $98, and liabilities of $100. When Parent was redeemed, Son and Daughter assumed the partnership's original debt, so their share of liabilities increases by $98 from $2 combined to $100 combined. Their basis increases correspondingly, so that, instead of having $2 debt in excess of basis, they have $98 debt in excess of basis ($100 liabilities allocated minus $2 prior distributions).

Thus, when the partnership sells the original property for $100, the partnership recognizes a $2 gain ($100 proceeds minus $98 basis), the same $2 gain that would have been allocated to Son and Daughter if Parcel Q had never come into the picture.

The difference is in Parent's treatment. Parent would have been allocated $98 gain before Parcel Q came into the picture. Now, Parent does not pay any tax on the sale of the original land. Instead, the basis of Parcel Q has been reduced by $98 because of the redemption. If Parent holds Parcel Q until death, Parcel Q's unrealized gain is wiped out by a basis step-up.

II.Q.8.b. Partnership Redemption or Other Distribution

II.Q.8.b.i. Distribution of Property by a Partnership

Distributions to a partner may be taxable under Code §§ 731, 704(c)(1)(B), and 737.[3854] After the parts describing Code § 731 are the discussions of the other two sections.

II.Q.8.b.i.(a). Code § 731: General Rule for Distributions

Partnership distributions of property are usually tax-free to both the partnership and the partner under Code § 731(a)[3855] and (b), whether current distributions or liquidating distributions.[3856]

[3854] Partnership distributions might also be subject to the anti-abuse rules (regulations issued under Code § 701), which was asserted in CCA 200650014 when a partnership acquired real estate to be distributed to a partner and that partner was allocated all of the economic risks of that real estate purchase.

[3855] A loan from a partnership to a partner who is obligated to repay the amount of the loaned money or property does not constitute a distribution subject to Code § 731 but is a loan governed by Code § 707(a). To the extent that such an obligation is canceled, the obligor partner will be considered to have received a distribution of money or property at the time of cancellation. Reg. § 1.731-1(c)(2). The partnership has taxable income or loss in an amount equal to the difference between its basis in the distributed debt and the debt's fair market value at the time of the distribution, just as if the partnership had sold the debt for this amount and distributed the sale proceeds to the distributee-partner-debtor. The distributee-partner generally does not recognize any gain on the distribution unless the amount of the distribution exceeds the basis of his interest and, unless the special liquidating distribution rule in Code § 731(a)(2) applies, does not recognize a loss; however, the distributee-partner might recognize cancellation-of-indebtedness income on the deemed purchase of the debt. McKee, Nelson & Whitmire, *Federal Taxation of Partnerships & Partners* (WG&L), ¶ 19.02[5] Distributions of a Partner's Debt to the Debtor-Partner. Letter Ruling 201314004 confirmed the Code § 731 aspects of such a distribution but did not address any other issues. The IRS treats differently partner indebtedness that the partnership bought from a third party. In that case, if the partnership distributes (in a liquidating or nonliquidating distribution) the indebtedness to the partner so that the debt is extinguished, the distribution of property rules will apply to determine the consequences for the partnership. Under Code § 61(a)(12) (and Reg. § 1.61-12(c)(2)), the partner is treated as having repurchased its indebtedness for an amount equal to the fair market value of the indebtedness and therefore will recognize capital gain or loss to the extent the fair market value of the indebtedness differs from the basis of the indebtedness determined under Code § 732. Rev. Rul. 93-7. CCA 201525010 stated, The regulations under § 752 do not determine if a debt is recourse or nonrecourse to a partnership for purposes of determining whether, upon foreclosure of the property, the partnership has cancellation of debt income under § 61(a)(12) or gains from dealings in property under § 61(a)(3). A panel at the May 2016 meeting of the ABA Section on Taxation seemed to disagree with the assumption of the parties in *Great Plains Gasification Associates v. Commissioner*, T.C. Memo. 2006-276, that certain debt was nonrecourse based on Code § 752. The author of CCA 201525010 indicated that the CCA was not just her view but rather was a consensus approach at the IRS.

A deficit capital account is not by itself sufficient to establish the creation of a loan. Similarly, the fact that on a final accounting the partners will take a deficit capital account into consideration is not sufficient to create an obligation to repay a loan. If there is no unconditional and legally enforceable obligation that requires a partner to repay any of the amounts withdrawn to the partnership on or before a determinable date, then withdrawals by that partner that created a

Exceptions to this rule include:

- Part II.Q.8.b.i.(e) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value

- Part II.Q.8.b.i.(f) Code § 751 – Hot Assets

- Part II.M.3.e Exception: Disguised Sale.

Also, Code § 731(a)(1) requires a partner to recognize gain on a monetary distribution when the distribution exceeds the partner's adjusted basis in the partnership;[3857] for the taxation of any gain, see part II.Q.8.e.ii Transfer of Partnership Interests: Effect on Transferring Partner. A reduction in a partner's share of liabilities[3858] is considered a cash payment in the amount of the liabilities discharged.[3859] The amount of gain

---

deficit in his capital account are not loans governed by Code § 707(a) but are partnership distributions received by him in his capacity as a partner. Rev. Ruls. 73-301, 81-241.

[3856] Reg. § 1.731-1(a)(1)(i).

[3857] Code § 731(a)(2) explains potential loss recognition consequences of a partnership distribution.

[3858] See part II.C.3 Allocating Liabilities (Including Debt).

[3859] Rev. Rul. 74-40, Situations 2 and 3 are most relevant, but let's look at all three for the sake of completeness. Situation 1 involved the following facts and conclusions:

> L is a limited partner in partnership GL to which he contributed $10,000 in cash on its formation. His distributive share of partnership items of income and loss is 10 percent and he is not entitled to receive any guaranteed payments. The adjusted basis of his partnership interest at the end of the current year is $20,000. His proportionate share of partnership liabilities, on which neither he, the other partners nor the partnership have assumed any personal liability, is $15,000. The partnership has no other liabilities. L sells his interest in the partnership to M, an unrelated taxpayer, for $10,000 in cash. At the time of the transaction the partnership had no unrealized receivables or inventory items described in section 751 of the Internal Revenue Code of 1954 nor any goodwill and L had been paid his distributive share of partnership income.
>
> [Citations to Code §§ 752(c) and 741 and to Reg. §§ 1.752-1(e) and 1.751-1(d) follow.]
>
> Accordingly, in the instant situation, the amount realized by L from the sale of his partnership interest is $25,000, consisting of cash in the amount of $10,000 and release from his share of partnership liabilities in the amount of $15,000. Since the adjusted basis of L's interest in the partnership is $20,000, he realized a gain of $5,000 determined under the provisions of section 741 of the Code.

Situation 2 involved the following facts and conclusions:

> The facts are the same as in situation 1, except that L withdraws from the partnership and the partnership distributes $10,000 to him in cash in complete liquidation of his interest in the partnership.
>
> [Citations to Code §§ 752(b), 731(a), 731(c) and 736 and to Reg. § 1.736-1(b)(1) follow.]
>
> Accordingly, in the instant situation, distributions to L with respect to his partnership interest total $25,000 and consist of cash in the amount of $10,000 and a decrease in his share of the partnership liabilities in the amount of $15,000 that is considered under section 752(b) of the Code as a distribution of money to L by the partnership.
>
> Furthermore, since the money distributed ($25,000) exceeds the adjusted basis of L's interest in the partnership immediately before the distribution ($20,000), he realizes a gain of $5,000 determined under the provisions of section 731(a) of the Code.

recognized is the excess of the distribution over the partner's adjusted basis;[3860] basis in a partnership interest includes any partnership debt allocated to it.[3861] If the partnership distributes cash and property to a partner in the same transaction, the partner applies the cash to basis and then allocates basis to the property distributed.[3862] However, if a liquidating distribution consists of only cash, unrealized receivables, or inventory with an adjusted basis to the recipient partner that is less than the partner's adjusted basis in the partnership, then the partner would recognize loss.[3863]

However, special rules apply to marketable securities, which might be treated as cash for purposes of Code § 731(a)(1) and therefore might trigger gain on distributions.[3864]

II.Q.8.b.i.(b). Code § 731(c): Distributions of Marketable Securities (Or Partnerships Holding Them)

Although marketable securities are not normally be considered cash for income tax purposes, they are treated as "money" for purposes of Code § 731(a)(1) gain calculation.[3865] Thus, distributions of marketable securities can result in gain under Code § 731(a)(1), if the total amount of money and securities distributed is higher than the adjusted basis of the partner's partnership interest. Beware that "marketable

---

Situation 3 involved the following facts and conclusions:

> Instead of selling his interest L withdraws from the partnership at a time when the adjusted basis of his interest in the partnership is zero and his proportionate share of partnership liabilities, all of which consist of liabilities on which neither he, the other partners nor the partnership have assumed any personal liability, is $15,000.
>
> Accordingly, L is considered to have received a distribution of money from the partnership of $15,000 and realizes a gain of $15,000 determined under the provisions of section 731(a) of the Code.

See also Rev. Rul. 77-402 (similar result when grantor trust status terminates with respect to a partnership interest), discussed in fn. 4974, found in part III.B.2.a Tax Basis Issues When Using Irrevocable Grantor Trusts, and Rev. Rul. 75-194 (deemed bargain sale of partnership interest contributed to charity), discussed in fn. 3313, found in part II.Q.6.b Possible Deemed Sale or Reduced Deduction When Contributing Partnership Interest to Charity.

[3860] Code § 731(a)(1).

[3861] See part II.C.3 Allocating Liabilities (Including Debt), especially part II.C.3.a Basic Consequences of Changes in Liability Allocations.

[3862] Although Code § 731 and the regulations thereunder do not appear to address this issue, Reg. § 1.732-1(a) and (b) implicitly mandate this result when determining the basis of assets distributed to a partner.

[3863] Code § 731(a)(2).

[3864] See part II.Q.8.b.i.(b) Code § 731(c): Distributions of Marketable Securities (Or Partnerships Holding Them).

[3865] Code § 731(c)(1). Marketable securities are defined in Code § 731(c)(2)(A) as financial instruments and foreign currencies which are, as of the date of distribution, actively traded. Code § 731(c)(2)(B) includes mutual funds, derivatives and various other financial instruments. Code § 731(c)(2)(C) defines financial instruments to include stocks and other equity interests, evidences of indebtedness, options, forwards, futures, notional principal contracts and derivatives.

securities" means not only financial instruments[3866] and foreign currencies which are, as of the date of the distribution, actively traded,[3867] but also:[3868]

- any interest in a common trust fund or a regulated investment company, the latter which is offering for sale or has outstanding any redeemable security[3869] of which it is the issuer,

- any financial instrument which, pursuant to its terms or any other arrangement, is readily convertible into, or exchangeable for, money or marketable securities,[3870]

- any financial instrument the value of which is determined substantially by reference to marketable securities,

- except to the extent provided in regulations, any interest in a precious metal which, as of the date of the distribution, is actively traded[3871] unless such metal was produced, used, or held in the active conduct of a trade or business by the partnership,

- except as otherwise provided in regulations, interests in any entity[3872] if substantially all of the assets[3873] of such entity consist (directly or indirectly) of marketable securities, money, or both, and

- to the extent provided in regulations,[3874] any interest in an entity[3875] not described in the preceding bullet point to the extent of the value of such interest which is attributable to marketable securities, money, or both.

3866 Financial instrument includes stocks and other equity interests, evidences of indebtedness, options, forward or futures contracts, notional principal contracts, and derivatives. Code § 731(c)(2)(C).

3867 Code § 731(c)(2)(A).

3868 Code § 731(c)(2)(B).

3869 As defined in section 2(a)(32) of the Investment Company Act of 1940. Code § 731(c)(2)(B)(i)(II).

3870 FSA 200219008 asserted that short-term (nine-month) debt instruments issued by a bank should be treated as financial instruments that were readily convertible into money. The IRS probably viewed them as the equivalent of certificates of deposit.

3871 Within the meaning of Code § 1092(d)(1). Code § 731(c)(2)(B)(iv).

3872 According to Letter Ruling 200223036, this includes a partnership division under part II.Q.8.d Partnership Division. More details on the Letter Ruling are at fn. 4086.

3873 Reg. § 1.731-2(c)(3)(i) provides:

> *Substantially all*. For purposes of section 731(c)(2)(B)(v) and this section, substantially all of the assets of an entity consist (directly or indirectly) of marketable securities, money, or both only if 90 percent or more of the assets of the entity (by value) at the time of the distribution of an interest in the entity consist (directly or indirectly) of marketable securities, money, or both.

This rule also applies for purposes of the investment company rules that might trigger gain recognition when a partnership is formed. See part II.M.3.b Exception: Diversification of Investment Risk, fn. 2503.

3874 Reg. § 1.731-2(c)(3)(ii) provides:

> *Less than substantially all*. For purposes of section 731(c)(2)(B)(vi) and this section, an interest in an entity is a marketable security to the extent that the value of the interest is

However, two exceptions to the "marketable securities are money" rule of Code § 731(c) often apply. First, a marketable security is not treated as money if the security was contributed to the partnership by the partner receiving the distribution, except to the extent the security's value is attributable to other marketable securities or money contributed to the entity to which the distributed security relates.[3876] Second, Code § 731(c) does not apply to distributions of marketable securities by investment partnerships to eligible partners.[3877] An investment partnership is defined in Code § 731(c)(3)(C)(i) as a partnership that never has been engaged in any trade or business[3878] and whose assets have always substantially consisted of money, stock, notes and bonds, interest rate or currency contracts, foreign currencies, interests in or derivate financial instruments, and other specifically prescribed assets; and an eligible partner is a partner who has contributed only the aforementioned types of assets to the partnership.[3879] With regard to investment partnership status, remember that, if the partnership owns an interest in an entity that is a disregarded entity or partnership for federal income tax purposes, that entity's activity will be treated as a trade or business activity of the holding partnership. Thus, it could be beneficial to set up two partnerships and have one hold the assets that will prevent investment partnership status and another that would be an investment partnership. Furthermore, certain investment partnerships formed with almost all contributions being in the form of cash might be eligible for

---

> attributable (directly or indirectly) to marketable securities, money, or both, if less than 90 percent but 20 percent or more of the assets of the entity (by value) at the time of the distribution of an interest in the entity consist (directly or indirectly) of marketable securities, money, or both.

This rule also applies for purposes of the investment company rules that might trigger gain recognition when a partnership is formed. See part II.M.3.b Exception: Diversification of Investment Risk, fn. 2503.

[3875] Letter Ruling 200223036 provides helpful analysis of the consequences of a situation similar to this arising from a partnership division. See fn. 4086.

[3876] Code § 731(c)(3)(A)(i); Reg. § 1.731-2(d)(1)(i). Letter Rulings 201537002 and 201537003 applied that rule to replacement stock certificates (referring to Reg. § 1.1012-1(c)(2)) for purposes of this rule and Code §§ 704(c)(1)(B) and 737; the rulings appear to be merely comfort rulings, because nothing jumped out at me as in doubt.

[3877] Reg. § 1.731-2(e)(1). An eligible partner includes a remainderman of a trust that was an eligible partner. Letter Rulings 200824005 and 200824009. This includes the remaindermen when the LLC starts as a disregarded entity and becomes a partnership when distributed to the remaindermen. Letter Ruling 201421001 (described more fully in fn. 307). However, it does not include the transferor or transferee in a nonrecognition transaction involving a transfer of any portion of an interest in a partnership with respect to which the transferor was not an eligible partner. Code § 731(c)(3)(C)(iii)(II).

[3878] Reg. § 1.731-2(e)(4) provides:

> *Partnership tiers*. For purposes of section 731(c)(3)(C)(iv) and this section, a partnership (upper-tier partnership) is not treated as engaged in a trade or business engaged in by, or as holding (instead of a partnership interest) a proportionate share of the assets of, a partnership (lower-tier partnership) in which the partnership holds a partnership interest if—
>
> (i) The upper-tier partnership does not actively and substantially participate in the management of the lower-tier partnership; and
>
> (ii) The interest held by the upper-tier partnership is less than 20 percent of the total profits and capital interests in the lower-tier partnership.

[3879] Code § 731(c)(3)(C)(iii). Investment partnerships, as defined in 86 Ill. Admin. Code § 100.9730, are also exempted from the Illinois replacement tax that generally would otherwise apply to an Illinois partnership. 35 ILCS 5/205(b).

avoiding the mandatory inside basis step-down that applies when certain transfers of partnership interests or assets occur when a partnership has significant loss assets.[3880]

Two more exceptions might not apply frequently, but are still important to note. First, if the security was acquired in a nonrecognition transaction and the value of the securities and money exchanged in that nonrecognition transaction is less than 20% of the value of all the assets exchanged in the nonrecognition transaction, the securities will not be considered money.[3881] Additionally, the security is not treated as money if it was not a marketable security on the date the partnership acquired it and the issuing entity did not have any outstanding marketable securities at that time, the partnership held the security for at least six months before it became marketable, and the partnership distributed the security within five years of when it became marketable.[3882]

In addition to these four general exceptions to Code § 731(c), Code § 731(c)(3)(B) limits the amount of marketable securities treated as money, thereby limiting the amount of gain a recipient partner has to recognize. The limitation is calculated by first determining the partner's share of the partnership's built-in gain in all of its marketable securities, before the distribution is made.[3883] From this amount you subtract the partner's distributive share of the built-in gain that is attributable to marketable securities held by the partnership immediately after the transaction.[3884] The end result is the amount of marketable securities that are treated as "property other than money." Thus, to the extent a distribution of marketable securities does not decrease the recipient's share of built-in gain, the recipient will not be taxed under Code § 731(c). In other words:

- Try to make sure that each person retains a proportionate amount of unrealized appreciation.

- If the parties miss the mark a little, then they are taxed on shifted unrealized appreciation only to the extent that they missed the mark.

- Consider that any tax imposed will increase basis. Given that marketable securities tend to turn over anyway, part or all of the tax due to missing the mark a little might very well be saved when the marketable securities are later sold.

II.Q.8.b.i.(c). Disguised Sale from Partnership to Partner

A distribution of property from a partnership to a partner may be recharacterized as sale of that property in exchange for the partner's contribution of cash or property.[3885]

[3880] See text accompanying footnote 4175.
[3881] Reg. § 1.731-2(d)(1)(ii).
[3882] Reg. § 1.731-2(d)(1)(iii).
[3883] Code § 731(c)(3)(B); Reg. § 1.731-2(b)(2).
[3884] *Id*.
[3885] Reg. § 1.707-6(a) provides:

> Rules similar to those provided in § 1.707-3 apply in determining whether a transfer of property by a partnership to a partner and one or more transfers of money or other consideration by that partner to the partnership are treated as a sale of property, in whole or in part, to the partner.

Generally, one would apply rules similar to those described in part II.M.3.e Exception: Disguised Sale.[3886]

Thus, when a partnership distributes property and within two years after the distribution the recipient contributes cash, the partnership is deemed to have sold the property if the rules described in part II.M.3.e Exception: Disguised Sale would have recharacterized the opposite transaction.[3887]

Disclosure rules similar to those described in part II.M.3.e Exception: Disguised Sale would apply.[3888]

II.Q.8.b.i.(d). Basis in Property Distributed from a Partnership; Possible Opportunity to Shift Basis or Possible Loss in Basis When a Partnership Distributes Property

When the distribution is a liquidating distribution, the partner's adjusted basis in the distributed property is equal to the adjusted basis of the partner's interest in the partnership, less any money distributed.[3889] Therefore, if a high basis partnership interest is redeemed in exchange for low basis property, the property receives a new basis equal to the basis of the redeemed partnership interest;[3890] this basis increase has no consequences to the partnership if a Code § 754 election is not in place (and certain

---

[3886] See fn. 3885, in which Reg. § 1.707-6(a) refers to Reg. § 1.707-3.

[3887] Reg. § 1.707-6(d), Example (1), "Sale of property by partnership to partner," provides:

(i) A is a member of a partnership. The partnership transfers property X to A. At the time of the transfer, property X has a fair market value of $1,000,000. One year after the transfer, A transfers $1,100,000 to the partnership. Assume that under the rules of section 1274 the imputed principal amount of an obligation to transfer $1,100,000 one year after the transfer of property X is $1,000,000 on the date of the transfer.

(ii) Since the transfer of $1,100,000 to the partnership by A is made within two years of the transfer of property X to A, under rules similar to those provided in § 1.707-3(c), the transfers are presumed to be a sale unless the facts and circumstances clearly establish otherwise. If no facts exist that would rebut this presumption, on the date that the partnership transfers property X to A, the partnership is treated as having sold property X to A in exchange for A's obligation to transfer $1,100,000 to the partnership one year later.

[3888] Reg. § 1.707-6(c) provides:

Disclosure rules. Similar to the rules provided in §§ 1.707-3(c)(2) and 1.707-5(a)(7)(ii), a partnership is to disclose to the Internal Revenue Service, in accordance with § 1.707-8, the facts in the following circumstances:

(1) When a partnership transfers property to a partner and the partner transfers money or other consideration to the partnership within a two-year period (without regard to the order of the transfers) and the partnership treats the transfers as other than a sale for tax purposes; and

(2) When a partner assumes or takes subject to a liability of a partnership in connection with a transfer of property by the partnership to the partner, and the partnership incurred the liability within the two-year period prior to the earlier of the date the partnership agrees in writing to the transfer of property or the date the partnership transfers the property, and the partnership treats the liability as a qualified liability under rules similar to § 1.707-5(a)(6)(i)(B).

[3889] Code § 732(b).

[3890] Code § 732(b).

mandatory basis adjustments are not in effect)[3891] and no consequences to the redeemed partner or other partners so long as none of the exceptions to the nonrecognition apply.[3892] The consequence would be a basis reduction.[3893] However, this basis reduction would apply only to the extent of any unrealized losses in the partnership's assets; it would not reduce the basis of any assets with unrealized gains.[3894]

In non-liquidating distributions, the partner's adjusted basis in the property distributed is simply the partnership's adjusted basis in the property before the distribution.[3895] However, the partner's adjusted basis in the distributed property cannot exceed his adjusted basis in his partnership interest less any money distributed at the same time.[3896]

The substituted basis portion continues the partnership The substituted basis portion continues the contributing partner's depreciation schedule.[3897]

If a transferee partner receives a distribution of property from the partnership within two years after acquiring an interest or part thereof in the partnership by a transfer with respect to which a Code § 754 election was not in effect, the partner may elect to treat as the adjusted partnership basis of such property the adjusted basis such property would have as if a Code § 754 election were in effect; see part II.Q.8.e.iii.(e) Code § 734 Basis Adjustment Resulting from Distributions, Including Code § 732(d) Requiring an Adjustment Without Making Code § 754 Election. This applies whether or not the distribution liquidates the partnership interest.

However, when a partnership distributes unrealized receivables (Code § 751(c)) or substantially appreciated inventory items (Code § 751(d)) in exchange for any part of a partner's interest in other partnership property (including money), or, conversely, partnership property (including money) other than unrealized receivables or substantially appreciated inventory items in exchange for any part of a partner's interest in the partnership's unrealized receivables or substantially appreciated inventory items, the distribution will be treated as a sale or exchange of property under the provisions of

---

[3891] Part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000, fn. 2159 briefly describes the effect on basis when a Code § 754 election is in place or in connection with certain substantial built-in loss transactions.

[3892] For possible exceptions to nonrecognition, see parts II.Q.8.b.i.(b) Code § 731(c): Distributions of Marketable Securities (Or Partnerships Holding Them), II.Q.8.b.i.(e) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value, and II.Q.8.b.i.(e) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value.

[3893] See part II.Q.8.e.iii.(e) Code § 734 Basis Adjustment Resulting from Distributions, Including Code § 732(d) Requiring an Adjustment Without Making Code § 754 Election.

[3894] See fn. 4195, found in part II.Q.8.e.iii.(d) Code § 743(b) Effectuating Code § 754 Basis Adjustment on Transfer of Partnership Interest.

[3895] Code § 732(a)(1).

[3896] Code § 732(a)(2).

[3897] Code § 168(i)(7).

Code § 751(b).[3898] In such case, Code § 732 determines the partner's basis of the property which the partner is treated as having sold to or exchanged with the partnership (as constituted after the distribution); the partner is considered as having received such property in a current distribution and, immediately thereafter, as having sold or exchanged it.[3899] However, Code § 732 does not apply in determining the basis of that part of property actually distributed to a partner which is treated as received by the partner in a sale or exchange under Code § 751(b), so the basis of such property shall be its cost to the partner.[3900]

The rule that assets received in a liquidating distribution get a basis equal to the liquidated partnership interest's basis can result in the liquidated asset receiving a basis step-up:[3901]

> Partner B, with a partnership interest having an adjusted basis to him of $12,000, retires from the partnership and receives cash of $2,000, and real property with an adjusted basis to the partnership of $6,000 and a fair market value of $14,000. The basis of the real property to B is $10,000 (B's basis for his partnership interest, $12,000, reduced by $2,000, the cash distributed).

However, this can turn around to bite the taxpayer, when the basis of the distributed assets exceeds the basis of the recipient's partnership interest (even if not in liquidation):[3902]

> Partner R has an adjusted basis of $10,000 for his partnership interest. He receives a current distribution of $4,000 cash and property with an adjusted basis to the partnership of $8,000. The basis of the distributed property to partner R is limited to $6,000 ($10,000, the adjusted basis of his interest, reduced by $4,000, the cash distributed).

Thus, the distributed property's basis decreased by $2,000, the excess of the $8,000 basis before the distribution over the $6,000 basis after the distribution.

However, Code § 734(b)(1), which applies if a Code § 754 election is in effect,[3903] causes the partnership to allocate this basis to other assets.

Special opportunities are available if the partnership has low basis property and a partner has a low basis partnership interest. (The partner might need to receive a large cash distribution to turn a high basis partnership interest into a low basis partnership interest.)[3904] The partnership borrows to buy property. The partnership then distributes

---

[3898] Reg. § 1.732-1(e).

[3899] Reg. § 1.732-1(e), referring to Code § 751(b) and Reg. § 1.751-1(b).

[3900] Reg. § 1.732-1(e).

[3901] Reg. § 1.732-1(b).

[3902] Reg. § 1.732-1(a), Example (2).

[3903] See part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000.

[3904] If the partnership borrows to finance this distribution, consider the interest tracing rules to make sure that the partnership can deduct the interest. Because the debt the partnership incurred generally would give everyone's partnership interest a higher basis, note the suggestions further below in this part II.Q.8.b.i.(d) Basis in Property Distributed from a Partnership; Possible the new property to the partner with the low basis. If a Code § 754 election is in place or if the distribution falls within the special rules of Code § 732(d), the distribution strips basis from the new property and results in the partnership allocating that stripped basis to the old, low basis property.

This basis stripping technique requires more work than is described above. The debt the partnership incurred generally would give everyone's partnership interest a higher basis.[3905] Increasing the basis of the distributee partner's partnership interest would reduce the basis stripping. Keeping the basis of the distributee partner's partnership interest low requires one of the following to occur:

- Make the distribution terminate the partner's interest in the partnership. Because the distributee will no longer be a partner, he will no longer be allocated any liabilities in the partnership. This reallocation of liabilities will be treated as a cash distribution,[3906] reducing the basis of his partnership interest available to allocate to the distributed property.[3907]

    - If the partner whose interest is being redeemed contributed to the partnership within seven years assets that the partnership retains <u>or</u> was allocated some built-in gain in the property when other partners were later admitted to the partnership, the partner would recognize gain when leaving the partnership,[3908] undercutting part or all of the short-term tax saving from the basis stripping transaction. To plan in advance for the possibility of using this strategy, on might consider forming a partnership many years before the opportunity arises.[3909]

    - If the partner wishes to stay in the partnership, consider dividing the partnership before this series of transactions,[3910] so that only the low basis asset remains in the partnership that eventually would buy this new property. Note, however, that a partnership division that distributes a partnership holding marketable securities might trigger Code § 731(c) gain.[3911]

- Take some special action to make sure that the partners other than the distributee partner are allocated the debt used to buy the new property. These actions relate to

---

Opportunity to Shift Basis or Possible Loss in Basis When a Partnership Distributes Property for keeping the basis of the distributee partner's partnership interest low.

3905 Code §§ 752(a) (a partnership's incurring debt is treated as a cash contribution to the partnership), 722 (contribution of cash increases the basis of the contributor's partnership interest).

3906 Code § 752(b).

3907 Reg. § 1.732-1(b).

3908 See part II.Q.8.b.i.(e) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value.

3909 See part II.Q.8.a Partnership as a Master Entity.

3910 See part II.Q.8.d Partnership Division. The division should keep the partners' percentage ownership the same in each partnership before and after the division to prevent the 7-year anti-mixing bowl rules (see fn. 3908) from applying to either partnership; see fn. 4056.

3911 See fns. 3872 and 4086.

the nature of the debt, loan guarantees, and other documentation shifting risk of loss regarding the debt.[3912]

- If the distributed property is encumbered by debt to reduce the equity distributed to the redeemed partner, make sure that the debt is old and cold.[3913]

Also, be careful not to trip the anti-abuse regulations, which set forth basic ideas generally respecting[3914] or criticizing[3915] partnership transactions, including a facts and

---

[3912] See part II.C.3 Allocating Liabilities (Including Debt). Code § 752 analysis can interact with the Code § 465 at-risk rules; see part II.G.3.g At Risk Rules, especially CCA 201606027, including key excerpts in fns. 876-879.

[3913] See Reg. § 1.707-6(b)(2) (dealing with liabilities incurred in connected with disguised sales). Reg § 1.707-6(d) includes the following example:

Example (2). *Assumption of liability by partner*.

(i) B is a member of an existing partnership. The partnership transfers property Y to B. On the date of the transfer, property Y has a fair market value of $1,000,000 and is encumbered by a nonrecourse liability of $600,000. B takes the property subject to the liability. The partnership incurred the nonrecourse liability six months prior to the transfer of property Y to B and used the proceeds to purchase an unrelated asset. Assume that, under the rule of § 1.707-5(a)(2)(ii) (which determines a partner's share of a nonrecourse liability), B's share of the nonrecourse liability immediately before the transfer of property Y was $100,000.

(ii) The liability is not allocable under the rules of § 1.163-8T to capital expenditures with respect to the property transferred to B and was not incurred in the ordinary course of the trade or business in which the property transferred to the partner was used or held. Since the partnership incurred the nonrecourse liability within two years of the transfer to B, under rules similar to those provided in § 1.707-5(a)(5), the liability is presumed to be incurred in anticipation of the transfer unless the facts and circumstances clearly establish the contrary. Assuming no facts exist to rebut this presumption, the liability taken subject to by B is not a qualified liability. The partnership is treated as having received, on the date of the transfer of property Y to B, $500,000 ($600,000 liability assumed by B less B's share of the $100,000 liability immediately prior to the transfer) as consideration for the sale of one-half ($500,000/$1,000,000) of property Y to B. The partnership is also treated as having distributed to B, in B's capacity as a partner, the other one-half of property Y.

[3914] Reg. § 1.701-2(a) provides:

Intent of subchapter K. Subchapter K is intended to permit taxpayers to conduct joint business (including investment) activities through a flexible economic arrangement without incurring an entity-level tax. Implicit in the intent of subchapter K are the following requirements—

(1) The partnership must be bona fide and each partnership transaction or series of related transactions (individually or collectively, the transaction) must be entered into for a substantial business purpose.

(2) The form of each partnership transaction must be respected under substance over form principles.

(3) Except as otherwise provided in this paragraph (a)(3), the tax consequences under subchapter K to each partner of partnership operations and of transactions between the partner and the partnership must accurately reflect the partners' economic agreement and clearly reflect the partner's income (collectively, proper reflection of income). However, certain provisions of subchapter K and the regulations thereunder were adopted to promote administrative convenience and other policy objectives, with the recognition that the application of those

circumstances test.[3916] These regulations accept some basis shifting, which is inherent in Code § 732 itself, such as apportioning among tangible assets with equal value[3917] or

---

> provisions to a transaction could, in some circumstances, produce tax results that do not properly reflect income. Thus, the proper reflection of income requirement of this paragraph (a)(3) is treated as satisfied with respect to a transaction that satisfies paragraphs (a)(1) and (2) of this section to the extent that the application of such a provision to the transaction and the ultimate tax results, taking into account all the relevant facts and circumstances, are clearly contemplated by that provision. See, for example, paragraph (d) Example 6 of this section (relating to the value-equals-basis rule in § 1.704-1(b)(2)(iii)(c)), paragraph (d) Example 9 of this section (relating to the election under section 754 to adjust basis in partnership property), and paragraph (d) Examples 10 and 11 of this section (relating to the basis in property distributed by a partnership under section 732). See also, for example, §§ 1.704-3(e)(1) and 1.752-2(e)(4) (providing certain de minimis exceptions).

For regulations under Code § 752 that were changed in October 2016, see part II.C.3 Allocating Liabilities (Including Debt).

[3915] Reg. § 1.701-2(b) provides:

> *Application of subchapter K rules.* The provisions of subchapter K and the regulations thereunder must be applied in a manner that is consistent with the intent of subchapter K as set forth in paragraph (a) of this section (intent of subchapter K). Accordingly, if a partnership is formed or availed of in connection with a transaction a principal purpose of which is to reduce substantially the present value of the partners' aggregate federal tax liability in a manner that is inconsistent with the intent of subchapter K, the Commissioner can recast the transaction for federal tax purposes, as appropriate to achieve tax results that are consistent with the intent of subchapter K, in light of the applicable statutory and regulatory provisions and the pertinent facts and circumstances. Thus, even though the transaction may fall within the literal words of a particular statutory or regulatory provision, the Commissioner can determine, based on the particular facts and circumstances, that to achieve tax results that are consistent with the intent of subchapter K—
>
> (1) The purported partnership should be disregarded in whole or in part, and the partnership's assets and activities should be considered, in whole or in part, to be owned and conducted, respectively, by one or more of its purported partners;
> (2) One or more of the purported partners of the partnership should not be treated as a partner;
> (3) The methods of accounting used by the partnership or a partner should be adjusted to reflect clearly the partnership's or the partner's income;
> (4) The partnership's items of income, gain, loss, deduction, or credit should be reallocated; or
> (5) The claimed tax treatment should otherwise be adjusted or modified.

[3916] Reg. § 1.701-2(c) provides:

> *Facts and circumstances analysis; factors.* Whether a partnership was formed or availed of with a principal purpose to reduce substantially the present value of the partners' aggregate federal tax liability in a manner inconsistent with the intent of subchapter K is determined based on all of the facts and circumstances, including a comparison of the purported business purpose for a transaction and the claimed tax benefits resulting from the transaction. The factors set forth below may be indicative, but do not necessarily establish, that a partnership was used in such a manner. These factors are illustrative only, and therefore may not be the only factors taken into account in making the determination under this section. Moreover, the weight given to any factor (whether specified in this paragraph or otherwise) depends on all the facts and circumstances. The

presence or absence of any factor described in this paragraph does not create a presumption that a partnership was (or was not) used in such a manner. Factors include:

(1) The present value of the partners' aggregate federal tax liability is substantially less than had the partners owned the partnership's assets and conducted the partnership's activities directly;

(2) The present value of the partners' aggregate federal tax liability is substantially less than would be the case if purportedly separate transactions that are designed to achieve a particular end result are integrated and treated as steps in a single transaction. For example, this analysis may indicate that it was contemplated that a partner who was necessary to achieve the intended tax results and whose interest in the partnership was liquidated or disposed of (in whole or in part) would be a partner only temporarily in order to provide the claimed tax benefits to the remaining partners;

(3) One or more partners who are necessary to achieve the claimed tax results either have a nominal interest in the partnership, are substantially protected from any risk of loss from the partnership's activities (through distribution preferences, indemnity or loss guaranty agreements, or other arrangements), or have little or no participation in the profits from the partnership's activities other than a preferred return that is in the nature of a payment for the use of capital;

(4) Substantially all of the partners (measured by number or interests in the partnership) are related (directly or indirectly) to one another;

(5) Partnership items are allocated in compliance with the literal language of §§ 1.704-1 and 1.704-2 but with results that are inconsistent with the purpose of section 704(b) and those regulations. In this regard, particular scrutiny will be paid to partnerships in which income or gain is specially allocated to one or more partners that may be legally or effectively exempt from federal taxation (for example, a foreign person, an exempt organization, an insolvent taxpayer, or a taxpayer with unused federal tax attributes such as net operating losses, capital losses, or foreign tax credits);

(6) The benefits and burdens of ownership of property nominally contributed to the partnership are in substantial part retained (directly or indirectly) by the contributing partner (or a related party); or

(7) The benefits and burdens of ownership of partnership property are in substantial part shifted (directly or indirectly) to the distributee partner before or after the property is actually distributed to the distributee partner (or a related party).

[3917] Reg. § 1.701-2(d) provides:

Example (10). Basis adjustments under section 732; use of partnership consistent with the intent of subchapter K.

(i) A, B, and C are partners in partnership PRS, which has for several years been engaged in substantial bona fide business activities. For valid business reasons, the partners agree that A's interest in PRS, which has a value and basis of $100x, will be liquidated with the following assets of PRS: a nondepreciable asset with a value of $60x and a basis to PRS of $40x, and related equipment with two years of cost recovery remaining and a value and basis to PRS of $40x. Neither asset is described in section 751 and the transaction is not described in section 732(d). Under section 732(b) and (c), A's $100x basis in A's partnership interest will be allocated between the nondepreciable asset and the equipment received in the liquidating distribution in proportion to PRS's bases in those assets, or $50x to the nondepreciable asset and $50x to the equipment. Thus, A will have a $10x built-in gain in the nondepreciable asset ($60x value less $50x basis) and a $10x built-in loss in the equipment ($50x basis less $40x value), which it expects to recover rapidly through cost recovery deductions. In selecting the assets to be distributed to A, the partners had a principal purpose to take advantage of the fact that A's basis in the assets will be determined by reference among a group of nonmarketable securities[3918] the basis of a partnership interest that is being liquidated. On the other hand, the regulations view as abusive duplication of

---

to A's basis in A's partnership interest, thus, in effect, shifting a portion of A's basis from the nondepreciable asset to the equipment, which in turn would allow A to recover that portion of its basis more rapidly. This shift provides a federal tax timing advantage to A, with no offsetting detriment to B or C.

(ii) Subchapter K is intended to permit taxpayers to conduct joint business activity through a flexible economic arrangement without incurring an entity-level tax. See paragraph (a) of this section. The decision to organize and conduct business through PRS is consistent with this intent. In addition, on these facts, the requirements of paragraphs (a)(1) and (2) of this section have been satisfied. The validity of the tax treatment of this transaction is therefore dependent upon whether the transaction satisfies (or is treated as satisfying) the proper reflection of income standard under paragraph (a)(3) of this section. Subchapter K is generally intended to produce tax consequences that achieve proper reflection of income. However, paragraph (a)(3) of this section provides that if the application of a provision of subchapter K produces tax results that do not properly reflect income, but the application of that provision to the transaction and the ultimate tax results, taking into account all the relevant facts and circumstances, are clearly contemplated by that provision (and the transaction satisfies the requirements of paragraphs (a)(1) and (2) of this section), then the application of that provision to the transaction will be treated as satisfying the proper reflection of income standard.

(iii) A's basis in the assets distributed to it was determined under section 732(b) and (c). The transaction does not properly reflect A's income due to the basis distortions caused by the distribution and the shifting of basis from a nondepreciable to a depreciable asset. However, the basis rules under section 732, which in some situations can produce tax results that are inconsistent with the proper reflection of income standard (see paragraph (a)(3) of this section), are intended to provide simplifying administrative rules for bona fide partnerships that are engaged in transactions with a substantial business purpose. Taking into account all the facts and circumstances of the transaction, the application of the basis rules under section 732 to the distribution from PRS to A, and the ultimate tax consequences of the application of that provision of subchapter K, are clearly contemplated. Thus, the application of section 732 to this transaction will be treated as satisfying the proper reflection of income standard under paragraph (a)(3) of this section. The Commissioner therefore cannot invoke paragraph (b) of this section to recast the transaction.

[3918] Reg. § 1.701-2(d) provides:

Example (9). Absence of section 754 election; use of partnership consistent with the intent of subchapter K.

(i) PRS is a bona fide partnership formed to engage in investment activities with contributions of cash from each partner. Several years after joining PRS, A, a partner with a capital account balance and basis in its partnership interest of $100x, wishes to withdraw from PRS. The partnership agreement entitles A to receive the balance of A's capital account in cash or securities owned by PRS at the time of withdrawal, as mutually agreed to by A and the managing general partner, P. P and A agree to distribute to A $100x worth of non-marketable securities (see section 731(c)) in which PRS has an aggregate basis of $20x. Upon distribution, A's aggregate basis in the securities is $100x under section 732(b). P RS does not make an election to adjust the basis in its remaining assets under section 754. Thus, PRS's basis in its remaining assets is unaffected by the distribution. In contrast, if a section 754 election had been in losses a partner contributing property with a built-in loss and later receiving other assets with low value in liquidation of his partnership interest (to get a high basis allocated to the distributed assets), then selling the distributed assets at a loss,[3919] a result largely

effect for the year of the distribution, under these facts section 734(b) would have required PRS to adjust the basis in its remaining assets downward by the amount of the untaxed appreciation in the distributed property, thus reflecting that gain in PRS's retained assets. In selecting the assets to be distributed, A and P had a principal purpose to take advantage of the facts that A's basis in the securities will be determined by reference to A's basis in its partnership interest under section 732(b), and because PRS will not make an election under section 754, the remaining partners of PRS will likely enjoy a federal tax timing advantage (i.e., from the $80x of additional basis in its assets that would have been eliminated if the section 754 election had been made) that is inconsistent with proper reflection of income under paragraph (a)(3) of this section.

(ii) Subchapter K is intended to permit taxpayers to conduct joint business activity through a flexible economic arrangement without incurring an entity-level tax. See paragraph (a) of this section. The decision to organize and conduct business through PRS is consistent with this intent. In addition, on these facts, the requirements of paragraphs (a)(1) and (2) of this section have been satisfied. The validity of the tax treatment of this transaction is therefore dependent upon whether the transaction satisfies (or is treated as satisfying) the proper reflection of income standard under paragraph (a)(3) of this section. A's basis in the distributed securities is properly determined under section 732(b). The benefit to the remaining partners is a result of PRS not having made an election under section 754. Subchapter K is generally intended to produce tax consequences that achieve proper reflection of income. However, paragraph (a)(3) of this section provides that if the application of a provision of subchapter K produces tax results that do not properly reflect income, but application of that provision to the transaction and the ultimate tax results, taking into account all the relevant facts and circumstances, are clearly contemplated by that provision (and the transaction satisfies the requirements of paragraphs (a)(1) and (2) of this section), then the application of that provision to the transaction will be treated as satisfying the proper reflection of income standard.

(iii) In general, the adjustments that would be made if an election under section 754 were in effect are necessary to minimize distortions between the partners' bases in their partnership interests and the partnership's basis in its assets following, for example, a distribution to a partner. The electivity of section 754 is intended to provide administrative convenience for bona fide partnerships that are engaged in transactions for a substantial business purpose, by providing those partnerships the option of not adjusting their bases in their remaining assets following a distribution to a partner. Congress clearly recognized that if the section 754 elections were not made, basis distortions may result. Taking into account all the facts and circumstances of the transaction, the electivity of section 754 in the context of the distribution from PRS to A, and the ultimate tax consequences that follow from the failure to make the election with respect to the transaction, are clearly contemplated by section 754. Thus, the tax consequences of this transaction will be treated as satisfying the proper reflection of income standard under paragraph (a)(3) of this section. The Commissioner therefore cannot invoke paragraph (b) of this section to recast the transaction.

[3919] Reg. § 1.701-2(d) provides the following example in which the lack of a Code § 754 was viewed as abusive:

Example (8). Plan to duplicate losses through absence of section 754 election; use of partnership not consistent with the intent of subchapter K.

(i) A owns land with a basis of $100x and a fair market value of $60x. A would like to sell the land to B. A and B devise a plan a principal purpose of which is to permit the duplication, for a substantial period of time, of the tax benefit of A's built-in loss in the land. To effect this plan, A, C (A's brother), and W (C's wife) form partnership PRS, to which A contributes the land, and C and W each contribute $30x. All partnership items are shared in proportion to the partners' respective contributions to PRS. PRS invests the cash in an investment asset (that is not a marketable security within the meaning of section 731(c)). PRS also leases the land to B under a three-year lease pursuant to which B has the option to purchase the land from PRS upon the expiration of the lease for an amount equal to its fair market value at that time. All lease proceeds received are immediately distributed to the partners. In year 3, at a time when the values of the partnership's assets have not materially changed, PRS agrees with A to liquidate A's interest in exchange for the investment asset held by PRS. Under section 732(b), A's basis in the asset distributed equals $100x, A's basis in A's partnership interest immediately before the distribution. Shortly thereafter, A sells the investment asset to X, an unrelated party, recognizing a $40x loss.

(ii) PRS does not make an election under section 754. Accordingly, PRS's basis in the land contributed by A remains $100x. At the end of year 3, pursuant to the lease option, PRS sells the land to B for $60x (its fair market value). Thus, PRS recognizes a $40x loss on the sale, which is allocated equally between C and W. C's and W's bases in their partnership interests are reduced to $10x each pursuant to section 705. Their respective interests are worth $30x each. Thus, upon liquidation of PRS (or their interests therein), each of C and W will recognize $20x of gain. However, PRS's continued existence defers recognition of that gain indefinitely. Thus, if this arrangement is respected, C and W duplicate for their benefit A's built-in loss in the land prior to its contribution to PRS.

(iii) On these facts, any purported business purpose for the transaction is insignificant in comparison to the tax benefits that would result if the transaction were respected for federal tax purposes (see paragraph (c) of this section). Accordingly, the transaction lacks a substantial business purpose (see paragraph (a)(1) of this section). In addition, factors (1), (2), and (4) of paragraph (c) of this section indicate that PRS was used with a principal purpose to reduce substantially the partners' tax liability in a manner inconsistent with the intent of subchapter K. On these facts, PRS is not bona fide (see paragraph (a)(1) of this section), and the transaction is not respected under applicable substance over form principles (see paragraph (a)(2) of this section). Further, the tax consequences to the partners do not properly reflect the partners' income; and Congress did not contemplate application of section 754 to partnerships such as PRS, which was formed for a principal purpose of producing a double tax benefit from a single economic loss (see paragraph (a)(3) of this section). Thus, PRS has been formed and availed of with a principal purpose of reducing substantially the present value of the partners' aggregate federal tax liability in a manner inconsistent with the intent of subchapter K. Therefore (in addition to possibly challenging the transaction under judicial principles or other statutory authorities, such as the substance over form doctrine or the disguised sale rules under section 707 (see paragraph (h) of this section)), the Commissioner can recast the transaction as appropriate under paragraph (b) of this section.

deterred by changes in the law since then.[3920] They also view as abusive distributing an insubstantial asset, allocating substantial basis to it, and then selling it at a substantial loss.[3921] Depending on the situation, not making a Code § 754 election might be

[3920] See part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000.

[3921] Reg. § 1.701-2(d) provides:

> *Example (11).* Basis adjustments under section 732; plan or arrangement to distort basis allocations artificially; use of partnership not consistent with the intent of subchapter K.
>
> (i) Partnership PRS has for several years been engaged in the development and management of commercial real estate projects. X, an unrelated party, desires to acquire undeveloped land owned by PRS, which has a value of $95x and a basis of $5x. X expects to hold the land indefinitely after its acquisition. Pursuant to a plan a principal purpose of which is to permit X to acquire and hold the land but nevertheless to recover for tax purposes a substantial portion of the purchase price for the land, X contributes $100x to PRS for an interest therein. Subsequently (at a time when the value of the partnership's assets have not materially changed), PRS distributes to X in liquidation of its interest in PRS the land and another asset with a value and basis to PRS of $5x. The second asset is an insignificant part of the economic transaction but is important to achieve the desired tax results. Under section 732(b) and (c), X's $100x basis in its partnership interest is allocated between the assets distributed to it in proportion to their bases to PRS, or $50x each. Thereafter, X plans to sell the second asset for its value of $5x, recognizing a loss of $45x. In this manner, X will, in effect, recover a substantial portion of the purchase price of the land almost immediately. In selecting the assets to be distributed to X, the partners had a principal purpose to take advantage of the fact that X's basis in the assets will be determined under section 732(b) and (c), thus, in effect, shifting a portion of X's basis economically allocable to the land that X intends to retain to an inconsequential asset that X intends to dispose of quickly. This shift provides a federal tax timing advantage to X, with no offsetting detriment to any of PRS's other partners.
>
> (ii) Although section 732 recognizes that basis distortions can occur in certain situations, which may produce tax results that do not satisfy the proper reflection of income standard of paragraph (a)(3) of this section, the provision is intended only to provide ancillary, simplifying tax results for bona fide partnership transactions that are engaged in for substantial business purposes. Section 732 is not intended to serve as the basis for plans or arrangements in which inconsequential or immaterial assets are included in the distribution with a principal purpose of obtaining substantially favorable tax results by virtue of the statute's simplifying rules. The transaction does not properly reflect X's income due to the basis distortions caused by the distribution that result in shifting a significant portion of X's basis to this inconsequential asset. Moreover, the proper reflection of income standard contained in paragraph (a)(3) of this section is not treated as satisfied, because, taking into account all the facts and circumstances, the application of section 732 to this arrangement, and the ultimate tax consequences that would thereby result, were not clearly contemplated by that provision of subchapter K. In addition, by using a partnership (if respected), the partners' aggregate federal tax liability would be substantially less than had they owned the partnership's assets directly (see paragraph (c)(1) of this section). On these facts, PRS has been formed and availed of with a principal purpose to reduce the taxpayers' aggregate federal tax liability in a manner that is inconsistent with the intent of subchapter K. Therefore (in addition to possibly challenging the transaction under applicable judicial

considered abusive[3922] or not abusive.[3923] Also, the IRS reserves the right to assert and to rely upon applicable nonstatutory principles and other statutory and regulatory authorities to challenge transactions,[3924] which might subject taxpayers to penalties,[3925] so be careful not to get too cute.

Other partnership transactions might also be helpful.[3926]

Note that partners can shift basis without going through this process, but the transactions also require seasoning. Suppose A has for many years held low basis real estate worth $1 million. Last year, B bought real estate for $1 million, intending to hold it for investment. A and B swap real estate in a tax-free Code § 1031 exchange.[3927] The old property now has a high basis in B's hands, and the new property has a low basis in A's hands. Code § 1031 generally requires A and B to have intended to hold the property for investment when they bought them and to intend to hold the swapped property for investment after the Code § 1031 exchange.

In reviewing anything in this part II.Q.8.b.i.(d), consider whether part II.Q.8.e.iii.(g) Certain Changes in Inside Basis May Reduce Foreign Tax Credits may be relevant.

II.Q.8.b.i.(e). Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value

The Code § 731(a) rule that there are no tax consequences to a partner when the partner receives a partnership distribution is subject to two exceptions if the distribution is made within seven years after the partner contributed property to the partnership:

- First, earlier it was discussed that Code § 704(c)(1)(B) triggers gain when the partnership distributes contributed property to a partner other than the contributing partner[3928] within seven years after the contribution; it also applies if the partnership agreement is amended within seven years to shift to the other partner the burdens and benefits and the property is distributed to that other partner more than seven years after contribution.[3929]

---

principles and statutory authorities, such as the disguised sale rules under section 707, see paragraph (h) of this section), the Commissioner can recast the transaction as appropriate under paragraph (b) of this section.

[3922] Reg. § 1.701-2(d), Example (8).

[3923] Reg. § 1.701-2(d), Example (9).

[3924] Reg. § 1.701-2(i).

[3925] See part II.G.16 Economic Substance Penalty.

[3926] See Abrams, Now You See It; Now You Don't: Exiting a Partnership and Making Gain Disappear, *TM Memorandum* (2/16/2009).

[3927] See part II.G.15 Like-Kind Exchanges.

[3928] When a partnership distributes to a partner property that the partnership contributed, none of Code § 704(c)(1)(B), 731(c) or 737 applied. See fn. 3876.

[3929] Reg. § 1.704-4(f)(2), Example (1).

- Second, Code § 737 will trigger gain to a distributee partner if the partner contributes property to the partnership and then receives a distribution of some other property[3930] within seven years of the partner's original contribution. When such a distribution is made, the partner must recognize gain equal to the lesser of (1) the excess of the fair market value of the distributed property over the partner's partnership interest's adjusted basis (less any money received in the distribution) or (2) the partner's net pre-contribution gain.[3931] Net pre-contribution gain, as defined in Code § 737(b), is the gain that would have been recognized by the distributee partner under Code § 704(c)(1)(B) if all property the partner had contributed to the partnership within seven years of the distribution that was still held by the partnership immediately before the distribution was distributed by the partnership to some other partner.

These rules relate to Code § 704(c) responsibility – the allocation to a partner of built-in gain or loss when the partnership contributes to a partnership property the basis of which differs from its fair market value – which integrates with part II.P.1.a.i Allocations of Income in Partnerships. Also, if a new partner joins a partnership (or an existing partner makes a non-pro rata contribution) when the partnership holds property the basis of which differs from its fair market value:

- The existing partners' capital accounts obtain Code § 704(c) responsibility;[3932] this is called a "reverse-Code § 704(c))" allocation. Thus, any unrealized gain that occurred between the time the partnership acquired the property and the time a new partner joined (or an existing partner makes a non-pro rata contribution) constitutes Code § 704(c) responsibility that is allocated to all of the existing partners.[3933] This

---

[3930] When a partnership distributes to a partner property that the partnership contributed, none of Code § 704(c)(1)(B), 731(c) or 737 applied. See fn. 3876.

[3931] Code § 737(a)(1) and (2).

[3932] See Reg. § 1.704-3(a)(6). See also Reg. § 1.704-1(b)(2)(iv)(s)(2).

[3933] Reg. §§ 1.704-1(b)(5), Example (14)(i), provides:

> MC and RW form a general partnership to which each contributes $10,000. The $20,000 is invested in securities of Ventureco (which are not readily tradable on an established securities market)…. Assume that the Ventureco securities subsequently appreciate in value to $50,000. At that time SK makes a $25,000 cash contribution to the partnership (thereby acquiring a one-third interest in the partnership), and the $25,000 is placed in a bank account. Upon SK's admission to the partnership, the capital accounts of MC and RW (which were $10,000 each prior to SK's admission) are, in accordance with paragraph (b)(2)(iv)(f) of this section, adjusted upward (to $25,000 each) to reflect their shares of the unrealized appreciation in the Ventureco securities that occurred before SK was admitted to the partnership. Immediately after SK's admission to the partnership, the securities are sold for their $50,000 fair market value, resulting in taxable gain of $30,000 ($50,000 less $20,000 adjusted tax basis) and no book gain or loss. An allocation of the $30,000 taxable gain cannot have economic effect since it cannot properly be reflected in the partners' book capital accounts. Under paragraph (b)(2)(iv)(f) of this section and the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, unless the partnership agreement provides that the $30,000 taxable gain will, in accordance with section 704(c) principles, be shared $15,000 to MC and $15,000 to RW, the partners' capital accounts will not be considered maintained in accordance with paragraph (b)(2)(iv) of this section.

Reg. §§ 1.704-1(b)(5), Example (14)(ii), provides:

responsibility can be reflected by either a special allocation of gain in the partnership agreement or by revaluing capital accounts on the books,[3934] but the partnership must take one of these steps for the partnership agreement to be respected.[3935] An

---

> Assume the same facts as (i), except that after SK's admission to the partnership, the Ventureco securities appreciate in value to $74,000 and are sold, resulting in taxable gain of $54,000 ($74,000 less $20,000 adjusted tax basis) and book gain of $24,000 ($74,000 less $50,000 book value). Under the partnership agreement the $24,000 book gain (the appreciation in value occurring after SK became a partner) is allocated equally among MC, RW, and SK, and such allocations have substantial economic effect. An allocation of the $54,000 taxable gain cannot have economic effect since it cannot properly be reflected in the partners' book capital accounts. Under paragraph (b)(2)(iv)(f) of this section and the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, unless the partnership agreement provides that the taxable gain will, in accordance with section 704(c) principles, be shared $23,000 to MC $23,000 to RW, and $8,000 to SK, the partners' capital accounts will not be considered maintained in accordance with paragraph (b)(2)(iv) of this section.

Reg. §§ 1.704-1(b)(5), Example (14)(iii), provides:

> Assume the same facts as (i) except that after SK's admission to the partnership, the Ventureco securities depreciate in value to $44,000 and are sold, resulting in taxable gain of $24,000 ($44,000 less $20,000 adjusted tax basis) and a book loss of $6,000 ($50,000 book value less $44,000). Under the partnership agreement the $6,000 book loss is allocated equally among MC, RW, and SK, and such allocations have substantial economic effect. An allocation of the $24,000 taxable gain cannot have economic effect since it cannot properly be reflected in the partners' book capital accounts. Under paragraph (b)(2)(iv)(f) of this section and the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, unless the partnership agreement provides that the $24,000 taxable gain will, in accordance with section 704(c) principles, be shared equally between MC and RW, the partners' capital accounts will not be considered maintained in accordance with paragraph (b)(2)(iv) of this section.

[3934] For how to revalue, see Reg. § 1.704-1(b)(2)(iv)(f), which is reproduced in fn. 422 in part II.C.7 Maintaining Capital Accounts (And Be Wary of "Tax Basis" Capital Accounts). See also Reg. § 1.704-1(b)(5), Example (33). Although generally this responsibility is determined separately for each asset, see an alternative approach is in part II.P.1.a.i.(b) Special Rule for Allocations of Income in Securities Partnerships.

[3935] See Reg. § 1.704-1(b)(5), Example (14)(iv), referencing Reg. § 1.704-1(b)(1)(iii), (iv).

Reg. § 1.704-1(b)(1)(iii) provides:

> *Effect of other sections*. The determination of a partner's distributive share of income, gain, loss, deduction, or credit (or item thereof) under section 704(b) and this paragraph is not conclusive as to the tax treatment of a partner with respect to such distributive share. For example, an allocation of loss or deduction to a partner that is respected under section 704(b) and this paragraph may not be deductible by such partner if the partner lacks the requisite motive for economic gain (see, *e.g.*, *Goldstein v. Commissioner*, 364 F.2d 734 (2d Cir. 1966)), or may be disallowed for that taxable year (and held in suspense) if the limitations of section 465 or section 704(d) are applicable. Similarly, an allocation that is respected under section 704(b) and this paragraph nevertheless may be reallocated under other provisions, such as section 482, section 704(e)(2), section 706(d) (and related assignment of income principles), and paragraph (b)(2)(ii) of § 1.751-1. If a partnership has a section 754 election in effect, a partner's distributive share of partnership income, gain, loss, or deduction may be affected as provided in § 1.743-1 (see paragraph (b)(2)(iv)(m)(2) of this section). A deduction that appears to be a nonrecourse deduction deemed to be in accordance with the partners' interests in the partnership may not be such because purported nonrecourse liabilities of the partnership in fact constitute equity rather than debt. The

unexpected part of this issue is that one can become saddled with Code § 704(c) responsibility for assets one did not contribute; consider whether this might reset the seven-year period with respect to that newly acquired Code § 704(c) responsibility (I have not researched the latter).

- If the partnership included a nominal partner merely to get the seven-year period running and the previously contributed property is promptly distributed to a partner who is admitted just after the seven-year had run, the nominal partner's existence is ignored in determining the seven-year period, so Code § 704(c)(1)(B) taxes the contributing partner.[3936]

Note that Code § 737 is applied after Code § 731(c), which means that any marketable securities that are treated as money for Code § 731(c) purposes are ignored when applying Code § 737.[3937] This can lead to a favorable result for a distributee partner in two ways. First, since the property piece of the distribution is reduced by treating marketable securities as money, the Code § 737 gain potential is reduced. Second, the total amount of cash and marketable securities treated as money could be less than the basis of the distributee partner's partnership interest, resulting in no gain recognition under Code § 731.

As in the Code § 704(c) analysis, the prevailing view among commentators seems to be that a transferee of a partnership interest will "step into" the transferor's shoes in Code § 737 situations. This view is supported by the fact that regulations supporting Code § 704(c)(1)(B) and Code § 737 were written by the same people, at the same time, in the same project, and are likely to have been designed to work in coordination with one another. A partner should not be able to avoid the rules of Code § 737 by transferring the partnership interest to a third party. Thus, the transferee partner should be treated as the contributing partner under Code § 737.[3938]

> examples in paragraph (b)(5) of this section concern the validity of allocations under section 704(b) and this paragraph and, except as noted, do not address the effect of other sections or limitations on such allocations.

Reg. § 1.704-1(b)(1)(iv) provides:

> *Other possible tax consequences*. Allocations that are respected under section 704(b) and this paragraph may give rise to other tax consequences, such as those resulting from the application of section 61, section 83, section 751, section 2501, paragraph (f) of § 1.46-3, § 1.47-6, paragraph (b)(1) of § 1.721-1 (and related principles), and paragraph (e) of § 1.752-1. The examples in paragraph (b)(5) of this section concern the validity of allocations under section 704(b) and this paragraph and, except as noted, do not address other tax consequences that may result from such allocations.

Implicit in clause (iv) is that failure to maintain proper capital accounts can have gift tax consequences under Code § 2501.

Also see Reg. § 1.704-1(b)(2)(iv)(b), which is reproduced in the text accompanying fn. 418 in part II.C.7 Maintaining Capital Accounts (And Be Wary of "Tax Basis" Capital Accounts).

[3936] Reg. § 1.704-4(f)(2), Example (2).

[3937] Reg. § 1.731-2(g).

[3938] I am very comfortable with the statement in the text, although it is not totally free from doubt. See Robinson, Don't Nothing Last Forever – Unwinding the FLP to the Haunting Melodies of Subchapter K, *ACTEC Journal*, Spring 2003, p. 302; Blum and Harrison, Another View: A Response to Richard Robinson's Don't Nothing Last Forever – Unwinding the FLP to the

When contributed property is distributed to any non-contributing partner within seven years of its contribution, the contributing partner is treated as if the property were sold to the recipient partner at its fair market value and must recognize the proper gain or loss under Code § 704(c)(1)(A); however, an exception applies for certain deemed like-kind exchanges.[3939] This like-kind exception applies not only to Code § 704(c) but also to Code § 737.[3940] Thus, partners in a real estate mixing bowl partnership might completely avoid gain recognition under Code §§ 704(c)(1)(B) and 737 if the partnership is liquidated before the seven year waiting period and the different partners each receive part or complete ownership of various properties owned by the partnership.[3941]

For issues relating to built-in losses, see the American Bar Association Section of Taxation's "Comments on Proposed Regulations on Certain Partnership Provisions of the American Jobs Creation Act of 2004," *Tax Lawyer*, vol. 69, No. 1, p. 5 (Fall 2015).

Haunting Melodies of Subchapter K, *ACTEC Journal*, Spring 2003, p. 313; and Robinson's Comments on Blum and Harrison's Another View, *ACTEC Journal*, Spring 2003, p. 318.

[3939] Code § 704(c)(2). See Borden and Longhofer, The Effect of Like-Kind Property on the Section 704(c) Anti-Mixing Bowl Rules, *TM Real Estate Journal* (3/2/2011). Reg. § 1.704-4(d)(3) provides:

> *Distributions of like-kind property*. If section 704(c) property is distributed to a partner other than the contributing partner and like-kind property (within the meaning of section 1031) is distributed to the contributing partner no later than the earlier of (i) 180 days following the date of the distribution to the non-contributing partner, or (ii) the due date (determined with regard to extensions) of the contributing partner's income tax return for the taxable year of the distribution to the noncontributing partner, the amount of gain or loss, if any, that the contributing partner would otherwise have recognized under section 704(c)(1)(B) and this section is reduced by the amount of built-in gain or loss in the distributed like-kind property in the hands of the contributing partner immediately after the distribution. The contributing partner's basis in the distributed like-kind property is determined as if the like-kind property were distributed in an unrelated distribution prior to the distribution of any other property distributed as part of the same distribution and is determined without regard to the increase in the contributing partner's adjusted tax basis in the partnership interest under section 704(c)(1)(B) and this section. See § 1.707-3 for provisions treating the distribution of the like-kind property to the contributing partner as a disguised sale in certain situations.

Reg. § 1.704-4(d)(4) provides an example.

[3940] In determining the precontribution gain subject to possible taxation under Code § 737, Reg. § 1.737-1(c)(2)(iv) provides:

> *Section 704(c)(1)(B) gain recognized in related distribution*. A distributee partner's net precontribution gain is determined after taking into account any gain or loss recognized by the partner under section 704(c)(1)(B) and § 1.704-4 (or that would have been recognized by the partner except for the like-kind exception in section 704(c)(2) and § 1.704-4(d)(3)) on an actual distribution to another partner of section 704(c) property contributed by the distributee partner that is part of the same distribution as the distribution to the distributee partner.

However, Reg. § 1.737-1(c)(2)(v) requires an actual distribution:

> *Section 704(c)(2) disregarded*. A distributee partner's net precontribution gain is determined without regard to the provisions of section 704(c)(2) and § 1.704-4(d)(3) in situations in which the property contributed by the distributee partner is not actually distributed to another partner in a distribution related to the section 737 distribution.

[3941] Breitstone and Wilensky, Dividing a Real Estate Empire: The Mixing Bowl Alternative, *TM Memorandum* (BNA) (3/9/2015).

II.Q.8.b.i.(f). Code § 751 – Hot Assets

Code § 751(a) and Reg. § 1.751-1(a)(1) provide that part of the gain attributable to hot assets (substantially appreciated inventory or unrealized receivables) "shall be considered as an amount realized from the sale or exchange of property other than a capital asset." Because capital gain treatment does not apply, this gain tends to be viewed as ordinary income.

A partner might be deemed to have entered into a transaction regarding hot assets if:[3942]

- The partner receives hot assets in exchange for all or a part of the partner's interest in other partnership property (including money), or
- The partner receives partnership property (including money) in exchange for all or a part of the partner's interest in hot assets.

This rule does not apply to not apply to a distribution of property that the distributee contributed to the partnership or Code § 736(a) payments to a retiring partner or successor in interest of a deceased partner.[3943]

Proposed regulations "prescribe how a partner should measure its interest in a partnership's unrealized receivables and inventory items.. and … provide guidance regarding the tax consequences of a distribution that causes a reduction in that interest."[3944]

A partnership's inventory items are "substantially appreciated" if their fair market value exceeds 120% of the partnership's adjusted basis in such property, unless a principal

---

[3942] Code § 751(b)(1).
[3943] Code § 751(b)(2).
[3944] REG-151416-06, Certain Distributions Treated as Sales or Exchanges [FR Doc. 2014-25487 Filed 10/31/2014 at 8:45 am; Publication Date: 11/03/2014]. The proposed regulations would obsolete Rev. Rul. 84-102. For the effective date:

> The regulations, as proposed, apply to distributions occurring in any taxable period ending on or after the date of publication of a Treasury decision adopting these rules as final regulations in the Federal Register. The rules contained in § 1.751-1(a)(2) would apply to transfers of partnership interests that occur on or after [11/03/2014]. However, the rules contained in § 1.751-1(a)(2) are a clarification of existing rules, and no inference is intended from the change to § 1.751-1(a)(2) with respect to sales or exchanges of partnership interests prior to the effective date for § 1.751-1(a)(2). The rules contained in § 1.751-1(a)(3) continue to apply to transfers of partnership interests that occur on or after December 15, 1999. A partnership and its partners would be able to rely on § 1.751-1(b)(2) of these proposed regulations for purposes of determining a partner's interest in the partnership's section 751 property on or after [11/03/2014] provided the partnership and its partners apply each of § 1.751-1(a)(2), § 1.751-1(b)(2), and § 1.751-1(b)(4) of these proposed regulations consistently for all partnership distributions and sales or exchanges, including for any distributions and sales or exchanges the partnership makes after a termination of the partnership under section 708(b)(1)(B).

See Longhofer and Rimmke, Proposed Section 751(b) Regulations: An Exchange for the Better? *Journal of Taxation* (Aug. 2015).

purpose for acquiring such property was to avoid these rules regarding inventory items.[3945] "Inventory items" include:[3946]

- the partnership's Code § 1221(a)(1) property,[3947]

- any other partnership property that, if the partnership sold or exchanged them, would be considered property other than a capital asset and other than Code § 1231 property,[3948] and

- any other property the partnership held that, if held by the selling or distributee partner, would be considered property of the type described above.

"Unrealized receivables" include, to the extent not previously includible in income under the partnership's tax accounting method, any rights (contractual or otherwise) to payment for:[3949]

- goods delivered, or to be delivered, to the extent the proceeds therefrom would be treated as amounts received from the sale or exchange of property other than a capital asset, or

- services rendered, or to be rendered.

For purposes of Code §§ 731, 732, 741, and 751, but not for purposes of Code § 736,[3950] "unrealized receivables" includes the following as if the partnership had been sold it at its fair market value, to the extent that their sale would trigger certain unfavorable tax treatment:[3951]

- mining property,[3952]

- stock in a DISC,[3953]

- Code § 1245 property (generally, depreciable personal property),[3954]

- stock in certain foreign corporations,[3955]

[3945] Code § 751(b)(3).
[3946] Code § 751(d).
[3947] Real estate might or might not constitute inventory. See part II.G.12 Future Development of Real Estate, especially fn. 1042.
[3948] Code § 1231 is discussed in part II.G.5 Gain or Loss on the Sale or Exchange of Property Used in a Trade or Business. Code § 1245 depreciation recapture overrides Code § 1231; see fn. 965.
[3949] Code § 751(c).
[3950] P.L. 103-66 (8/10/1993), § 13262(b), deleted the reference to Code § 736.
[3951] Code § 751(c).
[3952] As defined in Code § 617(f)(2), to the extent that Code § 617(d)(1) would apply.
[3953] As described in Code § 992(a), to the extent that Code § 995(c) would apply.
[3954] As defined in Code § 1245(a)(3), to the extent that Code § 1245(a) would apply.
[3955] As described in Code § 1248, to the extent that Code § 1248(a) would apply. For purposes of applying Code § 731, 741, and 751, in the case of an individual, the tax attributable to such

- Code § 1250 property (generally, real estate depreciated faster than straight-line depreciation),[3956]

- farm land,[3957]

- franchises, trademarks, or trade names,[3958] or

- an oil, gas, or geothermal property.[3959]

For purposes of Code §§ 731, 732, 741, and 751, but not for purposes of Code § 736, "unrealized receivables" also includes any market discount bond[3960] and any short-term obligation[3961] but only to the extent of the amount which would be treated as ordinary income if the partnership had sold such property.

More drastic consequences may apply when selling to a controlled corporation interests in a partnership holding depreciable property (including depreciable real estate that would not have depreciation recapture under Code § 1250), taxing the entire gain as ordinary income, not just the part that might have constituted depreciation recapture.[3962]

See also part II.Q.8.c Related Party Sales of Non-Capital Assets By or To Partnerships.

II.Q.8.b.i.(g). Characteristics of Distributed Property

Often, asset distributions precede, follow, or are substitutes for the transfer of partnership interests. Therefore, the concepts of distributions and transfers of partnership interests should be considered together. For the latter, see part II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754 Election or Required Adjustment for Built-in Loss).

A distributed property's basis depends on whether the distribution liquidated the partner's partnership interest:

- Generally, the basis of property (other than money) distributed by a partnership to a partner, other than in liquidation of the partner's interest, is its adjusted basis to the partnership immediately before such distribution.[3963] However, this basis cannot

---

amount shall be limited in the manner provided by Code § 1248(b) (relating to gain from certain sales or exchanges of stock in certain foreign corporation). Code § 751(e).

[3956] As defined in Code § 1250(c), to the extent that Code § 1250(a) would apply. Code § 1250(a)(1)(A)(i) applies Code § 1250(a) to additional depreciation, referring to subsections (b)(1) and (b)(4). Subsection (b)(1) applies to depreciation faster than straight line. Subsection (b)(4) applies to certain rehabilitation expenditures.

[3957] As defined in Code § 1252(a), to the extent that Code § 1252(a) would apply.

[3958] Referred to in Code § 1253(a), to the extent that Code § 1253(a) would apply.

[3959] As defined in Code § 1254, to the extent that Code § 1254(a) would apply.

[3960] As defined in Code § 1278.

[3961] As defined in Code § 1283.

[3962] See part II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill), especially the text accompanying fns. 3681-3682.

[3963] Code § 732(a)(1).

exceed the adjusted basis of the partner's interest in the partnership, reduced by any money distributed in the same transaction.[3964]

- The basis of property (other than money) distributed by a partnership to a partner in liquidation of the partner's interest is the partnership interest's adjusted basis, reduced by any money distributed in the same transaction.[3965]

However, neither of these rules applies to the extent that a distribution is treated as a sale or exchange of property under Code § 751(b) (relating to unrealized receivables and inventory items).[3966]

Also, special rules apply to a partner who acquired all or a part of his interest by a transfer with respect to which a Code § 754 election is not in effect, and to whom a distribution of property (other than money) is made with respect to the transferred interest within two years after such transfer.[3967] The partner may elect to treat as the adjusted partnership basis of such property the adjusted basis such property would have if the adjustment provided in Code § 743(b) were in effect.[3968] Depending on the situation, this basis adjustment requires elections or is mandatory.[3969]

A partner's holding period for property received in a distribution from a partnership generally includes the partnership's holding period.[3970]

[3964] Code § 732(a)(2). If that cap causes a loss of basis, the partnership can reallocate that lost basis to the partnership's other assets under Code § 734 if a Code § 754 election is in place. See part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations.
[3965] Code § 732(b).
[3966] Code § 732(e). For details regarding these assets, see part II.Q.8.b.i.(f) Code § 751 – Hot Assets.
[3967] Code § 732(d). For a discussion of these rules, including any opportunity to shift basis from non-depreciable to depreciable assets, see McKee, Nelson & Whitmire, ¶26.01 Transferees' Special Basis Adjustments in Connection With Subsequent Distributions, *Federal Taxation of Partnerships & Par*tners (WG&L).
[3968] Reg. § 1.732-1(d)(1)(iii). The amount of this adjustment is not diminished by any depletion or depreciation of that portion of the basis of partnership property arising from this special basis adjustment, since depletion or depreciation on such portion before distribution is allowed or allowable only if the optional adjustment under Code § 743(b) is in effect. Reg. § 1.732-1(d)(1)(iv). If this property is not the same property which would have had a special basis adjustment, then such special basis adjustment applies to any like property received in the distribution, if the transferee, in exchange for the property distributed, has relinquished the transferee's interest in the property with respect to which the transferee would have had a special basis adjustment. Reg. § 1.732-1(d)(1)(v).
[3969] Reg. § 1.731-1(d)(2), (3), (4).
[3970] Code § 735(b). See Goold & Schneider, Finding the Gold Nuggets in Partnership Holding Periods, *Passthrough Entities* 31 (Nov./Dec. 2002). See also Borden, Navigating State Law and Tax Issues Raised by Partnership and LLC Reorganizations, *Business Entities* (Jul./Aug. 2014), suggesting that the holding period of distributed property might be the longer of the partnership's holding period or the partnership interest's holding period.

When a partner who receives "hot assets" later disposes of them, the partner will recognize ordinary income:

- The disposition of Code § 751(c) unrealized receivables received from a partnership is ordinary gain or loss.[3971]

- The disposition of Code § 751(d) inventory received from a partnership, within 5 years from the date of the distribution,[3972] is ordinary gain or loss.[3973]

If any of these hot assets is disposed of in a nonrecognition transaction or a series of nonrecognition transactions, the above tax treatment shall also apply to any substituted basis property resulting from such transaction(s).[3974]

II.Q.8.b.ii. Partnership Redemption – Complete Withdrawal Using Code § 736

II.Q.8.b.ii.(a). Introduction to Code § 736

When a partnership redeems[3975] a partner's interest in full,[3976] Code § 736(a) provides that payments may be deductible to the partnership and ordinary income to the selling

---

[3971] Code § 735(a)(1).

[3972] For purposes of this rule, the partnership's holding period does not tack, and Code § 751(d) (defining inventory item) shall be applied without regard to any holding period in Code § 1231(b). Code § 735(b), (c)(1).

[3973] Code § 735(a)(1).

[3974] Code § 735(c)(2)(A). This rule does not apply to any stock in a C corporation received in a Code § 351 exchange. Code § 735(c)(2)(B).

[3975] Code § 736 applies only to payments made by the partnership and not to transactions between partners. Reg. § 1.736-1(a)(1)(i). If the responsibility for making payments in a transaction between partners is assigned to the partnership, the assignment does not transform the sale into a Code § 736 redemption. *Coven v. Commissioner*, 66 T.C. 295 (1976), *acq.* 1976-2 C.B. 1, reasoning:

> We therefore conclude that petitioner sold his partnership interest to Suttenberg individually. The resulting tax consequences accordingly cannot be determined by section 736, since that section applies "only to payments made by the partnership and not to transactions between the partners." Sec. 1.736-1(a)(1)(i), Income Tax Regs. See also *Karan v. Commissioner*, 319 F.2d 303, 307 (7th Cir. 1963), *affg.* a Memorandum Opinion of this Court; *Smith v. Commissioner*, 313 F.2d 16, 19 (10th Cir. 1962), *affg.* 37 T.C. 1033 (1962); *Charles F. Phillips*, 40 T.C. 157, 161 (1963); 1 Willis, Partnership Taxation, sec. 46.01, p. 606 (2d ed. 1976).[10]
>
> [10] Although the agreement made a specific allocation for goodwill, capital gains treatment under sec. 736(b)(2)(B) would still not be possible, even if that agreement were not later superseded, because sec. 736 is inapplicable to this sale between partners. Furthermore, even if sec. 736 were applicable, the Consultant Contract, which was adopted, does not make any reference to goodwill, and the partnership did not operate under a written agreement: no operative written partnership agreement specifying payments for goodwill thus existed. Sec. 736(b)(2)(B) would therefore still be inapplicable. See *V. Zay Smith*, 37 T.C. 1033, 1037 (1962), *affd.* 313 F.2d 16 (10th Cir. 1962).

[3976] Code § 736 applies only to payments made to a retiring partner or to a deceased partner's successor in interest in liquidation of such partner's entire interest in the partnership. Code § 736 does not apply if the estate or other successor in interest of a deceased partner continues as a partner in its own right under local law. Reg. § 1.736-1(a)(1)(i). A partner retires when that partner;[3977] if and to the extent that these payments are based on partnership income rather than being fixed, they constitute a shifting of a distributive share of partnership income to the retiring partner, rather than a deduction to the partnership and income to the retiring partner.[3978] Or, one may choose to apply Code § 736(b) so that they are nondeductible to the partnership (although possibly depreciated or amortized) and gain to the partner.[3979] (In analyzing the discussion below, note that one must be careful in relying on the regulations, which were last amended before P.L. 103-66 was enacted in 1993.[3980])

---

person ceases to be a partner under local law. However, for partnership income tax purposes, a retired partner or a deceased partner's successor will be treated as a partner until such partner's interest in the partnership has been completely liquidated. Reg. § 1.736-1(a)(1)(ii). Thus, if one of the members of a two-person partnership retires or dies and the retiring member or deceased member's estate is to receive Code § 736 payments, the partnership will not be considered terminated, nor will the partnership year close with respect to either partner, until the retiring partner's or deceased member's estate's entire interest is liquidated, since the retiring partner or deceased member's estate continues to hold a partnership interest in the partnership until that time. Reg. § 1.736-1(a)(6).

3977 For whether such payments are subject to self-employment tax, see part II.L.7 SE Tax N/A to Qualified Retiring or Deceased Partner.

3978 Reg. § 1.736-1(a)(4). The retiring partner might like (if credits are passed through) or dislike (if nondeductible expenses increase taxable income) this result.

3979 Except to the extent Code § 751(b) applies (see part II.Q.8.b.i.(f) Code § 751 – Hot Assets), the amount of any gain or loss with respect to such payments shall be determined under Code § 731. Reg. § 1.736-1(b)(6). However, where the total of such payments is a fixed sum, the seller may elect (in the seller's tax return for the first taxable year for which the seller receives such payments), to report and to measure the amount of any gain or loss by the difference between the amount treated as a distribution under Code § 736(b) in that year, and the portion of the partner's adjusted basis that bears the same proportion to the partner's total adjusted basis for the partner's partnership interest as the amount distributed under Code § 736(b) in that year bears to the total amount to be distributed under Code § 736(b). *Id*.

3980 The legislative history to 1993 changes to Code § 736 provides:

> *In general*.
>
> The bill generally repeals the special treatment of liquidation payments made for goodwill and unrealized receivables. Thus, such payments would be treated as made in exchange for the partner's interest in partnership property, and not as a distributive share or guaranteed payment that could give rise to a deduction or its equivalent. The bill does not change present law with respect to payments made to a general partner in a partnership in which capital is not a material income-producing factor. The determination of whether capital is a material income-producing factor would be made under principles of present and prior law [e.g., sections 401(c)(2) and 911(d) of the Code and old section 1348(b)(1)(A) of the Code]. For purposes of this provision, capital is not a material income-producing factor where substantially all the gross income of the business consists of fees, commissions, or other compensation for personal services performed by an individual. The practice of his or her profession by a doctor, dentist, lawyer, architect, or accountant will not, as such, be treated as a trade or business in which capital is a material income-producing factor even though the practitioner may have a substantial capital investment in professional equipment or in the physical plant constituting the office from which such individual conducts his or her practice so long as such capital investment is merely incidental to such professional practice. In addition, the bill does not affect the deductibility of compensation paid to a retiring partner for past services.

Code § 736 prevails over the rules of Code § 1001 that normally govern sales.[3981] For further discussion, see part II.Q.8.b.ii.(d) Comparing Code § 736(b) to an Installment Sale.

We will see below that generally a Code § 736(b) payment is taxed under Code § 731(a), so one might wonder how important it might be to be within the scope of Code § 736. Part II.Q.8.b.ii.(d) Comparing Code § 736(b) to an Installment Sale, especially the text accompanying fns. 4009-4012, explains why Code § 736 treatment can be extremely important.

Further below, a brief discussion illustrates why a partner whose interest is being redeemed would generally prefer Code § 736(a) treatment, even though at first glance it would seem that the retiring partner would prefer Code § 736(b) treatment, since capital gains rates are lower than ordinary income rates.

II.Q.8.b.ii.(b). Flexibility in Choosing between Code § 736(a) and (b) Payments

Before explaining this counter-intuitive rule, let's discuss the flexibility allowed. Within certain limits, the redemption agreement can provide that as much or as little of the redemption payments receive treatment under Code § 736(a) or (b).[3982] However,

---

> *Unrealized receivables*.
>
> The bill also repeals the special treatment of payments made for unrealized receivables (other than unbilled amounts and accounts receivable) for all partners. Such amounts would be treated as made in exchange for the partner's interest in partnership property. Thus, for example, a payment for depreciation recapture would be treated as made in exchange for an interest in partnership property, and not as a distributive share or guaranteed payment that could give rise to a deduction or its equivalent.

Regarding payments for past services, see part II.L.7 SE Tax N/A to Qualified Retiring or Deceased Partner, regarding when such payments are not subject to self-employment tax.

[3981] The first sentence of Reg. § 1.1001-1(a) says, **Except as otherwise provided in subtitle A of the Code**, the gain or loss realized from the conversion of property into cash, or from the exchange of property for other property differing materially either in kind or in extent, is treated as income or as loss sustained. (emphasis added)

[3982] Reg. § 1.736-1(b)(5)(iii). For what constitutes an agreement designating payments, see *Commissioner v. Jackson Investment Company*, 346 F.2d 187 (9th Cir. 1965), *rev'g* 41 T.C. 675 (reviewed decision 1964 holding that a withdrawal agreement was not given effect under Code § 736 as it did not constitute a partnership agreement); the Tax Court seems to have abandoned its decision in *Jackson Investment Company* in other Circuits as well – see *Spector v. Commissioner*, T.C. Memo. 1982-433, characterizing *Jackson Investment Company* as involving an ambiguous provision. If an agreement between all the remaining partners and the withdrawing partner or his successor in interest does not designate payments, then, subject to the limits described further below, Reg. § 1.736-1(b)(5)(i), (ii) provide the following:

> If a fixed amount (whether or not supplemented by any additional amounts) is to be received over a fixed number of years, the portion of each payment to be treated as a distribution under section 736(b) for the taxable year shall bear the same ratio to the total fixed agreed payments for such year (as distinguished from the amount actually received) as the total fixed agreed payments under section 736(b) bear to the total fixed agreed payments under section 736(a) and (b). The balance, if any, of such amount received in the same taxable year shall be treated as a distributive share or a guaranteed payment under section 736(a)(1) or (2). However, if the total amount received in any one year is less than the amount considered as a distribution under section 736(b) for that year, then any unapplied portion shall be added to the portion of the payments for the following year

Code § 736(b) payments cannot exceed the fair market value of the withdrawing partner's share of the partnership property;[3983] therefore, Code § 736(a) must apply to such excess.

Except as discussed below, Code § 736(b) payments cannot be for (and therefore Code § 736(a) must apply to) the partnership's:

- Unrealized receivables;[3984]
- Goodwill, except to the extent that the partnership agreement provides for a payment with respect to goodwill.

The above limitation on what constitutes Code § 736(b) payments means that such payments must be classified as Code § 736(a) payments. It does not mean that such payments are the only types of payments that can be classified as Code § 736(a) payments instead of Code § 736(b) payments.[3985]

However, starting in 1993, payments for unrealized receivables and goodwill are eligible for Code § 736(a) treatment only if capital is not a material income-producing factor for the partnership and the retiring or deceased partner was a general partner in the partnership.[3986] The regulations have not been updated to take into account this rule. In applying this rule, capital is not a material income-producing factor where substantially all the gross income of the business consists of fees, commissions, or other compensation for personal services performed by an individual.[3987] The professional practice of a doctor, dentist, lawyer, architect, or accountant is not treated as a trade or business in which capital is a material income-producing factor even though the practitioner may have a substantial capital investment in professional equipment or in

---

> or years which are to be treated as a distribution under section 736(b). For example, retiring partner W who is entitled to an annual payment of $6,000 for 10 years for his interest in partnership property, receives only $3,500 in 1955. In 1956, he receives $10,000. Of this amount $8,500 ($6,000 plus $2,500 from 1955) is treated as a distribution under section 736(b) for 1956; $1,500, as a payment under section 736(a).
>
> If the retiring partner or deceased partner's successor in interest receives payments which are not fixed in amount, such payments shall first be treated as payments in exchange for his interest in partnership property under section 736(b) to the extent of the value of that interest and, thereafter, as payments under section 736(a).

Whether a Code § 754 election is in effect or is deemed to be in effect might affect whether undesignated payments are 736(a) or 736(b) payments. McBride, Alice's Estate in the Wonderland of Subchapter K, *Tax Notes* 2/23/2009, pages 971-980.

[3983] Reg. § 1.736-1(b)(5)(iii).

[3984] Code § 736(b)(2)(A). Unrealized receivables include the right to payments for (1) goods delivered, or to be delivered, to the extent the proceeds would be treated as amounts received from the sale or exchange of property other than a capital asset, or (2) services rendered, or to be rendered. Code § 751(c), which is further described in part II.Q.8.b.i.(f) Code § 751 – Hot Assets. However, for purposes of Code § 736, they do not include other items that Code § 751 would normally treat as unrealized receivables. See text accompanying fns. 3950-3961.

[3985] Reg. § 1.736-1(b)(3) provides a ceiling on payments for goodwill, not a floor under which they may not be lowered. *Tolmach v. Commissioner*, T.C. Memo. 1991-538.

[3986] Code § 736(b)(3).

[3987] See fn. 3980.

the physical plant constituting the office from which such individual conducts that practice if the capital investment is merely incidental to such professional practice.[3988]

Code § 736(a) payments are available for payments in the form of mutual insurance not determined by reference to any partnership asset,[3989] payments of compensation to a retired partner for past services,[3990] and perhaps a portion[3991] of payments where capital is a material income-producing factor.[3992]

If and to the extent that goodwill would not be eligible for Code § 736(a) treatment, consider how one would measure goodwill. For example, if the retiring partner was undercompensated for prior services before the company reached its full potential or for any other reason, payments could be allocated to past services.

If none of the above works around the inability to apply Code § 736(a) to goodwill, consider doing a partial redemption instead of a complete termination. Code § 736 applies only to payments made to a retiring partner or to a deceased partner's successor in interest in liquidation of such partner's entire interest in the partnership.[3993] Instead, provide a preferred interest in the partnership's profits up to a certain limit. Generally, reallocating profits between partners is not a taxable event.[3994]

II.Q.8.b.ii.(c). Comparing Code § 736(a) with (b) Strategically

See the example in part II.Q.1.a Contrasting Ordinary Income and Capital Scenarios on Value in Excess of Basis. The "Capital Gains to Seller" scenario corresponds to part II.Q.1.a.i.(d) S Corporation Double Taxation, which corresponds to Code § 736(b) payments, and the "Ordinary Income to Seller" scenario corresponds to part II.Q.1.a.i.(e) Partnership Single Taxation of Goodwill, which corresponds to Code § 736(a) payments. The contrast between these scenarios is illustrated in part II.Q.1.a.i.(f) Partnership Use of Same Earnings as S Corporation in Sale of Goodwill.

<u>Main Points</u>

1. Using a capital gain Code § 736(b) scenario, taxes consume much more to the parties as a whole than would the ordinary income Code § 736(a) scenario in meeting the targeted payments of "principal." Thus, the ordinary income scenario provides more money available to buy out the seller and ease the stress of the buy-out.

2. To compensate the seller for a higher ordinary income tax rate, the seller must receive more to generate the same after-tax flow. Thus, the stated sales price would

[3988] See fn. 3980.
[3989] Reg. § 1.736-1(a)(2).
[3990] See fn. 3980.
[3991] If the partners have agreed that the value of the Code § 736(b) payments is not to exceed a certain amount that is below fair market value, the remainder would be Code § 736(a) payments.
[3992] Banoff, More on Section 736(a) Payments After RRA '93 Changes, 83 *Journal of Taxation* 191 (Sept. 1995).
[3993] See fn. 3976.
[3994] See part II.C.6 Shifting Rights to Future Profits.

appear to be higher and more burdensome, although really the buyer is better off because deducting the payments saves more than the additional purchase price cost.

3. In the § 736(a) scenario, increases in ordinary income tax rates harm the seller disproportionately, although it might be possible for the buyer to agree to pay seller more because the buyer saves more tax by making those additional payments. On the other hand, in a capital gain scenario, an increase in capital gain rates without a corresponding increase in ordinary income rates would not help the buyer save as much tax by paying the seller more.

4. Code § 736(a) requires a complete liquidation in the redeemed partner's interest.[3995] However, the complete redemption may be made over time, and Code § 736 does not terminate the partnership, even if only one owner is left (but Code § 736 does not prevent termination if the partnership ceases activity).[3996] If the partnership assumes

---

[3995] Reg. § 1.736-1(a)(1)(i).

[3996] Rev. Rul. 75-154 involved the following facts:

> ABC partnership was formed in 1968 to conduct a management consulting business. Under the terms of the partnership agreement, upon retirement, the retiring partner was entitled to receive, in addition to amounts paid for his interest in partnership property, a specified amount payable in monthly installments over a three-year period following his retirement. There was no provision in the partnership agreement with respect to the payment to a retiring partner for goodwill. Partner C retired on January 2, 1972, and received 12 monthly payments from the partnership during 1972. On January 2, 1973, all of the business and financial activities of the partnership ended and A and B withdrew from the business. The former partners, A and B, assumed their share of the remaining liability to C and made the required payments for the years 1973 and 1974.

The ruling analyzed and held:

> Section 1.736-1(a)(6) of the Income Tax Regulations provides, in part, that a retiring partner or a deceased partner's successor in interest receiving payments under section 736 of the Code is regarded as a partner until the entire interest of the retiring or deceased partner is liquidated. Therefore, if one of the members of a 2-man partnership retires under a plan whereby he is to receive payments under section 736, the partnership will not be considered terminated, nor will the partnership year close with respect to either partner, until the retiring partner's entire interest is liquidated, since the retiring partner continues to hold a partnership interest in the partnership until that time.
>
> Section 1.736-1(a)(6) of the regulations prevents the termination of a partnership under section 708 of the Code, only in those situations in which the partnership would otherwise be terminated because of the withdrawal of a retiring or a deceased partner who is entitled to receive payments under section 736(a)(2). However, in the instant case, section 1.736-1(a)(6) of the regulations does not prevent the termination of the partnership under section 708, even though C was receiving liquidating payments under section 736(a)(2). It was the withdrawal of A and B that caused the partnership to terminate, not C's prior retirement.
>
> Accordingly, the partnership did not continue to exist under section 736 of the Code, but terminated under section 708 when partners A and B discontinued the financial operation of the partnership and withdrew from the business.
>
> It has been previously held that payments that would have been deductible by a partnership had it continued in existence were deductible by the former partners after termination of the partnership. See *Flood v. United States*, 133 F.2d 173 (1st Cir. 1943).
>
> Thus, in the instant case, after the partnership terminated, payments made by former partners A and B, in satisfaction of the liability to retired partner C, are deductible by them

the partner's share of liabilities, it cannot deduct the payment of those liabilities under Code § 736 later than the year in which the partner's relationship with the partnership terminated;[3997] the liabilities are treated as relieved (and therefore cash is deemed paid) when the withdrawing partner is no longer a partner (ignoring the Code § 736 deemed continuation).[3998]

5. The above treatment does not apply to the extent that the LLC is repaying the seller's capital account, to the extent that the seller's capital account would be the LLC's earnings that are allocated to the seller but not distributed. The seller would not be taxed on such distributions, because they were taxed when originally earned.

6. Combined with a Code § 754 election, a Code § 736(b) payment would generate a separate basis for each asset whose basis is adjusted, and each year a new set of assets would be created.[3999] Rather than try to recover that tax benefit, a Code § 736(a) is an easier way for the remaining partners to avoid tax on earnings used to buy the redeemed partner.

7. A partnership might be structured with profits interests that shift over time, which might achieve results similar to that of Code § 736 without the partner completely retiring. For example, suppose an older partner brought in a lot of business, but the agreement would be that the younger partners would take over the business after a number of years. The partnership might be structured to give the older partner a larger profits interest in early years and a smaller profits interest in later years. Generally, merely shifting interests in future profits is not a taxable event.[4000] The objective would be to structure it not as a sale, but rather as an allocation of profits related to the business each partner generates and the services each partner performs.

8. A technique similar to Code § 736 ordinary income payments used to be available to corporations in some situations. If the corporation could make a case that the departing shareholder was under-compensated for prior services, the corporation would pay compensation to him or her, with economic results similar to that of Code § 736 ordinary income payments. Code § 409A has made that strategy more difficult to use, imposing a 20% penalty on deferred compensation to the extent substantially vesting occurs after December 31, 2004, unless the statute's strict requirements are satisfied. To use deferred compensation payments based on prior services, the parties would need to prove that it is fair to compensate the selling owner-employee for prior services even though the employer was previously not legally obligated to do so. The sooner one plans for this future compensation, the

as trade or business expenses under section 162(a) of the Code in the year paid, since the payments would have been deductible by the partnership if it had not terminated. Furthermore, the payments to C are includible in C's gross income under section 61(a) in the year received.

[3997] *Whitman & Ransom v. Commissioner*, T.C. Memo. 2005-172.

[3998] See Reg. § 1.736-1(b)(7), Example (1), implementing Reg. § 1.736-1(a)(2) (treating assumption of liabilities treated as a distribution of money under Code § 752 in applying Code § 736).

[3999] See the paragraph of text accompanying fn. 4028 in part II.Q.8.b.ii.(d) Comparing Code § 736(b) to an Installment Sale.

[4000] See part II.C.6 Shifting Rights to Future Profits.

easier it will be to prove reasonableness, since the owner-employee will be earning the compensation over time in a manner that is specifically referred to as an incentive for continued efforts. A challenge is that an appropriate level of compensation may be difficult to determine many years in advance of a sale.

Additional Code § 736 Issues

As discussed above, to the extent permitted by law, generally:

- Returns of basis should be structured as Code § 736(b) payments, because the seller is not taxed on them, and

- Profit on the sale of a partnership should be structured as Code § 736(a) payments, and the sale price should be increased at least enough to compensate the seller for paying taxes at ordinary income and self-employment and similar tax rates instead of any applicable capital gain rates.

II.Q.8.b.ii.(d). Comparing Code § 736(b) to an Installment Sale

Suppose one partner is exiting and being bought out over time, and one or more remaining partners will have higher interests in profits and losses. Should it be structured as a sale from one partner to another, or should the partnership redeem the exiting partner? If the latter, should the partnership issue a note to the partner?

In many cases, the partnership should redeem the exiting partner, documented by the partnership agreement without a separate promissory note. Code § 736 redemptions of a retiring partner are often better than an installment sale; and issuing a note might move the transaction into an unclear tax posture, whereas relying solely on the partnership agreement avoids certain questions. Merely shifting the right to future profits would not generate an income tax consequence;[4001] however, shifting a partner's capital account and any gain or loss inherent in that partner's share of the partnership's existing value would have income tax consequences. We have already seen how Code § 736(a) payments tend to work better for the partnership's value relating to goodwill;[4002] the rest of this part II.Q.8.b.ii.(d) discusses all components of value in a general sense.

Code § 736 taxes the retired partner on Code § 736 payments as if the retired partner were still a partner;[4003] complete liquidation of a partner's interest does not occur until no

[4001] See part II.C.6 Shifting Rights to Future Profits.
[4002] See part II.Q.1.a Contrasting Ordinary Income and Capital Scenarios on Value in Excess of Basis, especially parts II.Q.1.a.i.(f) Partnership Use of Same Earnings as S Corporation in Sale of Goodwill and II.Q.1.a.i.(g) Partnership Use of Same Earnings as C Corporation (Either Redemption or No Tax to Seller per Part II.Q.7.j Exclusion of Gain on the Sale of Certain Stock in a C Corporation) in Sale of Goodwill.
[4003] Reg. § 1.736-1(a)(6). Although a partner retires when he ceases to be a partner under local law, a retired partner or a deceased partner's successor will be treated as a partner for partnership income tax purposes (subchapter K, chapter 1 of the Code) until the partner's interest in the partnership has been completely liquidated. Reg. § 1.736-1(a)(1)(ii). Does this continuation of treatment as a partner apply for purposes of the income in respect of a decedent rules of Code § 1014(c), which is found in subchapter O of chapter 1 of the Code? See part II.I.8.d.iv Treatment of Code § 736 Redemption Payments under Code § 1411.

more payments may be made to the withdrawn partner.[4004] Code § 736(a) payments are taxed in the year for which they are made, rather than in the year of receipt.[4005] Furthermore, except to the extent Code § 751(b) applies, the amount of any gain or loss with respect to payments under Code § 736(b) for a retiring or deceased partner's interest in property for each year of payment shall be determined under Code § 731.[4006]

Code § 736 redemptions do not appear to contemplate the installment sale rules applying. If Code § 736 applies instead of the installment sale rules applying, then, rather than pro rating basis among the scheduled installment payments the way an installment sale would work, basis is applied fully to the earliest payments until it is used up. Thus, Code § 736 payments defer recognition of gain on sale relative to installment sales, a benefit that is not present in the sale of stock in a C or an S corporation; it also allows distributions to be applied to the partner's entire basis in the partnership,[4007] whereas distributions to shareholders are applied pro rata to their shares and are taxed according to the basis in each block of shares,[4008] perhaps heightening the impact of deferred basis recovery for those sales that are redemptions recharacterized as distributions.

The installment sale of a partnership interest can be particularly disastrous if the partnership has significant "hot assets," which can include not only inventory and accounts receivable but also depreciable property,[4009] because income from those items is taxable immediately – even if it exceeds the amount that the seller received up front.[4010] However, depreciable property and certain other property[4011] are not "hot assets" when applying Code § 736.[4012]

Not all redemptions qualify for Code § 736 treatment – they need to be "in liquidation of the interest of a retiring partner or a deceased partner."[4013] If a Code § 736 payment obligation is evidenced as a promissory note rather than contract right, do the installment

[4004] *Brennan v. Commissioner*, T.C. Memo, 2012-209 (citing Reg. § 1.761-1(d) and imposing a negligence penalty for failure to report the partner's distributive share of income earned before the partner received the final payment) , *aff'd* 116 A.F.T.R.2d 2015-6569 (9th Cir. 2015).

[4008] See part II.Q.7.h.ii Taxation of Shareholders When Corporation Distributes Cash or Other Property, especially fn. 3686.
[4009] See part II.Q.8.b.i.(f) Code § 751 – Hot Assets.
[4010] See part II.Q.8.e.ii.(c) Availability of Installment Sale Deferral for Sales of Partnership Interests, especially fn. 4129.
[4011] See part II.Q.8.b.i.(f) Code § 751 – Hot Assets, especially fns. 3952-3959.
[4012] See part II.Q.8.b.i.(f) Code § 751 – Hot Assets, especially fn. 3950.
[4013] Code § 736(a), (b)(1). Reg. § 1.736-1(a)(1)(i) elaborates:

> Section 736 and this section apply only to payments made to a retiring partner or to a deceased partner's successor in interest in liquidation of such partner's entire interest in the partnership. See section 761(d). Section 736 and this section do not apply if the estate or other successor in interest of a deceased partner continues as a partner in its own right under local law. Section 736 and this section apply only to payments made by the partnership and not to transactions between the partners. Thus, a sale by partner A to partner B of his entire one-fourth interest in partnership ABCD would not come within the scope of section 736.

sale provisions apply when the partner receives the note?[4014] The amounts paid for his interest in assets are treated in the same manner as a distribution in complete liquidation under Code §§ 731, 732, and, where applicable, 751.[4015]

Neither Code § 731 nor Code § 732 nor the regulations under either statute address the effect of distributing a note in which the partnership is the maker. For purposes of maintaining capital accounts, generally distributions of notes do not count as distributions except to the extent that the partner disposes of or the partnership repays the note, but a distribution of a note will count as a distribution if the note is readily tradable on an established securities market,[4016] is negotiable,[4017] or perhaps if it is

[4014] See Kim and Saunders, Redeeming a Partner with The Partnership's Note, *TM Memorandum* (BNA) (3/21/2016).

[4015] Reg. § 1.736-1(a)(2), which also refers to Reg. § 1.751-1(b)(4)(ii). Reg. § 1.751-1(b)(4)(ii) provides:

> Section 751(b) does not apply to payments made to a retiring partner or to a deceased partner's successor in interest to the extent that, under section 736(a), such payments constitute a distributive share of partnership income or guaranteed payments. Payments to a retiring partner or to a deceased partner's successor in interest for his interest in unrealized receivables of the partnership in excess of their partnership basis, including any special basis adjustment for them to which such partner is entitled, constitute payments under section 736(a) and, therefore, are not subject to section 751(b). However, payments under section 736(b) which are considered as made in exchange for an interest in partnership property are subject to section 751(b) to the extent that they involve an exchange of substantially appreciated inventory items for other property. Thus, payments to a retiring partner or to a deceased partner's successor in interest under section 736 must first be divided between payments under section 736(a) and section 736(b). The section 736(b) payments must then be divided, if there is an exchange of substantially appreciated inventory items for other property, between the payments treated as a sale or exchange under section 751(b) and payments treated as a distribution under sections 731 through 736. See subparagraph (1)(iii) of this paragraph, and section 736 and § 1.736-1.

However, the scope of unrealized receivables is narrower under Code § 736 than on other transactions involving hot assets; see part II.Q.8.b.i.(f) Code § 751 – Hot Assets, especially the text accompanying fn. 3950.

[4016] In addition to Reg. § 1.704-1(b)(2)(iv)(e)(2) that is reproduced in fn. 4017, consider that Code §§ 731(c)(2)(B)(ii) (any financial instrument which, pursuant to its terms or any other arrangement, is readily … exchangeable for, money or marketable securities) and 731(c)(2)(C) (The term 'financial instrument' includes … evidences of indebtedness ….) treat a distribution of publicly traded debt as a cash distribution.

[4017] Reg. § 1.704-1(b)(2)(iv)(e)(2) provides:

> *Distribution of promissory notes*. Notwithstanding the general rule of paragraph (b)(2)(iv)(b)(5), except as provided in this paragraph (b)(2)(iv)(e)(2), if a promissory note is distributed to a partner by a partnership that is the maker of such note, such partner's capital account will be decreased with respect to such note only when there is a taxable disposition of such note by the partner or when the partnership makes principal payments on the note. The previous sentence shall not apply if a note distributed to a partner by a partnership who is the maker of such note is readily tradable on an established securities market. Furthermore, the capital account of a partner whose interest in a partnership is liquidated will be reduced to the extent of (i) the fair market value, at the time of distribution, of any negotiable promissory note (of which such partnership is the maker) that such partnership distributes to the partner on or after the date such partner's interest is liquidated and within the time specified in paragraph (b)(2)(ii)(b)(2) of this section, and (ii) the fair market value, at the time of

payable upon demand.[4018] However, a leading treatise strongly opposes counting a note in which the partnership is the maker, whether or not negotiable, as a distribution;[4019] the treatise does, suggest, however, reducing the basis available to allocate to other distributed assets by the amount of payments expected to be made.[4020] Issuing a formal

---

> liquidation, of the unsatisfied portion of any negotiable promissory note (of which such partnership is the maker) that such partnership previously distributed to the partner. For purposes of the preceding sentence, the fair market value of a note will be no less than the outstanding principal balance of such note, provided that such note bears interest at a rate no less than the applicable federal rate at time of valuation.

[4018] Consider that Code §§ 731(c)(2)(B)(ii) (any financial instrument which, pursuant to its terms … is readily convertible into, or exchangeable for, money) and 731(c)(2)(C) (The term 'financial instrument' includes … evidences of indebtedness ….) treat a distribution of a demand note as a cash distribution.

[4019] McKee, Nelson & Whitmire, ¶19.05. Distributions in Complete Liquidation of a Partnership Interest, *Federal Taxation of Partnerships & Partners* (WG&L), reasons (footnotes omitted):

> Treating even a secured negotiable promissory note of the partnership as cash or a cash equivalent, the distribution of which triggers gain under § 731(a), would be inconsistent with the statutory scheme of Subchapter K because a § 754 election by the partnership would permit the partnership to increase the basis of its assets as the result of the distribution of zero-basis property. Similarly, treating a partnership's promissory note as property for purposes of applying §§ 731 and 732 also would produce results totally inconsistent with the Subchapter K scheme. Property characterization in connection with a current distribution would give the note a zero basis in the distributee-partner's hands under § 732(a)(1) because it would have a zero basis in the partnership's hands immediately prior to the distribution. Subsequent payments on the note would have to be treated as payments rather than distributions; the expenditure of partnership assets with no corresponding overall impact on the bases of the partners' interests would destroy the symmetry between the partnership's basis in its assets and the partners' bases in their interests, which Subchapter K strives to preserve. Similarly, if a partnership note were treated as property distributed as the sole consideration for the liquidation of a partner's entire interest in the partnership, it would take on a basis equal to the distributee-partner's basis in his interest. If a § 754 election were in effect, the partnership would be required to reduce the basis of its retained assets under § 734(b)(2)(B) by the amount of the distributee-partner's post-distribution basis in the note. By contrast, a cash distribution in the amount of the note would produce an increase in the basis of partnership assets if the cash distributed exceeded the distributee-partner's predistribution basis in his interest. A partnership note should thus not be treated as property under §§ 731 and 732, either. Payments on the note should be treated as distributions of cash, subject to all the rules applicable to such distributions.

[4020] McKee, Nelson & Whitmire, ¶19.05. Distributions in Complete Liquidation of a Partnership Interest, *Federal Taxation of Partnerships & Partners* (WG&L), reasons in a footnote:

> See Reg. § 1.732-1(b) (Where a partnership distributes property (other than money) in liquidation of a partner's entire interest in the partnership, the basis of such property to the partner shall be an amount equal to the adjusted basis of his interest in the partnership reduced by the amount of any money distributed to him *in the same transaction*. (emphasis added)). The reference to the same transaction should be interpreted to refer to the entire series of liquidating distributions in order to be consistent with the Regulations § 1.761-1(d) definition of liquidation. Further, any other interpretation of Regulations § 1.732-1(b) would make the timing of liquidating distributions a key ingredient in determining the basis of distributed property, and would allow taxpayers to artificially inflate the basis of property distributed in liquidation by agreeing to defer cash distributions. For example, assume a partner, whose basis of his interest is $10,000, is to receive $4,000 cash and a capital asset in liquidation of his

note creates much complexity and uncertainty,[4021] so one might consider keeping the payment right a contract right not reduced to a note. On the other hand, using a note and installment sale treatment would enable a cleaner break between the redeemed partner and the partnership and simplify inside basis step up issues (fn. 4028). The clean break from the partnership allows the retiring partner not to be treated as a partner any more for income tax purposes[4022] but also locks in the installment sale gain as income in respect of a decedent, the latter making the installment obligation ineligible for a basis step-up at death, whereas mere Code § 736(b) installments appear eligible for a basis step-up at death.[4023]

One might also be cautious when admitting a partner and redeeming a partner close in time to each, lest the IRS argue a disguised sale between the retiring partner and the new partner.[4024]

> interest. Under the interpretation suggested in the text, the distributed capital asset will have a basis of $6,000 to the partner regardless of the order in which the distributions are made. If subsequent cash distributions are not taken into account in computing the basis of the distributed capital asset, the capital asset will take a basis of $10,000 if it is distributed first and the $4,000 cash distribution will be taxable when received, a combination that would allow the distributee to accelerate losses (by selling the distributed capital asset) in exchange for a deferred gain on the eventual receipt of the cash.

[4021] See Cuff, Distributions of Promissory Notes In Liquidation of a Partner's Interest, *Journal of Real Estate Taxation* (now simply *Real Estate Taxation*) (WG&L), (1st Qtr. 2006) (capital accounting for promissory note distributions to a partner, allocations with respect to contributed property, allocations after a book-up of partnership assets, the minimum gain chargeback, the qualified income offset, unrecaptured Code § 1250 gain, allocation of partnership liabilities, and collapsible partnerships); Cuff, Promissory Notes In Liquidation of a Partner's Interest Still Hold Questions, *Journal of Real Estate Taxation* (now simply *Real Estate Taxation*) (WG&L), (2nd Qtr. 2006) (considering the interplay of the rules described in the 1st Qtr. Article, and the rules on disguised sales and collapsible partnerships).

[4022] See fns. 4003-4004.

[4023] See fns. 4026 and 4027 and part II.H.2.e IRD Assets Not Eligible for a Basis Step-Up.

[4024] See Kim and Saunders, Redeeming a Partner with The Partnership's Note, *TM Memorandum* (BNA) (3/21/2016). Announcement 2009-4 stated:

> Until new guidance is issued, any determination of whether transfers between a partner or partners and a partnership is a transfer of a partnership interest will be based on the statutory language, guidance provided in legislative history, and case law.

Announcement 2009-4 looks askance at a couple of cases in this area, which cases are discussed in the Kim and Saunders article but which might control, notwithstanding the IRS' view. Announcement 2009-4 stated:

> Section 707(a)(2)(B) provides that, under regulations prescribed by the Secretary, if transfers of property between a partner or partners and a partnership, when viewed together, are properly characterized as a sale or exchange of property, such transfers shall be treated as either transactions between the partnership and one who is not a partner or between two or more partners acting other than in their capacity as partners. The legislative history of section 707(a)(2)(B) indicates the provision was adopted as a result of Congressional concern that taxpayers were deferring or avoiding tax on sales of partnership property, including sales of partnership interests, by characterizing sales as contributions of property, including money, followed or preceded by related partnership distributions. See H.R. Rep. No. 861, 98th Cong. 2nd Sess. 861 (1984), 1984-3 (Vol. 2) CB 115. Specifically, Congress was concerned about court decisions that allowed tax-

Letter Ruling 8304059 assumed that using a promissory note to redeem a partner does not necessarily take the transaction out of Code § 736 and ruled that any interest paid constitutes a Code § 707(c) guaranteed payment and that Reg. §§ 1.267(b)-1(b) and 1.707-1(c) prevent Code § 267 from limiting the timing of the interest deduction. Although a Code § 736 payment may bear interest, it need not.[4025] For details on Code § 707(c), see part II.C.8.a Code § 707 - Compensating a Partner for Services

---

free treatment in cases that were economically indistinguishable from sales of property to a partnership or another partner, and believed that these transactions should be treated for tax purposes in a manner consistent with their underlying economic substance. See H.R. Rep. No. 432, 98th Cong. 2nd Sess. 1218 (1984) (H.R. Rep.), and S. Prt. No. 169 (Vol. I), 98th Cong. 2nd Sess. 225 (1984) (S. Prt.) (discussing *Communications Satellite Corp. v. United States*, 625 F.2d 997 (Ct. Cl. 1980), and *Jupiter Corp. v. United States*, 2 Cl. Ct. 58 (1983), both of which involved disguised sales of a partnership interest).

[4025] Garlock, ¶1308 Debt Contributed To And Distributed From Partnerships, *Federal Income Taxation of Debt Instruments* (CCH), asserts in ¶1308.02 Distributions of Debt Instruments from Partnerships, [B] Debt of the Partnership:

> …The real issue, then, is whether interest will be imputed on partnership notes to partners that do not bear adequate stated interest. As noted above, the better view is that interest should not be imputed.
>
> If a partnership's note distributed to a partner is respected for all tax purposes, and if the partner's interest in the partnership is not reduced as a result of the distribution (as would be the case in a situation involving a pro rata distribution of notes to all partners), the determination of its issue price is unclear. The note is not issued for cash or property because the partner is not giving anything to the partnership in exchange for the note. There is no partnership analogue to section 1275(a)(4), which deems a corporation's note distributed to a shareholder as being issued in exchange for property. Hence, section 1273(b) does not provide any rule for determining the note's issue price.[258] Reg. § 1.1273-2(d)(1), which is broader than the corresponding statutory rule, effectively treats any debt instrument not issued for money or publicly traded property or subject to section 1274 as having an issue price equal to its stated redemption price.
>
> If the debt distributed provides for qualified stated interest (QSI), then its stated redemption price at maturity equals its stated principal amount and little is at stake here. The stated interest is respected as interest, and the stated principal amount is respected as principal. Even if the interest is at a rate below the AFR (or is zero), no interest is imputed under section 1274 because the debt was not issued in exchange for property and no interest is imputed under section 7872 because a loan from a partnership to a partner is not one of the categories of loans subject to that section, absent regulations treating the loan as a significant tax effect loan.[259] The only real problem arises if the debt provides for stated interest that is not QSI. Because all payments other than QSI are included in a debt's stated redemption price at maturity,[260] the effect of treating the debt's issue price as being equal to its stated redemption price at maturity would be to recharacterize all stated interest on the debt as principal. It is doubtful that this result was intended. The more sensible rule is to treat the debt instrument as issued for its stated principal amount in this situation.
>
> [258] See ¶ 203. Section 1273(b)(1) and (2) apply to debt instruments not issued for property, but the rules in those paragraphs depend on the price at which the instruments were offered for sale or actually sold, and this does not apply in the present case. Section 1273(b)(4) is generally the rule that applies if no other rule applies (and it deems the issue price to be equal to the stated redemption price at maturity), but it only applies to debt issued for property.
>
> [259] See ¶ 402.02.
>
> [260] See ¶ 202.01.

Performed, which focuses on guaranteed payments for services rather than for capital even though Code § 707 covers both.

It appears that a basis adjustment would apply at the retiring partner's death, which might eliminate a considerable part of the gain to be recognized on future installments (to the extent that gain is not attributable to the deceased partner's share of items constituting income in respect of a decedent)[4026] and might also lead to depreciation and goodwill amortization deductions.[4027] Thus, installment sales lock in gain as income in respect of a decedent, whereas Code § 736 payments appear eligible for a basis step-up. A partnership agreement might even convert Code § 736(a) payments to Code § 736(b) payments upon death, perhaps reducing the installments to take into account the smaller tax burden imposed on the seller.

Suppose that the partnership agreement provided for a Code § 736(b) payment with respect to goodwill. Each Code § 736(b) installment would give rise to a new goodwill asset that could be amortized over 180 months.[4028] Thus, the parties could get some tax arbitrage by the buyer getting ordinary deductions over 15 years when the seller gets capital gain, but query what the time value of money would be like in a business deal, which generally requires a faster payback. If assets have a faster depreciation period but the number of assets to track is high, consider abandoning the use of Code § 736(b) payments and simply using Code § 736(a); see part II.Q.8.b.ii.(c) Comparing Code § 736(a) with (b) Strategically.

Presumably, this lack of installment sale treatment would allow partnership redemptions to avoid the interest on deferred tax liabilities that Code § 453A imposes on installment sales. A prominent treatise states:[4029]

> A selling partner who receives deferred payments and reports gain under § 453 may be subject to acceleration of deferred gain under the pledge rule in § 453A(d) and may be required to pay interest on his deferred tax liability under § 453A(c). There are no analogous provisions applicable to deferred distributions to partners whose partnership interests are liquidated under § 736.

[4026] See part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000, fn. 4153.

[4027] See part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000, especially fn. 4155.

[4028] Reg. § 1.734-1(e)(1), referred to by McKee, Nelson & Whitmire, ¶25.02. Allocations of Section 734(b) Adjustments to Partnership Assets: Section 755, *Federal Taxation of Partnerships & Partners* (WG&L), interpreting the consequence of Rev. Rul. 93-13, which provides:

> If a partnership that has in effect an election to adjust basis under section 754 of the Internal Revenue Code completely liquidates the interest of a partner by agreeing to make a series of cash payments that are treated as distributions under section 736(b)(1), the section 734(b) basis adjustments to partnership property respond in timing and amount with the recognition of gain or loss by the retiring partner with respect to those payments.

If the Code § 736(b) payments were contingent, perhaps Reg. § 1.197-2(f)(2) would apply to amortize the new payments over the remaining months of the 180-month period.

[4029] McKee, Nelson & Whitmire, ¶16.02. Transfers of Partnership Interests by Sale or Exchange: Tax Consequences of Liquidations Compared, *Federal Taxation of Partnerships & Partners*.

The treatise later states:[4030]

> In general, amounts that are computed like interest and paid to a partner for the use of partnership capital constitute guaranteed payments under § 707(c). Because a retired partner who receives post-retirement liquidation distributions is treated as a continuing partner (and not as a partnership creditor) for Subchapter K purposes until his interest is completely liquidated, it seems that any "interest" paid with respect to deferred § 736(b) distributions should be treated as guaranteed payments to the retired partner for the use of his unreturned capital. This notion is buttressed by the fact that § 736(a)(2) treats all payments "made in liquidation of the interest of a retiring partner" as § 707 guaranteed payments if they are determined without regard to partnership income and are not paid for the retiring partner's interest in partnership property under § 736(b).
>
> If deferred liquidation payments cannot bear tax-recognized interest, it follows that the imputed interest rules of §§ 483, 1272, and 7872 do not apply to deferred liquidation distributions under § 736. [In other words, deferred payments under Code § 736 should not be recharacterized as part principal and part interest.] From a policy perspective, inapplicability of these rules may not be as offensive as might first appear, since the timing of any tax benefits and burdens of deferred liquidation payments under § 736 are matched. Thus, because deferred liquidation payments are not treated as liabilities, the continuing partners cannot increase the bases of their partnership interests by the amount of deferred payments under § 752(a). In addition, the partnership is entitled to adjust the basis of its assets under § 734(b) only when the deferred payments are actually made and the retired partner actually recognizes gain or loss. Finally, if amounts payable to a retired partner include interest-like payments, such payments constitute § 736(a)(2) payments that will be included in the income of the retired partner at the same time that they are deducted by the partnership under the matched timing rules of § 707(c).

I am not aware of any primary authority addressing the above issue.

II.Q.8.b.ii.(e). Effect of Code § 736 Payments, Installment Sale Payments, or Deferred Compensation on Balance Sheet

Generally, Code § 736(a)(1) payments that are structured as preferred distributions of profits are considered equity and do not affect the entity's net worth.

On the other hand, Code § 736(a)(2) guaranteed payments and Code § 736(b) installment sale payments would be liabilities on the entity's balance sheet. Similarly, in a cross-purchase, the buyers would have liability on their balance sheets (which can also impede the use of guaranties). Finally, deferred compensation agreements, which

[4030] McKee, Nelson & Whitmire, ¶22.02[4][c] Interest on Deferred Section 736(b) Payments, *Federal Taxation of Partnerships & Partners*. For details on Code § 707(c), see part II.C.8.a Code § 707 - Compensating a Partner for Services Performed, which focuses on guaranteed payments for services rather than for capital even though Code § 707 covers both.

are the corporate attempt to replicate Code § 736(a)(2) guaranteed payments, would also constitute a liability on the entity's balance sheets.

Liabilities on balance sheets can impede access to credit before and during the buy-out period. That a business is transitioning from the successful founder to new management doesn't help that situation.

Thus, Code § 736(a)(1) payments that are structured as preferred distributions of profits might very help the business' operations relative to the other ways of structuring buyouts.

II.Q.8.b.ii.(f). Planning for the 3.8% Tax on Net Investment Income and Passive Loss Rules When Using Code § 736 Payments

For purposes of the 3.8% tax on net investment income,[4031] see part II.I.8.d.iv Treatment of Code § 736 Redemption Payments under Code § 1411.

See also part II.K.1.d Applying Passive Loss Rules to a Retiring Partner under Code § 736.

II.Q.8.b.ii.(g). Code § 736 Payments As Retirement Income – Possible FICA and State Income Tax Benefits

Compensatory payments to be made for the rest of a partner's life, which generally would be Code § 736(a) payments, might be excluded from FICA but would be subject to Code § 409A. See part II.L.7 SE Tax N/A to Qualified Retiring or Deceased Partner.

No state may impose income tax on any retirement income of an individual who is not a resident or domiciliary of that state (as determined under that state's laws).[4032] "Retirement income" includes income from a written plan, program, or arrangement that is in effect immediately before retirement begins and provides retirement payments in recognition of prior service to be made to a retired partner,[4033] if the income is from an

[4031] See part II.I 3.8% Tax on Excess Net Investment Income.

[4032] 4 U.S.C. § 114(a). Missouri Private Letter Ruling No. LR 3570 (1/2/2007) held that this statute protected the following payments from state income tax:

> Applicant is a participant of a Retirement Plan (RP) and is also a participant of an Insurance Plan (collectively, the Plans). The purpose of the Plans is to supplement retirement benefits from the Pension Plan (Pension Plan) and the Retirement Plan for eligible corporate officers in recognition of service to their employer. The administrator of the RP is the Corporation and the administrator of the insurance plan is a committee within the Pension Plan.
>
> ….
>
> In this case the Plans are plans or arrangements as described in IRC section 3121(v)(2)(C) and the monthly payments meet the requirements of section 114(b)(1)(I)(i) of Title 4 of the United States Code. Therefore, for purposes of state income tax, the monthly payments from the Plans received by Applicant will be treated as retirement income as defined in section 114(b) of Title 4 of the United States Code.

[4033] 4 U.S.C. § 114(b)(4) provides:

excess benefit plan[4034] or if the income is part of a series of substantially equal periodic payments payable at least annually for either the life or life expectancy of the recipient (or the joint lives or joint life expectancies of the recipient and a designated beneficiary of the recipient) or a period of not less than 10 years.[4035]

II.Q.8.b.ii.(h). Interaction of Death with Code § 736 Payments

Generally, the retiring partner's payments would consist of:

- Code § 736(a) payments (taxable as ordinary income), grossed up for income taxes as illustrated in the different purchase prices used in parts II.Q.1.a.i.(f) Partnership Use of Same Earnings as S Corporation in Sale of Goodwill and II.Q.1.a.i.(g) Partnership Use of Same Earnings as C Corporation (Either Redemption or No Tax to Seller per Part II.Q.7.j Exclusion of Gain on the Sale of Certain Stock in a C Corporation) in Sale of Goodwill, would be paid during the retiring partner's life, and

- Code § 736(b) payments, not grossed up but generally tax-free because the deceased partner's successor in interest has received a basis step-up, would be made after the retiring partner's death.[4036]

Perhaps the partnership has life insurance to pay a retired partner. The life insurance is received tax-free (so long as the partnership complies with the rules on employer-owned life insurance, which apply to any 5% partner, whether or not the partner actually works in the business).[4037] Thus, the partnership does not need to deduct payments it makes to the retired partner's beneficiaries. Furthermore, the basis step-up mentioned above, if my assumption is correct, means that there is no capital gain tax for the retired partner's beneficiaries to avoid. Therefore, consider converting Code § 736(a) payments to Code § 736(b) payments when a partner dies, perhaps reducing the payments to take into account that the seller does not need to be grossed up to pay the seller's taxes on the distribution.

> For purposes of this section, the term retired partner is an individual who is described as a partner in section 7701(a)(2) of the Internal Revenue Code of 1986 and who is retired under such individual's partnership agreement.

[4034] 4 U.S.C. § 114(b)(1)(I)(ii) refers to:

> a payment received after termination of employment and under a plan, program, or arrangement (to which such employment relates) maintained solely for the purpose of providing retirement benefits for employees in excess of the limitations imposed by 1 or more of sections 401(a)(17), 401(k) , 401(m) , 402(g), 403(b), 408(k), or 415 of such Code or any other limitation on contributions or benefits in such Code on plans to which any of such sections apply.

I have assumed, without verification, that withdrawal from a partnership counts as termination of employment, consistent with the treatment of partners as employees eligible to participate in a qualified retirement plan. Please let me know what you discover when you research this issue.

[4035] 4 U.S.C. § 114(b)(1)(I)(i).

[4036] For the basis step-up, see fns. 4026 and 4027 in part II.Q.8.b.ii.(d) Comparing Code § 736(b) to an Installment Sale.

[4037] See part II.Q.4.g Income Tax Trap for Business-Owned Life Insurance.

II.Q.8.b.iii. Partnership Alternative to Seller-Financed Sale of Goodwill

Is goodwill an asset that belongs to the individual owner or to the entity? Where a non-compete agreement is not in place and business is largely attributable to the close personal relationships that the owner has developed and maintained for decades, goodwill belongs to the owner personally.[4038] Where a contract allocates large amounts to the entity's goodwill and the owner enters into a noncompete agreement to preserve the entity's goodwill, the owner's receipt of noncompetition payments is ordinary income rather than the sale of personal goodwill.[4039] Given that the buyer's deductions relating to goodwill are the same as for a noncompetition agreement,[4040] the seller should consider maximizing the extent to which payments directly to the seller are for personal goodwill rather than a covenant not to compete.[4041]

As a practical matter, often the buyer will be able to pay the promissory note for goodwill only if the business is sufficiently profitable. If the business is not profitable, the seller would need to sue the buyer to enforce the note, and all that lawsuit would accomplish would be a judgment against someone who cannot pay it. The seller's most effective

---

[4038] See part II.Q.1.c.iii Does Goodwill Belong to the Business or to Its Owners or Employees?

[4039] *Muskat v. U.S.*, 554 F.3d 183 (1st Cir. 2009), *aff'g* 101 AFTR 2d 2008-1606 (D.N.H. 2008). When Muskat sold his business to Jac Pac and agreed not to compete, nothing in the contract mentioned that Muskat was selling personal goodwill. The trial court described the negotiations for the sale:

> During the negotiation process, the parties were well-aware of Jac Pac's business goodwill, to which more than $15,000,000 of the purchase price was allocated. Warren testified that he was not aware of any goodwill in the transaction other than Jac Pac's goodwill. The noncompetition agreement defines Goodwill as an asset of Jac Pac including its goodwill and business as a going concern. The purpose of the noncompetition agreement was to protect Jac Pac's Goodwill in the transaction. Muskat acknowledged in the agreement that the noncompetition provisions were necessary to preserve and protect the proprietary rights and the goodwill of [MAC] (including [Jac Pac's goodwill]) and the Related Entities as going concerns. The consideration paid under the agreement was expressly for the covenants not to compete, with no mention of personal goodwill.

The District Court applied First Circuit precedent requiring the taxpayer to produce strong proof before applying tax treatment that varied from the transaction's legal documentation. The First Circuit agreed with the District Court and also clarified what strong proof means: [T]o constitute 'strong proof' a taxpayer's evidence must have persuasive power closely resembling the 'clear and convincing' evidence required to reform a written contract on the ground of mutual mistake.

In *Duffy v. U.S.*, 120 Fed. Cl. 55 (Ct. Fed. Cl. 2015), *aff'd* 117 A.F.T.R.2d 2016-397 (Fed. Cir. 2016), the recipient of proceeds in a settlement in a case for retaliatory firing asserted that the settlement was for personal injury or as compensation for impaired personal goodwill, the latter because he could not find a job because his former employer would not give him a reference. However, the settlement agreement provided that the payment was for the exclusive purpose of avoiding the expense and inconvenience of further litigation. The Court of Claims used that language to throw out the taxpayer's personal injury and goodwill assertions and held for the IRS. The Federal Circuit cited the quoted language and also noted, Mr. Duffy simply extinguished his claims, and any goodwill in his business remained with him.

[4040] Compare Code § 197(d)(1)(A) (goodwill) with Code § 197(d)(1)(E) (covenant not to compete).

[4041] One might also consider whether applicable state law allows the buyer more latitude in imposing restrictions relating to sale of goodwill than for a noncompetition agreement and whether the seller is trading off state law rights for favorable tax treatment.

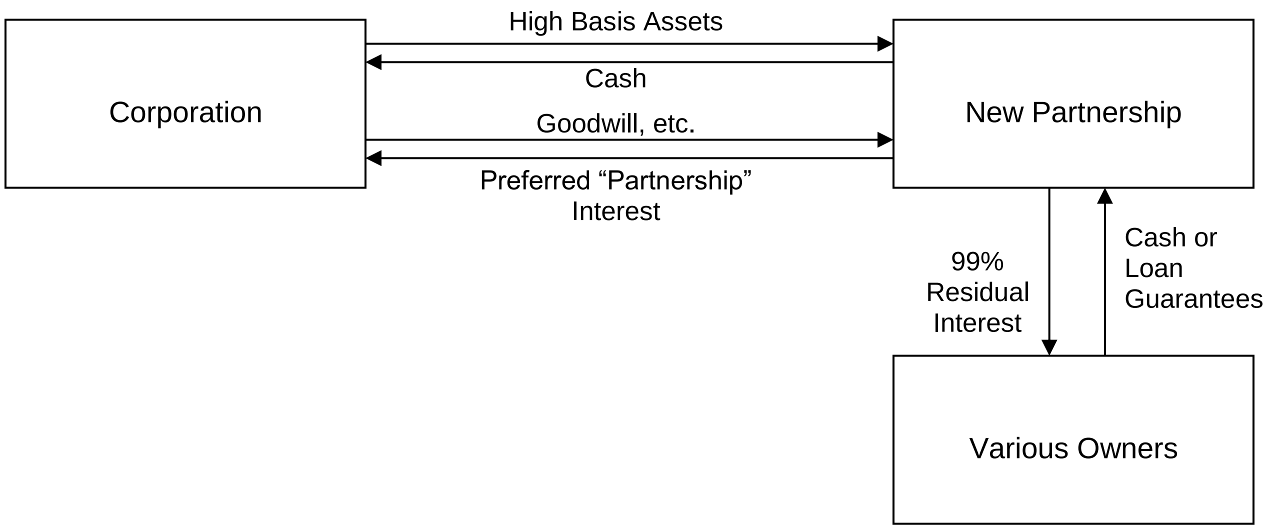
recourse might be to take over the business, which the judgment on the promissory note is unlikely to accomplish without further legal action.

The seller might prefer a mechanism in which:

- The seller has a quicker route to gaining control over the business if the buyer does not attain the results necessary to pay the seller.

- The deal is more tax-efficient than the traditional sale of goodwill.

This mechanism recognizes that, although the transfer of goodwill is technically a debt-financed deal, it really carries risks similar to an equity interest. Below is a diagram showing the transaction, in which the seller contributes the goodwill to a new entity in exchange for what for tax purposes is considered a preferred partnership interest.[4042]



This new arrangement needs to involve a real sharing of profits. Therefore, ideally the existing corporation would continue to own a residual interest. The amount and duration of the retained residual interest depend on the facts and circumstances.

The sale of high basis assets is optional. The high basis assets can instead be included in the contribution to capital. Because preferred partnership rates are higher than interest rates, the new partnership – essentially the various owners who own a 99% residual interest in the new partnership in the agreement – would be incurring a higher cost of capital than if the partnership bought the assets for a note. On the other hand, transferring all assets in the business in one fell swoop is appealing and might be the most practical; for how to transfer assets by operation of law to avoid issues that might arise from piecemeal or inadvertently incomplete transfers, see part II.P.3.i Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization.

[4042] For more information on preferred partnerships, see part II.H.11 Preferred Partnership to Obtain Basis Step-Up on Retained Portion.

6656226

Usually this structure is not for new owners but rather so that the existing owners can own the business in a more tax-efficient structure. The shareholders, as individual owners of the new entity, sign a covenant not to compete (together with other provisions protecting the new entity's intellectual property, etc.) in consideration for their interest in the new entity, as well as contributing some reasonable amount of cash. When an individual retires, that person's capital account is returned over time, and the perpetual residual profits interest is converted to a preferred profits interest until a target amount is reached. This new preferred profits interest would consist of Code § 736(a) payments (taxable as ordinary income), grossed up for income taxes, and Code § 736(b) payments, not grossed up; see part II.Q.8.b.ii.(h) Interaction of Death with Code § 736 Payments.

For the new entity's structure, see part II.E Recommended Structure for Entities, except that this arrangement involves the corporate partner owning not only the 1% of profits commonly shared but also a preferred partnership interest.

Let's look at the non-tax financial issues, then discuss the tax issues in addition to the advantages discussed in parts II.Q.1.a Contrasting Ordinary Income and Capital Scenarios on Value in Excess of Basis and II.Q.7.h Distributing Assets; Drop-Down into Partnership.

II.Q.8.b.iii.(a). Non-Tax Financial Issues When Using a Preferred Partnership to Acquire Goodwill and Other Assets

The seller receives preferred payments equal to the lesser of the entity's net operating cash flow or a target amount before any amounts are distributed to the buyer. Because the payments are targets and not mandatory, they do not constitute debt or a fixed obligation; rather, they are a return of investment to the owners. Stock purchases for a note and deferred compensation constitute liabilities on financial statement that can impair financing– enough that such arrangements might be considered highly unattractive. This liability might very well be required to be disclosed in financial statements even if the event triggering the notes or deferred compensation have not occurred and are unlikely to occur soon. Clients and advisors tend not to consider this issue when planning, so be sure to raise it early and have the CPA directly address this issue.

If the target is not attained, then:

- The deficiency is added to the following year's target amount.

- The seller might be given control over certain aspects of running the business. This could be as modest as limiting the buyer's compensation for services rendered or as far-reaching as taking over control of part or all of the business' operations. The partial or total shift on control would be a focal point of negotiations.

These provisions would be built directly into the partnership agreement. So that they know that authority has not been transferred to the seller, third-party lenders would require assurances that the buyer is complying with the agreement with the seller, thus providing an independent check on the buyer's compliance with the deal.

After the seller has received all that has been bargained-for, the seller would no longer be an owner of the entity.

II.Q.8.b.iii.(b). Tax Issues When Transferring Assets to New Entity

Suppose the seller is an S corporation. If all of an S corporation's assets were sold to a new entity, the corporation would recognize income taxable to its shareholder. The sale of goodwill would be taxable, but the new entity's deduction for that payment would be spread over 180 months (15 years).[4043] Furthermore, if the IRS were to find that goodwill was transferred to the new entity at a substantial value, without the S corporation retaining a sufficient interest in the new entity, then:

- 1. The S corporation would have income equal to the goodwill.

- 2. The shareholders would have immediate dividend income equal to the goodwill, which they then contributed to the new entity without receiving an immediate deduction (the deduction would be spread over 180 months).

If the entity transfers its assets to a new LLC, retaining a preferred interest at no more than 150% of the AFR[4044] that distributes only to the extent of operating cash flow, a sale is presumed not to have occurred.[4045] If the S corporation is receiving a return whose present value (using the AFR) is equal to the value of the contributed goodwill (if any), the S corporation should not be treated as having distributed such goodwill to its shareholders. It might be advisable to give the corporation a small but significant profits interest in the LLC.

This concept of transferring to a new LLC also works better when the transferring entity is a partnership. Suppose the transferring entity sells all of its assets in exchange for a promissory note, and the buyer is unable to make all of the payments. Any basis remaining in the note would need to be written off as a bad debt.[4046] Contrast that to a partnership redemption, in which distributions or payments generally are applied to basis first and generate a gain only after recovering basis,[4047] subject to possible application of the disguised sale rules for payments made in the first two years.[4048]

II.Q.8.c. Related Party Sales of Non-Capital Assets By or To Partnerships

Gain on the sale of property is ordinary income if it is not a capital asset in the hands of the transferee and the sale is between:[4049]

[4043] Code § 197 provides for 15 years, and Reg. § 1.197-2(f)(1)(i) applies this starting with a particular month.
[4044] AFR meaning the applicable federal rate provided under the tax laws as an arms-length interest rate.
[4045] See part II.M.3.e.i.(b) Distributions Presumed <u>Not</u> to Be Disguised Sales.
[4046] CCA 201328031.
[4047] See parts II.Q.8.b.i Distribution of Property by a Partnership and II.Q.8.b.ii Partnership Redemption – Complete Withdrawal Using Code § 736.
[4048] See part II.M.3.e Exception: Disguised Sale, explaining the rules and simple steps to avoid their application.
[4049] Code § 707(b)(2).

- a partnership and a person owning, directly or indirectly, more than 50% of the capital interest, or profits interest, in such partnership, or

- two partnerships in which the same persons own, directly or indirectly, more than 50% of the capital interest or profits interests.

Property subject to this rule includes trade accounts receivable, inventory, stock in trade, and depreciable or real property used in the trade of business.[4050]

The corporate provision most closely related to this one is part II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill), including possible ordinary income taxation when selling to a controlled corporation interests in a partnership holding depreciable property.[4051]

II.Q.8.d. Partnership Division

For an overview with helpful charts and diagrams, see Borden, "Navigating State Law and Tax Issues Raised by Partnership and LLC Reorganizations," *Business Entities* (Jul./Aug. 2014).[4052]

II.Q.8.d.i. Partnership Division - Generally

In the case of a division of a partnership into two or more partnerships, the resulting partnerships (other than any resulting partnership the members of which had an interest of 50% or less in the capital and profits of the prior partnership) are a continuation of the

[4051] See text accompanying fns. 3681-3682.
[4052] RIA Checkpoint *Catalyst*, ¶ 218:123 Tax Characterization of Division Transaction, discussed a ruling:

> In IRS Letter Ruling 201619001, the IRS respected the form of a transaction when a partnership division was one step of a larger transaction. In the ruling, an existing partnership (X) divided into two partnerships, X and M, in a transaction in which the partners of X before the division owned identical interests in both X and M after the division. Following the division, M transferred all of its assets to a third partnership (OP) in exchange for partnership interests in OP and other property (stock of the principal partner of OP, a real estate investment trust (REIT stock)). M then liquidated, distributing the partnership interests to some of its partners and the REIT stock to other partners. The partners receiving the REIT stock agreed to treat the transaction as if they sold their partnership interests in M to OP (see ¶ 218:114). The IRS ruled that the transaction would be treated in accordance with its form—i.e., as a division followed by a merger—and that the partners receiving the REIT stock would be treated as having sold their interests to the resulting merged partnership. IRS Letter Ruling 201619001
>
>> Comment: The IRS could have disregarded the division and recharacterized the transaction in IRS Letter Ruling 201619001 as a transfer of property by X directly to OP in exchange for partnership interests and other property (the REIT stock). In that case, the transaction would have been treated as a part-sale, part-contribution under IRC § 707(a)(2)(B). See Topic #206, Transactions Between Partner and Partnership, at ¶ 206:150. Presumably, the form of the transaction was intended to permit the gain attributable to the receipt of the REIT stock to be taken into account solely by the partners of X that received the stock.

prior partnership.[4053] Thus, generally a partnership can be divided without immediate income tax recognition.[4054]

However, some divisions might be taxable.[4055] Also, tax elections might be revoked and re-started for the new partnership. Furthermore, a division could re-start the seven-year waiting period for measuring Code § 704(c) responsibility; however, if each partner's overall interest in each partnership property does not change, then Code § 704(c)

[4053] Code § 708(b)(2)(B). Even an apparently taxable division might have less adverse tax effects than one might have thought. When a court ordered a partnership's assets sold and three of five partners bought all of the assets and continued operation of the business, the transaction was not treated as a sale of partnership assets to the three remaining partners but rather was considered as a sale or a liquidation of the partnership interests of the two withdrawing partners. Rev. Rul. 66-264.

[4054] Reg. § 1.708-1(d).

[4055] If a foreign person is directly or indirectly involved, see the discussion of when Code § 721(a) does not apply to any deemed contribution to a partnership in part II.M.3.g Exception: Foreign Partner (among various other exceptions to Code § 721(a).

responsibility would not be affected.[4056] Below are the rules governing whether the above events occur.[4057]

II.Q.8.d.ii. Which Partnership Keeps Original Partnership's Tax Identity?

When a partnership divides into two or more partnerships, any resulting partnership(s)[4058] shall be considered a continuation of the prior partnership[4059] if the

---

[4056] The preamble to T.D. 8925 provides:

> To the extent that a partnership division merely affects a restructuring of the form in which the partners hold property (that is, each partner's overall interest in each partnership property does not change), the IRS and Treasury agree that a partnership division should not create new section 704(c) property or section 737 net precontribution gain. However, it is not clear that this result is necessarily appropriate where a division is non-pro rata as to the partners, where some property is extracted from or added to the partnerships in connection with the division, or where new partners are added to the ownership group in connection with the division. The IRS and Treasury intend to study this issue and request comments in this regard.

McKee, Nelson & Whitmire, *Federal Taxation of Partnerships & Partners* (WG&L), ¶ 13.06 Partnership Terminations and Continuations Resulting From Mergers and Divisions, opines:

> The authors believe that, unless there are extenuating circumstances, a division should never be the occasion for the creation of new § 704(c) property or § 737 net precontribution gain. The justification for this conclusion flows from the very nature of a division; it is a restructuring of the form in which partners hold property through partnerships. There are no additions or deletions of property to or from the partnership pool. There is no change in the composition of the partners as a group. Instead of owning all the property through a single partnership, the partners now own it through several partnerships. Why should a transaction that involves so little change be the occasion for the imposition of such draconian rules?
>
> The authors' view is consistent with the rules applicable to § 708(b)(1)(B) terminations which, unlike divisions, involve substantial changes in the composition of the partner group. Both the § 704(c)(1)(B) Regulations and the § 737 Regulations provide that these provisions do not apply to the deemed distribution of interests in the new partnership that is caused by the termination. Subsequent distributions by the new partnership may trigger § 704(c)(1)(B) or § 737 with respect to partners in the new partnership who were partners in the terminated partnership, but only to the same extent they would have been triggered without the termination. [citing Reg. §§ 1.704-3(c)(3), 1.737-2(a).] A similar rule should apply to divisions. While further developments are anticipated, they are not expected any time soon.

[4057] See McKee, Nelson & Whitmire, *Federal Taxation of Partnerships & Partners* (WG&L), ¶ 13.06 Partnership Terminations and Continuations Resulting From Mergers and Divisions. Also note that Reg. § 1.708-1(d)(6) provides:

> If any transactions described in paragraph (d)(3) of this section are part of a larger series of transactions, and the substance of the larger series of transactions is inconsistent with following the form prescribed in such paragraph, the Commissioner may disregard such form, and may recast the larger series of transactions in accordance with their substance.

[4058] As defined in Reg. § 1.708-1(d)(4)(iv), which provides that a resulting partnership is a partnership resulting from the division that exists under applicable jurisdictional law after the division and that has at least two partners who were partners in the prior partnership. For example, where a prior partnership divides into two partnerships, both partnerships existing after the division are resulting partnerships.

[4059] As defined in Reg. § 1.708-1(d)(4)(ii), which provides that the prior partnership is the partnership subject to division that exists under applicable jurisdictional law before the division.

members of the resulting partnership(s) had an interest of more than 50% in the capital and profits of the prior partnership.[4060]

Any other resulting partnership will not be considered a continuation of the prior partnership but will be considered a new partnership.[4061]

If the members of none of the resulting partnerships owned an interest of more than 50% in the capital and profits of the prior partnership, none of the resulting partnerships will be considered a continuation of the prior partnership, and the prior partnership will be considered to have terminated.[4062]

Where members of a partnership which has been divided into two or more partnerships do not become members of a resulting partnership which is considered a continuation of the prior partnership, such members' interests shall be considered liquidated as of the date of the division.[4063]

The resulting partnership that is treated as the divided partnership[4064] shall file a return for the taxable year of the partnership that has been divided and shall include the name, address, and employer identification number (EIN) of the prior partnership.[4065]

All other resulting partnerships that are regarded as continuing and new partnerships shall file separate returns for the taxable year beginning on the day after the date of the division with new EINs for each partnership.[4066]

All resulting partnerships that are regarded as continuations of a prior partnership are subject to preexisting elections that were made by that prior partnership.[4067] A

[4060] Reg. § 1.708-1(d)(1).
[4061] Reg. § 1.708-1(d)(1).
[4062] Reg. § 1.708-1(d)(1).
[4063] Reg. § 1.708-1(d)(1).
[4064] As defined in Reg. § 1.708-1(d)(4)(i), which provides as follows: The divided partnership is the continuing partnership which is treated, for Federal income tax purposes, as transferring the assets and liabilities to the recipient partnership or partnerships, either directly (under the assets-over form) or indirectly (under the assets-up form). If the resulting partnership that, in form, transferred the assets and liabilities in connection with the division is a continuation of the prior partnership, then such resulting partnership will be treated as the divided partnership. If a partnership divides into two or more partnerships and only one of the resulting partnerships is a continuation of the prior partnership, then the resulting partnership that is a continuation of the prior partnership will be treated as the divided partnership. If a partnership divides into two or more partnerships without undertaking a form for the division that is recognized under Reg. § 1.708-1(d)(3), or if the resulting partnership that had, in form, transferred assets and liabilities is not considered a continuation of the prior partnership, and more than one resulting partnership is considered a continuation of the prior partnership, the continuing resulting partnership with the assets having the greatest fair market value (net of liabilities) will be treated as the divided partnership.
[4065] Reg. § 1.708-1(d)(2)(i). The return shall include the names, addresses, and EINs of all resulting partnerships that are regarded as continuing. The return shall also state that the partnership is a continuation of the prior partnership and shall set forth separately the respective distributive shares of the partners for the periods before and including the date of the division and after the date of division.
[4066] Reg. § 1.708-1(d)(2)(i).

subsequent election that is made by a resulting partnership does not affect the other resulting partnerships.[4068]

II.Q.8.d.iii. Assets-Over vs. Assets-Up Division

II.Q.8.d.iii.(a). Assets-Over Divisions

Generally, in an "assets-over" division, an existing partnership transfers some portion of its assets and liabilities (directly or by distributing an interest in an entity the partnership owns) to a new partnership, and immediately thereafter distributes interests in the new partnership to some or all of its partners.

When in doubt, the division is an "assets-over" division.[4069]

In an assets-over division, the following transactions are deemed to have occurred:

- Where at least one resulting partnership is a continuation of the prior partnership:
    - The divided partnership[4070] contributes certain assets and liabilities to a recipient partnership(s)[4071] in exchange for interests in such recipient partnership(s).
    - Immediately thereafter, the divided partnership distributes the interests in such recipient partnership(s) to some or all of its partners in partial or complete liquidation of the partners' interests in the divided partnership.[4072]

4067 Reg. § 1.708-1(d)(2)(ii).
4068 Reg. § 1.708-1(d)(2)(ii).
4069 Reg. § 1.708-1(d)(3)(i). The preamble, T.D. 8925, provides:

> …it is appropriate to require consistency in applying either the Assets-Over Form or the Assets-Up Form to characterize a transfer of assets to a resulting partnership. However, where a single partnership is divided in a transaction that involves a transfer of assets (either actual or deemed) to multiple partnerships, the transfer to each resulting partnership should be viewed separately. As with mergers involving more than two partnerships, it is consistent with the purposes of these regulations, in the context of divisions, to allow the transfer to one resulting partnership to be characterized under the Assets-Over Form while characterizing the transfer to another resulting partnership under the Assets-Up Form. The proposed regulations provided an example that illustrates when such a division accomplished under both the Assets-Over Form and the Assets-Up Form will be respected. The final regulations do not change the example. See § 1.708-1(d)(5) Example 7 of the final regulations. The final regulations also add an example to illustrate when a division accomplished under both the Assets-Over Form and the Assets-Up Form will not be respected.

4070 See fn. 4064.
4071 As defined in Reg. § 1.708-1(d)(4)(iii), which provides that a recipient partnership is a partnership that is treated as receiving, for Federal income tax purposes, assets and liabilities from a divided partnership, either directly (under the assets-over form) or indirectly (under the assets-up form).
4072 Reg. § 1.708-1(d)(3)(i)(A).

- Where none of the resulting partnerships is a continuation of the prior partnership:
  - The prior partnership will be treated as contributing all of its assets and liabilities to new resulting partnerships in exchange for interests in the resulting partnerships.
  - Immediately thereafter, the prior partnership will be treated as liquidating by distributing the interests in the new resulting partnerships to the prior partnership's partners.[4073] Distributions of partnership interests trigger Code § 743 adjustments.[4074]

Code § 737 and Reg. § 1.737-2 do not apply to a transfer by a partnership (transferor partnership) of all of the Code § 704(c) property contributed by a partner to a second partnership (transferee partnership) in a Code § 721 exchange, followed by a distribution as part of the same plan or arrangement of an interest in the transferee partnership (and no other property) in complete liquidation of the interest of the partner that originally contributed the Code § 704(c) property to the transferor partnership.[4075] A later distribution of property by the transferee partnership to a partner of the transferee partnership that was formerly a partner of the transferor partnership is subject to Code § 737 to the same extent that a distribution from the transferor partnership would have been subject to Code § 737.[4076]

II.Q.8.d.iii.(b). Assets-Up Divisions

Generally, in an "assets-up" division, an existing partnership distributes assets and liabilities to some or all of its partners, who then contribute them to a new partnership.

If the divided partnership[4077] distributes certain assets (such that state law causes the partners to be treated as the owners of such assets)[4078] to some or all of its partners in partial or complete liquidation of the partners' interests in the divided partnership and immediately thereafter such partners contribute the distributed assets to one or more

[4073] Reg. § 1.708-1(d)(3)(i)(B).
[4074] See parts II.Q.8.e.i Distribution of Partnership Interests and II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754 Election or Required Adjustment for Built-in Loss).
[4075] Reg. § 1.737-2(b)(2).
[4076] Reg. § 1.737-2(b)(3).
[4077] Which Reg. § 1.708-1(d)(4)(i) requires to be a continuing partnership.
[4078] The preamble in T.D. 8925 says:

> While the IRS and Treasury believe that it should be necessary for a partnership to actually convey ownership of the partnership's assets to its partners in order to follow the Assets-Up Form, it should not be necessary for the partners to actually assume the liabilities of the partnership in order to follow such form. Pursuant to section 752 and the regulations thereunder, a partner essentially is deemed to have directly incurred a share of the partnership's liabilities. Requiring the partners to actually assume debt that they already are deemed to have incurred is unnecessary. Such a requirement also could create a trap for the unwary. If a partner momentarily assumes an amount of the partnership's debt that is less than the partner's share of such debt under section 752 (and other partners momentarily assume an amount of debt in excess of their shares), the partner could inappropriately recognize gain as a result of the deemed distribution.

partnerships in exchange for interests in such recipient partnership(s), the transaction is respected as an "assets-up" division.[4079]

If none of the resulting partnerships is a continuation of the prior partnership, then despite the partners' transitory ownership of some or all of the prior partnership's assets, the form of a partnership division will be respected for Federal income tax purposes if:[4080]

- The prior partnership distributes certain assets (such that state law causes the partners to be treated as the owners of such assets) to some or all of its partners in partial or complete liquidation of the partners' interests in the prior partnership, and

- Immediately thereafter, such partners contribute the distributed assets to a resulting partnership(s) in exchange for interests in such resulting partnership(s).

However, if the prior partnership does not liquidate for state law purposes, then, with respect to the assets and liabilities that, in form, are not transferred to a new resulting partnership, the prior partnership will be treated as transferring these assets and liabilities to a new resulting partnership in an assets-over division.[4081]

II.Q.8.d.iii.(c). Effect of Basis Issues on Type of Division

If the basis of the partnership's assets ("inside basis") exceeds the basis of the partnership interests ("outside basis") involved, then one would tend to want to preserve the inside basis, and an assets-over division would tend to be attractive.

If the outside basis exceeds the inside basis, then one might seek to have the outside basis applied to the partnership's assets in an assets-up division, which involves a liquidating distribution.

See part II.Q.8.b.i.(g) Characteristics of Distributed Property.

II.Q.8.d.iii.(d). Checklist of Issues in Choosing Assets-Over vs. Assets-Up

If any division described above is part of a larger series of transactions, and the substance of the larger series of transactions is inconsistent with following the form prescribed above, the IRS may disregard such form, and may recast the larger series of transactions in accordance with their substance.[4082]

[4079] Reg. § 1.708-1(d)(3)(ii)(A). That form is respected for transfers to a particular recipient partnership only if all assets held by the prior partnership that are transferred to the recipient partnership are distributed to, and then contributed by, the partners of the recipient partnership.
[4080] Reg. § 1.708-1(d)(3)(ii)(B). That form is respected for transfers to a particular recipient partnership only if all assets held by the prior partnership that are transferred to the recipient partnership are distributed to, and then contributed by, the partners of the recipient partnership.
[4081] Reg. § 1.708-1(d)(3)(ii)(B).
[4082] Reg. § 1.708-1(d)(6).

The following are among issues to consider in planning partnership divisions:[4083]

- Any mixing bowl gain in current transaction?[4084]
    - Assets up: Are contributed assets distributed to another partner, or other assets contributed to a Code § 704(c) partner within 7 years?
    - Assets over: If one looks through distributed partnership interest, would underlying asset distribution trigger Code § 704(c)(1)(B) or Code § 737 gain?
    - These issues apply only if the partners do not have identical percentage interests in each partnership.[4085]
- Is there any potential gain under Code § 731(c), relating to a distribution of marketable securities? An assets-over division that distributes a partnership the value of which is at least 20% marketable securities might be an indirect distribution of marketable securities.[4086]

[4083] A selected list from Borden, O'Conner, and Schneider, Partnership and LLC Reorganizations, 2013 *LLC Institute* (10/18/2013).

[4084] See part II.Q.8.b.i.(e) Code §§ 704(c)(1)(B) and 737.

[4085] See fn. 4056.

[4086] See part II.Q.8.b.i.(a) Code § 731, including fns. 3873 and 3874. Letter Ruling 200223036 included the following facts and holding:

> To effect an assets-over form of division, LLC proposes contributing certain assets, including marketable securities, and liabilities to LLC 2 in exchange for 100 percent of the membership interests in LLC 2. Immediately thereafter, LLC will distribute the interests in LLC 2 to Son, Son's Trusts, and Mother's Trust (Distributee Partners) in partial or complete liquidation of their interests in LLC. Consequently, LLC's partnership division will yield two resulting partnerships, LLC and LLC 2. The respective members of LLC and LLC 2 immediately after the division will have had an interest in capital and profits of the prior partnership (LLC before the division) of more than 50 percent. Therefore, we assume that each of the two resulting partnerships will be considered a continuation of the prior partnership. In addition, as the partnership that will transfer the assets and liabilities in the division, LLC should constitute the divided partnership. As the partnership that will be treated as receiving the assets and liabilities, LLC 2 should constitute the recipient partnership.
>
> Because the term money includes marketable securities, LLC's distribution of the interests in LLC 2 to the Distributee Partners will have potential gain consequences under § 731(a). LLC's shares of stock in three public companies meet the definition of marketable securities under § 731(c). In addition, more than 90 percent of the value of LLC 2 will be attributable to the marketable securities, stock shares, it will receive in the division. Therefore, the membership interests in LLC 2 themselves should constitute marketable securities (in an amount equal to their fair market value on the distribution date), the distribution of which should constitute a distribution of money.
>
> A limitation applies to the amount of the distribution of marketable securities (membership interests) that is treated as a distribution of money. The amount of such a distribution is reduced under § 731(c)(3)(B) by a distributee partner's share of the built- in gain in the securities held by the partnership. LLC is concerned that the partnership referred to in § 731(c)(3)(B) in determining the reduction amount may include both continuing partnerships, LLC and LLC 2, thereby eliminating most of the anticipated limitation on any § 731(a) gain resulting from the proposed division.

- Consider future mixing bowl ramifications from creation of new 7 year mixing bowl clock.[4087]
  - Can form be changed to minimize costs?
  - What are future distribution plans?
- Consider effect of debt shifts under Code § 752, because deemed distributions from relief of debt might trigger income.
- Any Code § 708(b)(1)(B) terminations of lower-tier partnerships?
- Compare state or local taxes based on form - particularly transfer taxes.
- Consider potential application of new Code § 704(c)(1)(C) if one or more assets are depreciated, even if overall net appreciation. Code § 704(c)(1)(C) locks in built-in loss to contributing partner and could create differences depending on form chosen.[4088]
- Consider Code § 704(c) generally.
  - If assets up, individual partners are Code § 704(c) contributing partners on specific assets.
  - If assets over, consider Code § 704(c) step in the shoes rules.
  - In either case, if the division is pro rata, no new Code § 704(c) responsibility should be created.[4089]
- If assets up transaction, consider disguised sale rules: were appreciated assets contributed within prior two years?[4090]
- Will assets up transaction result in a shift, at least transitorily, of hot asset sharing or trigger any Code § 751(b) gain?[4091]

II.Q.8.e. Transfers of Partnership Interests

II.Q.8.e.i. Distribution of Partnership Interests

Except as otherwise provided in regulations, for purposes of Code § 708 (termination of partnership), Code § 743 (adjustment to inside basis of partnership property when the outside basis of the partnership interest changes), and any partnership income tax

[4087] See part II.Q.8.b.i.(e) Code §§ 704(c)(1)(B) and 737.
[4088] See fn. 4171.
[4089] See fn. 4056.
[4090] See part II.M.3.e Exception: Disguised Sale.
[4091] See part II.Q.8.e.ii Transfer of Partnership Interests: Effect on Transferring Partner and part II.Q.8.b.i.(f) Code § 751 – Hot Assets.

matters specified in regulations, any distribution of an interest in a partnership (not otherwise treated as an exchange) is treated as an exchange.[4092]

The Conference Report adopting this rule focused on a distribution of a partnership interest by a partnership or corporation.[4093] The relevant regulation focuses on distributions by partnerships;[4094] corporate distributions are already taxable as sales or exchanges through corporate income tax provisions.[4095] However, the statute's literal language is not so limited (and CCA 201726012 took a broad approach),[4096] so this rule also appears to apply to any distribution (other than a specific bequest) of a partnership interest by an estate or trust.[4097] Therefore, when a trust or estate distributes at a 50% or more partnership interest, the partnership terminates, resetting all partnership

---

[4092] Code § 761(e) provides:

> *Distributions of partnership interests treated as exchanges*. Except as otherwise provided in regulations, for purposes of—
>
> (1) section 708 (relating to continuation of partnership),
>
> (2) section 743 (relating to optional adjustment to basis of partnership property), and
>
> (3) any other provision of this subchapter specified in regulations prescribed by the Secretary,
>
> any distribution of an interest in a partnership (not otherwise treated as an exchange) shall be treated as an exchange.

[4093] Tax Reform Act of 1984, P.L. 98-369, 7/18/1984.

[4094] Reg. § 1.761-1(e) provides:

> *Distribution of partnership interest*. For purposes of section 708(b)(1)(B) and § 1.708-1(b)(1)(iv), the deemed distribution of an interest in a new partnership by a partnership that terminates under section 708(b)(1)(B) is not a sale or exchange of an interest in the new partnership. However, the deemed distribution of an interest in a new partnership by a partnership that terminates under section 708(b)(1)(B) is treated as an exchange of the interest in the new partnership for purposes of section 743.

A new partnership formed as the result of the termination of a partnership under Code § 708(b)(1)(B) is not required to use the same method as the terminated partnership with respect to Code § 704(c) property deemed contributed to the new partnership by the terminated partnership under Reg. § 1.708-1(b)(1)(iv); see fn. 2755 in part II.P.1.a.i Allocations of Income in Partnerships.

[4095] See part II.Q.7.h.iii Taxation of Corporation When It Distributes Property to Shareholders. Note that Code § 761(e) was enacted in 1984, before tax-free corporate liquidations were abolished in 1986, so the reference to corporate distributions did make sense when Code § 761(e) was enacted.

[4096] CCA 201726012 (under the signature of David R. Haglund), in addressing, "Issue 1: Whether the transfer of a partnership interest in a complete liquidation to which § 332(a) applies or a reorganization to which § 368(a)(1)(A) and/or (D) applies is a transfer by sale or exchange for purposes of § 743(b)," held:

> The regulations under § 761 do not limit the definition of exchange to taxable exchanges for purposes of § 743. In particular, no provisions limit the definition of an exchange between related parties or members of a consolidated group. The transactions at issue here involved the distribution of a partnership interest as part of the complete liquidation of a corporate partner, and the transfer of a partnership interest as part of the reorganization of a corporate partner. Consequently, these transactions constitute an exchange for purposes of § 743 under the provisions of § 761(e).

[4097] For further analysis, see McKee, Nelson & Whitmire, *Federal Taxation of Partnerships and Partners*, ¶23.05. Special Problems Relating to the Income Taxation of Partnership Interests Held by Estates and Trusts. For how distributions affect allocating tax items under Code § 706, see part III.B.2.j.iii Tax Allocations upon Change of Interest in a Partnership.

elections and stretching the period over which depreciation is deducted.[4098] The distribution is added to all other transfers constituting a sale or exchange under Code §708 within a period of 12 consecutive months to determine whether such a termination occurs.[4099] To avoid such a consequence, one might spread distributions over a period exceeding 12 months.

If a partnership does not make a Code § 754 election when a partner dies, consider asking the partnership to make the election when the decedent's estate or (former) revocable trust funds bequests by distributing the partnership interest, which also might be an event triggering a basis adjustment. The basis adjustment is not tied to any change in basis but rather generally catches up the "inside basis" to the "outside basis,"[4100] so every estate or (former) revocable trust has a chance to make up for the partnership's failure to make a Code § 754 election. Note also that, if a Code § 754 election is in place as of date of death, technically the basis adjustments need to be done not only as of date of death but also as of date of distribution. However, if the adjustments are made as of date of death and the distribution is a carryover basis event, then the fact that outside basis equals inside basis means that no further Code § 743(b) is required.[4101]

However, a disposition of a partnership interest by gift (including assignment to a successor in interest), bequest, or inheritance, or the liquidation of a partnership interest, is not a sale or exchange for purposes of Code § 708.[4102]

Except as noted above, regulations do not appear to expand or contract this rule's scope.

[4098] Reg. § 1.708-1(b)(1); see part II.Q.8.e.iv Transfer of Partnership Interests Resulting in Deemed Termination: Effect on Partnership.
[4099] Reg. § 1.708-1(b)(1).
[4100] See part II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754 Election or Required Adjustment for Built-in Loss), particularly the paragraph in which lies the text accompanying fn. 4149.
[4101] See fn. 4150 and accompanying text.
[4102] Reg. § 1.708-1(b)(2), which was last amended after Code § 761(e) was enacted. Does a distribution from a trust qualify for this exception? I view a trust termination as a disposition of a partnership interest by gift (including assignment to a successor in interest). However, Willis & Postlewaite, ¶ 16.01[7] Termination by Gift, Transfer on Death, or Distribution from Estate or Trust, *Partnership Taxation* (WG&L), does not share my confidence. The Conference Report adopting Code § 761 in 1984 does not expressly address trusts, saying that Code § 761 provides:

> that for purposes of section 708, section 743, or any other provision of subchapter K specified in regulations (not just section 743 as in the House bill and Senate amendment) a distribution of a partnership interest by a partnership or corporation will be treated as a sale or exchange of the interest.

Reg. § 1.708-1(b)(2) was Reg. § 1.708-1(b)(1)(ii) before it was re-designated by T.D. 8925 (1/4/2001). It had the same provision since its adoption in 1956. The 2001 redesignation related to comprehensive rules on partnership mergers and divisions and did not mention Code § 761. When T.D. 8717 (5/8/1997) amended other provisions of Reg. § 1.708-1, it also amended Reg. § 1.761-1, without touching this language. So my best guess is that Treasury did not view Code § 761 as having an impact on that particular sentence.
Distributions from trusts tend to be viewed as gifts. See part II.J.8.d Distribution in Kind.

II.Q.8.e.ii. Transfer of Partnership Interests: Effect on Transferring Partner

II.Q.8.e.ii.(a). Unitary Basis

A partner has a single basis in a partnership interest (determined under Code § 705), even if such partner is both a general partner and a limited partner of the same partnership.[4103] (A partner also has a single capital account that reflects all of the partner's interests, "regardless of the class of interests owned by such partner (*e.g.*, general or limited) and regardless of the time or manner in which such interests were acquired.")[4104]

However, portions of the unitary basis may have different holding periods if acquired at different times.[4105]

When one transfers a partnership interest, the basis allocated to the transferred interest is based on the relationship between the value of the transferor's partnership interest and the value of the transferred interest.[4106] Thus, when one transfers partnership

---

[4103] Rev. Rul. 84-53, citing Rev. Rul. 84-52.

[4104] Reg. § 1.704-1(b)(2)(iv)(b), which is reproduced in the text accompanying fn. 418 in part II.C.7 Maintaining Capital Accounts (And Be Wary of "Tax Basis" Capital Accounts).

[4105] Reg. § 1.1223-3. See McKee, Nelson & Whitmire, ¶ 4.01[2][a] Contributing Partner's Holding Period for His Partnership Interest, *Federal Taxation of Partnerships & Partners* (WG&L). For other aspects of split holding periods, including options to buy, see Bittker & Lokken, ¶ 49.5 Split Holding Periods, *Federal Taxation of Income, Estates, and Gifts* (WG&L), Rev. Ruls. 62-140 and 75-524, and *Commissioner v. Williams*, 256 F.2d 152 (1958), *aff'd on rehearing*, 285 F.2d 582 (5th Cir. 1961).

[4106] Rev. Rul. 84-53 allocates this basis as follows:

> Under section 1.61-6(a) of the regulations, when a partner makes a taxable disposition of a portion of an interest in a partnership, the basis of the transferred portion of the interest generally equals an amount which bears the same relation to the partner's basis in the partner's entire interest as the fair market value of the transferred portion of the interest bears to the fair market value of the entire interest. However, if such partnership has liabilities, special adjustments must be made to take into account the effect of those liabilities on the basis of the partner's interest.
>
> In cases where the partner's share of all partnership liabilities does not exceed the adjusted basis of such partner's entire interest (including basis attributable to liabilities), the transferor partner shall first exclude from the adjusted basis of such partner's entire interest an amount equal to such partner's share of all partnership liabilities, as determined under section 1.752-1(e) of the regulations. A part of the remaining adjusted basis (if any) shall be allocated to the transferred portion of the interest according to the ratio of the fair market value of the transferred portion of the interest to the fair market value of the entire interest. The sum of the amount so allocated plus the amount of the partner's share of liabilities that is considered discharged on the disposition of the transferred portion of the interest (under section 752(d) of the Code and section 1.1001-2 of the regulations) equals the adjusted basis of the transferred portion of the interest.
>
> On the other hand, if the partner's share of all partnership liabilities exceeds the adjusted basis of such partner's entire interest (including basis attributable to liabilities), the adjusted basis of the transferred portion of the interest equals an amount that bears the same relation to the partner's adjusted basis in the entire interest as the partner's share of liabilities that is considered discharged on the disposition of the transferred portion of the interest bears to the partner's share of all partnership liabilities, as determined under section 1.752-1(e).

interests that are discounted relative to one's holding, one also transfers a proportionately smaller portion of basis to the transferee. Note also that, if a transfer is made to a grantor trust, the consequences of the transfer apply only when the trust ceases to be taxed to the grantor.[4107]

Presumably the basis could be divided if the buyer uses an S corporation for a subsequent investment into the partnership. Other consequences of that structure are in part II.L.5 Self-Employment Tax: Partnership with S Corporation Blocker, especially part II.L.5.a S Corporation Blocker Generally.

Also, dividing a partnership would isolate the basis with respect to groups of assets in that the groups of assets are in separate partnerships; any such division should result in percentage interests that are the same in each partnership before or after the division.[4108]

II.Q.8.e.ii.(b). Character of Gain on Sale of Partnership Interest

Although the sale of stock in a corporation (whether or not an S election is in place)[4109] is pure capital gain or loss, the sale of a partnership interest often has an ordinary income component. The gain is ordinary to the extent attributable to the selling partner's indirect interest in the partnership's unrealized receivables, certain depreciable assets, and inventory items;[4110] the rest generally receives capital gain treatment.[4111] If any interest in a partnership which, directly or indirectly, is transferred to (or is held by) the taxpayer in connection with the performance of substantial services by the taxpayer (or any other related person) in a disfavored trade or business, the holding period for long-term capital gain treatment may be extended to over three years (instead of over one year); see part II.M.4.f.ii.(b) Certain Sales of Compensatory Partnership Interests Recharacterized from Long-Term to Short-Term Gains.

"Unrealized receivables" includes previously untaxed rights to payment from the sale of:[4112]

1. Inventory or other ordinary income items, or

2. Services rendered, or to be rendered.

For Reg. § 1.752-1 after October 2016 changes, see part II.C.3 Allocating Liabilities (Including Debt). I have not yet reviewed their interaction with Rev. Rul. 84-53.

[4107] See part III.B.2.d.i Federal Income Tax and Irrevocable Grantor Trust Treatment, especially fn. 4919.

[4108] See part II.Q.8.d Partnership Division, especially fn. 4056.

[4109] Code § 341, before its repeal, provided exceptions for collapsible corporations.

[4110] Code § 751(a); for details on the assets subject to these rules, see part II.Q.8.b.i.(f) Code § 751 – Hot Assets. See also fn. 3860.

[4111] Code § 741.

[4112] Code § 751(c). Untaxed means to the extent that income arising from such rights to payment was not previously includible in income under the method of accounting employed by the partnership. Reg. § 1.751-1(c)(1). Reg. § 1.751-1(c) describes various aspects of various kinds of unrealized receivables.

Depreciable assets to which this provision applies are primarily those the sale of which would trigger depreciation recapture, such as depreciation on tangible personal property or accelerated depreciation on the sale of real property.[4113] However, sometimes depreciable real property without accelerated depreciation might be subject to more onerous provisions.[4114]

"Inventory items" includes not only inventory[4115] but certain other ordinary income items,[4116] whether those assets would receive that treatment in the hands of the partnership or the selling partner.[4117] Under prior law, this provision applies only if those assets are substantially appreciated,[4118] meaning that their fair market value exceeds 120% of the adjusted basis to the partnership of such property.[4119] However, now inventory items do not have to be substantially appreciated to impute ordinary income on the portion of the sale of the partnership interest attributable to such items;[4120] thus, the sale of a partnership interest is treated less favorably than a redemption,[4121] since a redemption triggers ordinary income attributable to inventory items only if the inventory items are substantially appreciated.[4122]

When a partner transfers part or all of the partner's interest via gift, part of that transfer will be treated as a sale if the partner's share of partnership liabilities exceeds the adjusted basis of the partner's partnership interest. The transfer is treated as such because liability is shifting from the donor to the donee, and the donor is treated as having received cash to the extent that the donor's share of liabilities is reduced. The shift can be analyzed in two potential ways. One way would be to argue the shift is governed by Code § 752(b), which treats a reduction in a partner's share of partnership liabilities as a deemed cash distribution. In this case, the donor would recognize gain to the extent the distribution exceeded his partnership interest adjusted basis. However, another view is that only a portion of the basis of the partner's partnership interest

[4113] See part II.Q.8.b.i.(f) Code § 751 – Hot Assets. The flush language of Code § 751(c) refers to mining property, stock in a DISC, section 1245 property, stock in certain foreign corporations, section 1250 property, farm land, franchises, trademarks, or trade names, and an oil, gas, or geothermal property, but only to the extent of the amount which would be treated as gain to which certain recapture provisions would apply if, at the time of the sale of the partnership interest, such property had been sold by the partnership at its fair market value. Similar treatment applies any market discount bond and any short-term obligation to the extent of the amount would have been treated as ordinary income; however, this sentence does not apply with respect to the redemption of a partnership interest under Code § 736.
[4114] See part II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill), particularly fn. 3681 the sale of partnership interests to a controlled corporation, which is which is further reaching than Code § 751.
[4115] Code § 751(d)(1).
[4116] Code § 751(d)(2).
[4117] Code § 751(d)(3).
[4118] Reg. § 1.751-1(a)(1).
[4119] Reg. § 1.751-1(d)(1).
[4120] Before P.L. 105-34 was amended in 1997, Code § 751(a)(2) applied to impute ordinary income on the sale of a partnership interest with respect to inventory items of the partnership which have appreciated substantially in value. P.L. 105-34 struck which have appreciated substantially in value from Code § 751(a)(2).
[4121] Milo, The Tax Cost of Hot Assets upon the Disposition of a Partnership Interest, *The Tax Advisor* (August 2010).
[4122] Code § 751(b)(3).

should be allocated to the sale portion of the transfer, and gain is recognized to the extent the shift in liabilities exceeds the allocated portion of the adjusted basis.[4123]

For the effect of a transfer on the allocation of income reported on the involved partners' K-1s, see part III.B.2.j.iii Tax Allocations upon Change of Interest in a Partnership, found within part III.B.2.j Tax Allocations upon Change of Interest.

Rev. Rul. 91-32 held that gain or loss of a foreign partner that disposes of its interest in a partnership that is engaged in a trade or business through a fixed place of business in the United States will be United States source effectively connected income (ECI) gain or will be ECI loss that is allocable to United States source ECI gain, to the extent that the partner's distributive share of unrealized gain or loss of the partnership would be attributable to ECI (United States source) property of the partnership. However, *Grecian Magnesite Mining v. Commissioner*, 149 T.C. No. 3 (7/13/2017),[4124] repudiated Rev. Rul. 91-32.[4125] Before getting to that analysis, it explained that Code § 741 works solely

[4123] Code § 752(d).

[4124] The Official Tax Court Syllabus described the case as follows:

> In 2001 P, a foreign corporation, purchased an interest in PS, a U.S. limited liability company that was treated as a partnership for U.S. income tax purposes. From 2001 to 2008 income was allocated to P from PS, and P paid income tax in the United States. In 2008 P's interest was redeemed by PS, and P received two liquidating payments, one in July 2008 and the second in January 2009 but deemed to have been made on December 31, 2008. P realized gain totaling over $6.2 million, of which $2.2 million was deemed attributable to U.S. real property interests (and which P now concedes is taxable income). P contends that the remainder—"disputed gain" of $4 million—is not taxable for U.S. purposes. P timely filed a Form 1120-F, "U.S. Income Tax Return of a Foreign Corporation", for 2008, wherein it reported its distributive share of PS's income, gain, loss, deductions, and credits, but did not report any income it received from the redemption of its partnership interest (i.e., neither the now-conceded real estate gain nor the disputed gain). P did not file a return or pay any income tax in the United States for 2009. Ps reporting position was recommended to it by an experienced certified public accountant ("C.P.A.") who was recommended to P by its U.S. lawyer.
>
> R prepared a substitute for return pursuant to sec. 6020(b) for P's 2009 year, and issued a notice of deficiency for 2008 and 2009, determining, inter alia, that P must recognize its gain on the redemption of its partnership interest for U.S. tax purposes as U.S.-source income that was effectively connected with a U.S. trade or business, consistent with Rev. Rul. 91-32. P timely filed a petition with this Court.
>
> *Held*: P's disputed gain was capital gain that was not U.S.-source income and that was not effectively connected with a U.S. trade or business. This Court will not follow Rev. Rul. 91-32. P is therefore not liable for U.S. income tax on the disputed gain.
>
> Held, further, as to the now-conceded tax liability for gain on the real estate, P is not liable for the sec. 6662(a) penalty for 2008 or the additions to tax under sec. 6651(a)(1) and (2) for 2009, because P reasonably relied on the erroneous advice of the C.P.A.

[4125] The court summarized:

> Our level of deference to agency interpretations of law varies. Where the interpretation construes an agency's own ambiguous regulation, that interpretation is accorded deference, *Rand v. Commissioner*, 141 T.C. 376, 380-381 (2013) (citing *Auer v. Robbins*, 519 U.S. 452, 461 (1997)). On the other hand, where a revenue ruling improperly interprets the text of relevant statutes and has inadequate reasoning, we afford it no deference at all. *PSB Holdings, Inc. v. Commissioner*, 129 T.C. 131, 145 (2007). Between these poles, we follow revenue rulings to the extent that they have the "power to persuade". See *id.* at 144.

at the entity level (which is the focus of this part Character of Gain on Sale of Partnership InterestII.Q.8.e.ii.(b) and why that case is mentioned here), treating the partnership interest as a single unitary asset, without looking through to the underlying assets, absent any overriding provision:[4126]

Rev. Rul. 91-32 is not simply an interpretation of the IRS's own ambiguous regulations, and we find that it lacks the power to persuade. Its treatment of the partnership provisions discussed above in part II.B is cursory in the extreme, not even citing section 731 (which, as we set out, yields a conclusion of "gain or loss from the sale or *exchange of the partnership interest*" (emphasis added)). The ruling's subchapter K analysis essentially begins and ends with the observation that "[s]ubchapter K of the Code is a blend of aggregate and entity treatment for partners and partnerships." We criticize the ruling's treatment of the subchapter N issues in notes 22 and 24 below. We decline to defer to the ruling. We will instead follow the Code and the regulations to determine whether the disputed gain is effectively connected income.

[4126] The court reasoned:

The Commissioner posits that the only way to reconcile the two provisions is to interpret section 741 as applicable only to the character of the gain recognized—i.e., as capital rather than ordinary. That is, the Commissioner maintains that while section 741 expressly requires that the gain "shall be considered as gain or loss from the sale or exchange of a capital asset", the statute does not preclude treating the (capital) gain as arising not from the sale of the partnership interest per se (which the entity theory would yield) but from the partnership's underlying assets that give value to the partnership interest (which the aggregation theory would yield).

It is true that, in providing that the gain "shall be considered as gain * * * from the sale or exchange of a capital asset", section 741 does not specify which asset. However, there are four flaws in the Commissioner's approach that cause us to reject it. First, he exaggerates the conflict between an "entity theory" construction of section 741 and the existence of an exception in section 897(g). In its own terms, section 741 acknowledges one exception ("except as otherwise provided in section 751"),[16] so section 741 is only a general rule, not a rule of absolute and universal application. Congress is always free, having enacted a general rule, to enact exceptions.

[16] Section 751 is a specific exception to section 741 that causes unrealized receivables and inventory items to be addressed separately from the remainder of the partnership interest when that interest is sold or liquidated. In the context of liquidating distributions, the partnership is deemed to have bought the liquidated partner's share of those assets from that partner, so that that partner has gain of a character and amount consistent with such a hypothetical sale. The IRS did not assert application of section 751(b) in the SNOD, and the Commissioner has not asserted it as an alternative position in this case. Consequently, we do not consider section 751 further. We note that by the express terms of section 741, section 751 is (like section 897(g); see supra note 11) an exception, and it mandates an "aggregation" approach for characterizing only gain "attributable to" unrealized receivables or inventory items". This statute thus presumes the existence of a general rule to which this aggregation approach is an exception. Section 751 does not provide (and the Commissioner does not contend that it provides) a general rule that all gain from a partner's sale of its partnership interest shall be considered an amount received from the sale of the partnership's properties of whatever types.

Second, the Commissioner's reading of section 741 gives insufficient effect to one word in the statute. Section 741 provides that income realized on the sale of a partnership interest "shall be considered as gain * * * from the sale or exchange of a capital *asset*". (Emphasis added.) Congress used the singular "asset", rather than the plural "assets". This singular wording is more consistent with the treatment of the sale of a partnership interest according to the entity theory, under which the selling partner is deemed to have sold only one asset (its partnership interest) rather than being deemed to have sold its interest in the multiple underlying assets of the partnership. See also *P.B.D. Sports, Ltd. v. Commissioner*, 109 T.C. 423, 438 (1997) ("Generally, subchapter K employs the entity approach in treatin[g] transfers of partnership interests. The sale of a partnership interest is treated as the sale of a single capital asset rather than as a transfer of the individual assets of the partnership. See secs. 741 and 742."); *Unger v. Commissioner*, T.C. Memo. 1990-15 (listing section 741 as an example of the entity theory in the Internal Revenue Code), *aff'd*, 936 F.2d 1316 (D.C. Cir. 1991). And absent some overriding mandate, section 731 directs that gain or loss on a distribution (such as the one at issue) "shall be considered as gain or loss from the sale or exchange of the partnership interest of the distributee partner" (that is, as directed by section 741).

Third, Congress has explicitly carved out a few exceptions to section 741 that, when they apply, do require that we look through the partnership to the underlying assets and deem such a sale as the sale of separate interests in each asset owned by the partnership. If Congress had intended section 741 to be interpreted as a look-through provision, these exceptions in sections 751 and 897(g) would be superfluous. See *TRW Inc. v. Andrews*, 534 U.S. 19, 31 (2001).

Accordingly, the enactment of section 897(g) actually reinforces our conclusion that the entity theory is the general rule for the sale or exchange of an interest in a partnership. Without such a general rule, there would be no need to carve out an exception to prevent U.S. real property interests from being swept into the indivisible capital asset treatment that section 741 otherwise prescribes.

Fourth, section 731(a)—brought into this analysis by the express wording of section 736(b)(1)—makes explicit that the "entity theory" generally applies to a partner's gain from a distribution:

> Any gain or loss recognized under this subsection shall be considered as gain or loss *from the sale or exchange of the partnership interest* of the distributee partner.

Sec. 731(a) (emphasis added). This wording could hardly be clearer. The partnership provisions in subchapter K of the Code provide a general rule that the "entity theory" applies to sales and liquidating distributions of partnership interests—i.e., that such sales are treated not as sales of underlying assets but as sales of the partnership interest. Of course, Congress may enact exceptions or different rules, such as for foreign partners, and we consider that possibility below; but we begin our analysis with this generality from subchapter K.

The Commissioner's interpretation of the Code acknowledges the same sequence we have followed—i.e., that section 736(b)(1) leads to section 731, which in turn leads to section 741, but he evidently thinks such an analysis stops short. The Commissioner apparently maintains that, after applying those sections in that order, one must still return to section 736(b)(1)—so that, while section 741 mandates the capital character of the income, in the end the distribution is still characterized as "payments * * * made in exchange for the interest of such partner in partnership property". Sec. 736(b)(1) (emphasis added). The emphasized phrase certainly does appear in section 736(b)(1), and the analysis in this case begins there precisely because GMM did indeed receive payments that, given the nature of a partnership, can be said to have been made ultimately in exchange for GMM's interest in the partnership's various items of property. However, sections 736(b)(1), 731(a), and 741 tell us what to do with such payments for tax purposes; and as we have shown, they direct us to a conclusion: "gain or loss from the sale or exchange of the partnership interest", sec. 731(a), which is "a [singular] capital asset", sec. 741. We see no reason to abandon that conclusion, return to section 736(b)(1), and halt at the phrase that most nearly coincides with the Commissioner's position.[17]

[17] Indeed, when we read section 736(a) and (b) together, it becomes clear that the role of the words "partnership property" in section 736(b) is to distinguish distributions made for such property from those made out of a partner's "distributive share" of entity-level

In sum, section 736(b)(1) provides that payments such as those giving rise to the disputed gain "*shall* * * * be considered as a distribution by the partnership"; section 731(a) provides that such gain "shall be considered as gain * * * from the sale or exchange of the partnership interest of the distributee partner"; and section 741 provides that such gain "*shall* be considered as gain * * * from the sale or exchange of a capital asset". (Emphasis added.) Accordingly, GMM's gain from the redemption of its partnership interest is gain from the sale or exchange of an indivisible capital asset—i.e., GMM's interest in the partnership.

II.Q.8.e.ii.(c). Availability of Installment Sale Deferral for Sales of Partnership Interests

Generally, sales of partnership interests are eligible for installment sale deferral under Code § 453 (subject to the limitations of Code §§ 453A and 453B).[4127]

However, the income from the sale of a partnership interest may not be reported under the installment method to the extent it represents income attributable to some of the

---

partnership income (as in section 736(a)(1)) or as a "guaranteed payment" (as in section 736(a)(2)). A partner's "distributive share", sec. 736(a)(1), is governed by sections 704(b) and 701; the tax treatment of a "guaranteed payment", sec. 736(a)(2), is provided in section 707(a); and payments for partnership property, sec. 736(b), are "considered as a distribution by the partnership"—i.e., are treated as provided in section 731. In none of these instances is the ultimate tax treatment of the transfer of money or property from a partnership to a partner prescribed solely by reference to section 736.

The Commissioner also argues that section 741 should not be applied to characterize the income at issue because applying it in that manner would contradict "Congress' intent in enacting section 865", the sourcing rule we discuss below in part IV.B. The Commissioner argues that, when addressing a partnership question under subchapter K of the Code (which deals primarily with partners and partnerships) and applying a Code section (such as section 865) that is outside of subchapter K, one must look to "the nature of the partnership interest involved, together with the intent and purpose of the non-subchapter K section being applied." Using this rule, the Commissioner explains that not section 741 but rather section 736(b)(1) more appropriately characterizes the type of income here—i.e., as a payment for GMM's interest in the "partnership property". We see no basis for the Commissioner's selection of this particular phrase from section 736(b)(1) as the guiding star for navigating the intersection of partnership taxation and the taxation of international transactions, and we have already explained why this phrase is at the beginning and not the end of the analysis. More important, the Commissioner cites no authority for his posited rule, which seems (at least as he uses it here) to shortcut or distort the subchapter K analysis by invoking a purpose (not explicitly enacted) that he discerns in subchapter N. The Commissioner has not convinced us to reconsider the argument that we rejected 38 years ago when it was advanced by the taxpayer in Pollack. Addressing ourselves to the statutory text, we conclude that subchapter K mandates treating the disputed gain as capital gain from the disposition of a single asset, and in part IV.B below we apply the provisions of section 865 accordingly.

[4127] Rev. Rul. 76-483. For more discussion on these limitations and recommended strategies, see part II.G.14 Limitations on the Use of Installment Sales.

partnership's "hot assets" under Code § 751 [4128] that would not be eligible for the installment sale treatment if sold directly.[4129]

The IRS has asserted that installment sale treatment is not available for partnership interests to the extent that the cash-basis partnership's underlying assets constitute unrealized receivables for payment for services rendered;[4130] consider whether that is a

---

[4128] See part II.Q.8.b.i.(f) Code § 751 – Hot Assets.

[4129] Rev. Rul. 89-108 held that the income from the sale of a partnership interest may not be reported under the installment method to the extent it represents income attributable to the partnership's substantially appreciated inventory under Code § 751(d) that would not be eligible for the installment sale treatment if sold directly. It explained:

> Under section 741 of the Code, the sale of a partnership interest generally is treated as the sale of a single capital asset without regard to the nature of the underlying partnership property. See H.R. Rep. No. 1337, 83d Cong., 2d Sess. 70 (1954). In this respect, the tax treatment of the sale of a partnership interest differs from that accorded the sale of a sole proprietorship. See, *e.g.*, *Williams v. McGowan*, 152 F.2d 570 (2d Cir. 1945), which held that the sale of an entire business as a going concern was the sale of the individual assets of the business. See also Rev. Rul. 68-13, 1968-1 C.B. 195, which holds that the installment sale of a sole proprietorship is generally considered to be a sale of individual assets of the proprietorship for purposes of applying section 453.
>
> Section 751 of the Code was enacted to prevent the conversion of certain potential ordinary income into capital gain upon the sale or exchange of a partnership interest. This section, in effect, severs certain income items from the partnership interest. H.R. Rep. No. 1337, *supra*, at 70, 71, and S. Rep. No. 1622, 83d Cong., 2d Sess. 99 (1954). Thus, to the extent a partnership interest represents substantially appreciated inventory or unrealized receivables described in section 751, the tax consequences to the transferor partner are the same tax consequences which would be accorded an individual entrepreneur. H.R. Rep. No. 1337 at 71, and S. Rep. 1622, *supra*, at 99. In effect, the transferor partner is treated as disposing of the property described in section 751 independently of the rest of his partnership interest. S. Rep. No. 1622 at 98, 99. *George Edward Quick Trust v. Commissioner*, 54 T.C. 1336 (1970), *acq.* 1970-2 C.B. xxi, *aff'd per curiam*, 444 F.2d 90 (8th Cir. 1971); *Woodhall v. Commissioner*, T.C. Memo. 1969-279, *aff'd*, 454 F.2d 226 (9th Cir. 1972).
>
> Gain recognized under section 741 of the Code on the sale of a partnership interest is reportable under the installment method. See Rev. Rul. 76-483, 1976-2 C.B. 131. However, because section 751 effectively treats a partner as if the partner had sold an interest in the section 751 property of the partnership, the portion of the gain that is attributable to section 751 property is reportable under the installment method only to the extent that income realized on a direct sale of the section 751 property would be reportable under such method. Because the installment method of reporting income would not be available on a sole proprietor's sale of the inventory, the installment method is not available for reporting income realized on the sale of a partnership interest to the extent attributable to the substantially appreciated inventory which constitutes inventory within the meaning of section 453(b)(2)(B).
>
> Accordingly, P's income from the sale of the partnership interest may not be reported under the installment method to the extent it represents income attributable to the partnership's substantially appreciated inventory which would not be eligible for installment sale treatment if sold directly. The balance of the income realized by P from the sale of the partnership interest is reportable under the installment method.

[4130] In CCAs 200722027 and 200728001, the IRS asserted that installment sale treatment is not available for partnership interests to the extent that the cash-basis partnership's underlying assets constitute unrealized receivables for payment for services rendered, based on its interpretation of some cases as holding that compensation for services could not be reported valid argument in light of *Grecian Magnesite Mining v. Commissioner*, 149 T.C. No. 3 (2017) (repudiating Rev. Rul. 91-32).[4131]

Although publicly traded stock is not eligible for installment sale treatment,[4132] the sale of an interest in a partnership owning publicly traded stock might not preclude deferral.[4133] For partnerships that have a lot of hot assets – especially those with significant depreciable property, a Code § 736 redemption[4134] often would generate a much better result.[4135]

II.Q.8.e.iii. Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations

II.Q.8.e.iii.(a). Illustration of Inside Basis Issue

For a more generic description of inside basis and outside basis, see my blog article, "Tax basis: The key to reducing gain on sale or deducting asset purchases."[4136]

Here is an example:

Suppose each of A and B contributes $500,000 to a partnership that buys land worth $1 million without any debt.

Each of A and B has $500,000 basis in his/her/its partnership interest. This is called "outside basis."

---

under the installment method. See *Sorensen v. Commissioner*, 22 T.C. 321 (1954) (a reviewed decision), *followed Mingo v. Commissioner*, T.C. Memo. 2013-149, *aff'd* 773 F.3d 629 (5th Cir. 2014) (the latter also holding that the disallowance of the installment method is a change of accounting method triggering adjustments under Code § 481, to which the statute of limitations does not apply).

4131 The case is discussed more fully in part II.Q.8.e.ii.(b) Character of Gain on Sale of Partnership Interest, especially fns. 4124-4126.

4132 Code § 453(k)(2).

4133 The legislative history to the Tax Reform Act of 1986, P.L. 99-514, suggests that the sale of a partnership interest would be eligible for installment treatment as follows:

> The committee intends that any Treasury regulations would not deny use of the installment method if the seller could not have sold, or caused the sale of, the publicly traded stock or securities directly. For example, a retiring partner in a large investment partnership makes an installment sale of his partnership interest, a substantial portion of the value of which is attributable to stocks and securities held by the partnership. Provided that the retiring partner, could not have sold or caused the sale of the partnership's assets directly, the gain on the sale of the partnership interest may be reported on the installment method.

The letter ruling described in fn. 2981 held that the installment method applied to the sale of stock in an S corporation that appears to have held only marketable securities, suggesting that Code § 453(k)(2) would not apply absent regulations being promulgated.

4134 See part II.Q.8.b.ii Partnership Redemption – Complete Withdrawal Using Code § 736.

4135 See part II.Q.8.b.ii.(d) Comparing Code § 736(b) to an Installment Sale, especially fn. 4010.

4136 http://www.thompsoncoburn.com/insights/blogs/business-succession-solutions/post/2017-01-10/tax-basis-the-key-to-reducing-gain-on-sale-or-deducting-asset-purchases.

The partnership's $1 million basis in the land is called "inside basis," because it is the basis of assets inside the partnership.

Suppose the land increases in value to $1.5 million, and C buys B's partnership interest for $750,000. C's outside basis is $750,000; however, C's inside basis – C's share of the partnership's basis in the land – would be $500,000, the same as B's inside basis.

Thus, if the partnership sold the land for $1.5 million, the partnership would recognize a $500,000 gain – the $1.5 million proceeds minus the land's $1.0 million inside basis. Each of A and C would report $250,000 of gain ($500,000 gain multiplied by their respective 50% interest in the partnership).

C, who paid $750,000 for essentially one-half of the land, is paying tax on C's $750,000 one-half of the proceeds, which is an unfair result.

C has two ways out of this dilemma. One way is to liquidate the partnership or fully redeem C's partnership interest. C's outside basis is $1 million, consisting of C's $750,000 purchase price[4137] and $250,000 of gain.[4138] C recognizes a $250,000 loss, which is C's $1 million outside basis minus the $750,000 cash that C receives in liquidation. For an S corporation analogy, see part II.H.8 Lack of Basis Step-Up for Depreciable or Ordinary Income Property in S Corporation.

The other way is, on the partnership tax return for the year in which C buys B's interest (if this election is not already in place), the partnership elects to adjust C's share of the inside basis of the land. Thus, C would have a separate, additional $250,000 inside basis in the land, so that C's inside basis would be $750,000 ($500,000 from B's inside basis plus $250,000 additional special asset). This option is not available to a C or an S corporation. For more details on when an inside basis step-up applies, see part II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754 Election or Required Adjustment for Built-in Loss). For a single member LLC, any change to outside basis would automatically apply to the inside basis.[4139]

However, Code § 338(h)(10) provides a special opportunity when all of the stock in an S corporation is sold and the S corporation is liquidated. The election allows the parties to treat all of the S corporation's assets as having been sold to the person that bought the S corporation stock, enabling the buyer to get a new tax basis on the assets. Meanwhile, the deemed gain on sale of the S corporation's assets increases the basis of the stock in the S corporation, so that often the shareholders are not taxed on the stock's sale and might even have a loss on the sale.[4140] The main downside[4141] to the selling

---

[4137] Code § 742.

[4138] Code § 705(a)(1)(A).

[4139] See fn. 1395 in part II.H.2.h Basis Step-Up for Property Held Outside an Entity; Moving Liabilities Outside of an Entity to Maximize Deductions for Estate Tax Purposes, the latter which points out that results may be better not holding assets in an entity.

[4140] Reg. § 1.338(h)(10)-1(d)(5)(i) provides:

> *In general*. If T is an S corporation target, S corporation shareholders (whether or not they sell their stock) take their pro rata share of the deemed sale tax consequences into account under section 1366 and increase or decrease their basis in T stock under section 1367. Members of the selling consolidated group, the selling affiliate, or S corporation shareholders are treated as if, after the deemed asset sale in

shareholders is that the deemed asset sale might trigger ordinary income taxation (including without limitation depreciation recapture of Code § 1245 property, which is generally depreciable tangible personal property) or higher capital gain taxation (including without limitation the sale of Code § 1250 property, which generally is depreciable real estate), whereas they generally would have paid lower regular long-term capital gain rates on the sale of their S corporation stock had they not made the Code § 338(h)(10) election.

Code § 338(h)(10) is also available for C corporations, but it does not provide the same benefits to the sellers, in that the corporation's recognition of gain on its deemed sale of assets does not increase its shareholders' stock basis.

II.Q.8.e.iii.(b). Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754 Election or Required Adjustment for Built-in Loss)

Upon a partner's death (including the death of the grantor of a revocable trust[4142] or of the beneficiary of a QTIP trust[4143]) or on the sale or exchange of a partnership interest, the partnership's property's basis is adjusted under Code § 743 if the partnership has in effect a Code § 754 election[4144] and makes a Code § 754 election on the return that

---

> paragraph (d)(3) of this section and before the close of the acquisition date, they received the assets transferred by old T in the transaction described in paragraph (d)(4)(i) of this section. In most cases, the transfer will be treated as a distribution in complete liquidation to which section 331 or 332 applies.

See part II.Q.7.a.vii Corporate Liquidation for the tax consequences of the deemed liquidation.

[4141] For former C corporations that have made their S election too recently, beware of part II.P.3.c.ii Built-in Gain Tax.

[4142] Rev. Rul. 79-84, which reasoned as follows in arriving at that conclusion:

> Before A's death, A had powers over T of the types described in sections 676 and 677 of the Code, and T was therefore a grantor trust. Additionally, T held a partnership interest. Under the principles of Rev. Rul. 77-402, A is considered to have been the partner during this period for federal income tax purposes. Further, at the time of A's death T ceased to be a grantor trust. The partnership interest is thus considered to have been transferred from A to T at that time. As a result, a transfer of a partnership interest occurred upon the death of a partner.

Query whether an irrevocable trust for the benefit of A's spouse, which would have been a grantor trust under Code § 677 but excluded from A's estate, would qualify for this treatment.

[4143] The IRS seems to believe that a Code § 743(a) adjustment would apply when a QTIP trust holds a partnership interest and the surviving spouse dies, even though the individual who died is not actually a partner. See Letter Ruling 200019029 (approving a late Code § 754 election without addressing the literal language of Code § 743(a)). Note that Code § 1014(b)(10), which provides a basis adjustment for QTIP assets when the surviving spouse dies, was enacted after Code § 743(a). Thus, considering the surviving spouse to be a partner for purposes of Code § 743(a) is consistent with the philosophy of Code § 1014(b)(10) and should, as a matter of tax policy, be the correct result, even though it seems inconsistent with the literal language of Code § 743(a). See also part II.Q.8.e.i Distribution of Partnership Interests regarding the effect of a distribution on Code § 743.

[4144] Code § 743(a) does not address whether an adjustment of basis in partnership property may occur by reason of other transfers without a Code § 754 election. For example, the statute does not address whether an adjustment would be made with respect to a transfer by gift (i.e., not a transfer by sale or exchange or the death of a partner which are referenced in Code § 743) even if a Code § 754 election is in place. Code § 1015(d), allowing a basis adjustment for gift tax paid, was not in existence when Code § 743 was enacted That might be why Code § 743 does not covers the taxable period that includes the date of death, which election might be filed up to 12 months after the due date.[4145] When a partnership interest is community property and receives an outside basis adjustment of both halves, both halves are eligible for a corresponding inside basis adjustment by reason of that death.[4146] See also part II.Q.8.e.i Distribution of Partnership Interests regarding the effect of a distribution on Code § 743, including a suggestion that a trust's or estate's distribution of a partnership interest (other than distributing specifically bequeathed property) triggers application of a Code § 743 adjustment. Thus, even though ideally one should make a Code § 754 as of the year if death (if one decides to make the election), if the suggestion described in the preceding sentence is correct then one may also make a Code § 754 election as of the year in which the revocable trust or estate distributes property (other than a specific bequest). A corporate liquidation would also be a triggering event – even if it is a nontaxable event.[4147]

---

discuss the gift situation. The legislative history when Code § 1015(d) was adopted makes no mention at all of this partnership issue. The issue would seem to be: would an inside adjustment of partnership property be made in the absence of a statute (since no statute is applicable) under general tax principles? That is further complicated by the fact that tax principles sometimes use an aggregate theory and sometimes an entity theory with respect to partnerships. Although perhaps a position might be taken that the payment of gift tax should trigger an inside basis adjustment, if I were to take that position I would disclose it on Form 8725. A safer approach might be to follow the payment of gift tax by a transfer, which part II.Q.8.e.i Distribution of Partnership Interests discusses generally would give rise to an inside basis adjustment.

[4145] Reg. § 1.754-1(b); REG-116256-17 (10/12/2017) issued proposed regulations, on which taxpayers may now rely, dropping the regulation's requirement that a partner sign the Code § 754 election. Reg. § 301.9100-2(a)(2)(vi) grants an automatic 12- month extension from the due date of the partnership's return, including extensions (Reg. § 301.9100-2(a)(1)), with the election made on an amended return (Reg. § 301.9100-2(c)).

In addition to making the election, the partnership must attach a statement to its tax return that reports the name and taxpayer identification number of the transferee partner, the basis adjustment computation, and the allocation of the basis adjustment to the partnership's properties. Reg. § 1.743-1(k)(1). The transferee partner has an obligation to provide written notice to the partnership of the information needed to compute the basis adjustment, as listed in Reg. § 1.743-1(k)(2). Once that notice is given, the partnership can rely on that information in preparing the adjustment, as long as no partner who is responsible for federal income tax reporting has any knowledge that the information is clearly erroneous. Reg. § 1.743-1(k)(3). Failure to attach this statement would not appear to invalidate the Code § 754 election; this result is inferred by the fact that Reg. § 1.743-1(k)(2) provides procedures for when errors or omissions are made in complying with obligations under Reg. § 1.743-1(k).

Does the long term holding period under Code § 1233(9), that applies when assets are included in a decedent's estate, also apply to the portion of the basis of a partnership's assets that constitutes a basis adjustment under Code § 743? Rev. Rul. 68-79 says that, generally, the change in the holding period of a partnership interest does not change the partnership's holding period in its assets. However, it does not address the impact, if any, on a Code § 754 election. With one exception, regulations under Code §§ 743, 755 and 1233 do not address this issue. Reg. § 1.743-1(j)(4)(i)(B)(1) restarts the holding period for depreciable property when there is a positive adjustment but does not change it when there is a negative adjustment, Reg. § 1.743-1(j)(4)(ii)(B).

[4146] Rev. Rul. 79-124.

[4147] CCA 201726012 (under the signature of David R. Haglund), in addressing, "Issue 1: Whether the transfer of a partnership interest in a complete liquidation to which § 332(a) applies or a

If the basis of the transferee partner's partnership interest is greater than the former partner's share of the basis of the partnership's assets, then the election will give the new partner a stepped-up basis in the partnership assets.[4148] This basis adjustment is not necessarily tied to the change in basis between the old and new partner; rather, it is based on the relationship between the basis in the partnership interest (the "outside basis") and basis of the partnership's assets allocable to that partner (the "inside basis"). Of course, a change in basis of the partnership interest affects this relationship. However, prior changes in basis of the partnership also count. In fact, a substituted basis transaction, in which the basis in the partnership interest might or might not change, triggers the basis adjustment;[4149] however, no adjustment is made in a substituted basis transaction if the outside basis equals the inside basis.[4150] If a partnership does not make a Code § 754 election when a partner dies, consider asking the partnership to make the election when the decedent's estate or (former) revocable trust funds bequests by distributing the partnership interest, which also might be an event triggering a basis adjustment;[4151] as described above, that basis adjustment is not tied to any change in basis but rather generally catches up the "inside basis" to the "outside basis."

In a sale or exchange situation, the transferee partner's basis step-up in partnership assets is based on the extent to which the partner's basis in the partnership interest exceeds the basis of the partner's share of the partnership's assets; any contingent payments cause a basis increase to the extent they constitute gain to the seller and potentially deductible interest to the extent they constitute interest income to the

---

reorganization to which § 368(a)(1)(A) and/or (D) applies is a transfer by sale or exchange for purposes of § 743(b)," reasoned:

> Sale or exchange is not defined in § 743, the regulations thereunder, or the legislative history of the provision. Section 743 was enacted to ameliorate the tax consequences to a transferee partner by giving a partnership the option to eliminate discrepancies between a transferee partner's inside and outside basis when the partnership's inside basis in its property is not equal to the fair market value of the property. Jt. Comm. On Taxation, *Summary of the New Provisions of the Internal Revenue Code of 1954*, at 92 (1955).
>
> General Counsel Memorandum 35921 (July 29, 1974) held that for purposes of § 743(b), a transfer of a partnership in a liquidation under former § 333 was not a transfer of an interest by sale or exchange. As demonstrated by the GCM, whether the distribution of a partnership interest by a liquidating corporation was a sale or exchange was considered an open question prior to the Deficit Reduction Act of 1984 (1984 Act). See, *e.g.*, John S. Pennell and Terence F. Cuff, "Tax Results of Liquidation of Corporate Partner Still Unclear Despite DRA 1984," *Journal of Taxation*, Vol. 62, No. 2 (February 1985).

[4148] Code § 743(b). Note that previously non-amortizable self-created goodwill becomes purchased amortizable goodwill. Letter Ruling 9715008 (but only if the remaining partners and the selling partner are not related under Code § 197(f)(9)(C)).

[4149] Reg. § 1.755-1(b)(5). Reg. § 1.755-1(b)(5)(iv), Example (2) provides a basis adjustment as the result of a wholly nontaxable contribution to a partnership under Code § 721.

[4150] Reg. § 1.755-1(b)(5)(ii) provides, If the total amount of the basis adjustment under section 743(b) is zero, then no adjustment to the basis of partnership property will be made under this paragraph (b)(5).

[4151] See part II.Q.8.e.i Distribution of Partnership Interests.

seller.[4152] If the transfer is caused because of a partner's death, the basis step-up is based on the fair market value of the deceased partner's partnership interest as of the date of death, plus the transferee partner's share of partnership liabilities, minus any allocable income in respect of a decedent items;[4153] although liabilities are included in the basis of a partnership interest, they do not generate a basis increase in the partnership's assets.

A partner's share of income in respect of a decedent under Code § 691 (including unrealized receivables) does not receive a basis step-up.[4154] Unrealized receivables are not eligible for a basis step-up, but goodwill that is not being amortized is eligible for a basis step-up.[4155]

When a person's partnership interest is liquidated, the basis of the partnership interest is allocated to the assets that person receives:[4156]

- This has led to the observation that, if one is going to liquidate the partnership anyway, a Code § 754 election might not be necessary. However, if the partnership sells its assets and then liquidates, then this strategy might not work as well for state income tax purposes as it does for federal income tax purposes;[4157] a Code § 754 election might be particularly important if the owner of the partnership interest resides in a state other than the state in which the partnership does business.

- These rules can generate opportunities to enhance the basis of an asset to be sold (but might be attacked if used to accelerate or duplicate recognition of loss):[4158]

    - A partner who receives low basis assets can uses the basis in his partnership interest to increase the basis in those assets. If a Code § 754 election is not in effect, then this basis increase is not matched by a corresponding decrease in

[4152] Letter Ruling 9715008, which also held that contingent payments made more than 6 months after the date of the sale would be divided into additional principal and unstated interest under Reg. § 1.1275-4(c).
[4153] Code § 743; Reg. § 1.742-1. Code § 691 income in respect of a decedent includes the portion of the distributive share of partnership income of the decedent partner's successor in interest that is attributable to the decedent for the period ending with the date of the decedent's death. Letter Ruling 9715008. *See also* Rev. Rul. 66-325 (no basis step-up for accounts receivable under Code § 743 because Code § 736(a) applied); *Long v. Commissioner*, 71 T.C. 1 (1978), *aff'd* 660 F.2d 416 (10th Cir. 1981) (estate increased its basis in partnership interest to extent it paid liabilities); *Hesse v. Commissioner*, 74 T.C. 1307 (1980) and Letter Ruling 9102018 (no basis step-up for distributive share of income that is attributable to decedent for the period ending with the date of his death – obsoleted by later changes to Code § 706 since the income is reported on the decedent's final return and therefore not an unrecognized item at death).
[4154] Reg. § 1.755-1(b)(4)(i).
[4155] Example provided in Reg. § 1.755-1(b)(4)(ii).
[4156] Code § 732(b).
[4157] By analogy, when an S corporation sells its assets to a third party and liquidates, it can replicate in many ways the partnership result for federal income purposes but not necessarily for state income tax purposes. Compare part II.H.8.a.i Solution That Works for Federal Income Tax Purposes with part II.H.8.a.ii State Income Tax Disconnect.
[4158] See part II.Q.8.b.i.(d) Basis in Property Distributed from a Partnership; Possible Opportunity to Shift Basis or Possible Loss in Basis When a Partnership Distributes Property.

the distributed asset. Absence of a Code § 754 election might[4159] or might not[4160] be considered abusive in such a case.

- If a partnership interest with a low basis is liquidated in exchange for high basis assets, a Code § 754 election will take into account the basis reduction in the distributed asset and increase the basis in its remaining assets by a corresponding amount.

Once a Code § 754 election is made, it cannot be revoked without IRS consent. This is extremely important to remember, since the election can lead to a step-down in the basis of partnership assets if the basis of the transferee's interest is less than the transferor's partnership property adjusted basis.

Because a Code § 754 election is irrevocable, consider dividing a partnership before making the election; divisions generally are income tax-free.[4161] Reasons to avoid Code § 754 elections except to the extent necessary include:

- Avoiding record-keeping requirements regarding events where basis changes are not worth the complexity.

- Reducing the possibility of events causing an inside basis step-down. However, sometimes basis reductions must be made as if a Code § 754 election were in effect.[4162] To avoid possible unwanted inside basis reductions, one should consider monitoring a partnership's unrealized losses and realizing losses to the next necessary to keep net unrealized losses comfortably below $250K.

The partnership and the transferee partner, including a decedent's estate, should consider extending their income tax returns so that any IRS adjustments to basis, including the value of assets in the decedent's gross estate, can be reflected in the transferee partner's income tax returns; ignoring the interplay of these statutes of limitations can cause the taxpayer to lose the benefit of the basis step-up.[4163] For example, suppose decedent died December 1, 2004, and the partnership sold assets December 31, 2004. The estate tax return is due August 1, 2005 (nine months after

---

[4159] See example in fn. 3919 (absence of Code § 754 election considered a duplication of loss). However, Congress has since attacked this abuse (see part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000), so the concerns expressed in the example might be less likely to be applied now.

[4160] See fn. 3918.

[4161] See part II.Q.8.d Partnership Division.

[4162] See part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000.

[4163] In *Malm v. U.S.*, 420 F.Supp. 1040 (D.C. N.D. 2005), the court stated:

> Harry Malm died on August 5, 1998. His estate included shares of Medtronic stock. The IRS disputed the estate's valuation of that stock. The dispute wound up in court, and on July 23, 2003, this Court ruled that the IRS' stock valuation was correct….As a result of this ruling, the Medtronic stock had a higher fair market value than reported by the estate on its federal estate tax return. Therefore, the estate's federal income tax return overstated the amount of the gain on the sale of this stock….The estate filed its income tax return on November 14, 1999. Since the estate did not file a claim for a refund on that return until February 12, 2004, its claim is barred by the statute of limitations.

death) and may be audited as late as August 1, 2008. The estate's income tax return for calendar year 2004 is due April 15, 2005 and may be amended only as late as April 15, 2008. Thus, audit adjustments on the estate tax return might be made between April 15, 2008 and August 1, 2008, but the estate could not amend its income tax return to reflect any increase in basis due to the audit. The partnership should extend the due date of its return.[4164] Additionally, the estate could file an extension for its initial income tax return, so that the return is filed timely between August 1, 2005 and October 15, 2005 (six months being the latest date for an extension). An alternative to extending the estate's income tax return might be for the estate to choose a fiscal year ending on or after April 30, 2005; note that a Code § 645 election would be required if the decedent's partnership interest were held in a revocable trust.

In reviewing anything in this part II.Q.8.e.iii.(b), consider whether part II.Q.8.e.iii.(g) Certain Changes in Inside Basis May Reduce Foreign Tax Credits may be relevant.

II.Q.8.e.iii.(c). When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000

Generally, Code § 754 election adjusts the basis of a partnership's assets when certain events occur that change the basis of any interest in that partnership.[4165] The idea is that the value of the partnership's assets was reflected in the change of basis in the partnership interest; therefore, some element of the basis in the partnership's assets should reflect the change of basis in the partnership interest.

In one limited case involving straddles, the IRS ruled that failure to make a Code § 754 election constituted an abuse.[4166]

When a Code § 754 election is in place, any Code § 743 adjustments that apply to the transfers of partnership interests require the partnership to essentially create a separate set of books for each partner,[4167] whereas any Code § 734 adjustments (increasing or decreasing inside basis as a result of a change in the basis of distributed property) apply to the partnership as a whole.[4168] For more details on the implementation of a

---

[4164] The partnership will need to make any Code § 754 election no later than the extended due date of the return. If the election does not look worthwhile but upon audit it starts looking worthwhile, the IRS will not grant Code § 9100 relief. Letter Ruling 200626003. However, if the partnership's assets are included in the decedent's gross estate under Code § 2036, the partnership's assets will receive a basis adjustment. *Id.*

[4165] For more on Code § 754 elections, see part II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets.

[4166] Notice 2002-50; see also Reg. § 1.701-2(e)(1) and the discussion of the anti-abuse regulations described in part II.Q.8.b.i.(d) Basis in Property Distributed from a Partnership; Possible Opportunity to Shift Basis or Possible Loss in Basis When a Partnership Distributes Property.

[4167] Reg. § 1.743-1(j).

[4168] Code § 734(b) provides:

> *Method of adjustment*. In the case of a distribution of property to a partner by a partnership with respect to which the election provided in section 754 is in effect or with respect to which there is a substantial basis reduction, the partnership shall—
>
> (1) increase the adjusted basis of partnership property by—

Code § 743(b) basis step-up, see part II.Q.8.e.iii.(d) Code § 743(b) Effectuating Code § 754 Basis Adjustment on Transfer of Partnership Interest.

CCA 201521012 explained the interaction of Code § 734(b) with Code § 481 adjustments for change in accounting method.[4169] Also, in reviewing anything in this part II.Q.8.e.iii.(c), consider whether part II.Q.8.e.iii.(g) Certain Changes in Inside Basis May Reduce Foreign Tax Credits may be relevant.

(A) the amount of any gain recognized to the distributee partner with respect to such distribution under section 731(a)(1) , and

(B) in the case of distributed property to which section 732(a)(2) or (b) applies, the excess of the adjusted basis of the distributed property to the partnership immediately before the distribution (as adjusted by section 732(d)) over the basis of the distributed property to the distributee, as determined under section 732, or

(2) decrease the adjusted basis of partnership property by—

(A) the amount of any loss recognized to the distributee partner with respect to such distribution under section 731(a)(2) , and

(B) in the case of distributed property to which section 732(b) applies, the excess of the basis of the distributed property to the distributee, as determined under section 732, over the adjusted basis of the distributed property to the partnership immediately before such distribution (as adjusted by section 732(d)).

Paragraph (1)(B) shall not apply to any distributed property which is an interest in another partnership with respect to which the election provided in section 754 is not in effect.

[4169] When the IRS determined that a partnership had improperly deferred gain:

When there is a change in accounting method to which IRC § 481(a) is applied, income for taxable years preceding the year of change must be determined under the accounting method that was then used, and income for the year of change and the following taxable years must be determined under the new accounting method as if the new method had always been used. Accordingly, Taxpayer's IRC § 734(b) adjustments for years preceding the year of change must be computed using the accounting method that was then used. Taxpayer's IRC § 734(b) adjustments for the year of change and subsequent years must be redetermined consistent with the new accounting method.

In computing the net § 481(a) adjustment, a taxpayer must take into account all relevant accounts. See Rev. Proc. 2002-18, section 2.04(1), Rev. Proc. 97-27, 1997-1 C.B. 680, section 2.05(1). Here, the IRC § 481(a) adjustment represents the difference in gain or loss for all of the underlying securities that would have been recognized under the new method, less the gain or loss that was recognized under the prior method as of the beginning of the year of change. Taxpayer's IRC § 734(b) adjustments for taxable years prior to the year of change, as calculated under the prior method, are fully taken into account in calculating the basis in the securities. In addition, beginning in the year of change, Taxpayer's basis in its securities will be modified to reflect the gain or loss recognized in connection with the change in accounting method.

The determination of whether a partnership has a change in accounting method does not depend on whether the partnership made an election under IRC § 754, whose only purpose and effect is to eliminate distortions caused by partnership distributions and sales of partnership interests. The partners of a partnership using a given accounting method ultimately recognize the same amount of cumulative taxable income over the life of the partnership whether or not the partnership makes an election under IRC § 754. A change in accounting method under IRC § 446 occurs when Taxpayer/partnership no longer treats certain securities transactions as options and thus, stops deferring the gains, losses, income, or deductions associated with those transactions.

The taxpayer can take advantage of a basis step-up, without the partnership making a Code § 754 election, by receiving a distribution of appreciated assets within two years after death or sale or exchange of the partnership interest; see part II.Q.8.e.iii.(e) Code § 734 Basis Adjustment Resulting from Distributions, Including Code § 732(d) Requiring an Adjustment Without Making Code § 754 Election. Such a distribution would tend to undermine valuation discounts, which might be good (higher basis step-up) or bad (potentially higher estate tax).

If a partnership holds assets with built-in losses greater than $250,000, one must consider harvesting those losses before engaging in any disposition or acquisition of any interest in the partnership, including the death of a partner. The rest of this section explains why.

The American Jobs Creation Act added three new mandatory basis adjustment rules that can cause serious problems if a partnership does not have a Code § 754 election in effect.[4170] The first rule applies to limit the transfer of built-in losses on property contributed to a partnership after October 22, 2004.[4171] The second rule applies when a partnership distributes cash or property after October 22, 2004 that results in the transferee either recognizing a loss or receiving a stepped-up basis in the property greater than $250,000.[4172] The third rule applies when a partner dies or transfers an interest in a partnership after October 22, 2004 and the partnership has built-in losses greater than $250,000.[4173]

Limited exceptions apply to certain electing investment partnerships and securitization partnerships.[4174] One of these provisions encourages taxpayers to structure marketable securities partnerships as follows: all contributions are cash in exchange for partnership interests issued within 24 months of formation; the partnerships buys investment assets but does not engage in a trade or business; no partner can readily redeem that partner's

[4170] For more details, see IRS Notice 2005-32; see also Rosenberg, AJCA Imposes New Burdens for Partnership Basis Adjustments Under Sections 734 and 743, *Journal of Taxation*, vol. 101, No. 6, 12/2004 at 334, which was followed by Lipton and Golub, Dealing With the Service's Interim Guidance on Downward Basis Adjustments Under 734 and 743, *Journal of Taxation*, vol. 103, No. 1, 7/2005 at 33; Schneider, New Basis Rules Aim at Transfer and Duplication of Built-in Losses, *Taxes – The Tax Magazine*, May 2005 at 39. Also note that Reg. § 1.701-2(d), Ex. 8 also considers failure to make a Section 754 election to be an abuse, but Ex. 9 does not consider failure to make a Section 754 election to be an abuse. Similarly, if a tax-indifferent party attempts to shift built-in losses to a U.S. taxpayer who has not incurred an economic loss so that the U.S. taxpayer may claim a deduction of the built-in losses from the distressed assets, the transaction might be a listed transaction under Notice 2008-34.
[4171] Code § 704(c)(1)(C). For a discussion of proposed regulations, see Kim and Carrasco, Proposed Regulations on Contributions of Built-in Loss Property: Paving a Framework for Super C, *TM Memorandum* (BNA), 10/20/2014, Vol. 55, No. 21. See also the American Bar Association Section of Taxation's Comments on Proposed Regulations on Certain Partnership Provisions of the American Jobs Creation Act of 2004, *Tax Lawyer*, vol. 69, No. 1, p. 5 (Fall 2015).
[4172] Code § 734(b).
[4173] Code § 743(a) and (b), as amended.
[4174] Code §§ 734(e) and 743(e), (f).

partnership interest; and the partnership has a term of no more than 15 years;[4175] this structure has other advantages as well.[4176]

These adjustments can be particularly disturbing when a partnership interest is sold to a related party. Let's start with an example from IRS Notice 2005-32 that tracks the legislative history:

> PRS is a partnership which does not have an election under § 754 in effect. PRS has no liabilities. The fair market value of PRS's assets is $4 million and the adjusted basis of PRS's assets is $4.3 million. Under § 743(d), PRS has a substantial built-in loss because the adjusted basis of the partnership property exceeds the fair market value of the partnership property by more than $250,000. A, a partner of PRS, sells a 25 percent partnership interest in PRS to B for its fair market value of $1 million. Under § 743(b), an adjustment is required to the adjusted basis of PRS's assets with respect to B....

Presumably that adjustment would be to reduce the basis of the partnership's assets by $75,000, which is the excess of A's $1,075,000 pro rata share of the basis of the partnership's assets (25% of $4,300,000) over the sale price ($1,000,000).

This provision was intended to prevent double deductions as follows, assuming that the basis of A's partnership interest is 25% of the basis of the partnership's assets:

- A has a $75,000 loss, since A's basis of $1,075,000 (25% of $4.3 million) exceeds A's $1,000,000 proceeds.

- B reports a $75,000 loss when PRS sells its assets.

What if, however, B were a related party, and Code § 267 prevented A from deducting the loss? Generally, the perceived double deduction would not apply, since A cannot deduct A's $75,000 loss. Therefore, as a matter of policy, the $75,000 mandatory basis adjustment should not apply. However, the statute does not appear to have any exceptions that take into account a Code § 267 loss disallowance, so it appears that B would be stuck with the negative basis adjustment. Thus, neither A nor B recognizes this loss.[4177]

The situation is worsened when one applies valuation adjustments, since (unlike the example in Notice 2005-32) A's partnership interest is worth less than a pro-rata-share of the underlying assets. For example, suppose A sold A's partnership interest to B for $750,000? Then a special allocation of basis adjustment would reduce B's share of the basis from A's original $1,075,000 to only $750,000. So, at first glance, the basis reduction is $325,000 ($1,075,000 minus $750,000), which exceeds the $300,000 ($4.3 million minus $4 million) substantial built-in loss that triggered the whole situation.

[4175] Code § 743(e).
[4176] Distributions of marketable securities might be considered nontaxable distributions of property rather than potentially taxable distributions of cash. See text accompanying footnotes 3877-3879.
[4177] B would be able to take advantage of this disallowed loss if and to the extent that B later sells B's partnership interest for a gain. Code § 267(d).

However, the basis reduction cannot decrease an asset's basis below its fair market value,[4178] so this provision is not as onerous as it might have seemed.

One might sell the partnership's loss assets so that the partners recognize the loss, then buy other assets that have similar investment attributes but do not constitute "substantially identical stock or securities" under the wash sale rules of Code § 1091. That should avoid the mandatory basis reductions and give A the losses that would otherwise have been disallowed.

II.Q.8.e.iii.(d). Code § 743(b) Effectuating Code § 754 Basis Adjustment on Transfer of Partnership Interest

For when a transfer triggers a Code § 743 inside basis adjustment, see part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000. This part II.Q.8.e.iii.(d) assumes that one has determined that a Code § 743(b) adjustment applies. In reviewing anything in this part II.Q.8.e.iii.(d), consider whether part II.Q.8.e.iii.(g) Certain Changes in Inside Basis May Reduce Foreign Tax Credits may be relevant.

Before getting into how the allocations work, consider various reporting issues:

- Make a Code § 754 election on the partnership return covering the year of transfer, if not yet in effect.

- A transferee that acquires, by sale or exchange, an interest in a partnership with a Code § 754 election in effect for the taxable year of the transfer, must notify the partnership, in writing, within 30 days of the sale or exchange.[4179] A transferee that acquires, on the death of a partner, an interest in a partnership with a Code § 754 election in effect for the taxable year of the transfer, must notify the partnership, in writing, within one year of the death of the deceased partner.[4180] In making the

---

[4178] See fn. 4195 in part II.Q.8.e.iii.(d) Code § 743(b) Effectuating Code § 754 Basis Adjustment on Transfer of Partnership Interest.

[4179] Reg. § 1.743-1(k)(2)(i) (also referred to by Reg. § 1.755-1(d)), which further provides:

> The written notice to the partnership must be signed under penalties of perjury and must include the names and addresses of the transferee and (if ascertainable) of the transferor, the taxpayer identification numbers of the transferee and (if ascertainable) of the transferor, the relationship (if any) between the transferee and the transferor, the date of the transfer, the amount of any liabilities assumed or taken subject to by the transferee, and the amount of any money, the fair market value of any other property delivered or to be delivered for the transferred interest in the partnership, and any other information necessary for the partnership to compute the transferee's basis.

[4180] Reg. § 1.743-1(k)(2)(ii), which further provides:

> The written notice to the partnership must be signed under penalties of perjury and must include the names and addresses of the deceased partner and the transferee, the taxpayer identification numbers of the deceased partner and the transferee, the relationship (if any) between the transferee and the transferor, the deceased partner's date of death, the date on which the transferee became the owner of the partnership interest, the fair market value of the partnership interest on the applicable date of valuation set forth in section 1014, and the manner in which the fair market value of the partnership interest was determined.

adjustments under Code § 743(b) and any statement or return relating to such adjustments under this section, a partnership may rely on the written notice described above to determine the transferee's basis in a partnership interest, unless any partner who has responsibility for the partnership's federal income tax reporting has knowledge of facts indicating that the statement is clearly erroneous.[4181] A partnership is not required to make Code § 743(b) adjustments (or any statement or return relating to those adjustments) with respect to any transfer until it has been notified of the transfer.[4182] If the transferee fails to provide the partnership with the written notice described above, the partnership must attach a statement to its return in the year that the partnership is otherwise notified of the transfer.[4183]

- A partnership that must adjust the bases of partnership properties under Code § 743(b)) must attach a statement to the partnership return for the year of the transfer setting forth the name and taxpayer identification number of the transferee as well as the computation of the adjustment and the partnership properties to which the adjustment has been allocated.[4184]

As noted in part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000, special rules apply when built-in losses are involved. For a discussion of proposed regulations implementing Code § 743(b) adjustments in such cases, see the American Bar Association Section of Taxation's "Comments on Proposed Regulations on Certain Partnership Provisions of the American Jobs Creation Act of 2004," *Tax Lawyer*, vol. 69, No. 1, p. 5 (Fall 2015).

In implementing the Code § 743(b) adjustments:[4185]

[4181] Reg. § 1.743-1(k)(3).

[4182] Reg. § 1.743-1(k)(4), which provides that a partnership is notified of a transfer when either:

(i) The partnership receives the written notice from the transferee required under paragraph (k)(2) of this section; or

(ii) Any partner who has responsibility for federal income tax reporting by the partnership has knowledge that there has been a transfer of a partnership interest.

[4183] Reg. § 1.743-1(k)(5), which describes the attachment, as well as what to do when the transferee supplies the information.

[4184] Reg. § 1.743-1(k)(1)(i); in addition to referring to this requirement, Reg. § 1.755-1(d) indicates that this statement should include the partnership properties to which the adjustment is allocated under section 755, which is what this part II.Q.8.e.iii.(d) is all about. See Reg. § 1.743-1(k)(1)(ii) for special rules for oil and gas properties that are depleted at the partner level under Code § 613A(c)(7)(D).

[4185] Reg. § 1.743-1(j)(1). Reg. § 1.743-1(j)(2) provides more details:

> *Computation of partner's distributive share of partnership items*. The partnership first computes its items of income, deduction, gain, or loss at the partnership level under section 703. The partnership then allocates the partnership items among the partners, including the transferee, in accordance with section 704, and adjusts the partners' capital accounts accordingly. The partnership then adjusts the transferee's distributive share of the items of partnership income, deduction, gain, or loss, in accordance with paragraphs (j)(3) and (4) of this section, to reflect the effects of the transferee's basis adjustment under section 743(b). These adjustments to the transferee's distributive shares must be reflected on Schedules K and K-1 of the partnership's return (Form 1065). These adjustments to the transferee's distributive shares do not affect the

No adjustment is made to the common basis of partnership property. Thus, for purposes of calculating income, deduction, gain, and loss, the transferee will have a special basis for those partnership properties the bases of which are adjusted under section 743(b) and this section. The adjustment to the basis of partnership property under section 743(b) has no effect on the partnership's computation of any item under section 703.

In other words, the partnership keeps two or more separate sets of books for transferee partner: one that applies to all partners based on the partnership's transactions and is reflected in their capital accounts, and one or more than applies to each partner separately based on that partner's events that affect outside basis (that do not involve transfers of the partnership's assets) and is reflected in the partnership's basis records specially allocated to the applicable partners. When a partnership interest is transferred, the transferor's capital account attributable to the transferred interest (which might be part or all of the transferor's capital account, depending on what portion is transferred) shifts to the transferee.[4186]

The basis of a partnership interest acquired from a decedent is the fair market value of the interest at the date of death, increased by the estate's share of partnership liabilities, and reduced to the extent that such value is attributable to IRD.[4187] Thus, the basis increase has two effects:

- Restoring Basis Arising from Liabilities. To the extent a partner assumes a liability, that partner is deemed to have contributed cash equal to the liabilities that person is allocated. To the extent a partner's allocable share of liabilities is reduced, that person is deemed to have received a cash distribution, reducing basis or triggering gain if and to the extent basis is insufficient to absorb the distribution. During life, distributions or losses might have reduced or eliminated basis generated by the assumption of liabilities. By passing through a decedent's estate, a partnership interest's basis due to allocated liabilities is fully restored.

- Basis Adjustment Due to Value. The partnership interest's value, which includes appropriate reductions for the balance sheet effect of liabilities and appropriate increases or decreases for control or lack thereof, reductions for lack of marketability, and any other features, is added to the amount of allocable liabilities.

The partnership increases the adjusted basis of its property by the excess of the basis to the transferee partner of the partner's interest in the partnership over the partner's

---

transferee's capital account. [additional references re: accounting for long-term contracts]

CCA 201726012 (under the signature of David R. Haglund) stated:

> Adjustments to the adjusted tax basis of partnership property under § 743 are not reflected in the capital account of the transferee partner or on the books of the partnership. § 1.704-1(b)(2)(iv)(m)(2). No adjustment is made to the common basis of partnership property, and the § 743(b) adjustment has no effect on the partnership's computation of any item under § 703. § 1.743-1(j)(1). Section 743(b) adjustments are personal to the transferee partners and are not subject to reallocation under § 704(b).

4186 Reg. § 1.704-1(b)(2)(iv)(*l*). See also Reg. § 1.704-1(b)(5), Ex. (13).

4187 Reg. § 1.742-1.

proportionate share of the adjusted basis of the partnership property.[4188] Consistent with the rule for outside basis stated above, a transferee's share of the adjusted basis to the partnership of partnership property is equal to the sum of the transferee's interest as a partner in the partnership's previously taxed capital, plus the transferee's share of partnership liabilities.[4189] Generally, a transferee's interest as a partner in the partnership's previously taxed capital is equal to:[4190]

- The amount of cash that the transferee would receive on a liquidation of the partnership following a certain hypothetical transaction, to the extent attributable to the acquired partnership interest; increased by

- The amount of tax loss,[4191] that would be allocated to the transferee from the hypothetical transaction (to the extent attributable to the acquired partnership interest); and decreased by

- The amount of tax gain,[4192] that would be allocated to the transferee from the hypothetical transaction (to the extent attributable to the acquired partnership interest).

The hypothetical transaction referred to in the first bullet point above means the disposition by the partnership of all of the partnership's assets, immediately after the transfer of the partnership interest, in a fully taxable transaction for cash equal to the fair market value of the assets.[4193]

Note that the basis adjustment does not refer to the basis change that triggered the adjustment. Rather, the basis adjustment seeks to reconcile the cumulative effect of anything that changed inside and outside basis.

Code § 755 and the regulations thereunder determine the allocation of the Code § 743(b) basis adjustment among the individual items of partnership property.[4194] Generally, any Code § 743(b) change in the adjusted basis of partnership property will be allocated in a manner which has the effect of reducing the difference between the fair market value in any other manner permitted by regulations.[4195]

[4188] Code § 743(b).
[4189] Reg. § 1.743-1(d)(1).
[4190] Reg. § 1.743-1(d)(1).
[4191] Including any remedial allocations under Reg. § 1.704-3(d).
[4192] Including any remedial allocations under Reg. § 1.704-3(d).
[4193] Reg. § 1.743-1(d)(2).
[4194] Code § 743(c); Reg. § 1.743-1(e).
[4195] Code § 755(a), which the regulations follow by allocating according to gain or loss arising from a hypothetical sale. This concept prevents an outside basis decrease due to valuation discounts from reducing the basis of assets with unrealized gain (although such a discount may reduce any basis increase); see part II.H.3 Valuation Discounts – Friend or Enemy, especially fn. 1421. Similarly, a distribution shifting basis to distributed assets under Code § 732 that ordinarily would reduce inside basis cannot reduce the basis of assets with unrealized gain; see parts II.H.2.f Partnership Basis Shifting Opportunities and II.Q.8.b.i.(d) Basis in Property Distributed from a Partnership; Possible Opportunity to Shift Basis or Possible Loss in Basis When a Partnership Distributes Property (with fn. 3893 referring to this footnote).

In applying this rule, changes in the adjusted basis of property consisting of capital assets and Code § 1231(b) property (property used in a trade or business), or any other property of the partnership, is allocated to partnership property of a like character, except that the basis of any such partnership property shall not be reduced below zero.[4196] Reg. § 1.755-1(a)(1) provides:

- First, the partnership must determine the value of each of its assets.

- Second, the basis adjustment is allocated between the two classes of property consisting of capital assets and Code § 1231(b) property (capital gain property), and any other property of the partnership (ordinary income property). Furthermore, properties and potential gain treated as unrealized receivables under Code § 751(c) and the regulations thereunder are treated as separate assets that are ordinary income property. References to "capital gain" or :ordinary income " property appear to disregard whether there is an unrealized gain or loss.

- Third, the portion of the basis adjustment allocated to each class is allocated among the items within the class.

Valuation issues include:

- If the assets of the partnership constitute a trade or business,[4197] then the partnership is required to use the residual method to assign values to the partnership's section 197 intangibles (goodwill, etc.).[4198] The IRS is not bound by the

---

[4196] Code § 755(b).

[4197] As defined in Reg. § 1.1060-1(b)(2), which provides that a group of assets constitutes a trade or business if:

> (A) The use of such assets would constitute an active trade or business under section 355; or
>
> (B) Its character is such that goodwill or going concern value could under any circumstances attach to such group.

See part II.Q.7.f.iii Active Business Requirement for Code § 355.

[4198] Reg. § 1.755-1(a)(2), which further provides:

> To do so, the partnership must, first, determine the value of partnership assets other than section 197 intangibles under paragraph (a)(3) of this section. The partnership then must determine partnership gross value under paragraph (a)(4) of this section. Last, the partnership must assign values to the partnership's section 197 intangibles under paragraph (a)(5) of this section. For purposes of this section, the term section 197 intangibles includes all section 197 intangibles (as defined in section 197), as well as any goodwill or going concern value that would not qualify as a section 197 intangible under section 197.

Reg. § 1.755-1(a)(3) provides:

> For purposes of this section, the fair market value of each item of partnership property other than section 197 intangibles shall be determined on the basis of all the facts and circumstances, taking into account section 7701(g).

Code § 7701(g) provides:

> *Clarification of fair market value in the case of nonrecourse indebtedness*. For purposes of subtitle A, in determining the amount of gain or loss (or deemed gain or loss) with respect to any property, the fair market value of such property shall be treated as being not less than the amount of any nonrecourse indebtedness to which such property is subject.

parties' allocation of purchase price, even if the parties are bound by a statement required to be filed with the IRS.[4199]

- Except for certain Code § 743(b) basis adjustments resulting from substituted basis transactions,[4200] partnership gross value generally is equal to the amount that, if assigned to all partnership property, would result in a liquidating distribution to the partner equal to the transferee's basis in the transferred partnership interest immediately following the relevant transfer (reduced by the amount, if any, of such basis that is attributable to partnership liabilities).[4201] However, in certain circumstances, such as where income or loss with respect to particular section 197 intangibles are allocated differently among partners, partnership gross value may vary depending on the values of particular section 197 intangibles the partnership held.[4202] Also, where a partnership interest is transferred as a result of the death of a partner, the transferee's basis in its partnership interest is determined without regard to Code §1014(c), and is deemed to be adjusted for that portion of the interest, if any, that is attributable to items representing income in respect of a decedent under Code § 691.[4203]

[4199] Reg. § 1.1060-1(c)(4) provides:

Effect of agreement between parties. If, in connection with an applicable asset acquisition, the seller and purchaser agree in writing as to the allocation of any amount of consideration to, or as to the fair market value of, any of the assets, such agreement is binding on them to the extent provided in this paragraph (c)(4). Nothing in this paragraph (c)(4) restricts the Commissioner's authority to challenge the allocations or values arrived at in an allocation agreement. This paragraph (c)(4) does not apply if the parties are able to refute the allocation or valuation under the standards set forth in *Commissioner v. Danielson*, 378 F.2d 771 (3d Cir.), *cert. denied*, 389 U.S. 858 (1967) (a party wishing to challenge the tax consequences of an agreement as construed by the Commissioner must offer proof that, in an action between the parties to the agreement, would be admissible to alter that construction or show its unenforceability because of mistake, undue influence, fraud, duress, etc.).

[4200] Reg. § 1.755-1(a)(4)(ii):

applies to basis adjustments under section 743(b) that result from exchanges in which the transferee's basis in the partnership interest is determined in whole or in part by reference to the transferor's basis in the interest or to the basis of other property held at any time by the transferee (substituted basis transactions). In the case of a substituted basis transaction, partnership gross value equals the value of the entire partnership as a going concern, increased by the amount of partnership liabilities at the time of the exchange giving rise to the basis adjustment.

[4201] Reg. § 1.755-1(a)(4)(i)(A).

[4202] Reg. § 1.755-1(a)(4)(i)(B), which further provides:

In these special situations, the partnership must assign value, first, among section 197 intangibles (other than goodwill and going concern value) in a reasonable manner that is consistent with the ordering rule in paragraph (a)(5) of this section and would cause the appropriate liquidating distribution under paragraph (a)(4)(i)(A) of this section. If the actual fair market values, determined on the basis of all the facts and circumstances, of all section 197 intangibles (other than goodwill and going concern value) is not sufficient to cause the appropriate liquidating distribution, then the fair market value of goodwill and going concern value shall be presumed to equal an amount that if assigned to goodwill and going concern value would cause the appropriate liquidating distribution.

[4203] Reg. § 1.755-1(a)(4)(i)(C).

If the aggregate value of partnership property other than section 197 intangibles[4204] is equal to or greater than partnership gross value,[4205] then all section 197 intangibles are deemed to have a value of zero for purposes of this allocation.[4206] Otherwise, the aggregate value of the partnership's section 197 intangibles (the residual section 197 intangibles value) is deemed to equal the excess of partnership gross value over the aggregate value of partnership property other than section 197 intangibles.[4207] The residual section 197 intangibles value must be allocated first among section 197 intangibles other than goodwill and going concern value[4208] and then to goodwill and going concern value.[4209]

Substituted basis transactions and other transactions have different methodologies.[4210] Subject to certain exceptions for substituted basis transaction:[4211]

[4204] Reg. § 1.755-1(a)(3) provides:

> For purposes of this section, the fair market value of each item of partnership property other than section 197 intangibles shall be determined on the basis of all the facts and circumstances, taking into account section 7701(g).

[4205] Gross value as determined in Reg. § 1.755-1(a)(4).

[4206] Reg. § 1.755-1(a)(5)(i).

[4207] Reg. § 1.755-1(a)(5)(i).

[4208] Reg. § 1.755-1(a)(5)(ii) provides:

> *Values assigned to section 197 intangibles other than goodwill and going concern value*. The fair market value assigned to a section 197 intangible (other than goodwill and going concern value) shall not exceed the actual fair market value (determined on the basis of all the facts and circumstances) of that asset on the date of the relevant transfer. If the residual section 197 intangibles value is less than the sum of the actual fair market values (determined on the basis of all the facts and circumstances) of all section 197 intangibles (other than goodwill and going concern value) held by the partnership, then the residual section 197 intangibles value must be allocated among the individual section 197 intangibles (other than goodwill and going concern value) as follows. The residual section 197 intangibles value is assigned first to any section 197 intangibles (other than goodwill and going concern value) having potential gain that would be treated as unrealized receivables under the flush language of section 751(c) (flush language receivables) to the extent of the basis of those section 197 intangibles and the amount of income arising from the flush language receivables that the partnership would recognize if the section 197 intangibles were sold for their actual fair market values (determined based on all the facts and circumstances) (collectively, the flush language receivables value). If the value assigned to section 197 intangibles (other than goodwill and going concern value) is less than the flush language receivables value, then the assigned value is allocated among the properties giving rise to the flush language receivables in proportion to the flush language receivables value in those properties. Any remaining residual section 197 intangibles value is allocated among the remaining portions of the section 197 intangibles (other than goodwill and going concern value) in proportion to the actual fair market values of such portions (determined based on all the facts and circumstances).

[4209] Reg. § 1.755-1(a)(5)(i), (iii).

[4210] Reg. § 1.755-1(b)(1)(i) provides:

> For basis adjustments under section 743(b) resulting from substituted basis transactions, paragraph (b)(5) of this section shall apply. For basis adjustments under section 743(b) resulting from all other transfers, paragraphs (b)(2) through (4) of this section shall apply.

[4211] Reg. § 1.755-1(b)(1)(i).

- The portion of the basis adjustment allocated to one class of property may be an increase while the portion allocated to the other class is a decrease. This would be the case even though the total amount of the basis adjustment is zero.

- The portion of the basis adjustment allocated to one item of property within a class may be an increase while the portion allocated to another is a decrease. This would be the case even though the basis adjustment allocated to the class is zero.

If the Code § 743(b) basis adjustment does not result from a substituted basis transaction, then the allocation of that adjustment between the classes of property and among the items of property within each class are made based on the allocations of income, gain, or loss[4212] that the transferee partner would receive (to the extent attributable to the acquired partnership interest) if, immediately after the transfer of the partnership interest, all of the partnership's property were disposed of in a fully taxable transaction for cash in an amount equal to the fair market value of such property (the hypothetical transaction):[4213]

1. The amount of the basis adjustment allocated to the class of ordinary income property is equal to the total amount of income, gain, or loss[4214] that would be allocated to the transferee (to the extent attributable to the acquired partnership interest) from the sale of all ordinary income property in the hypothetical transaction.[4215] The amount of the basis adjustment to each item of property within the class of ordinary income property is equal to:

   A. The amount of income, gain, or loss[4216] that would be allocated to the transferee (to the extent attributable to the acquired partnership interest) from the hypothetical sale of the item;[4217] reduced by

   B. The product of:[4218]

      - Any decrease to the amount of the basis adjustment to ordinary income property required pursuant to fn 4230; multiplied by

      - A fraction, the numerator of which is the fair market value of the item of property to the partnership and the denominator of which is the total fair market value of all of the partnership's items of ordinary income property.

2. The amount of the basis adjustment to capital gain property is equal to the total amount of the basis adjustment under Code § 743(b) minus he amount of the basis

[4212] Including remedial allocations under Reg. § 1.704-3(d).
[4213] Reg. § 1.755-1(b)(1)(ii), which further provides:
See § 1.460-4(k)(3)(v)(B) for a rule relating to the computation of income or loss that would be allocated to the transferee from a contract accounted for under a long-term contract method of accounting as a result of the hypothetical transaction.
[4214] Including any remedial allocations under Reg. § 1.704-3(d).
[4215] Reg. § 1.755-1(b)(2)(i).
[4216] Including remedial allocations under Reg. § 1.704-3(d).
[4217] Reg. § 1.755-1(b)(3)(i)(A).
[4218] Reg. § 1.755-1(b)(3)(i)(B).

adjustment allocated to ordinary income property.[4219] The amount of the basis adjustment to each item of property within the class of capital gain property is equal to:[4220]

A. The amount of income, gain, or loss[4221] that would be allocated to the transferee (to the extent attributable to the acquired partnership interest) from the hypothetical sale of the item;[4222] minus

B. The product of:[4223]

- The total amount of gain or loss[4224] that would be allocated to the transferee (to the extent attributable to the acquired partnership interest) from the hypothetical sale of all items of capital gain property, minus the amount of the positive basis adjustment to all items of capital gain property or plus the amount of the negative basis adjustment to capital gain property; multiplied by

- A fraction, the numerator of which is the fair market value of the item of property to the partnership, and the denominator of which is the fair market value of all of the partnership's items of capital gain property.

An asset with respect to which the transferee partner has no interest in income, gain, losses, or deductions shall not be taken into account in calculating this product.[4225] Furthermore, the amount of any decrease in basis allocated to an item of capital gain property above[4226] may not exceed the partnership's adjusted basis in that item; if a decrease in basis allocated above to an item of capital gain property would otherwise exceed the partnership's adjusted basis in that item, the excess must be applied to reduce the remaining basis, if any, of other capital gain assets pro rata in proportion to the bases of such assets (as adjusted under these rules).[4227]

3. In no event may the amount of any decrease in basis allocated to capital gain property exceed the partnership's basis[4228] in capital gain property.[4229] If a decrease in basis allocated to capital gain property would otherwise exceed the partnership's

[4219] Reg. § 1.755-1(b)(2)(i).
[4220] Reg. § 1.755-1(b)(3)(ii).
[4221] Including remedial allocations under Reg. § 1.704-3(d).

[4223] Reg. § 1.755-1(b)(3)(ii)(B).
[4224] Including remedial allocations under Reg. § 1.704-3(d).
[4225] Reg. § 1.755-1(b)(3)(iii)(A).
[4226] In the case of property subject to the remedial allocation method, the transferee's share of any remedial loss under Reg. § 1.704-3(d) from the hypothetical transaction.
[4227] Reg. § 1.755-1(b)(3)(iii)(B)
[4228] In the case of property subject to the remedial allocation method, the transferee's share of any remedial loss under Reg. § 1.704-3(d) from the hypothetical transaction.
[4229] Reg. § 1.755-1(b)(2)(i)(B).

basis in capital gain property, the excess must be applied to reduce the basis of ordinary income property.[4230]

4. Where a partnership interest is transferred as a result of the death of a partner, under Code § 1014(c) the transferee's basis in its partnership interest is not adjusted for that portion of the interest, if any, which is attributable to items representing income in respect of a decedent under Code § 691.[4231]

The rest of this part II.Q.8.e.iii.(d) covers substituted basis transactions.[4232] Initially, this was limited to Code § 743(b) basis adjustments resulting from exchanges in which the transferee's basis in the partnership interest is determined in whole or in part by reference to the transferor's basis in that interest.[4233] For exchanges on or after June 9, 2003, it also applies to Code § 743(b) basis adjustments that result from exchanges in which the transferee's basis in the partnership interest is determined by reference to other property held at any time by the transferee, including when a partnership interest:[4234]

- Is contributed to a corporation in a Code § 351 transaction,
- Is contributed to a partnership in a Code § 721(a) transaction, or
- Is distributed by a partnership in a Code § 731(a) transaction.

The substituted basis transaction's effect depends on whether the Code § 743(b) basis adjustment is zero, positive, or negative:[4235]

- If the overall Code § 743(b) basis adjustment is zero, then no adjustment to the basis of partnership property will be made.
- If the overall Code § 743(b) basis adjustment is positive, the increase is allocated to capital gain property or ordinary income property, respectively, only if the total amount of gain or loss[4236] that would be allocated to the transferee (to the extent attributable to the acquired partnership interest) from the hypothetical sale of all such property would result in a net gain or net income, as the case may be, to the transferee. If an increase in basis may be allocated to both capital gain assets and ordinary income assets, the increase is allocated to each class in proportion to the net gain or net income, respectively, which would be allocated to the transferee from the sale of all assets in each class.
- If the overall Code § 743(b) basis adjustment is negative, the decrease is allocated to capital gain property or ordinary income property, respectively, only if the total amount of gain or loss[4237] that would be allocated to the transferee (to the extent

[4230] Reg. § 1.755-1(b)(2)(i).
[4231] Reg. § 1.755-1(b)(4)(i), referring to Reg. § 1.742-1.
[4232] Reg. § 1.755-1(b)(5).
[4233] Reg. § 1.755-1(b)(5)(i).
[4234] Reg. § 1.755-1(b)(5)(i).
[4235] Reg. § 1.755-1(b)(5)(ii).
[4236] Including any remedial allocations under Reg. § 1.704-3(d).
[4237] Including any remedial allocations under Reg. § 1.704-3(d).

attributable to the acquired partnership interest) from the hypothetical sale of all such property would result in a net loss to the transferee. If a decrease in basis may be allocated to both capital gain assets and ordinary income assets, the decrease is allocated to each class in proportion to the net loss that would be allocated to the transferee from the sale of all assets in each class.

Any substituted basis increase within a class is allocated in the following order:[4238]

1. To properties with unrealized appreciation in proportion to the transferee's share of the respective amounts of unrealized appreciation before such increase (but only to the extent of the transferee's share of each property's unrealized appreciation), then any remaining increase

2. In proportion to the transferee's share of the amount that would be realized by the partnership upon the hypothetical sale of each asset in the class.

Any substituted basis decrease within a class is allocated in the following order:[4239]

1. To properties with unrealized depreciation in proportion to the transferee's shares of the respective amounts of unrealized depreciation before such decrease (but only to the extent of the transferee's share of each property's unrealized depreciation), then any remaining decrease

2. In proportion to the transferee's shares of their adjusted bases (as adjusted under the preceding sentence).

However, if a substituted basis decrease must be allocated to capital gain assets, ordinary income assets, or both, and the amount of the decrease otherwise allocable to a particular class exceeds the transferee's share of the adjusted basis to the partnership of all depreciated assets in that class, the transferee's negative basis adjustment is limited to the transferee's share of the partnership's adjusted basis in all depreciated assets in that class.[4240] Also, if a Code § 743(b) transferee's negative basis adjustment cannot be allocated to any asset, because the adjustment exceeds the transferee's share of the adjusted basis to the partnership of all depreciated assets in a particular class, the adjustment is made when the partnership subsequently acquires property of a like character to which an adjustment can be made.[4241]

CCA 201726012 (under the signature of David R. Haglund) asserted that Reg. § 1.1502-13 did not permit increased deductions for depreciation and amortization that are attributable to Code § 743(b) adjustments arising from the transfer of a partnership interest in an intercompany reorganization to which Code § 368 applies and from the distribution of a partnership interest in an intercompany liquidation to which Code § 332(a) applies. It also asserted that the basis adjustment provisions of Code § 743(b) do not conflict with the carryover basis provisions of Code § 362(a) when a partnership interest is transferred in an intercompany reorganization to which Code § 368 applies or with the carryover basis provisions of Code § 334(b)(1) when a

---

[4238] Reg. § 1.755-1(b)(5)(iii)(A).
[4239] Reg. § 1.755-1(b)(5)(iii)(B).
[4240] Reg. § 1.755-1(b)(5)(iii)(C).
[4241] Reg. § 1.755-1(b)(5)(iii)(D).

partnership interest is distributed in an intercompany liquidation to which Code § 332(a) applies.[4242]

II.Q.8.e.iii.(e). Code § 734 Basis Adjustment Resulting from Distributions, Including Code § 732(d) Requiring an Adjustment Without Making Code § 754 Election

The basis of partnership property is adjusted as the result of a distribution of property to a partner if a Code § 754 election is in effect with respect to such partnership or if there is a substantial basis reduction with respect to such distribution:[4243]

(1) To the extent that the adjustment is an increase, the partnership increases the basis of its property by:[4244]

- (A) the amount of any gain recognized to the distributee partner with respect to such distribution under Code § 731(a)(1), and

- (B) in the case of distributed property to which Code § 732(a)(2) or (b) applies, the excess of the adjusted basis of the distributed property to the partnership immediately before the distribution (as adjusted by Code § 732(d) – see further below) over the basis of the distributed property to the distributee, as determined under Code § 732.[4245]

(2) To the extent that the adjustment is a decrease, the partnership increases the basis of its property by:[4246]

[4242] CCA 201726012 reasoned:

> In the case of property transferred in a reorganization to which § 368 applies, in which no gain or loss is recognized, the basis of such property in the hands of the transferee generally is the same as it would be in the hands of the transferor under § 362(a). Similarly, in the case of property distributed to a corporate parent from a subsidiary in a complete liquidation to which § 332(a) applies, in which no gain or loss is recognized, the basis of such property in the hands of the distributee generally is the same as it would be in the hands of the distributor under § 334(b)(1).
>
> Thus, with respect to the transfer of the Partnership1 interest from SubsidiaryH to SubsidiaryF in the Reorganization (to which § 368 applies), and the distribution of the Partnership1 interest from SubsidiaryC to SubsidiaryE in the Liquidation (to which § 332 applies), the transferee's and distributee's basis in their Partnership1 interest is the same as it would be in the hands of the respective transferor and distributor.
>
> Application of § 743(b), by contrast, has no effect on the basis of a *partnership interest* transferred in a reorganization or distributed in a complete liquidation. Rather, in such cases, if the partnership has a § 754 election in effect, § 743(b) provides for an increase or decrease in the adjusted basis of *partnership property*.

[4243] Code § 734(a), see part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000.

[4244] Code § 734(b)(1).

[4245] The rule in (B) does not apply to any distributed property which is an interest in another partnership with respect to which a Code § 754 election is not in effect.

[4246] Code § 734(b)(2).

- (A) the amount of any loss recognized to the distributee partner with respect to such distribution under Code § 731(a)(2), and

- (B) in the case of distributed property to which Code § 732(b) applies, the excess of the basis of the distributed property to the distributee, as determined under Code § 732, over the adjusted basis of the distributed property to the partnership immediately before such distribution (as adjusted by Code § 732(d)).

Code § 755 allocates the basis adjustment described above.[4247] Generally, any Code § 743(b) change in the adjusted basis of partnership property will be allocated in a manner which has the effect of reducing the difference between the fair market value in any other manner permitted by regulations;[4248] this concept prevents any increase in the basis of assets that are distributed from reducing the basis of the partnership's assets with unrealized gain. In applying Code § 755 allocations to Code § 734(b) basis adjustments:

(1) Where a distribution of partnership property results in an adjustment to the basis of undistributed partnership property under Code § 734(b)(1)(B) or (b)(2)(B), the adjustment must be allocated to remaining partnership property of a character similar to that of the distributed property with respect to which the adjustment arose.[4249] Where a distribution results in an adjustment under Code § 734(b)(1)(A) or (b)(2)(A) to the basis of undistributed partnership property, the adjustment is allocated only to capital gain property.[4250]

(2) If a basis increase is allocated within a class, the increase is allocated first to properties with unrealized appreciation in proportion to their respective amounts of unrealized appreciation before such increase (but only to the extent of each property's unrealized appreciation), and any remaining increase must be allocated among the properties within the class in proportion to their fair market values.[4251] If a basis decrease is allocated within a class, the decrease is allocated first to properties with unrealized depreciation in proportion to their respective amounts of unrealized depreciation before such decrease (but only to the extent of each property's

---

[4247] Code § 732(c).

[4248] See fn. 4195, found in part II.Q.8.e.iii.(d) Code § 743(b) Effectuating Code § 754 Basis Adjustment on Transfer of Partnership Interest.

[4249] Reg. § 1.755-1(c)(1)(i), which continues:

> Thus, when the partnership's adjusted basis of distributed capital gain property immediately prior to distribution exceeds the basis of the property to the distributee partner (as determined under section 732), the basis of the undistributed capital gain property remaining in the partnership is increased by an amount equal to the excess. Conversely, when the basis to the distributee partner (as determined under section 732) of distributed capital gain property exceeds the partnership's adjusted basis of such property immediately prior to the distribution, the basis of the undistributed capital gain property remaining in the partnership is decreased by an amount equal to such excess. Similarly, where there is a distribution of ordinary income property, and the basis of the property to the distributee partner (as determined under section 732) is not the same as the partnership's adjusted basis of the property immediately prior to distribution, the adjustment is made only to undistributed property of the same class remaining in the partnership.

[4250] Reg. § 1.755-1(c)(1)(ii).

[4251] Reg. § 1.755-1(c)(2)(i).

unrealized depreciation), and any remaining decrease must be allocated among the properties within the class in proportion to their adjusted bases (as adjusted under the preceding sentence).[4252]

(3) Where Code § 734(b)(2) requires a decrease in the basis of partnership assets and the amount of the decrease exceeds the adjusted basis to the partnership of property of the required character, the basis of that property is reduced to zero (but not below zero).[4253]

(4) Where an increase or a decrease in the basis of undistributed property cannot be made because the partnership owns no property of the character required to be adjusted, or because the basis of all the property of a like character has been reduced to zero, the adjustment is made when the partnership later acquires property of a like character to which an adjustment can be made.[4254]

If a transferee partner receives a distribution of property (other than money) from the partnership within two years after the partner acquired the partner's interest or part thereof in the partnership by a transfer with respect to which a Code § 754 election was not in effect, the partner may elect to treat as the adjusted partnership basis of such property the adjusted basis such property would have if the Code § 754 election were in effect.[4255] For these purposes, a "transfer of a partnership interest occurs upon a sale or exchange of an interest or upon the death of a partner."[4256] Also, if a Code § 754 election is not in place, a partner is required to apply this rule to a distribution to him, whether or not made within two years after the transfer, if at the time of his acquisition of the transferred interest:[4257]

[4252] Reg. § 1.755-1(c)(2)(ii).

[4253] Reg. § 1.755-1(c)(3).

[4254] Reg. § 1.755-1(c)(4).

[4255] Reg. § 1.732-1(d)(1)(iii). Reg. § 1.732-1(d)(1)(iv) provides:

> If an election under section 732(d) is made upon a distribution of property to a transferee partner, the amount of the adjustment with respect to the transferee partner is not diminished by any depletion or depreciation of that portion of the basis of partnership property which arises from the special basis adjustment under section 732(d), since depletion or depreciation on such portion for the period prior to distribution is allowed or allowable only if the optional adjustment under section 743(b) is in effect.

The final regulations did not change the proposed regulations much. The preamble to the proposed regulations, REG 209682-94, provides:

> Section 732(d) provides a special rule that applies to determine the basis of property distributed to a transferee partner who acquired any part of its partnership interest in a transfer when an election under section 754 was not in effect. When the special rule applies, the basis of distributed property is adjusted immediately before the distribution to reflect the basis that the property would have had if the partnership had a section 754 election in effect at the time the transferee acquired the partnership interest. As a result, the basis of the distributed property in the hands of the partnership immediately before the distribution more closely approximates its fair market value. Consequently, the transferee's basis in the distributed property will also more closely approximate its fair market value.

[4256] Reg. § 1.732-1(d)(1)(i).

[4257] Reg. § 1.732-1(d)(4). The preamble to the proposed regulations, REG 209682-94, provided:

- The fair market value of all partnership property (other than money) exceeded 110% of its adjusted basis to the partnership,

- An allocation of basis under Code § 732(c) upon a liquidation of his interest immediately after the transfer of the interest would have resulted in a shift of basis from property not subject to an allowance for depreciation, depletion, or amortization, to property subject to such an allowance, and

- A Code § 743(b) basis adjustment would change the basis to the transferee partner of the property actually distributed.

If property is distributed to a transferee partner who makes a Code § 732(d) election, and if such property is not the same property which would have had a special basis adjustment, then the special basis adjustment applies to any like property received in the distribution, provided that the transferee, in exchange for the property distributed, has relinquished his interest in the property with respect to which he would have had a special basis adjustment.[4258] This rule applies whether the property in which the transferee has relinquished his interest is retained or disposed of by the partnership.[4259]

Special rules apply to unrealized receivables and substantially appreciated inventory items.[4260] Also, in reviewing anything in this part II.Q.8.e.iii.(e), consider whether part II.Q.8.e.iii.(g) Certain Changes in Inside Basis May Reduce Foreign Tax Credits may be relevant.

> The purpose of § 1.732-1(d)(4) was to prevent distortions caused by section 732(c) that might inflate the basis of depreciable, depletable, or amortizable property above its fair market value. At the time that the regulations were adopted, such distortions might occur because section 732(c) allocated basis among distributed properties based on their relative bases. The changes made to section 732(c) by the Taxpayer Relief Act of 1997, Public Law 105-34, section 1061, 111 Stat. 788, 945-46 (1997), make the distortions targeted by the regulations less likely to occur. As a result, the Service and Treasury request comments on the proper scope of section 732(d), and specifically, under what circumstances, if any, the Secretary should exercise its authority to mandate the application of section 732(d) to a transferee.

T.D. 8847 described and responded to the requested comments:

> Several commentators suggested that the mandatory application of section 732(d) no longer should be required, because the changes made to section 732(c) by the Taxpayer Relief Act of 1997, Public Law 105- 34, 111 Stat. 788, 945-46 (1997), make the distortions targeted by the regulations less likely to occur. However, other commentators noted that distortions caused by section 732(c) still may occur. Accordingly, the rule contained in § 1.732-1(d)(4), which requires the mandatory application of section 732(d) in certain cases, remains in effect.

[4258] Reg. § 1.732-1(d)(1)(v).

[4259] Reg. § 1.732-1(d)(1)(v). For a shift of transferee's basis adjustment under Code § 743(b) to like property, see Reg. § 1.743-1(g).

[4260] See fns. 3898-3900, found in part II.Q.8.b.i.(d) Basis in Property Distributed from a Partnership; Possible Opportunity to Shift Basis or Possible Loss in Basis When a Partnership Distributes Property.

II.Q.8.e.iii.(f). Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold

When an asset sale is desirable for tax purposes but a stock sale is necessary for nontax purposes, Code § 338(g) permits a corporation that buys another corporation from the target's parent in a qualified purchase to elect to treat the stock purchase as an asset purchase.

Similarly, the owners of an S corporation should consider making a Code § 338(h)(10) election when selling their S corporation stock to a corporation.[4261]

The election causes the stock sale to be treated as if the S corporation sold all its assets while owned by the sellers and while still an S corporation. Gain is therefore recognized by the S corporation and taxed to the selling shareholders, which creates additional basis in their S corporation stock. The actual sale of the stock is ignored for tax purposes and the shareholders are treated as receiving the sale proceeds in liquidation of the S corporation.

Thus, the selling shareholders will be taxed on a deemed asset sale and liquidation, rather than on a stock sale. Unless they bought a portion of their stock at a premium over the value of the corporation's assets, the Code § 338(h)(10) election will generally not significantly affect the amount of gain on which they would be taxed. However, it will cause a portion of their gain to be ordinary income, rather than capital gain, to the extent that a sale of the S corporation's assets would generate ordinary income, and state income tax surprises might occur; for a discussion of the some of the issues mentioned in the sentence, see similar issues raised in part II.H.8 Lack of Basis Step-Up for Depreciable or Ordinary Income Property in S Corporation. But, the whole point was to replicate an asset sale for tax purposes, so the Code § 338(h)(10) election merely allows a different form to be used for the deemed asset sale.

If the purchaser is not a corporation, a Code § 336(e) election might allow the buyer to replicate the results of a Code § 338(h)(10) election.[4262] The selling corporation or S corporation shareholder(s) must dispose of stock of another corporation (target) in a qualified stock disposition.[4263] "Qualified stock disposition" means any transaction or series of transactions in which stock meeting the requirements of Code § 1504(a)(2) of a domestic corporation is either sold, exchanged, or distributed, or any combination thereof, by another domestic corporation or by the S corporation shareholders in a disposition,[4264] during the 12-month disposition period.[4265] "Disposition" means any sale, exchange, or distribution of stock, but only if:[4266]

[4261] Reg. § 1.338(h)(10)-1(c)(1) authorizes a Code § 338(h)(1) election when a corporation buys all of the stock of the target corporation.

[4262] Reg. § 1.336-1(a) provides that the effects of Code § 338(h)(10) and the regulations thereunder generally apply to Code § 336(e) elections.

[4263] Reg. § 1.336-2(a), referring to Reg. § 1.336-1(b)(6) in defining a qualified stock disposition.

[4264] Within the meaning of Reg. § 1.336-1(b)(5).

[4265] Reg. § 1.336-1(b)(6).

[4266] Reg. § 1.336-1(b)(5).

(A) The basis of the stock in the hands of the purchaser is not determined in whole or in part by reference to the adjusted basis of such stock in the hands of the person from whom the stock is acquired or under Code § 1014(a) (property acquired from a decedent);

(B) Subject to an exception for certain Code § 355(d)(2) and (e)(2) transactions,[4267] the stock is not sold, exchanged, or distributed in a transaction to which Code § 351, 354, 355, or 356 applies and is not sold, exchanged, or distributed in any transaction described in regulations in which the transferor does not recognize the entire amount of the gain or loss realized in the transaction; and

(C) The stock is not sold, exchanged, or distributed to a related person.

Both the rules governing Code § 338(h)(10) elections and Code § 336(e) elections[4268] provide that stock acquired by a purchasing corporation from a related corporation is generally not considered acquired by purchase.[4269] The seller cannot be a person the ownership of whose stock would, under Code § 318(a) (other than Code § 318(a)(4)), be attributed to the buyer.[4270] (Also, in reviewing anything in this part II.Q.8.b.i.(d), consider whether part II.Q.8.e.iii.(g) Certain Changes in Inside Basis May Reduce Foreign Tax Credits may be relevant.)

A Code § 336(e) election for an S corporation target is made by completing the following requirements:[4271]

- All of the S corporation shareholders, including those who do not dispose of any stock in the qualified stock disposition, and the S corporation target must enter into a written, binding agreement, on or before the due date (including extensions) of the Federal income tax return of the S corporation target for the taxable year that includes the disposition date, to make a Code § 336(e) election;

- The S corporation target must retain a copy of the written agreement; and

- The S corporation target must attach the Code § 336(e) election statement, to its timely filed (including extensions) Federal income tax return for the taxable year that includes the disposition date. A Reg. § 301.9100-3 extension of time to file the election may be available.[4272]

[4267] Reg. § 1.336-1(b)(5)(ii) provides that:

> a distribution of stock to a person who is not a related person in a transaction in which the full amount of stock gain would be recognized pursuant to section 355(d)(2) or (e)(2) shall be considered a disposition.

[4268] Reg. § 1.336-1(b)(5)(iii) provides:

> *Transactions with related persons*. In determining whether stock is sold, exchanged, or distributed to a related person, the principles of section 338(h)(3)(C) and § 1.338-3(b)(3) shall apply.

[4269] Reg. § 1.338-3(b)(3).

[4270] Code § 338(h)(3)(A)(iii). See Harris & Kessler, Constructive Ownership under Section 318, *Business Entities* (WG&L), Mar/Apr 2016.

[4271] Reg. § 1.336-2(h)(3).

[4272] Letter Rulings 201652014 and 201711007, the latter holding:

Instead of the seller(s) being treated as selling stock, the target is treated as selling its assets to an unrelated person in a single transaction at the close of the disposition date (but before the deemed liquidation described below)[4273] in exchange for the aggregate deemed asset disposition price.[4274] The target realizes the deemed disposition tax consequences from the deemed asset disposition before the close of the disposition date while the target is owned by seller or the S corporation shareholders.[4275] If the target is an S corporation, its S election continues in effect through the close of the disposition date (including the time of the deemed asset disposition and the deemed liquidation) notwithstanding the usual rules for S corporation terminations.[4276] Also, if the target is an S corporation (but not a qualified subchapter S subsidiary (QSub)[4277]), any direct or indirect subsidiaries of the target that the target has elected to treat as QSubs remain qualified QSubs through the close of the disposition date.[4278] If the target is an S corporation, its shareholders (whether or not they sell or exchange their stock) take their pro rata share of the deemed disposition tax consequences into account under Code § 1366 and increase or decrease their basis in target stock under Code § 1367.[4279]

Immediately after the deemed asset disposition described above, the target is treated as acquiring all of its assets from an unrelated person in a single, separate transaction at the close of the disposition date in exchange for an amount equal to the adjusted grossed-up basis.[4280] The target remains liable for the tax liabilities it had before this

---

WITHIN 45 DAYS OF THE DATE ON THIS LETTER, S Corporation Target and the S Corporation Shareholder must enter into a written, binding agreement to make a section 336(e) election and S Corporation Target must file the section 336(e) election statement in accordance with § 1.336-2(h). The section 336(e) election statement must be attached to S Corporation Target's tax return for B Year. In addition, a copy of this letter must be attached to S Corporation Target's return. Alternatively, if S Corporation Target files its return electronically, it may satisfy the requirement of attaching a copy of this letter to the return by attaching a statement to its return that provides the date and control number (PLR-131803-16) of this letter ruling.

WITHIN 120 DAYS OF THE DATE ON THIS LETTER, all relevant parties must file or amend, as applicable, all returns and amended returns (if any) necessary to report the transaction consistently with the making of a section 336(e) election for the taxable year in which the transaction was consummated (and for any other affected taxable year).

The above extension of time is conditioned on the taxpayers' (*i.e.*, Purchaser's, S Corporation Target's, and S Corporation Shareholder's) tax liability (if any) being not lower, in the aggregate, for all years to which the section 336(e) election applies than it would have been if the Election had been timely filed (taking into account the time value of money). No opinion is expressed as to the taxpayers' tax liability for the years involved. A determination thereof will be made by the applicable Director's office upon audit of the federal income tax returns involved.

4273 Reg. § 1.336-2(b)(1)(iii).
4274 Reg. § 1.336-2(b)(1)(i)(A).
4275 Reg. § 1.336-2(b)(1)(i)(A).
4276 Reg. § 1.336-2(b)(1)(i)(A).
4277 See part II.A.2.h Qualified Subchapter S Subsidiary (QSub).
4278 Reg. § 1.336-2(b)(1)(i)(A).
4279 Reg. § 1.336-2(b)(1)(iii)(A).
4280 Reg. § 1.336-2(b)(1)(ii).

deemed sale and purchase (including the tax liability for the deemed disposition tax consequences).[4281]

The target and seller (or S corporation shareholders) are treated as if, before the close of the disposition date, after the deemed asset disposition described above, and while target is owned by seller or S corporation shareholders, the target transferred all of the consideration deemed received in the deemed asset disposition to seller or S corporation shareholders, any S corporation election for the original target terminated, and the original target ceased to exist.[4282] This transfer to the seller or S corporation shareholders is characterized for Federal income tax purposes in the same manner as if the parties had actually engaged in the transactions deemed to occur above and taking into account other transactions that actually occurred or are deemed to occur.[4283]

Thus, the following transactions are deemed to have occurred:

1. The target sells its assets to a hypothetical buyer.

2. The target is treated as having bought its assets from a hypothetical seller.

3. The target liquidates, while the old shareholders are deemed to continue owning the stock.

The time for taking into account liabilities in the hypothetical asset transaction and the amount of the liabilities taken into account is determined as if the consideration included the discharge of the liabilities by the unrelated person.[4284] For example, if no amount of a liability is properly taken into account in amount realized as of the beginning of the day after the disposition date, the liability is not initially taken into account in determining the purchase price, but it may be taken into account at some later date.[4285] At the January 2017 American Bar Association Section of Taxation meeting, a discussion of Code § 336(e) gave this example:[4286]

- Deemed asset purchase price equals cash paid plus "liabilities" assumed.

- Liabilities do not include amounts which are not currently deductible or amounts not borrowed from a third party.

[4281] Reg. § 1.336-2(b)(1)(ii).

[4282] Reg. § 1.336-2(b)(1)(iii)(A).

[4283] Reg. § 1.336-2(b)(1)(iii)(A), which continues:

> For example, the transfer may be treated as a distribution in pursuance of a plan of reorganization, a distribution in complete cancellation or redemption of all of its stock, one of a series of distributions in complete cancellation or redemption of all of its stock in accordance with a plan of liquidation, or part of a circular flow of cash. In most cases, the transfer will be treated as a distribution in complete liquidation to which sections 331 or 332 and sections 336 or 337 apply.

[4284] Reg. § 1.336-3(d)(2).

[4285] Reg. § 1.336-3(d)(2).

[4286] Slides discussed by Bakal, Bakke, Mottahedeh, and Weiss are saved as Thompson Coburn LLP document no. 6563470.

- Assume that the asset are worth 100, are associated with 20 of liabilities, and that the purchaser pays 80 for the target's stock.

- On the target's deemed liquidation after filing a conversion election, assets distributed are worth 100, but basis is limited to 80, which potentially triggers 20 of gain.

The meeting gave the following examples of liabilities that may trigger this gain:

- Environmental and other contingent liabilities

- Deferred compensation (Code § 404(a)(5))

- Obligations to perform future services (*Pierce*)

- Economic performance (Code § 461(h))

However, it was suggested that such a mismatch may occur in a straight asset sale as well.

A minority shareholder who retains its target stock does not recognize gain or loss with respect to its shares of target stock; thus, the minority shareholder's basis (except as noted below) and holding period for that target stock are not affected by Code § 336(e) election. [4287] Notwithstanding this treatment of the minority shareholder, if a Code § 336(e) election is made, target will still be treated as disposing of all of its assets in the deemed asset disposition.[4288] If the target is an S corporation, any K-1 items the minority shareholder reports by reason of the deemed sale will affect the shareholder's basis.[4289]

A handy list comparing Code § 338(h)(10) elections and Code § 336(e) elections is found at Harper & Andersen, "Section 336(e)-Another Tool in the Toolbox," *BNA Daily Tax Report* (5/28/2014).[4290]

At the May 2017 American Bar Association Section of Taxation meeting, a discussion of Code §§ 336(e), 338(h)(10), 453(h), and 453B(h), included:[4291]

- Helpful flowcharts showing the transactions deemed to occur in Code § 336(e) or 338(h)(10) elections.

[4287] Reg. § 1.336-3(d)(3).
[4288] Reg. § 1.336-3(d)(3).
[4289] Note the parenthetical in this quote from Reg. § 1.336-2(b)(1)(iii)(A):

> If old target is an S corporation, S corporation shareholders (whether or not they sell or exchange their stock) take their pro rata share of the deemed disposition tax consequences into account under section 1366 and increase or decrease their basis in target stock under section 1367.

[4290] A copy of which is saved as Thompson Coburn LLP document no. 6344607.
[4291] "Converting Stock Sales to Assets Sales (and Back Again)," slides discussed by Dolan, Harper, and Waters, is saved as Thompson Coburn LLP document no. 6617969.

- Potential surprises, how to avoid them using a one-day note for 100% of the transaction, and disadvantages of doing so.[4292]

- State approaches.

One way to avoid the complexity of these elections and disparate state law treatment may be to create a new parent corporation, convey or merge the old corporation into a new single-member, tax-disregarded LLC, and then sell the LLC to the buyers. The first two steps constitute a tax-free Code § 368(a)(1)(F) transaction.[4293] Selling the LLC to the buyers means that the buyer is not concerned with the old corporation's status as an S corporation.[4294]

II.Q.8.e.iii.(g). Certain Changes in Inside Basis May Reduce Foreign Tax Credits

A "covered asset acquisition" may disqualify a portion of the foreign tax credit.[4295]

For purposes of this rule, "covered asset acquisition" means:[4296]

(A) a qualified stock purchase (as defined in section 338(d)(3)) to which section 338(a) applies,

(B) any transaction which-

(i) is treated as an acquisition of assets for purposes of this chapter, and

(ii) is treated as the acquisition of stock of a corporation (or is disregarded) for purposes of the foreign income taxes of the relevant jurisdiction,

(C) any acquisition of an interest in a partnership which has an election in effect under section 754, and

(D) to the extent provided by the Secretary, any other similar transaction.

Prop. Reg. § 1.901(m)-2(b) would add:[4297]

[4292] If the buyer was willing to pay cash and the seller wanted the one-day note, the buyer's willingness to pay cash does not prevent the seller from using the installment method – only the actual deal counts. Rev. Rul. 73-396.
[4293] See parts II.E.7.c.i.(b) Use F Reorganization to Form LLC and II.P.3.i Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization.
[4294] For example, the S corporation may have had an ineligible shareholder. See parts II.A.2.g Shareholders Eligible to Hold S Corporation Stock and III.A.3.a.ii How a Trust Can Fall Short of Being Wholly Owned by One Person, the latter explaining how one might think that a trust is a wholly-owned grantor trust but may be incorrect.
[4295] Code § 901(m)(1).
[4296] Code § 901(m)(2).
[4297] These supplement Reg. § 1.901(m)-2T(b) (which is not repeated in the text because it does not seem to add to the statute):

> *Covered asset acquisitions*. Except as provided in paragraph (d) of this section, the transactions set forth in this paragraph (b) are CAAs.

(4) Any transaction (or series of transactions occurring pursuant to a plan) to the extent it is treated as an acquisition of assets for purposes of U.S. income tax and as the acquisition of an interest in a fiscally transparent entity for purposes of a foreign income tax;

(5) Any transaction (or series of transactions occurring pursuant to a plan) to the extent it is treated as a partnership distribution of one or more assets the U.S. basis of which is determined by section 732(b) or 732(d) or which causes the U.S. basis of the partnership's remaining assets to be adjusted under section 734(b), provided the transaction results in an increase in the U.S. basis of one or more of the assets distributed by the partnership or retained by the partnership without a corresponding increase in the foreign basis of such assets; and

(6) Any transaction (or series of transactions occurring pursuant to a plan) to the extent it is treated as an acquisition of assets for purposes of both U.S. income tax and a foreign income tax, provided the transaction results in an increase in the U.S. basis without a corresponding increase in the foreign basis of one or more assets.

Generally, international structures and most of subchapter C are beyond the scope of this paper. This part II.Q.8.e.iii.(g) Certain Changes in Inside Basis May Reduce Foreign Tax Credits is merely one consideration when an international structure is affected by the tools described in parts II.Q.8.b.i.(d) Basis in Property Distributed from a Partnership; Possible Opportunity to Shift Basis or Possible Loss in Basis When a Partnership Distributes Property, II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754 Election or Required Adjustment for Built-in Loss) and II.Q.8.e.iii.(f) Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold.

II.Q.8.e.iv. Transfer of Partnership Interests Resulting in Deemed Termination: Effect on Partnership (repealed by the 2017 tax reform law)

Caution – This part II.Q.8.e.iv was repealed by the 2017 tax reform law.

If a sale or exchange of 50% or more of the total interest in partnership capital ***and***[4298] profits occurs (in the aggregate) within a 12-month period, the partnership is deemed to

---

(1) A qualified stock purchase (as defined in section 338(d)(3)) to which section 338(a) applies (section 338 CAA);

(2) Any transaction that is treated as an acquisition of assets for U.S. income tax purposes and as an acquisition of stock of a corporation (or the transaction is disregarded) for foreign income tax purposes;

(3) Any acquisition of an interest in a partnership that has an election in effect under section 754 (section 743(b) CAA);

(4)-(6) [Reserved].

[4298] For example, the sale of a 30% interest in partnership capital and a 60% interest in partnership profits is not the sale or exchange of 50% or more of the total interest in partnership capital and profits. Reg. § 1.708-1(b)(2).

have terminated.[4299] However, a disposition of a partnership interest by gift (including assignment to a successor in interest), bequest, or inheritance, the liquidation of a partnership interest, and the contribution of property to a partnership do not constitute such a sale or exchange is not a sale or exchange for purposes of this test.[4300]

If a partnership is terminated by a sale or exchange of an interest, the partnership is deemed to contribute all of its assets and liabilities to a new partnership in exchange for an interest in the new partnership; and, immediately thereafter, the terminated partnership is deemed to distribute interests in the new partnership to the purchasing partner and the other remaining partners in proportion to their respective interests in the terminated partnership in liquidation of the terminated partnership, either for the continuation of the business by the new partnership or for its dissolution and winding up:[4301]

- Subject to the points made below in this part II.Q.8.e.iv, see parts II.Q.8.b.i Distribution of Property by a Partnership and II.M.3 Buying into or Forming a Partnership for the deemed distribution from the old partnership and contribution to the new partnership, respectively (which tend to be tax-free transactions).

- Book values and capital accounts from the old partnership carry over to the new partnership.[4302] Therefore, no Code § 704(c) accounting for newly contributed property applies; instead, the terminating entity's Code § 704(c) accounting carries over.[4303]

- These deemed transactions do not trigger Code § 704(c)(1)(B)[4304] or Code § 737[4305] taxation on the distribution of property within seven years after contribution, which makes sense given the continuation of Code § 704(c) accountability.

- The partner who acquired the partnership interest in the sale or exchange that triggered the deemed termination would obtain a basis adjustment in the partnership's assets that this partner is deemed to acquire if a Code § 754 election is in place.[4306] A partner with a Code § 743 basis adjustment in the partnership's property will continue to have the same basis adjustment with respect to property deemed contributed by the terminated partnership to the new partnership,[4307] regardless of whether the new partnership makes a Code § 754 election.[4308] See part II.Q.8.e.iii.(d) Code § 743(b) Effectuating Code § 754 Basis Adjustment on Transfer of Partnership Interest, which describes inside basis adjustments.[4309]

4299 Code § 708(b)(1)(B).

4304 Reg. § 1.704-4(c)(3).
4305 Reg. § 1.737-2(a).
4306 Reg. § 1.708-1(b)(5).
4307 Referring to Reg. § 1.708-1(b)(1)(iv).
4308 Reg. § 1.743-1(h)(1).
4309 See part II.Q.8.e.iii.(a) Illustration of Inside Basis Issue.

- Any start-up expenditures being amortized under Code § 195(b) or organizational expenses being amortized under Code § 709(b)(1) continue to use the same schedule.[4310] However, depreciation of tangible property starts over,[4311] as does the

[4310] Reg. § 1.708-1(b)(6). See also Reg. §§ 1.197-2(g)(2) and 1.197-2(k), Example (16), the latter providing:

> (i) A and B are partners with equal shares in the capital and profits of general partnership P. P's only asset is an amortizable section 197 intangible, which P had acquired on January 1, 1995. On January 1, 2000, the asset had a fair market value of $100 and a basis to P of $50. On that date, A sells his entire partnership interest in P to C, who is unrelated to A, for $50. At the time of the sale, the basis of each of A and B in their respective partnership interests is $25.
>
> (ii) The sale causes a termination of P under section 708(b)(1)(B). Under section 708, the transaction is treated as if P transfers its sole asset to a new partnership in exchange for the assumption of its liabilities and the receipt of all of the interests in the new partnership. Immediately thereafter, P is treated as if it is liquidated, with B and C each receiving their proportionate share of the interests in the new partnership. The contribution by P of its asset to the new partnership is governed by section 721, and the liquidating distributions by P of the interests in the new partnership are governed by section 731. C does not realize a basis adjustment under section 743 with respect to the amortizable section 197 intangible unless P had a section 754 election in effect for its taxable year in which the transfer of the partnership interest to C occurred or the taxable year in which the deemed liquidation of P occurred.
>
> (iii) Under section 197, if P had a section 754 election in effect, C is treated as if the new partnership had acquired two assets from P immediately preceding its termination. Even though the adjusted basis of the new partnership in the two assets is determined solely under section 723, because the transfer of assets is a transaction described in section 721, the application of sections 743(b) and 754 to P immediately before its termination causes P to be treated as if it held two assets for purposes of section 197. See paragraph (g)(3) of this section. B's and C's proportionate share of the new partnership's adjusted basis is $25 each in one asset, which continues to be amortized over the 10 years remaining in the original 15-year amortization period. For the other asset, C's proportionate share of the new partnership's adjusted basis is $25 (the amount of the basis increase resulting from the application of section 743 to the sale or exchange by A of the interest in P), which is amortized over a new 15-year period beginning in January 2000.
>
> (iv) If P did not have a section 754 election in effect for its taxable year in which the sale of the partnership interest by A to C occurred or the taxable year in which the deemed liquidation of P occurred, the adjusted basis of the new partnership in the amortizable section 197 intangible is determined solely under section 723, because the transfer is a transaction described in section 721, and P does not have a basis increase in the intangible. Under section 197(f)(2) and paragraph (g)(2)(ii) of this section, the new partnership continues to amortize the intangible over the 10 years remaining in the original 15-year amortization period. No additional amortization is allowable with respect to this asset.

[4311] In proposing regulations that T.D. 8717 (5/8/1997) finalized, [PS-5-96], Termination of a Partnership under Section 708(b)(1)(B), stated:

> In addition, the proposed regulations will not change the effect of a termination on the depreciation of partnership property by the new partnership. Property deemed contributed to the new partnership will continue to be subject to the anti-churning provisions of section 168(f)(5), which generally require the new partnership to depreciate the property as if it were newly-acquired property under the same depreciation system used by the terminated partnership. This result is required by statute and is not affected

method for accounting for book-tax differences when depreciating assets.[4312] The terminating partnership cannot depreciate any assets it places in service during the termination year;[4313] rather the new partnership depreciates them, including receiving bonus depreciation[4314] for any assets placed in service during the termination year.[4315]

- For purposes of certain procedures regarding changing accounting methods, a technical termination constitutes cessation of a trade or business.[4316]

- The new partnership retains the old partnership's tax ID.[4317] Each of the old and new partnership files a short period return, with the new partnership filing a return for its taxable year beginning after the date of termination of the terminated partnership.[4318]

Contrast this with a corporation (whether or not an S election is in place). It is not deemed to terminate when its shareholders change, although a change in shareholders could impair the use of net operating losses, etc.[4319]

II.Q.8.e.v. Partnership Mergers

For partnership mergers, see IRS Notice 2005-15 and any related proposed regulations.[4320] For an overview of mergers, with helpful charts and diagrams, see

---

> by the specific mechanics of a termination under section 708(b)(1)(B). See Code sections 168(f)(5); 168(i)(7); 168(e)(4) and (f)(10)(repealed 1986).

Code § 168(i)(7) provides that the transferee steps into the shoes of the transferor when depreciating an asset to which Code § 332, 351, 361, 721, or 731 applies. However, Code § 168(i)(7)(B) provides that this rule does not apply in the case of a partnership's termination under Code § 708(b)(1)(B). By negative implication, such a termination restarts the depreciation period. See McKee, Nelson & Whitmire, ¶ 13.05[2][k] Effect on Depreciation of Partnership Property, *Federal Taxation of Partnerships & Partners* (WG&L).

4312 Reg. § 1.704-3(a)(2).

4313 Reg. § 1.168(d)-1(b)(3)(ii) includes:

> No depreciation deduction is allowed for property placed in service and disposed of during the same taxable year.

4314 See part II.G.4 Code § 179 Expensing Substitute for Depreciation; Bonus Depreciation.

4315 Reg. § 1.168(k)-1(b)(5)(iii).

4316 See Section 3.04(2)(f) of Rev. Proc. 2015-13, the other provisions of which Rev. Proc. 2015-33 clarified. Lovett, "Technical Termination of LLCs and Partnerships: Overview, Mechanics and Opportunities," *TM Real Estate Journal* (BNA) (2/1/2017), suggests that the termination's closing the tax year will require that two separate installments of a prior Code § 481(a) adjustment be taken into account in one calendar year.

4317 Reg. § 301.6109-1(d)(2)(iii); see also the Example in Reg. § 1.708-1(b)(4).

4318 Notice 2001-5.

4319 Code § 382.

4320 See also CCA 201315026. RIA Checkpoint *Catalyst*, ¶ 218:111 Merger or Consolidation of Partnerships, described a ruling:

> In IRS Letter Ruling 201619001, a real estate investment trust (REIT) formed a partnership (OP), then transferred cash and its own stock to the partnership in exchange for a partnership interest. A second partnership (M) then transferred all of its assets to OP in exchange for OP partnership interests and the REIT stock. M then liquidated, distributing the REIT stock to some of its partners and the OP partnership interests to the remaining partners. The IRS ruled that the transaction was a merger of OP and M under Reg. § 1.708-1(c). IRS Letter Ruling 201619001.

Borden, "Navigating State Law and Tax Issues Raised by Partnership and LLC Reorganizations," *Business Entities* (Jul./Aug. 2014), suggesting using an "assets-over" form to preserve basis or holding period and an "assets-up" type to change basis or holding period.[4321] Below are some details.

If two or more partnerships merge or consolidate into one partnership, the resulting partnership shall be considered a continuation of the merging or consolidating partnership the members of which own an interest of more than 50% in the capital and profits of the resulting partnership.[4322] Generally, if this resulting partnership can be considered a continuation of more than one of the merging or consolidating partnerships, it shall be considered the continuation solely of that partnership which is credited with the contribution of assets having the greatest fair market value (net of liabilities) to the resulting partnership, and any other merging or consolidating partnerships shall be considered as terminated.[4323] However, if the members of none of the merging or consolidating partnerships have an interest of more than 50% in the capital and profits of the resulting partnership, all of the merged or consolidated partnerships are terminated, and a new partnership results.[4324]

The taxable years of any merging or consolidating partnerships which are considered terminated shall be closed in under Code § 706(c) the regulations thereunder, and those partnerships shall file their returns for a taxable year ending upon the date of merger or consolidation.[4325] Any resulting partnership shall file a return for the taxable year of the merging or consolidating partnership that is considered as continuing.[4326]

A merger is an "assets-over" merger unless it as an "assets-up" merger.[4327] In an "assets-up" merger, the merged or consolidated partnership that is considered terminated as described above distributes all of its assets to its partners (in a manner that causes the partners to be treated, under the laws of the applicable jurisdiction, as the owners of such assets) in liquidation of the partners' interests in the terminated partnership, and immediately thereafter, the partners in the terminated partnership contribute the distributed assets to the resulting partnership in exchange for interests in the resulting partnership.[4328] The form of such a partnership merger or consolidation will

---

Comment: In IRS Letter Ruling 201619001, M was formed immediately before the merger as the result of the division of a third partnership (X) into two separate partnerships. The IRS respected the form of the transaction as a division followed by a merger. The apparent purpose of this form was to permit the partners of X receiving REIT stock (who were also partners of M after the division) as having sold their partnership interests in M to OP under Reg. § 1.708-1(c)(4) (see ¶ 218:114) For further discussion, see Substance Over Form Exception in ¶ 218:113.

[4321] For a description of the two types of transactions, see part II.Q.8 Exiting From or Dividing a Partnership, especially part II.Q.8.d.iii Assets-Over vs. Assets-Up Division.

[4322] Reg. § 1.708-1(c)(1).

[4323] Reg. § 1.708-1(c)(1).

[4324] Reg. § 1.708-1(c)(1).

[4325] Reg. § 1.708-1(c)(2).

[4326] Reg. § 1.708-1(c)(2), which also provides that the resulting partnership shall keep its original taxpayer identification number and include certain tax disclosures.

[4327] Reg. § 1.708-1(c)(3)(i).

[4328] Reg. § 1.708-1(c)(3)(ii).

be respected for federal income tax purposes despite the partners' transitory ownership of the terminated partnership's assets.[4329]

When two or more partnerships merge or consolidate into one partnership under the applicable jurisdictional law, without undertaking a form for the merger or consolidation, or undertake a form for the merger or consolidation that is not an assets-up merger, any merged or consolidated partnership that is considered terminated is treated as undertaking the assets-over form for Federal income tax purposes.[4330] Under the assets-over form, the merged or consolidated partnership that is considered terminated contributes (or is treated as contributing) all of its assets and liabilities to the resulting partnership in exchange for an interest in the resulting partnership, and immediately thereafter, the terminated partnership distributes interests in the resulting partnership to its partners in liquidation of the terminated partnership.[4331]

Code §§ 704(c)(1)(B) and 737 and Reg. §§ 1.704-4 and 1.737-2 do not apply to a transfer by a partnership (transferor partnership) of all of its assets and liabilities to a second partnership (transferee partnership) in an exchange described in Code § 721, followed by a distribution of the interest in the transferee partnership in liquidation of the transferor partnership as part of the same plan or arrangement.[4332] A later distribution of Code § 704(c) property by the transferee partnership to a partner of the transferee partnership is subject to Code § 704(c)(1)(B) to the same extent that a distribution by the transferor partnership would have been subject to Code § 704(c)(1)(B).[4333] Similarly, a later distribution of property by the transferee partnership to a partner of the transferee partnership that was formerly a partner of the transferor partnership is subject to Code § 737 to the same extent that a distribution from the transferor partnership would have been subject to Code § 737.[4334]

In an assets-over merger, a sale of all or part of a partner's interest in the terminated partnership to the resulting partnership that occurs as part of a merger or consolidation will be respected as a sale of a partnership interest if the merger agreement (or another document) specifies that the resulting partnership is purchasing interests from a particular partner in the merging or consolidating partnership and the consideration that is transferred for each interest sold, and if the selling partner in the terminated partnership, either before or at the same time as the transaction, consents to treat the transaction as a sale of the partnership interest.[4335]

[4329] Reg. § 1.708-1(c)(3)(ii).
[4330] Reg. § 1.708-1(c)(3)(i).
[4331] Reg. § 1.708-1(c)(3)(i).
[4332] Reg. §§ 1.704-4(c)(4), 1.737-2(b)(1).
[4333] Reg. § 1.704-4(c)(4).
[4334] Reg. § 1.737-2(b)(3).
[4335] Reg. § 1.708-1(c)(4), referring to Code § 741 and Reg. § 1.741-1 for determining the selling partner's gain or loss on the sale or exchange of the partnership interest; see part II.Q.8.e.ii.(b) Character of Gain on Sale of Partnership Interest. Letter Ruling 201619001 (described in fn. 4320) respected a sale under Reg. § 1.708-1(c)(4), when the contribution agreement relating to a merger will specify (i) that the partnership is purchasing its interest in another partnership from each particular partner in the purchasing partnership and (ii) the consideration that is transferred for each interest purchased.

When merging, consider whether any relief of debt or other actual or deemed distributions within two years might constitute a disguised sale. See part II.M.3.e Exception: Disguised Sale. However, some divisions might be taxable to the extent that they rely on Code § 721(a) nonrecognition.[4336]

The IRS expects to issue regulations, effective for distributions from partnerships made after January 19, 2005, providing the following regarding Code § 704(c) gain and reverse-Code § 704(c) gain:[4337]

> The regulations will apply the principles of Rev. Rul. 2004-43 to distributions of property following assets-over partnership mergers. The regulations will apply to distributions of property with newly created § 704(c) gain or loss whether or not that gain or loss is treated as reverse § 704(c) gain or loss as the result of a revaluation by the transferor partnership. The regulations also will apply to distributions of property with original § 704(c) gain or loss that existed upon contribution to the transferor partnership. However, the regulations will provide that if the transferor partnership in an assets-over merger holds contributed property with original § 704(c) gain or loss, the seven year periods in §§ 704(c)(1)(B) and 737 do not restart with respect to that gain or loss as a result of the merger.
>
> The regulations will provide that § 704(c)(1)(B) does not apply to newly created § 704(c) gain or loss in property contributed by the transferor partnership to the continuing partnership in an assets-over partnership merger involving partnerships owned by the same owners in the same proportions. In addition, the regulations will provide that for purposes of § 737, net precontribution gain does not include newly created § 704(c) gain or loss in property contributed by the transferor partnership to the continuing partnership in an assets-over partnership merger involving partnerships owned by the same owners in the same proportions. In order for merging partnerships to qualify for the exceptions described in this paragraph, each partner's percentage interest in the transferor partnership's capital, profits, losses, distributions, liabilities, and all other items must be the same as the partner's percentage interest in those items of the continuing partnership.

The survivor of merged partnerships may want to see whether it qualifies for special Code § 704(c) accounting for securities partnerships.[4338]

[4336] If a foreign person is directly or indirectly involved, see the discussion of when Code § 721(a) does not apply to any deemed contribution to a partnership in part II.M.3.g Exception: Foreign Partner (among various other exceptions to Code § 721(a).

[4337] Notice 2005-15. Query whether the regulations would be retroactive, given all of the time that has passed. For a description of reverse-Code § 704(c) allocations, see part II.Q.8.b.i.(e) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value, especially fns. 3932-3935.

[4338] See fn. 2796 (especially Letter Ruling 201710008), found in part II.P.1.a.i Allocations of Income in Partnerships.

When two or more partnerships merge or consolidate in an assets-over merger, increases and decreases in partnership liabilities associated with the merger or consolidation are netted by the partners in the terminating partnership and the resulting partnership to determine the effect of the merger under the Code § 752 rules allocating liabilities to partners and determining whether a change in liabilities constitutes a distribution or contribution.[4339] For more information, see part II.C.3 Allocating Liabilities (Including Debt).

If any merger described above is part of a larger series of transactions and the substance of the larger series of transactions is inconsistent with following the form prescribed above, the IRS may disregard the form and recast the larger series of transactions according to their substance.[4340]

II.Q.9. Trust Selling a Business

See parts:

- II.J.16 Fiduciary Income Taxation When Selling Interest in a Pass-Through Entity or When the Entity Sells Its Assets,
- II.J.15 QSST Issues That Affect the Trust's Treatment Beyond Ordinary K-1 Items, and
- II.J.17 Planning for Grantor and Nongrantor Trusts Holding Stock in S Corporations in Light of the 3.8% Tax.

See also parts:

- II.I.8.e NII Components of Gain on the Sale of an Interest in a Partnership or S Corporation,
- II.I.8.d.iv Treatment of Code § 736 Redemption Payments under Code § 1411, and

[4339] Reg. § 1.752-1(f).

[4340] Reg. § 1.708-1(c)(6)(i), providing the following example in Reg. § 1.708-1(c)(6)(ii):

> A, B, and C are equal partners in partnership ABC. ABC holds no section 704(c) property. D and E are equal partners in partnership DE. B and C want to exchange their interests in ABC for all of the interests in DE. However, rather than exchanging partnership interests, DE merges with ABC by undertaking the assets-up form described in paragraph (c)(3)(ii) of this section, with D and E receiving title to the DE assets and then contributing the assets to ABC in exchange for interests in ABC. As part of a prearranged transaction, the assets acquired from DE are contributed to a new partnership, and the interests in the new partnership are distributed to B and C in complete liquidation of their interests in ABC. The merger and division in this example represent a series of transactions that in substance are an exchange of interests in ABC for interests in DE. Even though paragraph (c)(3)(ii) of this section provides that the form of a merger will be respected for Federal income tax purposes if the steps prescribed under the assets-up form are followed, and paragraph (d)(3)(i) of this section provides a form that will be followed for Federal income tax purposes in the case of partnership divisions, these forms will not be respected for Federal income tax purposes under these facts, and the transactions will be recast in accordance with their substance as a taxable exchange of interests in ABC for interests in DE.

- II.I.8.g Structuring Businesses in Response to 3.8% Tax.

II.R. Choice of Entity Hypothetical

Alice, Ben and Connie want to form a business manufacturing and selling widgets. They have been friends for many years. Even though they consider themselves family, technically they are not related to each other.

Alice is a natural at sales. She has many contacts and could sell any product that she believes is beneficial to the customer. Alice is terrific at selling not only to potential customers but also potential investors.

Ben is great at putting together and running organizations. He always knows what is going on in the business, tracking current progress, making short-term and long-term financial projections, and keeping everyone focused on the company's goals. Ben is talented at securing financing and making investors feel comfortable that they are receiving accurate information.

Connie is a creative genius. She has scientific knowledge, engineering skills, and a keen mind for how to make machines and manufacturing and packaging processes work. Connie will enable the company to be a low cost producer for generic products and to efficiently tailor manufacturing processes to fit special customer needs.

Initial Formation - Year 1

Connie came up with a revolutionary widget that every household should have, and Alice has informally discussed with various retailers how they might help market the product. Ben has arranged a $1,000,000 bank loan, but the bank is going to make Alice, Ben and Connie personally guarantee loan repayment. Alice, Ben and Connie have agreed to take no compensation the first year, $50,000 each the second year, and then see where the business is headed. The business requires a $500,000 machine, as well as five employees to run it, initially under Connie's supervision. The business leases its space.

How should they set up their deal in Year 1?

Types of entities: sole proprietorships, partnerships, C corporations and S corporations. Business ownership and management structure. Tax on formation. Allocating gain when entity later sells contributed property. Ability to deduct losses: basis and at-risk limitations; net operating losses at entity vs. shareholder level; Code § 1244 stock. Allocating gain and loss from ongoing operations; tax distribution clauses. Self-employment/FICA tax: partnership vs. limited partnership vs. S corporation vs. C corporation.

Outside Investors - Year 2

Due to additional capital needs to take the business to the next level, Alice has been working on securing two investors who would put up capital of $250,000 each. They seek an annual preferred return of 20%, as well as one-fifth each of the business' residual value.

How should they bring in the investors? What governance/approval mechanisms would the investors want to protect themselves?

Tax on later contribution to entity. Allocation of income from operations, including preferred returns and, if taxed as a partnership, disguised sale issues. Restrictions on shareholders (S corporations).

Buying Out Outside Investors - Year 5

In Year 5, the business is earning $600,000 per year net profit, after paying $100,000 annual compensation to each of Alice, Ben and Connie. Alice, Ben and Connie are not getting along with the outside investors and want to buy them out. They believe the business will continue to expand and do not wish to share this growth with the investors when the company is later sold, and they are tired of paying a 20% return to the investors.

How should Alice, Ben and Connie go about buying out the investors? How would the form of organization affect this?

Structurally, it would require an agreement on the part of the investors to be bought out. The founders could have an option built into the original financing arrangements allowing them to buy back at certain formula, or upon certain triggers. Discuss dispute resolution mechanisms as well as buy-out options. Contrast S corporation or C corporation buy-out with after-tax dollars with LLC buy-out with pre-tax dollars under Code § 736, which can eliminate capital gain tax on part or all of the complete liquidation of an LLC member's interest.

Bigger Workforce; Family Business Succession Planning - Year 10

In Year 10, the business is earning $2,000,000 net profit, after paying $250,000 annual compensation to each of Alice, Ben and Connie. It has full sales and manufacturing forces and excellent office support, for a total of 50-100 employees. Everyone loves these new widgets; Connie keeps finding ways to improve the product; and Alice keeps finding new customers. Ben, however, is tired of trying to keep up with their unbridled energy. Ben's son, George, just received an MBA from a leading business school. Ben thinks that George should take over Ben's job and would like to transfer some of his equity to him. Alice and Connie agree to let George work his way into the business, getting experience in various office functions and eventually moving up to Ben's job in five years if George works out well.

How should they handle George's new role and Ben's phasing out of his own role? What if George turns out to be a slacker?

Estate planning issues: tax rates and exemption levels, ability to make gifts, transferring business opportunities or leveraged businesses, asset protection planning using trusts, passing to spouse and children, fair vs. equal, dividing into voting and nonvoting ownership interests, need for single class of equity interest (consider nonvested stock), and estate tax issues with related party buy-sell agreements. Alice, Ben and Connie want to institute some kind of nonqualified deferred compensation plan for themselves. Develop simple performance bonus for George, payable within 2½ months after close of year with no option for deferral. Important to set goals based on where Alice, Ben and

Connie want George to be in five years. If George turns out to be a slacker, he gets no bonus. When Ben wants to transfer some of his shares to George, consider the issues of restrictions on transfer, rights of first refusal, etc.

Purchase of Retiring Founder's Interest; Business Succession Planning to Current Key Employee - Year 15

In Year 15, Alice gets bored. She wants to sell her share of the business to Ben, George and Connie and retire to a tropical island, along with the main characters in John Grisham's first two books. Sally, an employee who has been a top salesman for years, wants to take Alice's job. However, Sally has no money to invest to buy out Alice. Furthermore, Sally wants some financial incentives based on the company's sales and profitability.

Should the company, the other owners, or Sally buy out Alice? What kind of incentives should Sally be given?

Availability of capital gain rates when entity sells assets. Tax on splitting up or dissolving. Code § 736 payments. Consider phantom shares or restricted stock for Sally. George needs to be ahead of Sally because he is the son of the founder and, in his mind, the heir apparent. Include George in same plan developed for Sally. Also see issues from Year 10.

Purchase of Deceased Founder's Interest, Including Possible Sale of Business - Year 20

In Year 20, Connie dies. The stresses of keeping up with changing technology and foreign competition left her exhausted.

How should the remaining owners handle buying out Connie's ownership interest, which under her estate plan would pass to her husband, Herman?

Instead, should they sell the business? To the employees or to outside investors? Possible merger?

What if the remaining owners prefer to retire, turning the business over to the employees?

Estate tax deferral. Restricted stock (or phantom stock) immediately vested. Also see issues from Year 15.

III. Estate Planning Implications

The first section of this portion deals with drafting and administering trusts and estates, including income taxation and fiduciary responsibility. The second section deals with transfer tax issues, including transfers during life, estate tax issues, and special valuation issues (including the effect of buy-sell agreements). The third section discusses fairness within families, including allocating assets when businesses are involved and potential conflicts of interest involved in those allocation decisions.

The AICPA has Trust, Estate and Gift Tax Resources.[4341]

III.A. Drafting and Administering Trusts and Estates

Drafting trusts to hold business interests involves melding the grantor's wishes with the related income tax consequences, especially when holding stock in S corporations. Trustees need to consider diversifying, but when a special purpose of the trust is to hold a business interest, the trustees will want to make sure that the businesses are professionally run in a manner that is both economically sound for the beneficiaries but also minimizes the trustees' liability.

III.A.1. General Benefits of Trusts

Increasingly, people are becoming aware of the need to protect their assets from claims by creditors or spouses. Clients can do a big favor for their surviving spouses or children by leaving assets in trust instead of outright. The trust agreement can provide them with virtually complete control over the trust. Or, if clients wish, the trust agreement could be very restrictive. It all depends on what they want.

For example, a wife leaves her entire estate outright to her husband upon her death. They orally agree that he will leave her remaining assets to their children at his death. Unfortunately, that's a moral, not a legal, agreement. Suppose the husband remarries after the wife's death. Under Missouri law, upon his death, his new spouse would have the right to about 1/3 of his estate. This would be contrary to the clients' originally agreed goal of having all of their assets pass to their children at her death.

What about estate taxes? A credit shelter trust can protect future appreciation from estate tax, for those concerned about it. Lawyers can include various options to attain basis step-up through selective estate inclusion, to the extent it later turns out to be beneficial.

Clients can avoid these problems and reduce or avoid estate tax by leaving their property in trust for the surviving spouse. If they wish, the surviving spouse can be the sole trustee, take distributions for support as the surviving spouse determines, and change how the trust's assets pass at the surviving spouse's death to take into account changes in their children's family circumstances. Because the assets are in a trust the first spouse created, if the second spouse remarries, the new spouse would not have a claim on them upon the second spouse's death. Because the first spouse used his or her estate tax exclusion amount to create the trust, it will be excluded from the surviving spouse's estate at the surviving spouse's death, and the surviving spouse can use his or her exclusion amount to cover the assets that the surviving spouse owned outside of that trust.

What about leaving assets to children? Even adult children may need protection from creditors and spouses. Suppose a child starts a new business. The child's creditors will demand personal guarantees. If the client leaves assets to the child outright, they would

[4341] See http://www.aicpa.org/INTERESTAREAS/TAX/RESOURCES/TRUSTESTATEANDGIFT/Pages/default.aspx.

be at risk. Likewise, if the child marries, the child's spouse might persuade the child to put the money in a joint account. If the child later divorces, the child will need to split this account with the soon-to-be ex-spouse.

When I asked a client whether he liked the idea of trusts for his children, he told me about his neighbor. The neighbor bought a house for his daughter and her husband. The house was titled jointly in their names. When the daughter divorced, the neighbor bought his ex-son-in-law's half so that the daughter could own the house outright. In other words, the neighbor paid for his daughter's house one and a half times!

Clients can avoid these, and other (special needs trusts), problems by leaving your property in a separate trust for each child. If the client wishes, his or her child can be the sole trustee of the child's trust, take distributions to support the child as the child determines, and change how the trust's assets pass at the child's death. The child might even be able to pass the trust's assets free from estate tax, even if the child's separate assets use up the estate tax exclusion amount.

I often authorize an independent person to make unlimited distributions to the beneficiary, to facilitate tax planning or decanting.

Many states now allow trusts to last forever. However, flexible drafting can let each generation change the rules for the next.

By using trusts, we can help clients protect their families from predators. We can also build in flexibility to allow them to react to changes that nobody can foresee, so that we can help clients give their families a legacy that they might enjoy forever.

III.A.2. Liability Issues

In most states, trusts may hold interests in general partnerships or sole proprietorships only if the governing instrument or a state statute grants the trustee authority to do so, because of the liability risks involved. Even investments in limited liability entities may be considered too risky unless they have a proven track record. The propriety of an authorized investment in a closely-held business is determined by applying the same standard of care as for other assets.[4342]

Under the Uniform Prudent Investor Act (UPIA), [4343] a trustee "shall invest and manage trust assets as a prudent investor would by considering the purposes, terms, distribution requirements, and other circumstances of the trust;" and in making such decisions, the trustee "shall exercise reasonable care, skill and caution."[4344] Additionally, a trustee's investment and management decisions regarding individual assets are to be evaluated with respect to the trust portfolio as a whole and "as part of an overall investment strategy having risk and return objectives reasonably suited to the trust."[4345] While making investment decisions and managing trust assets, the trustee should consider

[4342] See generally, Bogert, *The Law of Trusts and Trustees*, § 679 (Rev. 2d. Ed. 1982).
[4343] Citations to the Uniform Prudent Investor Act (UPIA) are to the version adopted in 1994, published April 18, 1995, by the National Conference of Commissioners on Uniform State Laws.
[4344] UPIA §2(a).
[4345] UPIA §2(b).

factors such as general economic conditions, tax consequences, the role of the asset in the overall trust portfolio, and the expected return from the asset.[4346] Perhaps the most important factor to be considered is the asset's special relationship or value to the purposes of the trust or to one or more of the beneficiaries, when the special purpose of the trust is to hold a business interest.[4347] This factor ties in with the UPIA's other requirement that the trustee diversify the trust investments unless special circumstances indicate the trust's purposes would be better served without diversification.[4348] Thus, when the trust's specific purpose is to hold a business interest, a lack of diversity in the assets of the trust will not run afoul of the UPIA's requirements. Finally, the UPIA imposes a "duty of impartiality" when the trust has more than one beneficiary. The trustee is to act impartially in performing his or her duties and in doing so should take into account any differences in the beneficiaries' interests. For example, the trustee has to consider any potential conflicts between the interests of beneficiaries interested in trust income versus those interested in trust principal.[4349] This duty of impartiality will affect the trustee's investment and management conduct with regard to principal and income allocations – especially with regard to tax burden allocations.

The Uniform Trust Code (UTC)[4350] provides default rules governing the trustee's duties and powers, but allows for many of those rules to be modified by terms of the trust.[4351] Among those duties are the duty of loyalty and the duty of impartiality among beneficiaries, a duty identical to the UPIA's duty of impartiality.[4352] With regard to the duty of loyalty, the trustee must act in furtherance of the best interests of the beneficiaries. Specifically, when the trust holds a business interest, the trustee has a duty to vote shares and use proper care to promote beneficiary interests; and when the trust is the sole owner of an entity, the trustee should elect or appoint a director or manager to manage the entity in the best interests of the beneficiaries.[4353] In a corporate context, the trustee must vote for corporate directors who will follow policy consistent with the trustee's duty of impartiality. The UTC also emphasizes that when a trustee has special skills or expertise in an area, he or she should use those skills in managing the trust.[4354] In recognition of the trustee's ability to hold business interests, the UTC gives the trustee the power to continue business and take actions that would be taken by shareholders, members, or property owners and allows the trustee to exercise rights of an absolute owner with respect to stocks or other securities.[4355] One might consider including a provision addressing the compensation a person earns as trustee, as a director, and as an officer or other employee of the company – who makes the payments and how do the payments relate to each other. These duties might conflict with the corporate directors' duties to *all* the shareholders.

With regard to partnership interests specifically, National Banks may find it difficult to hold a partnership interest. The Office of the Comptroller of the Currency (OCC) regulates these banks and has stated that, as a general partner, a bank's liability is not limited to the principal of a particular account, but that it would object to a bank investing in general partnerships unless local law limited the bank's liability.[4356] As a limited partner, a bank usually would not have a say in the management of the assets. When a bank does hold a limited partnership interest, the OCC will not object if such investment is authorized by the governing instrument, local law or by written consent of account beneficiaries. Additionally, the bank would still be subject to the prudent investment standard, and the investment would have to meet the objective of the entity to match the outsider's offer.[4357] Distributions are mandatory, but the person controlling the entity may establish reasonable reserves.

Some people give the donee the right to sell the interest to the donee for cash equal to the appraised value, which right lasts 15-45 days – whatever the practitioner feels is similar to what would be a reasonable period within which to exercise *Crummey* rights.[4358]

III.A.3. Trusts Holding Stock in S Corporations

Estates, including not only decedents' estates but also bankruptcy estates, are qualified shareholders during a reasonable period of administration.[4359]

The rest of this part III.A.3 deals with trusts.

III.A.3.a. Wholly Owned Grantor Trusts – How to Qualify, Risks, and Protective Measures

A wholly owned grantor trust is among the types of trusts that can hold stock in an S corporation. For a description of the types of trusts that qualify, see part III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation.

Below are discussions of what types of trusts can qualify as wholly owned grantor trusts, what it means to be "wholly" owned, how a trust can fall short, and what step an S corporation should take to avoid a trust falling short if it is at risk for doing so.

[4356] Note that a partnership may register as a limited liability partnership (LLP) to limit the general partner's liability. When a limited partnership registers as an LLP, it might be called a limited liability limited partnership (LLLP).

[4357] If a right of first refusal contains a fixed price instead of just the right to match the offering price, and that fixed price is less than the offering price, failure to exercise that right generally would constitute a gift. Letter Ruling 9117035.

[4358] *Crummey v. Commissioner*, 397 F.2d 82, (9th Cir. 1968); see *Estate of Cristofani v. Commissioner*, 97 T.C. 74 (1991) (reviewed decision approving annual exclusion for gifts to grandchildren who had *Crummey* rights exercisable for 15 days and otherwise had only contingent remainder interests); *Mikel v. Commissioner*, T.C. Memo. 2015-64 (sustaining annual exclusion for withdrawal rights provided to 60 beneficiaries; alternative dispute resolution process did not prevent beneficiaries from having enforceable rights).

[4359] Code §§ 1361(b)(1)(B), 1361(c)(3); Reg. §§ 1.1361-1(b)(1)(ii), 1.1361-1(b)(2).

III.A.3.a.i. Qualifying as a Wholly Owned Grantor Trust

This part III.A.3.a Wholly Owned Grantor Trusts – How to Qualify, Risks, and Protective Measures discusses a trust that qualifies as a shareholder solely because all of the trust is treated under the grantor trust rules as owned by an individual who is a citizen or resident of the United States.[4360] If a trust has more than one deemed owner but they have substantially separate and independent shares, the trusts are treated as separate trusts[4361] and may separately qualify as wholly owned grantor trusts.[4362]

[4360] Implementing Code § 1361(c)(2)(A)(i), Reg. § 1.1361-1(h)(1)(i) provides:

> *Qualified subpart E trust*. A trust all of which is treated (under subpart E, part I, subchapter J, chapter 1) as owned by an individual (whether or not the grantor) who is a citizen or resident of the United States (a qualified subpart E trust). This requirement applies only during the period that the trust holds S corporation stock.

[4361] Implementing the flush language at the end of Code § 1361(d)(3), Reg. § 1.1361-1(j)(3) includes:

> For purposes of sections 1361(c) and (d), a substantially separate and independent share of a trust, within the meaning of section 663(c) and the regulations thereunder, is treated as a separate trust.

[4362] In approving a community property trust as an eligible shareholder before and after divorce, Letter Ruling 9729025 held:

> Under the trust agreement, H and W retain the power to revoke TR and revest the trust's property in themselves. Therefore, H and W are treated, under section 676, as the owners of TR until their divorce. Because TR is treated as owned entirely by H and W between d2 and d3, TR is a trust described in section 1361(c)(2)(A)(i).
>
> Under section 663(c) and section 1.663(c)-1(a) of the Income Tax Regulations, shares of a single trust are treated as separate trusts if the trust has more than one beneficiary and the different beneficiaries have substantially separate and independent shares. Section 1.663(c)-3 provides that the applicability of the separate share rule generally depends upon whether distributions of the trust are to be made in substantially the same manner as if separate trusts had been created. Thus, if an instrument directs a trustee to divide the trust estate into separate shares for each beneficiary and the trustee is given discretion, with respect to each share, to distribute or accumulate income or to distribute principal or accumulated income or to do both, separate shares will exist under section 663(c).
>
> Upon the dissolution of H's and W's marriage, the community property held by TR (including the X stock) was divided equally on the trustee's books and each half was treated as the separate property of H and W. As a result, H was entitled to all of the income from his separate share of the trust property and so much of the principal as he directed. Likewise, W was entitled to all of the income from her separate share of the trust property and so much of the income as she directed. Therefore, H's and W's shares of TR are substantially separate and independent shares within the meaning of section 663(c).

I am not sure that I agree with the logic of why the trust qualified while they were married, although ultimately the result was probably correct. The ruling points out that Code § 1361(c)(1) treats spouses as one shareholder for purposes of Code § 1361(b)(1)(A). However, the ruling determined eligibility under Code § 1361(c)(2)(A)(i), so presumably applying the spousal unity rule for purposes of Code § 1361(b)(1)(A) would not have been relevant to the ruling. Therefore, in case the ruling's spousal unity reasoning was incorrect, consider having any community property trusts held as separate and independent shares during life.

If not a foreign trust,[4363] such a grantor trust automatically qualifies as an S corporation shareholder,[4364] and the trust's deemed owner is treated as the shareholder for all tax purposes,[4365] including the 100-shareholder limitation.[4366]

A revocable trust would qualify as a grantor trust taxed to its grantor.[4367] An irrevocable trust might qualify as a grantor trust taxed to the grantor under the normal rules of Code §§ 671-677, to the beneficiary under Code § 678, or to the beneficiary through a QSST election made by the beneficiary.

A trust might be taxable to a beneficiary under Code § 678 if the beneficiary has a withdrawal right with respect to all gifts to the trust (a *Crummey* trust);[4368] whether such withdrawal rights impair spendthrift protection requires additional analysis.[4369] Examples of Code § 678 trusts include:

- Grantor creates a "vested" trust for a grandchild, as follows: The grandchild can withdraw the entire gift and all earnings on the gift. This withdrawal right lapses in full after a reasonable interval. The grandchild is the sole beneficiary during his or her life and has a general power of appointment upon death. For income tax purposes, one may treat the trust as deemed owned 100% by the beneficiary.[4370] The gift qualifies for the annual exclusion.[4371] For estate tax purposes, the trust is includible in the beneficiary's estate.[4372] If and to the extent that the gift qualifies for the annual exclusion, the gift is also exempt for generation-skipping transfer (GST) purposes, without using any GST exemption.[4373] If and to the extent that the lapse exceeds the greater of $5,000 or 5% of the trust's assets (subject to coordination

---

4363 Reg. § 1.1361-1(h)(2) precludes a foreign trust, as defined in Code § 7701(a)(31), from holding stock, even it otherwise would qualify as a shareholder.
4364 Code § 1361(c)(2)(A)(i).
4365 Code § 671. Grantor trusts may use their deemed owners' social security numbers as their taxpayer identification numbers. Reg. § 1.671-4(b)(2)(A). However, a QSST must file Form 1041 and attach a statement of the items treated as having been received directly by its beneficiary. Reg. § 1.671-4(b)(6). One might consider filing Form 1041 for other grantor trusts as well to get the statute of limitations running on grantor trust treatment.
4366 Code § 1361(c)(2)(B)(i).
4367 Code § 676.
4368 See discussion of IRS Letter Rulings in 730-2nd T.M., S corporation*s: Formation and Termination*, II.E.1.b(3), and in *Federal Income Taxation of S corporations* ¶ 3.03[10] (4th ed., Warren, Gorham & Lamont). A trustee-beneficiary's power to make distributions to himself under an ascertainable standard might make the trustee-beneficiary a Code § 678 owner to the extent of that distributions would be authorized under that standard. Letter Rulings 8211057 and 200747002 (Code § 678(a)(2) lapse followed by the beneficiary-trustee being able to make distributions to himself under an ascertainable standard was sufficient to allow the trust to hold stock in an S corporation). For more details, see part III.B.2.i Code § 678 (Beneficiary Grantor) Trusts.
4369 See parts III.B.2.i.viii Creditor and Gift/Estate Tax Issues Regarding Withdrawal Rights.
4370 See parts III.B.2.i.vi Portion Owned When a Gift Over $5,000 is Made.
4371 For qualification of withdrawal rights for the annual exclusion and whether an interest in a business entity qualifies for the annual exclusion, see part III.B.1.b Gifts Without Consideration, Including Restructuring Businesses or Trusts Before Gifts or Other Transfers, especially the paragraph accompanying fn. 4775.
4372 Code § 2041(a)(2).
4373 Code § 2642(c).

with other lapses by that beneficiary),[4374] the beneficiary has made an incomplete gift[4375] and for GST purposes becomes the transferor;[4376] however, because the trust is included in the beneficiary's estate for estate tax purposes, the beneficiary's GST exemption needs to be allocated upon death anyway.

- Grantor makes a gift of less than $5,000 to the trust[4377] and later sells stock in an S corporation to the trust.[4378]

- Decedent bequeaths to a trust over which the beneficiary holds an unlimited withdrawal right, making the trust taxable to the beneficiary under Code § 678(a)(1), building in features that would trigger Code § 678(a)(2) after the withdrawal rights lapse.[4379]

Note that the settlor's grantor trust powers trump any beneficiary's grantor trust powers.[4380]

A beneficiary may also be treated as the owner by making a "QSST" election[4381] to have the grantor trust rules apply. See part III.A.3.e.i QSSTs.

III.A.3.a.ii. How a Trust Can Fall Short of Being Wholly Owned by One Person

If a person is treated as the owner of a portion of a trust, that portion may or may not include both ordinary income and other income allocable to corpus.[4382] However, for a trust to meet the wholly owned grantor trust rules, one person must be the deemed owner of both income and principal.[4383]

4374 Code § 2514(e).
4375 Reg. 25.2511-2(b).
4376 See Reg. § 26.2652-1(a)(5), Example (5).
4377 See part III.B.2.i.v Funding the Trust with Small Gifts.
4378 See part III.B.2.i.iv Sale to a Beneficiary Grantor Trust – When a Traditional Sale to an Irrevocable Grantor Trust Does Not Meet the Client's Objectives.
4379 See part III.B.2.i.vii Funding the Trust with a Large Initial Gift or Bequest.
4380 Code § 678(b).
4381 Code § 1361(d)(1). If the beneficiary dies and the trust continues, with another beneficiary stepping into his or her place, the QSST election remains in place, Reg. § 1.1361-1(j)(9); but, if the trust terminates by reason of the beneficiary's death, then a new QSST election must be filed. Reg. § 1.1361-1(j)(9)(ii), Example (2). One might consider including a clause that, during trust administration, after the beneficiary's death and before separate trusts can be funded, the trust will not terminate but rather will continue as a single trust with separate shares pursuant to Reg. § 1.1361-1(j)(9)(ii), Example (1).
4382 Reg. § 1.671-3(b).
4383 Code § 1361(c)(2)(A)(i). Letter Ruling 200226006 held that a trust that was partly a nongrantor trust and partly a grantor trust did not satisfy this rule, even though the grantor trust portion was created by contributing S corporation stock and the nongrantor portion was created by contributing other assets. (Generally I would recommend separating grantor and nongrantor trusts anyway; the facts in that letter ruling were particularly problematic in that the trust appears to be partially a GST-exempt trust and partially a Code § 2036 trust.) This ruling is consistent with Reg. § 1.1361-1(k)(1), Example (10), paragraph (iii) (reproduced in fn. 4470, which is found in part III.A.3.e.i.(a) QSSTs Generally). Letter Ruling 200942020 approved an irrevocable grantor trust as an S corporation shareholder when it had multiple *Crummey* power holders, holding that

If the grantor's spouse is a beneficiary, the trust is not necessarily deemed wholly owned,[4384] so an additional grantor trust power might be advisable.[4385] The trust might very well cease qualifying as a wholly-owned grantor trust upon separation or divorce,[4386] so that an ESBT election might be necessary after divorce or separation.[4387]

If a trust qualifies as being deemed wholly owned by the beneficiary, consider what might happen if the provision upon which the beneficiary's deemed ownership is based includes some ambiguity.[4388] Also, if the beneficiary does not have a withdrawal right over every gift to the trust and over the income and gains generated by each such gift or if the beneficiary has a withdrawal right that lapses in an incorrect manner, the trust might not be deemed wholly owned by the beneficiary.[4389]

III.A.3.a.iii. Steps an S Corporation Might Take to Avoid a Trust Falling Short of Being a Wholly-Owned Grantor Trust

An S corporation might insist that certain protective measures be taken in case a trust falls short of being deemed wholly owned by one person.

If the trust is intended to be deemed owned wholly by the beneficiary, the beneficiary might file a QSST election, just in case the trust is not deemed wholly owned by the beneficiary. A beneficiary cannot elect QSST treatment if the grantor is taxed as the owner; however, a beneficiary make elect QSST treatment if the beneficiary is taxed as the owner.[4390] However, the beneficiary might not want to make the QSST election during any time when the trust is buying stock from the beneficiary, because a QSST election complicates the purchase and might make the process of getting the value of the stock out of the beneficiary's estate take twice as long.[4391]

For a trust deemed owned by its settlor (or a trust deemed owned by its beneficiary where QSST status is undesirable to impractical), the trust might file an ESBT election, just in case the trust is not a wholly-owned grantor trust taxable to only one person. Although estate planners commonly rely on swap powers, they are not foolproof.[4392] A

Code § 678(b) caused the grantor's deemed owner status to trump the beneficiaries' deemed owner status.

4384 Letter Ruling 201208013.

4385 See part III.B.2.h How to Make a Trust a Grantor Trust.

4386 See fn. 4470, discussing how Reg. § 1.1361-1(k)(1), Example (10), applies Code § 682 to a trust owning stock in an S corporation.

4387 See parts III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation (especially part III.A.3.b.v An Electing Small Business Trust) and III.A.3.e.ii.(a) Qualification as an ESBT.

4388 See part III.B.2.i.xi Dealing with Code § 678(a)(2) Uncertainty.

4389 See part III.B.2.i.vi Portion Owned When a Gift Over $5,000 is Made.

4390 Reg. § 1.1361-1(j)(6)(iv).

4391 See part III.A.3.e.vi.(c) Required Structure for a Sale to a QSST (Including Possible Pitfalls).

4392 Whether a swap power is effective depends on the facts and circumstances, as described in Reg. § 1.675-1(b)(4)(iii). Part III.B.2.h.ii Swap Power quotes this regulation and describes why estate planners do not mind relying on it as the sole grantor trust feature. Letter Ruling 9548013 held (highlighting added):

> Based upon the facts and representations you submitted, we conclude that A will be treated as the owner of TR1 and B will be treated as the owner of TR2 provided that the District Director determines that the circumstances indicate that A and B hold the power

grantor trust may make an ESBT election.[4393] However, grantor trust treatment trumps ESBT taxation.[4394] That doesn't mean that the ESBT election is not technically in effect[4395] - it just means that the election has no current income tax consequences.

These protective measures are not necessarily beneficial to anyone other than the S corporation:

- A grantor trust can use regular income taxation for the first two years after the grantor's death and get more favorable income tax treatment as a regular trust.[4396] Obtaining that more favorable income tax treatment is why one might not want to make an ESBT election when one creates an irrevocable grantor trust.

- Some grantor trusts might qualify as a QSST or an ESBT upon termination of grantor trust status.[4397] The regulations limit how often one can switch back and forth between QSST and ESBT status. Initially making the ESBT election means that, after switching to a QSST once, the trust must wait 36 months before switching back to a QSST or later back to an ESBT again. Absent the initial ESBT election, the beneficiary could make a QSST election upon termination of grantor trust status and later switch to ESBT status with waiting 36 months.

If the sole risk to being wholly owned is the separation or divorce of a beneficiary from the grantor, an irrevocable grantor trust that includes the grantor's spouse as a beneficiary might provide that separation or divorce terminates the spouse's interest. That provision might avoid the need for an ESBT election upon which the S corporation otherwise might have required.

III.A.3.a.iv. Why to Be Extraordinarily Sensitive to Protecting the S Election

Some people point to the generous relief the IRS provides for inadvertent terminations and decide that going to great lengths to protect the S election is not necessary.[4398]

However, a buyer might be very sensitive to the S election's validity, particularly in a stock sale that is treated as an asset purchase.[4399] Fixing any problems that the buyer's tax counsel perceives to exist (whether or not the problem actually exists) can delay a

of administration over the entire corpus of their respective trusts in a nonfiduciary capacity. Therefore, A and B will be considered the owners of their respective trusts until their deaths, the termination of the trusts, or they release their administrative power, whichever comes first.

To protect an S election against an adverse finding by the District Director, one might want the additional protection that an ESBT election provides.

4393 Reg. §§ 1.1361-1(m)(2)(v) (general approval for grantor trust to make an ESBT election), 1.1361-1(m)(8), Example (3) (Code § 678 trust may make an ESBT election).

4394 Reg. § 1.641(c)-1(c). A partial grantor trust is illustrated in Reg. §1.641(c)-1(*l*), Example (1).

4395 A trust may not make a protective ESBT election. Reg. § 1.1361-1(m)(2)(v) (the same regulation that allows grantor trusts to make ESBT election).

4396 Code § 1361(c)(2)(A)(ii). See Code § 641(c) for ESBTs' unfavorable income tax treatment.

4397 See part III.A.3.e.iv Flexible Trust Design When Holding S Corporation Stock.

4398 See part III.A.3.c.iii.(b) Flowchart Showing Relief for Late QSST & ESBT Elections and the related discussion preceding that.

4399 See part II.Q.8.e.iii.(f) Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold.

transaction, during which time other issues might arise that might cause the seller to lose a sale to a strategic buyer at a premium price. I became much more aware of this issue when a transaction worth hundreds of millions of dollars faced a possible delay due to an issue caused by prior counsel and I was asked to obtain a private letter ruling to fix it; I was able to get a private letter ruling in only six weeks from the date of submission, but until I did the client was very nervous about the six-month delay projected by those who insisted on the PLR. If I had not been able to get the PLR that quickly (which I have no assurance of being able to replicate) and that deal had cratered, I wonder what the repercussions would have been to prior counsel and then realized that any of us could be in that situation someday if there is even the slightest concern.

A solution that may satisfy the buyer (but does not cure the seller's S corporation problem) involves moving all of the corporation's assets into a single member LLC, which can be done using state law conversion/merger statutes and then selling that LLC.[4400] That solution may address other issues as well.[4401]

III.A.3.b. Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation

To qualify as S corporation shareholders for any length of time,[4402] generally[4403] an irrevocable trust must either be a grantor trust or an electing small business trust (ESBT). Planning to avoid the 3.8% tax on net investment income[4404] requires additional planning regarding participation in the business; it may be advisable to have the trustee materially participate even if the trust is a grantor trust.[4405]

If not a foreign trust,[4406] any of the trusts described below may be a shareholder. See also part III.B.2.j.ii.(e) Change in Qualification of Trust to Hold S Corporation Stock During Taxable Year, which is part of part III.B.2.j.ii Tax Allocations on the Transfer of Stock in an S Corporation.

[4400] See fns. 4293-4294 in part II.Q.8.e.iii.(f) Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold.
[4401] See part II.Q.8.e.iii.(f) Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold, especially fns. 4286-4291.
[4402] Trusts can qualify as S shareholders by electing to be taxed as an estate under Code § 645 (which election has a limited duration under Code § 645(b)(2)), by being a continuation of a grantor trust under Code § 1361(c)(2)(A)(ii), or a testamentary trust under Code § 1361(c)(2)(A)(iii) – for the latter, see part III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation, especially part III.A.3.b.iii A Trust With Respect To Stock Transferred To It Pursuant To The Terms Of A Will, But Only For The 2-Year Period Beginning On The Day On Which Such Stock Is Transferred To It.
[4403] A voting trust does not have time limits on how long it is an eligible shareholder under Code § 1361(c)(2)(A)(iv).
[4404] See part II.I 3.8% Tax on Excess Net Investment Income (NII).
[4405] See part II.J.17 Planning for Grantor and Nongrantor Trusts Holding Stock in S Corporations in Light of the 3.8% Tax.
[4406] Reg. § 1.1361-1(h)(2) precludes a foreign trust, as defined in Code § 7701(a)(31), from holding stock, even it otherwise would qualify as a shareholder.

III.A.3.b.i. A Trust All Of Which Is Treated Under The Grantor Trust Rules As Owned By An Individual Who Is A Citizen Or Resident of the United States

See part III.A.3.a Wholly Owned Grantor Trusts – How to Qualify, Risks, and Protective Measures.

III.A.3.b.ii. A Trust That Was A Grantor Trust With Respect To All Of Its Assets Immediately Before The Death Of The Deemed Owner And Which Continues In Existence After Such Death

Code § 1361(c)(2)(A)(ii). This includes a former QSST.[4407] Generally, such a trust is an eligible shareholder only for the 2-year period beginning on the day of the deemed owner's death. It does not include a trust that did not own the stock during the deemed owner's life and received the stock pursuant to the terms of a will,[4408] which is subject instead to the time period described in part III.A.3.b.iii A Trust With Respect To Stock Transferred To It Pursuant To The Terms Of A Will, But Only For The 2-Year Period Beginning On The Day On Which Such Stock Is Transferred To It. However, if the trust is subject to an election under Code § 645,[4409] then the trust is taxed as an estate and can hold the stock during the entire period during which the trust is taxable as an

---

[4407] Reg § 1.1361-1(j)(7)(ii) provides:

> If, upon the death of an income beneficiary, the trust continues in existence, continues to hold S corporation stock but no longer satisfies the QSST requirements, is not a qualified subpart E trust, and does not qualify as an ESBT, then, solely for purposes of section 1361(b)(1), as of the date of the income beneficiary's death, the estate of that income beneficiary is treated as the shareholder of the S corporation with respect to which the income beneficiary made the QSST election. The estate ordinarily will cease to be treated as the shareholder for purposes of section 1361(b)(1) upon the earlier of the transfer of that stock by the trust or the expiration of the 2-year period beginning on the day of the income beneficiary's death. During the period that the estate is treated as the shareholder for purposes of section 1361(b)(1), the trust is treated as the shareholder for purposes of sections 1366, 1367, and 1368. If, after the 2-year period, the trust continues to hold S corporation stock and does not otherwise qualify as a permitted shareholder, the corporation's S election terminates. If the termination is inadvertent, the corporation may request relief under section 1362(f).

[4408] Regs. §§ 1.1361-1(k)(1), Example 3, paragraph (i), provides:

> *2-year rule under section 1361(c)(2)(A)(ii) and (iii)*. F owns stock of Corporation P, an S corporation. In addition, F is the deemed owner of a qualified subpart E trust that holds stock in Corporation O, an S corporation. F dies on July 1, 2003. The trust continues in existence after F's death but is no longer a qualified subpart E trust. On August 1, 2003, F's shares of stock in Corporation P are transferred to the trust pursuant to the terms of F's will. Because the stock of Corporation P was not held by the trust when F died, section 1361(c)(2)(A)(ii) does not apply with respect to that stock. Under section 1361(c)(2)(A)(iii), the last day on which the trust could be treated as a permitted shareholder of Corporation P is July 31, 2005 (that is, the last day of the 2-year period that begins on the date of the transfer from the estate to the trust). With respect to the shares of stock in Corporation O held by the trust at the time of F's death, section 1361(c)(2)(A)(ii) applies and the last day on which the trust could be treated as a permitted shareholder of Corporation O is June 30, 2005 (that is, the last day of the 2-year period that begins on the date of F's death).

[4409] See part II.J.7 Election to Treat a Revocable Trust as an Estate.

estate.[4410] Whether the trust qualifies as a former grantor trust or as an estate, the grantor's estate is treated as the owner for purposes of the 100-shareholder limitation.[4411]

Note that, if the grantor's gross estate (for federal estate tax purposes) might be subject to estate tax, it is common for the trustee to hold the S stock for more than two years after the grantor's death. This is done to avoid the trustee incurring personal liability under the tax laws, because a final determination of estate tax might not be made until after the two-year period has expired. Therefore, the trustee should consider making a Code § 645 election, as described in the preceding paragraph.

Suppose S corporation stock a trust held at its deemed owner's death was transferred upon that death to two trusts created by the agreement that created the original trust. Would those trusts be treated as continuations of the original grantor trust under Code § 1361(c)(2)(A)(ii)? Letter Ruling 201709016[4412] assumed, without explanation, that the answer is "yes." Given that trust law treats the new trusts as separate trusts and legal title was transferred from the original trust, the former grantor trust does not appear to have continued its existence as to the transferred shares, so I would not rely on that assumption when planning.

Even when keeping the S corporation stock in such a trust or estate is permitted, doing so might come at an income tax cost. If the S corporation does not distribute all of its income, part or all its income might be taxed at the highest rate.[4413] One might save significant annual income taxes by distributing the S corporation stock to one or more QSSTs, each of which is taxed at its beneficiary's income tax rate (without regard to how much cash the S corporation distributes),[4414] which might be significantly lower. However, if estate tax is or might be due, consider the risks that the executor takes in distributing property before estate tax is paid in full.[4415]

For additional cash flow issues relating to a trust that was a grantor trust before the deemed owner's death, see also part III.A.3.d Special Fiduciary Income Tax Issues Regarding Bequeathing S Corporation Stock and Partnership Interests.

III.A.3.b.iii. A Trust With Respect To Stock Transferred To It Pursuant To The Terms Of A Will, But Only For The 2-Year Period Beginning On The Day On Which Such Stock Is Transferred To It

Code § 1361(c)(2)(A)(iii). In such a case, the testator's estate is treated as an owner for purposes of the 100-shareholder limitation.[4416] Because a revocable trust that has made

---

4410 Regs. §§ 1.1361-1(k)(1), Example 3, paragraph (ii) and 1.645-1(e)(2)(i); Letter Ruling 200529006.
4411 Code § 1361(c)(2)(B)(ii).
4412 In Letter Ruling 201709016, the two successor trusts qualified as QSSTs, but no QSST election was made within two years after the original deemed owner's death. The ruling allowed late QSST elections to be made, retroactive to two years after the original deemed owner's death.
4413 See parts III.A.4 Trust Accounting Income Regarding Business Interests and III.D.2 Trust Accounting and Taxation.
4414 See part III.A.3.e.i.(a) QSSTs Generally.
4415 See generally III.B.3.c.iv Federal Estate Tax Liens.
4416 Code § 1361(c)(2)(B)(iii).

a Code § 645 election is treated as an estate, any transfer from that estate by reason of termination of the election or by bequest under that revocable trust is treated as transferred pursuant to the terms of a will.[4417]

III.A.3.b.iv. A Trust Created Primarily To Exercise The Voting Power Of Stock Transferred To It

Code § 1361(c)(2)(A)(iv). In such a case, each beneficiary of the voting trust is treated as the owner for purposes of the 100-shareholder limitation.[4418]

To qualify as a voting trust, the beneficial owners must be treated as the owners of their respective portions of the trust under the grantor trust rules, and the trust must have been created pursuant to a written trust agreement entered into by the shareholders, that:[4419]

(A) Delegates to one or more trustees the right to vote;

(B) Requires all distributions with respect to the stock of the corporation held by the trust to be paid to, or on behalf of, the beneficial owners of that stock;

(C) Requires title and possession of that stock to be delivered to those beneficial owners upon termination of the trust; and

(D) Terminates, under its terms or by state law, on or before a specific date or event.[4420]

Let's explore the requirement that the beneficial owners be treated as the owners of their respective portions of the trust under the grantor trust rules.[4421] This is automatic for the settlors of the trust,[4422] but not automatic when the settlors transfer their beneficial interests (voting trust certificates) to others. One treatise suggests making the beneficiaries entitled to distributions, but that might not satisfy the requirement that the trust agreement require payment of distributions to the beneficiaries; therefore, one might consider giving the beneficiaries the right to withdraw any distributions the trust receives from the S corporation, followed by a requirement that the trustee pay to the beneficiaries any such distributions.[4423] It has also been suggested that the voting trust

---

[4417] Reg. § 1.1361-1(h)(1)(iv)(B).
[4418] Code § 1361(c)(2)(B)(iv).
[4419] Reg. § 1.1361-1(h)(1)(v).
[4420] I am not aware of any authoritative interpretation of on or before a specific date or event. Presumably the trust might provide that the trust terminates when it holds no voting stock or perhaps when each individual in a named list of people has died.
[4421] Reg. § 1.1361-1(h)(1)(v)(C). If the beneficiary originally transferred the stock to the trust, then it is a grantor trust under Code § 677. Otherwise, the trust needs to qualify as an investment trust; see part II.D.4.a Investment Trusts, which also describes the income tax consequences when a voting trust that is an investment trust sells stock. This regulation was adopted by TD 8600 (7/20/1995). For the IRS' interpretation before then, see Letter Ruling 9344020.
[4422] Code § 677(a) combined with Reg. § 1.1361-1(h)(1)(v)(B).
[4423] When the beneficiary has the right to withdraw such distributions, Code § 678(a)(1) would treat the beneficiary as the owner. After that withdrawal right has lapsed, the IRS' Letter Ruling position would support a position that Code §§ 678(a)(2) and 677(a) would treat the beneficiary as the owner.

might qualify as an investment trust, in which case a transferee would be treated as a grantor and therefore the trust would automatically qualify.[4424]

III.A.3.b.v. An Electing Small Business Trust

Code § 1361(c)(2)(A)(v). In such a case, each potential current beneficiary of the trust is treated as the owner for purposes of the 100-shareholder limitation.[4425] The 100-shareholder limitation is made less severe by a family attribution rule, treating a person, his or her spouse, and his or her descendants as one shareholder.[4426] A charitable

---

[4424] See part II.D.4.a Investment Trust. Letter Ruling 201226019 approved this approach, holding:

1. During the lives of A and B and after their deaths, Voting Trust will be classified as an investment trust under § 301.7701-4(c) for U.S. federal income tax purposes.
2. During the lives of A and B (assuming they are the only holders of the Certificates during their lives), Voting Trust will be considered a qualified voting trust under § 1361(c)(2)(A)(iv) and § 1.1361-1(h)(1)(v). Accordingly, Voting Trust will be a permitted S corporation shareholder. If, during their lives, A or B transfer all or a portion of their Certificates to a transferee that is a permitted S corporation shareholder, the transferee will be treated as a successor grantor of the Voting Trust. Therefore,
   (i) Voting Trust will continue to be a voting trust described in § 1361(c)(2)(A)(iv) and a permitted S corporation shareholder, and
   (ii) the Certificate holders will include in their gross income and report their proportionate share of the S corporation income that is allocated to the Company shares held by the Voting Trust.
3. After the death of A or B, when the executor of their respective Wills (the Executor) holds the Certificates held by A or B, as applicable, prior to their deaths, A's and B's respective estates (if the period during which such estates hold the Certificates does not exceed the period actually required to fully administer the estates as described in § 1.641(b)-3(a)) will be treated as successor grantors of the Voting Trust. After the Executor distributes the Certificates held by A or B in accordance with the terms and provisions of their estate planning documents, as applicable, such transferees of the Certificates will be treated as successor grantors of their portions of the Voting Trust. Therefore,
   (i) Trust will continue to be a voting trust described in § 1361(c)(2)(A)(iv) and a permitted S corporation shareholder, and
   (ii) the Certificate holders will include in their gross income and report their proportionate share of the S corporation income that is allocated to the Company shares held by the Voting Trust.

[4425] Code § 1361(c)(2)(B)(v) applied in Reg. § 1.1361-1(m)(4)(vii). The 2017 tax reform act amended Code § 1361(c)(2)(B)(v) to make it not apply for purposes of Code § 1361(b)(1)(C), the latter which does not allow an S corporation to "have a nonresident alien as a shareholder." Thus, an ESBT may have a nonresident alien as a beneficiary, which makes sense because the trust is paying tax at the highest possible rate, notwithstanding having such a beneficiary.

[4426] Code § 1361(c)(1). see 2004 Blue Book (General Explanation of Tax Legislation Enacted in the 108th Congress), p. 189, footnote 321. Reg. § 1.1361-1(e)(3)(i) interprets the family attribution rule:

> *In general*. For purposes of paragraph (e)(1) of this section, stock owned by members of a family is treated as owned by one shareholder. Members of a family include a common ancestor, any lineal descendant of the common ancestor (without any generational limit), and any spouse (or former spouse) of the common ancestor or of any lineal descendants of the common ancestor. An individual shall not be considered to be a common ancestor if, on the applicable date, the individual is more than six generations removed from the

remainder trust cannot own stock in an S corporation, so an ESBT election would not help it; instead, consider donating the stock to a charity in exchange for a charitable gift annuity, after considering unrelated business taxable income issues.[4427]

III.A.3.b.vi. Retirement Plans

Retirement plans are trusts, so let's discuss those for a moment. First, IRAs are qualified under Code § 408, not § 401(a). Therefore, IRAs are not eligible shareholders, as they are not trusts that qualify under these rules.[4428] Second, qualified retirement plans are eligible shareholders[4429] but are taxed on unrelated business taxable income,[4430] including ***all*** income from S corporations, whether or not it normally constitutes unrelated business income.[4431] However, employee stock ownership plans (ESOPs) are not subject to this tax.[4432] Furthermore, transitory ownership by an IRA of S corporation stock rolled over from an IRA will not terminate the S election.[4433]

---

youngest generation of shareholders who would be members of the family determined by deeming that individual as the common ancestor. For purposes of this six-generation test, a spouse (or former spouse) is treated as being of the same generation as the individual to whom the spouse is or was married. This test is applied on the latest of the date the election under section 1362(a) is made for the corporation, the earliest date that a member of the family (determined by deeming that individual as the common ancestor) holds stock in the corporation, or October 22, 2004. For this purpose, the date the election under section 1362(a) is made for the corporation is the effective date of the election, not the date it is signed or received by any person. The test is only applied as of the applicable date, and lineal descendants (and spouses) more than six generations removed from the common ancestor will be treated as members of the family even if they acquire stock in the corporation after that date. The members of a family are treated as one shareholder under this paragraph (e)(3) solely for purposes of section 1361(b)(1)(A), and not for any other purpose, whether under section 1361 or any other provision. Specifically, each member of the family who owns or is deemed to own stock must meet the requirements of sections 1361(b)(1)(B) and (C) (regarding permissible shareholders) and section 1362(a)(2) (regarding shareholder consents to an S corporation election). Although a person may be a member of more than one family under this paragraph (e)(3), each family (not all of whose members are also members of the other family) will be treated as one shareholder. For purposes of this paragraph (e)(3), any legally adopted child of an individual, any child who is lawfully placed with an individual for legal adoption by that individual, and any eligible foster child of an individual (within the meaning of section 152(f)(1)(C)), shall be treated as a child of such individual by blood.

4427 See part II.Q.7.c S Corporations Owned by a Trust Benefitting Charity.

4428 Reg. § 1.1361-1(h)(1)(vii), which became final on August 13, 2008, provides that individual retirement accounts (including Roth IRAs) are not eligible S corporation shareholders, unless they satisfy the exception created in Code § 1361(c)(2)(A)(vi) for bank stock that was held by the IRA as of October 22, 2004. That regulation is extremely unlikely to be challenged as, for various reasons, a reviewed opinion of the Tax Court concluded that IRAs, including Roth IRAs, were not eligible shareholders before that regulation was promulgated. *Taproot Administrative Services, Inc. v. Commissioner*, 133 T.C. 202.

4429 Code § 1361(c)(6)(A), referring to organizations described in Code § 401(a).

4430 Code § 511(a)(1), 501(a).

4431 Code § 512(e)(1).

4432 Code § 512(e)(3).

4433 Rev. Proc. 20014, Section 4 provides:

III.A.3.b.vii. Charitable Trusts

Charities are permitted shareholders.[4434] The S corporation's business activities are not attributable to the charity in determining the nature of the charity's activities, which means that a lot of S corporation business income does not destroy the charity's otherwise exempt status.[4435]

III.A.3.b.viii. Observations About Trusts As S Corporation Shareholders

The shareholder agreement does not need to specify these trusts, as the reference to causing the corporation not to be a "small business corporation" as defined in Code § 1361(b)(1) should be sufficient to limit which kinds of trusts may be owners without going into all the detail described above. However, when preparing shareholders' estate plans, make sure the beneficiaries of the estate plans qualify.

III.A.3.c. Deadlines for Trust Qualifying as S Corporation Shareholder

Below are some flowcharts illustrating trust qualification as a shareholder of an S corporation. The flowcharts do not consider trusts that are tax-exempt.

The Service will accept the position that an S corporation's election is not affected as a result of an ESOP's distribution of S corporation stock where the participant directs that such stock be distributed to an IRA in a direct rollover, provided that:

.01. The terms of the ESOP require that the S corporation repurchase the stock immediately upon the ESOP's distribution of the stock to an IRA;

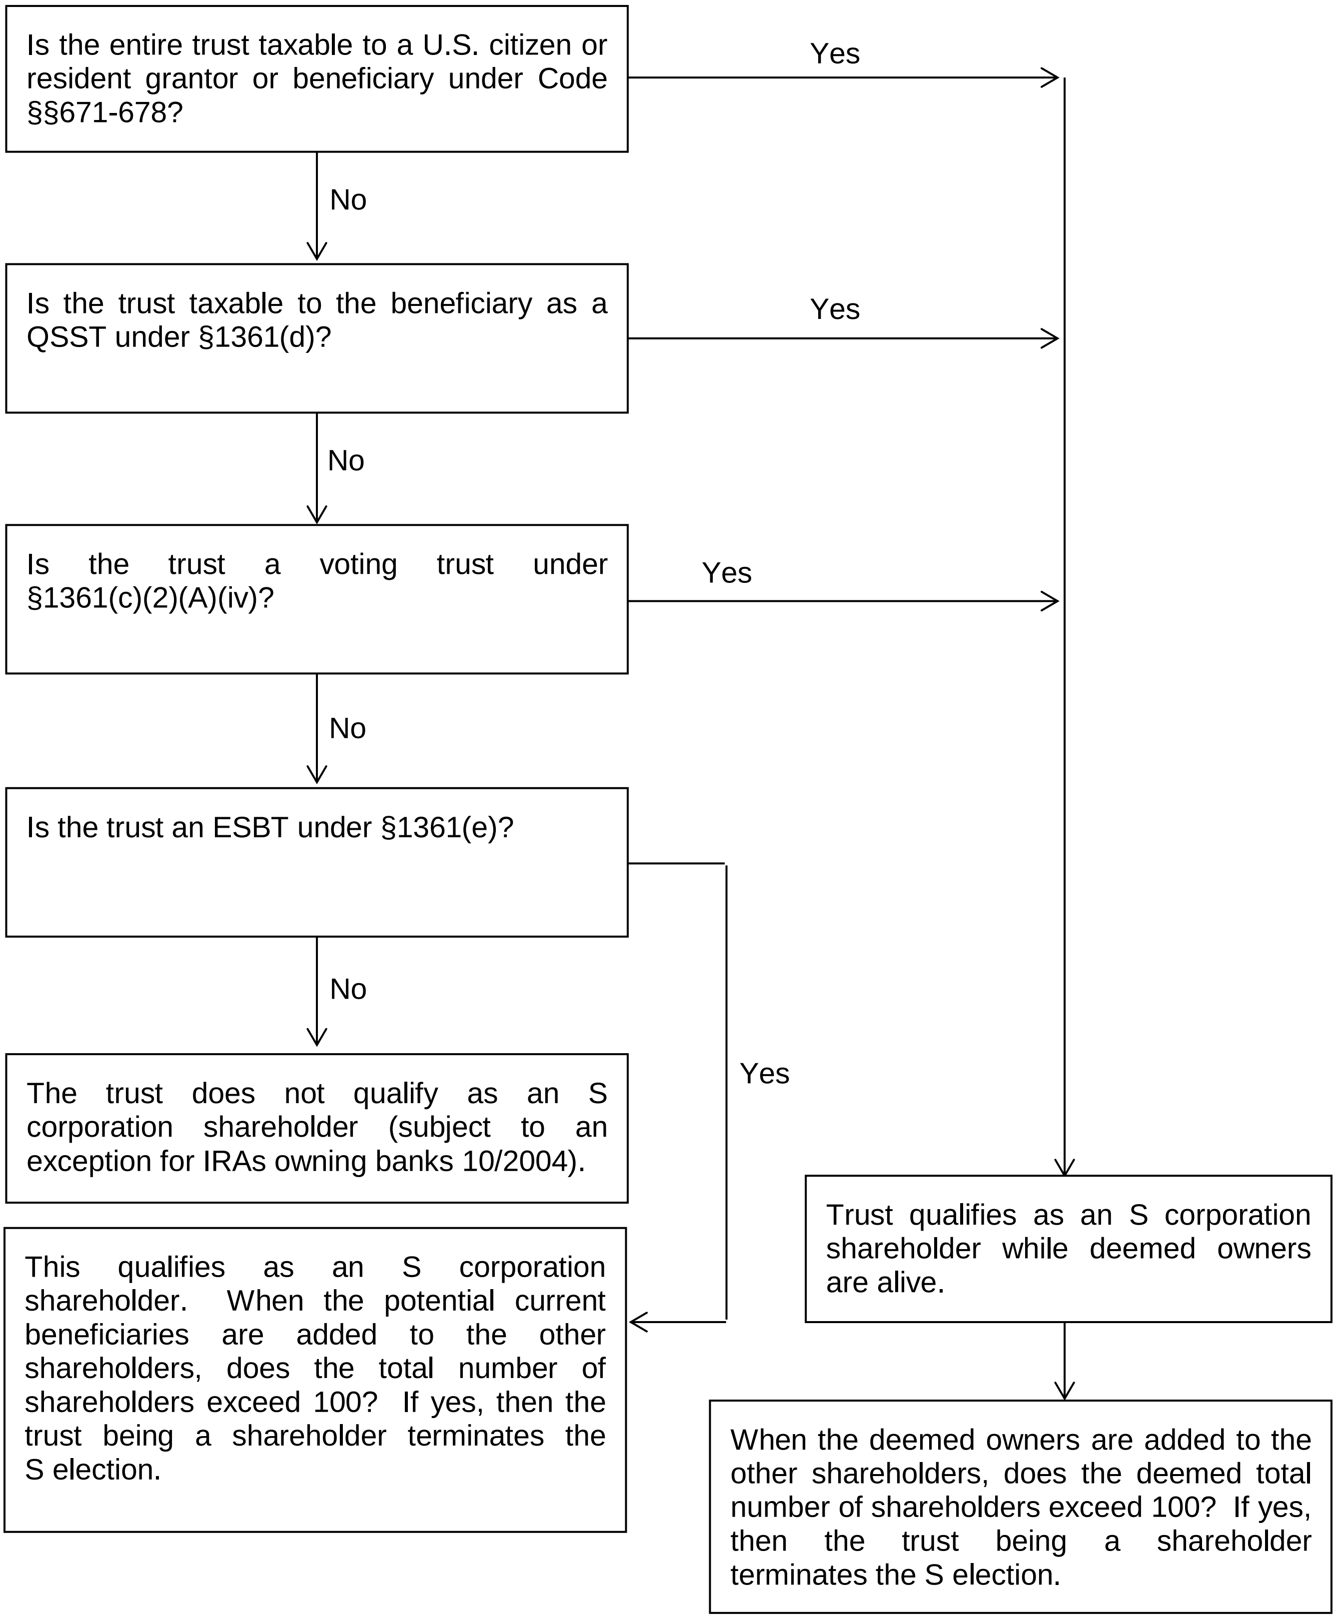
.02. Either, pursuant to the terms of the ESOP, the S corporation actually repurchases the S corporation stock contemporaneously with, and effective on the same day as, the distribution, or, pursuant to the terms of the ESOP, the ESOP is permitted to assume the rights and obligations of the S corporation to repurchase the S corporation stock immediately upon the ESOP's distribution of the stock to an IRA and the ESOP actually repurchases the S corporation stock contemporaneously with, and effective on the same day as, the distribution; and

.03. No income (including tax-exempt income), loss, deduction, or credit attributable to the distributed S corporation stock under § 1366 is allocated to the participant's IRA.

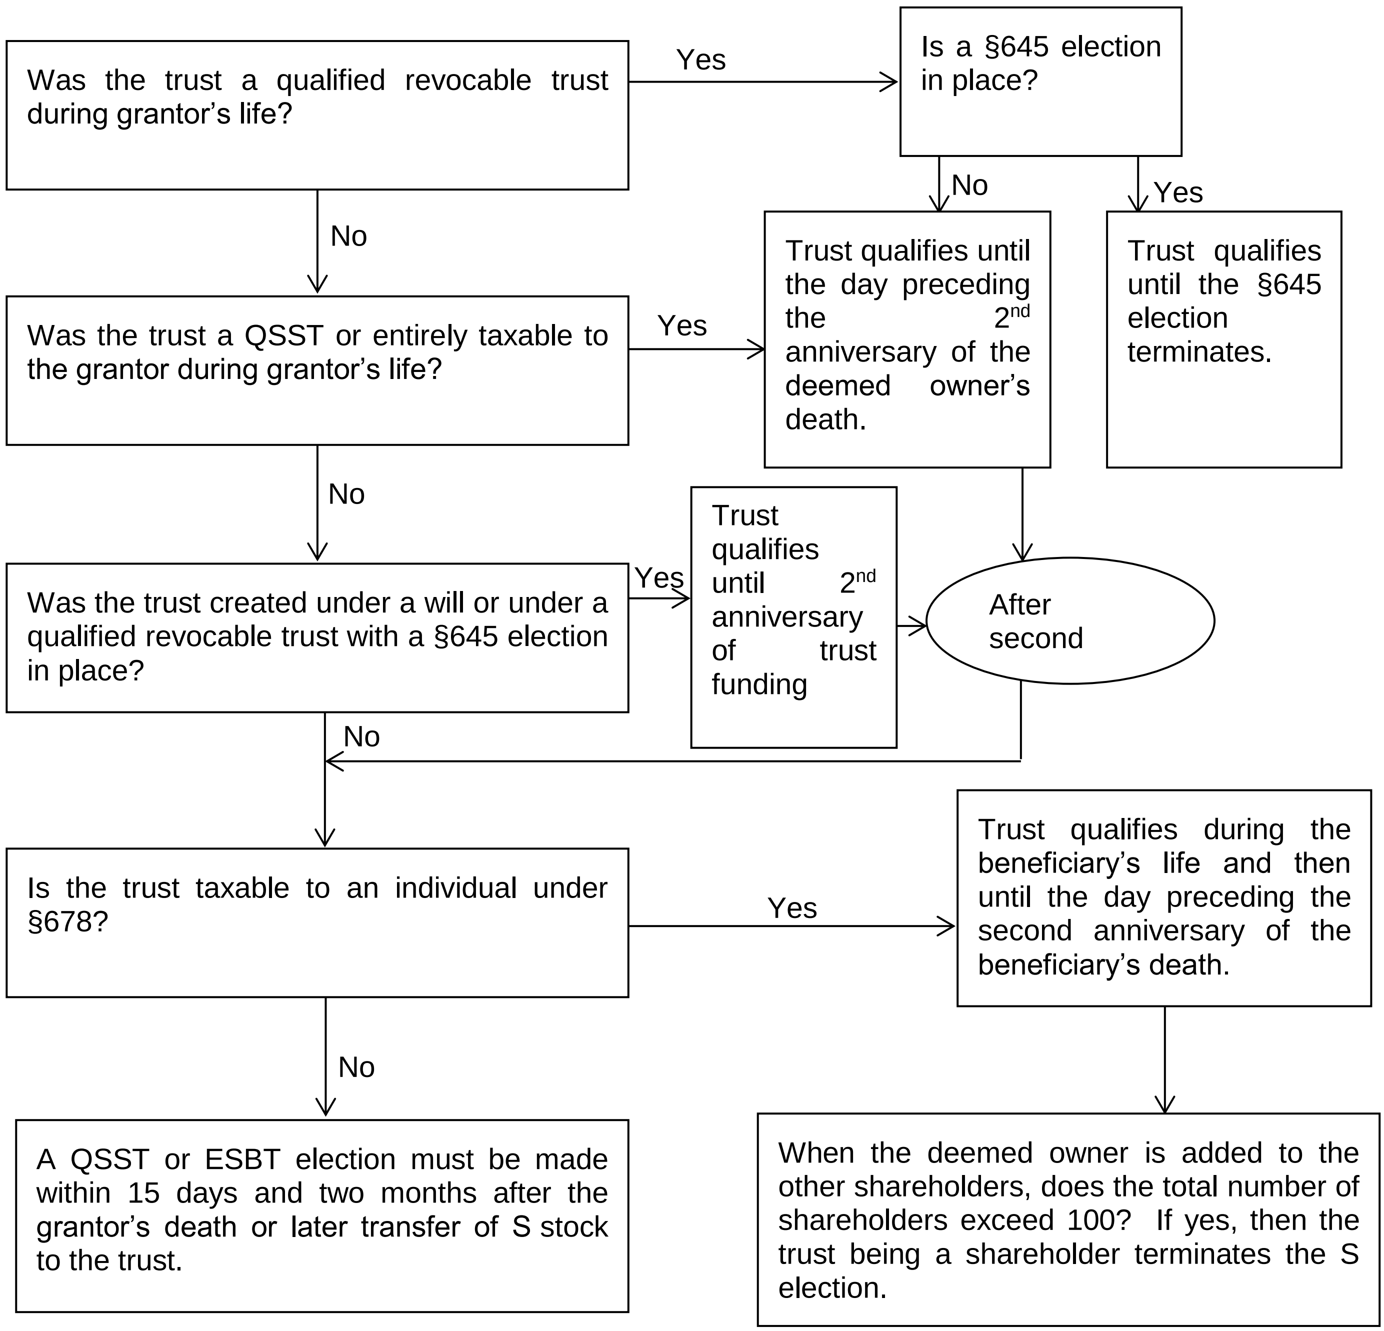
[4434] Code § 1361(c)(6) provides that an organization, which not only is described in Code § 401(a) or 501(c)(3) but also is exempt from taxation under Code § 501(a), may be a shareholder in an S corporation.

[4435] Letter Ruling 201441018.

III.A.3.c.i. Flowchart of Inter Vivos Trusts (Trusts Created while Grantor is Alive)



III.A.3.c.ii. Flowchart of Testamentary Trusts (Trusts Created on Grantor's Death or Continued after QSST Beneficiary's Death)



III.A.3.c.iii. Deadlines for QSST and ESBT Elections

III.A.3.c.iii.(a). General Description of Deadlines for QSST and ESBT Elections

A separate QSST election must be made with respect to each S corporation in which the trust owns stock.[4436] Although initially an ESBT election needs to be filed at every IRS Service Center that receives the returns of the S corporations the trust owns, no future ESBT elections are required when the trust acquires stock in another S Corporation.[4437]

The beneficiary must make a QSST election no later than fifteen days and two months after the trust received the stock.[4438] The trustee of an ESBT must file the ESBT election within the same time framework.[4439] If the trust is a wholly owned grantor trust or meets some other exception allowing it to be an eligible shareholder,[4440] the deadline would be based on whenever the election's effective date is required or desired. If the trust is already an eligible shareholder and the QSST or ESBT election is made with an effective date that is later than when the trust first acquired the stock, when drafting the QSST or ESBT election I generally include the fact of that qualification when I say when the trust first acquired the stock, so that any IRS reviewer of the election will see that there does not appear to be any time gap in the trust's eligibility as a shareholder.

If an ESBT or QSST election is made late or is in some manner defective, the S corporation status can be retroactively reinstated if the termination or invalidity was inadvertent, within a reasonable period of time after discovery of the terminating event or invalid election steps were taken to rectify the situation, and the corporation and shareholders agree to adjustments that the IRS may require for the period;[4441] retroactive reinstatement is required to prevent the accumulated adjustments account (AAA) from being wiped out.[4442] The corporation and all persons who were shareholders of the corporation at any time during the period must consent to make to any adjustments that the IRS may require.[4443] Each consent should be in the form of a statement agreeing to make the adjustments:[4444]

4436 Reg. § 1.1361-1(j)(6)(i).

4437 Reg § 1.1361-1(m)(2)(i).

4438 Reg. § 1.1361-1(j)(6)(ii)(C). A QSST election by a person who is under a legal disability by reason of age may be made on that person's behalf by that person's guardian or other legal representative, or if there be none, by that person's natural or adoptive parent. Reg. § 1.1361-1(j)(6)(i).

4439 Reg. § 1.1361-1(m)(3)(i) provides that trust is an ESBT on the effective date of the ESBT election.

4440 See part III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation.

4441 Reg. § 1.1362-4(a).

4442 For AAA's importance, see part II.Q.7.b Redemptions or Distributions Involving S Corporations. For the idea that termination of the S election wipes out AAA, see part II.P.3.c.v Conversion from S Corporation to C Corporation then Back to S Corporation.

4443 Reg. § 1.1362-4(e). However, if relief under Rev. Proc. 2013-30 applies, Section 6.01(4) of that procedure requires:

> Statements from all shareholders during the period between the date the S corporation election was to have become effective or was terminated and the date the completed Election Form is filed that they have reported their income on all affected returns

- The statement must be signed by the shareholder and corporation.
- A shareholder's consent statement should include the name, address, and taxpayer identification numbers of the corporation and shareholder, the number of shares of stock owned by the shareholder, and the dates on which the shareholder owned any stock.
- The corporate consent statement should include the name, address, and taxpayer identification numbers of the corporation and each shareholder.

A late ESBT or QSST election may be made within 3 years and 75 days after the effective date of the election, without the $28,300 fee generally required for letter rulings under Code § 9100, illustrated by the following chart provided by the IRS:[4445]

---

consistent with the S corporation election for the year the election should have been made and for all subsequent years.

Presumably, these statements are in lieu of consenting to adjustments. One might consider supplementing the statements by agreeing to make adjustments as required by Reg. § 1.1362-4(e), but supplementing the statements does not appear to be required. III.A.3.d. Special Fiduciary Income Tax Issues Regarding Bequeathing S Corporation Stock and Partnership Interests

III.A.3.d.i. Various Fiduciary Income Tax Issues Regarding Bequeathing S Corporation Stock and Partnership Interests

If one bequeaths S corporation stock, consider expressly providing that any distributions with respect to that stock are to be passed on to the beneficiary receiving that stock. Not only does such a provision ensure fairness if the trust/estate administration lasts any significant amount of time, it also prevents a potentially unfair tax result from occurring, as described below.

A bequest of a partnership interest or S corporation stock that is "ascertainable under the terms of a testator's will as of the date of his death, or under the terms of an inter vivos trust instrument as of the date of the inception of the trust" is a specific bequest that does not count as a distribution that carries with it distributable net income;[4446] the "date of the inception" rule means that the exercise of an inter vivos limited power of appointment does not fall within this exception. On the other hand, income allocated to a beneficiary *does* count a distribution that carries with it distributable net income.[4447] The bequest of the partnership interest or S corporation stock does not constitute a separate share, but distributions bequeathed to the recipient of that business interest *do* constitute a separate share.[4448]

See parts III.B.2.j.ii Tax Allocations on the Transfer of Stock in an S Corporation (especially part III.B.2.j.ii.(e) Change in Qualification of Trust to Hold S Corporation Stock During Taxable Year) and III.B.2.j.iii Tax Allocations upon Change of Interest in a Partnership.

The distributive share of partnership or S corporation income that does not constitute trust accounting income:[4449]

> is allocated among the separate shares that could potentially be funded with these amounts irrespective of whether the share is entitled to receive any income under the terms of the governing instrument or applicable local law. The amount of such gross income allocated to each share is based on the relative value of each share that could potentially be funded with such amounts.

4446 Reg. § 1.663(a)-1(b)(1), delineating items that qualify for the exclusion under Reg. § 1.663(a)-1(a). See Reg. § 1.663(a)-1(b)(3), Example (1).

4447 Reg. § 1.663(a)-1(b)(2)(i), defining items that do not qualify for the exclusion under Reg. § 1.663(a)-1(a).

4448 Reg. § 1.663(c)-5, Example (8). Reg. § 1.663(c)-4(a) provides:

> Separate shares include… the income on bequeathed property if the recipient of the specific bequest is entitled to such income …. Conversely, a gift or bequest … of property as defined in section 663(a)(1) is not a separate share.

4449 Reg. § 1.663(c)-2(b)(4), which applies to:

> the allocation of the portion of gross income includible in distributable net income that is not attributable to cash received by the estate or trust (for example, original issue discount, a distributive share of partnership tax items, and the pro rata share of an S corporation's tax items).

Tying together the separate share rules[4450] with the above rules regarding distributive shares of partnership or S corporation income, one can distill the following rules:[4451]

- DNI equal to undistributed income is allocated among the separate shares according to the amount of income to which each share is entitled.
- DNI equal to distributions from an S corporation or partnership constituting trust accounting income is allocated among the separate shares according to the amount

[4450] See generally part II.J.9.a Separate Share Rule.

[4451] Reg. § 1.663(c)-5, Examples (4) and (5) provide:

Example 4. (i) *Facts*. Testator, who dies in 2000, is survived by a spouse and one child. Testator's will provides for a pecuniary formula bequest to be paid in not more than three installments to a trust for the benefit of the child of the largest amount that can pass free of Federal estate tax and a bequest of the residuary to the surviving spouse. The will provides that the bequest to the child's trust is not entitled to any of the estate's income and does not participate in appreciation or depreciation in estate assets. During the 2000 taxable year, the estate receives dividend income of $200,000 and pays expenses of $15,000 that are deductible on the estate's federal income tax return. The executor partially funds the child's trust by distributing to it securities that have an adjusted basis to the estate of $350,000 and a fair market value of $380,000 on the date of distribution. As a result of this distribution, the estate realizes long-term capital gain of $30,000.

(ii) *Conclusion*. The estate has two separate shares consisting of a formula pecuniary bequest to the child's trust and a residuary bequest to the surviving spouse. Because, under the terms of the will, no estate income is allocated to the bequest to the child's trust, the distributable net income for that trust's share is zero. Therefore, with respect to the $380,000 distribution to the child's trust, the estate is allowed no deduction under section 661, and no amount is included in the trust's gross income under section 662. Because no distributions were made to the spouse, there is no need to compute the distributable net income allocable to the marital share. The taxable income of the estate for the 2000 taxable year is $214,400 ($200,000 (dividend income) plus $30,000 (capital gain) minus $15,000 (expenses) and minus $600 (personal exemption)).

Example 5. The facts are the same as in Example 4, except that during 2000 the estate reports on its federal income tax return a pro rata share of an S corporation's tax items and a distributive share of a partnership's tax items allocated on Form K-1s to the estate by the S corporation and by the partnership, respectively. Because, under the terms of the will, no estate income from the S corporation or the partnership would be allocated to the pecuniary bequest to child's trust, none of the tax items attributable to the S corporation stock or the partnership interest is allocated to the trust's separate share. Therefore, with respect to the $380,000 distribution to the trust, the estate is allowed no deduction under section 661, and no amount is included in the trust's gross income under section 662.

Example 6. The facts are the same as in Example 4, except that during 2000 the estate receives a distribution of $900,000 from the decedent's individual retirement account that is included in the estate's gross income as income in respect of a decedent under section 691(a). The entire $900,000 is allocated to corpus under applicable local law. Both the separate share for the child's trust and the separate share for the surviving spouse may potentially be funded with the proceeds from the individual retirement account. Therefore, a portion of the $900,000 gross income must be allocated to the trust's separate share. The amount allocated to the trust's share must be based upon the relative values of the two separate shares using a reasonable and equitable method. The estate is entitled to a deduction under section 661 for the portion of the $900,000 properly allocated to the trust's separate share, and the trust must include this amount in income under section 662.

of income to which each share is entitled.[4452] DNI equal to distributions from an S corporation or partnership not constituting trust accounting income would be allocated to each share according to "its portion of gross income that is includible in distributable net income and its portion of any applicable deductions or losses."[4453] Note that distributions from an S corporation or partnership that do not constitute trust accounting income but constitute gross income would constitute DNI only if they are (a) not from the sale of a capital asset,[4454] or (b) from the sale of a capital asset but satisfy the rules for including capital gain in DNI.[4455]

- Note that the amounts deducted by the trust or estate and included in the beneficiary's income are the lesser of the beneficiary's allocable share of DNI and the amount actually distributed.[4456] If and to the extent that the trust or estate does not make distributions (or is not required to make) to the beneficiary attributable to DNI, the distributive shares of partnership or S corporation income are trapped inside the trust or estate to the extent not distributed (or required to be made). Thus, the estate or trust is taxed on that income, even though the recipient of the specific bequest ultimately benefits from the undistributed income.

However, practical logistics might suggest not allocating distributions to the recipient of the specific bequest. It is not unusual for tax distributions to be made after yearend. For example, A dies January 31, 2016. The partnership or S corporation makes distributions April 1, 2016 to the owners to pay taxes incurred with respect to 2015 income. A's estate or revocable trust will need that cash to pay its 2015 tax that is due April 15, 2016. Therefore, if A's estate plan bequeathed the partnership or S corporation to B, B should be allocated all of the distributions with respect to the partnership or S corporation, other than distributions relating to 2015 tax and other than distributions relating to tax on income earned between January 1, 2016 and January 31, 2016. Furthermore, these distributions might also draw an allocation of DNI. Thus, consider a clause along these lines (after further thought if the specific bequest is to a QTIP trust):[4457]

> If any partnership interest or stock in any S corporation is specifically allocated to one or more persons, the person(s) entitled to the allocation shall also be entitled to any distributions from the date of the allocation until the date the partnership interest or stock is distributed; however, any distributions that were intended for the payment of tax imposed on taxable items with respect to periods before the

---

[4452] Reg. § 1.663(c)-2(b)(2) provides that:

> gross income includible in distributable net income that is income within the meaning of section 643(b) … is allocated among the separate shares in accordance with the amount of income that each share is entitled to under the terms of the governing instrument or applicable local law.

For income under Code § 643(b), see part II.J.8.c.i Capital Gain Allocated to Income Under State Law; although focused on capital gain, it discusses Code § 643(b) generally as well.

[4453] Reg. § 1.663(c)-2(b)(1).

[4454] See part II.J.8.a Capital Gain Constitutes DNI Unless Excluded.

[4455] See part II.J.8.c.ii Capital Gain Allocated to Corpus but Treated Consistently as Part of a Distribution to a Beneficiary.

[4456] See part II.J.9.a Separate Share Rule, especially the text accompanying fns. 1949-1951.

[4457] If the specific bequest is to a QTIP trust and income otherwise payable to the QTIP trust is diverted, query whether that violates the requirement that QTIP exclusively benefit the surviving spouse.

event that caused that allocation shall be paid to the person reporting those items.

Also note that state corporate law might not permit distributions using record dates (determining who is the shareholder of record) more than a certain number of days before the distribution. For example, Missouri law does not allow a corporation to make a distribution with a record date more than 70 days before the date of distribution.[4458] If these statutes apply, one might consider declaring a distribution in the form of a promissory note, the principal of which is any taxes, interest, and penalties imposed on the shareholders by reason of any examination of any prior year returns. This method might also be needed for taxes during the current year, depending on whether the tax laws allow the corporation to close its books as of the date of death. One might also consider converting the corporation into an LLC taxed as an S corporation using a tax-free reorganization,[4459] because LLC laws might not impose such a requirement.

III.A.3.d.ii. Special Fiduciary Income Tax Issues Regarding Bequeathing S Corporation Stock to or from QSSTs

If the terminating trust is a QSST,[4460] coordinate these concerns with those found in part III.A.3.e.i.(b) QSST Issues When Beneficiary Dies, which also includes a reference to marital deduction issues relating to the payment of income.[4461]

If the trust terminates in favor of one or more QSSTs, consider whether, during post-mortem administration, part or all of the income might be trapped inside the trust at high income tax rates if the S corporation does not distribute all of the income shown on the K-1 that the corporation issues the trust.[4462] A similar issue arises for partnerships, which may be placed into one or more S corporations using a QSST strategy. Quickly funding the QSST(s) may tax the income at the beneficiary's rate instead of the trust's rate; see part III.A.4.a General Strategies Regarding Fiduciary Income Taxation of Business Interests.

III.A.3.e. QSSTs and ESBTs

III.A.3.e.i. QSSTs

After reviewing a variety of QSST issues that apply during the beneficiary's life, see part III.A.3.e.i.(b) QSST Issues When Beneficiary Dies, for a discussion of various issues one should consider when a beneficiary makes a QSST election.

III.A.3.e.i.(a). QSSTs Generally

After determining a trust's eligibility for its beneficiary to make a "qualified subchapter S trust" (QSST) election, see part III.A.3.c.iii Deadlines for QSST and ESBT Elections.

[4458] R.S.Mo. § 351.250.

[4459] See part II.P.3.i Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization.

[4460] See part III.A.3.e.i QSSTs.

[4461] See fn. 4492.

[4462] See part III.A.4 Trust Accounting Income Regarding Business Interests, as well as parts II.J.11 Trust Business Income Tax Nuances and III.A.3.e QSSTs and ESBTs.

A QSST may have only one beneficiary[4463] (who also must be a U.S. citizen or resident) who may receive income or corpus during the beneficiary's lifetime, and all of its income[4464] must be distributed currently to that beneficiary[4465] while the trust[4466] holds

---

[4463] Code § 1361(d)(3)(A) and Reg. § 1.1361-1(j)(1)(ii), (iii). A trust cannot qualify as a QSST if it provides that, if the trust does not hold shares of an S corporation, the trust may terminate during the life of the current income beneficiary and distribute its corpus to persons other than the current income beneficiary. Rev. Rul. 89-55. Consistent with this limitation, Reg. § 1.1361-1(j)(2)(iii) restricts powers of appointment:

> If, under the terms of the trust, a person (including the income beneficiary) has a special power to appoint, during the life of the income beneficiary, trust income or corpus to any person other than the current income beneficiary, the trust will not qualify as a QSST. However, if the power of appointment results in the grantor being treated as the owner of the entire trust under the rules of subpart E, the trust may be a permitted shareholder under section 1361(c)(2)(A)(i) and paragraph (h)(1)(i) of this section.

Note, however, that failure to make a trust a spendthrift trust (and therefore allowing the beneficiary's interest to be assignable) will not disqualify the trust as a QSST unless it gets assigned (and then it might or might not disqualify the trust). Reg. § 1.1361-1(j)(2)(iv). On the other hand, Letter Ruling 9437021 viewed the possibility of distribution from the QSST to another trust for that same beneficiary as an error, but ruled that it was harmless error in that case because the recipient trust never existed and therefore could never receive a distribution (see also fn. 4465 regarding the distribution of income other than directly to the beneficiary); however, one might not want to assume that the IRS' national office will repeat this kind and gentle approach. Thus, one may need to avoid authorizing the merger or decanting of any trust that has a QSST election in place. For decanting, see fn. 1817, found in part II.J.4.i Modifying Trust to Make More Income Tax Efficient. However, the Uniform Trust Decanting Act allows decanting to be done by trust amendment rather than actual transfer of assets, in which case a QSST need not prevent decanting; for details on decanting by mere amendment, see fn. 1818, found in part II.J.4.i Modifying Trust to Make More Income Tax Efficient.

Also, the grantor trust treating a person other than the current income beneficiary as the owner of a part or all of that portion of a trust which does not consist of the S corporation stock does not disqualify the trust from making a QSST election. Reg. § 1.1361-1(j)(2)(vi). Does that, by negative implication, suggest that the settlor (who is not the beneficiary) being treated as deemed owner of the portion of a trust that includes the S corporation stock precludes a QSST election? Reg. § 1.1361-1(j)(4) suggests that prohibition exists; Reg. § 1.1361-1(k)(1), Example (10), paragraph (iii) (reproduced in fn. 4470) confirms that result.

[4464] All of the trust's income, not just the income from the S stock, must be distributed or distributable currently. Letter Ruling 9603007. This refers to trust accounting income, not taxable income. Reg. § 1.1361-1(j)(1)(i). Letter Ruling 200446007 held that the amount of a deemed dividend under Code § 1361(d)(3)(B) was not required to be distributed. Letter Ruling 200451021 clarifies that, when Code § 302(d) taxes a partial liquidation as a distribution rather than as a redemption, the trust itself is not taxed on any income on the distribution if the trust has sufficient AAA to absorb the basis reduction (Ruling Request 1) and the proceeds from the sale of stock in partial liquidation are principal that the QSST does not need to distribute (Ruling Request 2).

[4465] Code § 1361(d)(3). Letter Ruling 9014008 ruled that a distribution to a grantor trust created by the beneficiary would not qualify, but Letter Rulings 9442036, 9444022, 9444024, and 9444059 permitted distributions to a disability trust because the beneficiary did not have legal capacity. This requirement does not preclude secured sales in which all income is used to buy the stock (part III.A.3.e.vi.(c) Required Structure for a Sale to a QSST (Including Possible Pitfalls)), nor does it prevent the trust from agreeing to make payments to a third party if stock the trust bought is resold within a certain number of years after the trust's purchase (Letter Ruling 200140040).

[4466] In Letter Ruling 200404037, the IRS accepted the representation that applicable state law deemed a life estate in the shares of stock to give rise to a trust relationship between the life

S stock.[4467] The income distribution rule is that all income either actually is distributed each year or is required to be distributed each year;[4468] inadvertent termination relief may be available if the income is not distributed and catch-up distributions are made.[4469] Special rules apply to an inter vivos QTIP or another trust for a spouse.[4470]

---

tenant and the remaindermen and that the deemed trust satisfies the requirements for treatment as a QSST. Letter Ruling 200247030 elaborated on the basis for this deemed trust treatment:

> It is represented that under State law, a life tenant, with the power to sell or dispose of property devised to him or her for life with remainder to designated persons, is a trustee or quasi trustee and occupies a fiduciary relationship to the remaindermen. In the exercise of that power, the life tenant owes to the remaindermen the highest duty to act honorably and in good faith. A life tenant is a trustee in the sense that he cannot injure or dispose of property to the injury of the rights of the remaindermen, but differs from a pure trustee in that he may use property for his exclusive benefit and take all income and profits.

[4467] Rev. Rul. 92-20 held that a provision in a trust agreement authorizing the trustee to accumulate trust income if the trust does not hold any shares of an S corporation does not, by itself, preclude the trust's qualification as a QSST.

[4468] Code § 1361(d)(3)(B); Reg. § 1.1361-1(j)(1)(i), the latter which expressly recognizes that income distributed in the first 65 days of the year may be treated under Code § 663(b) as being distributed in the immediately preceding year. Letter Rulings 8508048, 8836057, and 199927011 approved trusts in which the income must be distributed currently, but the beneficiary may elect in any year to have the trustee retain all or any portion of the income of the trust (it is not clear whether the trusts expressly permitted their beneficiaries to elect that retention or whether that was simply a practice that was contemplated); for related issues not discussed in the rulings, see part III.B.2.i Code § 678 (Beneficiary Grantor) Trusts, especially part III.B.2.i.viii Creditor and Gift/Estate Tax Issues Regarding Withdrawal Rights, Whether Currently Exercisable or Lapsed.

[4469] Letter Ruling 201710001.

[4470] Reg. § 1.1361-1(j)(4) approves testamentary QTIP trusts but, for inter vivos ones, prohibits a QSST election during marriage and requires one to ensure that the grantor is treated as wholly owning the trust:

> However, if property is transferred to a QTIP trust under section 2523(f), the income beneficiary may not make a QSST election even if the trust meets the requirements set forth in paragraph (j)(1)(ii) of this section because the grantor would be treated as the owner of the income portion of the trust under section 677. In addition, if property is transferred to a QTIP trust under section 2523(f), the trust does not qualify as a permitted shareholder under section 1361(c)(2)(A)(i) and paragraph (h)(1)(i) of this section (a qualified subpart E trust), unless under the terms of the QTIP trust, the grantor is treated as the owner of the entire trust under sections 671 to 677.

Reg. § 1.1361-1(k)(1), Example (10), provides:

> (i) *Transfers to QTIP trust*. On June 1, 1996, A transferred S corporation stock to a trust for the benefit of A's spouse B, the terms of which satisfy the requirements of section 2523(f)(2) as qualified terminable interest property. Under the terms of the trust, B is the sole income beneficiary for life. In addition, corpus may be distributed to B, at the trustee's discretion, during B's lifetime. However, under section 677(a), A is treated as the owner of the trust. Accordingly, the trust is a permitted shareholder of the S corporation under section 1361(c)(2)(A)(i), and A is treated as the shareholder for purposes of sections 1361(b)(1), 1366, 1367, and 1368.
>
> (ii) *Transfers to QTIP trust where husband and wife divorce*. Assume the same facts as in paragraph (i) of this Example 10, except that A and B divorce on May 2, 1997. Under section 682, A ceases to be treated as the owner of the trust under section 677(a) because A and B are no longer husband and wife. Under section 682, after the divorce, B is the income beneficiary of the trust and corpus of the trust may

Some annual expenses are ordinarily allocated one-half to income and one-half to principal. Generally, these include (1) the regular compensation of the trustee and of any person providing investment advisory or custodial services to the trustee, and (2) expenses for accountings, judicial proceedings, or other matters that involve both the income and remainder interests.[4471] If S corporation distributions are the trust's only source of cash, this rule is impractical, because the trust would be unable to pay the portion of the expense allocated to principal. Accordingly, I often suggest that the trustee make an adjustment, allocating the entire expense to income, which might be authorized under either state law[4472] or the governing instrument.[4473] If the business or the stock is sold later, the proceeds are taxable to the trust, rather than the beneficiary; at that time, some of the proceeds might be allocated to income to make up for these prior allocations of administrative expenses, which would help move taxable items from the trust's high rates to the beneficiary's potentially lower rates.[4474]

---

only be distributed to B. Accordingly, assuming the trust otherwise meets the requirements of section 1361(d)(3), B must make the QSST election within 2 months and 15 days after the date of the divorce.

(iii) *Transfers to QTIP trust where no corpus distribution is permitted*. Assume the same facts as in paragraph (i) of this Example 10, except that the terms of the trust do not permit corpus to be distributed to B and require its retention by the trust for distribution to A and B's surviving children after the death of B. Under section 677, A is treated as the owner of the ordinary income portion of the trust, but the trust will be subject to tax on gross income allocable to corpus. Accordingly, the trust does not qualify as an eligible shareholder of the S corporation because it is neither a qualified subpart E trust nor a QSST.

Paragraph (iii) illustrates two points. First, to qualify as a wholly owned grantor trust (see part III.A.3.a.i Qualifying as a Wholly Owned Grantor Trust), the trust must have not only its income but also its principal deemed owned wholly by the same individual (see part III.A.3.a.ii How a Trust Can Fall Short of Being Wholly Owned by One Person, especially fn. 4383); therefore, when drafting a trust for a spouse that holds stock in an S corporation for which an ESBT election is not in effect, one should consider including a grantor trust power beyond merely Code § 677, to make sure that the entire trust is taxed to the grantor (see part III.B.2.h How to Make a Trust a Grantor Trust). Second, no part of a QSST may be deemed owned by a person other than the beneficiary; see fn. 4463.

Paragraph (ii) offers insight into the application of Code § 677(a) after divorce. See part III.B.2.h.viii Code § 682 Limitations on Grantor Trust Treatment, the result of which is that, if distributions are made after separation, the trust no longer qualifies as a wholly owned grantor trust and a QSST election is unavailable; therefore, an ESBT election must be made. For the interaction of divorce with Chapter 14, see parts III.B.7.b.iv Divorce Planning to Avoid Code § 2701 and III.B.7.d Code § 2702 Overview, especially the text accompanying fns. 5645-5650.

[4471] Section 501 of the Uniform Principal and Income Act, which can be found at http://www.uniformlaws.org/Act.aspx?title=Principal and Income Amendments (2008).

[4472] See part II.J.8.c.i.(a) Power to Adjust.

[4473] See parts II.J.8.c.i.(d) Exceptions in the Governing Instrument and II.J.8.c.i.(e) Fiduciary Income Tax Recognition of the Trust Agreement and State Law, especially fns. 1878-1883 (language that might be included in one's forms authorizing such an adjustment, as well as the consequences of using such language).

[4474] See parts II.J.15.a QSST Treatment of Sale of S Stock or Sale of Corporation's Business Assets (Including Preamble to Proposed Regulations on NII Tax) and II.J.16 Fiduciary Income Taxation When Selling Interest in a Pass-Through Entity or When the Entity Sells Its Assets. See also part II.J.12 Equitable Adjustments to Reimburse Income Tax Paid or Tax Benefit Received

A trust that has substantially separate and independent shares, each of which is for the sole benefit of one beneficiary, may qualify as a QSST with respect to each separate share.[4475] For example, a grantor sets up an irrevocable trust for the benefit of his four children, who are the only children he will ever have. Each child receives one-fourth of the income and corpus distributions. Each child would be considered the owner of one-fourth of the stock owned by the trust.[4476] This could also work well for a vested trust for a grandchild, which qualifies for the GST annual exclusion;[4477] see part III.A.3.a.i Qualifying as a Wholly Owned Grantor Trust for an example of a vested trust.

To avoid the requirement that all of the trust income – not just its S corporation income – be distributed to the beneficiary, it is not uncommon for a trust agreement to divide the trust so that the QSST is a separate trust. For inter vivos QSSTs, this approach might have additional state income tax benefits; see part II.J.15.b QSSTs and State Income Tax Issues.

The beneficiary of a QSST is taxed on all of the QSST's K-1 income and losses from the S corporation[4478] (although the trust still needs to get its own tax ID).[4479] However, when

---

by a Party That Does Not Bear the Burden Under the Principal & Income Act. For form language that might facilitate this allocation, see fn. 1878, found in part II.J.8.c.i.(e) Fiduciary Income Tax Recognition of the Trust Agreement and State Law.

[4475] Code § 1361(d)(3). Although the statute cites to the separate share rules under Code § 663(c) (see part II.J.9.a Separate Share Rule), the test is more stringent than that. Code § 663(c) provides for that distributions to other beneficiaries be ignored in determining separate share treatment if the possibility of distribution is remote. Rev. Rul. 93-31 holds:

> A substantially separate and independent share of a trust, within the meaning of section 663(c) of the Code, is not a QSST if there is a remote possibility that the corpus of the trust will be distributed during the lifetime of the current income beneficiary to someone other than that beneficiary.

For example, if an inter vivos QSST includes a clause requiring the payment of estate tax if the grantor dies during the beneficiary's life, and that payment clause might benefit the grantor's estate beyond whatever applicable law would provide but for that clause, the IRS' view is that mere possibility of such a diversion might disqualify the QSST from inception. Letter Ruling 201451001 (which I obtained to obtain inadvertent termination relief at the insistence of the CPAs for the company that was acquiring my client). However, paying transfer tax on the beneficiary's death should not cause any QSST problem. Letter Ruling 9014008 (GST tax).

[4476] However, it would not work if trust provided that the birth of another child after the trust is created would cause the trust to be divided five ways, essentially diverting one-fourth of each existing trust. Rev. Rul. 89-45.

[4477] Code § 2642(c)(2) provides that the GST annual exclusion applies to a trust that uses *Crummey* withdrawal rights only if the grandchild (or other skip person) is the sole beneficiary of the trust, and the trust's assets must be includible in the beneficiary's gross estate upon her death. Code § 2654(b) provides that substantially separate and independent shares of different beneficiaries shall be treated as separate trusts under the GST rules. Suppose a grantor sets up an irrevocable trust for the benefit of his four grandchildren. Each grandchild receives one-fourth of the income and corpus distributions; the trust distributes all of its income each year; and each of the four living grandchild would be considered the owner of one-fourth of the stock owned by the trust. If a grandchild who dies before or after trust termination holds a general power of appointment over one-fourth of the trust's assets, the trust will qualify for the GST annual exclusion and as a QSST.

[4478] Code § 1361(d)(1)(B). Reg. § 1.1361-1(j)(7)(i) provides:

the QSST sells the stock, the trust itself is taxable on any gain on the sale,[4480] including any gain the corporation incurs after adopting a plan of complete liquidation[4481] or from the deemed asset sale resulting from a Code § 338(h)(10) election;[4482] If the corporation actually sells its assets without adopting a plan of liquidation, I am unsure of the result. For additional planning issues, see parts II.G.5 Gain or Loss on the Sale or Exchange of Property Used in a Trade or Business, II.J.8.a.i Whether the Capital Gain Is from the Sale or Exchange of a Capital Asset (discussing whether the gain is included in DNI), and II.J.15.a QSST Treatment of Sale of S Stock or Sale of Corporation's Business Assets (Including Preamble to Proposed Regulations on NII Tax). From the above, one can glean that depreciation recapture on the actual or deemed sale of personal property is ordinary income that is principal but might be best taxed to the beneficiary, who might either be in a lower tax bracket or might have losses from operations during the year of sale passing through the grantor trust portion to offset; thus, consider including in one's trust the flexibility to distribute principal or to reallocate principal to income.[4483]

The beneficiary must make a separate QSST election with respect to each corporation whose stock the trust holds.[4484]

See part II.A.2.e Estate Planning Strategies Available Only for S Corporation Shareholders for a brief introduction to a QSST's unique benefits. To explore a QSST's unique attributes as a grantor trust deemed owned by its beneficiary, see part III.A.3.e.vi QSST as a Grantor Trust; Sales to QSSTs.

Also note that a QSST election might enhance (or perhaps reduce) the trust's ability to deduct charitable contributions made by the S corporation.[4485]

> The income beneficiary who makes the QSST election and is treated (for purposes of section 678(a)) as the owner of that portion of the trust that consists of S corporation stock is treated as the shareholder for purposes of sections 1361(b)(1), 1366, 1367, and 1368.

Reg. § 1.1361-1(j)(8) further provides:

> If a valid QSST election is made, the income beneficiary is treated as the owner, for purposes of section 678(a), of that portion of the trust that consists of the stock of the S corporation for which the QSST election was made.

[4479] Reg. § 1.671-4(b)(6)(iii).

[4480] Reg. § 1.1361-1(j)(8). However, for purposes of recognizing any losses suspended due to the at-risk rules of Code § 465 or the passive activity rules of Code § 469, the regulation treats the beneficiary as having sold the stock so that the suspended losses can be triggered. For more details on such sales, see part II.J.15.a QSST Treatment of Sale of S Stock or Sale of Corporation's Business Assets.

[4481] Letter Rulings 9721020 and 199905011. This includes gain from the actual sale of assets as well as gain on the Code § 336 deemed sale of assets distributed to shareholders. Of course, Code § 331 gain on the deemed sale of stock on dissolution is also taxed to the trust.

[4482] Letter Rulings 9828006, 199920007, and 201232003.

[4483] See part II.J.8.c.i Capital Gain Allocated to Income Under State Law, which includes parts discussing allocating to income what otherwise would be principal receipts.

[4484] Reg. § 1.1361-1(j)(6)(i). Inadvertent termination relief is available when the trust acquires stock in another S corporation if a timely QSST election is not made with respect to that other S corporation. Letter Ruling 201618003.

[4485] See part II.Q.7.c S Corporations Owned by a Trust Benefitting Charity, especially the text accompanying fn. 3559.

III.A.3.e.i.(b). QSST Issues When Beneficiary Dies

QSSTs have excellent post-mortem planning flexibility:

- A QSST may hold stock for two years after the beneficiary's death without making any election at all.[4486]

- If a QSST continues as separate QSST-eligible shares for each beneficiary after termination but before the new QSST trusts are actually funded, no new election is required until actual funding of the new trusts; in other words, the QSST election stays in effect, with the individual remaindermen taxed as the QSST beneficiaries until actual post-mortem trust funding occurs.[4487]

The latter is a very important tool. Consider what happens after the beneficiary dies and before the stock is retitled in the remaindermen's names. If the S corporation does not distribute all of its taxable income, the trust might not be able to obtain an income distribution deduction to carry out all of the income to the remaindermen, thereby trapping the income[4488] at the trust's presumably higher income tax rates.[4489] Keeping the QSST election intact post-mortem before stock retitling to make sure that individual beneficiaries are taxed directly on the S corporation's K-1 income might save income tax during that period.

However, challenges arise when the remaindermen are not the residual beneficiaries of the beneficiary's estate plan. The S corporation might make distributions to pay the shareholders' income taxes after the beneficiary dies, and then how will the beneficiary's estate pay tax on the beneficiary's allocable share[4490] of the S corporation's income? What happens when a QSST's beneficiary dies, the beneficiary's estate is taxed on pre-mortem income, and the remaindermen are different than the beneficiaries of the beneficiary's estate? This might occur, for example, in a second marriage situation. Although the Uniform Principal and Income Act discusses issues along these lines to a certain extent,[4491] drafting to address this issue would be advisable:

- If the beneficiary does not control disposition of the trust's assets, the beneficiary might consider negotiating income tax reimbursement provisions with the trustee as a condition of making the QSST election.

[4486] See part III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation, especially part III.A.3.b.ii A Trust That Was A Grantor Trust With Respect To All Of Its Assets Immediately Before The Death Of The Deemed Owner And Which Continues In Existence After Such Death.

[4487] See Reg. § 1.1361-1(j)(9)(ii), contrasting Example (1) with Example (2).

[4488] See parts III.A.4 Trust Accounting Income Regarding Business Interests and III.D.2 Trust Accounting and Taxation.

[4489] Note, however, that trapping income inside trusts might be beneficial. See parts II.J.3 Strategic Fiduciary Income Tax Planning and III.A.3.e.ii.(c) When ESBT Income Taxation Might Help, the latter not directly on point but having some helpful ideas.

[4490] See part III.B.2.j Tax Allocations upon Change of Interest, especially part III.B.2.j.ii Tax Allocations on the Transfer of Stock in an S Corporation.

[4491] Section 201 of the Uniform Principal and Income Act (last amended or revised in 2008; see http://www.uniformlaws.org/shared/docs/principal%20and%20income/upia_final_08_clean.pdf) addresses actions when a trust terminates.

- If the beneficiary does control disposition, the beneficiary might consider exerting that control to require that the remaindermen reimburse the beneficiary's estate for income tax on the pre-mortem income. On the other hand, if the QSST's remaindermen are the same as under the beneficiary's estate plan generally, the opportunity to create a debt (taxes on the earned but undistributed income) on the beneficiary's estate tax return might prove beneficial. In the latter case, the beneficiary might exercise any power of appointment he or she might have to provide for the QSST election to remain in place after the beneficiary's death during trust administration before the trust is divided.

One might consider a provision along the following lines:

(1) If the individuals to whom the S corporation stock is allocated do not share in the residue of the deceased beneficiary's estate (in this Agreement, Article 5 determines the sharing of the residue of my estate, because my will bequeaths my estate to the Revocable Trust and Article 5 bequeaths the residuary trust assets), then any distributions the S corporation makes to pay its shareholders' taxes with respect to their distributive shares of taxable income before the date of death shall be treated as income earned before the beneficiary's death and paid to the beneficiary's estate.

(2) If and to the extent that paragraph (1) does not apply, during trust administration, after the beneficiary's death and before separate trusts can be funded, the trust will not terminate but rather will continue as a single trust with separate shares pursuant to U.S. Treas. Reg. section 1.1361-1(j)(9)(ii), Example (1), and the trusts for the beneficiaries will be amended under [the QSST provisions].

Such a provision would not cause any marital deduction problems for the trust that is terminating.[4492] However, if the trust is included in the beneficiary's estate and the beneficiary is bequeathing the stock to a QTIP trust and income otherwise payable to the QTIP trust is diverted, query whether that violates the requirement that QTIP exclusively benefit the surviving spouse.

The amount of income allocated before and after death is also potentially subject to considerable uncertainty, unless an election to close the corporation's books is made, as described in part III.B.2.j.ii Tax Allocations on the Transfer of Stock in an S Corporation, especially part III.B.2.j.ii.(d) Death of a Shareholder.

If the stock is bequeathed to a person other than the persons receiving the trust's residue, consider the issues in part III.A.3.d Special Fiduciary Income Tax Issues Regarding Bequeathing S Corporation Stock and Partnership Interests, which addresses

[4492] Rev. Rul. 92-64 generally allows income earned during the surviving spouse's life but paid after the surviving spouse's death to be paid to either the surviving spouse's estate (if allowed under state law) or the successor beneficiary. State corporate law often limits the gap between record date (the date on the shareholder actually owned the stock) and payment date; generally, an LLC taxed as an S corporation would not face this problem. Of course, in a trust situation, with either type of entity the trust would receive the distribution and then direct it according to the beneficiaries' respective interests, if the ownership interest was not transferred between death and date of the distribution from the corporation.

timing issues relating to distributions to pay taxes on the trust's distributive share of the entity's income.

III.A.3.e.ii. ESBTs

III.A.3.e.ii.(a). Qualification as an ESBT

After determining eligibility to make an "electing small business trust" (ESBT) election, see part III.A.3.c.iii Deadlines for QSST and ESBT Elections.

To qualify to make an ESBT election, the trust cannot have as a beneficiary any person other than an individual, an estate, a charity within certain definitions.[4493] "Beneficiary" includes a person who has a present, remainder, or reversionary interest in the trust.[4494] A distributee trust is the beneficiary of the ESBT only if the distributee trust is a Code § 170(c)(2) or (3) organization.[4495] In all other situations, any person who has a beneficial interest in a "distributee trust" is a beneficiary of the ESBT, rather than the trust itself being considered to be a beneficiary.[4496] A "distributee trust" is a trust that receives or may receive a distribution from the ESBT, whether the rights to receive the distribution are fixed or contingent, or immediate or deferred.[4497]

If an impermissible shareholder might become a potential current beneficiary, one might consider taking steps to exclude that person from being a potential current beneficiary ("PCB") of the ESBT portion.[4498] A potential trap applies when an ESBT terminates in favor of trusts (the "downstream trusts"). After the event terminating the ESBT (such as the primary beneficiary's death) and before the trust distributes its assets to the downstream trusts, the downstream trusts might become PCBs, applying the following rules:

(1) Generally, a trust that exists is a distributee trust if it becomes entitled to, or at the discretion of any person, may receive a distribution from principal or income of an ESBT.[4499] A trust is not currently in existence if the trust has no assets and no items of income, loss, deduction, or credit.[4500] A trust that is not yet funded not currently a distributee trust.[4501]

4493 Code § 1361(e)(1)(A)(i). Permitted charities include an organization described in Code § 170(c)(2) , (3) , (4) , or (5) or, if it has a contingent interest in the trust and is not a potential current beneficiary, a Code § 170(c)(1) organization.
4494 Reg. § 1.1361-1(m)(1)(ii)(A).
4495 Reg. § 1.1361-1(m)(1)(ii)(B).
4496 Reg. § 1.1361-1(m)(1)(ii)(B).
4497 Reg. § 1.1361-1(m)(1)(ii)(B).
4498 Letter Ruling 200913002 held that such a modification did not affect GST grandfathering.
4499 Reg. § 1.1361-1(m)(4)(iv)(A).
4500 Reg. § 1.1361-1(m)(4)(iv)(A).
4501 Reg. § 1.1361-1(m)(4)(iv)(A). Letter Rulings 200816012 and 200913002 approved as an ESBT a trust prohibiting distributions to a nonresident alien for so long as (1) the trust has an ESBT election in effect, and (2) a non-resident alien is not permitted to be a PCB of an ESBT under the Code and Regs. (I do not know why the rulings cited Reg. § 1.1361-1(m)(4)(iv) instead of Reg. § 1.1361-1(m)(4)(v). I wonder whether that is a typo.)

(2) If the trust qualifies a trust described in part III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation, then the persons who would be its PCBs if the distributee trust were an ESBT are treated as the potential current beneficiaries of the ESBT.[4502] However, if the distributee trust is a former grantor trust[4503] or is a testamentary trust,[4504] in either case during the special initial 2-year period, then the relevant estate is treated as the ESBT's PCB during that period.[4505]

(3) If the distributee trust is not a trust described in part III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation, then the distributee trust is the potential current beneficiary of the ESBT and the corporation's S corporation election terminates.[4506] However, if the distributee trust would be a valid QSST or ESBT if the relevant election were made and the election is not made because the trust does not hold S stock, then the distributee trust does not count as a PCB,[4507] and the distributee trust's PCBs would count as PCBs of the trust that

---

[4502] Reg. § 1.1361-1(m)(4)(iv)(C).

[4503] See part III.A.3.b.ii A Trust That Was A Grantor Trust With Respect To All Of Its Assets Immediately Before The Death Of The Deemed Owner And Which Continues In Existence After Such Death.

[4504] See part III.A.3.b.iii A Trust With Respect To Stock Transferred To It Pursuant To The Terms Of A Will, But Only For The 2-Year Period Beginning On The Day On Which Such Stock Is Transferred To It.

[4505] Reg. § 1.1361-1(m)(4)(iv)(C).

[4506] Reg. § 1.1361-1(m)(4)(iv)(B).

[4507] Reg. § 1.1361-1(m)(4)(iv)(D) provides:

> For the purposes of paragraph (m)(4)(iv)(C) of this section, a trust will be deemed to be described in section 1361(c)(2)(A) if such trust would qualify for a QSST election under section 1361(d) or an ESBT election under section 1361(e) if it owned S corporation stock.

Letter Ruling 200912005 approved a distributee trust that would have been eligible to make an ESBT election even though its sole remainderman was a charity (it did not, as drafted, qualify as a charitable remainder trust).

Reg. § 1.1361-1(m)(8), Example (6) provides:

> (i) *Distributee trust that would itself qualify as an ESBT*. Trust-1 holds stock in X, an S corporation, and has a valid ESBT election in effect. Under the terms of Trust-1, the trustee has discretion to make distributions to A, B, and Trust-2, a trust for the benefit of C, D, and E. Trust-2 would qualify to be an ESBT, but it owns no S corporation stock and has made no ESBT election. Under paragraph (m)(4)(iv) of this section, Trust-2's potential current beneficiaries are treated as the potential current beneficiaries of Trust-1 and are counted as shareholders for purposes of section 1361(b)(1). Thus, A, B, C, D, and E are potential current beneficiaries of Trust-1 and are counted as shareholders for purposes of section 1361(b)(1). Trust-2 itself will not be counted as a shareholder of Trust-1 for purposes of section 1361(b)(1).
>
> (ii) *Distributee trust that would not qualify as an ESBT or a QSST*. Assume the same facts as in paragraph (i) of this Example 6 except that D is a nonresident alien. Trust-2 would not be eligible to make an ESBT or QSST election if it owned S corporation stock and therefore Trust-2 is a potential current beneficiary of Trust-1. Since Trust-2 is not an eligible shareholder, X's S corporation election terminates.
>
> (iii) *Distributee trust that is a section 1361(c)(2)(A)(ii) trust*. Assume the same facts as in paragraph (i) of this Example 6 except that Trust-2 is a trust treated as owned by A under section 676 because A has the power to revoke Trust-2 at any time prior to A's

does hold the S stock.[4508] Another option is for the main trust to partially fund the distributee trust and have the distributee trust then qualify as a shareholder.[4509]

Each potential current beneficiary is treated as a shareholder for the purposes of the 100-shareholder limitation.[4510] A potential current beneficiary means any person who at any time during a particular taxable year may receive a distribution of principal or income from the trust, whether the distribution was mandatory or discretionary.[4511]

Regulations had provided that an open-ended inter vivos power of appointment violates the 100-shareholder limitation; however, Congress modified that provision for years beginning after December 31, 2004 to provide that powers of appointment are considered during a period only to the extent exercised during that period,[4512] and the regulations now reflect this change.[4513] If a distribution can be made to an existing trust, that trust must be qualify under the general rules for trusts as S corporation shareholders;[4514] similar to the power of appointment rule, that rule does not apply until the distributee trust has been created.[4515]

> death. On January 1, 2003, A dies. Because Trust-2 is a trust described in section 1361(c)(2)(A)(ii) during the 2-year period beginning on the day of A's death, under paragraph (m)(4)(iv)(C) of this section, Trust-2's only potential current beneficiary is the person listed in section 1361(c)(2)(B)(ii), A's estate. Thus, B and A's estate are potential current beneficiaries of Trust-1 and are counted as shareholders for purposes of section 1361(b)(1).

4508 Reg. § 1.1361-1(m)(4)(iv)(B) provides:

> If the distributee trust is a trust described in section 1361(c)(2)(A), the persons who would be its potential current beneficiaries (as defined in paragraphs (m)(4)(i) and (ii) of this section) if the distributee trust were an ESBT are treated as the potential current beneficiaries of the ESBT. Notwithstanding the preceding sentence, however, if the distributee trust is a trust described in section 1361(c)(2)(A)(ii) or (iii), the estate described in section 1361(c)(2)(B)(ii) or (iii) is treated as the potential current beneficiary of the ESBT for the 2-year period during which such trust would be permitted as a shareholder.

See Reg. § 1.1361-1(m)(8), Example (6), parts (i) and (iii), reproduced in fn. 4507.

4509 Reg. § 1.1361-1(m)(8), Example (5) provides:

> *Potential current beneficiaries and distributee trust holding S corporation stock*. Trust-1 has a valid ESBT election in effect. The trustee of Trust-1 has the power to make distributions to A directly or to any trust created for the benefit of A. On January 1, 2003, M creates Trust-2 for the benefit of A. Also on January 1, 2003, the trustee of Trust-1 distributes some S corporation stock to Trust-2. A, as the current income beneficiary of Trust-2, makes a timely and effective election to treat Trust-2 as a QSST. Because Trust-2 is a valid S corporation shareholder, the distribution to Trust-2 does not terminate the ESBT election of Trust-1. Trust-2 itself will not be counted toward the shareholder limit of section 1361(b)(1)(A). Additionally, because A is already counted as an S corporation shareholder because of A's status as a potential current income beneficiary of Trust-1, A is not counted again by reason of A's status as the deemed owner of Trust-2.

4510 Code § 1361(c)(2)(B)(v).

4511 Code § 1361(e)(2).

4512 Code § 1361(e)(2).

4513 Reg. § 1.1361-1(m)(4)(vi)(A).

4514 Reg. § 1.1361-1(m)(4)(iv)(B).

4515 Reg. § 1.1361-1(m)(4)(iv)(A), which further provides:

An ESBT cannot have a beneficiary whose interest was acquired by purchase.[4516] This prohibition does not have anything to do with whether the trust has purchased or might later purchase S stock.[4517]

> For this purpose, a trust is not currently in existence if the trust has no assets and no items of income, loss, deduction, or credit. Thus, if a trust instrument provides for a trust to be funded at some future time, the future trust is not currently a distributee trust.

[4516] Code § 1361(e)(1)(A)(ii). For whether a change in a beneficiary's interest in a trust might cause an interest in the trust to be obtained by purchase in violation of this rule, see Potter, Trust Decanting of S corporation Shareholders: Avoiding Inadvertent Termination of the Company's S Election, *TM Memorandum* (BNA) (12/29/2014) or *TM Estates, Gifts and Trusts Journal* (BNA) (3/12/2015).

Letter Rulings 201436006 and 201436007 ruled that the following transactions did not constitute a prohibited purchase of an interest in a trust:

> X created Trust 1 on D1. Trust 1 is a grantor trust wholly owned by X. X proposes to create Trust 2 which will be a grantor trust wholly owned by X. X proposes to contribute S corporation stock to Trust 2 and sell the Trust 2 remainder interest to Trust 1. Trust 2 will elect to be an electing small business trust (ESBT) under 1361(e) upon creation.
>
> ….
>
> [W]e conclude that the sale of the Trust 2 remainder interest to Trust 1 will not disqualify Trust 2 from being an ESBT under § 1361(e) during the period when Trust 1 is a grantor trust as to X because the sale of the remainder interest is not a purchase within the meaning of § 1361(e). The sale of the remainder interest is not a purchase within the meaning of 1361(e) because the sale is not governed by § 1012(a). However, to the extent that the sale is treated as a gift, the sale will be covered by § 1015(a). In addition, we conclude that Trust 2 will not cease to be or fail to qualify as an ESBT after the termination of Trust 1's grantor trust status because Trust 1's acquisition of the remainder is not a purchase within the meaning of § 1361(e).

[4517] Reg. § 1.1361-1(m)(1)(iii) provides:

> *Interests acquired by purchase*. A trust does not qualify as an ESBT if any interest in the trust has been acquired by purchase. Generally, if a person acquires an interest in the trust and thereby becomes a beneficiary of the trust as defined in paragraph (m)(1)(ii)(A), and any portion of the basis in the acquired interest in the trust is determined under section 1012, such interest has been acquired by purchase. This includes a net gift of a beneficial interest in the trust, in which the person acquiring the beneficial interest pays the gift tax. The trust itself may acquire S corporation stock or other property by purchase or in a part-gift, part-sale transaction.

T.D. 8994 (5/13/2002) stated:

> Two commentators requested clarification on whether a trust is eligible to be an ESBT if it acquires property in a part-gift, part-sale transaction, such as a gift of encumbered property or a net gift, in which the donor transfers property to a trust provided the trust pays the resulting gift tax. Section 1361(e)(1)(A)(ii) provides that a trust is eligible to be an ESBT only if "no interest in the trust was acquired by purchase." Section 1361(e)(1)(C) defines <u>purchase</u> as "any acquisition if the basis of the property acquired is determined under section 1012." The proposed regulations provide that if any portion of a beneficiary's basis in the beneficiary's interest is determined under section 1012, the beneficiary's interest was acquired by purchase. The final regulations clarify that the prohibition on purchases applies to purchases of a beneficiary's interest in the trust, not to purchases of property by the trust. A net gift of a beneficial interest in a trust, where the donee pays the gift tax, would be treated as a purchase of a beneficial interest under these rules, while a net gift to the trust itself, where the trustee of the trust pays the gift tax, would not.

III.A.3.e.ii.(b). ESBT Income Taxation - Overview

ESBT income taxation is complicated. An ESBT is treated as two separate trusts for purposes of chapter 1 of the Code.[4518] The portion that consists of stock in one or more S corporations is treated as one trust, and the portion that consists of all the other assets in the trust is treated as a separate trust.[4519] The grantor trust rules trump this treatment.[4520] The ESBT is treated as a single trust for administrative purposes, such as having one taxpayer identification number and filing one tax return.[4521]

The income from the Schedule K-1 that the S corporation files for the trust is separately taxed to the trust at the highest individual income tax rate for that type of income.[4522] Very few deductions are allowed against this income, and the income distribution deduction is not available;[4523] the IRS has taken the position that net operating losses (NOLs) are not allowable deductions,[4524] but capital loss carryforwards appear to be allowable.[4525]

State and local income taxes and administrative expenses directly related to the S portion and those allocated to that portion are taken into account by the S portion.[4526] These items may be allocated in any manner that is reasonable in light of all the

---

The Joint Committee on Taxation, *General Explanation of Tax Legislation Enacted in the 104th Congress* (JCS-12-96), December 18, 1996 (Blue Book), stated:

> No interest in the trust may be acquired by purchase. For this purpose, "purchase" means any acquisition of property with a cost basis (determined under sec. 1012). Thus, interests in the trust must be acquired by reason of gift, bequest, etc. The trust itself may acquire property (including stock of an S corporation) by purchase.

[4518] Code § 641(c); Reg. § 1.641(c)-1(a).

[4519] Reg. § 1.641(c)-1(a).

[4520] Reg. § 1.641(c)-1(a).

[4521] Reg. § 1.641(c)-1(a).

[4522] Code § 641(c)(1); Reg. § 1.641(c)-1(e).

[4523] Code § 641(c)(2).

[4524] The IRS has taken the position that a net operating loss (NOL) carryover arising from pre-ESBT activity is not deductible because an NOL carryover is not one of the specifically enumerated expenses. CCA 200734019 (consider whether the logic in that CCA might also be applied to NOLs generated from post-ESBT activity).

Making a Code § 645 election for a revocable trust to be taxed as an estate avoids this issue for short-term post-mortem planning, since estates can hold S stock during a reasonable administration period, whereas revocable trusts are limited to two years under Code § 1361(c)(2)(A)(ii). Trusts created under a revocable trust are considered trusts created under wills pursuant to Reg. § 1.1361-1(k)(1), Example 3, paragraph (ii) if a Code § 645 election is in place and therefore can hold S stock for up to two years after funding before making an ESBT or QSST election, flexibility that is not present absent a Code § 645 election.

See also the text accompanying fn. 4530 for how to avoid the ESBT generating an NOL when it has significant losses from its S corporation stock; this generally requires advance planning.

[4525] Reg. § 1.641(c)-1(d)(3)(i) disallows deductions for losses capital losses that exceed gains by more than $3,000 under Code § 1211(b) but does not refer to capital loss carryforwards under Code § 1212. Nothing directly addresses whether capital losses incurred before making an ESBT election but relating to S corporation items can be deducted against capital gain incurred while an ESBT.

[4526] Reg. § 1.641(c)-1(d)(4)(i).

circumstances, including the terms of the governing instrument, applicable local law, and the trustee's practice with respect to the trust if it is reasonable and consistent.[4527]

Complications arise if the ESBT is a grantor trust in whole or in part or if the trust is a charitable lead trust or other trust eligible for a charitable income tax deduction. The charitable deduction applies only the charitable contributions passing through a K-1 from the S corporation to the trust and not to contributions made by the trust.[4528] Effective for tax years beginning after December 31, 2017, an ESBT's contribution deduction does not apply Code § 642(c) but rather uses limits based on the rules that apply to individuals.[4529]

For application of the passive loss rules to ESBTs, see part II.K.2.b.v Electing Small Business Trusts (ESBTs) and the Passive Loss Rules. In light of the IRS' position on NOLs for ESBTs,[4530] consider whether the trustee should be passive, as discussed in part II.K.3 NOL vs. Suspended Passive Loss - Being Passive Can Be Good (and note

---

4527 Reg. § 1.641(c)-1(h).

4528 The charitable deduction is not allowed against ESBT income if made directly by the trust. See Code § 641(c)(2)(C) and Reg. § 1.641(c)-1(d)(1), disallowing all deductions except those expressly listed (but the deduction should be allowed against the non-S portion of the trust). However, Reg. § 1.641(c)-1(d)(2)(ii) describes charitable deductions passing through a K-1 the ESBT receives from an S corporation:

> *Special rule for charitable contributions*. If a deduction described in paragraph (d)(2)(i) of this section [referring to K-1 items] is attributable to an amount of the S corporation's gross income that is paid by the S corporation for a charitable purpose specified in section 170(c) (without regard to section 170(c)(2)(A)), the contribution will be deemed to be paid by the S portion pursuant to the terms of the trust's governing instrument within the meaning of section 642(c)(1) [the unlimited charitable deduction for trusts]. The limitations of section 681, regarding unrelated business income, apply in determining whether the contribution is deductible in computing the taxable income of the S portion.

Code § 512(e)(1)(B)(i) provides all S corporation K-1 income is per se unrelated business income, so Code § 681 and Reg. § 1.681(a)-2(a) would apply the individual contribution limits, rather than the unlimited Code § 642(c), to such deductions. However, the rules of Code § 642(c) other than the limits continue to apply (but would not if the change to Code § 642(c) in the Senate bill approved December 1-2, 2017 is enacted). For more information about Code § 681, mentioned in the last sentence of this regulation, see part II.Q.7.c.i Income Tax Trap - Reduction in Trust's Charitable Deduction.

4529 Code § 641(c)(2)(E) provides:

> (i) Section 642(c) shall not apply.
> (ii) For purposes of section 170(b)(1)(G), adjusted gross income shall be computed in the same manner as in the case of an individual, except that the deductions for costs which are paid or incurred in connection with the administration of the trust and which would not have been incurred if the property were not held in such trust shall be treated as allowable in arriving at adjusted gross income.

The Senate report adopting this rule said:

> The Senate amendment provides that the charitable contribution deduction of an ESBT is not determined by the rules generally applicable to trusts but rather by the rules applicable to individuals. Thus, the percentage limitations and carryforward provisions applicable to individuals apply to charitable contributions made by the portion of an ESBT holding S corporation stock.

4530 See fn. 4524.

that an ESBT avoiding NOLs might be at the cost of incurring the 3.8% tax on net investment income).[4531]

If the nongrantor trust portion of an ESBT is included in a person's estate, the ESBT election might prevent a basis step-up of depreciable property.[4532]

III.A.3.e.ii.(c). When ESBT Income Taxation Might Help

ESBT income taxation can be favorable in the right circumstances. For example:

- The trust's income might be taxed at lower state income rates (or not at all) inside the trust than in the beneficiary's hands, or

- The beneficiary might be in the top income tax bracket, and reporting additional income would cause the beneficiary to lose some itemized deductions, AMT exemption, or personal exemptions.

In either case, the ESBT can make distributions to the beneficiary without passing S corporation income to the beneficiary. To maximize this flexibility, the trustee might consider dividing the ESBT into two separate trusts – one that holds S stock and one that holds any distributions that the trustee intends to reinvest, based on the following analysis:

1. Distributions from a trust that generates investment income (other than S corporation K-1 income) will carry out income to the beneficiary.

2. If the investments are held in a separate trust, that trust can accumulate income and trap the investment income.

3. Therefore, when the trustee of the trust that holds S stock receives a distribution, the trustee would retain enough to pay income tax and administrative expenses, distribute to the beneficiary as appropriate, and then transfer the balance of the cash to the trust that generates investment income.

This three-part analysis applies when the S corporation distributes all of its income. It would not apply if the corporation distributes only enough for its shareholders to pay tax and uses the rest to grow the business (or its marketable securities portfolio). For trusts that are somewhere in between, it might or might not be helpful.

III.A.3.e.iii. Comparing QSSTs to ESBTs

A QSST tends to be used when:

- The trust is a marital trust or other trust whose income is required to be distributed currently to one beneficiary with no other current beneficiary. Under the marital trust

[4531] See part II.I 3.8% Tax on Excess Net Investment Income (NII), especially parts II.I.8 Application of 3.8% Tax to Business Income and II.J.14 Application of 3.8% Tax to ESBTs.
[4532] See part II.J.11.a.ii.(c) Trust vs. Separately Recognized Business Entity Holding Depreciable Property, particularly fns. 1974-1975.

rules,[4533] all income must be distributed annually, which means that, under normal trust rules, the income that the spouse is required to receive is taxable to her, just like any other mandatory income beneficiary.[4534]

- The beneficiary's income tax rate is lower than the trust's income tax rate. Because trust income above a modest threshold is taxed at the highest possible rates that apply to individuals,[4535] a beneficiary in a lower bracket should save taxes.

A QSST is not the best for trusts intended to accumulate their income, including trusts with multiple current beneficiaries. In most such cases, such trusts should be ESBTs.

ESBTs might avoid the 3.8% NII tax[4536] by appointing a trustee who is active in the business if the beneficiary is not active in the business.[4537] A QSST's income is not subject to the 3.8% NII tax if the beneficiary is active in the business[4538] or has income below the threshold;[4539] however, because the trustee's participation is what counts when the QSST sells the stock, consider making the trustee active well in advance of a potential sale.[4540] Also note that, if the trust directly or indirectly owns real estate that is rented to the S corporation, a QSST election might complicate a trust's qualification for the self-rental exception, which exception would enable the taxable rental income avoid the 3.8% NII tax, so the trustee might consider retaining some stock in an ESBT, rather than moving all of the stock into a QSST.[4541] See also part II.K.3 NOL vs. Suspended Passive Loss - Being Passive Can Be Good.

See part III.A.3.e.i.(b) QSST Issues When Beneficiary Dies, for a discussion of various issues one should consider when a beneficiary makes a QSST election.

Other than possible complexity regarding taxes on the earned but undistributed income, a QSST generally has more flexibility than an ESBT. A QSST offers options for deferring S corporation trust tax elections.[4542] If the trustee of an irrevocable grantor trust makes an ESBT election as a protective measure,[4543] the trust's ESBT taxation

[4534] Code § 651.
[4535] Code § 1(e)(2).
[4536] For the 3.8% tax on net investment income (NII), see II.I 3.8% Tax on Excess Net Investment Income. For calculating the tax on an ESBT, see fn 1991 (which also refers to an example in the proposed regulations) and the accompanying text.
[4537] See parts II.K.2.b.i Participation by a Nongrantor Trust: Authority and II.K.2.b.ii Participation by a Nongrantor Trust: Planning Issues.
[4538] A QSST is a grantor trust deemed owned by the beneficiary. The 3.8% tax looks to the character of the income in the hands of the deemed owner; see fn. 1555.
[4539] See part II.I.3 Tax Based on NII in Excess of Thresholds.
[4540] See part II.J.17 Planning for Grantor and Nongrantor Trusts Holding Stock in S Corporations in Light of the 3.8% Tax.
[4541] See part II.I.8.g Structuring Businesses in Response to 3.8% Tax, particularly the text accompanying fns. 1699-1700.
[4542] See text accompanying fns. 4486-4487.
[4543] A trustee cannot make a conditional ESBT election. Reg. § 1.1361-1(m)(2)(v). If the trustee of a grantor trust makes an unconditional current ESBT election, the election is in effect but does not control the trust's taxation to the extent trumped by the grantor trust rules. Reg. § 1.641(c)-1(c).

continues after death,[4544] in effect springing into place without any of the savings that other former irrevocable grantor trusts (including QSSTs) have.[4545]

On the other hand, ESBTs might provide more flexibility that QSSTs in avoiding adverse taxation of certain related party sales of depreciable or amortizable property or in replicating an inside basis step-up if the stock receives a basis step-up. For related party sales, see part II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill).[4546] For inside basis step-up opportunities,[4547] see part II.H.8 Lack of Basis Step-Up for Depreciable or Ordinary Income Property in S Corporation, explaining how to replicate an inside basis step-up for property to the extent that Code § 1239 is not triggered, as well as state income tax issues that can complicate matters when the taxpayer is not a resident of the state in which the property is located.[4548]

A QSST complicates purchases made out of earnings, as described in part III.A.3.e.vi.(c) Required Structure for a Sale to a QSST. In ESBTs, interest on the promissory note is deductible only for tax years beginning after December 31, 2006.[4549] A better solution is a trust taxable to its beneficiary under Code § 678.[4550] Also, it might be possible for the income beneficiary to sell S corporation stock to the QSST and not recognize gain or loss on the sale.[4551]

III.A.3.e.iv. Flexible Trust Design When Holding S Corporation Stock

Consider a GST-exempt trust with only one beneficiary, with discretionary distributions of income and principal under an ascertainable standard. An independent person is authorized to direct that, for a period of no less than 36 months, all of the income is required to be distributed, based on the following:

- The minimum period of time between ESBT and QSST conversions is 36 months. This minimum period applies between conversions but does not apply to the first conversion. In other words, once the first ESBT or QSST election is made, a conversion to the alternate form (QSST or ESBT) can be

---

[4544] Reg. § 1.1361-1(m)(8), Example (4).

[4545] part III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation, especially part III.A.3.b.ii A Trust That Was A Grantor Trust With Respect To All Of Its Assets Immediately Before The Death Of The Deemed Owner And Which Continues In Existence After Such Death regarding a grantor trust's continuing eligibility to hold S stock for two years after the deemed owner's death. Normal trust income tax rules, which generally are more favorable than ESBT income tax rules, apply during that time. See text accompanying fns. 4522-4525 for ESBT taxation.

[4546] For a comparison of ESBTs and QSSTs, see text accompanying fn. 3665.

[4547] Part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations explains such issues.

[4548] See part II.H.8.a.ii State Income Tax Disconnect.

[4549] Reg. § 1.641(c)-1(d)(4)(ii) provides, (ii) *Special rule for certain interest*. Interest paid by the trust on money borrowed by the trust to purchase stock in an S corporation is allocated to the S portion but is not a deductible administrative expense for purposes of determining the taxable income of the S portion. This was repealed for tax years beginning after December 31, 2006 by Code § 641(c)(2)(C)(iv).

[4550] See fn 4368.

[4551] See part III.B.2.i.xiii QSST as an Alternative Form of Beneficiary Grantor Trust.

made at any time. However, once one converted from a QSST to an ESBT or vice versa, the 36-month period applies in reversing the conversion.[4552]

- Mandatory distributions ensure no missteps in distributing income to maintain QSST status, because mandatory income trusts are not required to prove actual distributions of all of the income. However, a trust that actually distributes all of its income qualifies even without a mandatory distribution clause.[4553]

- Before converting, split the trust if it has assets other than S corporation stock, so that the other assets are not subjected to the QSST distribution scheme.

- The independent person would also be authorized to turn off the mandatory income direction for any trust taxable year that begins after the date the mandatory income direction is turned off. (Otherwise, the IRS might argue that the mandatory income provision is illusory because it could get turned off at any time during the year.)

This would open up the opportunity to toggle between QSST and ESBT taxation, while allowing any ESBT income to accumulate inside an environment protected from estate taxes and creditors. After a trust has been an ESBT for 36 months, it may be divided into a separate trust for each beneficiary, and each new trust can separately either continue as an ESBT or become subject to a QSST election.[4554] Thus, every three years the trustee can consider how much of the trust should be a QSST and how much an ESBT and then ask the independent person to adjust the mandatory income direction as appropriate. This toggling decision would take into account the expected annual S corporation income, the beneficiary's adjusted gross income, and the beneficiary's participation in the business (see below).

Note that, if the beneficiary has an inter vivos limited power of appointment, the beneficiary can hold the power of appointment during an initial ESBT period,[4555] but once the trust converts to a QSST the beneficiary must permanently renounce the power of appointment.[4556]

S corporation business income is free from the 3.8% tax on net investment income (NII) if the recipient significantly participates in the S corporation's business activity.[4557] For a QSST, one would look to the beneficiary's participation, whereas for an ESBT the IRS would look to the participation of a trustee;[4558] however, for a QSST, the IRS would look to trustee participation when the trust sells S corporation stock or the S corporation sells

[4556] See fm. 4463.
[4557] See part II.I.8 Application of 3.8% Tax to Business Income (application of the 3.8% tax on net investment income), especially part II.I.8.f Summary of Business Activity Not Subject to 3.8% Tax.
[4558] See parts II.J Fiduciary Income Taxation (application of the 3.8% tax on net investment income) (particularly fn. 1555 and later sections of part II.J dealing with the sale of QSST or ESBT stock) and II.K.2 Passive Loss Rules Applied to Trusts or Estates Owning Trade or Business (determining when a trust materially participates).

substantially all of its business assets.[4559] If the beneficiary materially participates in the business, then either QSST or ESBT taxation could avoid the tax, the latter if the beneficiary is appointed as a trustee for purposes of holding the S corporation stock and satisfies the rules for trustee participation.[4560] If the beneficiary does not materially participate in the business, the S corporation income would constitute NII; however, the beneficiary might be in a sufficiently low tax bracket that the 3.8% tax on NII might not apply to the beneficiary at all.

Additionally, if the beneficiary already owns stock in the S corporation, the trust might buy the stock from the beneficiary, perhaps without any capital gain tax on the sale.[4561]

Finally, QSSTs provide more post-mortem tax options than ESBTs, so pre-mortem toggling to QSST status can provide this enhanced flexibility.[4562]

III.A.3.e.v. Converting a Multiple Beneficiary ESBT into One or More QSSTs

III.A.3.e.v.(a). Strategic Issues

Every dollar of ESBT income is taxed at 37% federal income tax and 3.8% tax on net investment income ("NII").[4563] The beneficiaries' federal income tax brackets might be significantly lower,[4564] and the NII tax would not apply except to the extent that their modified adjusted gross income exceeds $200,000 for a single individual or $250,000 for a married person filing jointly.

However, any trustee and tax preparation fees might be deductible by the beneficiaries as miscellaneous itemized deductions (and disallowed for AMT purposes) rather than being deducted directly against the S corporation income.[4565]

This might increase the state income tax on the business income. As an ESBT, only the trust's state income tax posture is considered. Depending on the ESBT's state of residence, the ESBT might not be responsible for tax on the trust's income (particularly investment income) that is not sourced to a particular state. If the trust is converted to QSSTs, each beneficiary would need to file an income tax return for each state in which the S corporation does business, reporting his or her share of each state's income, thereby complicating each beneficiary's income tax return preparation. Additionally, each beneficiary who lives in a state with income tax would need to pay state income tax on his or her share of income, ameliorated in whole or in part by a credit for income taxes paid to other states.

[4559] See part II.J.15.a QSST Treatment of Sale of S Stock or Sale of Corporation's Business Assets (Including Preamble to Proposed Regulations on NII Tax).

[4562] See text accompanying fn. 4542.
[4563] See part II.I 3.8% Tax on Excess Net Investment Income. It's possible that some ESBT income might be below the adjusted gross income threshold. See part II.J.14 Application of 3.8% Tax to ESBTs.
[4564] Consider the effect of phase-outs based on adjusted gross when evaluating the beneficiaries' income tax rates.
[4565] Reg. § 1.67-2T(b)(1).

The ESBT might have been accumulating income or perhaps distributing income to separate GST-exempt trusts for beneficiaries, the latter so that each beneficiary decides on a case-by-case basis whether to accumulate income in a protected trust. This accumulation might be important for estate tax reasons, as well as perhaps for nontax reasons. Now, however:

- With the $5+ million estate tax exemption, this accumulation strategy has less estate tax benefit, if the beneficiaries do not have estates near the exemption.

- Trusts that accumulate income face the same increase in federal income tax and NII tax as described above if they are ESBTs or have more than $12,000[4566] in taxable income, so the accumulation strategy would have additional income tax costs.

III.A.3.e.v.(b). Implementation

The trustee might consider the following:

- Evaluate the trustee's authority to divide trusts and to convert separate trusts into QSSTs. If the trust has beneficiaries of more than one generation (*e.g.*, children and grandchildren), the trustee needs to consider any fiduciary duties to the lower generations (*e.g.*, grandchildren) in dividing the trust into separate trusts for the upper generation (*e.g.*, children). The trustee might obtain ratification from all adult beneficiaries to protect the trustee. The parent (who is not a beneficiary) of any minor or unborn descendant would sign on behalf of that descendant; this can be problematic if the child who is a beneficiary is divorced or otherwise having marital troubles. A consent by a beneficiary might raise Code § 2702 issues; this is less of a concern if the beneficiary had not been receiving distributions and never expected to receive distributions before that beneficiary's parent's death.

- If centralized management is a concern:

    - Determine whether the trustee is authorized to commingle the QSSTs, treating them as separate shares.[4567] The trustee might maintain a single new bank account for new deposits, which would then either distribute anything it receives or reimburse the existing account for administrative expenses the trust incurs. The division of shares would be done simply by recording the shares on a spreadsheet.

    - See whether the beneficiaries have the right to change the trustees of their separate trusts, which rights they might not have had in the main trust.

- Determine whether paying 100% of annual trustee fees and administrative expenses regarding the QSST portion out of income reasonably and fairly

[4566] $12,150 in 2014; $12,300 in 2015 per Rev. Proc. 2014-61, Section 3.01, Table 5; $12,400 in 2016 per Rev. Proc. 2015-53, Section 3.01, Table 5; presumably higher in future years.
[4567] This is permitted under the last sentence of Code § 1361(d)(3) and Reg. § 1.1361-1(j)(3).

balances the interests of the income and remainder beneficiaries, as the trust might not have another source to pay those fees; the trustee would want to reserve the right to allocate them to principal in the year of sale.[4568] Normally such fees and expenses are allocated one-half to income and one-half to one-half to principal.[4569] Perhaps the corporation would pay the fees, but note that the payment might need to be a separately stated K-1 item, if the character of the fees would change on a beneficiary's income tax return.[4570]

III.A.3.e.v.(c). Timing Tax Deductions in Year of Conversion

Consider which expenses would be better deductions against ESBT or QSST income and pay them in the appropriate time period.

K-1 items need to be pro-rated.[4571]

Presumably, administrative expenses relating to S corporation income would be allocated to the time before and after the conversion and any expenses allocable to the QSST portion would be deductible by the beneficiary.

III.A.3.e.vi. QSST as a Grantor Trust; Sales to QSSTs

Because the beneficiary pays tax on not only the S corporation's distributed income but also its undistributed income, a QSST can be a way to:

- Avoid high trust income tax rates and take advantage of a full run through the beneficiary's graduated tax rates.

- Allow the beneficiary to deduct a loss before the trust's termination, if the stock has sufficient basis.

- Have the beneficiary pay tax on any reinvested earnings used to grow the S corporation, increasing the trust's value and reducing the beneficiary's gross estate.

[4568] Gain on sale of stock, including any gain reported on a K-1 form the S corporation issues reporting gain by reason of a Code § 338(h)(10) election to treat a stock sale as an asset sale, is taxable to the trust, rather than the being taxable as the grantor trust portion. See parts II.J.15.a QSST Treatment of Sale of S Stock or Sale of Corporation's Business Assets (Including Preamble to Proposed Regulations on NII Tax) and III.A.3.e.i QSSTs, particularly the text accompanying fns. 4480-4482, dealing with sales of not only S corporation stock but also of an S corporation's business in an asset sale. For additional planning issues, see parts II.G.5 Gain or Loss on the Sale or Exchange of Property Used in a Trade or Business and II.J.8.a.i Whether the Capital Gain Is from the Sale or Exchange of a Capital Asset (discussing whether the gain is included in DNI). Of course, the trust might obtain a distribution deduction by distributing the sale proceeds; see part II.J.8 Allocating Capital Gain to Distributable Net Income (DNI), especially part II.J.8.a.ii Whether the Gain from the Sale or Exchange of a Capital Asset Is Allocated to Corpus.

[4569] Section 501 of the Uniform Principal & Income Act.

[4570] See text accompanying fn. 4565 and Code § 1366(a)(1)(A).

[4571] See part III.B.2.j.ii Tax Allocations on the Transfer of Stock in an S Corporation.

- Prevent the grantor of a trust for a spouse from being taxed on any reinvested taxable income after divorce.[4572] If the beneficiary/former spouse may also receive principal distributions, the beneficiary may elect to treat the trust as a QSST, thereby ensuring that the taxable items of the trust's assets inside an S corporation owned by the trust are taxable to the beneficiary, whether or not actually distributed to the beneficiary.[4573]

- Allow the beneficiary to sell S corporation stock (and, indirectly, other assets) to the trust on what appears to be a tax-free basis.[4574] A sale to an irrevocable grantor trust is a powerful estate planning technique.[4575] Clients sometimes balk at selling assets to a trust where they are not beneficiaries, because they might need the assets for their living expenses. For a client who refuses to part with all of the enjoyment of sufficient assets, consider suggesting that he or she sell assets to a trust in which he or she is a beneficiary and is the deemed owner - a beneficiary grantor trust.[4576]

The grantor trust aspects can be powerful planning techniques but are also subject to some significant disadvantages.[4577]

Beneficiary grantor trusts involve complex tax issues, including the risk that the Internal Revenue Service, which generally has stopped issuing private letter rulings regarding such trusts,[4578] might at some point take a position inconsistent with its many past favorable private letter rulings. The complexity involved often includes a sale being highly leveraged (sometimes using a trust funded with no more than $5,000), which might invite IRS scrutiny.

QSSTs do not face the funding issues that apply to many other beneficiary grantor trusts. They can be funded very substantially and still be entitled to grantor trust treatment.

[4572] Code § 677 treats the grantor as owners of any items that can be distributed to or held for eventual distribution to the grantor or the grantor's spouse. Code § 672(e)(1)(A) treats as the spouse any individual who was the spouse of the grantor at the time of the creation of such power or interest. Thus, divorce does not terminate grantor trust treatment. However, Reg. § 1.682(a)-1(a)(1) provides that the grantor is not taxed as the owner to the extent that income is paid, credited, or required to be distributed and therefore taxed to the former spouse.

[4573] See fn. 4470, noting the contrast between paragraphs (ii) and (iii) within Example (10).

[4574] See part III.A.3.e.vi.(c) Required Structure for a Sale to a QSST (Including Possible Pitfalls).

[4575] See part III.B.2 Grantor Trust Planning, Including GRAT vs. Sale to Irrevocable Grantor Trust.

[4576] See part III.B.2.i Code § 678 (Beneficiary Grantor) Trusts.

[4577] See part III.A.3.e.vi.(b) Disadvantages of QSSTs Relative to Other Beneficiary Grantor Trusts.

[4578] Rev. Proc. 2015-3, Section 4.01(39), provides that ordinarily the IRS will not rule on:

> Whether a person will be treated as the owner of any portion of a trust over which that person has a power to withdraw the trust property (or had such power prior to a release or modification, but retains other powers which would cause that person to be the owner of the trust under § 671 if the person were the grantor), other than a power which would constitute a general power of appointment within the meaning of § 2041, if the trust purchases the property from that person with a note and the value of the assets with which the trust was funded by the grantor is nominal compared to the value of the property purchased.

III.A.3.e.vi.(a). Grantor Trust Issues Involved in a Sale of S Stock to a QSST

If a QSST buys the beneficiary's stock from the beneficiary after making a QSST election for its then-existing S stock (issued by the same corporation), that would be a disregarded transaction for income tax purposes, following the general principle under Rev. Rul. 85-13 that a transaction between a trust and its deemed owner (for income tax purposes) is disregarded (for income tax purposes).[4579]

The regulation that treats the beneficiary as the Code § 678(a) provides that the trust's selling or distributing the stock is attributable to the trust, not the beneficiary,[4580] but does not discuss the consequences of the trust buying S corporation stock. This regulation overrode Rev. Rul. 92-84, which applied grantor trust treatment to a QSST's sale of S corporation stock; however, the logic of Rev. Rul. 92-84 might continue to apply (as a matter of good analysis, not as a matter of precedent) to the extent that the regulation is silent. The preamble to the regulation[4581] overrode Rev. Rul. 92-84 for practical reasons: if the trust no longer holds S stock during the deferred consummation of an installment sale, how could QSST treatment apply? That should not be a concern when the trust is buying stock. Although the IRS might have concerns about the asymmetry involved (the trust buying stock from the beneficiary having a different result than the trust selling stock to the beneficiary), those concerns would not appear to be supported by the IRS' official pronouncements.[4582]

[4579] Code § 1361(d)(1)(B) provides, for purposes of section 678(a), the beneficiary of such trust shall be treated as the owner of that portion of the trust which consists of stock in an S corporation with respect to which the [QSST] election … is made.

[4580] For gain on sale of stock or assets and for related planning opportunities, see text accompanying fns. 4480-4482.

[4581] T.D. 8600.

[4582] This asymmetry already exists under Rev. Rul. 85-13. In that ruling, initially the trust was not a grantor trust. The grantor bought stock from the trust in exchange for an unsecured promissory note. The note's existence is what made the trust a grantor trust deemed owned by its grantor and caused the transaction to be disregarded. On the other hand, if the trust had bought stock from its grantor, its grantor would have recognized gain on the sale, because a promissory note owed by the trust to the grantor would not have triggered grantor trust status. This asymmetry did not prevent that ruling from becoming the IRS' formal position.

Notice 97-24 points out that Rev. Rul. 85-13 avoids assets receiving a basis step-up. In the case of a beneficiary selling to a QSST, if the beneficiary did not pay capital gain tax on the sale to the trust, then the stock the trust acquires, which will be outside of the estate tax system, will not receive a new basis and therefore will be taxed more highly to the trust if sold after beneficiary's death (or after any other event terminating grantor trust status).

Based on a long line of law, Rev. Rul. 85-13 held that the deemed owner was the deemed owner of the trust's property. See fn. 4914.

The bottom line is that the beneficiary would be deemed to own the stock that the beneficiary sells to the trust both before and after the proposed transaction. One cannot have a recognition event when one sells closely-held business stock, which Rev. Rul. 90-7 expressly held is deemed owned by a trust's deemed owner, to oneself. Rev. Rul. 85-13 recognized this longstanding principle when it reasoned:

> A transaction cannot be recognized as a sale for federal income tax purposes if the same person is treated as owning the purported consideration both before and after the transaction. See *Dobson v. Commissioner*, 1 B.T.A. 1082 (1925).

The *Dobson* case itself involved closely-held business stock. Rev. Rul. 2007-13 reaffirmed this concept, and it should be applied to the sale to a QSST as well.

If an income beneficiary who sells S corporation stock to an existing QSST that already owns stock in the same S corporation, the above analysis might be more comfortable. Three companion private letter rulings, in approving the merger of one QSST into another, used analysis that supports this concept:[4583]

> Under 1.1361-1(j)(7), the X shares which make up the corpus of Exempt QSST A and Exempt QSST B are treated as directly owned by Y. Any transfer of the X shares, pursuant to a merger under Article 5.6, would effectively be a transfer of the shares from Y to Y.

What is the tax treatment of interest payments on a promissory note a QSST uses to buy stock in an S corporation?[4584] The IRS has taken the position that, when the QSST buys stock from a third party using a promissory note, the note is part of the S corporation portion that is deemed owned by the QSST's beneficiary and therefore is deductible by

---

[4583] Letter Rulings 200441013, 200441014, and 200441015.

[4584] In all fairness, the beneficiary should get the deduction, especially in light of the separate share rules under Code § 663. However, an argument can be made that only S corporation K-1 items are treated as part of the Code § 678 share allocated to the beneficiary. Code § 1361(d)(1)(B) provides, "for purposes of section 678(a), the beneficiary of such trust shall be treated as the owner of that portion of the trust which consists of stock in an S corporation with respect to which the election under paragraph (2) is made...." On the other hand, Code §§ 1361(d)(1)(B) and 641(c)(1)(A) use very similar language. Therefore, when an issue is not expressly addressed by authority, the ESBT and QSST rules should be read consistently. The principle behind the ESBT regulation quoted in fn 4549 tends to support the beneficiary's deduction of interest under Code § 1361(d)(1)(B) (or a disregard of the interest income and deduction under Code § 678 if the seller is the beneficiary), because the Regulation's allocation of the interest to the S portion remains intact.

Furthermore, often a trust that holds stock in an S corporation is split off as a separate QSST, which never accumulates any income, because all of the income is distributed to the beneficiary. Allocating income to a nonexistent non-S portion would not make sense in those situations. That contrasts with ESBTs, where generally there is no reason for the S stock to be held in a separate trust.

Allocating the interest deduction to the non-S corporation portion of the trust would result in a mismatch, in that the interest the trust pays is allocated to income that the beneficiary, not the trust, is treated as owning for income tax purposes. It would appear to run counter to the spirit of the debt-tracing rules of Reg. § 1.163-8T, which would characterize the interest as related to the S corporation. If the interest is allocated to the non-S corporation portion of the trust, its deductibility should relate to the nature of the income passing through on the K-1 the trust receives from the company. To the extent the K-1 income is income from a trade or business, presumably the interest would be expense from trade or business that would generate a net operating loss carryover if the trust did not have sufficient other income. Reg. § 1.163-8T(a)(4)(i). Notice 89-35 supports this approach:

> In the case of debt proceeds allocated under section 1.163-8T to the purchase of an interest in a passthrough entity (other than by way of a contribution to the capital of the entity), the debt proceeds and the associated interest expense shall be allocated among all the assets of the entity using any reasonable method. Reasonable methods of allocating debt among the assets of a passthrough entity ordinarily include a pro-rata allocation based on the fair market value, book value, or adjusted basis of the assets, reduced by any debt of the passthrough entity or the owner allocated to such assets.

If the trust generates a net operating loss (NOL) carryforward due to the interest expense, be sure not to make an ESBT election, as Chief Counsel Advice 200734019 takes the position that the NOL carryforward is not deductible against ESBT income.

the beneficiary.[4585] Informal conversations indicated that this position was the result of discussions at the highest levels of IRS policy-makers. Interest expense is deductible on Schedule E, Part II of the beneficiary's individual income tax return.[4586]

This position - that the promissory note is part of the S corporation portion that the beneficiary is deemed to own - gives me confidence that a beneficiary's sale to a QSST would be disregarded under Rev. Rul. 85-13 because the beneficiary would be considered to be selling to himself or herself.[4587]

III.A.3.e.vi.(b). Disadvantages of QSSTs Relative to Other Beneficiary Grantor Trusts (Whether or Not a Sale Is Made)

Using QSSTs involves challenges that do not apply to other Code § 678 trusts. Consider the disadvantages of an S corporation as an investment vehicle that is shared among family members:

- Inability to Divide S Corporation. An S corporation that does not engage in a trade or business would not be able to be divided income-tax free under Code § 355.[4588] This would trap all family members in a single investment entity, unable to manage investments suitable for each person's goals.

- Tax Cost of Distributing Investments. A distribution of investments would be taxed as a sale.[4589] Thus, distributing marketable securities to family members so that they go their separate ways would subject them to capital gain tax on the deemed sale of the investments. Distributing depreciable property might subject them to tax on ordinary income.[4590]

[4585] CCA 201327009 allows the beneficiary to deduct the interest when the QSST buys from a third party using a promissory note. The IRS declined to rule on the loan's effect under the at-risk rules out of concern that taxpayers would set up a Code § 465(c)(4) device to limit liability. Because the trust had no other assets, debt tracing was not a concern, and all of the interest was allocated to the S corporation activity. The IRS also declined to address the passive loss rules.

[4586] The 2013 instructions to Form 1040, Schedule E, Part II say:

> Interest expense relating to the acquisition of shares in an S corporation may be fully deductible on Schedule E. For details, see Pub. 535.

Publication 535, for use in preparing 2013 returns, says to report interest expenses from S corporation business borrowing on Schedule E (Form 1040), line 28, entering interest expense and the name of the S corporation in column (a) and the amount in column (h). Presumably this would also apply to loans to a QSST to acquire stock in an S corporation.

[4587] This background on CCA 201327009 results from informal discussions with an attorney, who has since left the IRS, when I asked whether the IRS would consider approving a sale to a QSST. The IRS informally indicated that it would decline to issue such a ruling if I sought it, because it was not totally certain of the result and does not wish to encourage sales to Code § 678 trusts. It was suggested that the IRS never would have approved a sale to an irrevocable grantor trust if it had realized that the technique would become so popular.

[4588] See part II.Q.7.f Corporate Division, including part II.Q.7.f.iii Active Business Requirement for Code § 355.

[4589] See part II.Q.7.h.iii Taxation of Corporation When It Distributes Property to Shareholders.

[4590] See part II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property.

However, pre-mortem planning might help. Suppose the trust is a credit shelter trust or a GST-exempt trust and the beneficiary's estate is subject to estate tax. If the QSST sells its investments that have unrealized gain, the income (capital gain) tax liability will be a debt deductible on the beneficiary's estate tax return. Harvesting gain would prevent the distribution of securities from being a taxable event at the shareholder level. However, the distribution of securities in a corporation would generate income tax to the extent that the fair market value of the distribution exceeds the basis (and might generate dividend income if and to the extent the corporation had been a C corporation and the distribution constituted a distribution of earnings and profits); on the other hand, the recognition of gain on the sale of securities would increase the stock's basis.[4591] Just be sure that the pre-mortem gain harvesting is not pursuant to a plan of liquidation[4592] or a sale of stock combined with a Code § 338(h)(10) election;[4593] either event would subject to sale of assets to stock at the trust's level, rather than the beneficiary's level.[4594]

- Inability to Swap. Although a beneficiary does not recognize gain or loss when selling S corporation stock to a QSST, the trust would recognize income on selling S corporation stock back to the beneficiary.[4595]

- All Income Must Be Distributed. A QSST must distribute to its beneficiary all of its trust accounting income. This can be controlled by the S corporation not making distributions to the trust. The IRS might argue that failure to make a distribution constitutes a gift. Note, however, that the IRS considers 3%-5% to be a reasonable range for income distributions.[4596] If the right to require income lapses annually and the undistributed income does not exceed 5%, then presumably the lapse (if a lapse at all) would be with the lapsing withdrawal right 5-and-5 safe harbor of Code § 2514(e).

- Personal Use Assets. Placing personal use assets inside an S corporation would require the charging of rent. The S corporation would recognize rental income, and those paying rent would not be able to deduct that rent. If the beneficiary uses a trust asset for personal purposes, he does not need to pay rent, since the point of the trust is to benefit him.

These limitations are not imposed on Code § 678(a)(2) trusts. When their assets are divided among family members, the division is done on a tax-free basis and they can each go their separate ways quite easily.

4591 See part II.Q.7.b Redemptions or Distributions Involving S Corporations.
4592 See fn. 4481, found within part III.A.3.e.i.(a) QSSTs Generally. This is important because an S corporation that used be a C corporation can avoid dividend taxation by engaging in a liquidation; see fn. 3499, found within part II.Q.7.a.vii Corporate Liquidation.
4593 See fn. 4482, found within part III.A.3.e.i.(a) QSSTs Generally.
4594 In addition to the citations within fns. 4592 and 4593, see part II.J.15.a QSST Treatment of Sale of S Stock or Sale of Corporation's Business Assets (Including Preamble to Proposed Regulations on NII Tax).
4595 Reg. § 1.1361-1(j)(8); see fns. 4480-4482.
4596 See part II.J.8.c.i Capital Gain Allocated to Income Under State Law, especially the text accompanying fn. 1877.

Consider who pays income tax for the year in which the beneficiary dies.[4597] These considerations also apply when the beneficiary of a Code § 678(a)(2) trust dies, although the beneficiary of the latter has a broader power of appointment than the former.

Income tax difficulties in splitting an S corporation after the beneficiary's death might be addressed as follows:

- Form a Partnership. By forming an entity taxed as a partnership with the beneficiary, other family members, or other trusts, a QSST might be able to access investment opportunities not otherwise available to it or might be able to facilitate their access to investment opportunities not available to them. Although such a partnership could preserve the expected annual cash flow, the commitment to retaining funds in the partnership would reduce the fair market value of the S corporation's partnership interest. This value reduction would also reduce the tax if the corporation distributes some or all of assets when the QSST divides upon the beneficiary's death. Such a partnership should be formed well in advance of the beneficiary's death.[4598] When the beneficiary dies, perhaps the S corporation would distribute some of its partnership interests right away so that the trust could immediately fund part of the bequests; then, later, after the trustee is satisfied that all tax and other fiduciary liabilities have been resolved, the S corporation could distribute the remaining partnership interests.[4599] Furthermore, the partnership could later divide in a variety of ways on a tax-free basis,[4600] so that each family member can implement his or her own investment strategy over time; however, if the family members do not have strategies that either are consistent with each other's or complement each other's, pursuing different investment strategies would rend to require asset sales that might generate capital gain tax.[4601]

- Create Separate Corporations. Suppose a trustee decides to contribute its assets to an S corporation with the expectation that the beneficiary will make a QSST election. Instead, consider forming a separate S corporation for the future benefit of each of the beneficiary's children. When the beneficiary dies, each of the beneficiary's children will be allocated a separate S corporation, thereby eliminating the need to divide the corporation or distribute its assets. This solution merely postpones the issue, because these issues would need to be addressed when a child of the beneficiary dies (or if a child predeceases the beneficiary, but that postponement might be sufficiently beneficial to address concerns for a while).

[4597] See part III.A.3.d Special Fiduciary Income Tax Issues Regarding Bequeathing S Corporation Stock and Partnership Interests.
[4598] See part II.Q.7.h Distributing Assets; Drop-Down into Partnership, especially fn 3694.
[4599] Distributing in stages would tend to alleviate the concerns described in fn 3694.
[4600] See part II.Q.8 Exiting From or Dividing a Partnership.
[4601] If the strategies are consistent with each other's, then the partnership could simply divide pro rata. If the strategies complement each other's, then each person could take the assets that interest him or her. Anything else would require post-division adjustments, most likely accomplished through sales.

Fiduciary Income Tax Issues Regarding Bequeathing S Corporation Stock and Partnership Interests.

III.A.3.e.vi.(c). Required Structure for a Sale to a QSST (Including Possible Pitfalls)

In QSSTs, all income must be distributed to the beneficiary.[4602] Therefore, at first glance, it would appear impossible for a QSST to use its S corporation distributions to buy stock.

However, if a QSST buys stock in a secured sale in which it pledges all of its S corporation distributions, the trust never receives the distributions, so the trust has no income receipts to pay to the beneficiary.[4603] Private letter rulings have readily accepted this theory for mandatory income trusts;[4604] this theory should apply to a discretionary income trust.[4605]

[4602] Reg. § 1.1361-1(j)(1)(i) provides

> All of the income (within the meaning of § 1.643(b)-1) of the trust is distributed (or is required to be distributed) currently to one individual who is a citizen or resident of the United States. For purposes of the preceding sentence, unless otherwise provided under local law (including pertinent provisions of the governing instrument that are effective under local law), income of the trust includes distributions to the trust from the S corporation for the taxable year in question, but does not include the trust's pro rata share of the S corporation's items of income, loss, deduction, or credit determined under section 1366….

[4603] The trust would need to pay any future cash receipts of principal to the beneficiary to make up for this diversion of amounts that would otherwise constitute trust accounting income. Adopting Section 502(b) of the Uniform Principal and Income Act (last amended or revised in 2008; see http://www.uniformlawcommission.com/Act.aspx?title=Principal and Income Amendments (2008)), RSMo section 469.453.2 provides:

> If a principal asset is encumbered with an obligation that requires income from that asset to be paid directly to the creditor, the trustee shall transfer from principal to income an amount equal to the income paid to the creditor in reduction of the principal balance of the obligation.

[4604] This accounting treatment is consistent with Letter Rulings 200140040 (which not only diverted dividends to repay the seller but also required that the trust pay additional purchase price if it resold the stock within a certain period of time after buying the stock), 200140043, and 200140046 (trust's purchases from another shareholder), as well as 9140055 (distributions used to pay bank loan used to buy stock), which rulings essentially treated the repayment of principal on the notes as income disbursements rather than principal disbursements. See also Letter Ruling 9639013, permitting the use of income to repay notes on a seller-financed sale to QSSTs, CCA 201327009 did not expressly consider this issue. However, based on the facts and conclusion, it implicitly assumed that the use of S corporation distributions to repay the note was permitted.

Other rulings dealing with principal and income issues include Letter Rulings 9140055 (beneficiary repayment of trust distribution to pay interest QSST owed bank), 200446007 (deemed dividend is not fiduciary accounting income and therefore not required to be distributed), and 200451021 (redemption treated as distribution for income tax purposes, but proceeds were principal not required to be distributed).

[4605] What if the trust would be relying on the payment of actual income to satisfy Code § 1361(d)(3)(B) and Reg. § 1.1361-1(j)(1)(i)? One might be concerned that the trust would be receiving no income and therefore would be making no distributions of income. On the other

A significant disadvantage is that this method might take twice as long as a normal sale to a grantor trust. In most states, the trustee must transfer from principal to income an amount equal to the income paid to reduce the principal balance of the note (as used in this part III.A.3.e.vi.(c), the "adjustment amount").[4606] Thus, although note payments complete the sale (the obligation to the beneficiary in the beneficiary's capacity as a creditor), they create an obligation that the trust owes to the beneficiary as a beneficiary:

- Worst Case Scenario – Simplistic view. In other words, first the trust repays the note, then the trust repays the beneficiary the income that was diverted from the beneficiary (as a beneficiary) to pay the note. Thus, the original note principal is not removed from the estate tax system until both the note and the adjustment amount to the beneficiary are fully paid. However, if the adjustment amount is not expected to paid made for a while, consider that the possible inclusion of the adjustment amount in the beneficiary's estate might very well be the present value of that principal distribution, which might be significantly less than the amount of the principal that is owed.

- Actual Law – Not So Bad? The trust's obligation is to transfer to income principal equal to the adjustment amount. This means that, when the trust receives cash generally classified as principal, it must reclassify that cash as income, to the extent of the adjustment amount. That principal receipt might never happen during the beneficiary's life, and the trust might never be required to pay the beneficiary.

Consider the following ways to repay this additional obligation, if it exists:

1. Suppose the trust is a discretionary income trust. Perhaps an independent trustee would be able to toggle on and off the mandatory income feature (which, of course, is not possible in a one-lung QTIP plan[4607] but might be possible using a *Clayton*-QTIP plan).[4608] After the note is repaid, the independent trustee might turn off the mandatory income obligation. If the beneficiary never needs the income under the standards provided by the trust, the trust might accumulate funds thereafter and never pay cash equal to the full adjustment amount. However, the IRS might argue that such a modification undermines the point of recharacterizing the principal as income,[4609] so consider a compromise: Instead of the trustee accumulating income under the discretionary standards and perhaps never paying the adjustment amount, the trustee and beneficiary come to the following agreement: The trustee agrees to pay future income to the beneficiary to the extent of the adjustment amount, notwithstanding the fact that the trustee has determined that the beneficiary would

hand, all of the company's distributions that are payable to the trust would in fact wind up in the hands of the trust's sole beneficiary; it will simply get there as a note repayment, rather than as a distribution. Thus, relying on the payment of actual income would not appear to violate the spirit of Code § 1361(d)(3)(B) and Reg. § 1.1361-1(j)(1)(i).

[4606] See fn. 4603.

[4607] For an explanation of a one-lung plan, including some of its advantages and disadvantages, see part II.H.2.a Free Basis Step-Up When First Spouse Dies.

[4608] For a description of a *Clayton*-QTIP plan, see the paragraph accompanying fn. 4624.

[4609] Reg. § 1.643(b)-1 provides, "Trust provisions that depart fundamentally from traditional principles of income and principal will generally not be recognized." See part II.J.8.c.i.(e) Fiduciary Income Tax Recognition of the Trust Agreement and State Law, especially the text accompanying fn. 1876.

not receive income under the trust's new distribution standards. That income is payable until the earlier of the beneficiary's death or amounts equal to the adjustment amount have been paid. The trustee might sign a revocable letter directing the company to pay the beneficiary directly any distributions of income (up to the adjustment amount) that normally would have gone to the trust.

2. If the trust is a mandatory income trust, see whether the corporation will make a distribution to all shareholders in partial liquidation of the entity or merely redeem the trust's stock, depending whether it is important to keep proportionate stock ownership. Such a distribution or redemption might very well constitute a nontaxable return of AAA (reinvested S corporation taxable income).[4610] For example, a partial liquidation would be a principal distribution for trust accounting purposes (even if it is a distribution of AAA for income tax purposes) that could then be used to repay the principal obligation.

3. If the trust has other assets, then gain from the sale of other assets would be used to repay this principal obligation. Being transferred to income[4611] or being used to determine a distribution[4612] should cause the capital gain to be taxed to the beneficiary.

When drafting a trust that might engage in such a transaction, keep in mind the above issue. Perhaps the trustee might have some flexibility in allocating receipts and disbursements between principal and income?[4613] Perhaps the trust might have a provision requiring the trustee to give the beneficiary notice of a right to principal and provide that the right to that principal adjustment lapses as provided in Code § 2514(e)?

Consider whether the IRS might attack the sale as follows: The IRS might argue that stock's value exceeded the sale price; therefore, the IRS might argue, the seller made a gift to a trust that benefits the seller, triggering Code § 2036 inclusion. One might consider using a defined value clause,[4614] instructing the trustee to distribute any excess value to a separate share of the trust, of which 10% would be structured as a completed gift (no power of appointment over the remainder) and 90% would be structured as an incomplete gift (power of appointment over the remainder - perhaps even a presently exercisable withdrawal right). With adequate disclosure, the gift tax statute of limitations would run regarding how much comprises the completed gift and incomplete gift portions.[4615] The separate share of the trust would be treated as a separate trust for QSST purposes; however, the separate share's treatment as a grantor trust as to the seller[4616] would make a QSST election unnecessary during the seller's life.

[4610] See part II.Q.7.b Redemptions or Distributions Involving S Corporations.
[4611] See part II.J.8.c.i Capital Gain Allocated to Income Under State Law.
[4612] See part II.J.8.c.iii Allocated to Principal but Actually Distributed to the Beneficiary or Used by the Trustee to Determine the Amount Distributed or Required to be Distributed to a Beneficiary.
[4613] For flexibility in allocating between income and principal, see part II.J.8.c.i Capital Gain Allocated to Income Under State Law, which includes a sample general clause (not geared toward the QSST sale issue) as well as the regulations governing such allocations.
[4614] See part III.B.3 Defined Value Clauses in Sale or Gift Agreements or in Disclaimers.
[4615] See part III.B.4 Adequate Disclosure on Gift Tax Returns.
[4616] Code § 677.

Such a possible Code § 2036 attack may deter using this technique. If one is trying to move miscellaneous assets by contributing them to an S corporation and selling the S corporation stock to a trust, consider instead using a preferred partnership.[4617] However, if one has an operating business in an S corporation, a preferred partnership is not available[4618] unless the transferor is the sole owner or all of the owners have the same estate planning goal.[4619]

III.A.3.e.vi.(d). Using a QSST to Buy Stock When Using a "One-Lung" Marital Deduction Plan

One of my favorite estate planning tools for married couples is to bequeath the entire residue into a trust that can qualify to the QTIP marital deduction. The executor may elect a marital deduction with respect to none, part, or all of the trust. For an explanation of some of the advantages and disadvantages of such a plan, see part II.H.2.a Free Basis Step-Up When First Spouse Dies.

More recently, I have been including in the trust the authority for an independent trustee to make distributions for the surviving spouse's welfare. If the surviving spouse is the trustee, he or she may appoint as a co-trustee a person who is not a related or subordinate party,[4620] who could make a distribution for welfare and then resign.

Suppose the decedent's estate tax exemption is insufficient to cover all of the decedent's S corporation stock. Some S corporation stock is allocated to a trust excluded from the estate tax system (a "nonmarital trust"), and the rest is allocated to a marital deduction trust (a "marital trust"). The surviving spouse elects QSST treatment for each trust.[4621] The marital trust distributes its S corporation stock to the surviving spouse, who then sells it to the nonmarital trust in exchange for a promissory note.

If the client has an independent trustee who is quite comfortable with the surviving spouse and the remainderman, one might consider using *Clayton*-QTIP planning.[4622] *Clayton*-QTIP planning is where the portion that is not elected QTIP goes to a trust that has different dispositive provisions than the portion that is elected QTIP.[4623] In the nonmarital trust, an independent trustee would be able to distribute income for the surviving spouse's welfare (in addition to any other desirable discretionary distributions

---

[4617] See part II.H.11 Preferred Partnership to Obtain Basis Step-Up on Retained Portion.

[4618] A partnership is not an eligible owner of a S stock. Code § 1361(b)(1)(B); see part II.A.2.f.v Relief for Late S Corporation and Entity Classification Elections for the Same Entity.

[4619] If the transferor is the sole owner or all owners have the same estate planning goals, the S corporation itself could contribute its assets to a preferred partnership. See part II.H.11 Preferred Partnership to Obtain Basis Step-Up on Retained Portion.

[4620] As fn. 5062 explains, the spouse's power to appoint a trustee who can distribute for the spouse's welfare will not cause the spouse to hold a general power of appointment if the trustee is not a related or subordinate party, as defined in Code § 672(c) (see fn. 1751).

[4621] Using this strategy, a QSST election is required for the nonmarital trust but not for the marital trust. However, making such an election for the marital trust tends to simplify income tax issues.

[4622] Authorizing an independent trustee to be the executor with authority to make the QTIP election should avoid any attack the IRS might make whether a spouse who is the executor had made a gift to the extent that failure to make a QTIP election causes the surviving spouse to lose his or her mandatory income rights.

[4623] Reg. § 20.2056(b)-7(d)(3) authorizes this in response to case law.

for the surviving spouse). This would help address a particular drawback to sales to QSSTs.[4624]

III.A.3.e.vi.(e). Converting Existing Trust to a QSST to Obtain Beneficiary Grantor Trust Status

Suppose the client is the beneficiary of an existing GST-exempt trust with discretionary distributions. Consider converting the trust into a QSST, by whatever legal means are available to do so. Consider the ideas discussed in parts III.A.3.e.iv Flexible Trust Design and III.A.3.e.v Converting a Multiple Beneficiary ESBT into One or More QSSTs.

Then the client can sell the client's S corporation stock to the QSST.

If the client does not have an S corporation, the client could contribute assets to an S corporation and then sell the S corporation stock to the trust. Alternatively, an existing GST-exempt trust with only one beneficiary might simply form an S corporation and the beneficiary make a QSST election, effectively converting the trust to a beneficiary grantor trust.[4625] However, in either case, be sure to consider exit strategies upon the client's death, as described in part III.A.3.e.vi.(b) Disadvantages of QSSTs Relative to Other Beneficiary Grantor Trusts.

III.A.3.e.vi.(f). QSST to Convert Terminating Trust to GST-Exempt Life Trust

Suppose the client created a trust for children that terminates at various ages. The client could create a QSST for each adult child.

See part III.A.3.e.vi.(e) Converting Existing Trust to a QSST for considerations involved in using this strategy.

III.A.4. Trust Accounting Income Regarding Business Interests

When a trust holds a business entity interest, complicated accounting and tax issues can arise. One of the main reasons for these complexities is the difference between accounting income and taxable income. Accounting income helps determine the amount of distributions a trust is required to make, under the governing instrument or state law, which in turn may determine how much taxable income is carried out to the beneficiaries of the trust. The Code defines "income required to be distributed currently" as the fiduciary accounting income that must be distributed currently pursuant to the governing instrument or state law. Because fiduciary accounting income is determined by state law or the governing instrument, differences between taxable income and accounting income generally arise. An example of such a difference would be capital gains. Capital gains are usually principal for fiduciary accounting purposes, but taxable income for income tax purposes.

[4624] See fn. 4608.

[4625] This would be ideal if the trust is already a mandatory income trust. If the trust is not a mandatory income trust, then complying with the requirement to distribute all income might be tricky.

III.A.4.a. General Strategies Regarding Fiduciary Income Taxation of Business Interests

Trusts and estates reach the top income tax brackets and are subjected to the 3.8% tax on net investment income[4626] far more rapidly than beneficiaries. See part II.J Fiduciary Income Taxation.

Part III.D Hypothetical illustrates the issues described in this part III.A.4 Trust Accounting Income Regarding Business Interests. That income tax dynamic may subject income to a higher tax bracket than if all of the income were taxed in a QSST, in which the beneficiary is the deemed owner of all of the K-1 income.[4627] Thus:

- If the trust holds S corporation stock, consider facilitating a QSST election.
- If the trust holds a partnership interest, consider placing the partnership interest in an S corporation (or in a slightly more elaborate structure)[4628] and facilitating a QSST election.

III.A.4.b. Example for Trust Accounting Income Regarding Business Interests

A similar problem can arise when a trust holds a partnership interest. Often a partnership may report significant earnings on its K-1s, but may distribute a much smaller amount in cash to its partners. For example, a trust could receive a partnership K-1 with $100,000 of taxable income, but may only receive $60,000 of cash as a distribution. The $60,000 is all the accounting income, because the amount distributed does not exceed the amount of income attributable to the trust.[4629] When this happens, the trust will have distributable income equal to $60,000, but will be unable to distribute the additional $40,000 of "phantom income" from the K-1, meaning the trust will be taxed on the $40,000. This can lead to cash flow problems when the trust has no other income, since once the trust distributes the $60,000 to the beneficiary it will have no available cash to pay the taxes. The Uniform Principal and Income Act[4630] provides a solution to this problem. Under old section 505(c)(1), a tax that is required to be paid by a trustee on the trust's share of an entity's taxable income is proportionally divided between principal and income based on the receipts allocated to each.[4631] Thus, the trustee will be able to keep some of the cash to pay the taxes on the trust's undistributed income. See below for the 2008 clarification to section 505 that makes sure that the trustee has enough money to pay the tax.

Another example, with a flowchart, is at part III.D.2 Trust Accounting and Taxation.

4626 See part II.I 3.8% Tax on Excess Net Investment Income.
4627 See part III.A.3.e.i QSSTs.
4628 The trustee might place the partnership interest into an LLC, owned by one S corporation for each expected remainderman. See part III.A.3.e.vi.(b) Disadvantages of QSSTs Relative to Other Beneficiary Grantor Trusts (Whether or Not a Sale Is Made).
4629 Uniform Principal and Income Act § 401(b). See footnote 4630.
4630 Citations to the Uniform Principal and Income Act are to the version adopted in 1997, as amended or revised in 2000, published August 21, 2003, by the National Conference of Commissioners on Uniform State Laws.
4631 See also RSMo §469.459.3(1).

III.A.4.c. 2008 Clarification of Uniform Principal & Income Act Regarding Business Entities, Taxed as Partnerships or S Corporations, Held in Trust

In the summer of 2008, the Uniform Law Commission amended Section 505 of the Uniform Principal & Income Act (the "UPAIA"); see Appendix to this article. The amendment responds to litigation over the income tax burden when a mandatory income trust holds an interest in a partnership or other pass-through entity. This article addresses the concerns underlying the changes, explains the changes, and discusses the planning implications of this change and related issues.

When a mandatory income trust holds an interest in a partnership or other flow-through entity, coordinating the UPAIA with fiduciary income tax rules can get tricky. The changes to UPAIA section 505 provide needed clarity regarding the treatment of taxes paid regarding a trust's distributive share of an entity's income; however, they do not address the other issues described in part II.J.5 Issues Arising with Mandatory Income Trusts.

III.A.4.c.i. Concerns Underlying the UPAIA Section 505 Changes

Before discussing the technical reasons for change, one must understand some of the basic income tax rules governing business entities, the rules governing the income taxation of trusts, and how they interact.

Income Tax Rules Governing Business Entities

Three different paradigms apply to business entities. A traditional corporation (also known as a "C corporation") pays income taxes on its own income. When it distributes its current or accumulated earnings, the distribution is taxed to its shareholders as a dividend. It might also make one or more distributions in partial or total liquidation, which is taxed to its shareholders as a sale of part or all of the stock rather than a dividend if certain tax law requirements are satisfied.

The Tax Reform Act of 1986 prevented C corporations from liquidating without both the shareholders and corporation being taxed. These new rules encouraged those who owned C corporations to convert them to S corporations. S corporation owners are taxed on the corporation's income rather than the corporation being taxed on the income. An example will help explain this difference:

- <u>C Corporation</u>. Suppose the corporation has one shareholder, A. A invests \$1,000x. In Year 1, the corporation earns \$100,000x and pays \$40,000x in income tax, leaving \$60,000x of after-tax earnings and a total of \$61,000x of cash. The corporation liquidates, distributing \$61,000x to A. A pays income tax of \$12,000x on the excess of the \$61,000x proceeds over the \$1,000x that A invested. After paying taxes, A has \$49,000x (\$61,000x liquidation proceeds minus \$12,000x taxes that A paid).

- <u>S Corporation</u>. Same situation, only an S election is in place. In Year 1, the corporation pays no income tax on its earnings; instead, A receives Schedule K-1 from the corporation reporting \$100,000x of gross income and pays \$40,000x income tax on the corporation's earnings. Section 1366(c) of the Internal Revenue Code of 1986, as amended (the "Code"). The corporation distributes $40,000x to A to pay the income taxes, so A has really not used any of A's own money to pay the income tax. Code Section 1368(b)(1) provides that this distribution is not taxed because it does not exceed the shareholder's tax basis. However, A's investment in the corporation has increased for income tax purposes. A's basis is now $61,000x, which is the $1,000x that A invested, plus the $100,000x income on which A was taxed, minus the $40,000x that the corporation distributed to A to pay A's income tax. Code Section 1367. The corporation then liquidates, distributing $61,000x to A ($1,000x that A invested, plus $100,000x earnings, minus $40,000x distributed to A to pay A's income taxes). A keeps the entire $61,000x without paying any income tax on the distribution, because A received the same amount as A is deemed to have invested.

In the example, the sole shareholder has received more using an S corporation than using a C corporation. The $40,000x that the S corporation distributed to A really was not intended as a benefit to A; instead, it was reimbursing A for the taxes that A paid on the corporation's income. The $40,000x is referred to below as a "tax distribution."

C and S corporations are the first two of the three paradigms. Partnerships (including limited liability companies taxed as partnerships) have similar effects on the taxation of owners for purposes of UPAIA section 505. Therefore, this article refers to S corporations and partnerships as "flow-through" entities, and uses "Schedule K-1 income" to describe the income from the flow-through entity that an owner needs to report. For reasons beyond the scope of this article, partnerships have much more flexible income tax rules regarding distributions from the entity to owners.

In the example above, let's compare distributions from C corporations with distributions from flow-through entities.

- The owner of a C corporation receives no distribution.

- The owner of a pass-through entity receives a tax distribution, so that the owner retains no cash after paying income taxes.

Suppose that, in the example above, the owner is a mandatory income trust:

- A trust that owns stock in a C corporation has no trust accounting income because it has no receipts.

- How much trust accounting income does a trust that owns a pass-through entity have that must be distributed to the beneficiary? To achieve parity with the C corporation scenario, the income taxes paid using the tax distribution would be charged against income, so that again the beneficiary receives nothing. However, that result was not clear under UPAIA section 505 before the amendment.

One must understand trust income taxation to fully understand how UPAIA section 505 works.

Income Tax Rules Governing Trusts

Suppose a trust receives Schedule K-1 reporting $100,000x income. Ignoring the trust's small exemption amount and very modest use of lower tax brackets, the trust would be required to pay $40,000x of income tax, assuming a 40% federal and state income tax rate. However, if the trust distributes $100,000x to its beneficiary, it receives a $100,000x income distribution deduction and pays no income tax;[4632] instead, the trust gives the beneficiary a Schedule K-1 reporting $100,000x income, and the beneficiary pays income tax on the $100,000x Schedule K-1 income (to the extent not offset by the beneficiary's deductions, exemptions, etc.).[4633]

Carrying this example further, suppose the trust receives only a $40,000x tax distribution and does not have other funds to distribute to the beneficiary. If the trust distributes the $40,000x to the beneficiary, then the trust receives a $40,000x income distribution deduction and must pay $24,000x income tax ($60,000x multiplied by 40%) on its remaining $60,000x ($100,000x Schedule K-1 income minus $40,000x income distribution deduction) taxable income. However, the trustee has no funds with which to pay the $24,000x income tax. In fact, the only way to prevent the trustee from not being able to pay income tax with respect to the Schedule K-1 income would be for the trustee to retain the entire tax distribution.

What are the principles that apply to determining the income distribution deduction described above? First, compute the amount of trust's distributable net income (taxable income, with certain adjustments). Next, determine the amount required to be distributed and any additional amounts actually distributed to the beneficiary. The income distribution deduction, which is always taxable to the beneficiary through the Schedule K-1 the trustee gives to the beneficiary, is the lesser of the distributable net income or the distributions described above. The rules become more complicated when one considers capital gains, tax-exempt income, or other similar issues, but the framework is similar.

Now let's apply this to a mandatory income trust. The trust accounting income, determined under the UPAIA, is an amount required to be distributed using the above principles. Some people assume that the Schedule K-1 income is the amount deemed distributed. That assumption is false. For income tax purposes, the amount of income required to be distributed is based on state law fiduciary accounting income.[4634] UPAIA Section 102(4) provides that "'income' means money or property that a fiduciary receives as a current return…." Thus, income would not exceed "money or property that a fiduciary receives" even if the Schedule K-1 income is higher.

In a trust that receives a $40,000x tax distribution, the trust has $40,000x of income receipts.[4635] How much income tax should the trustee deduct from the $40,000x receipt to determine the income that must be distributed? UPAIA section 505 answers that question. However, the answer was unclear and bred litigation, because beneficiaries receiving no cash from a mandatory income trust were understandably upset. Below,

[4632] Code §§ 651, 661.
[4633] Code §§ 652, 662.
[4634] Reg. §§ UPAIA Section 401(b).
[4635] UPAIA Section 401(b).

this article explains the UPAIA change and how attorneys drafting estate plans or representing disappointed beneficiaries might advise their clients in light of these changes and existing law.

III.A.4.c.ii. Explanation of the UPAIA Section 505 Changes

Before this amendment, the language of UPAIA section 505 was ambiguous regarding accounting for tax distributions. The amendment clarifies the overriding principle that the trustee of a mandatory income trust uses tax distributions to the extent necessary to pay income taxes and distributes any remaining income to the beneficiary. The official comments contain an algebraic formula that might be used when an interrelated calculation is required, which is whenever distributions from a pass-through are less than its Schedule K-1 income and the trustee has no other funds to distribute to the beneficiary or pay income tax on its Schedule K-1 income.

The policy behind this change is that the UPAIA should not place trustees in a position where they cannot pay the trust's income tax. Generally, it is not practical or prudent for a trustee to borrow to pay income tax when the trustee has no idea when, if ever, a distribution in excess of a tax distribution will be made. Furthermore, if the trust owned C corporation stock rather than an interest in a flow-through entity, the trust would never have received a distribution from the business entity anyway.

In the example above, suppose the business entity annually accumulated the $40,000x excess of Schedule K-1 income over the tax distribution. Suppose these accumulated amounts were later distributed to the trust. UPAIA section 506(a)(3) would authorize additional distributions to the beneficiary because the beneficiary essentially paid the tax on these accumulated amounts when the trustee used the tax distributions to pay income tax instead of distributing part or all of them to the beneficiary.

- Before turning to advising clients about these changes, let's discuss particular rules affect how these rules apply to various trusts that own stock in S corporations:

- An electing small business trust ("ESBT") does not receive an income distribution deduction with respect to its Schedule K-1 income that is distributed to its beneficiary.[4636]

- A qualified subchapter S trust ("QSST") under Code Section 1361(d), or other trust treated as wholly owned by one grantor or one beneficiary, does not pay taxes on any of its Schedule K-1 income from an S corporation. Instead, the individual beneficiary or grantor treated for income tax purposes as receiving Schedule K-1 income pays all the income taxes attributable to the Schedule K-1 income.[4637] Therefore, the trustee would distribute to the beneficiary all of the tax distribution.

- Only in very limited situations may a trust not described above be qualified to hold stock in an S corporation. The main situations involve trusts that were grantor trusts during the grantor's or beneficiary's life (but only for the two

[4636] Code § 1361(e); Reg. § 1.641(c)-1(i).
[4637] Code § 1361(d)(1)(B).

years following the deemed owner's death), estates (including a revocable trust taxed as an estate if a Code Section 645 election is made), and trusts that are funded upon termination of an estate (but only for the two years following funding).[4638]

III.A.4.c.iii. Advising Clients about the UPAIA Section 505 Changes

The common yet extreme scenario posited – where a mandatory income trust owns only an interest in a flow-through entity that limits distributions to tax distributions – presents difficult challenges for settlors, trustees, and beneficiaries. The changes to UPAIA section 505 allow the trustee to pay the trust's taxes notwithstanding these significant other challenges. One must consider why this difficult situation arises, what the trustee must do to alter the trust's investments if the trust agreement does not address the issue, and how to minimize disputes about what the trustee should do.

III.A.4.c.iii.(a). Why This Difficult Situation Arises

The first question is why the settlor would provide for a mandatory income trust, while expecting that no income will be available to distribute to the beneficiary? Scenarios include:

- *Marital Deduction Mandatory Income Requirement*. The trust is for a surviving spouse who does not need distributions but must provide for mandatory income to qualify for the marital deduction. The trust has the usual clause allowing the spouse to require the trustee to make the property productive. In some cases, using a separate trust to hold a flow-through entity without holding any other assets might be necessary to minimize the estate tax risk of buy-sell agreements.[4639] The Internal Revenue Service has taken the position that a fixed-price buy-sell agreement, in which the sale price of a decedent's equity is less than the Internal Revenue Service-determined fair market value, effectively passes property to a person other than the surviving spouse and therefore disqualifies the marital trust from being eligible for a marital deduction.[4640] If the client uses a fixed-price buy-sell agreement, the client might protect the marital deduction with respect to other assets by placing the other assets into a marital deduction trust that is separate from the trust that holds the client's equity. In such a case, the settlor should make sure that the spouse understands the trust's purposes and does not expect any distributions from the trust. If, however, the surviving spouse is adverse to the remaindermen, then the grantor settlor consider a prenuptial agreement or other ways of documenting a particular expectation of cash flow to the surviving spouse.

4638 Code Section 1361(c)(2). See part III.A.3 Trusts Holding Stock in S Corporations.

4639 In addition to the estate tax reason mentioned below, a QSST that holds only S stock (and no other assets) is not required to take any particular action to continue to qualify as an S corporation shareholder within two years after the beneficiary dies. Code §§ 1361(c)(2)(A)(ii), 1361(d)(1)(B).

4640 See part II.O.2.c Effect of Buy-Sell Agreement on Marital Deduction, especially fn 2700.

- *Future Income Expected*. The settlor does not expect income to be generated initially but expects the business entity eventually to generate income and does not expect the beneficiary to need the income until later. In this case, the settlor might consider describing the settlor's expectation regarding income so that the trustee has more guidance on what the settlor expects and can respond to concerns that the income beneficiary might raise.

- *Post-Mortem Business Sale Expected*. The settlor wanted to mandate income distributions, knowing full well that the business would need to be sold. The settlor might not have been able to find a buyer while alive, might have wanted to have a place to work for as long as the settlor lived, or might have wanted to wait until death to save income (including capital gain) tax on the sale.

III.A.4.c.iii.(b). What The Trustee Must Do To Alter The Trust's Investments If The Trust Agreement Does Not Address The Issue

The Uniform Prudent Investor Act (the "Investor Act") imposes various requirements:

- The trustee must consider "the purposes, terms, distribution requirements, and other circumstances of the trust."[4641]

- The trustee must further consider not only total return from income and appreciation of capital but also needs for liquidity and regularity of income.[4642]

- "A trustee shall diversify the investments of the trust unless the trustee reasonably determines that, because of special circumstances, the purposes of the trust are better served without diversifying."[4643]

- "Within a reasonable time after accepting a trusteeship or receiving trust assets, a trustee shall review the trust assets and make and implement decisions concerning the retention and disposition of assets, in order to bring the trust portfolio into compliance with the purposes, terms, distribution requirements, and other circumstances of the trust, and with the requirements of this [Act]."[4644]

- "If a trust has two or more beneficiaries, the trustee shall act impartially in investing and managing the trust assets, taking into account any differing interests of the beneficiaries."[4645]

Thus, absent an expression of intent to the contrary, the trustee has a duty to sell enough of the business interest to generate income sufficient to fairly balance the income beneficiary's interests against the other beneficiaries' interests; note that a sale might not be required if the business already generates sufficient income to create that

[4641] Section 2(a) of the Investor Act.
[4642] Section 2(c)(5) and (7) of the Investor Act.
[4643] Section 3 of the Investor Act.
[4644] Section 4 of the Investor Act.
[4645] Section 6 of the Investor Act.

fair balance. The trustee also must sell enough of the business interest to create a diversified portfolio. Therefore, for all practical purposes, the trustee must dispose of substantially all of the business interest.

The trust agreement can expressly modify this duty to sell. It might include some or all of the following provisions:

- Expressly authorize the trustee to hold the property (for a particular period of time or indefinitely), notwithstanding its failure to produce income and notwithstanding any requirement to diversify that might otherwise apply. However, this authorization might be insufficient when the stock is performing poorly.[4646] Although the lower court's decision was reversed, it indicates what some judges might do. Also, such a provision cannot be used for marital deduction trusts if it would deprive the surviving spouse of the right to income.[4647] The author routinely includes language authorizing the spouse to require that the trustee either make the trust's property productive or convert it to income-producing property within a reasonable time.[4648]

- Subject to the marital trust concerns described above, require the trustee to hold the property (for a particular period of time or indefinitely). The authorization to hold might be viewed as requiring the trustee to consider the merits of selling even if it places less pressure to sell, whereas the requirement to hold should remove any requirement to consider selling.

- Give family members interested in the business the power to direct the trustee to hold the business interest. Some states completely relieve the trustee of liability for following directions that the trust agreement authorizes; others might implicitly impose a duty to resist instructions if the instructions appear inconsistent with the trustee's duties to various beneficiaries.

- If the trust is not a marital trust, add as beneficiaries those family members working in the business by stating that a purpose of retaining the business interest is to provide jobs for those family members. Even if the trust agreement does not provide for distributions to them, some steps should be taken to recognize their interests; otherwise, the trustee has no duty to protect their interests.[4649]

[4646] *Testamentary Trust UW Dumont* , 791 N.Y.S.2d 868 (Surr. Ct. 2004), reversed *In re Chase Manhattan Bank*, 809 N.Y.S.2d 360 (N.Y.A.D. 2006).

[4647] Regs. §§ 20.2056(b)-5(f)(5) (general power of appointment marital trusts), 20.2056(b)-7(d)(2) (same rules apply to QTIP trusts).

[4648] Reg. § 20.2056(b)-5(f)(4) suggests such a provision if the trust's assets consist substantially of unproductive property. However, Reg. § 20.2056(b)-5(f)(5) looks to the trust's overall return and approves of distributing principal to make up for lack of income from any nonproductive assets, so such a provision can relate to the trust's overall level of distributions, rather than requiring that each asset be productive.

[4649] Section 5 of the Investor Act.

III.A.4.c.iii.(c). How To Minimize Disputes About What The Trustee Should Do

The most effective way to minimize disputes is to have legally binding, unambiguous language in the trust. However, being too detailed might unduly tie the trustee's hands when the settlor really wanted to rely on the trustee's judgment. It is impossible to predict the future, and giving the trustee flexibility is often the best call.
